AGRICULTURE

Notes and Suggestions of Practical Utility

FOR THE FARM, FIELD, GARDEN AND DAIRY.

Meanings of Interest for Our Country Readers.

Beehives should be shaded. Diversification means better profit for all. The dustbath should be kept loosened up. The churn is the test of the value of milk. Let us grade up our seed, our land and our stock. Have large fields, little fencing and long furrows. The poultry must have shade during the hot weather. The temperature of the milk is an item of first importance. The successful dairyman feeds and milks the cows regularly. Keep the harness clean and well oiled or it will soon rot and crack. Skim-milk, ground oats and middlings will make pigs grow rapidly. Sheep that are to be marketed should be well fattened before selling. Incubators are no longer playthings but machines of practical utility. The average annual yield of milk per cow in Great Britain is 400 pounds. It is not good farming to progress along one line and stand still upon others. A small quantity of carbolic acid in the whitewash will aid in killing lice. White lead is a good thing to use when a large limb is removed from a tree. Underdrainage is costly, but sometimes it almost pays for itself in one season. Meat animals are a surer sale than horses and mules, for people to eat. A well seasoned woodpile in the woodhouse is a source of comfort to your wife. All good farming has got to depend on some system of stock husbandry. There is a large field for study and improvement in the matter of feeding. If the different breeds run together their relative value cannot be ascertained. Unless the queen is gotten into the hive of a swarm the bees will not remain. In breeding do not think so much about the sire that you wholly forget the dam. The best progeny cannot be secured unless there are good qualities in both parents. Farmers cannot be too careful about putting their money and feed into old animals. The poultry business is rapidly becoming a most important branch of farm industry. Apples from sprayed trees keep longer than those from trees that have not been sprayed. The loss to Texas sheepmen by the ravages of wolves is estimated at \$500,000 per annum. Six pounds of sulphur mixed with a tablespoonful of carbolic acid makes a good insect powder. From five to seven pounds of evaporated fruit can be secured from one bushel of apples. By sending only good fruit to market a reputation can be made which will result profitably. When spraying, see that the spray is fine, or much time will be wasted and very little good done. There is a difference of opinion among dairymen as to whether butter fat can be fed into the cow. It is estimated that there are 6,000,000 fewer hogs in the United States than there were thirteen years ago. The man who raises good hogs, cattle or sheep economically will generally have a chance for a profit. Cabbages are rank feeders and need plenty of cultivation. Merely keeping down the weeds does not answer. Let the bottom of your silo be on a level with your feeding or stable floor with centre a trifle higher than sides. The continued low price of wheat should show farmers that it is best to grow other than the strictly staple crops. The quality of the stock as well as the manner of feeding are important features in making the most out of the feed. A poultryman says that for eggs alone, good early pullets and thrifty two-year-old hens will give the best results. Care should be exercised with newly-set fruit trees. Do not allow the soil to bake or crust too close around the stem. A weed seed that has just germinated is killed if moved ever so little, and this is the time when it should be attended to. If a tree is allowed to overbear, its vitality is so greatly taxed that the next season only a small and inferior crop will be harvested. A man to succeed in the stock business must first have good stock, and then he must produce and feed the produce economically.

Keep the quarters of the stock clean. Then the animals will keep themselves clean, and this will conduce to their health and your profit. E. W. Stone, secretary of the South Georgia Pear Growers' association says the yield in that section this year will be over 20,000 barrels. With many fruits it is often advisable to sell at home at a little less price than to pack and ship to market and take the risk of selling. Rotted land becomes warm much sooner than land left loose after plowing. This insures more rapid and even germination of the seed. All animals like variety of food and will gain flesh faster when so fed. One reason is that digestion and assimilation are more complete. The price of farm labor has increased much since farm machinery was introduced. Yet now crops are produced more cheaply than ever before. It is good to drain land when it is properly done. But it is easy to blunder. Study some good work on the subject before you begin operations. Linseed meal, cottonseed meal, gluten meal and wheat bran help to produce lean meat. They should be fed in connection with corn when that is desired. Kindness in the dairy returns a very large dividend on the investment, and it need not stop there, for all domestic animals appreciate good treatment. One value of cold storage is in keeping potatoes for seed from sprouting. Then when planted they sprout at once and the sprouts are much more vigorous. The difference in the profit from growing good stock and poor stock is becoming wider all the time. The profit from the latter is best represented by ciphers. Whether the food consumed is purchased or grown on the farm, it is worth just what it will bring in the market and if it is not fed to stock could be sold for money. Hogs that require more than ten months to get to market do not give the best profit. Get the compact, early maturing breeds and you need never take more time than this. The time has come when the fruit grower who means to stay in the business must prepare to fight insects. This is the only way in which he can win success or profit. Begin the warfare on borers and other fruit destroying insects. Even if they have not made their appearance, take precautionary steps against an expected attack. The hot summer months, when the grass gets short and flies torment, is hard on the cows. They need shade and green food of some kind to help tide them over. The results of experiments made in detasselling corn do not seem to justify a farmer in wasting much time in that way. He can employ himself more profitably.

THE DAIRY.

The dairyman is always found engaged in efforts to improve his farm, increase its production and thereby increase its income. Dairy farms are increasing in value, better surroundings, better buildings, better homes; and after all, these homes are the highest incentive we have to invite us to effort. The bull is half the herd, and being so the breeder can well afford to secure the best even at high cost. Breeding in and in can be carried on in skillful hands with only good results. Fall cows give a large yield during winter. In spring they give a large yield again on grass, which lasts till autumn. Let them take a six weeks' vacation before asking them to get down to business. The Texas Live Stock Journal says: 'Cheese kept in a cool larder or cellar with a cloth wrung out of clean, cold water constantly upon it will never have mites upon it; or if it has, this soon destroys them and also greatly improves the cheese, keeping it always moist. A calf raised on the farm is of more value than one brought from outside. These home-bred calves should be better in their every feature than the animals from which they have been bred. Beyond the breeding is the feeding. A calf well developed by judicious feeding will carry the results of breeding to better results still. A cow should have a good constitution, good lung power, deep chest, long, sloping shoulders, capacious paunch for storing her food. The whole frame partakes of the general characteristics. The frame should be a rugged one though not coarse. The backbone should be notched, the hips high, the flank deep, and a well developed udder. The cause of floating curds can often be traced to uncleanliness. A leaky vat or a dipper with a hole in the handle where the milk can enter or ferment will cause them. It frequently happens that the makers who most frequently complain against the patrons have their own uncleanliness to thank for poor cheese. Adding water to the fresh milk accelerates the rising of the cream; cold water in summer, warm in winter, and the process saves ice. It has of late become quite popular and general in some localities. The skim-milk is reduced in quality, but its feeding value may be restored by adding bran or other ground

THIS WONDERFUL STORY

Was Told Mr. Frank H. Colley, Local Editor of Age, Belmont, Me.

For 15 years I have been a sufferer from Salt Rheum of head, with its attendant itching and burning. Crusts 1-8 inch thick would form over my whole scalp, crack and bleed. I also had a general Salt Rheum on my body from which I suffered torture. My food distressed me badly and a severe palpitation of the heart added to my suffering, and unfitted me for labor.

LUIGI B. DUNCAN, Chairman of the Board of Selectmen of the Town of Northport, Me.; member of Maine Legislature for 1888-89. Physicians said I had Chronic Eczema, a Bad Heart Trouble, and Dyspepsia in a severe form. I used many remedies, but received no permanent relief. After taking 6 bottles of SKODA'S DISCOVERY, with LITTLE TABLETS, and using SKODA'S SOAP and OINTMENT, I find myself perfectly cured. Skilled physicians have examined my heart and pronounce it normal in all its functions. SKODA DISCOVERY CO., WOLFFVILLE, N. S.

food, which will well pay for the outlay. The first cattle that were brought into the American colonies were landed at the James river plantation in Virginia in the year 1607. They came from the West Indies and were the descendants of the cattle taken to those islands by Columbus on his second voyage in the year 1493. In 1610 several cows were landed and again in 1611 about 100 head more were brought to the plantation. This, therefore, was the genesis of the cattle business in America. George T. Powell in Practical Dairyman has the following: 'The question is frequently asked if cotton and linseed meal are suitable foods for the dairy. If properly combined with other foods, they are very valuable, but care is needed in feeding them to Jersey, Guernsey, or any cows that are very rich in milk, for those foods are rich in butter fats, and with a tendency to very rich recreation there is danger from garget troubles. When a quarter or half of the udder is lost, as so frequently occurs, rich concentrated foods should be combined with those of less fat material, as roots, wheat bran, clover hay, ensilage without much corn in it; then these meals can be fed with the best results. Cottonseed and meal will give harder texture to the butter, linseed meal will make the butter soft and both will impart good flavor if not fed more than two or three pounds per day to a cow. The value to be obtained from food depends quite as much upon the temperature surrounding the cow as the food itself, for if the temperature is low, food given will go to support animal heat; hence cannot go to milk secretion, for it is a natural law that the cow or any other animal will appropriate all that is necessary first for self preservation, and will give no production until that demand is first satisfied. We quickly discovered this fact, when the daily quantity of each cow in the herd was taken by weight. On cold days, with cows outside of the stable, there would be several pounds of milk short, while on warm days there would be more pounds. By computation of the cost of food given it was found that upon days of low temperature, there was no profit; for too large a share of the food had to go to sustain animal heat, and here to a very plain cause for much of the unprofitable dairying in our state, and why our farmers are growing poorer every year, because they are feeding out their summer harvest in the winter at a loss. The people quickly recognize merit, and this is the reason the sales of Hood's Sarsaparilla are continually increasing. Try it.

What Do You Take

Medicine for? Because you are sick and want to get well, or because you wish to prevent illness. Then remember that Hood's Sarsaparilla cures all diseases caused by impure blood and debility of the system. It is not what its proprietors say but what Hood's Sarsaparilla does, that tells the story of its merit. Be sure to get Hood's, and only Hood's. Purely vegetable—Hood's Pills—25c.

D. McNICOLL, Gen. Pass. Agt. Montreal.

IT PAYS TO ADVERTISE.

POOR DOCUMENT

HORSE NOTES.

J. Alba has been sent to Bowen. Speed brings the highest prices. Mystic's meeting was a scorcher. Czar, 2.12 1/2, will not start till fall. Andrews has got Bellman, 2.17 1/2. Aboard nomenclature is spreading. Less scoring will benefit the races. Docked horses should have fly nets. Starr will drive Jay Hawker, 2.08 1/2. Burriss is Sangus' permanent starter. Gas City, Ind., has a new mile track. Starter Walker is engaged for Buffalo. Johnny Ramsay will do the big circuit. Cleveland scouted the tocsin this week. Kissell's Pointer fell dead at Pittsburgh. Pittsfield (Me.) has a meeting July 28, 29. Pittsburgh track is to have fifty new stalls. Newbold, 2.27 1/2, is a brother to Cheyenne. Buffalo's meet means \$95,000 to the winners. El Baneza, 2.22, is a new one for Alcyona. Jubilee Wilkes was not in 2.20 form at Mystic. M-quette, 2.10, will go to Boverman for the fall races. Who will win the Charter Oak stakes this year. Pittsburgh track has stall room for 150 head only. Tom Gillig (1), 2.37 1/2, is being jugged on the road. Sam Follansbee sold pools at Tilton on the Fourth. Ryland T is entered in over \$50,000 worth of stakes. Rupert Gillig, 2.24, gives Gillig another 2.25 trotter. If a man thinks he has got a winner put him in races. Directum moved a quarter last week in 3 1/2 seconds. Mixed races are getting big entries and are popular. Saladin pulled a 43-pound bike when he went in 2.05 1/2. Marvin thinks Arion will be the first trotter to beat 2.00. Stony Ford had twenty-six colts gelded the other day. Really great brood mares mean a fortune to their owners. Silver Bow, by Robert McGregor, is expected to go in 2.10. Maine-Bred horses are making a glorious early-season record. Mumbritonian, 2.20, will be a starter at Detroit this week. Old Screwdriver is being driven on the road at Alton Bay, N. H. Rupert Gillig, 2.24, and Sue Gillig, 2.25 1/2, are brother and sister. New England half-mile rings will have their meetings this week. Alvan Swift, by Alvin, is one of the race horse paces of the year. Up to last fall Pittsburgh Wilkes, 2.16 1/2, was used as a road horse. Premium entries for the Vermont breeders' meeting close Aug. 10. Brava, 2.16 1/2, by Baron Wilkes, 2.18 has a bay filly by Kremlin, 2.07 1/2. Nine of the get of Hamlin's Almont Jr. have beaten 2.30 this season. Patchen Wilkes is expected to put four or five in the 2.15 list this year. Allardorf 2.26 1/2 has been retired to the stud for the rest of the season. Patchen Wilkes is the only sire to have two new ones in the 2.15 list. Lack of proper stabling room is apparent at many New England tracks. There are fifty horses in training at the Lewiston (Me.) State fair grounds. When one or two horses outlast the field nobody wants to see the race. The stringency of the money market has affected the horse business. The rival Jewett and Village Farm stables meet in battle hot at Buffalo. Citi Davis has four horses in his string that have beaten 2.14 this season. Yassar, brother to Belle Vava, 2.08 1/2 has taken a pacing record of 2.14 1/2. Donnie by Nutwood is one of the cracks in the three-year-old pacing ranks. Maine enthusiasts are willing to gamble that Nelson beats 2.05 this season. Image, 2.21 1/2 by Delmarch stands fourteen hands and weighs 950 pounds. Hydeville (Vt.) track is four feet seven inches more than half a mile in length. Col. Edwards of Newark N. J., is making a good reputation as a starting judge. The latest report from Viking is that he has gone wrong and may be sent home. The new track at Lexington Ky., promised to be one of the fastest in the country. No New Englander has taken Tom King's place in the stand or the show ring. Jack Bowen pronounces the Maine mile track one of the best he ever set foot upon. It was found that Yankee Luck could go just where it was claimed he could go. Sunol is still in Robert Bonner's New York stable. She will be sent to Marvin later. It was only a jog for Victor Mazono to pace in 2.21 1/2 in his winning race at Pittsburgh. For comfort, safety, speed and general cheerfulness choose a horse of Morgan blood. When a horse suddenly drops dead, generally a big offer for him has just been refused. Bob Taylor, 2.18 1/2, was sold at auction in New York last week to J. L. Fitzhugh for \$1,050.

Harness racing is receiving better patronage this season than in any year in its history. There is no excuse for a driver, even if he is a backwoodsman, "because he didn't know." The horse that goes at the prescribed gait should get all benefit over one that breaks. Ketcham Farm has refused \$12,000 for the four-year-old Robert McGregor filly, Nyanza. Protracted scoring killed Fearnought's chances of winning the 2.16 class at Mystic. Martha Wilkes had a narrow escape from defeat at Pittsburgh. Darkness alone saved her. Lowell advertises a five-days' meeting opening Aug. 1, for \$3,000 in purses. Entries close July 25. There will be races August 15 and 16 at Augusta, Me., for \$1250 in purses, including a \$400 free for all. "Clark's Horse Review" has bought Dunton's Spirit of the Turf. Both are published in Chicago. Old Jack Bowen and Jesse Hanson were very much in the game in the 2.16 race at Mystic. The fast pacing mare Mary Centilivry, 2.12 1/2, is owned by Centilivry Bros., brewers of Fort Wayne. Steel Prince, by Steel Nail, took a pacing record of 2.10 1/2 in the 2.20 pacing class at Columbus, Ind. The official starter for the New England Breeders' meeting has not yet been engaged. It may be McCarthy. J. R. Shedd is getting speed. Woodshed, one of his sons, made a pacing record at Monmouth, Ill., of 2.18 1/2. Allie L., a four-year-old, by a son of Blue Bu", won the 2.00 pace at Columbus, O., getting a mark of 2.15 1/2. No yearlings have entered the list in '93. Three two-year-olds have come in and two three-year-olds. Some of the professional straters carry their own equipment of gong, time board, banners and bulletin. Puritan 2.19 1/2 gives Steele his first 2.20 performer. Steele is proving a popular stock horse at Richmond Vt. When they get to pacing down to 2.13 in a 2.20 pace or 2.17 in a three-year-class, it is pretty glib going. A kick about giving time a second or so slow to keep certain horses in their class is heard from Richmond Vt. F. H. Briggs has sold for Colt Farm a Messenger Wilkes two-year-old filly to parties in Kennebunk Me., for \$750. New England tracks are adopting the 3 per cent. entrance plan now. Old Orchard is now a notable exception. Volley met with a stable accident at Mystic and Tom Marsh was unable to start him in the 2.30 class. B. F. Solon holds the track record at Richmond Vt. His record of 2.26 1/2 was made in the fourth heat of a winning race. The Trotteralls will not accept for their future sales any animals unless pledged for absolute sale without reserve or by-5-6d. Those were nine scorching heats that the side-wheelers went at Pittsburgh. The first was in 2.13 1/2 and the ninth in 2.13 1/2. Palmer said before the race at Pittsburgh that he did not expect Martha Wilkes to be really good till she reached Buffalo. The latest reported sales of trotting horses seem to indicate a re-action from the low prices which prevailed in the spring. Sam Holigon had his mare Mischief out for a 2.21 mark at Mystic and was just barely nipped out by Puritan in 2.19 1/2. Joe Mooney, a former New England trainer was a participant in the Mystic race, but his stable was far from being successful. Had the rules been properly applied at Mystic Annie K would have had a record close to 2.20. Fast time and great races are being made this year by the green horses, while the fast ones, below 17, are slow in getting out of their class. There are three tests which are generally applied to a horse, primarily, to determine his value—those of blood, form and performance. Sleepy Jim a horse that is trotting through Eastern Ohio, stands close to eighteen hands high. Still he always gets a piece of money. Red Hal, that got a pacing record of 2.13 1/2 at Columbus is a six-year-old son of Martin's Hal by Tom Hal. He made the stud season this year at \$25. Red Elm, by Red Wilkes, is a good three-year-old this year. He won the three-year-old stake at Newport Vt., recently, getting a record of 2.33. The dams of Octo 2.19 1/2, Globe 2.14 1/2 and Lumps, 2.21 are out of mares that were bred as two-year-olds, these performers being their first foals. C. C. Rubie, M. D., Morrisville, Vt., has a nice brown filly by Nutmount, 2.22 1/2 out of his noted brood mare, Polly (dam of Lucy F., 2.27 1/2). The average of the meeting at Pittsburgh was 2.16 12-96, a shade worse than 2.17 and two seconds better than the average at Mystic. F. M. Aldrich of Fitchburg, Mass., owns a fine black mare by Morrison Wilkes, brother of Arthur Wilkes, 2.19 1/2. He will breed her to Onawa. Electioneer and Sidney have each placed four new ones in the list and rank next to Hamlin's Almont, who has nine—six trotters and three pacers. From the way the pacers are stepping the world's record for the sidewheel brigade is very apt to be changed before the middle of August. Rolfe N. 2.26, brother to Nelson 2.10 dropped dead July 13 from the bursting

of a blood vessel. He was at the head of Oakland farm, Saginaw, Mich. Wardwell met his Waterloo at Pittsburgh. He has been covering quarters in his work at a two-minute gait, but Muta Wilkes was too much for him in a race. Vera, by Viking, won the four-year-old race at Watertown. Her miles were trotted in 2.26 1/2, 2.28, 2.28 1/2. Richard Lambert by Ben Franklin was a good second. John Splan has bought for Dan McPhee of Vienna, Austria, the five-year-old mare Arline, 2.24 1/2, by Noble Harold, and she has been shipped to Europe. Phoebe Wilkes, 2.13 1/2 broke Belleflower's heart. She landed the free-for-all the week before at Monmouth, Ill., where she out her record to 2.14 1/2. Yankee Luck was replainered immediately after the race he won at Mystic, as Mr. Phelps bought the horse from a man whose right to sell has since been questioned. An hour more of daylight would have witnessed the downfall of Martha Wilkes at Pittsburgh. Young Bard Palmer is training in better company now than he ever struck before. The Stafford County Agricultural association has bought Granite State Park, Dover, N. H., and will hold a fair Sept. 22-29. The stake races close with W. C. Hatford, secretary, Aug. 25. Sam Gamble is going to breed fine carriage horses by crossing a hackney stallion with selected mares by Steinyway, General Benton, Daniel Lambert, Silver Bow, Joe Daniels and other sires. This is the first season in years that Marvin has not had at least one sensational yearling or one which promised to be such; the only good yearling prospect he had this year has gone wrong. There doesn't seem to be very much the matter with the Wilkes family this season. Look over their achievements at Pittsburgh, for instance. It is on the big tracks, where big money is up, that the test comes. Fred Reynolds, the popular trainer at Highland Stock Farm, Derby, Vt., has a coming teamster in his son Harry, who showed good stuff in his race at Newport, Vt., with the three-year-old colt Abdallah Rex. S. S. Houghton, a well known New Hampshire horseman and breeder, a native of Oxford, where he once conducted a big stock farm, with George Wilkes, Jr., at its head, died this month at Melrose, Mass., aged 68 years. Highland Farm, Derby, has a trotter in Emerald, by Baron Wilkes. His record of 2.33 in the fourth heat of his first race over a half mile track shows that he will beat 2.30 readily enough. Col. Edwin Morse, the veteran pool-weller, will conduct the privileges in person at the New Hampshire breeders' meeting in Concord the first week in September. He has had the date down since last January and says he wouldn't miss the event. When a breeder mates a mare and stallion and gets a fast trotter he concludes that his theory is just right, says a student, but when the next colt from the same parents cannot trot a little bit he has grave doubts about it. At the July meeting at Minneapolis a three mile dash race was trotted for a purse of \$3,000. There were seventeen starters and the winner was Herman H., by Embassador; Major Eddy by Jerome Eddy, second. The time was 7.33. The man who sees a job in every other race is either a fool or a knave. He either does not know what he pretends to see, or he deliberately chooses to believe that most men are thieves and wishes the public to believe so. Fantasy, the Village Farm filly made her first appearance at Pittsburgh on the opening day of the grand circuit. She fought out the five-heat race with a Tennessee-bred filly Elfrida and won. Both of the heat winners entered the 2.20 list. Nelson trotted a mile over the Maine mile track near Portland in 2.13, the last half in 1.05 1/2, and the last quarter in 32 1/2. His owner has become enthusiastic and offers to wager any amount that Nelson can equal his record of 2.14 over the same track within a week. Some horses sell for twice as much, and are worth more than twice as much, as others which are of the same age and which have equal capacities. Training has made some of these animals valuable. Want of training has left the other in the class ordinary stock. Pansy 2.17 by Mambrino King, is out of Barbara, (dam of Carleton, 2.28) by Kentucky Prince. Carleton is the property of ex-Gov Geo. W. Hendee of Morrisville Vt., and is a fast horse. Pansy is expected to prove another Nightingale and Carleton should beat 2.20. Will Wonders Never Cease! The Cosmopolitan Monthly Magazine of New York City has been considered for some time the brightest periodical in the list of great magazines and it has always been in the first rank of illustrated publications. Its subscription price for one year is \$5, and on this account the wonderful offer made by the publisher of Prognosis of St. John comes in the nature of a surprise. It is well known that Prognosis has built up a great circulation at a subscription price of \$2 and now it proposes to still further increase its readers by offering the Cosmopolitan for one year for 85 cents additional. To explain further, any one not now a subscriber to Prognosis who sends \$2.85 to the publisher of that bright weekly, will not only receive the Cosmopolitan Magazine for one year but Prognosis as well for the same time.—4t.

WANTED--A WIFE

Beautiful and with a Clear, Healthy Complexion

Of course every man wants his wife to be beautiful; but how can she be beautiful if her face and hands are disfigured by rough skin, freckles, tan or eruptions? Nothing will throw such a damper on love as a blemished face. By the use of "GEM CURATIVE SOAP," an article which combines the best known remedies for the cure of all cutaneous diseases, a refined healthy complexion is assured.

When GEM CURATIVE SOAP is used according to directions the effects are marvellous and gratifying. Time has proven this to be true, as thousands of the most flattering testimonials are on file from customers in England, Scotland, France and Germany, in which countries the Soap is a staple toilet article.

For Thirty Days Only

Write this sentence on a piece of paper

GEM CURATIVE SOAP.

And send it with twenty cents for a sample cake of Gem Curative Soap.

To the first lady from whom a slip is received will be given a handsome Seal Skin Marble, valued at \$3.00, or its equivalent in cash, less 20 per cent. To the first Gentleman from whom a similar slip will be given an 18-Karat Gold Watch set with one karat diamonds. Appletou & Tracy's movement, valued at \$250.00.

In addition to these, we have prepared five thousand sample cakes numbered 1 to 5000. Every number ending with nought (0) will receive a prize valued at not less than \$10.00. Sample cakes postpaid. All goods for the United States free of duty.

THE WORLD OVER

The Spirit of the Press of all Countries

A Synoptic History of the Times.

Itemized and Arranged for every-day Convenience.

Cholera is rampant among the poorer classes in Moscow.

The reports as to the condition of crops in Great Britain continue gloomy.

The British miners refuse to accept a reduction in wages, and a strike is considered certain.

A movement is on foot at Montreal to bring Sir Hector Langevin back into active political life.

It is estimated that there are 10,000 unemployed men in Denver, Col., at the present time.

It is said that there is more floating ice in the Straits of Belle Isle and off Newfoundland at present than there has been for years.

The foreign exhibitors at the World's Fair have decided to bring claims against the United States for \$400,000 for damage to exhibits by rain, snow and sunshine.

Those who pretend to know say that Count Mercier's expenses in connection with his present annexation campaign throughout the New England states are paid out of the fund raised in New York some time since at the instigation of Ed. Farrer, late of the Toronto Mail and Globe.

The total number of men who deserted from H. M. S. Blake at New York last spring was 53. A great many of these have found their prospects in the Great Republic a snare and a delusion, and have written penitent letters to the admiral; but the only result of return will be imprisonment and perhaps discharge from the navy. The men had a good berth on the flagship of the North Atlantic fleet and did not know it.

The Bank Crashes of a Day.

LOUISVILLE, Ky., July 25.—The Louisville City National Bank closed its doors yesterday. It had a capital of \$400,000.

TACOMA, Wash., July 25.—The Tacoma National Bank, one of the strongest in the Northwest, has suspended.

TOLEDO, O., July 25.—The Ohio Oil Wells Supply Company has gone into the hands of a receiver. The Company's indebtedness will amount to over \$800,000.

MANCHESTER, N. H., July 25.—The Bank of New England, formerly the Granite State Trust Company, has been enjoined from doing business.

CONNEVILLE, Ind., July 25.—The Citizens Bank, owned by the ex-United States Treasurer, Mr. Huston, failed to open its doors yesterday.

CHICAGO, July 25.—Bradford & Church, Dearborn Street Bankers, have closed their institution without even posting a notice. Their whereabouts are not known. The deposits are said to aggregate between \$20,000 and \$30,000.

MILWAUKEE, July 25.—John B. Koetting, cashier of the defunct South Side Savings Bank, has disappeared from the city, and simultaneously with his disappearance the discovery has been made that the general ledger is not among the effects of the institution.

MANCHESTER, N. H., July 25.—The National Bank of the Commonwealth will suspend payment to-day. This action was determined on at a meeting of the directors held on the previous night.

Where Cholera Prevails.

WASHINGTON, July 25.—Dr. Young, assistant surgeon of the Marine Hospital at Naples, Italy, yesterday cabled Dr. Wyman, surgeon-general, that cholera continues at that place, averaging three cases daily. The Marine Hospital service also received a cable message this morning through the Department of State from Mr. Strickland, the consul at Goree-Dakar, Africa, saying:

Cholera prevails in Senegal; No statistics as to the number of cases and deaths or other particulars were given.

BAD CHINESE PIRATES

Kill Seventy-five of a ship's Company.

SPAIN, July 24.—A despatch from Sigüenza says that on Thursday night a piratical outbreak occurred among the Chinese passengers on the Dutch steamer "Rajah Kongka," trading on the east coast of Achens. The Achinese attacked the crew, killing the English captain, mate and twenty-five of the Asiatic sailors and wounded fifteen others. They then quitted the steamer, taking some of the passengers as captives. The steamer, with the wounded, is now in Dutch hands.

A Slight Fire at the Fair.

CHICAGO, July 25.—Yesterday afternoon fire broke out in the Transportation Building at the Fair. It was extinguished before much damage was done, but for a few minutes the crowds in the building were almost panic-stricken. They made a great rush for the doors, having yet in mind the horror of the Cold Storage warehouse fire. The rush of engines and patrol wagons and the clanging of their bells greatly alarmed the people on the grounds.

Capt. Craig's Assault Case.

CORNWALL, July 25.—Capt. Thomas J. Craig, of the steamer Passport, pleaded Not Guilty to the charge of assault preferred against him by J. Oscar Gleckmeyer, runner for the Balmoral Hotel, Montreal. But after hearing some evidence, Police Magistrate Bethune said there had been an insult and indicted Captain Craig to appear at the autumn assizes here. Craig gave \$300 bonds in himself and was released.

New York State Butter and Cheese.

ALBANY, N. Y., July 25.—The State Department of Agriculture reports on butter and cheese production for 1892 as follows: Whole number of factories in State, 1623, making 19,497,357 pounds of butter and 130,991,310 pounds of cheese. The factories were divided—255 butter, 1155 cheese and 213 mixed.

Tornado Storms do Much Damage.

HAVERSHILL, Mass., July 24.—Tornado storms have been raging over this district for the past forty-eight hours. The damage has been great. The lake region of New Hampshire has been the worst ravaged, though Portsmouth, Dover, Haverhill and Lowell have been visited with cyclones and are sufferers to the extent of thousands of dollars. Advice from Portland, Me., state that the wind has been terrible. Trees were blown down, awnings ruined and piles of lumber torn to pieces and hurled through the air. Several persons were struck by flying missiles and many limbs broken.

A Grotesque Allegation.

NEW YORK, July 24.—The Advertiser prints what it claims is a copy of the confidential circular letter, distributed by the leaders of the Irish revolutionary party in America among its friends felicitating them upon the destruction of the British warship "Victoria," and claiming that the supposed accident was the result of a deep laid plot on the part of the physical force party in Ireland, which contemplates the destruction, if possible, of the whole British navy and the infliction of dire injury on England in every quarter of the globe where her flag flies.

Held for the Ford Theatre Fatality.

WASHINGTON, July 24.—The grand jury to-day found a true bill against Col. Frederick Answorth, Chief of the Record and Pension Division of the War Department; George W. Dant, the contractor employed to make the excavation for the electric light plant, William E. Covert, superintendent, and Francis Sasse, engineer of the building, holding them responsible for the old Ford's Theatre disaster of June 9 last, in which so many employees of the War Department were killed and wounded.

May Decide in England's Favor.

WASHINGTON, July 24.—Private letters received here from Paris state that Senator John T. Morgan, one of the Behring Sea arbitrators will sail for home August 5. He intended to leave in time to be present at opening of congress, but will be prevented by private business from doing so. All of the other American members and the council have gone. The general impression prevails that the United States case is not as strong as it should have been, and a report in favor of England will cause but little surprise.

Alexis Columbus at Chicago.

CHICAGO, July 24.—Alexis Columbus, a descendant of the great admiral of the sixth generation, arrived in Chicago yesterday. He is 96 years old, and he has come from Buffalo, N. Y., to see the World's Fair. During his stay here he will visit his daughters, of whom he has three.

France's General Election.

PARIS, July 24.—The Journal Official announces that August 8 is the date fixed for the election of members of the Chamber of Deputies. The second ballots will be taken September 3.

Laurier Feted at Rimouski.

RIMOUSKI, Que., July 25.—Wilfred Laurier, Mrs. Laurier and party arrived here last night and were received by the Mayor of the town, Mr. Tessier, M. L. A.; Dr. Fiset, ex-M. P.; and Mr. Couillard, president of the Liberal Association. Afterwards there was a banquet at the residence of Dr. Fiset, in honor of Mr. Laurier, and a similar event later on took place.

The Transmission of Sound.

Some remarkable instances are related of the conducting power of the electric wire. One story was told by a well-known New York lawyer. He was sitting in his parlor when the telephone in his library rang. His wife, who has a better "telephone voice" than he, answered the call for him. After giving the usual "hello, yes," etc. she turned and called her husband, "It is Mr. X., and he—"

"He wants to ascertain," said her husband, interrupting her, "when I can go on with the Brown case and says that he will be ready on Wednesday." "Why, how do you know?" asked his wife, in surprise. "I can hear him talking to you, he answered. His wife could hardly believe this, but when her husband went to the telephone to speak to the other lawyer, she left the room and found that she could hear every word of their conversation. An interesting example of the transmission of sound recently came to a New York Tribune writer's attention. He called up the signal service bureau to ask for some data about the weather records. The signal service official went to examine his records, and while the writer was waiting he noticed that the sound of a ticking telegrapher's instrument somewhere in the rooms of the weather bureau was coming over the telephone wire with remarkable distinctness. He called to one of the telegraph operators and asked him if he could receive the message which was arriving in the weather bureau. The operator placed the telephone receiver to his ear and held it there for a moment. Then he translated the message correctly in every detail, as was proved by the information given immediately afterward by the weather bureau official. This case of the sound of the telegrapher's instrument being so distinctly transmitted by telephone as to permit its transmission in another building is remarkable, for the clicking is extremely delicate in its variations, and the slightest defect in the transmission, so to speak, would blur the sound to an indistinguishable degree.

A FAITHFUL DOG.

He Allowed No One to Leave His Master's Room During His Absence.

A well known Austrian banker had occasion to go to Vienna on business not long ago. He arrived in the evening, travelling with a large, handsome dog. The two put up at a hotel, and the next morning the gentleman went out, bidding care to be taken that his dog did not stray from the house. The chambermaid went to make up the banker's room. Bruno was very pleased to see her, wagged his huge tail, licked her hand, and made friends thoroughly until, her business being done, she was about to leave. Not so. Bruno calmly stretched himself full length before the door. He explained as perfectly as possible that he knew his duty. No one should leave his master's room in his absence. When the girl tried to pull the door open sufficiently for her to slip out he growled, showed his teeth and finally tried them on her leg.

The woman's scream brought another maid, and yet another, and then in succession all the waiters. Bruno was glad to let them all in, but he allowed no one out. The room became pretty well crowded, and every bell in the house meanwhile rang, while the walls echoed the cries of "waiter! waiter!" Finally the lady who kept the hotel appeared and pushed her way irately into the room, asking angrily as she walked in what sort of a picnic they were holding here. Bruno let her in too, but not out again—oh no! When the lady's husband appeared she called loudly for heavens sake, to keep outside, to send messengers scouring the city for the banker, and meantime to endeavor and pacify the angry customers down stairs. That Austrian banker was a welcome man when he arrived.

A Bridge of Agate.

A mining expert sent to investigate some Arizona properties for Denver capitalists reports the finding of a most remarkable natural bridge, formed by a tree of agatized wood; spanning a canyon forty-five feet in width.

The tree had at some remote time fallen, when it became imbedded in the slit of some great inland sea or mighty water overflow. The slit in time became sandstone, and the wood, gradually passed through the stages of mineralization until it is now a wonder-tree of solid agate.

In after years water rushed and ate away the sandstone until a canyon forty-five feet in width had been formed, the flinty like substance of the agatized wood having resisted the erosion of the water-flow.

Fully fifty feet of the tree rest on one side, and can be traced, but how far its other end lies buried in the sandstone cannot be determined without blasting away the rock.

The trunk visible above the canyon varies in size from four feet to three feet in diameter. Where the bark has been broken and torn away the characteristic colors of jasper and agate are seen. To the naked eye the wood is beautiful.

Under a microscope of miner's magnifying glass the brilliancy of the colorings are clearly brought out in all their wondrous beauty.

ODDS AND ENDS.

Japan has no undertakers. There are fifty-one metals. Uncle Sam has 1,700 railways. The Umbria's screw propeller weighs thirty-nine tons. They make "maple sugar" out of corn cobs at Batavia, Mich.

Faraday first practically used gutta-percha as an insulator for wires in 1847. The first manufacturing enterprise in America was a glass factory at Jamestown, Va.

The tower of Babel, according to data gathered by investigators was 680 feet high.

There is a natural fountain in Dauphiny, France, which emits an inflammable gas after every rain.

A chestnut tree, said to be 200 years old, still flourishes at the foot of mount Etna. It is 213 feet in circumference.

The oldest statue in the world is the sheik of an Egyptian village. It is believed to be not less than 6,000 years old.

Japanese doctors never present bills to their patients. They await the patients' inclination to pay, and thankfully accept whatever sum is offered.

There is a trooper in a German regiment six feet eight and one half inches high. He is the tallest, as the little crown prince is the shortest of the Kaiser's soldiers.

The stacks of our ocean steamers are much larger than is generally supposed. They range from fourteen to eighteen feet in diameter. Those of the Etruria are over the latter figure.

Imperial writers say that the gold contained in the medals, vessels, chains and other objects contained in the Vatican would make more gold coins than the whole of the present European circulation.

A little blind girl, near Brenham, Tex., possesses wonderful powers of mind reading. She is only 12 years old, and has never appeared in public, but in private exhibitions of her skill she astonishes her audience.

Brass may be polished without much labor, this is put half a cup each of whiting and cold water in a bottle; add an ounce of ammonia; shake well; wet a flannel cloth with this and rub brass and silverware.

Thirty-one million four hundred and seventy-five thousand and nineteen barrels of domestic beer were consumed in the United States last year—about half a barrel for each inhabitant, if it had been equally divided and all had drunk fair.

A. J. MACHUM, Publisher and Proprietor

FREDERICTON, N. B. JULY 29, 1893

THE SIAMESE DIFFICULTY.

War is imminent between France and Siam. Siam is an independent kingdom in further India, south of China, and including the peninsular of Siam, and territory north to the 24th parallel of latitude. France has of late been laying claim to the territory lying between the 18th and 23rd parallels of latitude. This territory includes certain provinces ceded to Siam by England after the Burmese war. Consequently England and China are interested in maintaining the Siamese right and ownership of this territory. The claims of France have been resisted by Siam and France has retaliated by threatening to blockade the Siamese coast. The king of Siam and his ministers are disinclined for war. China is objecting strongly to the course pursued by France, and it is understood that England is advising China. In other quarters it is stated that France and Russia are in league in their foreign policy, and that Russia will take a hand if war is declared. In the meantime no decisive steps have been taken, though despatches from Bangkok, the capital of Siam, indicate that France has given Siam formal notice of her intention to blockade the whole northern coast of the gulf of Siam. Should this step be taken war will be the result, and it is more than probable that France, Russia, China and Germany will all take a hand in the squabble. However the tendencies of the times are towards peace and the settlement of all disputes by international arbitrations, and we have hardly any doubt that the present difficulty will eventually end in that way.

THAT PUBLIC MEETING.

It is somewhat deplorable that a larger number of the merchants and manufacturers of the city did not attend the meeting called by the Board of Trade last Wednesday afternoon for the purpose of appointing committees and making other arrangements with a view to fully expressing the general feeling of business men here regarding the present tariff before the Finance Minister during his projected visit here in the first week of August. There is no city in the province which possesses more intelligent and live business men than Fredericton; the great majority of them, we are sure, object to the impositions of the villainous tariff policy of the government; but still at the meeting spoken of there was barely a dozen men present, of whom not all by any means are first class business men. We do not know why so many were absent, unless it be that the meeting was not well advertised. It is to be hoped that such a small attendance does not argue indifference towards the vital tariff question. If our liberal friends in the city do not exhibit more active interest in the discussion of this question, what will their Tory compatriots say of them? Surely they will taunt them with either absolute satisfaction at the existing condition of affairs, or with having a very weak case to argue before Mr. Foster. We do not believe either hypothesis to be true, but it is so easy for political enemies to make capital out of the smallest action on our part that we should never give them any opportunity to find fault. Perhaps the real reason for the absence from the meeting of the foremost business men of the city is the fact that they did not see the necessity of attending a meeting called merely for the purpose of effecting certain preliminary arrangements, and that it is time enough to present their views to the Finance Minister when he is actually among us. We hope and believe that when he does come he will find awaiting him such an array of good arguments against the tariff as may have some practical effect in modifying some of its worst features.

EXHIBITION MATTERS.

We are glad to see that the exhibition committee of the agricultural society have held a meeting to discuss the advisability of holding an exhibition here during the coming fall, and we sincerely hope that they may be enabled to carry out their views. For the past three years the annual exhibitions held here have been uniformly successful, and the profits realized have been expended in the erection of buildings and the improvement of the exhibition grounds. We understand that in order to complete the arrangements necessary for holding a successful show, a subscription of \$800 of \$1000 will be needed. We do not anticipate any trouble in raising this amount if the committee goes about it in the proper way. In a large agricultural country such as this, whose farmers are well-to-do and whose farming interests generally would feel a direct and substantial benefit from an exhibition such as took place last year, it ought not to be a difficult matter to raise that amount, or even double as much, if required. The merchants and business men of the city, being all interested, would all subscribe towards such a fund. The committee will meet next Monday evening, at which a final decision will be reached, and we have no doubt that they will decide the right way.

A JUDICIAL VACANCY.

The death of Judge Patterson of the supreme court of Canada has left a vacancy which the government must fill as soon as possible. There are many able men to choose from in Canada, a fact which will render the choice of an able partisan, acceptable to the Tory party every where, a rather difficult matter. The Quebec Chronicle ventures to suggest that the vacant position be offered to Sir John Allen, Chief Justice of New Brunswick, whose place here could be filled by Judge King, father of the school law, while Dr. F. E. Barker of St. John could be promoted to the bench. Without possessing any information as to the probable truth of this forecast, we would venture to advise the government that such an arrangement would be generally satisfactory to the people of New Brunswick, excepting, of course, any disappointed aspirants for the position. Sir John Allen is an able, impartial, incorruptible and experienced Judge, whose presence on the supreme court bench at Ottawa would do honor to the position and to Canada. Judge King is fully capable of discharging the duties of Chief Justice of New Brunswick, while Dr. Barker's abilities and long experience as a lawyer render him fully eligible for a position on the provincial supreme court bench. The Globe and Telegraph propose Mr. C. W. Weldon Q. C., for the vacancy at Ottawa, but the Telegraph very wisely admits the improbability of Mr. Weldon obtaining any judicial destination under the present partisan government.

A REACTION.

We are glad to see quoted in the St. John Telegraph from the Aroostook Star-Herald the following timely article regarding the tide of travel:—"For several years," it says, "we have had occasion to chronicle in the correspondence printed from surrounding towns the departure of young men, sometimes singly and sometimes in parties, for the west, each one who went checking in some measure the vigor of the country's growth and lessening somewhat its material prosperity. Now, however, it is our privilege to chronicle arrivals from the west much faster than we ever recorded emigration in that direction. A reaction, or rather a collapse in western industries, has come, and those who have saved money enough to get out of that country and get back to their homes in the east, are doing so." A similar movement is noticed all over Maine. We rejoice to observe such a condition of things. We have long held the opinion that the resources and capabilities of the far west were inflated very much above their actual value. This has been done by eastern people settled in the west, some of whom, no doubt, have done exceedingly well; and also by the great transcontinental railway lines, whose interests are served by advertising the west and promoting a stream of travel over their lines. They are not much to be blamed. It is a matter of pure business with them. But the effect has been to induce very many young men to leave their comfortable eastern homes for a future of uncertainty and in the majority

of cases of comparative failure in the west. We believe the reaction noted above will continue to grow in the coming years, and that the result will be to fill up the east again. New Brunswick is sadly in need of additions to her population, and we sincerely trust that the movement noticeable in Maine may extend itself to the maritime provinces.

A DISGRACEFUL FIGHT

In Which Two Halifax Policemen are the Principals.
Policeman Watchorn is one of the more recent additions to the Halifax police force. He has been a soldier and is one of fine physique. His military instincts cause him to obey orders to the letter. Instructions from Chief O'Sullivan are particular in regard to the prevention of street corner loafing. Watchorn carries out those instructions and has made several arrests. That is what is called over-officiousness by some people who have been accustomed to the policemen who allow them to violate city ordinances as they please. Policeman Kline and a young man named James Taylor stood at a street corner. Kline was off duty and in plain clothes. Watchorn told them to move on. Kline and his mate resented the order and violent language ensued, which resulted in an assault. Kline struck Watchorn in the mouth and knocked his fellow policeman down. The two officers of the law grappled and did what damage they could to each other for a few minutes. Ald. Wier and others happened along and the contestants were separated. In addition to Watchorn's physical injuries his coat was torn badly, and a \$20 suit will have to be paid for besides other damages. The spectacle of two Halifax policemen fighting on the public street is a remarkable one, especially when the circumstances are considered.

SPORTING NEWS.

Pitky Paragraphs From the Haunts of Sporting Men.

Base Ball.

The Phillies and Boston keep nose and nose. They will meet at Boston on Monday Tuesday and Wednesday of next week, and the eyes of the base ball world will centre on their games.
The Brooklyn club, despite a record of six games won to fourteen lost on its recent Western trip, is said to have cleared over \$7,000 on the tour. A liberal infusion of young blood and the evenly matched makeup of the league teams are the chief contributing causes to the great popular interest in the game.

This is generally conceded to be the banner year for base ball in the United States. The attendance at the league game has been large and enthusiastic, and the old-time popularity of the game appears to have been almost fully restored. The New York Tribune is authority for the statement that at least eight of the national league clubs will come out ahead of the season financially, and that it would not be surprised if all the league clubs made money.

No 5—Free for all; purse \$300.
Purses divided, 50 per cent to first, 25 per cent to second, 15 per cent to third, 10 per cent to fourth horse. Five horses to enter and four to start. Entrance fee 10 per cent of purse, 5 per cent to accompany nomination. Entries made with E. W. Thompson, secretary, St. Stephen.

Sail in.

That is what the boys say when they would secure some desirable game—sale on—is the word for next Tuesday—when F. B. Edgcombe will have his big remnant sale. The sale will begin at ten o'clock and then to use the boys' very expressive term—we would say, "sail in." Yes, ladies and gentlemen—sail in, while the sale is on; and secure some of the bargains offered that day.

True Philanthropy.

To the Editor of the Globe:
Please inform your readers that I will mail free to all sufferers the means by which I was restored to health and manly vigor after years of suffering from Nervous Weakness. I was robbed and enslaved by quacks until I nearly lost faith in mankind, but thanks to heaven, I am now well, vigorous and strong. I have nothing to sell and no scheme to extort money from anyone whomsoever, but being desirous to make this certain cure known to all, I will send free and confidential to anyone full particulars of just how I was cured. Address with stamps:
MR. EDWARD MARTIN (Teacher),
P. O. Box 143, Detroit Mich.
May 20-4m.

POOR DOCUMENT

LOCAL NEWS.

Jottings on Events as they Happen about Town.
The Ebb and Flow of Civic and Suburban Life.

Sudden Death.
Mr. James Cameron, an old and respected resident of this city, died suddenly yesterday morning.

Very Ill.
Mr. Dave Dunlap, who has undergone a surgical operation, is very low and not expected to recover.

Resigned His Position.
Mr. Frank Miles of the Merchant's Bank has resigned and will leave for the West about the 1st of September, where he has secured a more lucrative position. The Globe wishes Frank every success.

Grand Orange Lodge.
The annual session of the Grand Orange Lodge of British North America will be held next week at Sault Ste. Marie. The delegates from St. John are Messrs Jas. Kelly, A. J. Armstrong and J. King Kelly.

A New Clerk.
Mr. F. B. Coleman has been so fortunate as to secure the services of Mr. H. W. White, late of the Queen Hotel of Halifax, to act as clerk of the Barker House. Mr. White is an experienced hotel clerk and will without doubt fill the position in a most satisfactory manner.

New Officers.
At the regular meeting of Court Millocke, No. 139 I. O. F. the following officers were elected and installed for the ensuing term:—H. Doherty, C. E. J. Biggs, V. C. B. A. Bar-chill, R. S. H. D. Creed, F. S. J. W. Tabor, T. S. W. Bridges, Chas. H. Woods, S. W. J. Woodard, J. W. Thomas Harvey, S. B. R. Hamilton, J. B. Dr. G. E. Coulthard, Court Phy; J. F. Richards, C. D. H. C. R. Trustees—J. D. Fowler, J. G. Gunn. Representatives to High Court: J. G. Gunn, H. Doherty, and Dr. G. E. Coulthard.

Installation of Officers.
At the regular meeting of the Knights of Pythias Tuesday evening the following officers were installed by past grand chancellors C. H. Thomas, J. D. Fowler and John Palmer: Geo. W. Adams, P. C.; Geo. E. Perkins, C. C.; W. S. Fisher, V. C.; T. A. Wilson, M. A.; J. Reid, I. G.; S. Mackay, O. G. Messrs. Crockett, Duffel, Barnes, White, Fowler, Dinamore, and Dr. Emery, visiting knights from St. John, presented cancellor commander Perkins with a beautiful bouquet. The visitors expressed themselves as delighted with the new hall.

Two Weeks on the River.
The steamer Florenceville chartered by a number of St. John gentlemen which left on Monday July 17th for a two weeks' cruise on the river and its tributaries, arrived here Monday last. The party was composed of thirty-nine ladies and gentlemen as follows:—Mrs. W. Stewart, Mrs. L. White, Mrs. T. Crockett, Mrs. Agner of Boston, Mrs. Capt. Duncan, Misses Nixon, Kennedy, Longley, Ewing, McAndrew, Chipman, Russel, Drury, Bucknam, Northrup, Lynn, Robinson, Duncan, the Misses Laechele and Miss Nichell and Miss Doughty of Portland, Me. Messrs. W. Stewart, L. White, W. White, T. Crockett, J. I. Noble Jr., E. Barnes, Robt. Sims, J. Duffel, F. DeForest, Chas. Good, Fred Fowler, Chip Ritchie, Dr. Emery, Geo. Ewing, W. Harrison, Silas McVey, Jas. McVey and Herbert Porter of this city. The boat was fitted up in the most attractive style for the accommodation of the excursionists, and also provided with a first class cook, a very important and necessary piece of furniture, and no doubt appreciated even more by the party than the piano from which they were provided with music for dancing etc. A complete photographic outfit enabled them to obtain a number of very fine views. During their stay in the celestial all prints of interest were visited. Tuesday afternoon two large busses conveyed the party to Marysville, at which place an interesting event took place in the Methodist church, the popular paper dealer being one of the principals. The steamer left on her return trip Wednesday about 11 o'clock all on board delighted with their visit to our beautiful city, and very much pleased with the treatment received here. At Upper Gagetown on the down trip they received an invitation from Mrs. McCoy to attend a potato and clam bake. The steamer, with her valuable freight, will return to St. John to-day.

For Over Fifty Years.
Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night or broken of your rest by a sick child suffering and crying with pain of Cutting Teeth send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures Diarrhoea, regulates Stomach and Bowels, cures Wind, Colic, softens the Gums and reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."—Aug. 9—68—ly

EVENTS AROUND US.

Happenings of the Week Throughout the Province.

The Kickapoo's are still in town. Mr. Geo. Hume continues very low. Go to the stone boot for your footwear. Bangor had a snowstorm on Monday last. Watch spring corsets at Dever Bros.—See adv.

August 24th is the day fixed for the Kirk picnic. See Lemont & Sons advertisement on opposite page.

Mr. B. C. Foster will be the principal of the new York street school. The Dominion Portrait Co. are turning out a large number of beautiful crayon portraits.

Alfred Crosby, of Chatham, was arrested this week for beating his wife. He got four months. The Foresters of Marysville will hold a picnic at that place on Wednesday, August 2nd.

D. L. Mitchell, of Lincoln, has been appointed principal of the Chatham Grammar School.

Wm. Ingram, of St. Martins, N. B., was killed in Londonderry, Ire., by a tram-car, last week. He was worth \$30,000.

The Canada Eastern Railway will immediately put on trains between this city and Marysville. The management propose running seven round trips daily between the two places.

Mr. Gilpatrick, manufacturer of last blocks at Keswick, shipped this season to the United States, 1,200,000 blocks. This is the largest season's output in the history of this comparatively new industry.

If you want a nobby suit go to W. E. Seery's. He has a splendid new stock of goods to select from just arrived to-day. His prices are away down. Fit and style the best and latest.

Jack Eagles, of St. John, one of the most popular commercial men on the road, and Miss Edith Wilbur, of Dorchester, were married last week. The Globe wishes Jack and his bride many long years of happiness.

Anderson and Walker have just received a large assortment of cloths, summer suitings, and pantings in the latest patterns. Inspect their stock and satisfy yourselves in regard to prices and quality. First class work, best of trimmings at lowest prices. All orders are given prompt attention. Pants to order \$2.75 to \$9.00 suits to order \$11 and upwards.

Mr. John Nickerson, an officer of the International S. S. Co., says: For years I have suffered with Catarrh, and spent hundreds of dollars on Doctors and Patent Medicines until my case was pronounced incurable. I was finally cured by Hawker's Catarrh Cure, which I consider to be worth its weight in gold. I would not be without it at any price.

The F. O. M. W. moonlight excursion which was billed for Thursday night last, has been postponed until Tuesday evening next. The excursion will be accompanied by the Frederickian brass band and the club orchestra. Prof. White, the celebrated violinist, will also be present, and the excursionists may expect to listen to some very fine selections. Gents tickets 50 cents, ladies 25 cents.

F. G. Blacklock, of Cape Spencer light station, tried all kinds of remedies for rheumatism, that had left him almost unable to walk, and at last got Dr. Manning's German Remedy. Before he had finished a bottle he could walk without a cane. This marvelous painkiller is a positive cure for Rheumatism, Neuralgia, Sprains, Strains, Bruises, Colic, Chills, Cramps, and all pains and aches, either internal or external. An invaluable household remedy. Sold everywhere. Price 50 cents.

Coming and Going.

Mr. E. B. Nixon of St. John is in the city. Mr. W. S. Carvell left for New York Thursday.

Geo. W. Hoegg and family are home again. Attorney General Blair is salmon fishing on the Miramichi.

Miss Branscombe of St. John is visiting Miss Aggie Todd.

Mrs. Dr. Torrens and children left Thursday for St. Andrews.

Mr. Foster the Finance Minister is expected here next week.

Capt. C. A. Wood, of Boston, arrived here by boat Wednesday.

Miss Nellie Atherton returned home Thursday from the North Shore.

Mrs. E. B. Winslow and her children are summering at the Bay Shore.

H. B. Manley, representing the Toronto Empire paid us a visit this week.

Geo. A. Hughes and Inspector Bridges are away on a trip through the States.

Miss Gertrude Brannen, of South Farmington, is visiting friends in the city.

Mrs. J. C. Risten, Miss Jennie Hogg, and Mr. G. L. Wilson returned Wednesday from Evandale.

Miss Jeanette Beverley went to Westfield Thursday. She will spend a month there visiting at her brother's.

The Place to Buy.

Mr. A. Massie proprietor of the Stone Boot, is constantly receiving boot, shoes, slippers etc., of the latest style which he is selling at prices lower than the lowest. Give him a call.

"Now Is Your Chance."

It is now the season when men women and children are off for a "holiday trip." Of course a trunk, hand satchel or valise is necessary to take along with you. For these goods go to Anderson & Walker who have a large line at reasonable prices.

TOPICS OF THE DAY

What the Gossips have to Remark about

The Trend of Matters Political Parliamentary or Otherwise.

Some Teach-and-Go Notices of all Mentionable Matters of Things.

The body of a man drowned at Rat Portage passed through here this week en route for Campbellton. The parties here who handled the box containing the remains were transferred to the Canada Eastern are beginning to recover.

The citizens are fairly liberal in responding to the call for funds to aid the Agricultural Society in making their exhibition this fall a success. Although very little soliciting has been done, the amount subscribed is already about \$800. The committees will meet again on Monday evening next, when it is expected everything will be definitely arranged.

At the Board of Trade meeting held in the city council chamber Wednesday, committees were appointed to interview Mr. Foster, the Finance Minister, who is expected here next week, respecting the tariff industries. A resolution was moved by Mr. C. Fred. Chestnut and seconded by Mayor Beckwith that, as the date of the Finance Minister's visit is not yet settled, the representatives of the various interests be notified through the city press by the president of the Board of Trade, when the date is made known, at what hour and at what place the Finance Minister will be prepared to receive the deputation.

At the special meeting of the city council Monday evening, the tender of Geo. F. Calkin, agent of the British Swan Company for electric street lighting, was accepted. The council requested Mr. Calkin to sign the contract and name his security before August 1st. The council are to be congratulated on having secured such a good bargain. Mr. Calkin tendered for fifty arc lights of twelve hundred candle power, his price being \$2,000. The present lighting of the city is about \$1,700. Another tender received from the Frederickian Gas Light Co., put the figure at \$2,875.

"Freemasonry in Quebec."
The author, promoters and publishers of the "Outline of the History of Freemasonry in the Province of Quebec," (1608-1892), cannot but be gratified with the cordial reception accorded to the volume by many leaders of the fraternity in Europe, Asia and America.

A lengthy appreciative "review" of the work by Wm. James Hughan, the Nestor of learned English Freemasons, has appeared in leading Masonic and secular journals both in the old world and in the new.

Robert Freke Gould, the celebrated author of "The History of Freemasonry," (5 vols. quarto), London, England, has also published a lengthy critical "review" of the Quebec history, in the "Transactions of the Quatuor Coronati Lodge," No. 2076, E. R., London, G. W. Speth, Secretary. This is the foremost literary Masonic Lodge in the world. Its English membership is limited to forty, but about four hundred prominent Freemasons in many lands are members of its "Correspondence Circle." It circulates in many ways most of the scientific, artistic, and literary societies of our day, in any country.

Having dissented from a statement of Quebec historian regarding the leaders in the formation of the "premier" Grand Lodge of England, Brother Gould comments in detail upon each of the twelve chapters in the volume (pp. 645 royal octavo). The following are extracts therefrom:

"Chapter II., headed 'Canadian Historic Memorabilia,' describes when the earliest towns and stations were founded, and traces in a clearer and more popular form than has hitherto appeared in any publication with which I am acquainted, the frequent alterations which were made in the political divisions of British North America."

The items of information which the Quebec historian [Bro. J. H. Graham, of Richmond, Que.] has so laboriously acquired; are packed into such a limited space, especially the subject matter of chapter IV., that no single 'review,' unless, indeed, it were granted a monopoly of an entire part or number of these 'Transactions,' could do the barest justice to them. It must suffice, therefore, to mention at this stage, that the additional facts published by the historian, both with regard to regimental of travelling lodges, and the earliest stationary lodges in the original British province of Quebec (1769-91) will be found to be of the highest value to all students of the craft."

"Among the 'Masonic authors' to whom Bro. Graham acknowledges his special indebtedness, are four members of our lodge [No. 2086 E. R.], and I am sure. Bros. Hughan, Lane, and Whythead will allow me to express on behalf of the quartette, the pleasure it affords us that our names should be associated, ever so remotely, with the successful completion of such an arduous undertaking."

"As an administrator, P. G. M. Graham's services have been pre-eminent in the jurisdiction of Quebec, and there is probably no other case on record, where it has fallen to the lot of one and the same Brother to attain such marked distinction, both as the Grand Master and the Historian of his Grand Lodge."—Montreal Gazette.

Suffering Women
"For good many years I have been suffering from catarrh, neuralgia and General Debility"

I failed to obtain permanent relief from medical advice, and my friends feared I would never find anything to cure me. A short time ago I was induced to try Hood's Sarsaparilla. At that time I was unable to walk even a short distance without feeling a

Death-like Weakness
overtake me. And I had intense pains from neuralgia in my head, back and limbs, which were very exhausting. But I am glad to say that soon after I began taking Hood's Sarsaparilla I saw that it was doing me good. When I took 3 bottles I was entirely

Cured of Neuralgia
I gained in strength rapidly, and can take a two-mile walk without feeling tired. I do not suffer nearly so much from catarrh, and find that as my strength increases the catarrh decreases. I am indeed a changed woman, and am very grateful to Hood's Sarsaparilla for what it has done for me. It is my wish that this my testimonial shall be published in order that others suffering as I was may learn how to be benefited. Mrs. M. E. MERRICK, 57 Elm Street, Toronto, Ont.

Hood's Sarsaparilla

Hood's Pills cure all Liver Ills, Biliousness, Jaundice, Indigestion, Sick Headache.

IT PAYS TO ADVERTISE.

A FREE FIGHT.

In the British House of Commons Over the Home Rule Question.

Order Only Restored Through the Efforts of Mr. Gladstone, Chamberlain and O'Connor.

LONDON, July 27.—In the House of Commons to-night John Clancy Parnell, moved an amendment to the home rule bill to the effect that the imperial government should guarantee to Ireland £500,000 annually during the provisional period of six years. Mr. Gladstone declined to accept the amendment.

Joseph Chamberlain during his speech declared the debate on the financial clauses had been a mere sham. That bill, however altered, was always found perfect by the adherents of the prime minister. He continued: "Never since the days of Herod, when he was interrupted by such a war of indignation from the nationalists that has not been heard in the house since the days of Parnell. His voice was drowned."

T. P. O'Connor shouted 'Judas.' The clock struck ten. Chairman Mellor tried to put the closure but his voice could not be heard. The members crowded forward.

The conservatives demanded that Mr. O'Connor be called to order for having called Mr. Chamberlain names. Mr. Mellor protested he had not heard the epithets.

After hot words between individual members, a free fight broke out. The space between the front benches was filled with a struggling, cursing mass of members. Eventually through the efforts of Mr. Gladstone, quiet was restored.

Speaker Peel was summoned, and he called on Mr. O'Connor to apologize which the latter did. The new clause was not debated. Two other financial clauses were carried.

The postponement of the fifteenth and sixteenth clauses were adopted. A motion that the first schedule stand as a part of the bill was carried and the rest of the schedules were adopted.

The committee rose and the report stage was fixed for August 7th.

How to Cure a Corn.
It is one of the easiest things in the world to cure a corn. Do not use acids or other caustic preparations, and don't cut a hole in your foot. It is simply to apply Putnam's Painless Corn Extractor, and in three days the corn can be removed without pain. Sure, safe, painless. Take only Putnam's Corn Extractor.

POOR DOCUMENT

FRANCE BEGAN IT.

What Caused the Trouble With Siam.

The French government has been desirous for some time to increase its possessions in the east. It attempted such a project at Tonquin, China, but met with reverses. France obtained a foothold at Cambodia, on the Gulf of Siam, a few years ago. Since that time the French have shown a desire to make use of this opportunity to enlarge their possession and control of the country.

They dispatched a steamer up the Mekong river, which is purely Siamese, and built forts, stirring up strife with the Siamese. Some of the Annam troops were killed, and the French made use of that fact to enforce their demands on the Siamese to consent to an extension of the French boundaries.

The French authorities hold that the boundary of that government reaches the Mekong river. The King of Siam immediately communicated with the French minister, stating that the Siamese government had no intention of making war. It was held by the King that the strife was provoked by the French troops. The King, however, informed the French that the government would make reparation for the damages that had been sustained.

The French disregarded this proposition, and sent a man-of-war up the Mekong river, on which the capital, Bangkok, is situated, and reasserted the demand for indemnity at the cannon's mouth. The original sum demanded was \$3,000,000. This was subsequently reduced to \$2,500,000.

It was also demanded that certain boundary lines which have never been defined should be conceded by Siam. A year ago the boundary dispute between the English in Burmah and Siam was settled, the Siamese government making liberal concessions. Unquestioned assurance was given on the part of England that the English authorities would stand by Siam in settling the boundary dispute with the French.

Consul-General Smith said that the Siamese government is unable to cope with France single handed, or for that matter with any of the great European powers. The navy is small, but well disciplined, and is under a Danish commander. The army consists of about 12,000 troops; who are also offered by Danish officers. From 4,000 to 5,000 troops are stationed at Bangkok.

It is the opinion of Consul-General Smith that the king of Siam will be compelled to make concessions demanded by the French. It is evident that Great Britain will not attempt to carry out the agreement made a year ago to aid the Siamese in settling the French dispute. In this situation the King will make the settlement under protest.

"The Siamese are a brave people," said the consul-general, and would make a gallant defence of their country, but they would be overwhelmed by the French equipment.

Affairs in Siam.

BANGKOK, July 24. The irritation of the British colony is intense at the seeming apathy of the home government.

The territorial demands of France are regarded here as very vague. The Siamese, although intensely excited, are displaying great self-control.

The "Inconstants," which, of all the French gauds in Siamese waters, has the greatest draught, will be able to cross the bar easily before July 27, when the moon will increase the depth of her water.

The French gunboats are fixing chain armor amidships. The Siamese vessels also are preparing for action. All have steam up. Their Siamese ships are crowded with men. Their intention is, in case the French commence hostilities, to steam down and ram the French gunboats, attempt to board them in force and attack the crews with fixed bayonets.

The French legion professes to believe that the gunboats cannot cross the bar until high tide on Wednesday, which would leave time to complete an amicable settlement.

The territory that Siam offers to sacrifice fully covers the extreme of recently attempted aggression. The cession involves the evacuation of the Siamese posts of Poowadone Atopen and Sumpang. On the river itself the French have been unable in four months to place a single station excepting Khong, and that was obtained by a surprise. The completed land advance was the cause of the naval attack now made through Bangkok.

Russia recently sounded Siam as to whether the latter was disposed to concede the Island of Salang or Junkseylon, on the eighth degree of north latitude and west of the Malay peninsula, for a Russian naval station. The naval authorities consider Salang as of great strategical importance.

PARIS, July 25.

A cabinet council was held to-day at Marley Le Roy. President Carnot presided over the deliberations, which were entirely devoted to the Siamese question. After the council arose a semi-official statement of the proceedings was issued. This statement was that in conformity with the unanimous vote of the Senate and Chamber of Deputies the government had taken such measures to safeguard the interests and dignity of France as it considered necessary from the Siamese reply to the French ultimatum.

TIEN TSUN, July 25.

The Chinese government has received the news of France's territorial demands upon Siam with amazement and indignation. That France should lay claim to the country up to the twenty-third parallel is regarded as an intrusion upon the rights of the Chinese.

Siam and its King.

The King of Siam is a monarch who has more absolute power over his subjects than the Czar. Few men in this world have a much to make them feel big and important, but for one in his position he is a very much civilized and fin-de-siecle young person. He is small in person. His head is crowned with a golden pyramid of jewels, rising in circular tiers, diminishing as they go upward, until they end in a long pencil-like point, which extends nearly two feet above the forehead of its kindly owner.

He is a pleasant-looking fellow, and his olive-brown face is plump and unwrinkled. He has beautiful liquid black eyes, a broad high and rather full forehead, and short, straight, black hair. Under his rather short and half-fat nose there is a silky black moustache, and below this the lips are rather thick and the chin plump and well rounded. His hands and feet are well made, and he is, all told, a good specimen of Siamese beauty.

He is the ninth son of Maha Mongkut, the last King of Siam, and he was picked out of a family of 84 children to be placed upon the throne. He has 34 half brothers and 49 half sisters.

Looking at him it is hard to imagine that he is the sacred ruler of from 3,000,000 to 10,000,000 of people and it is hard for an American to appreciate his absolute power and his holy dignity. The people of the country are his slaves. He has the right to call them into his service, either with or without pay, and all men in Siam are forced to give him either the whole or a part of their services during the year. His word can throw a man into chains or put him to death; can deprive him of his property or rob him of his daughter.

He taxes the people as he pleases, and these taxes are so heavy that at times some men have to sell their wives and children as slaves to enable them to pay him. Still, his vaults are full of treasure. Siam has no national debt, and he has an income of more than \$10,000,000 a year.

Still, this King of Siam is the most progressive the country has ever had. He is far in advance of his people, and he is doing a great deal to civilize them. Before his second coronation in 1873 all natives who approached the King had to do so on all fours. They had to raise their hands in adoration to him and bump their heads on the mats before him.

The King did away with all that, and he has introduced the American handshake into his reception of foreigners. He gives receptions to foreigners, and he speaks the English tongue, though he never does this when noted foreigners have an audience with him. He has brought the telegraph and the telephone into Bangkok, he established a street car line and lights his harem with electric lights.

The King of Siam is a Buddhist, and he was for some time a Buddhist priest, as is the custom with all men in Siam. Every one is expected at some time to enter the priesthood, and this royal monarch, with his millions of treasure, his scores of wives and his \$10,000,000 a year, once shaved his head, and nominally gave up his crown and his harem to wear a yellow cotton scarf about his waist and to go fasting and praying.

The great event in the life of a Siamese is the function of having his hair cut. On the top of a Siamese baby's head a certain lock of hair is preserved. All the rest of the head is shaved, but this lock is kept sacred until he reaches the age when he officially passes from boyhood to manhood. Then off comes the lock. The celebrations attending the hair cutting of the present King lasted three days.

The King of Siam has a very large assortment of wives, but he is so high and mighty that he must marry nobody beneath him in rank, his only equals being his own family. His regular official queen must therefore, always be his half sister. The Queen is not far from 20 years of age; she rules the harem, and she is a very pretty Siamese girl.

She smokes cigarettes, as does also the King and she chews the betel nut, making her teeth as black as jet and her lips stick out. The Siamese say that any dog can have white teeth, but that it is only those who are rich enough to afford the betel nut who can have black ones.

The debtor class of Siam afford a great contrast to all this gorgeousness. They are stripped naked, and chained to heavy logs, are compelled to work as slaves. The interest on money is so high in Siam that when a man once gets in debt the most he can possibly hope for by the hardest kind of work is to pay the interest on what he owes. This has discouraged industry and has encouraged the practice of allowing the women to do the work. Man, being proud and ambitious, soon tires of industry indulged in for its own sweet sake.

The temples and palaces of Siam are structures of complicated magnificence. The sacred white elephant for which Siam is famous, if he ever did amount to anything, has gone all to pieces. He is at present a mangy, scraggy, wild-eyed creature, with nothing white about him but his ears, which seem to have leprosy. His keepers are dirty, he is not bound with golden chains, and the only thing royal about him is his bad temper.

You know old Jones, who owes us for three years' subscription? Yes, well, he's having a devil of a time of it. Indeed! When did he die?

OH, WHAT A LIE!

The Fish Editor Relates an Experience With a Sea Serpent.

According to the New York Press, its editors were regaling each other with stories of personal experiences, during a slack hour the other day, and when it came to the fish editor's turn he related the following whopper.

"I walked out one afternoon among the sand dunes of Cape Cod, when suddenly I heard a great sigh come from seaward and looking in that direction I saw the head of a marine monster approaching. This head stood at least 10 feet above the water and belonged to a creature, half fish and half serpent. It came toward shore with incredible rapidity and I hid behind a banana tree."

"Banana trees do not grow on Cape Cod said the agricultural editor."

You have probably never visited the part of the cape to which I refer," said the fish editor and continued: "The creature crawled out on the sand. It had 10 fins and four feet. Its body was red, white and blue and behind each ear grew a large beer keg. Its most curious feature was its tail, which was shaped like the flukes of an angler, and was joined to its body by three links of iron chain. There was an undecipherable expression in its eyes, and as the poor thing turned and gazed off to sea pathetically, I could not but weep from sympathy. When it turned its head again it too was crying like a babe. But it was evidently determined to do something desperate and I soon saw that it contemplated suicide. Going to the top of the highest dune in sight it rose up on the end of its tail, and with a peculiar undulating motion started itself a whirling."

The flukes of the tail began instantly to sink into the sand. As he whirled faster the sugar on his tail bored deeper. I saw then that he intended to bury himself in the sand. He whirled faster and faster and deeper and deeper. His body curved out in a great bow as he whirled, and the tears from his eyes, thrown off by the centrifugal force of his motion, struck the sand like cannon shots, throwing clouds of it into the air at every plunk. I was gazing at him fascinated, when an unearthly shriek from the sea made me turn around. Coming in like lightning was another, but smaller, creature built on much the same plan. I guessed rightly that the newcomer was the first one's sweet heart. She yelled like a calliope, and soon shrieked, 'Oh, Gus, don't I never did love that whale. It was only a bluff. You are and have been the center of all my young affections.' But Gus either did not hear or didn't care. He kept on boring and was more than half buried. You can guess how rapidly he turned when I tell you that at the top of the hole the friction of his body had melted the sand into a glass ring. Well, the little one kept screaming and wringing her fins, and the big one kept whirling deeper into the sand. By and by he was all covered but his head. Then that, too, went under, and, determined to complete the job, he reached out his long, red tongue, and pulled the hole in after him. Then the little one went away with a face as downcast as mine was after the late election. It was one of the most terrible love tragedies that ever a newspaper man witnessed.

HERE'S A QUEER STORY.

A Woman Said to be a Victim of Diabolical Possession.

MONTREAL, July 25.—Union des Cantons de l'Est tell a curious story of a girl said to be possessed of the devil. The girl is named Angeline Pagot, and resides with her parents near Thetford, in the county of Montic. She is both young and beautiful. One day about the middle of June, while engaged at needlework, she screamed, jumped up and ran into the woods near by. She returned in about a quarter of an hour and told her parents that she was possessed of the devil. Nothing more occurred for three days. But on Sunday morning, when she spoke to her mother, she said there was a terrible scene. Streams of fire poured from her eyes and her mouth and she uttered blasphemous words to make the hair of those who heard her stand on end. She threatened her father, and overwhelmed him with curses and with a terrifying gesture showed him the door, exclaiming with a strange voice, 'Go and see him if you want your master. As for me I remain here and I will not be driven out of my own.' There are days when she is perfectly quiet, but from the moment that one speaks of religion she becomes furious beside herself, and is pacified with difficulty. Sometimes toward evening, when the moon makes its appearance, she sings a romance. What a voice! What singing! One would believe it to be an angel. And what is the strangest thing is that the young girl never sang before this event. The physician consulted says that there are symptoms of madness, but that it is something supernatural. The religious authorities have been warned of the case.

Stones That Bend.

Of most stones rigidity is one of the most marked characteristics, and it is hard for uninformed people to believe that there are any stones that can be bent. There are some, however, that are more flexible than wood and bend readily under light pressure without breaking. The most abundant of these is itacolumite, or flexible sandstone, which is found in large deposits in Brazil. The minerals being flexible in themselves confer the same property upon the sandstone as a whole. The way in which the cementing material was introduced into the itacolumite is not easy of explanation. Mica and sericite are not soluble and could not have been deposited by water, like silica. It is most probable that they were originally introduced in the form of clay or some similar material and afterward metamorphosed by heat pressure and superheated steam into micaceous mineral. Instances of a similar change of one mineral species into another are very common.

DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE

ARE NOT a Pur-
gative Medi-
cine. They are a
Blood Purifier,
and Blood-
forming agent, as they
supply in a condensed
form the substances
usually needed to en-
rich the blood, curing
all diseases coming
from poor and weak
blood, or from
excesses and indis-
cretions. They have a
direct action on
the SEXUAL SYSTEM of
both men and women,
restoring LOST VIGOR
and curing all
debilities and
neuroses.

EVERY MAN who finds his mental fac-
ulties dull or failing, or
his physical powers flagging, should take these
Pills. They will restore his lost energies, bot-
tom and vitality.

EVERY WOMAN should take them
to cure all of her
debilities and irregularities, which inevitably
attend sickness when neglected.

YOUNG MEN should take these PILLS
to cure the effects of
youthful bad habits, and strengthen their
system.

YOUNG WOMEN should take them
to make them regular.

For sale by all druggists and
dealers in medicine.

This Column is Open For Communications, and Will Contain Articles of Special Interest to Every Teacher.—Teachers wishing for information on any school question can obtain the same by enquiring through this column.

TEACHERS—I prepare teachers for advancement of class at their own homes. For particulars address, W. M. McDonald, P. O. Box 129, Moncton, N. B.—31.

English Literature.

Time, 2 hrs.

1 (a) What was the right and the wrong of the quarrel between Brutus and Cassius?

(b) Contrast the Cassius of Act 1 with Cassius after the quarrel. Can you see any relation?

(c) What would you say was the meaning of the introduction of "the poet" just then?

(d) How are rhyme and blank verse used to mark change or contrast in this scene?

(e) And how are prose and verse used to mark contrast elsewhere in the play? Or 1 (a) In what passages does Shylock show right on his side?

(b) Does Portia appear again in something of the same mood she was in when discussing her suitors?

(c) Is there any contrast between the demeanor of Morocco and that of Aragon?

(d) What forms of verse are used in the Merchant of Venice?

(e) How are prose and verse used to mark contrast?

2 In what senses, not modern, are used (in Julius Caesar):—

Noted, nice, slight, indirection, comparison straight.

Or 2 In the Merchant of Venice:— Post, sensible, respect, worship, mere, contrive.

3 In what connection (in Julius Caesar) occurs each of the following:— [Do not stop to explain the words.]

(a) Him and his worth and our great need of him. You have right well concealed.

(b) Poor Brutus, with himself at war, Forgets the shows of love to other men.

(c) Where love begins to sicken and decay, It useth an enforced ceremony.

(d) And none so poor to do him reverence.

Or 3 In M of V:—

(a) You teach me how a beggar should be answered.

(b) Cowards whose hearts are all as fables.

(c) To offend and judge are distinct offices.

(d) And of opposed natures.

(e) It is a good divine that follows his own instructions.

4 In what connection in Evangelinae occurs each:—

(a) It went its way like a silent Cartesian.

(b) Like the implacable soul of a chieftain slaughtered in battle, By invisible stairs ascending and scaling the heavens.

(c) But on Evangelina's heart fell his words as in winter the snow-flakes.

(d) Fall into some lone nest from which the birds have departed.

(e) Cloisters for mendicant crows and granaries pillaged by squirrels.

(f) And the streets re-echo the names of the trees of the forest.

(g) For it recalled the past, the old Acadian country, Where all men were equals, and all were brothers and sisters.

5 From what poem of Tennyson's is each taken? Explain each.

(a) As tho' to breathe were life.

(b) With folded feet, in stoles of white On sleeping wings they sail.

(c) The three dead wolves of woman born.

(d) At least rest off to please me this poor gown, This beggar woman's weed.

Or 5 In what connection in the Lady of the Lake occurs each:

(a) And bugle, lute and bell; and all should each bewildered stranger call.

(b) To friendly feast and lighted hall.

(c) With such a look as hermits throw When angels stoop to soothe their woe;

(d) He rights such wrong when it is given, If it were in the court of Heaven.

(e) Compare rather than contrast the two Locksley Hall's, or give an account of the Revenge, with short quotations, or give an account of the death of Roderick Dhu, quoting shortly.

7. Explain from Quentin Durward:— Was heuler! Our noble hampman, the naive of behaviour, positively started, a pleached walk, a morion; bray-

wein, eclaircissement, sanglier, bourgeoise, or from Ivanhoe:— West-Riding; Pentecost; weeds of a pilgrim; by the 'rood of Bromholme; devious paths; gramery; the language of oc and the language of out; melee; mailson; denizen; flat voluntas tua.

or from The Talisman:— Gothic door; regularity of contour; Allah Achbar; a coil; a necromancer; the protocol of the ceremony; a bolt from my arblast; imperturbable; Kyrie Eleison.

8. In what connection in Quentin Durward occurs each:

(a) Indignant that the chromist should thus practice on his credulity, and endeavour to found a reputation by predicting the consequences of his own treachery.

(b) He was a stout squat figure, with a square face, and broad black eyebrows, that announced him no grantor of propositions—an advice-giving gentleman, so to speak.

(c) To maintain the name of Black Troopers, and to strike additional terror into their enemies, they usually rode up on black chargers, and smeared with black ointment their arms and accoutrements, in which operation their hands and faces often had share.

(d) Courage my lord of Orleans, and you gentlemen of France, form yourselves round Dunios and do as he does.

or in Ivanhoe:—

(a) I will tell my two brethren who serve the rich Rabbi, Nathan Ben Sammel that your mastership says it is more lawful to rob him than to render him faithful service.

(b) The peculiarities of my dress, language, and manners are those of my people—I had willingly said of my country, but alas! we have no country.

(c) He would have executed the command of the Prince Athelstan the Unready had recovered presence of mind sufficient to draw back his person from the weapon, had not Cedric, as prompt as his companion was tardy, unsheathed with the speed of lightning, the short sword which he wore, and at a single blow severed the point of the lance from the handle.

(d) Faites vos devoirs, preaux chevaliers! or in The Talisman:—

(a) There is but one risk—that he might mistake the words on arriere for an avant, and lead us back to Paris instead of Jerusalem.

(b) The time hath been, that had a layman proposed such an alliance to me, I had struck him to earth; if a churchman, I had spit at him as a renegade and priest of Baal.

(c) The moon broke through a cloud at this moment, and showed him that the standard of England was vanished, that the spear on which it floated lay broken on the ground, and 'twixt it was his faithful hound apparently in the agonies of death.

(d) "How mean you?" said the Eastern soldier, have you then two kings in one poor island?"

"Thou sayest, said the Scot.

9. Give an account of Richard and Leopold of Austria's quarrel, in The Talisman.

or an account of the interview between Louis XI. and Charles of Burgundy in Quentin Durward.

or an account of the feast at the beginning of Ivanhoe.

or of Bois Guilbert and his order.

Geometry. Time, 2 hours

1. The base of a triangle is divided: 2nd externally, in the ratio of the other two sides, prove that the lines joining the points of section with the vertex are the bisectors, internal and external of the vertical angle.

2. A line is drawn above the vertex of a triangle and parallel to the base: show that it cuts the sides produced proportionately.

3. If three lines are in continued proportion, show that the first is to the third as a rectilinear figure on the first is to the similar and similarly described figure on the second.

4. What is Euclid's threefold test for ascertaining when four magnitudes are in proportion? How do you compound two ratios? When you compound two equal ratios how do you speak of the resulting ratio? What is the ratio duplicate of 2:3? In what proportions made use of? Indicate the four magnitudes in each proposition and the way in which the multiples are taken.

5. Represent graphically the arithmetic, geometry and harmonic means between two given lines and show that these means are in continued proportion.

7. Given the base of a triangle and the ratio of the other sides, find the locus of the vertex.

English Literature. Time, 3 hours

In what connection or the plays read, occurs each:—

(a) The deep of night is crept upon our talk

(b) This tongue had not offended so to-day, If Cassius might have ruled.

(c) That we shall die, we know; 'tis but the time

And drawing days out men stand upon.

(d) And I, most jocund, apt and willingly, To do you rest, a thousand deaths would die.

(e) Thus the whirligig of time brings in his revenges.

(f) For this revolt of mine, methinks, is like A second fall of man.

(g) He is pure air and fire; and the dull elements of earth and water never appear in him.

(h) When he speaks, The air, a chattered libertine is still.

(i) Write an account of King Henry V in the camp at night, and of what he

and the soldiers said.

(b) Write an account of the relations existing between Portia and Brutus.

(c) "Thou art sick of self-love, Melvolio." How might one illustrate this from Twelfth night?

3 Explain and give the connection: (a) I am no foe's post, lady.

(b) Daylight and champagne discover not more.

(c) In my branched velvet gown.

(d) England shall repeat his folly, see his weakness and admire our sufferance.

(e) It may be his enemy is a gentleman of great sort, quite from the answer of his degree.

(f) Disguise fair nature with hard favour'd rage.

(g) Poor knave I blame thee not; thou art o'er watched.

(h) If he love Caesar, all that he can do is to himself, take thought and die for Caesar.

(i) His coward lips did from their own color fly.

4. Write a note in Patriotism in Henry V. or on the use of various forms of verse in Shakespeare's plays that you have read, and on the use of prose.

5. (a) Write an account of three of Burns poems given in the Golden Treasury. Quote one.

6. From what poem is each of the following taken? Describe each poem shortly, but with due proportion:—

(a) There came and looked him in the face

An angel beautiful and bright, And that he knew it was a Fiend, This miserable Knight.

(b) Come as the winds come, when Forests are rended, Come as the waves come, when Navies are stranded.

(c) Perishing gloomily, Spurred by contumely, Cold inhumanity, Burning insanity, Into her rest.

(d) Seemed all on fire that chapel proud Where Roslin's chiefs unroof'd lie.

(e) When reposing; that night on my pillow of straw, By the wolf searing faggot that guarded the slain, At the dead of the night a sweet vision I saw; And thine ere the morning I dreamt it again.

Chemistry.

1. What are the principal and natural compounds of iron? Give their composition. How is the metal obtained from them for manufacturing purposes?

2. Write in symbols the reactions which occur when sulphuric acid is applied to the following substances:—Chalk, iron, gypsum, zinc, baking soda.

3. Name three common and useful compounds which are usually derived from common salt, and formulate the reactions which occur in their preparation.

4. Describe the preparation of ammonia gas from sal ammoniac. Formulate the reaction.

5. A piece of marble is intensely heated; the residue is stirred up in water; after the water has become clear, carbon dioxide is passed into it. What are the final products? Formulate all the reactions, and account for the last one.

6. Distinguish between acids, bases, and salts as to their composition and properties. What chemical property of metals comes into play when an acid and base are mixed together? Write three reactions illustrating your answer.

7. Write the graphic formulae for chloroform, marsh gas, nitrous oxide, ethyl alcohol, methyl alcohol and tell what you know of their properties.

8. Explain the chemical constitution of nitro glycerin, soap, ozone.

9. Explain and illustrate the following processes:—Fermentation, distillation, combustion, solution, combination, reduction.

10. How much oxygen can be obtained from ten grammes of red oxide of mercury, and how much from the same amount of potassium chlorate?

RIPANS TABLETS.

RIPANS TABLETS are compounded from a prescription used for years by well-known physicians and endorsed by leading medical authorities everywhere. In the Tablets the standard ingredients are presented in a form that is becoming the fashion with modern physicians and modern patients everywhere.

RIPANS TABLETS act gently but promptly upon the liver, stomach and intestines; cure habitual constipation, diaped colic, headaches and fevers. One Tablet taken at the first symptoms of a return of indigestion, or depression of spirits, will remove the ailment difficulty within an hour.

Persons in need of the Ripans Tablets will find the gross package most economical to buy. It is also in convenient form to divide up among friends. The above picture represents a quarter gross box, sold for 75 cents. A single bottle can be had for 15 cents.
