T. EATON CO. 190 Yonge St. Canada's Greatest Store. Toronto.

Less Work! Less Strain! Less Routine!

Store closes to-day at 1 o'clock—Saturday half holiday. Other days we close at 5 o'clock during July and August. No other store in America, so far as we know, closes regularly at 5.

Less work and more play is a step nearer the millennium. It is the sort of reform the people want, and the sort of philanthropy salespeople most admire.

- Ladies' Bathing Suits, made of fine black lace, combination blouse and drawers, separate skirt, trimmed with white satin. 2.50

Things to wear, of course, as well as things to play with. The store touches all sides of your living, and the activity continues in season and out of season.

AN IMPORTANT JUDGMENT. The decision of Judge McDougall yesterday in the East York re-count goes further than any other judgment ever before given to clear up a lot of uncertainties in regard to ballot papers and marks upon them.

When Mr. McCarthy came to argue the case, he took quite a clear and broad view, namely, that the essence of the ballot law was to secure, first, secrecy, and next, that the voter be enabled to vote for his candidate.

HOW OR NEVER. Have the late members of the Toronto confederation in the future of this city? Do they entertain the suspicion, originated by Mr. Mansergh, the eminent English hydraulic engineer, that Toronto's population will never exceed 200,000 if her own citizens do their duty?

A GERMAN-FIGHTING BOAT. Passengers and Crews of Steamers will be Met by the Floating Distincter and Cleared in Short Order.

New York, July 3.—With a week Health Officer A. H. Doty will put in commission the first steam disinfecting plant in the world. By the use of it, the time required to disinfect a vessel will be reduced from the previous five hours, to one hour, and a consequent saving in cost of the work will be made.

The boat which is to revolutionize the work of the disinfecting plant is the sidewheel steamer Ripple, which was bought in 1882 during the cholera epidemic in the State of New York.

As soon as a ship from an infected port is sighted off Fire Island, the Quarantine officer will be notified and the steamer Ripple (its name, however, will be changed), will start out to meet the suspected vessel.

The work of caring for the passengers and crew will be done on board the Ripple. Men and women will be brought down to the upper deck of the ship and the crew will be kept in the lower part of the vessel.

While the passengers and their clothing are undergoing this treatment, the crew of the Ripple will be kept in the lower part of the vessel and will be supplied with food and water.

At this point the meeting was cut short and it was decided that all further discussion should take place before the meeting of the committee.

THIS TINY BABY IS DEAD.

Weighted But Twenty-Four Ounces at Birth and Lived Eight Months—Doll's Clothes Fitted It.

New Brunswick, N.J., July 3.—A baby that has attracted attention all over this part of the country died in this city this morning. Its name was given as 'Baby' and it was born on July 1st.

At its birth the baby weighed 24 ounces, and the attending physician, Dr. A. N. Baldwin, was positive that it could not live. It was the son of Mr. and Mrs. James M. Smith.

When seven months old the little fellow weighed but three and a half pounds. The doctor who attended him was well proportioned, and he was considered a fine-looking baby.

After the baby had lived eight months the physicians expressed confidence that he would live. This seemed likely until a few days ago, when he became ill with marasmus and died this morning.

THE MAKING OF CIDER.

Millions of Bottles Exported from Germany Annually—A Trade that Canada Might Cultivate.

The year 1895 has been a good one for cider manufacturers in France, the amount produced having risen to 25,585,616 hectolitres, or an increase of 11,302,795 hectolitres over the average of the last ten years.

Mr. W. T. R. Preston last night called a meeting of his scrutineers and other active workers in the recent contest for the Liberal nomination.

The gathering was enthusiastic in the extreme, and started the evening's doings by adopting a very bold resolution, moved by W. J. Smith, and seconded by J. W. Simpson.

The defeated candidate then went on in the strongest of terms to denounce his opponents. He accused them of wholesale corruption, perjury and everything else in the calendar.

At this point the meeting was cut short and it was decided that all further discussion should take place before the meeting of the committee.

THE CITY OF WINNIPEG

The Great Importance of a Railroad and Commercial Centre.

Marvellous Growth of the Prairie City Since 1880—Special Prospects for a Great Future—Wholesale and Retail Business—Commercial Centre.

With the remarkably rapid development of Manitoba and the Northwest Territories Winnipeg has become a centre of considerable importance.

From the small trading post established over a century and a half ago at the junction of the Red and Assiniboine Rivers, called Fort Rouge by its French founders, and later, in 1839, Fort Garry was created, the gates of which were the only ones that have spread over the prairie a well-laid out city of spacious streets and avenues, lined with extensive blocks of buildings, which would do credit to cities of much older growth.

Winnipeg as a City. Although Winnipeg is a city without suburbs or scenic surroundings, and therefore strictly speaking, a city of commerce and business.

Electricity and gas for street and house lighting. Electric street railway. Pretty parks and green spaces.

Handsome public and private buildings. An excellent educational system. Churches of all denominations and societies to be found in the larger cities.

Enterprising and ably edited newspapers. Splendid hotels, the Hotel Leland being the most central.

A police force second to none. A telephone service with some 1000 subscribers.

Offices of all the leading telegraph companies. Some paved streets and sewerage and waterworks systems.

A healthy climate, a growing trade, fine railways and extensive parks.

As a Railroad Centre. As a leading Western railway centre, too, it has made remarkable progress.

This is almost entirely due to its enterprise of the C.P.R., which, besides the great trans-continental route, has extended branch lines in all directions, and has also afforded facilities for the entrance of the trains of the Great Northern Railway.

The C.P.R. is represented at Winnipeg by Mr. W. Whyte, who is general superintendent of the Western Division. His assistant is Mr. J. Jones.

Mr. Whyte was formerly with the G.N.R. for a number of years, and is an experienced railway official. Mr. J. Jones is C.P.R. Land Commissioner, whose office is also in the station building, and where maps and all information about lands, etc., can be obtained.

The Northern Pacific also very early extended their important railway system to Winnipeg, and is well represented here by Captain Herbert Swinford.

The Manitoba & Northwestern is another progressive railway, the headquarters of which are located here. Columbia Bicycles STANDARD OF THE WORLD. COLUMBIA STEEL TUBE MILLS. One of the Pope Mfg. Co.'s five great factories at Hartford, Conn.

YEARS of testing and proving demonstrated that ordinary steel tubing would not do for Columbia Bicycles. The quality was uncertain; the supply of the best was limited. Therefore our own great tube mills, shown above, for making all our steel tubing. No tubing in the world to-day equals the Columbia high-carbon-steel and nickel-steel tubing for strength and rigidity. You are sure of quality when you buy a Columbia. UNEQUALLED, UNAPPROACHED. THE RECORD OF THE PAST IS THE BEST GUARANTEE FOR THE FUTURE

THE EQUITABLE

Life Assurance Society of the United States.

DURING the past Thirty-six years the EQUITABLE has accumulated, in the transaction of its business, Total Assets of over

\$201,000,000,

out of which it now holds, for the benefit of its Policy-holders, Total Surplus Funds, or Profits, amounting to over

\$40,000,000,

which exceed the sum of the Surplus Funds which have been accumulated, and are now held, by any other Life Assurance Company by over

\$13,000,000.

DURING the past Ten years the EQUITABLE has made Total Surplus earnings of over

\$46,000,000,

which have been larger than those of any other company, and has, after paying Dividends to Policy-holders, accumulated during the same period a Total Surplus for its Policy-holders Amounting to over

\$27,000,000,

which exceeds the Surplus accumulated by any other Life Assurance company in the same time by over

\$6,000,000.

It would be wise for a person intending to assure his life to study the record of the Assurance Company proposed to him, and learn the facts upon which the promises of future Dividends and Profits are based. In other words, LET HIM ASCERTAIN FOR HIMSELF the results that have been secured by the Company suggested, in the accumulation of surplus during its history as well as its average profits in recent years.

In entering into a contract which may not terminate for thirty or forty years, it will well repay the assurer to give the subject the careful investigation that would be devoted by him to any other affair of like magnitude and importance. Due inquiry having been made, let the Company in which to assure be selected—one whose past record and present financial condition justifies the belief that in future it will afford both the greatest security and the largest profit of any.

Persons considering the assurance of their lives will find it to their interest to make an examination of the reports and new policies of the EQUITABLE.

For further information, apply to any of the Society's Agents or to
