QUAKER JOE. (Crawf. Slack.)

I wonder if the old-time friends which I knew years ago Were better than the folks are nowor do I just think so

Well! This I know for certain, that in yester years agone, Folks didn't seem so selfish, did not live for self alone.

The Christian deeds of charity, 'way back in Farmersville, To think of through declining years

How often in the memory I live back in seventy-nine,

Among those quaint old-fashioned folk with precept so divine; There's the home-cot of my mother, with its comforts and its joys, And there the creek, the water-mill,

where I played with the boys; an see the kind old miller with I can see the kind old miller with his hair as white as snow,

Who was known throughout the district as "Good Old Quaker Joe."

I can see him at the mill door, with we lads a-setting 'round,
As we listened to his counsel, inter-

esting, though profound; nsel based on truth and wisdom, which we took not serious then.

which we took not serious then,
Which in after years, I'm certain,
served to make us better men.
He did not teach of war or strife,
ner what the same might yield,
But this: the doctrine of good-will
for all mankind afield.

He was a purse to poverty, a solace

Even his faults were virtues, he to faults in others blind,

wish that I could go
And live again with real folks like
Grandad Quaker Joe.

about his Quaker creed, he seemed always looking for humanity in need;

As I've wandered 'round the country I have found friends kind and true, But self-denying friends as he, I've

also found are few;
There's reality in religion, though it
may have doubting foes,
But it wouldn't so many if there
were more Quaker Joes.

Interscholastic Rugby

Once again the local rugby team has met defeat in the interscholastic league, meeting the Perth Collegiate this district for a number of years, team on Saturday, Nov. 1st, at Perth, but recently appointed to the importhas met defeat in the interscholastic the game proved fast and interest-ant position of clergyman of the lo-cal Methodist church, expressed his

the wind in their favor. By line plunges and forward runs the Perth boys succeeded in bringing the ball near the Athens goal line, and in a few minutes scored for 5 points.

points. Our boys were now on the defensive and were playing desperately to hold the score as low as possible, but owing to greater weight ronto. and speed of some of the opposing players, toward the close of the fourth quarter the Perth boys again crossed the Athens goal line. The game closed soon after, the final score being 18-0 in favor of Perth. So far Perth has not met a defeat, beating Smiths Falls and Brockville in both games. Smiths Falls will play here on Nov. 8th.

The line-up was as follows:-Athens—Snap, Hanna; insides, ken Fair, Hollingsworth; middles, Mainse, Tennant; r. wing, Holmes; l. wing, Hall; flying wing, McFadden; quarterback, Johnston; halves, Beale, Russel; fullback, Layng; spare, Rah-

Presentation and Address

On the evening of Thursday October 30th members of Athens Methodist Church Choir and friends to the number of about forty assembled at the home of Mrs. M. E. Derbyshire on Henry St. to pay a farewell visit on theeve of Mrs. Derbyshire's removal from Athens. The time passed rapidly in social intercourse enlivened with several excellently rendered piano sections, and vocal solos.

After the serving of dainty refreshments an address was read by Reeve M. B. Holmes and presentation made by Mrs. Clara Chant.

Following is the address: -- Mrs. M. E. Derbyshire: --

Assembled in your beautiful home, on this occasion, Members of the Methodist Church Choir and friends wish to give expression to thoughts which crowd in at this time.

For years it has been our privilage to know your household in genial friendship, and we do not forget that when the laugh was merriest your presence added pleasure to the occasion while on the other hand when sorrow visited our

Co-incident with this your influence as orginist and director of music and singing has been decidedly uplifting and helpful to us and to the Chmniunity at large, and you have given un-stintedly of your time and assistance in the various departments of work in the church

Learning, however, that you contemplate removing (temporarily we hope) from Athens, we your friends assembled would beg your acceptance of this "Gold Cresent and map!e leaf set with pearls" as a slight token of the high regard and esteem in which you are held.

We would respectively call your attention to that which is depicted in this "Gold Souvenier," and which has had full exemplification in your many excellencies in person and life in our midst, and which we trust will be manifest and have its culmination in the coming years: --

Note;-The "Maple Leaf" the emblem held dear by one and all; the "Cresent" fashioned after the luminary of the night which continues and increases in its dignity and influence until lost in the glory of the mid-day sun, The setting of "Pearls" tell of your helpful and kindly acts along life's pathway,

We read this as stated and apply it to your life in our midst, and we trust that the coming years may have much of happiness and good for you. "That the nights shall be filled with

musie, And the cares that infest the day Shall fold their tents like the Arabs And as silently steal away."

Signed on behalf of Athens Friends, M. B. HOLMES. Athens, October 30, 1924.

Mrs. Derbyshire was taken entirely by surprise and was visibly affected but replied in terms of high appreciation with well-chesan words and in concluding expressed the hope that she might some time again take up residence in Athens.

Rev. H. E. Warren (Pastor) and others spoke euologistically of Mrs. Derbyshire's benificent life and service in Athens and the event was brought to a close at "high twelve o'clock" by singing "Auld Lang Syne."

Love Gives Itself

THE STORY OF A BLOOD FEUD

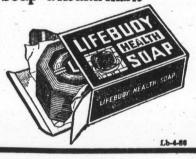

BY ANNIE S. SWAN.

CHAPTER I.

"Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods. in her voice. "Then I should have re-joiced to-day, if only he had been in

family characteristics, certainly, had never been of the careful, prudent, or hoarding order. Then, there were all the economic reasons the declin agricultural values, the increased bur-Minard's Liniment Heals Cuts.

HEALTH EDUCATION

registon will be glad to answer questions on Public Health units through this column. Address him of Specime House, Specime

rives at school age with its physical defects, if any, uncorrected. The medical supervision of school children is at the present time much more in vogue than the supervision of the preschool child. This is, in a sense, researched earlier, they would not sause so much trouble, and it often happens that when the child has arrived at school age, the defects have already caused irreparable damage. A squint, for instance, unattended to in early childhood, will result in defective vision which often cannot be successfully treated after the child has reached the age of five or six years. Numerous cases have come to the attention of child welfare workers where a squint was alowed "to right itself," and in consequence the child a year or two later has practically the use of enly one eye.

Within the past year or two, an attempt has been made in all well-organised health centres; to continue the work of child welfare through the prevaluation of the problem of the movement, the scope of the work was largely limited to infants and the period from birth to the attainment of ene year of age. It is now recognized, however, that the child between infancy and school age cannot be excelled from any system of control and supervision if the best results are to

Keeping school children up to a normal standard of health and efficiency is an important part of public health work at the present time. One reason for the urgent necessity of this work would seem to be due to the fact that, health during the early years of as a rule, very little medical or nursing supervision is given to the preschool child, and consequently it arrives at school age with its physical thefects, if any, uncorrected. The medical supervision of school children sat the present time much more in ing infant and child life is now viewed

The New Easy Way to Have **Beautiful Waxed Floors**

Every one can now have beautifully polished floors and lineleum with little effort—no stooping and at small expense. All you require is Johnson's Liquid Wax and a Johnson Liquid Wax Mop.

For centuries wax has been recognized as the most artistic, sanitary and durable finish for floors and this is the new easy way to apply it.

It's a small comlambs-wool m o p especially adapted for ap-plying wax to floors and linoi-eum. Will prove a great time and labor saver.

amount of wax on the mop and apply to the floor with a natural mopping motion, being sure to spread the wax

JOHNSON'S LIQUID WAX

Johnson's Liquid Wax is the most satisfactory finish for all kinds of floors—wood, linoleum, tile or composition. It not only beautifies, but protects and makes floors easy to care for, giving a hard, sanitary, dustiese surface. Johnson's Liquid Wax cleans, polishes, preserves and protects—all in one operation, Johnson's Liquid Wax will make your floors beautiful, easy to care for—they won't be slippery—and will not heel print.

"The Wood Finishing Authorities" BRANTFORD, CANADA

If the Comet Came.

The astronomical hunters of the sky are after big game. They are looking for the arrival of a monster comet.

Not one of the "hairy stars" (as the

incients call them) that journey around the sun in vast elliptical orbits. returning to our neighborhood at regular intervals, but a visitor from the outer void of space.

such a stranger comet of large size makes its appearance in the heavens. The next one is almost due, and the comet-hunters are watching for it. Some astronomers specialize in hunt ing for comets. They use for this pur-pose a peculiar kind of telescope, of low power but wide field of view

There is more than a purely scientific interest in the discovery of a new comet. Astronomers have long since concluded by purely mathematical rec-koning that a comet is likely to hit the "head on" sooner or later. Novelists have dealt with this possi bility and have drawn fantastic pictures of what would happen to our earth if it collided with a comet. And scientists agree that in the event of such a catastrophe the entire population of the world might be destroyed by the poisoning of our atmosphere from the gas carried by the comet.

The head of a comet is gas-lit. consists of a relatively solid "nucleus" which looks like a star—in some cases thousands of miles in diameter, sur rounded by an immene envelope of burning gas

The quantity of gas carried by a big omet may not probably be greater than the earth's entire atmosphere. One can imagine then what might be the result of a profuse mixing of this gas, very probably unbreathable, with

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day it is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wanted—A National Anthem

The Government of the Irish Free State is seeking a national anthem for Ireland, and a competition has been suggested as the best means of find-

Curiouly enough, the only European national anthem written to order was the Norwegian, composed by the poet The old Portuguese national hymn is unique in that it was written by an emperor, Dom Pedro of ledge, do we find a group of people, ex Brazil; although the ex-Kaiser antremely diverse among themselves, apnounced during the war that he had propriating a whole literature written a new hymn for the German nation. Apparently, however, it was never published.

The famous Russian national an them is noteworthy in that the tune, by the composer Lvoff, was written be fore the words, which were composed afterwards by command of the Czar.

The authorship of our own Nationa Anthem has never been definitely settled. Its tune has been appropriated by both Germany and Denmark for national hymns.

Whatever his vocation or station in life, the thing which each should strive for most earnestly is the unqualified approval of his own soul. This will outweigh all honors, all riches, all fame, and will give him that power and courage which will enable him to outride in safety all the storms which may assail him on life's voyage.

NEW STREAGTH FOR WEAK STOTACHS

Indigestion Disappears When

The urgent need of all who suffer rom indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food taken. In this condition some people foolishly resort to purgatives, but these only

cause these pills enrich and purify the blood. This is the natural process of giving strength and tone to the stomach, and it accounts for the speedy relief in stomach disorders that follow the use of Dr. Williams' Pink Pills. The appetite revives, food can be taken without discomfort and the burden and pains of indigestion are dispelled. Miss Mollie Averill, Clan-william, Man., proves the value of these pills in cases of this kind. She says: "Some years ago I had a terrible attack of stomach trouble. My stomach rejected all food and I could not even keep down a light custard. tried some tablets recommended for dyspepsia, but they did not do me a particle of good. Then I got medicine from a doctor, but with no better re-sults. By this time I had changed from a robust, healthy girl to a com plete skeleton, losing flesh daily. Then my parents asked me to try Dr. Williams' Pink Pills and I began their use. After taking them for a short time I began to feel better and con-tinued the treatment until I was completely restored to health. Since, on rare occasions when I have felt the need of a tonic, I turn to Dr. Williams Pink Pills and they never disappoint me. Most members of our family have

them to all in need of a reliable tonic. You can get these pills from any necicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Demand for Bible Proves People's Real Need.

the newspapers that the presses which print the Bible cannot peep pace with the demand. How did this demand arise? What maintains it? Why do people buy and read this ancient book when they can buy and read so much that is newer, fresher and on the sur face at least, more directly suited to their twentieth century needs? writes

The phenomenon calls attention to

Demand is always in proportion to the quality of the supply. That is all. There is no further mystery. It is with the Bible as with everything else. Where there is that which meets s need, those who feel the need will turn to it. No fictitious sentiment would keep the printing presses of the Bible working overtime. No pietistic or sec tarian or ecclesiastical incitement could, year in and year out, support s sale which possibly equals that of all the rest of the books of the world put

together. Life does not work that way. Noth ing is continually and eagerly bought and paid for which is not worth its price to the purchasers. Deception or overestimaion may rule for a time, but it is discovered in the long run. If in the long run the demand for any article is greater than it ever was, we may depend upon it that there is value is that article winch is not to be found elsewhere.

There, then, is the basic reason for the Bible's authority—its vallue. Make all the allowances you like for the un-read Bibles on the shelves of homes, schools and churches, and there still must remain a vast number of persons in the world studying these books and finding in them truths essential to their welfare.

WOMEN'S INSTITUTE CON-VENTION.

Women's Institute members in the Eastern Ontario sub-division will be interested in the convention held last week at Ottawa in Chateau Laurier where a large delegation assembled to report upon the various activities in which the different branches have engaged during the past year, and to plan together regarding enterprises to be undertaken in the year to come

As a united sisterhood we must labor unceasingly for the amelioration of conditions in the home, in the community, and in the Dominion. As usual, the genial superintendent of Women's Institutes, Mr. Geo. A. Putnam, Toronto, and his worthy assistant, Miss E. Chapman, were untiring in their efforts to make the occasion a success. Mrs. R. H. Grant, Hazeldean chairman of the course. Hazeldean, chairman of the conven-tion committee, Mrs. G. R. Bradley, Ottawa, and the other members of the executive are to be congratulated upon the excellent programme provided, and the splendid spirit of cooperation that prevailed throughout the sessions. sessions.

A civic welcome was extended by A civic welcome was extended by Hon. Mr. Grisdale, Deputy Minister of Agriculture, and an invitation extended to visit the Experimental Farm. Addresses by Dr. Maloney Provincial Health Officer, and Dr Helen MacMurchy, of the child welfare department, gave much food for thought. A very able address by Mrs. Aitken, Beeton, on "Organizing a District for Effective Work," was particularly worthy of note, as was particularly worthy of note, as was also an address by Miss Stella McGarry, Drummond Centre (a wee girlie of eight), on "What the Women's Institute can do for our

family enjoyed a pleasant motor trip to Arnprior on Saturday last, visiting in the home of Dr. and Mrs. G. B.

Mrs. O. Nuttell is suffering from a badly infected hand.

PROPOSAL TO FORM **WOMEN'S INSTITUTE** MAITLAND VILLAGE

Meeting for This Purpose Will be Held Shortly.

OF THE DISTRICT

Noah Shook, Former Resident, is Buried in Athens Cemetery.

Maitland, Nov. 3.—For the 'purpose of organizing a branch of the Women's Institute in this village, a meeting will be held in Skinner's hall on Saturday, November 15, at 2.30 p.m. to which all women and girls over the age of 14 years are invited. Maitland is one of the few communi-ties in the district which does not al-Maitland is ready possess a branch of the men's Institute.

PHILIPSVILLE.

Philipsville, Nov. 3.—The district convention of Sunday schools will meet here on Nov. 12th in the Methodist church, and addresses will be given by prominent men who have given their time and talent to the will be served in the church hall and there will be two sessions, at 2.30 p.m. and at 7.30 p.m. All interested in the work should attach to the p.m. and at 7.30 p.m. All in this work should attend.

Allen Haskins, Mrs. Putnam, and Mr. and Mrs. R. Stevens were in Smiths Falls recently.

Mr. Harvey Davison, of Syracuse, spending a few days with his Miss Pearl Grey is spending a few days in Elgin, as her mother is not

A Hallowe'en party was held at Hilliard Davison's on Friday even-

ing.

Mr. Dennis Downey, of Brockville, spent the week-end at his mother's, Mrs. Julia Downey. On Sunday Mr. and Mrs. Clifford Ralph, of Delta, ioined Mr. Downey, his mother and sister, Miss Mamie Downey, and Miss Ella Dwyre on a motor trip to Kington and Cananous.

Ella Dwyre on a motor trip to Kingsten and Gananoque.

Mr. and Mrs. P. Nolan spent Sunday in Brockville.

W. C. Stevens has left on a hunting trip up north.

Institute News.

The social evening of the Women's Institute was held in the month of Detober and proved very entertaining. Mrs. Isaac Stevens had charge of the program, and fun and merriing. Mrs. Isaac Stevens had charge of the program, and fun and merriment reigned supreme. A chorus of oung ladies garbed in gowns of "other days" sang popular and old-time songs, under the leadership of Tr. Donald Elliott, who proved a cry demonstrative musical instructor. Then a "mock" court was held while leading citizens were brought before the judge on serious charges. Their punishment was grotesque and aughable to those who were fortuate not to be called before "Herlonor," who proved to be Miss Lulonor," who proved to be Miss Lu-ille Whitmore.

Mrs. Maude Davison then gave a

reading in her usual good way, enti-led "The Prairies." The program was then brought to a close, after which a nice lunch was served, con-isting of salads, sandwiches, cake, ic and coffee. There was an attendince of about 130, and all went home feeling they had spent a good even-

GETTING IN FARM ICE

Harvesting This Good Winter Crop In the Best Way

uccess Depends on Ten Conditions -Ice-Houses May Be Cheaply Constructed — Harvesting the Crop — Maintenance of Farm Work Horse (Contributed by Ontario Department of Agriculture, Toronto.)

It is now none too soon to make preparation for the winter harvest of the ice crop. Some may be for the first time planning to harvest some ice this winter, and they will in all probability need to construct some sort of a building or bin in which to store it. Those who have regularly stored ice may have to make some alterations or repairs to the old ice storage. In any cass it is a good policy to make the neces-sary preparations early, and so have everything in readiness when the time comes to cut and store the crop.

Success Depends Upon Ten Conditions The style of ice storage really does not count provided the following conditions are fulfilled:

(1) That the ice be cut from a body of clean water and be free from weeds and sediment.

(2) The cakes should be cut regularly, and all of a size. The ice should be at least 12 inches thick. (3) The ice should be stored on a cold, dry day.

(4) The cakes should be packed (4) The cakes should be packed together as closely as possible with-out any sawdust or other material between them. Any spaces between the cakes may be filled with finely

broken ice or snow. (5) Plenty of dry sawdust, at least 12 inches, should be packed between the mass of ice and the walls of the enclosure, and even a greater depth below and above the

(6) The top of the ice storage should be provided with good circulation for air in order to prevent accumulation of warm, stagnant air over the ice. This point cannot be nphasized too strongly.

(7) The ground below the ice pit

should be well drained in order to readily carry off the waste from the (8) The wall around the bottom

should be air-tight.

(9) The ice should be kept well covered with dry sawdust all sum-

mer after each time ice is removed. (10) As far as possible the ice storage should be out of the direct rays of the sun, but yet in a place where there is good circulation of air. Ice-Houses May Be Cheaply Constructed.

It is possible to secure most of these conditions in a very cheap and simple construction, and therefore the storage of ice need not give one much concern. The better style ice-house is usually constructed of a wall consisting of one layer of boards on each side of 2 x 4 studs, the space between being left empty.

Ice can be kept successfully in various sorts of storages: A large bin made of single boards nailed on ordinary studding or cedar posts and located inside some other building, as a shed or barn: or outside as simple lean-to on the shady side of a large building; part of a hay-mow; an old silo; or a more costly and attractive building usually called the ice-house or cold storage building.

Most of the ice stored on farms is used for cooling milk and cream and keeping it sweet for short periods. When both milk and cream are cooled it is necessary to store 11/2 tons per cow kept, this amount cooled it is necessary to store covering a reasonable waste by meltage in the storage. If a refrigerator is used in the house or adjoining the storage where foods for the table are kept, 2 or 3 tons extra should be stored.

Harvesti

This crop is not the pleasantest one the farmer has to handle, as it is usually pretty cold and wet work. Lots of good company while working at the job is a great help, and therefore co-operative effort should be carried out in this line of work. The can be done more efficiently. quickly, more economically and un der more pleasant conditions than by the single-handed method. The job is worth while, and, if gone about in a sensible manner, is not too objectionable-certainly not nearly bad as standing at the tail-end of a threshing machine.

The Department of Physics, O.A.

Guelph, will gladly supply bullett and blue-prints describing ice-house small cold storages and refrigerators, and describing in detail how the harvesting is done. Write us early. -R. R. Graham, O. A. College,

There might be an excuse for using an inferior sow if you already have her on the place, but we can not think of one single excuse for not think of one single exer using an inferior sire.

Until breeders mate animals whose factors determining producing ability are known to be for high production only, they are going to get many low and medium producers from parents that ar ancestry. are from high producing

Good For the Soil.

Not only does farm manure supply plant food but the vegetable or or ganic matter it contains also helps to increase the productivity of the soil. As this vegetable matter gradually breaks down, the acid products form-ed help dissolve and make available to plants some of the etherwise insoluble plant food in the soil. Further more, the humus helps retain moisture and improves the soil juxture.

PLUMBING AND SEWAGE

Systems Recommended Suitable for Rural Homes

Hot and Cold Water on Tap Is -Sewage Disposal—The Septic Tank - Extension Work of Physics Department—Watering the

(Contributed by Ontario Department of Agriculture, Toronto.)

Hot and cold water on tap, kitchen sink, laundry tubs, bathtub, shower bath, and water flush closet, and the necessary pipes for carrying away the wastes to some suitable sewage disposal system in the vard outside.

A very good system complete can be put in the average-sized home for \$350, and in view of the fact that it will last a lifetime with very little outlay for repairs, it is one of the best investments one can make. It will give you real worth while service every day for a cost of about 8 1/2 cents a day figured on interest and depreciation.

nd depreciation.
In the Physics Building, O. A. C. there is installed a complete plumb-ing system for inspection of students and visitors interested in this work. It demonstrates the simplest method possible of putting the various parts together, thereby saving both material and labor to the greatest possible degree. If you are interested drop in and see it, and maybe we can assist you in getting that very neces sary equipment in your home ern plumbing.

Sewage Disposal. To perfect the plumbing system referred to it is necessary to build some suitable construction for disposing of the sewage and waste from the home. In the country this must be either a cesspool or septic tank. The cesspool may be all right for a time in porous gravelly welldrained soils, but usually it is a menace to health by contaminating the water supply or becoming a nuisance whenever it overflows. The septic tank is the modern method, and gives good satisfaction as a rule. and gives good satisfaction as a rule.
We have a very fine working or
demonstrating model of it installed
on a large table in the Physics
Building, and it is very useful for
showing people just what the system
is like and how it operates.

The Septic Tank. It consists of a large concrete tank divided into two compartments by a vertical partition. The size for a single house is about 4 feet x 8 feet and 3½ feet deep. This tank holds the sewage long enough for a certain kind of barteria to destroy the solid matter. When the liquid accumulates to be a series of the ser lates to a certain amount a non-mechanical affair called a siphon empties one of the chambers into a tion bed, laid shallow under the ground. Any remaining sewage is de-stroyed in the soil by another kind of bacteria that live near the top of the ground. In this way these friendly bacteria are enabled to do a very

valuable work for us. This is science applied to a useful purpose.

We supply bulletin and blue-print to anyone wishing to build a septic tank. All necessary information is given in these, and by their helpful suggestions any handy man can build it. Cost for cement, siphon, fittings and tile amounts to about \$52. The Cost for cement, siphon, fittings tank may be located close to the house and the tile laid under the lawn or garden.

Extension Work of the Department

The extension activities of the Department of Physics assist those seeking advice or assistance in con-nection with the regular branches of the department's extension activities, including: Installation of water and sewage systems, lightning rod installations, drainage surveys, farm cold storage, silo construction, anti-freeze mixtures. Blue prints of septic tank

installation, hydraulic rams, protec installation, hydraulic rams, pratec-tion of wells, small ice cold storages, types of ice houses, water supply sys-tems and farm plumbing have been prepared, and are now obtainable up-on request from the Physics Depart-ment, Ontario Agricultural College, —R. R. Graham, O. A. College, Gualib.

Watering the Garden. Remember that a good soaking once a week is more beneficial than light sprinkling daily. Be judicious in your use of the hose. Leafy vegetables do not mind having their tops soaked, as well as the roots. But fruit bearing plants and vines, like tomatoes, eggplant, cucumbers, pep-pers and melons should not have the tops soaked at all. It washes away the pollen in the blossoms and is apt to cause blight and fungous

Don't water the garden in the heat of the day. Wait until late in the afternoon and when it has been given a good soaking it will have time to soak into the soil to enable you to rake up the surface easily next morning, preventing the soil baking and conserving the moisture. Regular soakings for the ever-bearing strawberries and other small fruits, followed by mulching, will prolong the fruit bearing season and improve the quality. Too much watering of grape-vines tends to cause an excess of cane growth but a reasonable amount is desirable.

Maintenance of Farm Work Horses Considerable work was done during the winter of 1923 by the Department of Animal Husbandry, Ontario Agricultural College, to ascertain the cost of maintenance of the farm horses. For heavy horses at teaming work necessary around the farm, such as drawing manure, etc., it cost from 31 ½ to 36.6 cents per horse per day for feed, stabling and care. The cost of feed was 54 per cent. of the tetal cost of maintenance, and the cost of labor was 22 per cent. of the total cost. Horse labor during the winter cost 21.6 cent. of the total cost. Horse cents per hour.

"At the head of all the sciences and arts, at the head of civilization and progress, stands—not militar-ism, the science that kills, not commerce, the art that accumulates wealth—but agriculture, the mother of all industry, and the maintainer of human life."—Garfield.

Here and There

"Moose are plentiful in the Chap-leau, Ont., district, and hunters can secure a good 'bag' of deer and bear," says J. W. McVey. Experienced guides can be obtained and hunters are assured they will get their limit.

"One of the things for which Canada is most to be congra ulated is that she has established a system of education that compares favorably with any in the world. Canada is a nation of literates, she has a remarkably small proportion of illiterates," stated the Right Hon. H. A. L. Fisher, former Minister of Education in the British government, when disembarking at Montreal:

One of the many gifts offered by enthusiastic individuals to the Prince of Wales on his visit, the majority of which he could not for obvious reasons accept, was a package of French-Canadian tobacco grown on a farm at St. Roch l'Achigon, situated hear the boundaries of Monecalm and Assemption counties. In Pletter from the Alberta ranch the Prince through his secretary inches the decorror the gift.

A cab'egram from London, England, quotes an article in the "Financial News" dealing with the British Empire Exhibition. It stresses the exceptionally fine exhibit staged by Canada and the unquestionable benefit to trade relations it has effected. The article pays a high tribute to the Canadian Pacific Railway exhibit, describing the railway's gorgeously illuminated map of Canada, with its 5,000 incandescent lights as probably the most brilliant specimen of cartography ever seen at the exhibition or elsewhere.

It has been announced that H. J. Logan, M.P. for Cumberland, will accompany the Minister of Trade and Commerce to the West Indies to negotiate a new reciprocal treaty with those islands. The general purpose of the visit is to admit West Indian commodities free in return for Canadian manufacturers receiving similar treatment, the products of the two countries being entirely dissimilar. It is also hoped to build up a direct system of importations through Canadian ports instead of through the United States, by which route a great proportion of West Indian products now come to Canada.

The Canadian Pacific Railway has appointed P. A. Cox, general agent, to be assistant Oriental manager, at Shanghai, and E. F. L. Sturdee, acting general passenger agent for the Orient, to be general passenger agent for the Orient, with headquarters at Hongkong. Solloway, recently appointed asiatic freight agent, with offices at Montreal, and supervision over Oriental and Australasian traffic via Pacific ports, has the distinction of being the youngest official in the Canadian Pacific Service. He was born in Vancouver, in 1895, and has been in the steamship freight service 14

PRAYER FOR THE WORLD'S REBUILDERS

(By Theodosia Garrison.)

We send them off to school again

This cool September morning, the street

Is musical with pacter of small feet, And little, shining faces all the way, Seem wayside posies for our smiles

I wonder if they ever guess or know With what strange tenderness we watch them go?

Just children on their way to school again? Nay, it is our to watch a greater

thing-These are the World's Rebuilders, these must bring Order to chaos, comforting to pain, And light, in blasting fifeds, new fires

Dear Lord, Thy childish hands were weak and small, had they power to clasp the

of spring.

world withal. Grant these, Thy little kindred, strength as true— They have so much to learn, so much to do.

YE TOWNE GOSSIP

("K.C.B." in Seattle Post-Intelli-

SHE LOVED him OR SAID she did AND I guess she did IN HER own way AND I'M quite sure THAT HE loved her BECAUSE I know HE WAS kind to her AND VERY thoughtful AND HAD no eyes FOR ANYONE else BUT SHE was careless THE little attentions THAT SOME wives give AND IF it happened HE'D CUT a finger OR BRUISE a nail OR ANY old thing.
WHILE HE was working ABOUT THE house OR IN the garage OR IN the yard SHE WOULDN'T help TO BIND it up OR WORRY about it OR BE sorry for him OR ANYTHING AND SHE had a friend WHO USED to come AND VISIT her AND THE visiting friend WAS A motherly sort WHO ALWAYS wanted TO HELP everyone AND IF anything happened WHILE SHE was there SHE NEVER failed TO DO everything THAT SHE could do AND FIRST thing he knew FOR HIS lawful wife AND LOVED the other AND AFTER a while THERE WAS a divorce AND EVERYONE said WHAT A brute he was.
I THANK you.

FOR THE WINTER BOUQUET

There has been such wholesale painting of weeds and seed peds dur-ing the past two or three years that the great quantity of these painted bouquets in winter time has become tiresome and now we are again ask-ing for "a change" in dried flowers. There is really no reason why one

cannot have varied bouquets in the winter months as nature provides us with many beautiful seeds, seed pods, and evergreens which can be arranged with g'reat charm and have as great decorative effect as the

as great decorative effect as the graceful wayside flowers.

Milkweed stalks gathered before the pods burst and kept in a dry place are decorative so long as the silky seeds are left undisturbed. Just at present the roadside is plentifully supplied with the unbroken milkweed stalks.

And then in swampy ground is found the bulrush or cat-tail. These are very effective in design and should be cut before the seeds are flying and kept dry.

flying and kept dry.

The white flowers and greyish leaves of the Pearly Everlasting picked now or earlier are pretty mixed with the stiffer flower stalks. They may be dipped in many colors of dye and make effective decora-

Mullein stalks, tansy flowers, wild Mullein stalks, tansy howers, who teased and many seed pods are all attractive when keut dry and not frowded together in small vases. They all may be picked any time after the first frosts.

In arranging any of the duil dried stalks good effects are obtained by the use of bright colored hows, for

the use of bright colored bewls for

containers.
The bright berries of the mountain ash and the barberry keep well—in-deed until Christmas time and give Battery Charging a Specialty the bright touch of color lacking in many of the flower stalks.

Evergreens should not be overlook-

ed as features for decorations. Pines hemlock and cedar branches all keep well in water and the pungent quality of their essential oils is of pleasing With open eyes and an eye to art any one who knows the woods can have beautiful winter bouquets for

the gathering. Scatter grated raw potato over the carpets if you wish to clean them and freshen their colors.

MOTHER NEVER GETS A VACA-

A man's work is from sun to sun but a woman's work is never done. So runs the old saying. New Hamp-shire checks up and discovers that average woman on its farms works 4,000 hours a year. about eleven hours a day, Sundays included. Mother never gets a real vacation. Did it ever occur to you what would happen if she struck?

HOME MADE STAIN

A good and cheap floor stain can be made as follows: Dissolve two ounces of permanganate of potash in three quarts of boiling water and stir until the crystals are melted. Have the floor clean and dry and apply the stain with a large brush apply the stain with a large brush, going along the grain of the wood. As you apply the stain another person, with a thick pad of caligo must rub it well into the wood. When the stain is dry apply boiled linseed oil, this being rubbed in like the stain, when the floor or oil is dry with a when the floor or oil is dry, with a good floor polisher.

SPORTS WEAR SEVERE

Sports wear for the participant is severe, although distinctly chic, and the slippers and millinery are comparatively inconsequential items. invariably replaced by the Lenglen headband, so-called because the fair Suzanne never steps on the court without it. And ornate tenn's shoes have been discarded by the prominent racquet stars in favor of the simple ducive to rapid court covering.

HOUSEHOLD HELPS

Just a very few weeks more in which one may fill empty jers with jams, jellies and pickles, for so soon does Jack Frost descend and nip all growth that one finds autumn quickly taking on the cold of winter. Pears

will be available for some time yet, though the Bartlett pear will not last much longer. Many other varieties which are harder and bave not nearly so good flavor make excellent thick preserves or sweet pickle. One such delicious pickle is

Spiced Pears 7 lbs. hard pears

4 lbs. sugar pint vinegar

Lruised ginger root 1 lemon

oz. stick cinnamon

2 tablespoons whole cloves Peel, quarter, and core the pears. Make a syrup of vinegar and sugar.

Put spices and vinegar root in a cheesecloth bag and boil in the syrup pears are soft. Remove pears from returned home.

syrup and pack them in hot sterile jars. Boil the syrup down. When thick add it to the fruit in the jars.

lbs. pears 4 lbs. sugar (8 cups)
½ cup water

oz. ginger root Peel, core and cut into slices pear ot too ripe. Add sugar, juice of mons, and rinds cut thin. Break not too ripe. Break ginger root into small pieces, add and simmer all until thick as mar-malade. Bottle.

Green Tematee can be used in many ways, but a somewhat different dish which is

very good is

Green Tomato Mince Meat

1 peck green tomatoes
1 peck apples
6 lbs. (12 cups) brown sugar

2 lbs. currants 2 lbs. raisins

2 teaspoons cinnamon 2 teaspoons cloves

2 teaspoons allspice Cook all together 3 hours and hot sterile jars.

MARRIED MAN'S SUGGESTION

All the ladies of old England, It is stated, Claim the word "obey" should be

No more shall it be repeated. (The discussion is quite heated) But must always be deleted When they're mated.

Now the vital question is: Which word is fitted For the place obey has permanently quitted,
And so if it's not too late to,

I advise, althought I hate to, That "love, honor and dictate to" Be submitted.

TIMELY HINTS

Drink without eating and without drinking.

of water a day, nonwith meals, will make you free of the doctors

Wearing the same weight under clothing the year round will save you a lot of colds.

Dress cool when you walk yarm when you ride. Your nose, not your mouth,

given you to breathe through.

Don't sit still with wet feet. Walk until you have a chance to change. Never let a day pass without cover ing four miles on foot.

See how high you can hold your nead and how deeply you can breathe whenever you are out of doors. Getting angry makes dark marks

on the health. When you rob the car company by valking, you add double the value of fare saved to your deposit of health Sleep wooes the physicilly tired man; she flouts the mentally or ner-

ously exhausted. Loose clothes, loose gloves, shoes spell comfort and health.

Open windows don't make half as many colds as closed ones.

Efficient Farming

If you have not already practiced complete cleaning of your poultry house in the fall, make a resolution

to do so this year. Here are the steps which must be accomplished in a complete renovation and cleaning of the house:

The first step is to remove perches dropping boards, hoppers, drinking vessels and equipment of like nature. These should be taken out of doors in the sun for later cleaning and disin-

The next step is to remove all litter from the house. There are a number of ways of accomplishing this effec

If the manure spreader can be backed up to the house and the manure loaded and hauled out on the meadow and spread broadcast, it is the quick est, cheapest and most effective of getting rid of this material.

In the first place, the litter is rich in poultry manure and nitrogen, and will show up in an increased yield of hay the following season. In small flocks where equipment is not available the litter should be bagged in and spread on the land just as soon

After having removed all fixtures and litter, the next step is to dry-clean the house. This involves the If carefully studied it will give the sweeping of the walls, ceiling and the key to many little ways of increasing entire floor carefully and completely the yearly returns. in order to eliminate all accumulations of dirt, cobwebs and other accumulat

This must be done in considerable detail to be sure to get in all cracks and crevices, and considerable pressure on the broom will sweep much of the dirt and filth which other-

wise would be overlooked.

Pains should be taken to see that dirt is gotten out of the corners and around studding, in order to get the house just as clean as possible. Mus-lin curtains should be beaten and swept to get all the dirt out of them. This step in the cleaning of the average poultry house is often neglected

Best Way to Disinfect-Next come the most important step in the fall housecleaning. That includes the complete disinfection of the interior of the house. This should preferably be done with a spray, although in small poultry houses it can be brushed on with paint or whitewash brushes.

The sprayer, however, puts the dis-infectant solution on with force, gets in cracks and crevices where the brush application would not be so effective. other hole for another charge at least Where one has spraying apparatus for fruit trees on the farm, there is nothing better than this equipment hole.

For the average poultry outfit a barrel sprayer with about twenty-five or thirty foot lead of hose is very satisfactory.

For coarse sprays with which there may be mixed whitewash solutions containing lime, there is nothing bet ter than a Bordeaux nozzle, for it can be so quickly and easily cleaned and the coarseness of the spray can be so readily changed.

For fine disinfecting sprays a whirling spray nozzle is always the most efficient, because it puts the spray on with great force and more or less as a mist, bringing about more equal distribution of the solution on the walls of the house.

Whatever type of spraying outfit is used, considerable pressure should be back of the spray in order to force it into the boards and cracks about the

It is a common practice, and right by so, to include in the disinfecting solution a whitewash mixture of lime and certain adhesive compounds, not only to cleanse the house but to whiten It up and give it an extremely neat and attractive appearance.

A Henhouse Whitewash-There are great many combinations of mixtures which can be used and many of them are effective, but for one who wishes to use a simple, easily mixed whitewash spray which sticks perfect ly to the house and which carries with it powerful disinfecting properties, there is probably none superior to the following mixture: Hydrated lime, one-half bag; common table salt, six pounds; molasses, one pint; ground alum, three ounces; and hot water,

Add one quart of some good disin-

nt beauty of the above formula is the fact that the hydrated lime does

Considering the small amount of that you can do which will yield a greater return in the direction of improvements in the poultry enterprise In no other way can accurate com-parison be made of one year's results

with another's.

A record of past accomplishment serves to make the daily care of the flock much more interesting, for one is then constantly striving to better the previous year's record. The satisfaction that comes from gathering on Thanksgiving Day 10 or 15 per cent. more eggs than the flock laid one year before can be appreciated only by one who has actually experienced it.

In a few years one will be able to establish, by means of the daily egg record, a sort of standard for his strain of hens and his particular conlarge burlap bags and hauled away the flock is measuring up at any particular time.

Similarly, the income and expense record gives a measure in dollars of and litter, the next step is to dry- the progress of the poultry enterprise.

Dynamite "Don'ts"

The list should be memorized by any one who uses explosives. Before handling any dynamite, glance over

this list to refresh your memory: Don't smoke while handling explosives and don't work with them near a light.

Don't leave explosives where stock can get at them. Cattle like the taste of soda and saltpeter, but other in-gredients might make them ill or even

kill them. Don't tamp in a charge with metal bar.

Don't be in too big a hurry to

Cleaning Poultry Houses—Many lime, but goes into solution readily poultrymen experience year after year continued losses from some of the most common poultry diseases, especially those that are of an infectious type, such as chicken pox, roup and canker.

Many of these same poultrymen could absolutely eliminate these diseases if they would but pay greater and more constant attention to questions of sanitation.

Though sanitation and cleanliness are important throughout the year there is no time when they are more important than in the fall.

Too many poultrymen proceed in the manner of careless housekeepers who sweep the floor by brushing the dirt under the stove or furniture. Such haphazard methods are really worse than nothing, because they offer the birds absolutely no protection or freedom from the germs of infectious in feedom from the germs of infectious in the continued to the floor should be into the covered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be incovered with four to six inches of soil straw litter, and the nests should be ready to the little same meal. CONSERVATIVES WIN VICTORY IN GENERAL ELECTIONS IN GREAT BRITAIN

Labor Government Defeated After Nine Months in Power -Standing of Parties Gives Baldwin Decided Lead.

This result is so decisive that Prime oppose them. Minister MacDonald may elect to resign at once rather than wait until November 18 and face a Parliament which will summarily reject his min-

Labor's downfall was not due to any falling away of its own supporters but to the sensation throughout the country, based on Lapor's treaty with Russia, followed by the "civil war" letter from Gregory Zinovieff, head of the Third Internationale, and attempting to inaugurate civil war in Great Britain and corrupt the army and navy.

The popular vote, rather than the make-up of the new House shows this clearly. So far the returns from 576 British House of Commons at dissoluthe 615 constituencies have been tion was as follows: tabulated.

These show that though Labor has lost thirty-odd seats, the party's gain in popular votes was three times as great as its gain in last year's election. In the 576 constituencies, Labor polled 5,463,000 votes, as against 4,-

A despatch from London says:—
With almost complete returns from Wednesday's general election now available, it becomes obvious that the Liberal party has been destroyed, Labor buried and the Conservatives, firmly entrenched in power for five years to come.

With only fourteen of the 615 seats still to be decided, it is plain the Conservatives will have a majority of about 200 over all other parties in the next House of Commons. The alignment so far is: Conservatives, 406; Labor, 154; Liberals, 40; Communist, 1. (In this calculation the few Independents are included with the group they usually support.)

This result is so decisive that Prime.

Wounded war veterans at Christie Hospital, Toronto, were not over looked in the voting when the citizens of Ontario were asked to decide be tween the retention of the O.T.A. or government control of liquor.

SUPPLYING CANADA'S TABLE

Rt. Hon. Ramsay Macdonald Labor Prime Minister of Great

Their Majesties and Prince of Wales to Witness Baseball

The first public appearance of the Prince of Wales upon his return home from America will be at a baseball game between the Glants and the White Sox, who began their European tour this week says a London despatch. The Americans are playing three games in London, and the Prince in a cable message, has promised to attend the last of the series, which is scheduled for November 9.

The King, the Queen and Prince Henry also have expressed their in-tention of witnessing the game. It will be the King's first view of the favorite pastime of the Americans and his Canadian subjects since the famous Army-Navy game in London just after the war.

Provincial incorporation of the Sas-katchewan Co-operative Elevator Co. Britain, whose government went down Ltd., of Regina and Vancouver, with to defeat in the general election of a capital of \$5,000,000, is announced in the British Columbia Gazette.

MOLSON'S BANK TO BE ABSORBED BY THE BANK OF MONTREAL

has been deposited in New York banks pounds of butter, 21,272,216 pounds of our natural resources enters intimate is to disappear in the taking over of 1883 Bank of Nova Scotla—Union Ight last year.

Very creditable, in view of the fact subject to the call of Germany, and at he returned from Canada only a can be shifted about at will in this milk and cream.

Index for banks pounds of our natural resources enters intimate is to disappear in the taking over of the Molsons Bank by the Bank of Prince Edward Island.

Bank of Prince Edward Island.

Montreal, announced in an orficial 1900 Provinciale Banque—La Banque

Lagrange Cartier statement. The Molsons Bank, founded in Montreal over 70 years ago, has 1901 Canadian Bank of Comm been in the hands of the commercial and financial family group of that 1902 Union Bank of Halifax-Com name since then.

> The absorption of the Molsons Bank by the Bank of Montreal is, of course, subject to the ratification by share-holders of both institutions, but there will not likely be any difficulty in securing it from both groups. The Acting Minister of Finance, Hon. J. A. Robb, has approved the transaction. The absorption of the Molsons Bank, one of the smaller banks of the Dominion, by a stronger bank has been expected on the street for some time, where it was regarded as a natural course of events. A testimony to the stability of Molsons, however, is to be found in the terms of the absorption, the Bank of Montreal giving two shares of its own stock for three of Molsons and a bonus of \$10 for every share of Moisons. The shareholders of Moisons will also receive their quarterly dividend, due January 1st,

The list of Canadian chartered banks is reduced to 12 by the passing of Molsons, as compared with 18 at the beginning of 1922.

Absorption of the Molsons Bank by the Bank of Montreal is the thirtieth bank amalgamation to take place in Canada since Confederation, and leaves only 12 chartered banks now operating in the Dominion.

THREE CANADIANS **FAIL OF ELECTION**

Col. Hamilton Gault Scores Striking Victory in Taunton -Greenwood Wins.

despatch from London says:-The Canadian candidates have done very well in this memorable election. Only three of them were defeated. Dr. Thomas MacNamara lost his seat in Northwest Camberwell; Col. Maurice Alexander failed in his attempt to reenter politics by winning North Nor-folk for Liberalism, and Canada's only Labor member in the last Parliament A. W. Haycock, was swept out of his Salford seat by a mighty tide of Conservative votes.

On the other hand, Col. G. Morder increased his majority in Brentford and Chiswick and Sir Hamar Greenwood succeeded in re-entering Parlia ment with his victory by 3,000 votes in East Walthamstow. Of the new members, Col. Hamilton Gault, by his Of the new success in Taunton, showed that his cipal claim to fame when she died.

The defeat of General Seely, Canadian cavalry commander during the war, by Captain Peter Macdonald, descendant of Sir John A. Macdonald, was a distinct surprise. Macdonald who was born in Nova Scotia in 1895. was educated at Dalhousie College and Trinity Hall, Cambridge. He is a member of the Inner Temple. He ers identified with the \$110,000,000

Generous Gifts

The immense value offered by The Family Herald and Weekly Star of Montreal this season is meeting with the success the publishers deserve. Their large calender for 1925 with the beautiful picture—"The Sale of Od Dobtin" is proving a very popular premium, while the Ten Thousand Dolar Election Contest is a record breaker. For those who raise clubs of new subscribers, there is a catalogue of some very handsome and useful rewards. The Family Heraldissecuring thousands upon thousands of new subscribers by their generous gifts, added to the super excellence of the paper itself; in fact few homes will be found without that great weekly when Two Dollars will because of the paper itself. The same so much.

WOLFORD TOWNSHIP HOUSE IS TOTALLY

Spark From Chimney is Blamed for Blaze.

NEWS OF BISHOP'S MILLS

Pupils of S. S. No. 12, Oxford, Entertain Their Mothers on Hallowe'en.

Bishop's Mills, Nov, 3.—The residence of Mrs. A. Powell, situated about a mile and a half from here, in Wolford township, was totally destroyed by fire on Friday about the noon hour. The first was first discovered on the wooden shingles on the roof of the house, and was evidently caused by a spark falling from the chimney. With the help of the neighbors most of the furniture downstairs was saved, but the occudownstairs was saved, but the occu-pants lost the remainder of their household effects and clothing. The high wind on Friday fanned the blaze and the frame structure was soon reduced to ashes. The building was insured with D. A. Cummings, Brockville. In her efforts to save some valuable papers, Mrs. Powell ascended the flaming stairway and was badly burned, but is recovering under medical care. under medical care. Mr. Fyckes and family occupied a part of the house, and they also lost some of their household effects. Miss

E. Flood, teacher, boarding there, also lost some valuable jewelry and clothing. A Hallowe'en party, under the auspices of the Women's Institute, was held at the home of Mrs. T. Streight on Friday evening, October 31st. About 60 attended and all had a very pleasant evening. Quaint and pretty costumes were in evidence, those of witches, ghosts, and historical characteristics.

witches, ghosts, and historical characters being represented. A good programme of songs, recitations, duets, music, was provided by the masqueraders, and refreshments were served. Fourteen new members were served. Fourteen new members were added to the Institute roll. The next meeting will be held at the home of Mrs. Clifford Dool.

Mrs. Chilord Dool.

Mrs. Frank Parks, of Gouverneur.
