For hundreds of years the two great moves with greatest freedom in counpowers reigned side by side in natural harmony; the one exercising its between the temporal and spiritual spiritual functions without encroaching on civil freedom; the other guiding the temporal destinies of the people without unduly hampering the tholic Celt has settled, the old faith, human liberty of spiritual power. There is no reason why the forces of religion and the forces of civil law should not work in active and friendly combination for the common good. Religion calle upon society to obey legitimate authority, and live its life in perfect consonance with right order. It is the manifest interest of the State to uphold the teachings of truth and justice in their work for the salvation of the human race. The Church prepares the individual from the solvation of the human race will avail but little. Church prepares the individual from will avail but little. Church's influence, in pacifying the the people might regard as a common Church's injunence, in pactitions the people might regard as a common unruly elements which here, as in all centre of unity. Theoretically the partnership seems ideal, but in prac- prelate. tice the State usually has its way, and frequently forces the Church into humiliating concessions. In fact, if the civil ruler maintains a firm stand gainst the Holy See, the Church, no longer the all-powerful organization that used to summon Europe to arms in defence of her prerogative, more often than not has to yield through sheer weakness. Since the very beginning of the Catholic Church, her ginning of the Catholic Church, her path through history is thickly strewn with a lamestable series of broken hopes and false piedges, all of which the State promised to fulfil by solemn contract entered into by Pope and King. Concordats unquestionably have their uses, but no one timely have their uses, but no one will dony that they have been too often a chain between Church and State, whose every link pressed heavely on the former. The documents came through the Minister of Belgium at Washington, Baron Moncheur, who also wrote a personal letter of felicitation. Accompanying the certificate was alsoa letter from the Secretary General of Foreign Affairs of Belgium. The certificate contained the signature of

King Leopold and is dated July 29. The honor came unexpectedly to Father Shanley, and was conferred upon him because of his activity in the interests in and defense of . the Congo Free State, in Africa, all this being set forth in the documents received. Baron Moncheur was himself largely instrumental in having the knighthood conferred upon Father Shanley.

Accompanying the documents also was the insignia of the order, a beautiful cross of silver, with a blue and gold crown in the centre, containing the motto of the order in French:
"Travail et Progres." The cross was pendant from a heavy ribbon of blue and black.

The woman who dies without know ing for herself the dear delights of home where she is the surf and center, who has never held children her very own to her heart and grown their love, who has never had any ornament which breaks the herichance to set upon the coming has been cheated out of the best and most enduring goods life has in its deep truths often unsuspected until the heydey of youth is passed. It is the fashion and a vile one it is, nowadays, to sneer at the mother of half a dozer children and to belittle her sphere. "Her mind is narrowed by the walls of the nursery," says the colege mates and ardent spirits with missions, "She is asphyxiated by domestic cares." She would come in of a morning and give a frosty little bow to whom soever should happen to be in the room, and then set to work. And even in the lulls, when other work was not ready, she would sit silently before her desk, and never join in the low-voiced chatter of the other girls.

And it was through one of these young girls that her reserve was at last broken.

"Oh, mother dear," said Mattie Pavis, on the first Monday evening of Helen's coming to the office, "we have the gueerest and most unapproachable girl working with us the point of her pencil She broke this morning, and I smiled at her in just the happiest way I could, and handed her one of mine. "I believe," said one of the girls once, "that her friendship isn't worth having if she acts like this, and I just won't try any more."

But Mattie only laughed, for Mattie was all good nature, and not the sort of girl to give up after one or two defeats. "We must only try again," she said, "for I think it is the most unpleasant thing in the world to have to be with a person continually who is uncongenial to you. DOG SAVES TWO LIVES. "Mac," a very intelligent water spaniel, owned by Frank Spurbeck of Duluth, saved the lives of two children who were in danger of drowning. Frank Bridgeman, seven years old, and Olive Pugh, eleven, got into water in Chester Creek where it was over their heads. Bouguereau's Romance.

Certainly the artist Bouguereau, who died last week in Paris, was a model of filial obedience. The marriage of the painter to Miss Elizabeth Gardner, of Exeter, N.H., a few years ago, when ne was 72 and she was 46, created considerable surprise. They had been engaged, however, for twenty years, but Bougue reau's mother had opposed his marrying an American girl, and because French law forbids children's marriage without the consent of parents, Bouguereau waited until she died, a the age of 91 years, before the cere mony was performed. They were engaged in 1875 and married June 22, 1896, at Paris. When he married her, Bouguereau was a widower.

Miss Gardner was the daughter of a well-to-do Exeter family. The German Catholic Congress STRONG AND VIGOROUS.

A glorious day was Sunday in

Strasburg. The General Catholic Congress was opened here with service at the Cathedral and a procession, the like of which I have witnessed, though I have much experience of the crowding and swarming of men. These German Catholics build wisely, and it is no wonder that Pope Pius X recommends their action as a model for other Catholies. They are establishing their organization more and more on the strength of the working men; workers' procession is now a regular feature of the opening of the gress, and year by year the demonstration grows in proportions splendor. This year special train after special train poured its living freight of toilers into the city, and it was a magnificent sight when they were all drawn up in order with their flags and musical bands. Imagine a procession numbering no less than thirty-six thousand people, all, belonging to the classes whose muscles and sinews are well developed by hard work. The Church is a power when it can be a prime move in such a scene, and its power no one can destroy. The processionists passed beside a tribune where sat amongst others the Bishops of Strasburg and Metz, Assistant Bishop Zorn von Bulach, the Abbot of Orlenberg and Dom Pothier. Halting for some minutes, the leader of this vast array of workers briefly addressed the Bishops, and their the gathering proceeded on its way. The meetings at the Fest-Hall have been very large, and the speeches spirited. Assistant Bishop Zorn von Bulach, in the course of an address, said Strasburg had never before seen such. a

Presbyterian Minister Startles His Elders.

The Sun, of Baltimore, publishes the following special despatch from Washington, under date of August

"By seeking and obtaining the blessing of Cardinal Gibbons upon a cross to be presented to Miss Marie Smith, a bright pupil of the Sundayschool of the Washington Heights Presbyterian Church, Rev. E. Lawrence Hunt, pastor of that church startled some of his congregation yesterday, particularly the elders.

It was Mr. Hunt's farewell service, as his resignation takes effect Sepember 1. At the conclusion of his sermon he sallied toward Miss Smith and said:

"Two years ago you won a Bible for learning the catechism, and that in the short space of one month. I told you then from the pulpit what then displeased some that as you had been baptized in the Roman Church, your mother's Catholic Church, I hoped you would in time be confirmed in that Church. I am glad to know that you have also been most regular at our Sunday school and our mid-week prayer meeting

" 'I told you the word of God was better than our catechism, and that when you had got the Gospel of St. John by heart I would give you a cross like the one I wear on my watch-chain. Though you have not completed it, this is my last Sabbath here, and I am glad to give it to you now.

" 'I saw Cardinal Gibbons last week and told him all the facts in this matter, and His Eminence graciously promised that if I would send him the cross he would bless it. I did so. This will have an added sacredness and value to you as a faithful child of that Church,

because it has a Cardinal's blessing, " 'Cardinal Gibbons' blessing of this cross is of interest to all. The Church of God is the hope of the world. That a Cardinal of the Roman Catholic Church should bless a cross given by a minister of the Presbyterian Church of Washington to a child as a reward for learning the Gospel of St. John out of a Bible given by the Presbyterian board will do untold good, and when all the churches work together to bless man, to get the world to know and obey the word that God has spoken, so that all shall run in the way of God's commandments, as God hath "Literally, of course, he doesn't be supplied free of charge by applysoldiers?"

WHAT HE WANTED TO KNOW.

A rather amusing story is told in connection with a certain learned professor. He had been asked to deliver a lecture, which he readily consented to do-in the village school-room, and on the important night the place was packed with an expectant audience. The front seats were occupied by a few of the shining lights of the neighborhood, and apparently the lecturer was addressing the select few, for he talked completely over the heads of the rest of the audience.

At length at the expiration of a couple of hours, the professor drop-ped his fofty style, and blandly re-

GERMAN CATHOLIC CONGRESS

The 52nd General Congress of Gen man Catholics in Strasburg furnishes consoling testimony to the vigorous life of the Catholic faith in that adequate penalty and that the accountry. The letter of the Pope read just before the actual work of the Congress began, in which , the this is the case, the sympathy of Pontiff praises the zeal, rich in good fruit, of the German Catholics, and conveys his blessing to the Congress, was received with enthusiastic cheers thrice repeated. Telegrams were Catholic body. sent from the Congress to the Pope and to Emperor William. The mem bers composing the presidency of the various sections bear names of dignity and renown in the ecclesiastical world, and in statesmanship and literature

The discourses of the session's were marked by a high intellectual power and inspiring eloquence. The Cour cillor of Justice, Herr Grober, dis coursed on the theme, "The Sources and Blessings of the Religious Life, during which he said, among othe things, that the Church has always had at heart the benefit of the poor. and her dearest cares were for the working man. She has transformed them from slaves and men of rude manners into free and civilized beings She still persists in educating the masses in Christian labor, and vigor ously strives for the rest and sanctification of Sundays and holidays. In this connection he recalled the name of those who deserved well of the working man : Kolping, Kettler, Manning and Leo XIII.

The Rev. Dr. Albert Erhard, of Strasburg University, followed, speaking on "The Importance of the Papacy for Religion and Civilization." He furnished this ' as the reason we honor the Papacy, because Jesus in one of the most solemn moments of His life, said to Peter: 'Tu es Petrus, et super hanc Petram, edificabo Ecclesiam meam et portae inferi non prevalebunt adversus eam." The Pontificate, he said, may well challenge the most severe history, because there is not in any country, and in any time another dynasty so worthy, so rich in illustrious merits, so beneficent to humanity as the Roman Pontificate has been

Speaking then of the importance of the Papacy, he demonstrated it in the activity which the Papacy has always displayed in spreading the Kingdom of God upon earth, in maintaining firm the organization of the from several places information is re-Church, in its maintaining the religious life of Christendom, preserving

All the work of the Papacy, said ne, signifies nothing else than the salvation of Christianity itself from all the perils which from so many sides have always threatened and still threaten it, and from which no one could say how it could escape without the Papacy. BANKING IN CANADA

Banking, as regulated by the "Bank Act" is recognized as perhaps the safest and most profitable business in Canada. The returns of existing banking institutions to shareholders, after setting aside a portion of the yearly earnings as a reserve fund, have ranged for the past ten years from 7 to as high as 12 per cent per annum

The chartered banks in Canada in existence for many years have regu-In charactered banks in canada in existence for many years have regularly paid substantial dividends yearly. A bank commences to earn profits for its shareholders from the first. Its assets are not locked up in a plant and stock in trade, as is the case in a mercantile or manufacturing business, but are in a position to be instantly turned into money. It would be difficult to find any business in Canada which has been so uniformly successful as banking, or which has paid with regularity year by year such high dividends to investors. This is in a large measure due to the excellent provisions of the Bank Act, which prevents the organization of any weak financial institutions. These provisions are now even more stringent than in the past.

BANKING HOURS TOO SHORT.

It is a matter of common knowledge that heretofore persons doing business with any chartered bank in Canada have been seriously handicapped by reason of the banking hours being too short, and there appears to be no rea-son why these hours should not be extended; why, in other words, the bank should not be kept open day and night, so as to accommodate its customers. if a business man wants to get a cheque cashed after 3 o'clock, trouble and inconvenience are experienced and the business man is seriously handicapped. He is forced to go to a store or hotel and is put under the unpleasant necessity of being compelled to ask a favor of some friend, owing to the early closing of the chartered banks. In many cases in large industries, employees have no opportunities of getting their pay cheques cashed at a chartered bank, owing to the early closing of banks on Saturday, and in many cases persons receiving large sums of money are inconvenienced by the early closing of the banks, being unable to deposit the same in a chartered bank, and consequently such persons run considerable risk by being compelled to keep such deposits at their office or place of business.

NIGHT AND DAY.

It is believed that all this trouble and inconvenience, arising from the early closing of the chartered banks, at the present doing business in Canada, can be remedied by the opening up of a bank such as the present one, which proposes to keep open day and night, with the exception of Sundays and public holidays. Only recently a bank to keep open day and night was organized in the city of New York and its success has been phenomenal, as the conveniincreased facilities for handling business immediately appealed to the The prospects for business on the lines above merchants and general public. mentioned, therefore, appear to be good, and when we look at the immense development of resources and trade in Canada, there would seem to be no reason why a modern, up-to-date bank, such as the present one is intended to be, should not have a prosperous career from the start. It is fat that present conditions generally indicate an extended period of prosperity and the business world of Canada is filled with new projects and enterprises, which must bring about large expenditures. The field for the most profitable operation of a new bank on the lines mentioned is so great that those concerned in the Monarch Bank of Canada feel that there is ample justification for its incorporation and venture to predict that its success will be assured from the outset

What is meant by 'Protein" in flour?

"Protein" in food is the food element that makes bone, muscle and brain.

Pure flour contains more protein, in most useful form, than any other food—but the flour must be pure.

Bran and shorts are waste—if your flour contains this waste, it is proportionately short in "protein."

Now, if you buy an inferior, poorly milled flour, you are paying for bran and shorts, not "protein," and to that extent you are wasting money.

ROYAL HOUSEHOLD FLOUR is milled to make it the purest in the world: therefore it contains most protein, is most nourishing, is most economical to use.

It pays the housewife to insist upon getting "Royal Household" guaranteed flour, instead of taking a poorer flour which the grocer may be interested in selling

The history of the early days of

Concerning Temporel Power He Leaves all to God.

Archbishop Keane, who recently an audience with the Pope as follows in the Apostolate concerning the Holy Father'

In studying his character, no one can fail to remark not only the resemblances, but also and especially the dissimilarities, between him and his predecessors. In him we see, as in Pius IX., much of the gentle soli-citade of St. Joseph. In him we recognize, as in Leo XIII., much of the lofty zeal of St. Paul. But in hin are conscious, above all, of the spirit of St. Peter, ever heedful of these words of the Divine Master "To thee will I give the keys of the Not for a mokingdom of heaven." ment surely did Pius IX or Leo lose sight of that divine utterance and of the sublime commission which it im plies. But their providential circumstances compelled them to devote very much of their attention to the relations between the See of Peter and the civil powers of the world Pius had to stand to the last solemn protest against the spoliation of the patrimony of Peter. Leo hopstrove, up to his latest breath, to procure the righting of the great wrong through the intervention of the Catholic Powers of Europe. Pius X., without either sanctioning the wrongs or withdrawing the protest against it, considers it beyond his control, and leaves it entirely in hands of Providence. thoughts, therefore, are far above what the powers of the earth have done or may do. The God of the nations will see to that. His own solicitude is only for those spiritual interests and ends which Christ our Lord had in view in establishing the kingdom of God on earth.

This sublime aim he has expre in that formula which is the motte of his pontificate-Omnia instaurare in Christo. This, too, he has re peatedly symbolized by his action during the great solemnities in St. Peter's, on which occasions, instead of wearing the triple-crowned tiara as his predecessor did, he has worn simply the episcopal mitre, while the tiara was carried by lackeys in the procession that preceded him. has never forgotten his anguish over that intervention of Austria in the conclave, an event which, humanly speaking, had much to do with his election; and he seems to resent with a sort of indignation any even apparent intervention of the civil power in the affairs of the Church of Christ

The Basilica of St. Peter.

At a recent sitting of the Roman Association of Artists, the "Altmeister," Professor Lodovico Seitz, the painter of the Pontifical Palace. presiding, Monsignor de Waal expressdesire that serious study should be given to the establishmen of a museum, which should be formed of objects connected with the great Basilica of St. Peter: In this museum there should be placed all the objects of art, now beyond the reach of the public, which concern the early history of this great church.

In such a museum the first place would naturally be occupied Michael Angelo's model for the dome of St. Peter's. "Fortunately," says one of the numerous biographers of the great artist, "fortunately for his reputation, we still possess the wooden model constructed under his inspection by a man called Giovanni The curve which it, describes, says this same writer, finds no phrase of language to express its grace. It is neither ellipse, nor parabola, nor section of the circle, bu an inspiration of creative fancy. It outsoars in vital force, in elegance of form, the dome of the Pantheon and the dome of Brunelleschi (in Florence) upon which it was actually modelled. And another writer architecture who was adverse to the Italian style, is forced to admit that architecture has seldom produced more magnificent object than this world-renowned dome.

And then there is also the mode of the church by Antonio di Sangal-These models are to the younger. present in the octagonal kept at rooms, which are in the interior of pilasters sustaining the dome and for the visiting of which specia permission is required. The Antihonaries also should, according to Mgr. De Waal, as well as the gr choral books now shut up in th Giotto, which were at one time hung at the Confess on, and are now preserved in the Chapter room of the Sacristy, he all brought into this proposed museum.

In order to illustrate and comme morate the different epochs of its construction, as well as the placing of the first stone of the church, the beginning of the building, the Pope's oined money and medals comm rating these events, together with the several Jubilee medals, should find a place in such a museum. From the Chapel of Relics it is considered that many works of Christian art might be sent, and especially that St. Peter's, the famous Imperial Dalmatio, which is attributed Charlemagne, and also to a later period; and to be added to this is a Gothic chalice of the 15th century. and the processional cross of the Emperor Justine VI., with many other precious things.

Naturally the sarcophagi of the Popes and the marble fragments and back as mosaics of the ancient Basilica, could not be removed from their places in the Grottoes of St. Peter-the crypt beneath and around the high altar; but the bas reliefs of the sepulchre of Pope Paul II. by Mino de Fiesole, and those which in the time of Pope Sixtus IV., were taken the colossal tabernacle of the cien't church, might be placed here and brought to the ken of the lovers of art who flock into Rome ever year. These and many other of art referred to by Mgr. De Waal would constitute a valuable and uni-

A CRIPPLED PARLIAMENTARIAN

The late Mr. Kayanagh who set uccessively for two Irish constituencies in the English parliament, was nicknamed "The Turtle" because he had no legs and his arms were trunketed. He had to be wheeled into the House, and was, when he wished to address the House, lifted unto his seat, but when he spoke he was listened to with the greatest attention and his oratory was excellent.

ABBR LE BEL AND CANADA

The following has appeared in th While reading the para

ting forth that Rev. Abbe le Bel, who is to fill the chair of French literature in the University of Ottawa, is a Canon of the Cathedral of that the Canons of that Cathedra have had much to do with Canada in the past. Just one illustration o this:

The Abenakis Indians, who roamed over that part of this contin comprised in New England and New Brunswick, had been harried by the English and driven northward back to the border land, they formed close all!ance with the French on the treasure of textile work belonging to St. Lawrence, and proved their met tle in many a foray against the Engto lish settlements. ally useful in making the Five tion Indians hold a respectful attitude toward the French, for were great fighters and very cleve at stratagems. They were an intel lectual nation, not inferior to Iroquois, as one fact shows:-As far 1652, the "Jesuit Relations" tell of the use these Abenakis made of a kind of hieroglyphic short hand they had invented. tened to the missionary, had a piece of charcoal for a pencil and a bit of birch bark for paper, and took down his words as fast as he could talk; then studied their manuscript over night, and came back the nex day able to repeat to him his structions of the day before. tonishing him by their accuracy

That shows that they were no or dinary Indians. Abbe Maurault tells us that they made good Christians readily assimilating the truths of re ligion and appreciating the spiritual ity of Christ's teachings.

When they came into the land New France they were given a settlement at St. Joseph de Sillery near Quebec. Then began an exchange of loving tokens between these Indians and the Canons of the Cathedral of Chartres. In 1684 the Canons sent them a statue of the Virgin Mother. In return they sent the Canons an elaborately worked wampum belt, with a letter full of kindly expressions. After that for many years there were exchanges gifts and letters showing a close in timacy between the Indians and the Canons of the Cathedral of which the Abbe le Bel is to-day a Canon a successor of these Canons of the 17th century, whose relations the Abenakis were so cheery and interesting. In 1699 Pere Bigot sent our foreign missionaries, we have to the Canons a fine belt of wampum, wampum, upon the making of which skill. In return the Canons of Chartres sent them a silver statue of the Virgin. All these tokens of good will and

fraternal affection were kept for a time in the Church of the Mission of St. Frances de Sales, and then transferred to St. Francois du Lac. 1759 the church and all the gifts from the Canons of the Cathedral were destroyed by that prince of backwoods fighters, Rogers, who, by a marvellous march from Missisquoi Bay, surprised the Abenakis in the night and killed 200 of the men, all there were in the village, in fact.

Some of the gifts of the Abenakis to the Canons of the Catheral of Chartres had a better fate. Abbe Casgrain tells of having seen the first wampun belt among the trea Cathedral. Probably this and other gifts are there Pere le Bel could tell, it is likely.

"When was all this;?" demanded her father, his voice gruff with the effort to keep back the tears. Rhoda hesitated. "Ten days ago,"

"And where under the sun have you been ever since ?"

She pushed back her hair wearily "I've been trying to work in a store -and I was almost as dismal a failure at that as I was as a prima donna.

"Now, Rhoda-how could you?" cried her mother.

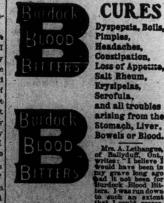

"Oh, you don't know the feeling I had! I wanted to come home, and yet I just couldn't. It seemed like coming home defeated. It seemed I just must do something in the city, and so one of the gins got me a place in a store."

She paused, and then laughed-the nearest to a natural laugh they had heard since Her return. "I was an awful clerie! I hated it! The air was so bad, and some of the people were so snippy and horrid. then, father, one night I came home with my head and my feet both ach ing, and all tired and sick, and I found your letter about Mr. Childs wishing I was home to take th school, and about you and mother being so lonesome, and-and that letter brought me home."

John Free cleared his throat and looked-over at his wife with an air which defied contradiction or rebuke.

"It's a curious thing," he said. 'that I was telling your mother this very afternoon that I had nine-tenths of a notion to go and tellegraph Rhoda to come home. I-I ain' feeling any too well this winter." "Aren't you, pa?" she asked, in

'how can you?"

"To-morrow, father," said Rhoda, tremulously

"All right-just as you say," and the old man turned back to the fire. For a long time Rhoda sat there, pretending to read, but not seeing word. She was thinking of what the teacher had told her of doing the best she could with what she had, thinking how kind they had been to her home-coming-how they had made it almost happy, instead of sad. She was thinking that to them her voice would always be beautiful -that the world's cold shoulder could not thrust away a faith born of love.

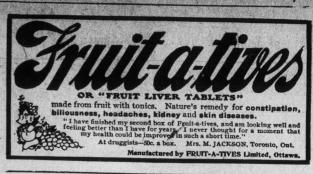

She rose then and walked over to the little organ which stood in the corner. "I will sing a little, pa," she said, "if you want me to."

They drew their chairs round where they could see her, and waited for her to Begin. Her mother's face was wet with tears, and the old farmer put his hand to his mouth and coughed. She sat at the organ for several minutes in silence, her hands resting on the keys, wondering what to sing, wondering if disap what to sing, wondering if disappointment had not ruined all the voice she ever had. And then it seemed that the spirit of that home, that little country home where there love and peace wrapped round as with a mantle:

She raised her head, and her voice weet and tender, carried into the old reem, to the two faithful hearts, the beautiful, never old words:

WILL THE MINTO CUP TRAVEL?

The great question now is: "Will the Minto Cup travel ?" According to some it will, according to others it will remain with the Shamrocks. Messrs. John Dawson, president, and J. T. Timmons, secretary of the Athletics, of St. Catharines, the challengers for the Minto Cup, spent Sa turday and Sunday in town perfecting arrangements for the games They returned home Sunday night with a hopeful message to the clever twelve, who are this year the cham pions of the C.N.L.A., as to their ability to beat the Snamrocks.

While neither of the representatives cared to make any boast of their team, they both admitted their confidence in winning had not been shaken by what they saw Saturday Mr. Timmons, when asked about

the style of play the Athletics put up, replied it was more of a running game than that of the Shamrocks, and the defence was so strong that they accordingly could spare an extra man on the home. He then gave another comparison of the speed and effectiveness of the home by saying that if a Shamrock defence man left his place he knew what would happen-a goal would be scored.

What gave a certain amount of color to this talk was the season's record. The Athletics have scored 143 goals to 41 against them, and have won 14 games and lost but 2. Only three on the team are outsiders, the others are boys of St. Catharines and have an interest in winning the cup.

Mr. Dawson added it would be mistake to underestimate the Shamrocks, and he especially admired their fine finish Saturday. It was first-class lacrosse. But he felt that the Athletics would surprise them when they meet next Saturday.

If the cup goes it will not be without a gallant struggle, the greatest seen yet. The boys in green, win or lose, will put up the game of their lives.

ALLEGED THAT FIVE BOXES OF CANADIAN CHEESE CONTAIN FOREIGN MATTER.

-A despatch from Ottawa states that another implication has been made in England against the purity of Canadian cheese. This time the complaint comes from Bristol, and a consignment was reported to contain some foreign substance in the centre. The Canadian representative was asked to inspect the importation, and out of five cut open all were found to contain a "cure" which was unknown to the handler. The opinion was expressed that the Canadian brought the ball down from the defence himself and scored. Millinery Excellence

Without any idea of boasting, we really believe that there isn't another place on the continent of America, where millinery, for instance, is as artistically displayed, as conveniently sold or as pleasantly purchased, as it is on the second floor of The John Murphy Company's building in Montreal. If there is any place that excels ours, it certainly isn't in New York, that we do know, and New York, of course, is supposed to lead in this kind of thing.

But it isn't only the place, or the surroundings wherein we excel, it is also in the beauty and the style and the value of the hats themselves,—a phase of the subject we do not want to take up to-day. We may have something more to on that to-morrow.

St. Hyacinthe, Sept. 9.—Boarded, 1236 boxes of cheese; 324 boxes sold at 11c; 887 boxes of butter were offered; 815 boxes sold at 21c.

Crysler, Sept. 9.—Boarded, 901 Hoxes of white cheese. Three factories sold at 11 3-16c, and one at 114c. The balance refused to sell.

There have been no changes to note in the butter and cheese markets; prices are ruling about steady, and trade is dull in most quarters. There are some shipments going forward, but these are the exceptions, and re turns show that the total shipments for the past week is the smallest that has been made from Montreal for some time. The prospects for this week are not much better, there is no cold storage boat sailing, and any butter that is sold will have to be held here for some days, wait ing for suitable shipping space. cal dealers to-day are asking 111c to 11%c for Ontario cheese, 111c to 11%c for Eastern and Townships. Butter is quoted at 211c for Quebec, and 22c to 221c for se lected Townships. To-day's receipts by rail and canal were 1062 cases of eggs, 3534 pkgs butter and 12,57 boxes of cheese
