EXHIBITION IS ONE OF CITY'S BEST ADVERTISEMENTS, SAYS MAYOR POTTS

City Council Will Assist in Every Way to Make It a Success.

Urges Citizens To Decorate Premises

That the annual exhibition in St. John was one of the very best advertised the city could wish was the unbiased opinion of His Worship Mayor Frank L. Potts when interviewed in respect to the exhibition.

MAYOR F. L. POTTS.

Benefit For All. The stay of people in the city afforded an opportunity for an exchange of opinions and a discussion of the needs of the respective sections of the Province with a view to the benefit of the whole.

An inspection of the city and the facilities offered here for advancement, afforded the visitors during the stay was also dominant in the mind of some person, might light up, when coming in contact with the right surroundings and atmosphere, and the city would be the better in the establishment of some new industry or the suggestion for a new industry, which had not occurred to any one else, and which might be easily put into operation.

likewise, and their imitation of the better work of others would naturally result in other people imitating them, which in the final analysis would redound to the good of the Province as a whole.

"Made in St. John."

The Made-in-St. John exhibit was a feature which would attract a great deal of attention and should have the effect of bringing home to the people of St. John, the Province of New Brunswick, and visitors from other provinces and the United States just what sort of a town in which they were living or visiting, and what the possibilities were for the development of that which the town already had and the chances for the introduction of new, bigger and better industries.

LOYALIST TEMPLE MEETS.

Loyalist Temple, No. 13, Pythian Sisters, held its regular meeting last night in Temple Hall, Main street, with Mrs. Myles Saunders, M. E. C., presiding. The report of the committee, which had charge of assisting at the Protestant Orphanage garden party was received and showed that the Pythian Sisters' undertaking in that regard had been most successful.

Exhibition Visitors

Are Cordially Invited to Inspect Our Fall and Winter Exhibit Of Men's Wear

We are glad to join in the hearty welcome to every visitor to the Exhibition. It is an institution in which we all take a great deal of pride because it accomplishes a valuable service to our community.

There is a great deal of interest at this time to every man in the excellent exhibit at this store of

20th Century Brand and other fine tailored Fall Suits, Topcoats and Winter Overcoats

as well as the splendid collection of cloths in our Custom Tailoring Department, and our select lines of Men's Furnishings.

An inspection of our clothing will impress one that wonderful progress has been made in the style, finish and fit of every garment.

Prices? We try to make the quality better than the price—\$20 up, \$60 down, covers the range.

Gilmour, 68 King St.

The Evening Times-Star

The Evening Times-Star is printed at 23-27 Centre-street, every evening (Sunday excepted) by New Brunswick Publishing Co., Ltd., J. D. McKenna, President.

ST. JOHN, N. B., AUGUST 29, 1924

LET'S GO!

The Times-Star today devotes a good deal of space to the Exhibition which opens tomorrow evening. Whether the fair will be a financial success or not depends upon the citizens. It is a community enterprise, engaged in once year. There can be no doubt about its success as an exhibition. The space all taken, and all corners could not be accommodated. There are new stunts, and all the others are of such interesting nature that time may pass profitably spent in studying them.

elect. I appreciate the affection of those who have put forth my name. But I ask them to appreciate my position, sympathize with me, and withdraw my name.

WOMEN AS POLICE GUARDIANS.

Anything about Scotland Yard has always been read with a great deal of interest in the English-speaking countries. Quite lately there has been an agitation for the employment of women police in the largest city in the world—an agitation that became so strong that a committee was appointed, called the Home Office Committee, and a part of the report indicates that the efficiency of the service has been improved by women police. Some of the reasons given are worth noting. The Committee says:

Press Comment

90 CARS PER HOUR. (Toronto Globe.)

Often more than once every minute tourists from the United States motored into Toronto on Saturday afternoon. The estimate was made by giffers from the Hamber Valley Club who were motoring to Hamilton to play on the Chedoke course. Between the Humber River and Mimico their attention was attracted to the number of automobiles carrying United States license, eastbound, and resulted in a wager on the number which would be passed before Hamilton was reached. By count, 156 automobiles with licenses of many states of the United States were passed between the limits of Mimico and Hamilton and within an hour and forty minutes.

YOUR RESPONSIBILITY. (Cleveland Press.)

Little Loretta Walls was riding her coaster wagon along the sidewalk when she was killed by an automobile Thursday in Cleveland. She was only 5, but she had learned to keep on the sidewalk, and not to cross the street without holding mama's hand. She had had her nap for the day, and was wearing her clean white dress. But the man driving the big sedan was in a hurry. Or he wanted to see how fast he could take the corner, just as a sporting event. He would pass that truck close to the curb and show the world how clever he was. The sedan collided with the heavy truck, and then, beyond control, ran across the sidewalk, crushing the joyful life out of beautiful little Loretta. They carried her away to the hospital. Such a "stupid sight!" And her coaster wagon is all a wreck, and there is a little shoe there on the sidewalk, to tell the terrible news to her mother. Just one of the tragedies of Cleveland's streets. Daily they are enacted. Of course the driver of the sedan is held on a manslaughter charge, but that is no comfort to the sorrowing parents. The responsibility of the person at the wheel is great. Taking such an apparently remote chance may bring such awful results. The man at the wheel does not want to kill anybody. But it is so easy to take a chance!

THE PEOPLE'S HEALTH. (Ottawa Journal.)

Those curious people who see a crazy world going to the demitillon bows just because it is too stupid or too wicked to adopt eugenics should study vital statistics. A few days ago a learned Harwich used some phrases that are apt to linger in the memory. He referred to the "vinegary spinner" or the "blighted middle-aged fanatic" in his communication, which in part read as follows: "The main point is to eliminate any women of extreme views—the vinegary spinner or blighted middle-aged fanatic—and to get broad-minded, kindly, sensible women who use common sense in dealing with their sisters who have taken a wrong turning, more often from the desire to lighten a dull existence than from inherent vice. That women police should have power to arrest is essential, but this power should be restricted so as to avoid absurd situations, where enthusiastic women might try, for instance, to tackle a burly drunken man." General McCready did not hesitate at all to express his opinion in forcible language, even if it were not "diplomatic as it might have been."

Great Britain made a profit of seven and a half million pounds last year on the coinage of silver. This is among the many items in the Blue Book just issued by the British Government. It is also shown that the sale of postage stamps brought a revenue of over thirty-three and a quarter million pounds, in round numbers \$150,000,000! The licenses from wireless telegraphy companies brought in about two and a half million dollars. There was some revenue from unexpected sources; for example, gain on exchange in Iraq amounted to nearly \$100,000. There are British consulates as well as Canadian, and \$3,724 came from consular money. This was not quite so much, as the contents of an unclaimed box at the Constantinople Embassy brought—\$3,784; while the French Government paid to the British its share of transporting ex-King Carl of Hungary to Madeira—\$228. All of which goes to show that the British revenue may be credited to many sources.

Some financial news from New Zealand includes the statement that the war debt of that country has been reduced by \$6,000,000 during the last three years; that the Post and Telegraph Department had a surplus of revenue over expenditure of \$268,000; and that the budget of New Zealand anticipates a revenue of \$27,857,620, a decrease of \$102,700; while expenditure is expected to be \$27,505,060, an increase of \$1,387,055. New Zealand's revenue is about one-third of that of the Dominion of Canada.

O'CONNELL PICNIC IN SUSSEX SEPT. 6

Sussex, Aug. 28.—Following receipt of a letter this week by His Worship, Mayor J. D. McKenna, from J. D. O'Connell, "The orphan's friend," Mr. McKenna announces that "O'Connell's Picnic" will be held under the auspices of the Mayor and Town Council on the military grounds, Sussex, on Saturday afternoon of next week, Sept. 6 and takes pleasure in extending, on behalf of Mr. O'Connell, an invitation to all children residing between Hampton and Petticoat, to be present. Games of all kinds will be indulged in, refreshments served, and the Citizens' Band will be present and furnish music for the occasion. Artists of France had Burbank produce a flaxseed which would furnish a pure white oil for their paints.

MY HOME.

(By Peter McArthur.) Because their hearts were hungry Our fathers crossed the sea; They yearned for homes and firesides Where their souls could all be free! They grasped the hand that led them With hands of patient toil And wrote their faith and courage Upon the kindly soil.

LIGHTER VEIN.

"Well, Bloom," a physician asked a young colleague who was just starting in, "how's your practice?" "In the mornings, practically no one comes," was the reply, "and in the afternoons the rush falls off a bit." "Obscuring the limelight." "Are you going to broadcast your speeches?" "I haven't decided," answered Senator Sorghum. "I don't like to divide my horse," "that house of mine haunts me. I went into a moving picture theatre in Chicago, and there the house stood, with a burglar jimmieing his way into my den. When I got to Cleveland, there it was again, and the cook was throwing a custard pie in the funny tramp's face. I thought I was rid of it when I reached Pittsburg, but alas, there it was, with a bulldog chasing the rejected motor out of the front door. In desperation I hurried on to New York, but I couldn't get away from it. There I found Jackie Coogan digging fishing worms in my garden."

MOTOR TOURISTS TAKE BOAT.

Among the passengers to arrive on the motorship D. J. Farly yesterday were Mr. and Mrs. Cliff of Mar's Mill, Me., who are on a motor tour of the southern part of the province. Others in the party were Thomas Kempton and Miss Ella York, Presque Isle. After motoring down to Fredericton the tourists enjoyed a trip down river aboard the steamer, and expressed themselves delighted with the fine scenery along the St. John River. The party will return to Mar's Mill via Woodstock and Houston.

ADVENTURES OF THE TWINS

By Olive Roberts Barton

THE TWINS MEET BUDDY OSTRICH

“Hello, there!” cried Weeny. Weeny and the Twins made Gipsy adventures. The Mule good-bye and started on more “Did you know any more people in

the circus?” asked Nancy as Weeny trotted along with the Twins on his back. Suddenly Weeny began to laugh. “Didn’t I, though. I was just thinking of Buddy Ostrich. Buddy was a dreadful goose and everybody was always poking fun at him. But he had a kind heart so he had a lot of friends. Did you ever notice that people with really kind hearts always have friends? But they have to be really ones. Really kind hearts, I mean.” “Tell us about Buddy,” said Nick. “Can’t we go there? To his house to visit him?” “Sure we can,” nodded Weeny. “That’s where I’m going now. Only Buddy doesn’t have a house, really. His home is where he hangs his hat, he says, and I guess it’s true. But I know just where he lives and we’ll be sure to find him.” Weeny crossed about forty countries and an ocean and came finally to the hot country where the ostriches lived. Next he hunted a sandy plain, and then he stopped and looked in every direction. “I don’t see him,” he said. “I don’t even see any place he could hang his hat. There isn’t a weed growing anywhere,” said Nick. “That won’t bother him,” said Weeny. “He doesn’t wear any hat.”

THE OLD HOME TOWN

By STANLEY

SADIE SNOOKS CATS TOOK POSSESSION OF THE TOADVILLE FISH WAGON TODAY WHILE THE FISH MAN WAS MAKING CHANGE FOR A DOLLAR BILL.

“You know why,” said a voice, and they all turned around in surprise. There stood Buddy Ostrich. He was such a fast runner that he had caught up to them in two minutes after he first spied them over a little sand hill. “Hello, there!” cried Weeny, turning around and wrapping his trunk around Buddy’s long neck and hugging him. “Say,” said Buddy. “I wish you wouldn’t do that, Weeny. It makes me nervous. Your trunk reminds me of a lasso quite enough without having it wrapped around my neck. That’s the way the hunters catch us. By chasing us on horses and lassoing us like cowboys lasso cows on the prairies.” “Why don’t you wear a hat, Buddy?” asked Nancy, who hadn’t forgotten what he said. “Because,” said Buddy. “When I was in the circus I found out what people do with the feathers they pull out of our tails. They dye them all sorts of colors and put them on hats, and make fans out of them and trim dresses and everything. I used to hide my head in the sand when I saw a hunter coming, but I soon found that it didn’t do any good. It left too much of me sticking out.” “You can be glad you aren’t a turkey,” said Weeny. “It may be hard to be an ostrich, but it’s worse to be a turkey.” “Why?” asked Buddy Ostrich. “Because a turkey loses its head instead of its tail,” said Weeny. “You can grow more tall feathers, but it’s pretty hard work to grow a new head.” “Why?” never thought of that,” cried Buddy. “You always were a cheerful person, Weeny, and I’m glad you came.” (To Be Continued.)

CHEERIO! THE WORD REGARDING WHEAT CROPS IN CANADA

Milling Men Say 310,000,000 Bushels for the Western Provinces.

BETTER ADVICES

Sir Henry Thornton’s Estimate at Least 300,000,000—Better Feeding.

Toronto, Aug. 29.—An estimated wheat yield of 310,000,000 bushels in the Prairie Provinces was made by a milling company’s executive yesterday after an extensive survey of the whole western situation. The latest estimates indicate that the Manitoba yield will not be less than 60,000,000 bushels. The lowest estimate for Saskatchewan is now placed at 175,000,000 bushels, and it is conceded that Alberta’s aggregate will not fall short of 75,000,000 bushels. There is a good possibility that threshing results will show higher yields than are now indicated. The experiences in the Dakotas and Minnesota across the Manitoba boundary are that the yield per acre is running considerably better than the best estimates just before the harvest. It seems altogether likely that the same will hold true in Manitoba. Thornton’s Estimate. Montreal, Aug. 29.—The west’s wheat crop will run at least 300,000,000 bush-

els this year, Sir Henry Thornton, president of the Canadian National Railway, stated here Tuesday night when he returned to this city after a five-week inspection tour that carried him to the Pacific coast. “Three weeks ago I said that the crop would be about 275,000,000 bushels. From later reports that I received, I think the harvest will reach certainly 300,000,000 bushels, that is, unless some setback has occurred in the last few days of which I have received no information.” Winnipeg, Aug. 29.—A recent crop statement by the Dominion Government gave the acreage seeded to wheat in the Western Provinces at 21,516,797, and the prospective yield at around 282,000,000 bushels. That was on Aug. 10. There has been a tremendous improvement in the western crop since that date. Everything seems to indicate today that the wheat yield will go well over 300,000,000 bushels, if the Dominion Government acreage figures are anywhere nearly correct. Fine warm weather prevails all over the West, with a fine breeze blowing, making perfect ripening conditions. Harvesting is now general.

BAZAAR FOR ORPHANS.

The maintenance fund of the Protestant Orphan’s Home was increased recently by \$9, the proceeds of a bazaar held by three little girls, Ruth Saunders, Margorie Stewart and Kathleen Stewart. This sum was handed to Mrs. G. W. Campbell and by her passed on to the treasurer, H. Usher Miller.

ENGAGEMENT ANNOUNCED.

Mr. and Mrs. James D. Beyer announce the engagement of their daughter, Mabel Ethel, to Edwin Allison Kay, both of St. John, the wedding to take place on Sept. 18.

FRECKLES AND HIS FRIENDS—SO THEY SAY

By BLOSSER

Guard Your Mouth

Let WRIGLEY’S be the guardian of your mouth and throat. It will combat trouble of various kinds. It helps to keep the teeth free from food particles that ferment and cause decay. It has an antiseptic effect. It relieves acid mouth and thus not only prevents harm to the teeth but serves to sweeten the stomach. It stimulates digestion and helps to prevent the forming of gas that causes dyspepsia. Read from a widely known medical work: “Chewing gum aids tooth nutrition and the cleansing action is a definite benefit—it prevents dyspepsia. Good chewing gum is excellent for bad digestion.”

So we say, after every meal WRIGLEY’S

Social Notes of Interest

Mrs. Kenneth L. Goldring, King street east, was hostess yesterday afternoon at a bridge of nine tables for her sister, Mrs. E. S. Gallop, of Montreal, and Mrs. Leslie Peters, of Halifax. These winning prizes were Miss Kathleen Branscombe, Montreal, Mrs. Thomas Guy, Mrs. Howard P. Robinson, and the guest prize, Mrs. Peters and Mrs. Gallop. Lovely rose sweet peas and choice bachelor buttons made a very pretty color scheme of blue and rose. The gowns were particularly noticed for their daintiness and summery appearance. Mrs. R. H. Anderson, mother of Mrs. Peters, presided over the tea cups and was assisted in serving by Mrs. Harold O. Clark, Mrs. H. P. Robinson, Mrs. A. Nell McLean, Mrs. Ralph Hayes and Mrs. Frank L. Miller. There was a large number of tea guests.

Mr. and Mrs. Frank Tilton left yesterday for Toronto to attend the exhibition. They will be guests of Mr. Tilton's brother and his wife, Mr. and Mrs. Frank Dawes, while in Toronto.

At the public meeting in the evening four returned missionaries gave inspirational addresses on their experiences in the field. Those who spoke were Miss Wilson, from Bolivia, and Miss Bertha Myers, Miss E. Besale Lockhart and Mrs. R. E. Gullison, from India.

The chances of evangelizing the world would be greatly increased, he believed, if world sobriety was established. He reviewed the situation showing there had been a reaction with regard to temperance legislation in Canada and several provinces had reverted to Government control of liquor sales. In the United States great progress had been made, he said. He maintained that there was indifference of governments, federal and provincial, in Canada, to enforcement of temperance legislation, that police courts and officials worked at variance and that there were violations everywhere. He said also the cry of taxation had alarmed the people and Government control was looked on as a thing of the past.

No cooking. No sticky dishes to wash. Just pour out and serve. Kellogg's CORN FLAKES Oven-fresh always

GARDEN PARTY AT ORPHANAGE ENDS

The garden party on the grounds of the New Brunswick Protestant Orphanage in the Manawagonish Road had a large patronage yesterday, on its second and closing day. In the evening the attendance was especially gratifying. It is expected that a satisfactory sum will have been realized from the undertaking. The children from the Britain street and West St. John homes were much in evidence as they played on the lawn and the board of directors of the orphanage was grateful to the New Brunswick Power Company for providing street cars free of charge to transport the children. In the evening the Carleton Cornet Band, under the leadership of Bandmaster William Lanyon, gave a delightful musical programme.

Much credit for the success of the garden party was due to William M. Campbell, chairman of the general committee, James F. Arthur, secretary, and A. E. Duffy, as well as to the various committee conveners who were as follows: Games, William Smith; refreshments, Isaac Mercer; candy, Mrs. Ernest Waring; ice cream, Mr. Northrup; transportation, J. W. Britain.

The prize winners for the games and those in charge were as follows: On Wednesday night, air gun in charge of J. Kelly; prizes, first, A. Duffy; second, L. Knorr; bowling alley, Fred Wilson; prize won by Miss Marion Carvel; ring toss, C. B. Lockhart, won by Mrs. Morton; ladies' bean board, Percy Nichols, won by Mrs. A. E. Kierstead; men's bean board, Harry Best, won by W. E. Emerson; Housie-Housie, A. Duffy convenor, assisted by Charlie Wright, Conhollor Golding, George Lewis and Walter Bagnell. The excellent prize was won by W. A. Stelper.

The prize winners for last night were as follows: Ring toss, A. Duffy and Raymond Stevens; men's bean board, B. Delaney and R. Rose; execution, B. Fullerton and Miss Stevens; ladies' bean board, Mrs. James Donohoe and Miss M. Kierstead; ten pins, Leonard Maxwell; air gun, D. Delaney. The pies and other food that was not used last night were auctioned. Mr. Campbell acted as auctioneer with much success. The candy booth realized \$175 on the two nights.

MANY AT CLOSING OF PLAYGROUND

More than 500 children and quite as many visitors attended St. Peter's playgrounds' closing yesterday afternoon and evening. The large crowd did not seem overwhelming in the great field, which is so well adapted for recreation purposes, and which has been very popular during its first season. Several races were run and championships decided. Splendid handicraft work was displayed, which will be a feature in the large booth,

adjoining the city playgrounds' booth at the exhibition. Miss Genevieve Dever will be in charge, and was a gracious hostess yesterday, with untiring patience to show the work of the children and to greet the many visitors.

Thomas Gosnell, the physical instructor, was busy with the boys, who played an energetic game of baseball. Rev. J. Cloran, C. S. R., rector of St. Peter's, was present to help the success of the venture in this its first year. In basketball the girls took a leading part, with the exciting finals played off between the Shamrocks and Roses, with the former winning. The line up was: Shamrocks, Helen Butler, Helen Nugent, Doris Garvin, Mary Owens,

Mary Hughes and Katherine Cronin. Roses: Mary Kyfin, Dorothy O'Connor, Bernice Heneberry, Kathleen Sullivan, Margaret McGuire and Alice Dever. Helen Butler and Mary Kyfin were captains.

ENJOY BEAN SUPPER.
Marlborough Lodge, No. 207, Sons of England Benevolent Society, treated themselves to a baked bean, brown bread and coffee supper in their rooms, Germain street, last night, following the regular meeting. A short programme was enjoyed. Those taking part were E. C. Tremaine, Councillor George Simpson, Robert Storey, W. C. Parker, J. Curtis and H. E. Thompson.

KINDERGARTEN MEETING.
The Free Kindergarten Association held a special meeting yesterday afternoon in the Board of Trade rooms, with Mrs. Allan G. McAvity, president, in the chair. The stationing of teachers for the coming season was arranged for and several applications for assistants received. Mrs. J. W. Plewelling acted as secretary in the absence of Miss Marjorie Knight. The kindergartens will begin when school opens. Another meeting will be held to decide the appointment of the teachers, when Mrs. H. H. Pickett, educational leader, will meet with the teachers next Tuesday evening. School will open on Wednesday.

RIVALS THE BEAUTY OF THE SCARLET TANGER

Duofold Jr. or Lady Duofold

The \$7 Duofold in a \$5 Size

Never Failing—Never Ailing

Jewel-Smooth 25-Year Point

\$1 Gold Girdle at No Extra Charge

No Reason Now to Buy a Cheap Pen

YES, in every respect save size, the Duofold Jr. or Lady Duofold is a \$7 pen like the famous Over-size Duofold. And the price of these smaller Duofolds is only \$5—Gold Pocket-clip or Gold Ring—and included, as well as the strong Gold Girdle around the cap.

It's a value the public itself has made possible by focusing demand on Parker Pens, thus scaling down the cost.

But great as the value of a Duofold is, the value of having it is several times greater! For Duofold brings you the speed and character in writing that win with the world, and the writing urge that makes work welcome.

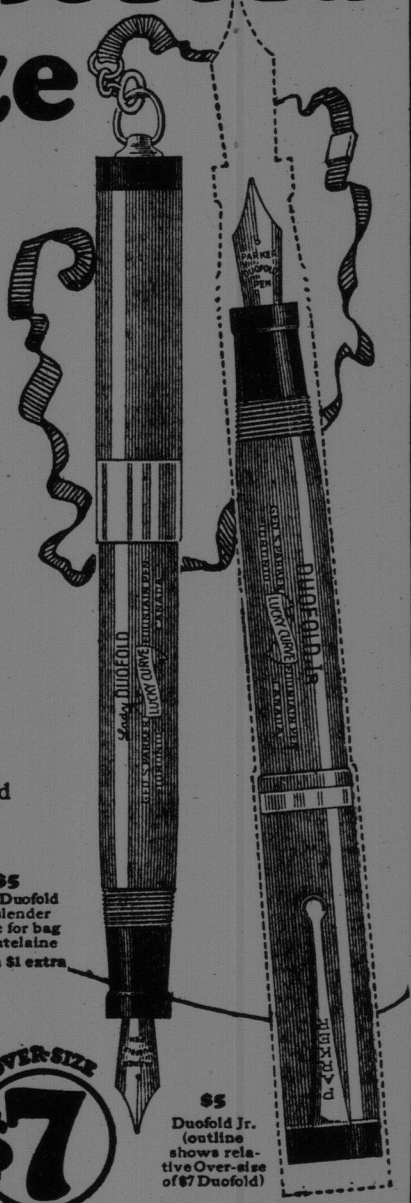

Notwithstanding that Duofold is the classic of pens, it's the most economical made. For its point— if not mistreated—is guaranteed for 25 years' WEAR.

Whoever this black-tipped lacquer-red beauty is seen, its owner commands the world's respect.

Any good pen counter will sell you a Parker Duofold. But look for this stamp on the barrel—"Geo. S. Parker—DUOPOLD—Lucky Curve." Then imitations can't deceive you.

RESOURCES EXHIBIT TO EXCEL PREVIOUS

William McIntosh Labors Hard at His Greatest Effort

The Natural Resources exhibit which William McIntosh has prepared for the St. John Exhibition this year greatly exceeds even the splendid exhibits he has arranged for previous exhibitions. The exhibit occupies the accustomed position on the eastern gallery of the main building and has at each end a glade of evergreen trees of New Brunswick with some of the animals of New Brunswick disporting themselves in the greenery. There are nicely arranged groups of each variety of tree. The natural specimens are used.

In long glass cases, next the greenery, there are specimens of the mineral collections that are loaned from the Natural History Society for schools and at the other end of the gallery a collection of the economic minerals of the province.

In the centre there is a long case divided into four sections, with tropical shells and corals in one section, steric medusa collections in another, collection of butterflies in a third and historical specimens and school collections of animal products in the last section.

Flower Collections.

Long cases, placed along the wall of the gallery, are used to show some of the choicest of the oriental curios from the museum collections, some of the Eskimo garments and other Eskimo articles including some of the gifts recently received from Eldon Merritt and some of the most interesting of the uniforms in the collections at the museum.

A collection of colored pictures, of the wild flowers of the province, splendid examples of color photography, are shown along the window spaces in the gallery. The collection of pictures is further supplemented by specimens of the living wild flowers shown on shelves above.

The collection of flowers will probably be one of the most popular sections of the Natural Resources exhibit this year but all sections will be well worthy of class attention.

NO ROOM IN NATIVE LAND.

(F. T. Hodgkins in The Standard, Sydney, Australia). "We are overcrowded," declares the National Constitutional Association of England, and "Empire migration must be organized on a vast scale. Of one million four hundred and twenty thousand unemployed, three hundred and fifty thousand are ex-service men, for whom there is no room in their native land." Lord Leonfield is treasurer of this worthy association. Besides other landed property he possesses not far from George Hill, in Surrey, and within a few hours of London, 80,000 acres of land, of which 8,000 acres are used as a deer forest. Practically every county contains

DOUGHNUTS - DELICIOUS

THERE IS NO PANTRY THAT CAN be called complete unless it has stored away a goodly supply of

DOUGHNUTS

And not just ordinary doughnuts, either. By that we mean, Why buy any doughnut when you can get them made in our large

Electric Doughnut Machine

Browned to just the tempting requirement and not the least bit greasy

And at just the same price as you pay elsewhere

Exhibition visitors are cordially invited to come in and see this electric machine working and inspect our store.

FARNHAM BAKERY, Ltd.
213 Union Street

For Exhibition Week Only

We Will Sell Our Made in Saint John

Clear Hardwood Flooring at \$89.00 per thousand feet for 13-16 in. thick, and \$69.00 per thousand feet for 3-8 in. thick.

This is flooring which we are regularly selling at \$100.00 per thousand for 13-16 inches thick.

Few persons in St. John realize that we are manufacturing Hardwood Flooring here with machines and equipment second to none in Canada. The Boston Hardwood Flooring concern to whom we ship our flooring in Carload lots, tell us that there is no better manufactured flooring shipped to that market.

These special prices are for Exhibition week only. We will now even take orders for future delivery, but such orders must be accompanied by cash. The 13-16 inch flooring is made in two widths, 1 3-4 in. and 2 1-4 in. face. The 3-8 in. flooring is made in one width 1 3-4 in.

ALSO SPECIAL PRICE ON H. B. PAINT
For Exhibition Week Only
All Colors at \$2.25 per Gallon.

This is the regular H. B. Paint which we have been selling now for 5 years to the entire satisfaction of our customers. If the paint does not prove satisfactory, tell us and we will refund your money.

All Is Ready For Opening of Big 1924 Fall Exhibition

OFFICIALS ARE PREPARING FOR RECORD ATTENDANCE AT THE ST. JOHN FALL SHOW THIS YEAR

New Spirit of Faith in St. John and Added and Improved Attractions Should Draw Large Numbers — Every Available Foot of Space Taken — Elaborate Preparations Made to Handle Crowds — Citizens Urged to Decorate Dwellings and Places of Business.

Come away! Let's go! The Exhibition of 1924 opens tomorrow evening. It is the event of the year from the community standpoint, and deserves the most hearty support of all the citizens. This year's Exhibition should prove the most successful in recent years in the matter of attendance: 1st—Because it will have the most attractive general features. 2nd—Because the new spirit that prevails in St. John will prompt its people to patronize their own Exhibition as never before.

All Space Taken The fact that all space is taken, and many exhibits had to be refused on that account shows what an interest exhibitors generally are taking in the event this year. There will be new features to delight old and young. Hours may be spent in going from department to department, and the fair will have an educational value for every visitor.

It has been a matter of pride for many St. John people to support the Exhibition through the medium of exhibits, and the Made-in-St. John exhibit is a notable instance. It should be a matter of pride for others to give their support by attending. We talk a good deal about the need of industrial expansion, let everybody see the products of the industries we now have. It may prove an inspiration to us all. They are eager to exhibit and showing an interest in these, and not only viewing them, but being induced by the display to buy home-made goods in the future, much can be done towards encouraging local industrial effort.

Let's Dress Up! Let the exhibition spirit prevail for the next week. Get out the bunting and put on a smile. Like the vicar at home, they like to come to St. John at this time of year. Everyone should go away feeling that St. John has got into her stride and is ready to tread the path of progress. Optimism is infectious. Let every visitor catch it while in the city. The Exhibition Association has done its part. Its members have made their task a labor of love. They are eager to make the Annual Exhibition a feature in St. John, because it is good for St. John. Their time and effort have been freely given. It is now up to the rest of us. Come away! Let's go! Let us all begin by hearing the address of President Dykeman and Sir Douglas Hazen tomorrow evening.

Four Bands. Speaking of the musical arrangements and the fire works display, Manager H. A. Porter, the show manager, said yesterday that the four city brass bands—City Cornet, St. Mary's, 42nd Fusiliers and Carleton Cornet—had been engaged. A band will play in front of the grand stand at 2 o'clock in the afternoon and after the free acts in the evening the band would render a programme in the main building from 4:30 until 5 o'clock.

Venus Sweets advertisement featuring an illustration of a woman and a child, with text describing the sweets and their location at 21 King St.

Enter Exhibition From Sydney Street The admission to the buildings and grounds of the exhibition will be by the main entrance on Sydney street. The admission fees will be, as follows:—The price of admission to the grounds and buildings will be 50 cents for adults, and 25 cents for children under 12 years of age. No amusement tax is necessary. Exhibitors' and attendants' tickets, which are not transferable, will be sold at reduced rates and will be good for the entire term of the exhibition.

SHIP'S MODELS TO BE A FEATURE OF ART CLUB EXHIBIT St. John Model Yacht Club Will Have 15 Exhibits on Show. A new departure will be seen in the Art Section at the Exhibition this year as the whole of the large outer room of the art galleries will be given over to a display of ship's models, valuable paintings of famous ships and other exhibits of a similar nature. The St. John Model Yacht Club will have on exhibition about 15 of the finest vessels of its fleet and the 15 will include boats of various sizes and built from the model measuring 30 inches overall to the model that measures 60 inches overall. These models are fine examples of what can be accomplished in exactness of detail on small scale. Each one of the boats is made to scale in the minutest particular and all were made locally. Of the other exhibits in this "ship" room there will be some fine prints of famous wooden ships from St. John, some other models of differing types of vessels and framed pictures of ships that have world-wide reputation.

To Show Pupils' Work. The art exhibit this year is to consist of the work of the pupils of the Art School in St. John, and notably in the fine art classes for china painting, hammered brass, leather work and other art crafts, and exhibits of pupils in both the amateur and professional classes. The art exhibit will be in charge of Miss E. R. Holt, teacher of the Art School, whose task in arranging the exhibits is well known. The number of entries in the competitive classes is exceptionally large this year, but there is no loan collection. Some of the entries in the various art sections show exceptional merit and in recent years they have been more and more a special feature in the art exhibit. The work of the art school pupils was very high on exhibition when it was exhibited at the close of the art classes this year.

EXHIBITION ASSOCIATION STANDING COMMITTEES Agriculture and Dairy—W. R. Patchell (Chairman), W. S. Allison, Ernest Graham, H. G. Harrison, William Adams, Bruce Snoddy, Alex. K. King, G. C. P. Golding, Harold de V. Partridge. Public Safety—J. Thornton (Chairman), and The Executive. Science, Education and Natural History—Thos. Nagle (Chairman), W. F. Burditt, C. M. Flewelling, G. Herbert Green, Wm. McIntosh, S. A. Worrell. Tickets—F. B. Schofield (Chairman), F. S. Crosby, George D. Ellis, Garnet W. Wilson. Transportation and Accommodation—R. E. Armstrong (Chairman), W. C. Snoddy, R. E. Parker, H. G. Gibb, Thomas B. Reynolds. Women—Mrs. J. H. Doody, Mrs. F. E. Holman, Mrs. R. E. Parker, Mrs. B. Baird, Miss Ethel H. Jarvis, Miss Elizabeth Nutter, Miss Mabel Thompson, Mrs. H. Baird.

TRIBUTE TO HON. DR. KING. (Goderich Signal). Hon. Dr. King impressed those who met him or heard him on Saturday last as a man anxious to do his duty in the onerous position in which he is placed. He goes about his industrial business in a manner that suggests that the proper carrying on of the work of the department, rather than any political or party consideration, is the important thing.

PRESIDENT IS GRATEFUL FOR PUBLIC SUPPORT

F. A. Dykeman Commends Response Made by Exhibitors This Year. GENERAL APPEAL Head of Association Urges Constructive Criticism of Citizens.

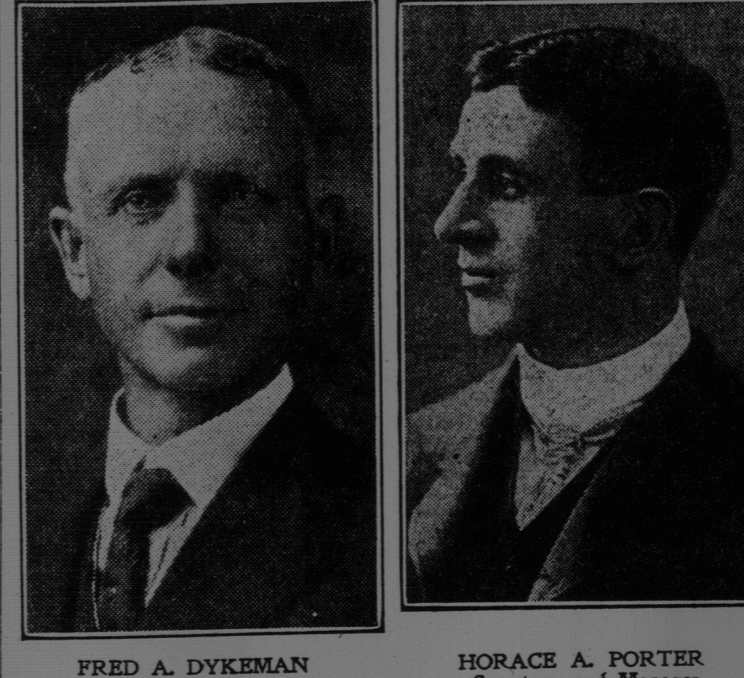

Satisfaction at the hearty support given the Exhibition Association, especially by the manufacturers of the city who had taken hold of the "Made in St. John" exhibit so readily, was expressed by Fred A. Dykeman, president of the association. Only about 5 per cent. of the manufacturers had refused to take space in this exhibit and this he thought spoke well for them at this particular time. Mr. Dykeman made an appeal for greater co-operation on the part of the general public and pointed out that the exhibition was not a private enterprise but a public one and the directors and officers were giving their time freely and without remuneration to serve the citizens. He urged that some of the destructive criticism levelled at the association be changed to constructive and stated the directors were always willing to listen to suggestions. All exhibitions were educational in character and the amusement features were added to round out the programme and make it appeal to all classes. That St. John could hold an annual exhibition had been fully demonstrated during the last four years and from the present indications this year would be one of the best shows ever held in the city. All that was needed to make it a success, financially, was the weather and a good attendance on the part of the city people.

POULTRY SHOW TO HAVE NEW FEATURE The poultry department of the Exhibition promises to be better than ever before. For a number of years this attraction has been very popular and the exhibition largely due to a fact that aside from the fine exhibit of high class poultry the management arranged to have an educational programme during the entire week. This year the educational feature will be one of the most prominent of the show. The management have arranged to have Prof. W. H. Graham of the Ontario Agricultural College, come to judge the poultry exhibits with a view to having him take part in the educational programme. Professor Graham needs no introduction to poultrymen. He has been for 25 years professor of poultry at the Ontario College and is conceded to be one of the greatest, if not the greatest, poultry expert in America. He will give a number of lectures during the week on breeding and feeding poultry. J. G. Morgan of the Dominion Experimental Farms Branch is also expected to be presented and give a number of demonstrations on killing, dressing and trussing poultry for the table. Mr. Morgan's 10 years' experience on a commercial poultry plant at Foster Quebec makes him a competent official to handle this phase of the educational campaign. Demonstrations will also be given

SEMI-CAFETERIA SYSTEM AT SHOW Improvements Made in Dining Room Feature Will Prove of Benefit. There will be several changes in the dining service to be used at the St. John Exhibition this fall. To avoid the difficulties experienced formerly in serving the customers promptly a semi-cafeteria system has been worked out and will be looked after by E. A. Hilchey, who will be in charge of the dining room. On their entrance to the dining hall customers will be required to proceed to the counter where they will receive trays containing their full meals. The new system is expected to ensure the people being waited on in order and to speed up the business of serving the lunches so that the congestion experienced at times in former years may be avoided. Mr. Hilchey, who has been connected for some years with the Green Lantern lunch room and was with them when they catered to the reception given at Rothesay to His Royal Highness the Prince of Wales.

POULTRY SHOW TO HAVE NEW FEATURE The poultry department of the Exhibition promises to be better than ever before. For a number of years this attraction has been very popular and the exhibition largely due to a fact that aside from the fine exhibit of high class poultry the management arranged to have an educational programme during the entire week. This year the educational feature will be one of the most prominent of the show.

Programme For Opening Day at The Exhibition Saturday, August 30, 1924. (Atlantic daylight saving time.) 7 p.m. Concert in building by City Cornet Band. 8 p.m. Opening addresses in armory. F. A. Dykeman, president, and others. Musical numbers by special orchestra. Dancing until midnight in armory. 11 p.m. Buildings closed with exception of armory.

CARS CAUSE CAT'S DEATH. That automobiles are 'deadly to cats' was demonstrated on two occasions yesterday afternoon. A cat, badly injured when run over by an automobile at the corner of Duke and Prince William streets yesterday afternoon at 4:45 o'clock, was put out of misery when shot by Police Constable Young. At 6:20 o'clock last evening Police Constable McElhinney was called to shoot a cat in the Haymarket Square district that had been run over by an automobile.

DIRECTORS URGE PUBLIC SUPPORT OF BIG 1924 SHOW

Point Out Several Improvements in Exhibits and Other Attractions. ARE OPTIMISTIC Those in Charge Believe This Year's Exposition Will be Successful. Executive members of the St. John Exhibition are optimistic over the success of this year's exposition and in brief interviews declare the public will find it well worth their time and attention to inspect the various booths and witness the entertainment provided. Being instructive as well as entertaining in character, the exposition has a real and appreciable value to the city and province at large. All the members stress the fact that only through generous and whole-hearted support from the citizens can a smashing success be attained.

Walter C. Allison. "The St. John Exhibition provides a real opportunity for getting together of various parts of the province and as such is of inestimable value to New Brunswick," says Walter C. Allison, member of M. H. A., Ltd. "It is educational as well as amusing in character and deserves widespread support. I honestly believe that this year's exhibition is the best we have ever held. The work of the various committees has been done well and all that we need to set up new records is a large patronage."

E. J. Terry, second vice-president of the exhibition is a great asset to the city of St. John and the province of New Brunswick—a place where people can come together, renew acquaintances and enjoy a few holidays. "We have," he says, "among other things, the finest cattle sheds this side of Ottawa, and with permanent improvements going on from year to year, thus minimizing cost of maintenance, the exhibition in a few years can be made a picturesque spot to those who are enough interested to attend. A great amount of permanent work has also been done on the agricultural and other buildings on the grounds, and with the proper spirit of co-operation from our citizens, the exhibits, performances, etc. can be brought to a very high standard."

MIDWAY PROMISES MANY ATTRACTIONS The midway this year will be the biggest at a fair in St. John for years. Ben Williams, who has charge of this concession, said. There will be the usual "hot dogs," blankets, "dolls," the old familiar games, the merry-go-round, Ferris wheel, whip and a number of shows, among them being a freak animal exhibit and a mechanical city. The part of the grounds devoted to the midway has been improved this fall and the various booths will be able to get under way quickly. At 4:20 o'clock yesterday afternoon an alarm was sent in from Box 3 for a fire under the house at 74 Dorchester street. The house was occupied by J. Fuller and W. DeW. Brown. The fire burned briskly under the sill of the building and the sidewalk. After considerable cutting and the use of water the fire was extinguished.

In the Financial World

IRREGULAR TODAY
IN STOCK MARKET

Operations Were on a Small Scale—Quiet in Montreal.

New York, Aug. 29.—Considerable irregularity developed at the opening of today's stock market, with trading again restricted by the absence of many operators over the Labor Day holiday. Congestion advanced a point on announcement that the recent merger would involve no new stock offering. Union Tank Car dropped a point. U. S. Steel Common and American Can opened fractionally higher.

Cable Transfers. Montreal, Aug. 29.—Cable transfers, 4:58 p.m. Montreal Market. Montreal, Aug. 29.—The opening trading on the Montreal Stock Exchange this morning was one of the quietest for some weeks. Spanish River preferred accounted for the bulk of the sales and came out with an overnight gain of 1/4 to 12 1/2. The Common was unchanged at 110. Sherwin Williams suffered a loss of two points to 125, and Smelters was up 1/4 to 42 1/2.

NEW YORK MARKET. Stocks to 12 noon. August 29, 1924.

Table with columns: Stock Name, Open, High, Low, Close. Includes Am. Beet Sugar, Am. Ice, Allied Chem, etc.

Brokers' Opinions

New York, Aug. 29.—Price and White-Copper shares not well and we look for new strength soon in them, particularly in American Smelters and K. N. C. "We have an idea that there is accumulation going on in some stocks. The Motors are the strongest group. They participated little in the summer advance and are quiet at prices which look inviting if fall business is to be reasonably good." "Hornblower & Weeks—"We suggest that the action of the market in the past three days suggests that the rally is reaching for a bottom in the main body of stocks and that a rally should be the next important development. What the market is able to do on this rally will depend on the volume of the much disputed point involved in the query 'is the market all through?' We do not believe that it is, and we expect convincing evidence that it is not very shortly." "Block Maloney—"The best information is that business will steadily improve during the balance of the year. If so, good stocks should be bought on dips." "Josephthal & Co."—"We are just as bullish in feeling that these dips are a buy as we were in May prior to the four months' rise."

Current Events

New York, Aug. 29.—Summary of events. Pennsylvania System, July net operating income \$2,232,137, against \$5,865,824 seven months, \$4,869,956, against \$1,066,852. U. S. N. Y. July net, after expenses, \$1,727,590, against \$7,682,611; seven months, \$10,190,748, against \$12,416,126. Mon. Pac. July net operating income \$1,209,335, against \$2,929,781, seven months, \$7,610,570, against \$4,887,621. I. & N. Y. July net operating income \$1,727,590, against \$7,682,611; seven months, \$10,190,748, against \$12,416,126. Pere Marquette directors approve \$1,000,000 bond issue. \$20,000,000 involved have new approval. Federal Reserve Bank, N. Y. ratio 32, against 32 1/2 a week ago, and 34 1/2 a year ago. System 82 1/2, against 82.5 and 77.5 a year ago. American Cotton Association settles in July, 23, with indicated yield 11,860.25 bales.

Morning Stock Letter

New York, Aug. 29.—The market was weak again yesterday on a small turnover, and there are no indications that the reaction is over yet. We do not think that this morning's rally has eliminated and we still regard the selling movement as a reaction only. However, the market has had a long and large advance and the reaction is nothing more than normal fluctuations from advance and are now more optimistic concerning the chances of the Davine Young plan bills passing the Reichstag. Undoubtedly developments abroad are moving largely on technical reasons. So many pools in individual stocks have been disbanded, with breaks following in the market, that many accounts have been weakened and some general liquidation has consequently followed. With the week-end holiday approaching, there is little chance of the market doing anything important and one must wait until next week for any definite signs in the market. The Bulls as a whole hold better than the industrial movement is a reaction only. However, some effect in Paris as well as on the industrial movement is a long account of any weak spots to pick up Katy Pfg and Common, Mon. Pac. Pfg., Southern, Central, Southern Pacific and North-western issues. Of the industrials we still favor S. I. P., M. O., A. I. B., I. & N. Y., Pfg., and S. B. P., on any slight reaction. LIVINGSTON & CO.

DIRECTORS URGE PUBLIC SUPPORT OF BIG 1924 SHOW

The city of an annual exhibition has never been at all adequately appreciated by the civic authorities, the business interests and the people generally. There was a time well within my recollection when the city of Toronto took its turn along with other fairs, being aided by government subsidy. Enterprising business men of Toronto, however, realized the full benefits that would accrue by making the fair an annual one and in deciding to pursue an independent course, the Toronto exhibition has been wholeheartedly supported by the civic authorities, the business men and the citizens. Since that time the growth and development of the Toronto exhibition has become part and parcel of the growth of the city until the Toronto exhibition today has become the most important fair of its kind in the world. No one can say to what extent the development of the city of Toronto and the exhibition bear to each other as to cause and effect but it is safe to say the exhibition has been a splendid success largely because it was backed to the limit by Toronto. "With a comparatively smaller population to draw from, we in St. John can hope to achieve the success reached by Toronto in its vast expenditure but we can to the extent of our opportunities emulate Toronto's example in wholehearted appreciation by the city corporately, the business men and the citizens generally. Only in this way can we make St. John's 1924 Exhibition a real success."

PREDICTS BETTER BUSINESS IN U. S.

Says There Will Be no Car Shortage—Expanding Prosperity Looked For. New York, Aug. 29.—Increasing signs of considerably enlarged business volumes this fall have given rise to rumors that a car shortage is bound to result. The Brookline Economic Service, while continuing to predict better business, states this possibility is entirely remote. They point out that there are at present 350,000 idle cars and that even during the peak of car loadings last year no congestion developed. In spite of the fact that new records were being established weekly. The current Brookline Bulletin forecasts a gradually expanding prosperity, beginning in the agricultural sector, where the worker is to a great extent also the producer. Improvements in the price of agricultural commodities immediately increase the purchasing power of the section. As far as industrial concerns are concerned, the improvement in retail business will continue to increase employment and resultant increases in earnings on the part of the worker. "We recommend that buying and selling schedules should in a month or two be for greater activity and that greater sales and advertising pressure should be immediately planned for agricultural territory with industrial centers to be worked later in the year."

C. P. R. NET EARNINGS BEST SINCE 1921

Montreal, Aug. 29.—The Canadian Pacific Railway statement of earnings for July shows gross at \$14,888,677 as against \$15,677,835 for the previous July, working expenses were \$12,544,115 as compared with \$18,007,601 in July, 1923, and net profits were \$2,389,562 against \$2,070,034. The net earnings are the highest shown for any July since 1919. For seven months to July 1924, Gross earnings were \$99,540,094 against \$96,628,228 for the same period of 1923. Working expenses were \$86,810,947 as compared with \$84,866,834, and net profits were \$12,729,646 against \$11,686,394. The net for the seven months is the best since 1921. "We recommend that buying and selling schedules should in a month or two be for greater activity and that greater sales and advertising pressure should be immediately planned for agricultural territory with industrial centers to be worked later in the year."

THE PARIS subsidiary of the Bank of Montreal

HE PARIS subsidiary of the Bank of Montreal is situated in a quarter rich in historic interest. From a lofty column in Place Vendôme the statue of Napoleon looks out upon an imposing square the construction of which began in 1686 under authority of Louis XIV.—a square which has witnessed many of the city's greatest demonstrations and which now mirrors the social and business life of Paris.

Here, in the heart of the capital of France, the Bank of Montreal in 1919 established a subsidiary office in the Ritz Hotel Building.

In February, 1922, the business of this office had become so extensive that enlarged quarters were opened near by at No. 6 Place Vendôme.

Canoeist Thought Camped on Island

G. H. G. Smyth, of Toronto, who is paddling from Sydney, N.S. to Rome, Italy, is believed to be camped on one of the numerous small islands off the mouth of the St. Croix River. He left Chance Harbor on Wednesday morning and reached Black's Harbor the same day, leaving there after a short stay. At Black's Harbor he was reported to have said he was on his way to St. George but no word has been heard from him there. People in St. George are of the opinion that he would not visit there as it would take him four miles out of his course and would not advance him any on his way to New York. There had been no reports of him at either St. George or Eastport, Me., late last night, and it was thought likely that he has camped on one of the numerous islands on his route. WOMEN'S DEPARTMENT AT FALL SHOW HAS RECORD NUMBER OF ENTRIES

This year has a new record for the number of entries in all classes women's work and has also many special features that are sure to prove attractions. There are the exhibit dolls of many lands and various periods, the display of the Junior Red Cross handicraft, the section devoted to the handwork of soldiers in the hospitals, the orphans exhibits, the dolls of the Women's Institute, and home economics branch of the national education department, the John Ambulance booth, the Tuberculosis exhibit and the section of the Aik Centre. The model house and boxed sections which cut up the long last year, have been done away with and much new paint has been applied to smarten and brighten the old department. The exhibits themselves are always colorful and attractive, and with the new decorations the men's department promises to be a specially picturesque section and a verily popular one.

Mrs. Harold Lawrence has supervision of the Women's Department, and in the admirable manner in which the exhibits have been arranged and the department conducted reflects much credit on the supervisor.

My Dolls on Show.
The doll exhibit is largely a loan one and has involved a considerable amount of time and patience in the loaning and collecting of the various dolls. Some of the dolls have attained very respectable age, but conceal the fiber of their years remarkably. Many of them have been treasured possessions in one family for a period and others have no success to speak of. They represent the recent fashions of different countries and different times, as well as different ideas in dolls, and ideas dolls differ even more than fashions. The Junior Red Cross exhibit occupies the whole of the north wall of the gallery, which was formerly given to the manual training exhibit in the St. John schools. The \$8,000 and more of the Junior Red Cross members in New Brunswick have produced an excellent series of handicraft in the knitted garments, in neatly made quilts, in scrap books, posters, and a multitude of other articles. The excellence of the work of children is going to be a revelation to many grown-ups and will make sharp basis of comparison for the work entered in the competitive sets.

Glade Exhibit
The River Glade sanatorium is having a splendid exhibit in the soldier's section and this section has the privilege of being allowed to exhibit and take orders. Both the St. John and River Glade sanatoriums will show some of their best work. The recent shopping lists, examples of weaving, carpeting, bead work, bags and a great variety of other articles will be sure attractions to the buying public as well as to the interested visitor that does not wish to buy.

The orphans exhibit this year have on exhibition larger, more varied and more elaborate pieces of work made by the children in the institutions, and the exhibits indicate both good teaching and much skill on the part of the small people.

New Brides Compete
In the competitive classes the work of brides of one year or less will be of special interest to visitors, and is expected to put wives of longer standing on their mettle to show an equal skill.

The supervised playgrounds of St. John will have a section to display the handiwork of the children and demonstrate the excellence of the articles which the children have manufactured as well as the value of playgrounds work.

The home economics branch of the department of vocational education will show both the finished work of students and give demonstrations of various phases of dressmaking and millinery operations. This section is always one of special interest to women folk and this year it will surpass its previous ability to attract.

Women's Institute
The Women's Institutes of the province will have a separate section in the women's department, and will show examples of what thrift means to a practical Women's Institute member. Various styles in rag mats and rugs will be given special attention in this exhibit. A special effort has been made to have this section thoroughly representative of the work done in all sections of the province.

The St. John Ambulance booth has its usual position and is splendidly equipped for demonstrations of first aid work and for taking care of any accidents that may occur. The St. John Ambulance booth is a feature of the exhibition which has proved its worth and been found an absolute necessity.

The Health Centre
The Health Centre will have a small section in the Women's Department and will make good use of the space available in order to present to the public some idea of the great good which that institution is accomplishing.

As part of the Women's Department list of activities there are to be given in the Amusement Hall during the latter part of the Exhibition, illustrated talks on Queen Mary's dolls house. Very beautiful pictures of all the different rooms of the dolls' house have been obtained from England, and the description of the dolls' house has also been obtained from the authoritative source. Mrs. Richard Hooper will have charges of these illustrated talks, which will be given under the auspices of the St. John Women's Institute in aid of funds in which the Institute is specially interested.

RELIGIONS OF THE EMPIRE.

When, on September 22, the Conference Hall opens at Wembley, a conference of a different character to those which are now being held will have commenced. It will be something of a novelty for British visitors to hear from the lecturers expositions of religious faiths of which very little is popularly known.

The programme begins with lectures of the Vishnu and Shiva aspects of the Hindu religion. The following day the Mohammedans are to have the platform, and Khwaja Kamal ud Din is to speak for the orthodox Sunni and Sheikh Dojally is to speak for the Shia. The Kalifat at Meash, the head of the Ahmadiyya movement in Islam, is coming in person from India. This lecture should be of great interest. We understand it represents what might be called the Modernist movement in Islam.

Another interesting personality is the Shaqui Efendi, the young leader of the Bahai movement. The Efendi is the grandson of the founder, and has enjoyed a thorough European education. He speaks English fluently and is coming specially from Haifa. There are in England already a large number of adherents of this interesting faith, which may be considered in a sense to be a synthesis of Mohammedanism, Christianity and Judaism.

In contrast to these modern advanced movements, special attention should be called to the lectures on some primitive religions. Mr. Thoka is to speak on behalf of the Basutos of South Africa; Archdeacon Williams

of New Zealand on the Maoris; other African tribes are to be represented by Mr. Richard St. Barthe Baker of Kenya Colony, and Mr. W. G. Malcolm from Nigeria.

Feeling among business men, in Ontario, says the Toronto Mail and Empire, is confident that during the coming year there will be much better conditions in the agricultural districts owing to the good crops that are being harvested and the high prices which obtain for grain and hogs.

Duck Lays 225 Eggs In As Many Days

London, Aug. 29.—A Khaki Campbell duck taking part in the laying contest at Bentley, Suffolk, has created a world's record by laying an egg on 225 consecutive days.

The bird is owned by Archie Steffelin, of Cornwall, and the eggs have always weighed 2 7/16 oz.

A duck belonging to W. W. Neal, of Totland Bay, Isle of Wight, has laid

384 eggs between July 21, 1923, and July 21 last, probably a record for 12 months.

DONT FORGET CANADA.

A contemporary, says the Mail and Empire, Toronto, says that an operation at Johns Hopkins Hospital which resulted in part of a man's skin being grafted to his spine was the most remarkable in the history of the institution. As an interesting footnote to the story it should have reported the number of times similar operations have been performed at Christie Street Hospital.

treast boon the whole exhibition is the Red Cross nursery. Ired mothers will assure anyone a them. The Red Cross nursery ar is to have new features also ll be conducted on improved such a thing is possible. Miss hite will be in charge and that for efficiency. Miss White will corps of grown-up volunteer t will be the three regular cots rockaway slings along the walls xotic sleeping quarters for an al 80 babies. There have been hen the nursery has been caring limit of its possibilities in the small bundles of humanity, and

once it had 100 babies in the course of one day. The nursery will be in operation, morning, noon and night, all the time the exhibition is open to the public.

Will Weigh Babies.

A nurse will be on hand this year to weigh each baby that is brought in and to make a very formal registration of each baby. It is not suggested that there should be any before and after business about this weighing but milk and biscuits will be provided freely to the clients of the nursery and they will have toys and playthings without stint. The walls of the nursery have been adorned with a new series of very attractive posters and there will be chairs provided for older people as well as a number of small stature chairs for little people.

The nursery has been known to be vocal at times but as a rule the babies are blissfully happy in that haven of rest and their mothers can enjoy the pleasures of the big fair knowing that Miss White and her assistants have the babies well cared for.

The nursery has been run for the last few years and everybody wonders how it was that an exhibition was a success at all without a Red Cross nursery.

JULY 24, 1924.

To The
Manufacturers,
Jobbers and Retailers
Of The Maritime Provinces.

GENTLEMEN—

The supporting of the "Buy at Home and Maritime Made" campaign is of vital importance to your prosperity, and a medium working in your interest, and in the interest of our citizens, is well worthy of your support.

"The Business Review and Maritime Retailer" has organized the "Buy at Home and Maritime Made" campaign, an undertaking which has created a more widespread and sympathetic interest than any other progressive movement ever established in the Maritimes, and it is the only trade magazine taking a fearless and firm stand in favor of buying at home, and buying home products when possible.

Your subscription to this publication will greatly aid in the spreading of this payroll increasing policy. Will you help us to help you by mailing one dollar and fifty cents, covering a period of twelve months.

We invite manufacturers and jobbers to write for rate card and circulation particulars. Thank you.

Yours faithfully,

THE BUSINESS REVIEW AND MARITIME RETAILER
(Organizers of "Buy at Home and Maritime Made" campaign.)

SHOWS THE VALUE OF VACCINATION

History of an Epidemic in Minnesota This Year.

Through the courtesy of the State Health Officer of the State of Minnesota, Surgeon General Cummings of the Public Health Service is able to furnish the following information with regard to an outbreak of malignant smallpox beginning in Minnesota in the early part of this year.

The disease was introduced at Duluth in January, 1924. The first case was that of a male nurse, 54 years of age, who had never been successfully vaccinated and who died within a few days. Subsequently there developed other cases making a total of 182 for this epidemic. It is interesting to note that 139 of the persons who had smallpox had never been successfully vaccinated in their lives. Of these 139 persons, who had never been successfully vaccinated, 34 died. Of the remaining 48 persons who had the disease, 39 had not been successfully vaccinated within seven years and of these 39, six died. This leaves four cases still to be accounted for. Of these, two had been vaccinated in less than seven years, but did not die from the disease. Two others had had smallpox when they were children and they recovered. Of seven persons who died, although they had been once successfully vaccinated, we have the following histories: One woman, age 39, was vaccinated in childhood; one aged 49 was vaccinated when eight years old. One woman 24 years of age, who was not in very good physical condition at the time she contracted the disease had been vaccinated in childhood. One man 37 years of age had been vaccinated when he was three and a half years old. One man 55 years of age had been vaccinated when he was six months old. One man who was 55 years of age had been vaccinated when he was one year old.

From these data, which have been very carefully collected, it will be seen that smallpox still runs true to form in that it attacks persons who are either not protected by vaccination at all or who have lost the protection which they once had.

Smallpox has never occurred to any appreciable extent in persons who have been recently, successfully vaccinated. The fact should be emphasized that one vaccination is not sufficient to protect an individual throughout life. The child should be successfully vaccinated again between the ages of twelve and twenty and vaccination should again be repeated between forty and fifty.

There is no country in the world where vaccination and re-vaccination have been sufficiently carried out to eradicate smallpox completely, but wherever vaccination has been practiced, smallpox has diminished in proportion.

A comparison of the smallpox situation during a five year period in three States which do not differ greatly in number of inhabitants, shows what can be done to prevent this disease.

Smallpox cases reported by Massachusetts, Michigan, and California, during a five-year period:

Year.	Mass.	Mich.	Cal.
1919	40	2,460	2,002
1920	29	4,845	4,486
1921	87	4,537	5,881
1922	2	1,261	2,129
1923	6	2,811	2,025
Total	114	15,884	16,223

WESTERN CIVILIZATION DECAYING?

Western civilization reached its culmination about 1800, and since then has been slowly but surely declining. This at least is the theory underlying Oswald Spengler's "Decline of Western Culture" a new and startling perspective of which has thrown intellectual Germany into confusion.

W. K. Stewart, the noted scholar of German literature, in the September Century, has made the first adequate English analysis of Spengler's revolutionary history. In his article he says: Spengler's main thesis is that human history has not been a continuous development. On the contrary, setting

CROCODILE FAMILY AT LONDON ZOO

Mother, Ten Little Ones and Five Eggs Arrive From the Nile.

London, Aug. 29.—Ten little crocodiles, accompanied by their 8 ft. mother and five eggs, have arrived at the London Zoo from the Nile.

To look at the broad grins upon their countenances you would think that the babies, who are scarcely ten inches long, regard the adventure as a great joke; but they are really vicious, hissing and snapping at the keeper should he dare to handle them.

Compared with the sombre hues of the remainder, one of them is quite a dandy in his way, with conspicuous yellow and black stripes, who seems to hold himself aloof from his commonplace brethren.

The five precious eggs, none of which exceeds that of a goose egg in size, are buried in damp sand near the hot-water pipes.

The "Egg-Tooth."

If all goes well the embryo crocodiles will one day cut through the shells with the "egg-tooth" which they carry for a day or two at the end of their snouts, and join the other baby "crops" in the Tortoise House.

In a state of nature they would, upon emergence, be conducted to water by their mother after long and zealous guard of the sand-pit which formed the nest; but at the Zoo the keeper will perform this duty.

The youngsters can at any rate congratulate themselves that they will not fall victims to the vultures, hawks, kites and other enemies which would probably make a meal of them were they in their African home.

NOVA SCOTIA AT TORONTO FAIR

Nova Scotia is the only Province outside of Ontario which is officially on exhibit at the Canadian National Exhibition this year, says the Toronto Globe. One whole section in the Government Building has been taken by the "Bluenose" country, and a remarkable display of cold-storage sea fish, ranging from the dangerous-looking dogfish to tiny clams and crabs is included. Several well-known Eastern manufacturers, realizing the value of the movement, took advantage of the opportunity, and are showing their wares as a part of the Provincial Exhibit, while the Government itself has an attractive rest-room, hung with Nova Scotia pictures, fitted up in the centre of the section.

Exhibition history records the fact that Manitoba was the first province to have an official exhibit, and that was in 1879. Next year a strenuous effort will be made to have every province in the Dominion officially represented at the Big Fair.

Exhibition Influences

(Toronto Globe)

So important a place has the Canadian National Exhibition assumed in our community life that it has actually become the connecting link between summer and autumn. A vacation which overlaps into Exhibition dates is too long delayed for many people. The news that the gates are opened and thousands are crowding the grounds is an indication that the dog-days are over, that the excuse for summer day-dreaming no longer holds, and that it is again time to get down to serious business. It does not seem to matter if the weather gets hotter than at any other time in July and August. Neither do calendar dates count for much; nor a belated harvest. The Exhibition is opened, and with it comes our introduction to Fall.

Such an influence upon the psychology of the city, and of the Province for that matter, is not to be regretted. Occasionally one does hear the complaint that the Exhibition unnecessarily intrudes itself upon our summers. But the fact remains that it is the given signal for everybody to start on fall business. Without such a stimulus as the Exhibition provides, the inception of renewed business activity would be a scattered and less effective effort. In other words, the start is now made together with the raising of the Exhibition flags. The influence is felt everywhere in Toronto. Thousands hurry from a hundred places to see the newest things offered and to bargain. Plans that have been in storage for weeks are brought out and put into operation. Instead of waiting till the first or the middle of September, or for the drop in temperatures, business

activity is resumed the last week in August, and is well on its way when nature's signs prove that the autumn is here.

The Exhibition has always helped to chase away the gloom of hard times. Particularly is that influence needed this year, and one cannot but believe that the industrial spectacle provided aids materially toward the path of prosperity. Faith in one's country, its assets and its people, is renewed by what one sees in Canada's greatest show rings. The Exhibition may shorten our vacation season; possibly it does some harm to those seasonal ventures depending on holiday-seekers, but on the whole its unflinching though early sign that it is time for additional buying and selling more than offsets a curtailed summer. The Exhibition is opened. It is necessary to begin earnest work again.

"Pa," said Clarence, "what's a genius?" "He is a man who can pick out a good cantaloup every time," sighed his dad.

OIL SHALES HOLD STORES OF RICHES

Professor Watts Foresees Prosperous Industry for Dominion of Canada.

It is recognized, says the Toronto Mail and Empire, that in certain parts of Canada, particularly in Northern Ontario, Nova Scotia and New Brunswick, there are vast areas of land underlaid with oil shales; and the part which these shales may yet play in building up the commercial prestige of the nation was emphasized on Thursday before the British Scientific Association by W. W. Watts, professor of geology at the Imperial College of Science and Technology of London, England, in the course of his presidential address before the geology section. The feature which made Professor Watts certain that Canada is yet destined to be commercially important, from the standpoint of oil production, was the fact that the existing oil fields have mostly been developed. Their capacities, as oil producers, are well known, and those capacities do not give promise of meeting the increasing demands of the world. So, since the oil fields cannot meet the situation of the future, there must be some other solution of the oil problem. That, Professor Watts believes, is to be found in shales; and when it comes to a matter of oil shales, there is no country more rich than Canada.

Geology Must Help.

Professor Watts used that as an illustration to show how the development of the natural resources of a country cannot be successfully carried out without taking geology into consideration. For it is the geologists who make known the mineral and other resources of the country. In discussing the possible future yield of mines, oil and water wells, and quarries, he pointed out that there are huge areas of economic significance about which little is known, and that elaborate sampling, new methods of testing, and the recognition of new varieties, as for example in the case of coal, will have to be put in practice before it can be said that we are making a justifiable and economic use of the capital resources stored up for our benefit in the rocks.

Criticizing the administration of oil fields, he said: "While we blame our wasteful handling of the coal fields, it is ourselves and our own generation that we must blame for the serious waste of oil and the destructive exploitation of oil fields. There is no economic subject to which geology has a more direct relation than the occurrence and exploration of oil fields." Reminding his audience that the development of fuel oil on a large scale has revolutionized many branches of industry, and has had a marked effect on civilization in general, Professor Watts suggested that energetic measures will have to be taken if mankind is to continue to enjoy the advantages of this convenient fuel. "Although there probably still remains a recoverable percentage in the oil-producing areas," he said, "there are already signs that the high oil mark has been reached, if not passed."

Fall Back on Shale.

"But it is no small comfort that although our supply of native oil, easily won, easily refined and applied, cannot last very much longer, there are abundant supplies of oil shale still left, sufficient to take its place for many decades to come." In addition to pushing the exploration of new fields, geologists should consider it a part of their duty to see that economy is practiced in the use of present supplies.

The newer countries, such as Canada, the United States, India and Australia, are in a fortunate position with regard to their mineral wealth, said Professor Watts, as they are in a position to exercise rigorous control from the first over the utilization of deposits. In Great Britain, on the other hand, the mining industry is so old and mineral wealth has been so eyes were picked out of the mines and frequently their skeletons were laid bare, too, before the metal mining geologist had a chance.

When existing stores of highly concentrated and singularly pure ores are exhausted, highly improved methods of concentration and purification will have to be utilized.

Use New Materials.

Increased use of artificial building materials was forecasted by the speaker, who indicated that in artificial stone there are greater possibilities for the use of preservatives to counteract decay due to the elements, and the poisonous atmosphere of cities, and, in addition, there is wider scope for the preparation of defences against the corrosive action of minute organisms, and germs which exert a favorable influence can be encouraged, if such there be. "To a large extent, the materials in use are satisfactory in the air and surroundings in which they occur in nature," Prof. Watts admitted, "but the added problems of increased stresses in large buildings, and the modern demands of the architect and the sculptor, have still to be met, if our buildings are to be more permanent and our towns present a less weather-beaten aspect than they do now." In addition to its well-known advantage of permitting more control over shaping, artificial stone can also be colored more easily.

Geologists will likewise have to be called in more often by those who have charge of the resigning of roads. The introduction of the automobile has had the double result of modifying the paving and foundation materials, in which geology has been vitally interested, but the entire layout in regard to the steepness and frequency of grades has been altered, now that road-builders have less concern for the physical limitations of horses. Dr. Watts issued a plea that esthetic considerations be not lost to view in the construction of automobile roads. "Now that we have a vehicle that relies in a gradient, whether for or against

it, it is a pity to flatten down gradients too much, and though it is legitimate and even necessary to remove dangerous crossings and curves, it should be remembered that an everlasting straight vista is as exasperating to a driver as it is heart-breaking to a horse."

Get Steam From Earth.

Already interested in power supply through its assistance in fuel and waterpower problems, geology has a further possible application in the construction of bore-holes into the earth to tap reservoirs of live steam, Prof. Watts said. "Power plants are now operated successfully at Volterra in Italy on high temperature steam from fumaroles. This may be the beginning of the application of a new and valuable source of power in which the services of geology will be required. "We are haunted by the fear that a limit may be imposed by high temperature to deep mining, while that very heat may provide energy as valuable as the material which might otherwise be mined, just as we dread the gas from certain coal seams when the gas might, if it could be exploited, give a return equivalent to that of the coal itself."

Agriculture and geology can expect to work hand in hand in future; they must co-operate for the fullest utilization of soils and sub-soils, and the geologist can be of tremendous service to the agriculturist in assessing the value of transported soils, loams, loess, brick-earths, drifts, gravels and the like.

A pressing problem in this connection which awaits solution by the geologists is the prevention of the disastrous fate which in places is overtaking the irrigation of arid lands from the precipitation of salts contained in irrigation waters that are unavailably for the purpose.

WORLD'S LARGEST SAPPHIRE.

The largest sapphire jewel in the world, which, its value unsuspected by its possessor, was used as a paperweight for many years, has arrived at Wembley. The jewel is a sapphire of God Shani (Saturn), and it is believed that those who possess it embrace prosperity and glory.

Nine hundred and sixteen carats in weight, this sapphire has the form of a plucked flower with a few leaves around the stem.

About five years ago it was discovered by Mr. Wakefield, Director-General of Revenue, Hyderabad, Deccan, when visiting Razi Ahmed, an official of the State. On entering the office, Mr. Wakefield discovered the sapphire being used as a paperweight, and was further astonished when he was told that the official's children had played with this priceless gem as they would with ordinary stones.

The history surrounding this stone is as interesting as its value. One of the Ballala kings during the twelfth century, when on a pilgrimage to Ceylon, was given this sapphire, now called the Razi Ahmed Sapphire, by a Buddhist monk. At this time the stone was oval in shape, and was altered by expert engravers when taken back to Mysore. During the reign of the king the stone became an object of veneration, but was afterwards captured by Malik Kaffur, the great general of Allauddin. Subsequent adventures brought it into the possession of Razi Ahmed's family in 1798, and it has remained in that family until discovered by Mr. Wakefield.

Experts are of the opinion that, as the sapphire was probably an ear ornament of some family deity, there is a companion somewhere to this wonder-

ful stone. A fortune awaits the person who can find this companion, as the single stone itself is believed to be worth thousands of pounds. The sapphire is of such great value that the owners, Messrs. Poochoomul Brothers, only exhibit it at certain times of the day. At other times a model is shown on their stand in the Bombay Court of the Indian Pavilion.

Things To Remember

ST. JOHN EXHIBITION DATES
August 30th., To September 6th

Hotels will be over-crowded. Make your reservations ahead.

Use The Phone.

Trains will be delayed and many passengers will miss their train.

Use The Phone.

Autos will break down and cause delays.

Use The Phone.

Telephone Service will be proportionally increased, but why worry about that, we will have an extra staff to handle the larger volume of business, and you may safely place your Long Distance Calls, feeling assured you will get the same prompt service and low rates which you always enjoy.

Also, remember we have a booth at the Exhibition. We cordially invite you to make use of it as a rest room. You will also find ample convenience for telephone service at this booth.
