

The Weekly Monitor.

WEDNESDAY, APRIL 25th, 1883. HOME MANUFACTURE.

The subject of manufacturing we have ever regarded to be one of vital importance to Nova Scotia. In spite of our vast agricultural, lumbering and mining resources, we can never expect any great commercial wealth until our people generally realize the importance of working our raw material on the spot and not sending it away to be manufactured into various implements and articles which are in return exported to us, causing us to pay both duty and freight, sending our money out of the country, and compelling our young people to leave our shores to seek a livelihood through absence of employment here.

All history will vindicate the statements that exclusively mining and agricultural countries are usually poor and dependent on the products of the raw material from the fields, forests or mines is not the productive wealth that builds up towns and cities, or at least the kind that most greatly benefits the trading and wage receiving classes. It is a kind of wealth which stands in pools, and does not spread out over the whole country and make the wilderness and the solitary places glad and the deserts rejoice and blossom like the rose. It does not thrill and electrify the social, educational and material interests of the country so thoroughly as to cause all parts to pulse with life and health. The reason is obvious. The raw, bulky, heavy material goes abroad at low rates, and returns as the product of the manufacturer at high rates. The difference between the price of the two commodities is the loss sustained by the non-manufacturer, and no people can claim to be well on the way to the highest property who are content to be the mere dealers and marketers, the producers of raw material, wholly dependent upon the capricious and fluctuating prices of the foreign purchasers and manufacturers for the necessities and comforts of life.

We study the future in the light of the past, and what home manufacturers have done for other nations, which we may safely calculate they will do for this State. We need only the example of our English brethren. Through England is first known in history by the efforts of the Phoenician navigators to obtain the products of her mines, and although her pastoral and agricultural wealth chiefly attracted the Roman conquerors, still England never emerged as a first class power in Europe until she had learned to manufacture her own products. Her wealth and power, her position in the world, and her sea coast is one long counter, where she trades with the world, buying the crude material and selling the refined and putting the difference into her pocket. Home manufacture has largely been the cause of the power of France, Prussia and Holland, after being prostrated by long devastating wars. These countries have steadily grown rich—have money to loan and invest in great public enterprises—while Russia, whose exports consist chiefly of the raw materials, is one of the poorest nations of Europe, considering her extent and resources. Home manufactures made New England, with her thin soil, granite hills, and rough climate, rich and self-reliant while the sunny South, with a fertile soil, a delicious climate, and exporting all she raised, languished in poverty. But the claim of a new era of prosperity in that fair clime is evidenced by the fact that her capital is becoming to whiz and whirl in her looms and spindles.

Mr. Toland, general agent for the B. and P. Bible Society for Nova Scotia and New Brunswick, addressed a meeting Monday evening in the basement of Providence Church. He gave a very interesting account of the operations of the Society for the past year. Understanding by Copies, Bibles, Testaments, and portions taken together, the total issue at home has been 1,000,000, and those abroad 1,425,000, in all 2,425,000 copies, or nearly 100,000 for every working day of the year. These figures bring up the number of issues from the Society since its formation to 92,500,000. The total receipts of the Society for the past year were \$100,000, and the total disbursements, \$190,750. About 300 colporteurs are at work in Europe, and 200 more in Canada. Mr. Toland referred to the trials and triumphs of the agents of the Society in France, Italy, the Caucasus, Turkey, Africa, Persia, India, and the Islands of the East. This venerable society is certainly most patient and persevering in its efforts to place the Bible in the hand of every man, printed in his own language. The Society has a very efficient agent in Mr. Toland. His addresses are always both interesting and instructive.

The DEPARTURE FROM—The London Correspondent of the Tribune says: "The dramatic allocation of the many volumes in the newspapers, has been received by the public with a degree of composure which may be fairly be said to surprise. The police entertain no doubt that Whitehead, Norman, Gallagher, Wilson, and O'Connor are directly connected in a plot on a grand scale probably aiming at simultaneous explosions in various parts of London. They believe that these arrests have broken the conspiracy for the moment but decline to affirm explicitly that they will be able immediately to break up the whole gang. They admit that they have done so far as to take active steps are being taken. They wisely withhold from the public further accounts, possibly, having published already several things that would better have been kept secret. The public interest is due in other degrees to the conviction that the only serious mistake known to the police is the premature arrest of Norman, Wilson, Gallagher, and O'Connor, who are the most important persons, has escaped in consequence. The press discusses the case, and has published already several things that would better have been kept secret. April Quarterly Meeting of the Nova Scotia Fruit Growers Association.

Pursuant to notice, the April Quarterly Meeting of the above Association was held in the Court House, Bridgetown, on Tuesday, the 17th inst.

The President said he was glad to welcome the Association to Bridgetown, and was pleased to see so large an attendance, and expressed a hope that this would be the case in the future.

The Secretary read the minutes of last meeting, which were approved, and also a brief report, chiefly having reference to the recent fruit exhibition and convention at Halifax.

The show of fruit was remarkably good, and the Secretary reported that he had received nearly 800 pieces on exhibition, including collections from Cape Breton and Eastern Nova Scotia.

The Secretary also made a statement of the financial status of the Association, showing a healthy state of the finances, but a noticeable loss brought out of this report, and one much to be deplored.

Household Hints. JUVENILE RECREATIONS FOR RAINY DAYS.

It is a difficult matter to keep the little folks amused, when they cannot indulge in active play. We offer a few suggestions to those who desire to amuse them to be both happy and quiet, and so add much to the peace and comfort of their elders.

At this point the boy shot out of the door, tipping over a basket of white beans, and disappeared in the drug store. The grocery man got down on his knees on the sidewalk and scooped up the beans, occasionally looking over to the drug store and just as got them picked up the boy came out of the drug store walking deliberately and with a look of triumph.

What is it, a boy or a girl? said the grocery man, wishing an old lady who was holding a paper over a pitcher of yeast with her thumb.

How in blazes did you know anything about it? said the boy as he looked around in astonishment, and with some indignation. 'Well, it's a girl, if you must know, and that's enough,' and he looked down at the cat playing on the floor with a potato.

Well how does your pa take it? said the grocery man, as he charged the boy with the cheese and a number of such things.

To Young Ladies.—A great many girls think that it is their sole mission in life to look lovely; they do not consider that they are bound to talk or display anything like intelligence, so long as they dress in a manner to show their beauty off to the best advantage.
