REDUCED RATES OF PREMIUM—HALF
CREDIT RATES OF PREMIUM.
THE great and decided, success which has ettended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary
European Roise. The result of such Reduction
is to enable parties to avail themselves of the important benefits to Life Assurance at mach lover
Roise of Premium than thou of any other Joursies Company I encacting business is Canada.
The Directors have also resolved to extend to
British North America the advantages afforded
by the HALF CREDIT RATES of PREMIUM
which have been as highly approved, and, are so David Davidson, Raq., Treasurer. Hew Ramsay, Esq., Honorary Sec.

by the HALF CREDIT KATES of PREMIUD.

Thick have been as highly approved, and, are so generally adopted by Policy Holders in the United Eingelms. The seas liberal conditions are like wise officed to the Assured in the timits to which they may proceed by one or land, to other parts of North America without affecting their Interest in their respective Policies.

Details of the news by her may be expected to-day.

The comparative statement, which we previously published, of the freight which has passed through the St. Lawrence Canuls, according and descending, during the years 1850 and 1849, cannot prove otherwise than highly interesting to the commercial hody; and ought to furnish those gentlemen, who incur the trouble of acting as Cabinet Ministers, with useful leasons in their vocation as political scenomists. There is unmistakeable evidence on the face of the Report, that, that portion of our trade is declining, which conthat portion of our trade is declining, which consists in the carrying of produce from the interior to the point of export, and its consequent shipment from our scapous. There is a falling-off is the two essential tentures of commerce—in the amount of tonings employed, and the number of tons of produce conveyed. Now, we who are meraly spectators of the working of the Lafontainite Cabinet, who withhold from it our confidence, who question the soundness of the policy which guides it, may fairly hold in our hands the official Report upon which we comment, and sak the Report upon water we capect a pause in the downward course of decay and ruin, which their own statistics indicate as inevitable. The year 1850 has been one during which no public calemity afflicted the land—unless we account Lord Elgin and his Ministry as such ; the harvest has been abandant; we have had neither Ship Fever nor Cholera to paralyze industry, or deter emigration; our towns and villages have swarmed with Ameri-can travellers, without whose liberal expenditure hotel keeping and steamboat-owning would have less employment. Yet, in the face of all the advantages which nature conferred upon us, and all the aids which art, stimulated by an outlay of millions, has extended, to swell our ree, the statistics demonstrate that we are retrograding—that the elements of wealth are ing away, and the Colony suffering from that most formidable of diseases, a commercial atro-phy. We shall cite one article enumerated in the ist, because it has hitherto formed an important item in the export trade of the Colony; and i must in future times be regarded as the chief product of the land. Lumber can be exhau whereas the cause of the extinction of the lumb traffic, in the foundation of the growth of an agricultural class; and though the time may come about, remote as it now seems, when we, like the New Korkers, shall be compelled to import inm-ber, it is not the less certain that every year augments the extent of forest land, reduced to cultur

reprobation, a policy, whereby those Canals, which have plunged the Province into debt, should apparently fail in realizing the purpose for which they were constructed; and whereby the leading article of export, should be diverted from ate route, to the manifest injury of our pping; our sen-ports; and out traders; Colo-l politics are such a mess of reciprocity and ity ; free-trade and protective duties; high salaries and retrenchment; that we fancy our Cabinet must dwell in a very misty region and, perhaps, look at questions of trade, pla n and obvious enough to indinary mortals, through a St. Lawrence on a warm summer day : which presents to the eye of the beholder, the pheno mens, of ships reversed and sailing along th In the year 1850, the quantity of flour, h descended the St. Lawrence Canals, up to the 31st day of August, was twenty-five per cent less, than the previous year; what a com-mentary upon Colonial legislation?

and swells the four-producing power of the Colony. We do not insinante that Canada has fallen off in her power of growing wheat, because the statistics show a diminution in

the number of tons carried through the Canals. the number of tons carried through the Canals.
We are well aware, that her surplus of wheat,
this year, will exceed any former period;
but we are fairly justified in holding up to

marks about the Cunard steamers even under the modified view of the case, it seems that the fastest beats are to run direct, and the slow boats touch at Halifax. It is easy to predict that all the passengers will resert to the direct line;

THE CURAND STRAMERS—A doubt having been intimated in a St. John's paper as to the truth of the announcement, that the Cunard stamers would not stop at Halifax beneather, we are allowed to state that the new areangement has not yet been completed, but soon will be. In the new contract between the English Government and Mr. Cunard, extending to 1860, the direct route of the New York boats is smeeted to. The dies will accordingly make her next trip direct from this city.

RESURPOCEST OF ZEADS WISH CANADA.

RE. Hamila, Acm. the Committee of Crimineres, reported a hill for the free mangation of the St. Lawrence trust, and to washink reciprocity of rank white Canada.

This is in the American Sponto; but as there are now only sight days during which the Session of Congress will last, it appears highly improbable that the Bill will pass.

The reviving faste for costly jeweller
ced by the London correspondent of the

pasts you may judge, when to one neckage compasted of them there is a diamond pendust, and that only straw coloured, price £500. The money value of the stock of this kind is perfectly incredible, considering the almost microscopic spaces to ecupies, a single case exceeding £50,000. These enormously couly articles, but more especially in the dressing case line, are chiefly for the Russian nobility, whose appreciation of such matters is mainly guided by the immensity of pecuniary outlay in their acquisition. Hence it is not unusual for a Russian Prince to give £1,200, or even £2000; for a dressing case, which, to be sure, when opened out, makes a whole toilet service, covering a large table, and the pinz of the Tartan Adonis is reflected to if hair, a thousand times over, in burnished aliver, and crystal, and gold. Hancock is purveyor of these and the like commedities to the Court of St. Peteraburgh; and hence he was selected by Prince Demitoff to manufacture the sumpinous aliver mess—box that personage lately presented to the Honorable Colonel Maule, of the 79th Highlanders, as an acknown lodgment of civilities received from the officers while at Gibralian. Doir Offa and One, and Ouklys, and Pouskys, and Wowskys, may be encountered by the dozen at Europe, from the toe of the last statue dug up at Herculineum, to the Cabul Mountain of Light, with the sight whereof Her Majesty now regales her Windsor guests effectioner occasionally. It appears that its value has been understood, or rather the value of the set of diamonds whereof the Mountain forms the centre of the set, for its seems that the brilliant on either aide of it is worth £10,000. Lord Normanby is the authority for the accuracy of this apprisement, and a more learned connoisseur than Constantine in auch matters doesn't live, though even he shrinks from computing the worth of the 'Mountain,' as something too staggeringly stupendous for the pecuniary comprehension of 1 nglishmen''

My acquaintance with the City of Montreal, was not the result of ciriosity or accident; the came of my visit is stated in fire lines, but those five lines embrace a history of conspiracy, violence, and perjury. I may be parknowed again repeating them. The Herald asserts, "that I was forcibly and violently kidanpped in Upper Canada, and brought into the president of this section of the Protince, by the very parties who made outh that I contemplated losting it." It is more than probable that I may eventually lay before the once prejudiced public a succinct attacment of my first intraduction to the Lower Canada legal authorities, my embassion of my legal authorities, my embassion of the lower canada legal authorities and legal authorities and legal authorities and legal authorities and legal auth

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infailible:

DYSPEPSIA, by theroughly cleaning the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind; PLATULENCY, Loss of Appetite, Heartburn, Headeens, Rastlessness, Ill-temper, Anxiety, Headeens, Rastlessness, Ill-temper, Anxiety, Lenguer, and Melanchely, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

Costiveness, by cleaning the whole length of the intestiner with a solvent process, and without violence: all violent purges leave the bowels control within two days.

Diar, some and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubricative secretion of the success membrane.

Fevers of all kinds, by restoring the blood to a regular circulation, through the process of pensileuton as such cases, and the thorough actition of all hinds; by the foreign and struction of the joints.

The Leve Menoness have been known to the REMINATION permanently in three weeks, and GOUT in half that time, by removing local inflammation from the nuscles and ligaments of the joints.

Droptics of all kinds, by freeing and strengthening the kindeys and badder: they operate most delightfully on these important organs, and hence have cree been found a certain remody for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the howels the slimp matter to which these creatures adhere.

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these drasfall diseases.

Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that feed the skin, and the inerbid state of which occasions all cruptive, complaints, callow, cloudy, and other disagreeable complexions.

SAVED FROM DEATH!!!

Ten ony of Ma. NATHAN MATHEWS. a highly respect ble and wealthy citizen of Newark, N. J. Da. G. W. HALSAY:—I believe your Forest wine and Pills have been the means of saving my life. When I commenced taking them, I land at the point of death, with Dropey, Piles, and Asthma. My Physiciana had given me over as past cure, and my family had lost at hope of my recovery. While in this deadul satuation, your forest Wine and Pills were procured for me, and before I had finished the first bottle of the Wine, and box of Pills, I experienced great relief; my body and limbs, which were greatly swollen, became semistly reduced. Hopes of my recovery began now to revive, and after continuing the use of your medicines for about a month, the Piles and Asthma were completely cured. The Dropsy, with which my life was placed in such great danger, was also nearly gone. I have continued the mie of your Medicines until the present time, and a now enjoy as perfect health as ever I did in my life, although I am more than sixty years of age. I ascribe my recovery entirely to the use of your excellent Medicines. Several of my neighbors have also need them, with similar success in obstinate complaints, and I can cheerfully recommand them to the public.

Yours, respectfully,

CONCENTRATED COMPOUND DECOCTION, OR FLUID EXTRACT OF JAMAICA SARSAPARILLA, As ordered by the harmacopee of London College of Physician

PREPARED BY
ALEXANDER URQUHART, Medical Hall, 7, Great St. James' Street.

Medical Hall, 7, Grpat St. James' Street.

THIS Valuable Preparation has been before the public for many years, during which time, it has been extensively used, and has proved eminently successful in all those duseness in which this medicine is prescribed. It is considered by Physicians of the present day the very best Medicine for re-establishing the constitution after it has undergone the effects of Mercury. In Chroma Rheamaltism, the most marked effects have been produced by the use of Sarsaparilla; and its continued use is often twended with improvement of appesite and digestion, increase of strength, the production of a more beatily state of mind, and the pallitudion, or, is some, cases, complete disappearance of various morbid symptoms, as Esquitons, Ukerations, paints of a Rheumakic character, &c., &c.

Drs. McCulloth, Campbell, Millomell, and Fruser, who have extensively used it in their practice, have knody favored the Proprietor with the following Certificates:

ALE. Unqualatz, Esq. S—Data Sta.—I have men hybeasure in bearing testimony to the faithfuls, manner in which you prepare your Fluid Extract of the distribution of Sarsaparilla. This I am, analode to do, on second of Sarsaparilla. This I am, enabled to do, on eccount of several of my patients flowing derivated regretices benefit from its use.

For Constitutional Syphilia he most marked effects, I can, therefore, without the least include, and the first of the properation as the postession of all the Medicinal qualities programment and the postession of all the Medicinal qualities programments.

account of several of my patents having derived a greatest benefit from its use. For Constitutional Syphilis and Chronic Rheumatiss I have prescribed it with the most marked effects. I can therefore, without the lenst hemitation, recommend you preparation as one possessing all the Medicinal qualities of the Compound B. con.jon of Sarsaparilla, while it is the same time more pair; salle; and less apt to devauge the Stomach.

Theg to certify, that I have employed very extensively the "Fuld Extract of Strangardile." and by Mr. Unquanty, in til those diseases in which that Medicine is usually prescribed, and that I have found it a most valuable preparation. I can, merceuser, state, from prisonal investigation, that the Proprietur employs none but the purchase ingredients, and hestows the freakest care and attention upon the mode of preparing this remedy.
