

Miramichi and the North Shore, etc.

ANTHRACTITE COAL.—A cargo is on route to Chatham by s.s. "Arcton". See Mr. Goggin's advt.

RIFLE ASSOCIATION.—The annual report to the County Rifle Association having arrived, there will be a meeting of the Council on Thursday next week to arrange for the Annual Competition.

DROWNED.—A boy named Wm. T. Wilson, son of Mr. Thomas Wilson, of Beauséjour, was drowned on Friday afternoon last, by jumping off a raft he had constructed and from which he attempted to swim ashore.

THE REGATTA COMMITTEE are receiving every encouragement. The selection of the Bashville course is satisfactory to everyone who desires to see the affair a great success, and it is now probable that the prize list will be larger than that of last year.

PERSONAL.—Mr. Arthur Main, Editor of the "Chatham Courier," is an enterprising young gentleman of Moncton, who is up with a broken leg. It appears that he was of very practical value to the world on his "pin" again in the most approved Winnipeg style.

REV. DR. KINGDON, Coadjutor Bishop of Fredericton, is visiting the Miramichi for the first time. He held Confraternity services at Beauséjour yesterday forenoon at 11 o'clock and at Derby at seven o'clock last evening. He is to be in Chatham to-day and will be the guest of the Rural Dean and Rector, Rev. D. Forsyth.

WRECKED.—Messrs. D. & J. Ritchie & Co., Newcastle, received, on Friday evening last, from the Captain of the "Jardine Brothers" stating that that vessel was a total wreck at St. Pierre. The vessel was bound from Liverpool to Newcastle and had a cargo consisting of about 180 tons of salt. The cargo is covered by insurance and the vessel partially so.

OPERETTA.—The Operetta, "Grandma's Birthday" was given at an entertainment in Masonic Hall, Newcastle, on Thursday evening last, under the auspices of the Methodist Church of that place. The little folks who took part in it acquitted themselves very creditably. After the musical part of the entertainment was over there was a refreshment table and quite a respectable sum was realized.

THE SCOTT ACT CASE which was before the Chatham Court, was reported last week, decided on Friday and yesterday, the fine of \$50 being imposed in each case. The parties fined were Mrs. Conway, John McCarthy, Thomas F. Kelly and Messrs. M. and J. Hickey. The three cases last named are to be appealed on the grounds covered in the objections of counsel as reported last week.

THE LATE ROSS CRAWFORD.—The following notice appears in exchange:—"As Brandon, Manitoba, on the 10th ult., of consumption, Robert J. Crawford, the deceased was a native of St. John, but had until recently resided in Chatham, N. B., and was by trade a carpenter. [St. John and Miramichi papers please copy.]"

N. B.—Should any of his relatives see this notice with a view to hearing any objections, they can communicate with G. R. Brandon, Manitoba."

DEATH OF AN OLD OFFICER.—Beverly R. Joubert, Esq., Gentleman Usher of the Black Rod of the Province of New Brunswick, died on the 10th inst. at his residence, Belle Vue, near Fredericton. Mr. Joubert was being nearly eighty years of age. He was of an old New Brunswick family, and held the office of Black Rod for considerably over a quarter of a century. The office is quite unnecessary, and can now be abolished.

PICNIC AT BARNEY RIVER.—The first picnic ever held at Barney River, I. C. R., will take place the 22nd inst., on the shore grounds adjacent to the station. An efficient committee is appointed to make due preparations for the occasion and as it will probably be the last picnic of the season it is scriptural to expect that it will be the first in every respect. Efforts will be made to have the railway fare reduced for the occasion. The proceeds are to go to the building fund of a Roman Catholic Church now being built in the settlement.

BOATING ESTABLISHMENT.—Mr. John McLaughlin of Renous River, has purchased the Campbellton crew's intrigued racing shell, "Minnehaha," which is now at Derby. The crew, of which Mr. McLaughlin was a member last year, and which rowed in the Logan large boat at the Regatta, will probably be the one to row in the "Minnehaha" this year. They are as follows:—Arch. Dunham, stroke; H. D. Shields, No. 1; John Stewart, No. 2; John McCarthy, bow; Mr. McLaughlin's enterprise and boating skill will, probably, induce others to initiate his good example.

MONCTON TO BECOTCHE.—A rather important public meeting is to be held in the Village of Becotche on Wednesday, the 9th inst. It is in the interest of a proposed railway from the Town of Moncton to the Village of Becotche, a distance of about 25 miles. The people of Kingston, Becotche, Cocagne, Scotch Settlement and intervening districts are greatly interested in the proposed road, and it certainly has some features to commend it. The people of Moncton are perhaps as much concerned as any in the enterprise, and now that the friends in Becotche have taken the initiative no doubt a lively interest will be displayed and a goodly number from Moncton found in attendance at the meeting.—Times

AGRICULTURE.—Wallace Ross has deposited \$500 in the cashier of the Daily Telegraph, St. John, and issued the following challenge:—

St. John, Aug. 4th, 1882. I hereby challenge Edward Haas to row a five mile race, two and a half miles and return, for one thousand dollars a mile and the championship of the world, on the race to be rowed within six weeks from the date of signing articles, and this challenge to remain open for three weeks from the 5th August. If not accepted in that time I will claim the championship of the world and be prepared to defend it against all comers. WALLACE ROSS.

HAAS has declined to accept, but says he will row Ross for \$5,000 next year.

THE CIRCUS.—Ryan & Robinson's Circus visited Newcastle on Monday and gave performances afternoon and evening. From the flattering notice this organization received in the papers of the Upper Provinces the public here were led to expect a superior display in all respects. We can only say that the performances there were like those at Newcastle; the press deliberately deceived the public, for—taken as a whole—the circus was disappointing to an almost fraudulent

degree. Robinson's riding and some of the tumbling and the equestrian performances of the Jell sisters were good, but the rest was below the average. The concern must be now travelling on its reputation rather than its merits.

GALETTES.—The last Royal Gazette says:—"His Honor the Lieutenant Governor has been pleased to appoint Joseph N. Goggin an Issuer of Marriage Licenses in the County of Northumberland."

We presume it is Joseph R. Goggin who means. The Gazette will, doubtless, contain the usual correction in a future issue. In a great many cases, and especially so late, the names of persons appointed to office are wrongly given in the Gazette. This feature of official incorrectness is one of the indices of the style of public management now in vogue at Fredericton. It is altogether slovenly, there being nobody to exact correctness, because even the highest of the officials are indifferent in such matters.

THE CARLETON, ST. JOHN, MURDER.—The St. John Globe of Friday last says:—"The coroner's jury was out nearly two hours yesterday afternoon in the Campbell case before they found the following verdict: 'That on Saturday, the 20th day of July last, A. D., 1882, James Campbell, of Carleton, in the City of St. John, received a blow on the left side of the neck and head from the effects of which he died on the following Sunday morning, and the jury says that: James McCallin, John Best, Samuel White, John Powers, John Peat, George Godwin, did feloniously and unlawfully kill the said James Campbell.' The prisoners were committed for trial by the coroner, and there will, therefore, on any preliminary examination at the Police Court."

"The Governor was presented at Masonic Hall, Chatham, on Friday evening last, by the Fifth Avenue Theatre Company. The audience was a large one, composed of people of Chatham, Newcastle, Nelson, Douglastown, Black Rock, and other places. The piece is one of the most ridiculous situations, which, though strained beyond the sphere of first class comedy, are very amusing. While it did not, perhaps, come up to general expectation it was so well acted that the audience could not be otherwise than satisfied. A very popular feature of the evening's programme was the appearance of Mr. Thomas, the famous Holy Cross, who is spending a part of his summer vacation here. His speech, singing and dancing were greeted with great applause and it is probable that he would have been received with a more enthusiastic reception if he had gone through enough physical exertion to prostrate half a dozen men. His final encore consisted of 10 remind the audience that he was "only human" and give a clog dance without tugs, in which, as in his other efforts in this line, he excelled any performer that has ever appeared here. As a whole the evening's entertainment was a capital one."

STROKES BEER.—The number of men who get tipsy on "beer" just now, is surprising. There are plenty of them who lie about the streets and howl by night, but they are not arrested. A stranger—an old man—who gave his name as James Thomas and said he belonged to Richibucto, was sitting on the sidewalk near the Miramichi Bookstore on Thursday last when a bunch of paper or something of that kind which had been thrown at him caused him to rise and stagger against the storefront, breaking one of the panes. The two policemen were summoned and they put the nippers on the poor old fellow and took him to the lock-up. Next morning he was brought before Police Commissioner Blair. In reply to enquiry by the Court he said he had fallen on the ground, and that he had been drinking beer at the time. The Court sentenced him to the workhouse for three days.

PROTECTION OF THE SALMON FISHERIES.—A week or two since a party of gentlemen ascended the South West Miramichi for the purpose of having some sport in salmon fishing. As usual, thanks to the fraternal care of the Fishery Department, they found the stream at that point free from the presence of any net or other contrivance for the purpose of the party was a professional gentleman from New York, he concluded to make terms with the enemy and invite the poachers to share his spoils with him, providing them among other things with some excellent Virginia tobacco. The spearmen promised faithfully, at their departure, to leave the pool where the water was unimpeded. Our American cousin, however, a little doubtful, concluded to water operations. Just at midnight a sudden gleam of light from a torch which one of the trespassers had lit about the stream, showed by night an uplifted spear ready to descend upon a salmon which darted through the water beneath.

Quick as thought the American gentleman seized his rifle and fired in close proximity to the spearer's body; out went the torch in a moment, yet the water of the fisheries continued firing until twenty shots had whistled over the heads of the spearmen who were so near that night. Next day the party succeeded in capturing a lot of splendid salmon. The spearmen have not been heard from since.—Fredericton Herald.

NORTHUMBERLAND COUNTY COURT.—The above Court, presided over by His Honor, Judge Wilkin, met at Newcastle, on Tuesday, 25th inst.

Mr. J. L. Stewart was chosen foreman of the Grand Jury.

The Criminal cases were as follows:—The Queen vs. Patrick Foley, charge of casting rifle's boom stick the property of John Fleet, Nelson. A true bill was returned in this case and the Court set down the trial for Friday.

The Queen vs. Donald Buckley, charged with altering marks on logs. The Grand Jury found no bill.

The Alms House Commissioners vs. John Mather. Defendant was called on his recognizance and a number of preliminary objections to the proceedings were made, though admitting some of the objections—whereupon—ordered the case to be set down for trial on Thursday.

The Civil docket was made up as follows:—1 Alfred Pine vs. Harrison T. Graham, assumpsit. A. H. Johnson, Esq., for plaintiff and L. J. Tweedie, Esq., for defendant.

2 John Buckley vs. Jas. Graham, assumpsit. A. H. Johnson, Esq., for plaintiff, L. J. Tweedie, Esq., for defendant.

3 Finlay D. McNaughton vs. Florence Keenan and Michael Keenan, assumpsit. E. P. Williston, Esq., for plaintiff, R. A. Lawlor, Esq., for defendant.

4 Jas. Graham vs. Chas. Rainborough, assumpsit. L. J. Tweedie, Esq., for plaintiff, R. A. Lawlor, Esq., for defendant.

In the afternoon on application of L. J. Tweedie, Esq., defendant's Attorney, cases Nos. 1 and 2 were postponed until October term owing to the absence of a material witness.

Case No. 3, was, after hearing, decided in favor of plaintiff, verdict for \$42.33. The record was withdrawn for case No. 4.

In the Foley case, the defendant was admitted to bail, the trial to come off next term.

The climate of lawlessness was reached Monday afternoon. In the morning Vandine obtained warrants for the arrest of Geo. Lee, Newton Lee and Thomas Virtue, (usually known as "Sally" Virtue), for attempting to shoot him (Vandine) on Saturday morning. The desperate character of the case was such that the accused were supposed to be concealed, and the warrants were issued for a few months ago for robbery and assault, led the authorities to take extra precaution to secure their arrest with that of Virtue, so several bold-bloated citizens were called on to assist the police in the capture. This force, armed to the teeth, surrounded the house of Geo. Lee, where the accused were supposed to be concealed, and search was made through the house without avail. Meanwhile, the word got out that the arrest was being attempted and hundreds of citizens rushed to the spot, expecting desperate work, and they were not disappointed. The police soon learned that their men were concealed in a barn just to the rear of the house. Policeman Vandine ascended a ladder leading to the hayrack with upward of 200 men, and the former had just reached the top when he caught sight of two or three men in ambush and before he could prepare himself for the struggle, number drawings took place.

A SIMPLE trick found on the sunny side of a southern climate has, under the skillful manipulation of Dr. VAN BUREN, proved to be a most successful remedy for the cure of suffering humanity. Dr. VAN BUREN'S KIDNEY CURE is acknowledged by the world over as the only perfect remedy for kidney troubles. Your drug list, Sold by J. D. B. Mackenzie, Drugist, 1429 New York Ave., Washington, D. C.

LETTERS LEAVING AGO.—The numbers of "The Living Age" for July 29th and August 5th, contain: "Nestor and Darwin," by R. A. Proctor; "Aesthetic Poetry," Dante Gabriel Rossetti; "The Pilgrimage to Kevlar," by Contemporary Life and Thought in France; "Contemporary The Lights of Mags;" and Autobiographies in the Time of the Common Wealth—Lucy Hutchinson—Alice Thornton, "Blackwood's" "Satanstoe Thoughts on Browning;" and Personal Reminiscences of Garibaldi, "Maecilian;" Indian Snells and Sounds, "Temple Bar;" The Irish "Brogue" in Fiction, "Months' Humors of Irish Days;" and "The Journal of Mr. John Macdonald," by John Macdonald, Esq., of Blackville.

MARRIED.—At Chatham, N. B., on Saturday, 5th August, 1882, of Charles Anderson, aged 28, and Mary Ann, aged 24, both of Chatham, N. B., by J. D. B. Mackenzie, Esq., of Blackville.

DIED.—At Chatham, N. B., on Saturday, 5th August, 1882, of Charles Anderson, aged 28, and Mary Ann, aged 24, both of Chatham, N. B., by J. D. B. Mackenzie, Esq., of Blackville.

Shipping Intelligence.—Port of Chatham. ARRIVED. Aug. 5th, Br. "Indien," 422, Captain, St. Pierre; Hat, J. B. Snowball.

Man Bitten Down.—The average number of teeth is 31. The number of bones in man is 240. The average weight of a skeleton is about 140 lbs.

The weight of circulating blood is about 18 pounds. The average weight of an adult man is 140 pounds.

The brain of a man exceeds twice that of any other animal. A man annually contributes to vegetation 120 pounds of carbon.

A man breathes 20 times a minute, or 1,200 times in an hour. One thousand and two ounces of blood pass through the kidneys every hour.

The average weight of a man is 140 lbs. A man breathes about 18 pints of air in a minute, or upwards of 100 pints in an hour.

The average weight of the brain of a living man is 55 pounds; of a woman 2 pounds 11 ounces. Twelve thousand pounds, or 20 hogsheads, 4 gallons, or 10,781 pints pass through the heart in 24 hours.

One hundred and seventy-four million holes and cells are in the lungs, which would cover a surface thirty times greater than the human body.

The average of a newborn infant is 120 per minute; in manhood, 80; of 60 years, 50. The pulse of females is more frequent than that of males.

The average weight of an Englishman is 140 pounds; of a Frenchman, 130 pounds; and Belgian, 140 pounds. The heart beats 175 a minute; sends nearly two pounds of blood through the veins and arteries each beat; makes four beats while we breathe one.

Mr. W. A. Wing, Westport, writes: "I wish to inform you of the wonderful results which followed the use of Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda. A cough of six months' standing had reduced me to such an extent that I was unable to work. I tried many remedies without effect; at last I used this Emulsion, and before three bottles were used I was able to say I was restored to perfect health."

When you ask for a bottle of Perry Davis' Pain-Killer, and the gentlemanly shopkeeper, without excepting looking for marks, "we are just out, but have another article" as good as the other, which we will sell you for 25 cents. Turn on your heel and say, "Good bye Sir! That is not the article I want. I want the extra profit which he gets than he does for your health or happiness."

THE Egyptian War.—The British troops and those of Arabi Pasha had an encounter, of which the following is the report by General Allison the British Commander:—"The persistent native forces having arrived during the past few days that Arabi Pasha was retiring from Kafe El Dwar upon Damanbar, I determined a reconnaissance to ascertain clearly whether Arabi Pasha still held his original position. The left column commenced its advance at 4.45 p. m., from the advance pickets of the Ramleh line, moving by both banks of the Mahammedi Canal, and in front of the Mahammedi Canal, and in strong, defensible houses and gardens on the other side; these positions were carried. At this time Lieut. Vane of the 50th and one soldier were killed. The enemy then took a second position half a mile in the rear, upon the east bank of the canal, among high crops and houses and behind the irregular banks of the canal. From this position also the enemy were driven with great loss, and I accompanied the right column myself, as well as the enemy observed that they began firing with their rifles, I pushed on as rapidly as possible till I reached a point where the railway approaches Mahammedi Canal and opened musketry fire upon the enemy lying in the bank of the canal. Two nine pounders were dragged on to the embankment and came into action against the enemy's guns, the 40 pounder firing over our heads against a point where the enemy's forces were beginning to appear. I now threw forward two companies to carry the horse near the canal, and followed up by throwing four companies still more to my left upon the bank of the canal, and the enemy's position I wished and forming a diagonal line across both canal and railway. The enemy retired slowly before our fire. The object of my reconnaissance was to ascertain the position of the enemy, and I determined to draw, this movement being carried out with the utmost regularity and precision. The troops fell by alternate companies with the regularity of field day, and the enemy's position was crushed by the beautiful precision of the 40 pounder, and the steady firing of the nine pounders. The loss to the enemy

appears to have been very great. They were so dispirited that, contrary to the usual practice of Arabi, they made no attempt to follow up our withdrawal. I regret to state that our loss was somewhat heavy. Lieut. Vane was one of the most promising officers I ever met. Our total loss was four killed and twenty-nine wounded.

Gen. Alison estimated the loss of the enemy between 200 and 300. Great complaints are reported in Arabi's camp.

Consumption is a disease contracted by a neglect of health—how necessary then that we should at once get the best cure for Coughs, Colds, Laryngitis, and all diseases of the Throat and Lungs—such as the most popular medicines of these complaints is Northrop and Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda. Mr. J. F. Smith, Drugist, Dunville, writes: "It gives general satisfaction and kills speedily."

LOOK TO YOUR SHOP.—Whether your object be to raise meat or wool, understand that the knife or the shears will result in a clear gain of twenty per cent over your ordinary profits, if you mix the animals' feed with HANVELL'S CORNMEAL POWDERS. Sold everywhere.

MR. MORRISON, FARMER, CHATHAM, P. Q., writes about Dr. Thomas' Electric Oil, which he says he has used on his own and it cured him of rheumatism with only a few applications. The balance of the bottle was used by an old gentleman, large Asthma, with the best results. It acts like a charm.

INCIDENT CONCERNING.—In bronchial and other chest affections, in arresting in simple consumption, and in lessening the distressing symptoms of this disease in its hopeless stages, as well as in cases of nervous debility in giving tone to the system, it is undoubtedly a valuable remedy. The Lights of Mags; and Autobiographies in the Time of the Common Wealth—Lucy Hutchinson—Alice Thornton, "Blackwood's" "Satanstoe Thoughts on Browning;" and Personal Reminiscences of Garibaldi, "Maecilian;" Indian Snells and Sounds, "Temple Bar;" The Irish "Brogue" in Fiction, "Months' Humors of Irish Days;" and "The Journal of Mr. John Macdonald," by John Macdonald, Esq., of Blackville.

The troops fell by alternate companies with the regularity of field day, and the enemy's position was crushed by the beautiful precision of the 40 pounder, and the steady firing of the nine pounders. The loss to the enemy

which the Porte extends its baleful rule. The Egyptian war threatens to overthrow the present French Ministry, with no great prospect of any succession more stable. The unhappy record of France in this whole business is exceedingly injurious to the reputation of her Government, but with her recent experience of the heavy cost of a war in Tunis, and her constant danger in case of European complications, she is in no position to heavily increase her expenditure by sending an army to Egypt. Her present policy appears to be to let England pull the chestnuts out of the fire and then claim half of them; but England, according to the Times, will not play passing to the fox.—N. Y. Herald.

I now threw forward two companies to carry the horse near the canal, and followed up by throwing four companies still more to my left upon the bank of the canal, and the enemy's position I wished and forming a diagonal line across both canal and railway. The enemy retired slowly before our fire. The object of my reconnaissance was to ascertain the position of the enemy, and I determined to draw, this movement being carried out with the utmost regularity and precision. The troops fell by alternate companies with the regularity of field day, and the enemy's position was crushed by the beautiful precision of the 40 pounder, and the steady firing of the nine pounders. The loss to the enemy

which the Porte extends its baleful rule. The Egyptian war threatens to overthrow the present French Ministry, with no great prospect of any succession more stable. The unhappy record of France in this whole business is exceedingly injurious to the reputation of her Government, but with her recent experience of the heavy cost of a war in Tunis, and her constant danger in case of European complications, she is in no position to heavily increase her expenditure by sending an army to Egypt. Her present policy appears to be to let England pull the chestnuts out of the fire and then claim half of them; but England, according to the Times, will not play passing to the fox.—N. Y. Herald.
