© 1998

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BULLETIN No. 258

MAPLE SUCAR

ERRATUM :

Referring to Bulletin No. ~~256~~²⁵³, page 17, sample No. 48162, the word "Pimento" should be deleted.

The starch present is that of "Mother of Cloves," or ripe Cloves ; this starch is present in traces only, and the sample is genuine.

A. MCGILL.
Chief Analyst.

BULLETIN No. 258

MAPLE SUGAR

OTTAWA, June 4, 1913.

WM. HIMSWORTH, Esq.,
Acting Deputy Minister,
Inland Revenue.

SIR,—I beg to hand you a report dealing with eighty-three (83) samples purchased by our inspectors as Maple Sugar in December and January last. Forty-seven (47) samples appear to be genuine, as judged by the standards legalized under Order in Council of October 27, 1911, and published as G. 994.

The remaining thirty six samples must be regarded as adulterated or at least as doubtful. Two samples (Nos. 51651, 49820), I have judged as doubtful, on account of the analytical numbers coming very near the minima required by the standards; but the names named has since been acknowledged to be compound.

Many of the vendors have written me, since the collection was made, conceding that they knew the article offered as Maple Sugar to be a compound, and saying either that they sold it as such; or that they assumed the purchaser to be aware of the character of the article offered. Our inspectors' invoices and reports show all samples to have been received in answer to a demand for Maple Sugar.

Several samples are called by the manufacturers Maple Cream Sugar, and are invoiced as such to the retailer, who however sells them as Maple Sugar. A glance at the results of analysis of these samples (see Nos. 41509, 51510, 47923) show that they contain no more water than hard sugar, and cannot be regarded in any sense as Creams. Nor do they contain milk fat. The introduction of the word 'Cream' into the name cannot therefore be considered as justified.

There is a substance to be found on the market, commonly known as 'Maple Cream.' This is a soft sugar of the consistence of cream, and is an intermediate product between Maple Sugar and Maple Sugar. The article offered as 'Maple Cream Sugar' in no way resembles it, and must be held to be a sugar. If the word 'Cream' has any meaning at all in this connection, it can only be intended to call attention to the superiority of the article, as cream is superior to milk. Regarded in this light, it can only be held as an attempt to deceive the purchaser.

Another manufacturer claims that his product is not sold as Maple Sugar, but as M.S. Cakes. The same judgment must be passed upon this article.

As already stated in many previous reports, a mixture of ordinary sugar with Maple Sugar is a very palatable article, and no ground for complaint can be found for its appearance on the market. But it should be, and must be, plainly declared to be a mixture, or otherwise described in such a way as to prevent deception of buyers.

I beg to recommend publication of this report as Bulletin No. 258.

I have the honour to be, Sir,
Your Obedient Servant,

A. MCGILL,
Chief Analyst.
