"Squibographs"

Dry squads raiding blind pigs are bringing home the bacon.
Instead of humping across the Sahara on the back of a camel, travellers can now bump across in a flivver.
The London scissors grinder who died the other day worth \$6000 probably wore out one pair cutting off coupons.
Punctuation has been punctured in Toledo schools where the use of the semicolon and apostrophe has been abandoned.
Coney Island was recently visited by a destructive fire, but the "hot dogs" were fireproof and escaped with whole skins.
Uncle Sam is reported to be a little uneasy about France's delay in paying her war loan. "Lafayette, we are here." Please come across.
A Toronto man was fined \$5 for selling "hot dogs" on Sunday. He has lost faith in the old saying that "barking dogs never bite."
A wealthy New York widow who died the other day left a legacy of \$25,000 to her butler. Like advertising, faithful service gets results.
The present price of wheat goes against the grain of the farmer who was compelled to sell his product as soon as it was harvested.
The Toronto man who disregarded the command "woodman spare that tree" was fined \$5 for stealing a Christmas tree.
The fiftieth anniversary of the invention of the soda water fountain is recorded. There are now about as many "flavors" as there are varieties of pickles.
The new season's parasols are designed in crossword puzzle borders. The complexion protectors can be adjusted to point either horizontal or vertical.
Smudge built in the fruit belt to prevent frost so obscured the atmosphere in Los Angeles that arrivals in the city thought they had landed in Pittsburg.
The circulation of silver dollars is not popular across the border. The bulky coins leave little room in the rear pockets for first-aid-to-the-thirsty kits.
A costly and completely equipped new church was a Detroit magnate's Christmas present to the suburban community where he resides. All that is required of the congregation is to provide collection plates for the upkeep.

The only thing likely to obscure the bright outlook for 1925 is a total solar eclipse the end of this month. As it only lasts a few minutes and is not visible here business can proceed as usual.

It is proposed to bar horse traffic on certain Los Angeles streets. Dobbin refuses to comply with the regulations requiring tail lights to be carried after dark.

It is up to some efficiency expert to discover a use for the tons of auto license plates scrapped annually. Their numbers are too numerous to mention.

The spectacle of oil stock salesmen selling shares in the streets of Jerusalem may soon be witnessed. An American oil company is making explorations in Palestine.

A company has been organized in Paris to establish a chain of hotels for the accommodation of motorists crossing the Sahara Desert. With an "oasis" every few miles travellers can dispense with water bags.

An outbreak of hives among the inmates of an eastern prison is attributed to a monotonous diet of porridge and syrup. The afflicted contend that the time spent in scratching should be deducted from their sentences.

When the average small boy sees a new calendar he proceeds to compute the number of days elapsing before the next holiday. Good Friday is the next red letter date and the days are growing longer.

An inquest to determine the cause of the death of a Chicago woman revealed that she had taken thirty-six kinds of medicine during the six months preceding her death. The coroner's jury brought in a verdict of "chemical exhaustion."

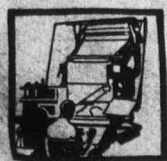

The Prince of Wales is reported to have sent a number of Christmas presents to friends whom he met during his recent visit. The cowboys on the E.P. ranch may be prodding their bronchos with spurs bearing the royal monogram.

The English custom of taking tea in the afternoon has not caught on in Canada, but a Toronto firm has thought up something just as good. It proposes to adopt a system of taking half an hour off in the afternoon for crossword puzzles. The dictionary may not be as stimulating as a cup of tea, but it diverts the mind from other worries.

HEALTH NOTES

[By Dr. J. J. Middleton, Provincial Dept. of Health]

CHRONIC digestive disorders resulting in malnutrition are the chief ailments affecting artificially fed babies. Various names are given to these conditions, viz.—atrophy, marasmus and wasting. The latter term is the best and most easily understood, the term atrophy being reserved for the more extreme degrees of wasting. Neglect or culpable ignorance may be the cause of some, but not all or atrophy and wasting. There are many of these infants who have naturally weak digestive organs, especially the children of tuberculous parents. Then again there are others who have abnormal or ill-balanced digestive functions with a certain amount of intolerance for one or other of the elements of a baby's food, viz.—protein, sugar, fat or starch. Such cases are difficult to feed artificially and are likely to require hospital care. The majority, however, are those who would have been healthy babies had not premature birth or the deprivation of healthy breast milk in the early months of life brought about wasting disorders. Often the best use has not been made of what breast milk there was, and sudden weaning is responsible for many digestive disorders, which could have been prevented by mixed feeding. Sometimes breast-feeding has been wilfully avoided, but more often with the best intentions it has failed. An infant ward in the hospital is better for this class of little patient. The best facilities are there provided for watching the stool and modifying the diet accordingly. The cases that should be treated in hospital are those where the home conditions are bad or whose parents may be tubercular, intemperate or neglectful. It is not likely that the parents are wilfully neglectful, but are really so through lack of knowledge of what should be done. Other cases requiring hospital care are those in which wasting has gone on to atrophy, for it is usually hopeless to try to cure such at home. Acute cases of infective enteritis or diarrhoea need prompt hospital treatment, but a special ward and staff must be provided to prevent the spread of the disease to wasting babies in other wards.

It must be understood that institutional treatment is not the ideal thing for babies. Compare for instance the conditions of life in a good home where the mother cares for her baby, with the routine of life in an infants' ward at the hospital. There cannot be the individual care or the privacy and quiet that the baby can get at home. In hospital there are risks of infection from other babies or from members of the nursing staff in whom a single cold in the head may give rise to bronchopneumonia in a weakly infant. Then the baby has to pass through many different hands each day of its life, an experience which is not good for the nervous system of a weakly infant which ought to see only one person—its mother.

The crying of other babies also causes great nervous disturbance in weakly babies and I believe this is the chief reason why it has been found that if more than five babies are together, they do not get on well. If a mother and a good home are available, institutional treatment is not to be recommended in the case of delicate babies with weak digestions, as the benefits of close medical supervision are not to be compared with the advantage of keeping the baby quietly at home with its mother and away from others. Better it would be if the home is in town or city to take the child into country air, in which the digestive powers often wonderfully revive, enabling the baby to digest what it could not have done living in town air.

Of course if an infant has wasting going on to atrophy, institutional treatment will be necessary, however good the home may be.

CAMLACHIE

Jack McFarlane, proprietor of the village garage, had the end taken off the third finger on the left hand on Monday morning. He was preparing to tow a car and in trying to slacken the rope caught his finger in the wheel of his car and pinched the piece off.

When cutting feed at Sherman Symington's, Thomas Blunden of the 12th line had his finger caught in the cutting box and badly injured.

Two large barns belonging to Duncan Smith, 12th line, were moved half a mile, the job being done in three days, a record moving by Messrs. Welsh and Jackson.

A splendid time was spent in skating and other amusements by the young people of the tenth line, at Thomas Patterson's on Friday evening. After skating the party went to the house and enjoyed lunch and further sociability.

Young Tender Leaves

and tips used in "SALADA" GREEN TEA
are sealed in air-tight aluminum foil. Their fresh flavor is finer than any Japan or Gunpowder. Try SALADA.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

The Peculiar Poverty of Germany

Because Germany lost the Great War there is an impression that the country is impoverished and is having a hard time.

A sidelight on the difficulties the German people are encountering to make both ends meet may be thrown when one is informed that the New Year's eve celebration in Berlin saw a million dollars spent on champagne and other contributories to the joyful nature of the occasion. Then they were staging another celebration last Saturday night which was to have marked the withdrawal of the Allies army of occupation. Of course it was necessary to make arrangements for this event far in advance. But the Allies decided to leave their army in Germany. However the Germans went ahead with the parties and another million dollars was shot in demonstrations in Berlin though the occasion had been changed in the official roster to a day of mourning. The outlay on dances and wines quite equalled that of the New Year's affair.

Not so bad for a country that claims to have been ruined by defeat so that it is not in a position to pay its war debts.

Within the past month the ginseng growers of Waterford have shipped ginseng to the value of nearly \$70,000.

Dumb Animals Remembered.

The noblest observances of Christmas are its charities. In all ages and among all peoples the poor have always been bountifully remembered on that day, and in many parts of England and Scotland even the lower animals are given an extra feeding that they, too, may have cause for rejoicing when all mankind are glad. Many readers will remember Burns' address of the auld farmer to his mare when presenting her with an extra feed of corn on New Year's day. "A guid New Year I wish thee, Maggie. Hae, there's a ripp to thy auld baggie."

To Avoid the Rush.

Soldier, just back from his harvest furlough, to the sergeant—"My father wants to know if I'll get another furlough at Christmas. Here is the picture of the pig that is going to be killed."—Fliegende Blatter.

Chocolate Sea-Foam Fudge.

Put over the fire in a clean saucepan one cupful of light brown sugar, a half-cupful of water and a third of a cupful of grated chocolate and boil without stirring until it spins a thread from the point of a spoon. Have beaten stiff the white of an egg; pour the boiling mixture upon it and stir until it begins to stiffen. Drop from a spoon on waxed paper in little bombs, or pour into a greased pan before it begins to stiffen and mark into squares with a buttered knife.—The Delinquent.

ASPIRIN

Insist on BAYER TABLETS OF ASPIRIN

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians 24 years for

- Colds Headache Neuralgia Lumbago
Pain Toothache Neuritis Rheumatism

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic acid ester of Salicylic acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Funeral Orator: "I have neither the time nor inclination to pass eulogies on the deceased." Auditor (stiffly): "As you please, sir; the words are anonymous."

Every settlement near Watford has, or should have, a local scribe. Let this scribe have the news and they will send it promptly to the Guide-Advocate Office, and do it not later than Monday of each week.

Miss Edith Tufts, a former teacher in Public school, who has been engaged in mission work in China, was married there on Dec. 27th to Dr. J. Lincoln McCartney, of Hankow, China. They will reside in Hankow.

The Farmers' Sun quotes with approval an editorial in the Chesley Enterprise in which it is pointed out that a village paying only \$873 into the County exchequer has as much voting power in the County Council as a township with a levy of \$20,356.

What might have been a tragedy was averted while the play, "The Mysterious Choreboy," was being presented at the Latter Day Saints Church, Wabash, on New Year's Eve, by Miss Margaret Robinson, one of the characters. The flames from an oil stove used in the play mounted upwards, and almost came in contact with a kerosene lamp. Miss Robinson quickly removed the lamp and extinguished the flames.

Duncan Ferguson, traveller for wholesale grocers of Windsor, met with a peculiar accident a few days before Christmas, which put him in Grace Hospital and will confine him there for several weeks. He was knocking some ice off his car in the garage when a flinty piece flew up and struck him in the left eye, cutting the pupil so badly that it did not respond to the treatment of specialists and the eye had to be removed.

Both had nerve. The youngster who got a grocer to take down a large order and figure up how much it came to—then coolly informed his victim that he wanted to know because it was the answer to one of his school sums, has a match in the Arkona woman who asked a busy grocer to name the different brands of flour he carried and when he had done so, expecting a sale, said she didn't want to buy any, she thought one of the names might fit into a cross-word puzzle she was doing.

The most patient man is a resident of Buenos Aires. With only a file, he had worked 11 years in making a miniature locomotive of scrap iron. The locomotive can be operated under its own power by the use of compressed air. The iron was not heated in the making but was worked cold. A small coal tender and passenger coach were made at the same time and the whole thing is a little more than six feet in length and weighs 170 pounds. More than 1,300 screws and 2,000 rivets were used in the work. The train is complete to the last tiny detail and is built on the model of the equipment used on the British railroads of that country.

Notices sent out by the post office department call public attention to the advisability of placing the sender's name and address on the upper left hand corner of all mail matter posted in Canada. By doing this, lost letters can easily be returned to the senders, instead of being sent to the dead letter office. When placing the return address on envelopes and parcels, care should be taken to make this less prominent than the address of the person to whom the piece of mail is being sent, the department points out. The use of different colored inks is also urged, together with the use of the word "from" before the return address. All mail, including first-class letters, should bear return addresses of this sort.

One day last week while threshing at the farm of Mr. Frank Maw, second line, Erin, the men were surprised to find wedged in between two mows of grain, a yearling heifer. The animal was the property of Mr. J. Edwards, a neighbor. Ten days previous several of Edwards' cattle had strayed to Mack's and got into the barn. In driving them home it was noticed that one of the missing but later a search for the missing animal was made, but without success. Both the owner and Mr. Mack were greatly surprised at the find. The animal had gotten in between the mows and instead of backing out had worked its way in quite a distance. It had failed in flesh, but will recover from the ten days' fast without water and only the dry ends of sheaf oats for fodder.—Acton Free Press.

WEDDINGS

BROWN-COLLIER (Vancouver Daily Province)

In the presence of immediate relatives and intimate friends only, an interesting wedding took place at Holy Trinity Anglican Church early on Monday morning, January 5th, when Lucie Evelyn Maud, eldest daughter of Mr. and Mrs. Herbert Walter Collier of this city, became the bride of Mr. Harold Corydon Brown. The ceremony was performed by Right Rev. Bishop A. U. de Pencier. Mrs. N. C. Schou presided at the organ. The bride, who was given in marriage by her father, made a charmingly distingue figure in her travelling suit of navy blue poiret twill smartly tailored. Her troubador shaped hat of velour felt, had an edge of old gold round the brim. During the signing of the register Mrs. Schou, organist of the church rendered the selections "I Love You Truly" and "Loves Coronation."

Following the ceremony Mr. and Mrs. Brown left for Victoria en route to the Northwestern states where the honeymoon will be spent. On their return they will reside at Dunbar street, Kitsilano. Both bride and groom are well-known residents of Vancouver. The bride, whose father has officiated for the past 15 years as Chief Probation officer of the Juvenile Court, has taught for a number of years in Vancouver's public schools. The bridegroom, who is one of the charter members of the Gyro Club and very active in amateur hockey circles, won distinction overseas, serving throughout the whole of the war, and in addition to the regular war medals covering service, was awarded a special decoration for bravery on the field.

The bride's father (Bert Collier) is an old Warwick boy, a brother of Mr. J. E. Collier, 2nd line, and will be remembered by many old residents of this vicinity.

Masonic Lodge Officers

WYOMING

Eastern Star Chapter A very pleasant evening was spent at the Eastern Star installation on Monday. About fifty Sarnia visitors were present, including the Grand Ruth of the district. Mrs. R. O'Neill conducted the installation, assisted by Mrs. Day as marshal, and Mrs. F. Richards as chaplain. The officers installed were: W. M., Sister Rawson; W. P., Bro. W. Rawson; A. M., S. Steadman; conductor, L. Dodds; associate, M. Travis; secretary, E. Davis; organist, Mary Maw; treasurer, V. McIntosh; chaplain, M. Goudie; marshal, M. Dennis; Ada, B. Maw; Ruth, Mrs. MacDonald; Esther Mrs. McIntyre; Martha, Mabel Maw; Electa, Mrs. Fleming; warden, Mrs. A. Robertson; sentinel, W. Steadman. After the ceremony lunch was served and music and a social hour enjoyed.

Burns' Lodge The officers for Burns Lodge, No. 153, A. F. & A. M., installed recently are: Past master, W. F. McEwen; worshipful master, A. McManus; Sr. warden, Rev. W. J. H. Petter; treasurer, Leslie Travis; secretary, R. Hart; chaplain, Joseph Rooke; director of ceremonies, Wor. Bro. Wm. Culbert; organist, Wor. Bro. W. F. Benest; Sr. deacon, Arnold McEwen; Jr. deacon, Charles Brooks; inner guard, D. L. Mennelly; Sr. steward, George Richardson, Jr. steward, Leslie McEwen. The installation was conducted by Rt. Wor. Bro. Thomas Paul, of Sarnia. After the ceremonies refreshments were served and a social evening enjoyed.

PLYMPTON

Miss Margaret Grieve, Oban, spent the week end with her friend, Miss Agnes McDougall. Miss A. Fowler, Sarnia, is visiting her sister, Mrs. W. J. Williamson. John Hodgins and John Mac Dougall, went to Guelph on Monday to take a two weeks course in the Agricultural College on seed and stock judging. This is a free course given to the winners of the competitions carried on under the direction of the Agricultural representative, Mr. W. P. MacDonald, Petrolia. Miss Louise Roddick, Petrolia, spent the week end with Miss Jeanette McEwen. An Oil that is Prized Everywhere—Dr. Thomas' Eclectic Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it. m

PLYMPTON COUNCIL

Officers Appointed and Salaries Fixed Statute Labor Abolished by By-law; Tp. Road Superintendent to be Appointed at Next Meeting

Plympton Township Council for 1925 met at the Township Hall as required by statute at 11 a.m. on Monday, Jan. 12th, all present except Councillor David Watson, who was absent through illness.

Those present made and signed the declaration of office as follows: Reeve, Thos. Burnley; Deputy Reeve, A. J. Gammon, and Councillors, Ernest Helps and Silas Smale.

The following order and By-laws were finally passed:—That By-law No. 1 appointing officers for 1925 be filled in with the following names and salaries:—

- Assessor—Wm. B. Smith, sal. \$160
Solicitors—LeSueur, McKinlay, LeSueur and Dawson, retaining fee \$25.
Auditors—Geo. A. Dewar and Donald McMillan, \$25 each.
Sanitary Inspector and School Attendance Officer—Wm. Johnston.
Member of Board of Health—John D. Paul.
Janitor—Miss Laura Burnley, salary \$20.
Weed Inspectors—William Johnston, William Neil Sr., Robert Hart, Thos. W. Young.
Thos. McConnell, be paid for inspecting sheep \$ 1.50
Lyle McPhedran, work done as Sanitary Inspector 10.00
Sick Children's Hospital, Toronto, grant 10.00
That the returning officers and deputies at Township election be paid as follows:
A. G. Minielly, services as returning officer 16.00
J. D. Paul, deputy returning officer and payment booth. 8.00
David Richardson, ditto 8.00
R. E. McPhedran, ditto 8.00
A. Williamson, ditto 8.00
W. E. G. Symington, ditto 8.00
John A. Scott, ditto 8.00
Archie McKinlay, ditto 8.00
Daniel McKinlay, ditto 8.00
That By-law No. 2, of 1925 Abolishing Statute Labor in the Township be finally passed.

Deputy Reeve A. J. Gammon gives notice of a Bylaw to appoint a Township Road Superintendent at the next meeting of Council. That Council do now adjourn to meet on Feb. 7th, at 10 a.m. for general business. A. G. Minielly, Clerk.

Warwick Council

Officers Appointed for 1925; Tile Drainage Money Bylaw Passed.

Warwick, 12 January, 1925 The council met today as per statutes. Members present: Messrs Muma, Chambers, Kelly and Sessions. Mr. McClelland being unable to attend through illness. Those present signed their necessary declarations.

By-law No. 1 appointing M. E. Barrett and E. O. Herbert auditors at a salary of \$15.00 each. Alex Westgate assessor, at a salary of \$ 100.00, and Chas. E. Smith member of the Board of Health was passed in the usual way.

By-law No. 2 authorizing the council to borrow \$10000.00 for tile drainage purposes was read the first, second and third times and finally passed.

The following orders were granted:—

- Sick Children's Hospital grant \$ 10.00
Municipal World 7 subs. 7.00
Municipal World supplies. 38.03
Thos. Chambers 30 yds. gravel supplied. 7.50
A Meadows statute labor returned undone. 8.00
N. Herbert election expenses Guide-Advocate printing as per account 60.00
Brooke Telephone Co. rates collected by Warwick. 2125.35
D. F. Brodie services fence viewer 2.00
Wm. James, ditto 2.00
J. C. Wilkinson ditto 2.00
D. Knight dog wrongly assessed 2.00
C. E. James postage, stamps stationary 29.20
Moved by Mr. Kelly, seconded by Mr. Sessions, that the township account be left with the Standard Bank Watford for the year 1925.—Car.
Chambers—Sessions that the council extend the collectors time for returning the roll till the next meeting of the council.—Carried.
Kelly-Chambers that the council grant the Deputy Returning Officers a mileage fee of 15c per mile for returning the ballot boxes.—Carried.
By-law No. 3 authorizing the reeve and treasurer to borrow \$25000 to meet the current expenses was passed in the usual way.
The council then adjourned to meet on Monday the 16th day of February at one o'clock p. m. for general business. N. Herbert, Clerk.

TOWNSHIP OF WARWICK

By-law No. 2 For 1925

A By-law to Raise (\$10,000) Ten Thousand Dollars to Aid in the Construction of Tile, Stone or Timber Drains.

THE council of the Municipality of the Township of Warwick, pursuant to the provisions of The Tile Drainage Act enacts as follows:—

1st.—That the Reeve may from time to time, subject to the provisions of this By-law, borrow on the credit of the corporation of the said municipality such sum not exceeding in the whole \$2000.00, as may be determined by the council, and may in manner hereinafter provided, issue debentures of the said corporation in sums of \$100.00 each for the amount so borrowed, with coupons attached as provided in section 5 of the said Act.

2nd.—That when the council shall be of the opinion that the application of any person to borrow money for the purpose of constructing a tile, stone or timber drain, should be granted in whole or in part, the council may, by resolution direct the Reeve to issue debentures as aforesaid, and to borrow a sum not exceeding the amount applied for and may lend the same to the applicant on the completion of the drainage work.

A special rate shall be imposed levied and collected over and above all other rates upon the land in respect of which the said money shall be borrowed sufficient for the payment of the principal and interest as provided by the Act.

Passed the 12th day of January, 1925. N. HERBERT, CLERK. B. F. MUMA, Reeve.

NOTICE MUNICIPALITY OF THE TOWNSHIP OF WARWICK

TAKE notice that the above is a true copy of a by-law passed by the Municipal Council of the township of Warwick on the 12th day of January 1925, and all persons are required to take notice that any one who desires to apply to have such By-law or any part thereof quashed must serve notice of his application upon the head or Clerk of this Municipality within twenty days after the date of the last publication of this notice and must make his application to the High Court of Justice within one month of said date.

This notice was first published on the 16th day of January 1925 and the last publication will be on the 30th day of January 1925. N. HERBERT, Clerk.

Lambton County Corn, Grain and Seed Exhibition Forest, Ont.

WEDNESDAY—THURSDAY—FRIDAY January 21st, 22nd and 23rd, 1925

PROGRAMME

- TUESDAY, January 20th.—Placing Corn on Racks.
WEDNESDAY:—
9 a.m.—Entries close, judging commences.
2 p.m.—Kineto Theatre, address "Seed Inspection" by Geo. Elliott, Toronto, representing the Dominion Seed Branch.

MEAT COURSE held in COUNCIL CHAMBER, Thursday forenoon
Don't fail to see Corn Borer Exhibit and Egg Grading Exhibit in Rest Room of Library.
W. J. FRENCH, President. W. P. MACDONALD, Secretary

INWOOD

Miss Sarah Deans is spending a couple of weeks in Detroit. Mr. Carl Lehrbass spent the week end near Alvinston. Mr. and Mrs. Nelson Doman, near Petrolia, spent Thursday at Mrs. D. Lehrbass's home. We are sorry to hear Mrs. David Lloyd is ill. The Sunday school of the Presbyterian church had their annual meeting Wednesday evening and re-organized. Mr. Robert Gardiner became superintendent for the new year, and Miss M. Gardiner secretary. The W. M. S. was well attended Thursday afternoon and it was decided to hold a bazaar Mar. 14th the proceeds to go for matting etc, for the church. The A. B. C. class held a social evening, Friday in the Sunday school room. Mr. Lorrman was made president. Mr. Alfred Johnston and family of Detroit, visited his parents Sunday. Mr. Arnold of the Royal Bank, spent the week end in London. We regret to hear of the sudden death of Mrs. Wm. Bourne. Master Raymond McLean is on the sick list. Mrs. H. Liddon is confined to her bed.

The reception for the new minister was well attended and a good social feeling seemed to prevail. Mrs. Crawford spent Sunday in Alvinston. Mr. Bennet Tait has returned from London.

S. S. NO. 11, WARWICK TP.

Report of Christmas Exams of S. S. No. 11, Warwick, for II, III, and IV. classes. Average percentage is given:—
Class IV.—Velma Parker 71; Helen McKenzie 68; Beatrice Gault 52; Jean Spalding 56; John Reycraft 52.
Class III.—Jessie Spalding 52; Winston Parker 62; Melvyn Parker 43*; Cecil Reycraft (absent); Dorothy Jarriott (absent).
Class II.—Robert Gault 76; Marjorie Parker 48. Those marked with an asterisk missed part of the exams.
F. E. Edwards, Teacher.

Great Increase In Tea Consumption

The consumption of tea, it is estimated, increased in 1924 thirty-nine million pounds. The price, as a result, may go to \$1.00 per pound, but even then, tea is the cheapest beverage in the world—aside from water.

LOST

LOST—Leather Mitt on Main St., between Ford Garage and Roche House shed. Will Finder please phone or leave at this office.

LOST—In Watford on Saturday, a Short haired Yellow Collie, marked with white; one ear torn; answers to name of Jack. Finder please notify George Emmons, R. R. 3, Kerwood, or phone this office. j9-2t

Dissolution of Partnership

TAKE notice that the partnership heretofore carried by the undersigned, under the firm name of "McCormick & Paul" has this day been dissolved. J. R. McCormick assuming all liabilities and paying all claims against the partnership. Watford, January 3rd, 1925. Witness, J. R. McCormick, John W. Gault, R. A. Paul. Jan. 8-3t.

NOTICE

NOTICE is hereby given that the annual general meeting of the share holders of The Wanstead Farmers' Co-operation Co. Limited, will be held in the Orange Hall, Wanstead, on Wednesday afternoon, Jan. 21st, at 2 o'clock. Everybody welcome. Orville C. Ramsay, Pres. Arch. Williamson, Sec.

THE LAMBTON FARMERS' MUTUAL FIRE INSURANCE CO.

ANNUAL MEETING

THE annual meeting of the Lambton Farmers' Mutual Fire Insurance Company, will be held in the Company's Office, Main St., Watford, on Thursday, January 29th, 1925, to commence at about 1:30 p. m., for the receiving of the directors' and auditors' reports; the electing of two directors and for any other business that may properly come before the meeting. John W. Kingston, Pres. W. C. Willoughby, Sec.-Treas. J.16-2t

Valuable Farm For Sale

100 ACRES—PRICE \$7,000

West half lot 28, concession 5, S.E. R. Township of Warwick, Lambton County. This fine farm is nicely situated on the 4th line east, three miles from the town of Watford; one half mile from school house and Grace English church is situated on the farm. The soil is excellent for mixed farming, there is good water at the house, and a never failing spring well in the pasture fields, making it a very desirable stock farm. There is also a good bush, principally beech and maple trees. One bank barn with good underground stables for cattle, one hay barn with horse stables, also large open shed, hen-house, and garage, six-roomed house, also summer kitchen.

For further information, apply to Sam Burchill, Watford R. R. No. 4., or Mrs. Savina Dunkeld, 1861 Yonge St., Toronto. Executors of estate of the late Jacob Cline. j16-4t

MUD VOLCANOES

Progeny of Lava and Ash-venting Volcanoes.

The recent discovery that a huge mud geyser or mud volcano has developed the last few years in the bottom of the enormous crater of Katmai in the peninsula of Alaska raises the question of the status of these conspicuous relatives of ordinary volcanoes. A bulletin from the National Geographic Society describing this formation says: Mud volcanoes and geysers are in most cases progeny of lava and ash-emitting volcanoes—second and third generation offspring, as it were, of a patriarch whose strain is losing its virility. The old lava flows near the surface solidify, choke off the possibilities of major eruptions for a time at least, leaving, perhaps, only little crevices through which steam generated farther down my push upward in numerous jets.

If these vents pass through rock, ordinary fumaroles or steaming cracks are formed on the surface. But if the steam passes through clay or shale or fine volcanic dust on its way to the surface these will absorb moisture, become creamy mud, and tend to flow into the crevice. The steam pressure pushes the mud upward and eventually throws it out of the vent at the surface more or less violently. In the course of time the mud thrust out at the surface builds up a cone, large or small according to the volume of steam and mud.

Most of the world's mud volcanoes are little fellows, less than a yard high; and the aggregate number is great, since they occur in many places on the various continents. Not all of them, apparently, are in regions of former volcanic activity, and it is the belief of some students of the subject that chemical reactions below the surface are a second source of the phenomena. One place where such a cause is thought to have produced mud volcanoes is in the delta of the Colorado river, just south of the California line, where numbers of the little beehive-like mud mounds occur; and perhaps those of the Russian Crimea are of similar origin. Sometimes the little Etnas of mud are associated with petroleum and asphalt deposits, as near Baku in Asia and the island of Trinidad off the northern shores of South America.

A Market in Monkeys.

Quite a considerable trade is done in monkeys in Liverpool and round the London Docks.

In these days the great majority of the creatures arrive in sailing vessels, of which there are still quite a number, because the big liners are usually too busy to take notice of such articles of commerce.

The length of the passage, too, has often the advantage of acclimatizing the little creatures before they arrive. On a vessel reaching the docks, the animals are sold to Italian or Jewish dealers at prices varying from fifteen shillings to five pounds. The variations in the prices are due to the different states of health in which the monkeys arrive.

While in the hands of middlemen or brokers the little animals do not, on the whole, have a bad time of it. They are carefully fed and kept very warm, and usually have plenty of room to romp about, or fight, which they do continually. The broker has numerous "assistants," chiefly among the Italian ice-cream or organ-grinder fraternity.

When he has found his customer the broker often has to receive payment by instalments, and of course makes a correspondingly high profit, charging for a small "jaoko" at least twenty-five shillings. Very often the poor little beasts die from consumption, their great enemy in these northern latitudes, before the payments are complete; and it is not uncommon for an organ-grinder to be paying for a dead and a living animal at the same time.

On the whole, the "pugs," as they are known in the trade, are well-treated, and if it were not for our changeable climate they would live a decidedly happy life.

Worked Both Ways.

Amusing stories are not told every day in the British House of Commons, but Mr. Gavan Duffy, M.P. for Whitehaven, considerably brightened proceedings during a recent debate by recalling the experience of an old Irish colonel in India who had a native servant with a very long and unpronounceable name.

The colonel decided that this name was too much for him and would have to be abolished, but this difficulty was to make the native agree to this. So, acting on an idea, he took the native to a pond and dipped him in. When he brought him out the colonel said:

"Now your name is Mick and you will eat no more meat on Friday."

The very next Friday he saw Mick eating a big chunk of meat and demanded an explanation.

"It's all right, colonel," replied the native with a solemn face, "this no meat. Me dip it in pond and call it fish."

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed. There is always someone, somewhere, who is anxious to buy what you have to sell. Someone has just the article you want to buy. To complete a deal each must know of the other's wants, and there is no better or more certain way to make these wants known than through a little "Want Advt." in The Guide-Advocate. Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

KERWOOD

The pupils of S. S. No. 1, Metcalfe very kindly remembered their teacher, Miss Nora Sullivan at Christmas by presenting her with a handsome ivory clock.

Mr. John W. Redmond is a patient in St. Josephs Hospital, London, having undergone a very critical operation for mastoid, we are pleased to report his favorable progress.

Mrs. Jno. Johnson received word of the very sudden death of her sister, Mrs. W. Bourne, which occurred at her home in Alvinston on Monday morning.

Miss Alice Johnson, nurse in training at Victoria Hospital, London, is holidaying under the parental roof.

There will be no evening service in the Methodist church next Sunday, but service in the morning will be held as usual.

We are pleased to hear that Miss Freda Richardson is recovering from her recent illness.

Kerwood Womens' Institute.

The Womens' Institute held their December meeting at the home of the president, Mrs. Wm. Gimblett, but owing to the condition of the roads, only eight members were present. Roll call was answered by Christmas Greetings and a letter was read by the president from Mrs. J. L. Thompson tendering her resignation as secretary of the Institute on account of their removal to Coldwater. A letter was read from Mr. Ed De Gex, the chairman of the building committee of the New Anglican Hall, asking the Institute for a donation of one hundred dollars. This was granted. It was also decided to send flowers to sick members and some boxes of Xmas cheer were sent to some needy families. After the business was concluded a social half hour was spent over the tea cups with the hostess in charge. The next meeting will be held at the home of Mrs. M. C. Morgan, on Jan. 21st. Roll call will be answered by New Year Resolutions. A good attendance is requested.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Use the "Want Ads" to buy or sell

OBITUARY

DR. O. E. BRANDETH

The death occurred Sunday morning, Jan. 5, at Strathroy Hospital, of Dr. Ozias Evoy Brandeth in his 65th year, after a long illness. Dr. Brandeth had been a leading veterinary surgeon in Strathroy for the past twenty years, coming here from Cayuga. He was born in Adelaide, a son of William Brandeth and Emily Evoy. His wife, who was Lavina Neelands, of Strathroy, predeceased him in 1921. He is survived by three sons: Orley of London, Preston of Detroit and Basil of St. Thomas; also by his aged mother, Mrs. Emily Brandeth, who resides in Kerwood, and four sisters: Mrs. (Dr.) Thomas Preston, of Carlisle, Penn., U.S., Mrs. Ira Case, of Flint Mich., Mrs. Wm. Leacock and Mrs. Jos. Brunt, of Kerwood. The funeral took place to Strathroy cemetery from his late residence, Center Street, on Tuesday afternoon, and was very largely attended. The Rev. I. Couch, pastor of the Methodist church, of which the deceased was a devout member, conducted the services. Messrs. J. V. Macdonald, Geo. M. Haldane, Julius Shields, Wm. Bryant, Frank Langan and Mack McKeller acted as pallbearers. During the service, Mr. E. A. Easkerville impressively rendered the solo, "When God Puts Out the Light." The many friends present from the surrounding district testified to the high esteem in which the late doctor was held in the rural community, which he faithfully and efficiently served for many years.

ALVINSTON

The community was shocked to hear of the sudden death on Monday morning of Mary Jane Richardson, beloved wife of William Bourne, of the 7th concession, Brooke. Mrs. Bourne who was in her 58th year, leaves to mourn her loss, her bereaved parents, husband and grown up family.

Mrs. Crawford and son Jack of Inwood, spent the week end at the home of Mrs. G. A. Hadden.

In the absence of Mr. G. Thornicroft, high school teacher, who is ill at his home in Glencoe, Miss Helen Hamilton, of Watford has taken charge of his work.

Mr. Dick Park, spent the week end at his home in Glenrae.

Miss Helen Irving has returned home after spending the past week the guest of relatives in Sarnia.

Dr. R. C. Montgomery, who took over the practice of Dr. K. L. Duncumb, arrived last week. Dr. and Mrs. Duncumb left for Watford where he has taken charge of his father's business.

Oliver Colhoun has assumed charge of Beatrice Bourne's room in the public school, due to her absence through the death of her mother, Mrs. William Bourne.

Shop Window Wit.

Americans are well-known as a nation of advertising experts.

"I look down in the mouth, and am happy."

This ingenious paradox, which is displayed prominently outside a dentist's consulting-room, is only one of many witty and curious trade-signs.

On a bootmaker's window, for example, is found the pointed question: "Don't you wish you were in my shoes?" while outside a builder's establishment is inscribed: "I send innocent men to the scaffold."

Witty, too, is this frank announcement, which graces a solicitor's office in a provincial town: "I study the law—and the profits." But the undertaker who stated: "There are no complaints from my customers," had apparently mistaken his vocation.—Answers.

Significance of Dreams.

The dream acts like the crafty owner of the umbrella. By devious ways, when direct ways fail, it enables us to qualify all the cravings which life in civilized communities compels us to repress. Dream interpretation is not an idle pastime. It reveals to us our attitude to every problem of life, for we spend the night seeking solutions for our problems. (This is why we are always advised "to sleep on it.") It reveals many cravings which we could probably gratify in acceptable, social ways; for example: A man who dreams every night that he is exhibiting himself in public should try to be an actor, a speaker, or a public man of some kind.

Four Rules With Women.

As for women, well, it is safer to avoid the obvious in compliments. At least that is the opinion of one clever woman. Four rules she formulated are quoted here for what they may seem to be worth:

- Be intellectual with pretty women. Be frivolous with the intellectual. Be serious with young girls. Be saucy with elderly ladies.—Cleveland Press.

GROWING THE WALNUT

A Tree That Is Desirable Both for Nut and Wood

Southwestern Ontario Can Grow Them—The Walnut Tree Described—Plant Hardy Grafted or Budded Stock—Best Varieties for Ontario.

(Contributed by Ontario Department of Agriculture Toronto.)

Ontario grown, soft shell walnuts of excellent quality have been produced in the Niagara Peninsula. A few trees have given good crops for thirty years or more. The number of producing trees that we know of now is 165, and these are located in a district fifty miles long and twenty miles wide, an odd tree here and there in the dooryard or the orchard of well kept premises. Trees are fruiting as far east as Clarkson on the north shore of Lake Ontario.

Southwestern Ontario Can Grow Nuts.

The Niagara Peninsula and the counties bordering Lake Erie have a climate more favorable to production of the soft shell walnut than certain districts in Europe where nuts are grown to take care of the local market demand. There are large areas of deep, rich soil in the district north of Lake Erie east to the Niagara river and west to the Detroit river that will grow acceptable soft shell walnuts, and Japanese Heart Nuts. Why not keep the \$5,000,000 at home? There is satisfaction in saving money, and there is more satisfaction in sitting before the home fireplace on winter evenings cracking the fruit of our own labor. In about 100 Ontario rural homes this is being done now. The flickering wood fire is pleasant in itself, but a plentiful supply of walnuts at hand, easy to crack and sweet to eat, will help one to enjoy life.

Thousands of rural homes can have walnuts, providing of course that the home is located in the Lake Erie counties, or in a district where the climate will permit the full development of the peach.

The Walnut Tree Described.

The walnut tree, when dormant, will stand heavy frosts in midwinter, but it will not stand late spring or early autumn frosts. Areas reasonably free from frost during the period April 20th to October 10th alone should be considered. The soft shell walnut grows to be a very large tree, is of the deep, tap-rooted type, hence the soil must be deep enough and rich enough to support a big tree. A good surface soil of clay loam or sandy loam that is underlain by a deep, porous, sandy subsoil in which the water table is below fifteen feet, a soil that is rich, cool and moist, but not wet, will produce the finest specimens of walnut trees. However, the range of soil types on which the walnut tree grows is quite large, since this tree is to be found growing on sandy, gravelly and clay loams, and succeeding in proportion as these soil types furnish depth for root room, plant food and moisture.

Use Hardy Grafted or Budded Stock.

To be successful the walnut tree must be a vigorous grower, of a variety that blossoms moderately late, a self-pollinator, and it must yield an abundant annual crop of desirable nuts. These factors are best obtained by planting hardy grafted or budded stock. The native black walnut has the hardy and vigorous characteristics, it is most desirable as a root system for a soft shell English walnut. Get your start by growing seedling black walnuts up to a size suitable to graft. Three-eighths of an inch in size does very well, then whip graft a scion obtained from a hardy soft shell tree, making an entirely new top. The black walnuts for seedlings can be planted in the autumn or spring. If kept until spring lay away in cold, moist sand. Plant the seed with the pointed end up, two inches deep in good garden soil. Keep the soil well raked and free from weeds. The little trees will be large enough for grafting at the end of the second season, or when growth is starting the following spring. The grafting of the walnut offers more difficulties than apple grafting, requiring greater care. The following conditions are essential to success; fully dormant wood for scions, the cambium of stock and scion must be brought into exact contact, the work must be done as the leaf buds of the tree to be grafted are unfolding, a condition that varies with individual trees. The cleft in the stock or scion should be such as to give a perfect fit. The exposed surface of the stock and scion must be held and protected by tape and wax, the entire scion should be waxed over, the scion wood should be secured two or three weeks before required and kept in cold, moist sand. The scion wood should be firm and have a very small pith cavity. Both seedling and grafted trees usually bear at eight years.

Best Varieties for Ontario.

The Japanese Walnut or Heart Nut will stand lower temperature than the Soft Shell English Walnut. It, too, is of good quality and easy to crack. A tree planted twelve years

ago at SCOTLAND, ONTARIO, gave two bushels of free from the husk nuts last year. Some of the older English soft shells in the Niagara Peninsula have yielded as high as twelve bushels of nuts in a single season. A few soft shell walnut trees will add value, beauty and usefulness to any farmstead.—L. Stebbins, Department of Extension, Ontario Dept. of Agriculture.

If a little flour (pastry) is added to the wash used on the fruit, the poultry house it will stir up a quantity of well longer, adding a measure of carbolic acid to each will also hold insect enemies in check.

"HERE'S A FEW THINGS"

How Toasts Originated in the Old Country

Drinking to a man's good health began in England as early as the Danish invasion, when it was customary with the Danes whilst an Englishman was drinking to take the opportunity of stabbing him.

To guard against this treachery, the English entered into a combination to be mutual pledges of security to each other while drinking.

When, therefore, an Englishman of that period drank to his friend, his tactful language was, "Sir, I fear that some malicious Dane will stab me or cut my throat whilst I am drinking; I beg the favor of you to watch carefully, that I may drink in safety." To which his friend was supposed to answer, "Sir, I will pledge you and be your surety." He then replied, "I am much obliged to you, Sir, your health, that you may live till I have done drinking, and save me from his wicked intentions."

There is some doubt as to how the word "toast" came to be used as implying complimentary drinking, but it is probably derived from the piece of toast which used to be put into the Loving Cup to add piquancy to the draught; a custom still known at English Universities.

For the piece of toast was afterwards substituted the name of a lady to whose welfare the company were invited to drink, and who thus became the toast or saviour of the wine.

In that age of gallantry, the time of King Charles II., it was the custom when a gentleman drank a lady's health to throw some part of his dress to the flames, in order to do her still greater honor. And his companions were obliged to follow him in this proof of veneration by committing to the flames a similar article of apparel, whatever it might be.

The term "toast" has, however, in course of time developed from a particular into a general sense, and nowadays there is no limit to the number of variety of different toast which may be given, when men drink together, says a writer in 'John o' London's Weekly.'

At any formal gathering the first toast to be drunk is, of course, "The King"; this loyal toast was not always drunk so loyally some two hundred years ago, when supporters of the Stuarts would secretly drink to "the King across the water."

Macaulay tells us how the Jacobites, in the time of William III., had a way of drinking treasonable healths by limping about the room with glasses raised to their lips.

- Limp meaning: L. Louis the Fourteenth. I. James. M. Mary of Modena. P. Prince of Wales.

The present-day custom of ouching glasses originated with the fact Charles fled to France, after the failure of his expedition in 1745. His ure of his expedition in society to supporters, if obliged, tacitly to drink the King's health, to King George, but to the King over the real toast symbolically. One glass would be passed over another, and later on the foot of one glass was touched against the rim of another.

Another method of secretly drinking this romantic toast was to hold the wine-glass over the finger-bowl containing water, and to this secret sign is said to be due the curious custom in connection with royal visitors, before whom alone finger-bowls are placed on the dinner-table.

London's Charcoal Burners.

How many people know that a large portion of the land now covered by the southern suburbs of London was once a great charcoal district from which practically the whole of the city's fuel came? Vast forests of oak, beech, and ash trees covered these areas, which included Norwood—the Great North Wood—Croydon, Sydenham, and Forest Hill.

In those far-off days of the fourteenth century coal was not allowed to be burnt, as it was considered that the smoke was dangerous to health. It is not exactly easy to see how this could be so, for the smoke from charcoal burning is, to say the least of it, most unpleasant. One bishop, who had his palace at Croydon, was greatly annoyed by a charcoal-burner who lit his fire right under his lordship's windows, filling the palace with the fumes of the smouldering wood. The charcoal-burner was regarded in those times as a sinister figure, and he was often credited with being in league with witches and devils.

WANSTEAD

Miss Hilda McPhedran is visiting relatives in Lobo. Miss Margaret Simpson returned on Friday from visiting friends in Welland and Bridgeburg.

Miss Gladys Ramsay left on Friday for Bartonville, where she will teach school.

The annual meeting of the Wanstead U. F. O. Club was held in the Orange hall on Friday afternoon of last week with the president, Orville Ramsay, in the chair. Reports for the year were received and showed the Club to be in a very satisfactory position.

Addresses dealing with the Club's activities were given by Mr. Smale, P. W. McPhedran, and J. E. Capes. It was decided to hold an oyster supper for the members and their families, and a committee was appointed to arrange for the same.

P. W. McPhedran, the Club's delegate to the Annual Convention, gave a very interesting report. The election of officers resulted in the officers of the past year being re-elected: president, Orville Ramsay; vice-pres., Jas. Jackson; sec., Arch. Williamson; directors, J. E. Capes, Alex. Dawson, Edwin Morris, Geo. Dewar and Duncan Ferguson.

Everybody is invited to attend the first annual general meeting of the shareholders of the Wanstead Farmers' Co-operative Co. Ltd., in the Orange Hall, on Wednesday afternoon, Jan. 21st, at two o'clock.

A family reunion featured by an oyster supper was held at Hillside farm, the home of Mr. and Mrs. J.E. Capes, recently. About forty relatives of Mr. and Mrs. Capes constituted the party. C. Hayward and Mrs. J. Brereton furnished the music for the evening and games, etc, were enjoyed.

Many local people were disappointed when Roy McPhedran declined to contest a seat on the 1925 council.

Mr. Hayward, who was injured recently by falling on ice, is now improving.

Members of Calvary church are preparing a series of special meetings for next week. An evangelist from Toronto will lead the meetings.

Maw Brothers are sawing wood with a gasoline engine and circular saw this winter.

Painful Sciatica And Neuralgia

Caused by Starved Nerves Due to Weak, Watery Blood.

People think of neuralgia as a pain in the head or face, but neuralgia may effect any nerve of the body. Different names are given to it when it affects certain nerves. Thus neuralgia of the sciatic nerve is called sciatica, but the character of the pain and the nature of the disease is the same, and the remedy to be effective, must be the same.

When you build up the impoverished blood with Dr. Williams' Pink Pills, you are attacking sciatica, neuralgia and kindred diseases at the root. As proof of the value of Dr. Williams' Pink Pills in cases of this kind we give the statement of Mrs. Marion Bell, Port Elgin, Ont., who says: "Some years ago I was attacked with sciatica in my leg and hip. The pain was excruciating and finally I was forced to go to bed. Apparently all the doctor could do was to give me drugs to dull the pain as otherwise I found no relief. I had been in bed with the trouble for eight weeks when a lady who came to see me said that she had had a similar attack, and had only found relief through the use of Dr. Williams' Pink Pills. I decided at once to try this medicine, and before I had taken more than three boxes I found relief. I continued the use of the pills and even this, the bootblack on the Empress of France, now stocking up for the round-the-world cruise she will commence on leaving New York January 15th did not quail when he saw a hundred-weight of boot polish being run up the gang plank for him. As a matter of fact he beamed. Each task is but a means to an end and although he may be called upon to see that many square miles of shoes are shined, he will have an opportunity of wiping the dust of many lands from them, and seeing something of these lands beside. His office was sought after, as were all others on the ship.

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brickville, Ont.

Preparations are being made to enable listeners in Great Britain to hear the roar of the Niagara Falls which is about 3,600 miles away. And with the new wireless photo transmission they may be able to see them at the same time.

Winter Hard On Baby

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co. Brockville, Ot.

Rural School Reports

Report of Kelvin Grove school, Warwick, for the month of December. Names in order of merit. Those whose names are marked with an asterisk had perfect spelling for the month.

Class IV Sr.—Beatrice Williams*, Donald Ross*, Marjorie Cooper*, Edith Kenzie, Reta McLeay*, Ross Kenzie. Class IV Jr.—Marjorie Tanner, George McIntosh. Class III Sr.—Margaret McElroy, Franklin Kenzie, Elmer Thompson, Myrtle Cooper, Robert McLeay, Clarence Smith. Class III Jr.—Helen Tanton, Harold Cooper, Marie Cooper, Nelson Main, Eddie Dolan. Class II.—Flossie Smith. Class I.—Howard Dolan, Norman Harper. Pr. Sr.—Rhea Clark. Pr.—Marion Williams, Jessie Main, Hilda Smith, Blake Richardson, Harold Williams.—Annie Ross, Teacher.

Report of S. S. No. 8, Warwick Names in order of merit. Percentages given.—

Form IV Sr.—Everett Butler, 81%; Evelyn Cochrane, 74; Mary Wambaugh, 53; George Wambaugh, 44.

Form IV Jr.—Margaret Cadman, 68; Elma Dunlop, 62; Fred Cadman, 59; Harry Wilson, 45. Form III Sr.—Corena Suter, 84; Margaret Wambaugh, 71; Norine Cochrane, 67; Thelma Smith, 61; Ellis Butler, 61; Arthur Wellings, 58; Donald Herrington, 40. Form III Jr.—Charlotte Cadman, 66; Margaretta Wilson, 61. Form II Sr.—Hazel Dunlop, 68; Winnifred Butler, 61; Helen Wambaugh, 58; Marguerite Herrington, 53; Wilson Butler, 52. Form II Jr.—Wilfred Dunlop, 65; Fay Cochrane, 58. Form I Sr.—Raymond Butler 72, Earle Wilson 71, Winnifred Dunlop, 63; Ross Butler, 60; Eileen Fitzsimmons 55; Lenore Herrington, 45; Mildred Dunlop, 40. Form I Jr.—Dorothy Dunlop, 71; Isaac Dennis, 68; Helen Cochrane, 62; Catharine Wambaugh, 57; Orville Smith, 45. Primary Class.—Jean Muma, Mary Wilson, Willie McBryan.—C. M. Barrie, Teacher.

SUBSCRIPTION AGENT FOR PUBLICATIONS

The Guide-Advocate is authorized agent to receive subscriptions for all daily and weekly papers, magazines, etc. We keep a complete record of all subscriptions received, date when forwarded and how sent—whether by money order, express order, or through the bank. This is for your protection as well as for our own. We can trace your payment up at any time when necessary. We save you the trouble of writing a letter, the cost of postage, money order, war stamps, etc. In other words we charge only the regular subscription price of any newspaper, magazine or periodical you care to take.

The town of Navestock, England, for centuries has awarded a side of bacon at the annual village fete, to the local married couple who have gone without a family quarrel for twelve months.

A Big Job in Housekeeping for Globe Circumnavigators.

Diagram showing supplies for the Empress of France cruise, including 185,000 lbs vegetables, 120,000 lbs flour, 53,000 lbs beef, 37,000 lbs lamb, 30,150 lbs sugar, 27,200 lbs fresh meats, 22,350 lbs bacon & ham, 20,000 lbs fresh chickens, 17,700 lbs soft soap, 12,000 lbs chickens, 10,000 lbs butter, 8,000 lbs turkeys, 7,000 lbs capon, 4,000 lbs ducks, 2,000 lbs goslings, 1,665 cases toilet soap, 2,300 lbs guinea fowl, 750 cases Canadian apples, 250 cases grape fruit.

Above is seen the "Empress of France," with inset, a corner of her dining salon. From the diagram one gathers an impression of the great amount of supplies this vessel carries on her round-the-world cruise.

BOOT-BLACKING and polishing as a steady diet is to most people more objectionable than dishwashing. Yet there are some who take a pride and pleasure in this occupation and actually shine in it. A little blacking goes a long way and gives a high polish, but knowing even this, the bootblack on the Empress of France, now stocking up for the round-the-world cruise she will commence on leaving New York January 15th did not quail when he saw a hundred-weight of boot polish being run up the gang plank for him. As a matter of fact he beamed. Each task is but a means to an end and although he may be called upon to see that many square miles of shoes are shined, he will have an opportunity of wiping the dust of many lands from them, and seeing something of these lands beside. His office was sought after, as were all others on the ship.

But dealing with huge figures, one would think that at least the chefs on this giant Canadian Pacific Steamship would be to some extent awed by what is before them. Think, Madame Housewife, of having to prepare 185,000 pounds of vegetables, of having to roast 53,000 pounds of beef, 37,000 pounds of lamb, 27,200 pounds of other fresh meats and 2,750 pounds of sausages. Would it not tend to take some of the joy out of a four month cruise? Yet this is the task of the stewards' department of the cruising Empress. Supposing that with the necessary assistance you had to prepare 12,000 pounds of chickens, 7,000 of capons, 4,000 of ducklings, 2,000 of goslings, 3,000 of turkeys, 2,300 of guinea

fowl, pigeons, quail, etc., and innumerable game fowl for the table en route; would you be so keen on your trip?

All joking apart, the unattached young ladies who figure on the passenger list will be thrilled to know that the aggregate weight of the nuts aboard totals 1600 pounds, and the unattached young men will be equally pleased to learn that on all the ship there are only 40 cases of lemons. But the little boys! It will indeed go hard with them. For some hard hearted purchasing agent, with no little boys of his own, has ordered 16,650 tablets of toilet soap, 17,700 pounds of soft soap, 55 gallons of liquid salt water soap, and two tons of scouring soap, and soap powder! He thinks that 6,000 Polar Ears and Esquimaux Pies are going to compensate for all this!

It seems that Dad has been locked after very well. Canadian Pacific cruise officers tell us that for the round-the-world trip of the Empress of France, some 59,170 bottles of various shapes and sizes have been taken aboard, and in addition 54,700 bottles of mineral waters.

A few other outstanding figures in connection with the four months supplies for the 450 or 500 passengers are as follows: 750 cases of Canadian apples, 250 cases of grape fruit, 38 barrels of grapes, 300 pounds of dates, 890 lobsters and crabs, 20,600 pounds of fresh fish, 3,864 pounds of coffee, 30,150 pounds of sugar, 2,230 of tea, 266 gallons of olives, 5,600 pounds of salt, 1,780 bottles of sauce, 120,000 pounds of flour, 10,000 pounds of butter, 22,350 pounds of bacon and hams, 50,000 drinking straws, 43,000 menu cards—and so on. Fresh fruits, vegetables, fish, milk and eggs will be purchased in considerable quantities to meet requirements as the cruise progresses. Fifteen thousand tons of fuel oil will be used by the cruising steamship.

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Bloomington, N. S.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, also for nervousness, sick headaches and sleeplessness. I was troubled in this way for over a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonial."—Mrs. WILLIAM MORSE, Bloomington, Annapolis County, N. S.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex should listen to what other women say who have experienced the same sufferings and found relief. Give this dependable medicine a chance—and at once. It is sold at all drug stores.

MOTHER! Clean Child's Bowels

"California Fig Syrup" is Dependable Laxative for Sick Children

Hurry Mother! A teaspoonful of "California Fig Syrup" now will sweeten the stomach and thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, bilious, constipated or full of cold, children love its pleasant taste. It never cramps or overacts. Contains no narcotics or soothing drugs. Tell your druggist you want only the genuine "California Fig Syrup" which has directions for babies and children of all ages printed on the bottle. Mother, you must say "California." Refuse any imitation. 414-k

A SURE, SAFE AND SIMPLE REMEDY FOR ALL THE COMMON AFFLICTIONS OF MAN AND BEAST. IT SHOULD ALWAYS BE KEPT ON HAND, AS A MORE SERVICEABLE PREPARATION FOR SUCH USES CANNOT BE FOUND. GET A BOTTLE TODAY AND HAVE IT READY FOR THE TIME WHEN YOU WILL NEED IT.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

ICE CROP HARVESTING

Practical Methods Suggested for Farm Storage

Ice May Be Formed in Moulds—Artificial Ponds—How to Cut the Blocks—Loading and Packing—The Use and Abuse of Sawdust.

(Contributed by Ontario Department of Agriculture, Toronto.)

The ice crop every winter in Canada is an enormous one, and if it could be marketed in the cities for summer use, the revenue would amount to many millions of dollars. The farmers must rely upon the ponds, rivers and lakes close by for their supplies, as it has not been found practicable to ship ice by rail. In some sections ice is not available, as there are few if any bodies of water large and pure enough to freeze water to sufficient thickness. Farmers could make their own ice, weather permitting, by making a few ice moulds close to the well and gradually freezing them full, or by tacking a solid block of ice in a metal lined chamber by pumping into it a little water every day or so and allowing it to freeze solid. Twenty cakes of ice, each 18 inches square and 12 inches thick, would make a ton of ice as stored.

The Artificial Pond. Still another method for manufacturing ice on the farm is to make an artificial pond where there is an abundant supply of water available from well or spring and the pumping is done by power or hydraulic ram. The area required to produce a ton of ice is not great, depending of course on the thickness of the ice. If the probable freezing will make ice 12 inches thick but thirty-five square feet of pond surface is required for each ton needed.

The usual method of harvesting the supply of ice for the farms is to cut it from some nearby pond, stream or lake and haul it home and store it in the ice house, or some form of enclosure where it will cover deep with dry sawdust. The source of ice should be free from contamination and clean of weeds and other vegetable matter.

Harvesting the Crop.

The method consists of the following operations—

- (1) Cleaning off the snow, if any, by means of a suitable form of scraper. The snow is either dragged off to the shore or pulled into windrows, depending on the size of the area.
(2) Marking off the ice into squares or laying off the field. This operation should be done accurately in order to have blocks of equal size and cut straight and even to make handling and packing in the house as economical as possible. Success in this depends largely on getting the first line straight, and this can be done by stretching a line between two stakes and placing a straight edge board 12 or 14 feet long along the line, and marking the ice with hand tool or hand plough along the edge of the board. The board is moved along as the marking is done, piece by piece. After marking in one direction is completed it is necessary to establish a line across the area which is at right angles to the first direction. Probably the best way to start this is by using a carpenter's large square made of pieces of straight-edge boards 10 or 12 feet long, and tied across the corner to hold them fast at angle of 90°. Once the first line is marked straight and at right angles to the first line the rest can easily be marked off properly.

Cutting the Ice.

The ice is cut both ways by either a horse-drawn ice plough or a circular saw driven by a gasoline engine, the whole mounted on a sled pushed along by hand. The latter method of cutting is very satisfactory and is economical, when cutting is done on a large scale, as is the case with a large ice dealer or group of farmers harvesting their ice co-operatively. The ice field is usually cut in one direction with the machine and to a point two or three inches of the full depth. The long strips one way are detached from the field by striking into the saw cut with a heavy chisel, and then pushed up to the loading platform and there cut up into blocks by a hand saw or by the chisel in case the field has been cut both ways by the ice plough or power saw. When a small quantity of ice is harvested the cutting is done by saws.

Loading and Packing the Ice.

There are several devices used for loading the ice on the sleigh, wagon or motor truck, depending upon the amount of ice being handled. The main object in this case is to get a mechanical outfit that is cheap, convenient to operate and which will save the handling of the ice by hand. A small hoist, or a horse-power driven elevator answers very well.

It is advisable to store the ice on cold, dry days as it will be better for handling and will keep better after storage. The cakes should all be the same size, and be evenly cut, in order that they may be packed together with as little air space as possible.

Any spaces should be filled with small pieces of ice. The more compact the mass of ice the better it will keep. Below the ice there should be a foot of dry sawdust or shavings, and as the filling proceeds the same material should be packed between the ice and the walls. Do not put sawdust about individual cakes of ice. Pack the ice with a little dip toward the centre, so that it cannot press outwards against the walls. After the ice is stored there should be a couple of feet of sawdust over the top. O. A. Guelph, Ontario Department of Agriculture, Toronto.

BOVINE TUBERCULOSIS

Progress of the Disease is Slow, Insidious and Chronic

The Symptoms Described—How Milk-ing Cows Become Affected—Post Mortem Appearances—The Septic Tank.

(Contributed by Ontario Department of Agriculture, Toronto.)

The onset of this contagious and infectious disease of farm animals is slow, insidious and chronic, with no outward manifestations for some time.

Symptoms of the Disease.

A short, dry cough, intermittent and more noticeable when the resting animal is made to rise quickly should be regarded with suspicion. A cough alone while suspicious is not entirely characteristic, nor should its absence mean that the animal is not tubercular. The breathing may be quickened, there may be an unthrifty condition and chronic diarrhoea. In some cases the loss in condition is very marked, and the animal recedes to a thin hide-bound condition, with sunken eyes and rough coat; such animals are usually referred to as wasters. There may be enlargement of the lymphatic glands, such as the submaxillary or the prescapular. Enlargement of any of the lymphatic glands should always be considered with suspicion. Slight bloating, which may be due to enlarged glands interfering with the normal functioning of the digestive tract, should be regarded as suspicious, since the mesenteric glands if badly infected may cause irregular action of the intestines, with bloating and constipation followed by diarrhoea. In cases where tuberculous is affecting the bones and joints the animal may move with unnatural gait or show lameness.

How Milked Cows Are Affected.

The mammary glands of milking animals is a common seat of tubercular lesions. Hard areas in the glandular substance, painless on pressure, which may be very small or even involve the entire quarter of the udder, should be regarded with grave suspicion. These painless nodules or tumors if present can be felt by the most inexperienced. In cases where the udder is affected the supra-mammary lymph glands also become much enlarged and may be easily felt. Post Mortem Appearances.

The effects produced in the body tissues are characterized by the formation of tubercles or nodules, which in the advanced condition are of a yellowish color and cheese-like consistency. Such nodules may be single and of small size, or they may be quite large and in masses. The common seat of tubercular lesions is in the following glands: bronchial and mediastinal lymph glands, the cervical, pre-scapular, pre-pectoral, portal, inguinal, sub-lumbar, popliteal and mesenteric glands. The lungs and the pleura are also common locations for the lesions of tuberculous, in which they (the lesions) appear as hard lumps, easy to see and easy to feel. These when cut into are found to be cheese-like, and contain a thick yellowish pus.

The "Pearl Disease" Condition.

When the pleura (covering of the lungs and lining membrane of the chest or thoracic cavity) is affected it presents over its surface clusters of small round nodules, pale creamy red in color and resembling grape-like masses, commonly spoken of as "pearl disease" condition. When the organism successfully invades the liver caseous masses and tubercular abscesses are formed. These when cut open show the characteristic yellow cheesy pus and gritty feeling on the passing of the incising knife. Where the peritoneum (the lining membrane of the abdominal cavity) is attacked the "pearl disease" condition is characteristic. Lesions in the udder, lymph glands, ovaries, kidneys and spleen resemble the caseous masses and abscess formation common in the liver. The oviduct, the uterus, the bones and joints may also be affected with tubercular lesions. In old standing cases the pericardium (sac covering the heart) and the heart may be a position of attack by this destroying organism, the work of which is characterized by its destruction of tissue and the formation of tubercles.—L. Stevenson, Director of Extension, O. A. C., Guelph.

It's your smallest annual expense!

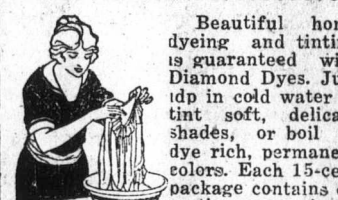

Do you realize that the smallest item in the family budget is the telephone bill? It averages only 1 per cent. A careful study of families with incomes from \$1500 to \$6000 a year shows that food costs 43%, rent and taxes about 17%, clothes 13%, telephone 1% and miscellaneous from 20% to 26%.

Apart from the time the telephone saves everyone, the mind requires the stimulus of contact with the world, as the body requires vitamins. Isolation cannot mean growth. Add a new interest to your life by calling some of them up in 1925.

Each New Subscriber Adds to the Value of Your Telephone

"DIAMOND DYES" COLOR THINGS NEW

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tin lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hanging, everything new.

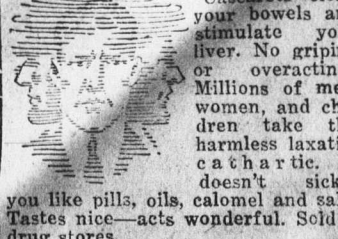

Girls! A Gleamy Mass of Beautiful Hair
35-Cent "Danderine" Soap Improves Lifeless, Neglected Hair

An abundance of luxuriant hair full of life, gleams and life shortly follows a genuine toning up of neglected scalp with dependable "Danderine" hair itching scalp and the dandruff is corrected immediately. Thin, dry, wispy or fading hair is quickly invigorated, taking on new strength, color and youthful beauty. "Danderine" is delightful on the hair; a refreshing, stimulating tonic—not sticky or greasy! Any drugstore.

"Cascarets" for Liver and Bowels—10c a Box

Don't Stay Dizzy, Bilious, Headache, Sick or Constipated

Feel fine! Let "Cascarets" clean your bowels and stimulate your liver. No griping or overacting. Millions of men, women, and children take this harmless laxative each day. It doesn't sicken you like pills, oils, calomel and salts. Tastes nice—acts wonderful. Sold at drug stores.

A New York telephone company has completed a tunnel fifty feet below the business district. It is eight feet high and eight feet wide, and has room for sixteen million miles of wire.

O. H. A. HOCKEY Watford Again Loses By One Goal

SARNIA 4; WATFORD 3

Hoodoo Still Pursues the Homebrews.
Watford Fans Agree "Hope De-
ferred Maketh the Heart Sick."

IF Watford had been successful in WINNING each of their games by a one-goal lead instead of LOSING by one goal in the last minute of play, the local intermediates would now be sitting on top of the world as a hockey town and a special train could be secured to carry the team and fans to Timbuctoo if need be.

But we didn't, and away goes our chance for the district supremacy. Faster hockey has been played here this winter than ever before, and although the league teams are more evenly matched than usual, Dame Fortune has repeatedly placed her frowning daughter in the dice box.

The following is the report of the game in The Tunnel City on Saturday night as given in the Canadian Observer:

IF some team would step out and hand Watford a lacing it might make the hockey fans of that village a bit reconciled with their lot of being patted tighter to the bottom of the league standing. But none of the clubs appear to be good enough to do it. For the third time in as many starts the Watford sextet were one goal on the wrong side of the count when the local blue and white outfit handed them a 4-3 defeat in

St. Andrews arena Saturday night in a game that packed more interest than the attendance warranted. The victory put Sarnia in second place ahead of the Windsor Maroons and within striking distance of the head of the heap where Glencoe is hanging out by its lonesome.

Saturday's game wasn't any pink tea affair. The players were wading in wide open and there wasn't any more mercy handed out than was asked for. Hee Cowan was using what weight he possessed with telling effect and Doolittle, who spends his time in Forest, hooked up with Perry in a short battle with honors about even and their team mates the losers. There were lapses of good hockey and in the third period Sarnia fans had visions of the victory losing its grip on the Sarnia standard when the Watford crew stamped through the Sarnia squad for three goals in almost as many minutes to tie the score when the Sarnia squad had the game all salted away. With the tally all tied up and the result an even money bet Stan Manore picked a pass from the wing and lifted a hard high one past Kinnell for the winning counter. The blue and white wakened up after that and kept the visitors at bay.

Watford showed little combination, contenting themselves with individual sorties on the Sarnia net and for all of the first two periods and most of the last Armstrong kept them away. He played a whale of a game in the nets for the locals on Saturday and two of the goals couldn't be laid to him. One was batted in from a heap in front of the nets and one of his own players stuck out his paw in front of the shot and beat him. The local athlete didn't

come near the puck but he succeeded in blindfolding his goal tender long enough to let Watford score. Doolittle and Cowan were the pick of the visitors, and Kinnell in the nets played a great game. He was largely instrumental for making the game close Saturday, many of his saves being of the kind the made McAllister famous.

There were no outstanding stars on the Sarnia team. The squad is working together well and Pete King, looks like a fixture. He passes the puck better than anyone on the team and not many of his offerings go astray. Morris, the other sub who made his first showing on Sarnia ice in an intermediate uniform, looked good. The subs didn't get as much chance to show their wares as some of the fans would have liked them to, but the locals this year have a pair of subs who look every bit as good as the regulars. Perry and Mellon teamed well on the defence and Jackson and Manore worked well on the wings. Prudence played his usual hornet-checking and rushing game.

Manore scored the first goal, but Rankin called it back for offside. Russ Mellon's stick handled through the Watford defence for the only counter of the first period. Tommy Prudence made it two in the second period when he picked up the puck from a scramble and beat Kinnell. Perry rushed down the right boards, took all the checks away from in front of the net and dropped the puck back to Jackson who scored. It was a well worked bit of play.

With the score 3-0 against them to start the last period Watford hung doggedly on with half the period up Crowe slammed the puck in

from a scramble in front of the nets. Then things started. Todd lifted a long one from right wing, one of the Sarnia players sticking out a ham to stop it, but deflected it into the net. Cowan tied up the count on a long shot from the left wing. With two minutes to go, Stan Manore wormed his way through on one of his slow rushes to beat Kinnell on a high shot. The teams: Sarnia—Goal, Armstrong; defence, Perry, Mellon; centre, Prudence; wings, Jackson, Manore; subs, King Morris.

Watford—Goal, Kinnell, defence, Cowan, Doolittle; centre, Crowe; wings, Greer, Todd; subs, Trenouth, Doolittle.

Goal Summary.
First Period.
Sarnia—Mellon, 10 min.
Second Period
Sarnia—Prudence, 9 min.
Sarnia—Jackson, 7 min.
Third Period
Watford—Crowe, 10 min.
Watford—Todd, 4 min.
Watford—Cowan, 2 min.
Sarnia—Manore, 2 min.

MONARCHS BLANK WATFORD 3-0
Village Sextet Drop Fourth Straight
Game in O.H.A. Race

Watford O. H. A. intermediates suffered their fourth consecutive loss in as many starts when they were defeated 3 to 0 by Windsor Monarchs here Tuesday night.

The local boys certainly had an off-night, their playing being far below standard they have maintained thus far. However, several of them were suffering from heavy colds and injuries, and as they were not in fit condition to take the ice they revealed true sportsmanship in their plucky effort. D. Trenouth, one of the strong defence men, was injured in the first period and forced to leave the game. Not only was their condition against them, but all the breaks seemed to go against them as well.

On the whole the game was clean, and the Monarchs certainly earned their victory. Monarchs played the entire sixty minutes without substitutes. Hickey, Robson and Nunn showed up as the pick of the visitors.

The teams:—
Windsor—Goal, Burgoyne; right defence, Coules; left defence, Robson; centre, Nunn; right wing, Hickey; left wing, Walker.

Watford—Goal, J. Innel; right defence, Cowan; left defence, D. Trenouth; centre, Crowe; right wing, A. Doolittle; left wing, Greer, subs, Todd and Cook.

Referee—Tom Munro, London.

COMING GAMES

Tonight (Thursday) Alvinston H. S. vs. Watford H.S. (Wossa series); Alvinston H.S. Girls vs. Watford H. S. Girls.
Friday—Watford at St. Thomas.
Saturday—Glencoe at Sarnia.
Tuesday—Windsor Maroons at Watford.

SARNIA HIGH GIRLS BEAT WATFORD HIGH

The girls' basketball team of the Sarnia Collegiate Institute was entertained by the girls of the Watford High School in a Western Ontario Secondary Schools Association League game at the armory here Tuesday evening, when the local girls suffered an overwhelming defeat by 37 to 9.

The Watford girls were completely outclassed by their Sarnia opponents and put a plucky effort, but were unable to hold the more skillful visitors. The local girls are handicapped through a lack of proper facilities for practice and training and were apparently bewildered by the magnificent combination work of the Sarnia team. The Sarnia team look good enough not only to win the district championship, but also to go through to the "Wossa" championship as well.

The teams:
Sarnia C. I.—Ruth Kirkpatrick, H. Donald and J. Wheatcroft, forwards; B. Simpson, F. Smythe and F. Laugher, guards; H. Campbell, M. Henderson and M. Hall, subs.

Watford H. S.—R. Stephenson, B. Cooke and D. Delmage, forwards; M. Connolly, M. McLean and E. Mc-Kercher, guards; M. Howden and E. Watson, subs.

SUBSCRIPTION AGENT FOR PUBLICATIONS

The Guide-Advocate is authorized agent to receive subscriptions for all daily and weekly papers, magazines, etc. We keep a complete record of all subscriptions received, date when forwarded and how sent—whether by money order, express order, or through the bank. This is for your protection as well as for our own. We can trace your payment up at any time when necessary. We save you the trouble of writing a letter, the cost of postage, money order, war stamps, etc. In other words we charge only the regular subscription price of any newspaper, magazine or periodical you care to take.

Construction work has commenced on the new curling rink, Forest. A lot has been purchased from James Hutton, the north lot of the Hutton property, on James street. The rink will be 150x30 feet and is expected to be ready by the middle of January.
