It appears that the Seal Fishery this spring has proved a complete failure at the Magdalen Islands. The staple traffic which the inhabitants of these islands depend, as the sale of the seal and skins of these animals.

The Pieton Chronicle says that four men were recently drowned while attempting to cross Lake in a small canoe, in Musquodibouit. Their bodies were afterwards recovered.

The Sons of Temperance of North America celebrated their annual festival at Toronto on the 17th inst. Upwards of 16,000 Sons were in the city, including, it is said, nearly 1000 from Boston, and many from other parts of the Union.

The steamship Asia sailed from New York on Wednesday last, for Liverpool, with 100 passengers, and 81,115,000 in specie.

Three days later from England. The Niagara arrived at New York on the 29th inst. at 8 o'clock this morning, with Liverpool dates to the 7th inst.—She brings 65 passengers. The steamer Arctic arrived at Liverpool at 5 20 P. M. on the 4th.

The political news is not important.—The Ministry are very unpopular, but a crisis will befall this year. Markets.—Cotton has improved; Sugar somewhat lower; Breadstuffs steady—sugar moderate.

The Manchester markets were firm, and more easier at previous rates. Cotton was unchanged, the sales of the week reaching 45,000 bales.

The success of the World's Fair in London will continue to be the great theme of conversation. On the 24th June, 1876, was taken at the doors, and the London Times states that on the 21st instant the number of people who visited the Exhibition was officially returned at 53,371.

Richard Lalor Sheil, British Minister at Lyons, died suddenly on the 20th of May. The death of the Earl of Shaftesbury is also announced.

The steamship Great Britain is being put in thorough repair, and will, it is said, commence to run between Liverpool and New York next September. She is to be commanded by Captain Mathews, formerly of the Great Western.

The British Government has reduced the salary of its Minister at Paris from \$48,500 to \$39,800. Lord Palmerston, in announcing this reduction to the House of Commons, took occasion to say, that English travellers who go to Paris, must expect to receive a cordial reception from the Minister, but that the very large extent of hospitality which hitherto has been exercised.

of the tunnel of Biasy which is upwards of 4,000 yards in length. At a short distance beyond it is the viaduct of Velar, a truly stupendous work of art, known across a narrow valley, and forty-five metres in height. Louis Napoleon descended the distance from the road to view the structure, when a Sister of Charity presented to him a young female of twelve who had been found a few days before in the neighborhood of the tunnel.

No other incident occurred until the arrival of the President at Dijon, about 3 o'clock. The population of the city and country for leagues around had assembled at the terminus, and lined its immense semi-circle. In the centre were erected two large towers, exclusively filled with ladies, and in front of them stood an altar, raised on an elevated platform, on which the Bishop, with the entire clergy of Dijon, had taken their station.

Louis Napoleon then mounted on horseback and rode to the Hotel of the Prefecture, where he received in the usual way his universal and cordial cry of "Vive Napoleon!" The ladies were, if possible, more enthusiastic than the men, and from the windows threw flowers as he passed.

At seven o'clock, Louis Napoleon arrived at the Hotel of the Prefecture, where he received in the usual way his universal and cordial cry of "Vive Napoleon!" The ladies were, if possible, more enthusiastic than the men, and from the windows threw flowers as he passed.

of \$30,000,883, being an increase of more than \$7,000,000 over that of last year. At the port of New York alone they received \$24,375,012; increase over last year, \$5,740,631. It is remarkable that a large proportion of the revenues are collected at New York.

Sword Fish.—A few days ago on examining the barque Said Bin Sultan, in search of a leak, the vessel was penetrated through the copper and plank, and into the lining, having passed between two timbers. The fragment remaining in the vessel was about 16 inches in length. The blow was inflicted when the bark was crossing the equator, in her last voyage, and was distinctly felt at the time and noted in the log book. The fish was seen also, in a bleeding condition.

Several cases of a similar nature have occurred with vessels belonging to this port.—Salem Gazette. Miss Catherine Hayes.—This new candidate, whose vocal powers have created so much enthusiasm in Europe, will visit the country in September next, and will take the place in popular favor which the "Swedish Nightingale" will probably then have vacated. Mr. W. F. Brough announces himself as her next friend, in the United States, to transact any business on her account, until her arrival.—N. Y. Paper.

Lake Superior Matters.—The fine steamer "Northwestern" came from Sault last evening, with a full freight and a large number of passengers. She touched at the Bruce Mines and Mackinac, and brings very flattering accounts of the business prospects this season in the Northwest. The travel and trade to Lake Superior is rapidly increasing.

The receipts of copper at the Sault are large. The iron mines are beginning to yield their untold riches. Four fires are now yielding 20 tons of bloom iron per week. After a few weeks two fires will be added, and thirty tons per week made.

The Lake Superior Journal says, "We notice three new companies making preparations for carrying on the iron business with activity, and the beginning of another Pittsburgh success." The propeller Monticello is nearly over the portage and will soon be launched into the waters of Lake Superior. She will be the fourth in the line, and with the two large steamers, London and Northern, between the Sault and Cleveland.—Cleveland Herald.

DESTRUCTIVE FIRES IN CALIFORNIA.—Dates from San Francisco are to the 15th May. A terrible fire occurred in San Francisco on the 3d, having cost property variously estimated at from seven to fifteen million dollars. Among the buildings destroyed are the Custom House, Union, Parker's, National, New World, City, Delmonico's and the Exchange Hotel; also, Rose's Buildings, and the offices of the steamship company.

The fire also destroyed the shipping, burials, and the iron works, and the two large steamers, London and Northern, between the Sault and Cleveland.—Cleveland Herald.

"KEEP A GOOD LOOK OUT AHEAD."

Twas a wintry night, and the howling winds
Blew fiercely off the sea,
And the stork-bird's cry most sadly foretold
A wild, wild night at sea;
When a bark was seen on the crested wave,
Then hid in the ocean's bed,
And a stern cry, borne on the blast, was heard,
"Keep a good look out ahead!"

But, wearied and worn, the mariners slept,
And left her to her fate,
When a crash, which awoke them all, was felt:
But, alas, too late! too late!
For that wearied crew are now at rest,
Asleep in their ocean-bed:
Alas, how many are lost, for the want
Of a good look out ahead!

'Tis so with the soul, on the journey of life
To a safe, eternal home;
Man blindly and thoughtlessly hurries on
To a sure and fatal doom;
Submitting yielding to every sin,
By fiery passion led;
He founders at last, and all for the want
Of a good look out ahead.

Hark! look ahead!—It is a voice from the skies;
Confer not your gaze to time;
There are pleasures abhor more lasting than
These that thou must soon resign;
Forget not that thou hast a spirit to save,
An eternal death to dread;
Be sober and vigilant, ever awake;
Keep a good look out ahead.

The Toll Gate.

We are all on a journey. The world through which we are passing is in some respects like a turnpike—all along which Vice and Folly have erected toll gates, for the accommodation of those who choose to call as they go—and there are very few of all the host of travellers who do not occasionally stop a little at some one or another of them—and consequently pay more or less of the toll gatherers. Pay more or less, I say, because there is a great variety, as well in the amount as in the kind of toll exacted at these different stopping places.

Pride and Fashion take heavy tolls of the purse—many a man has become a beggar by paying them their dues—the ordinary rates they charge are heavy, and the road that way is none of the best.

Pleasure offers a very smooth, delightful road in the outset; she tempts the traveller with many fair promises, and wins thousands—but she takes without mercy; like an artful robber she allures till she gets her victim in her power, and then strikes him of health and money, and turns him off, a miserable object, into the very worst and most rugged road of life.

Intemperance plays the part of a sturdy villain. He's the very worst toll gatherer on the road; for he not only gets from his customers their money, but he robs them of their health and ruins their brains. The men you meet in their ragged and ruined in fame and fortune, are his victims.

And so I might go on enumerating many others who gather toll of the unwary. Accidents sometimes happen, it is true, along the road, but those who manage to get through at least tolerably well, you may be sure have been stopping by the way at some of those places. The plain common sense men, who travel straight forward, get through the journey without much difficulty.

This being the state of things, it becomes every one in the outset, if he intends to make a comfortable journey, to take care what kind of company he gets in with. We are all apt to do a good deal for our companions do—stop where they stop, and pay toll where they pay. Ten chances to one, then, but our choice in this particular decides our fate.

Having paid the toll, the prudent choice of companions, the most important thing is, closely to observe how others manage; to mark the good or evil that is produced by every course of life—see how those who do well manage, and trace the cause of evil to its origin in conduct. Thus you will make yourself master of the art of getting the most necessary to regulate your own conduct. There is no difficulty in working things right if you know how—by those means you learn.

Be careful of your habits. These make the man. And they require long and careful culture, ere they grow to be a second nature. Good habits I speak of. Bad ones are more easily acquired—they are the spontaneous weeds, that flourish rapidly and rankly, without care or culture.

The Beauty of the Sky.

It is a strange thing how little in general people know about the sky. It is the part of creation in which nature has done more for the sake of pleasing man, more for the sole and evident purpose of talking to him and teaching him, than in any other of her works, and it is just the part in which we least attend to her. There are not many of her other works in which some more material or essential purpose than the mere pleasing of man is intended; but in this part of her work, she has given us the most beautiful and every essential purpose of the sky might, as far as we know, be answered, if once in three days, or thereabouts, a great black ugly rain cloud were broken up over the blue, and everything wet watered, and so all left blue again until next time, with perhaps a film of morning and evening mist for dew. But instead of this, there is not a moment of any day of our lives, when nature is not producing scene after scene, picture after picture, glory after glory, and working still upon us exquisite and constant principles of the most perfect beauty, that it is quite certain it is all done for us, and intended for our perpetual pleasure.—*Modern Painter.*

Improvement in Chronometers.

Among the various difficulties which have stood in the way of chronological improvement, perhaps no defect has occupied so much time as the imperfect compensation for change of temperature, which has claimed the attention of some of the first mathematicians of the day, as well as those practically engaged in chronometer-making. The defect we allude to is this,—that if chronometers are adjusted for extremes of heat and cold, they will gain in the intermediate temperatures. This is caused by the balance-spring losing elasticity by an increase of temperature at an accumulating rate over the effect produced by the ordinary compensation.

Mr. Losby has introduced mercury to overcome this defect, which, by its fluidity, admits of being adjusted, so that its effect may vary exactly in the same proportion as the change of temperature alters the elasticity of the spring.

WELSH EMIGRANTS.

Over a hundred of these interesting people landed in Boston last week from the large "Ann Grant," Capt. Williams of Bangor, Wales. Their appearance was healthy, comfortable and neat. Few of them could speak English. They were well supplied with books and Bibles which they had been taught to read in the Sabbath Schools of their native land, before they left the ship, they held a prayer meeting, (as they had been wont to do daily on the ocean) for the last time to thank their prayers and praises ere they separated to meet no more. Some were going to the Slate quarries of Maine, others to the fertile prairies of Wisconsin. Such emigrants, with their simple ways, plain integrity and persevering industry, contribute to the prosperity of our country, and to the peopling of our mines—houses audacious.—*Boston paper.*

The London Morning Post gives the following statement, derived from the official returns of the Irish emigrants to the United States during the last four months:

In 1847,	142,164
1848,	188,233
1849,	219,450
1850,	223,078

Such is the enormous amount of emigration which has taken place during the period in question, the state of the American Union alone, exclusive of that which has been directed to our own Colonies, both in the western and the Southern world.

MAINE LEGISLATURE.

The Legislature of Maine adjourned on the 3d inst after a session of three weeks, to meet again on the 26th of January. Among the more important public acts of the Legislature, was the bill providing for the rebuilding of the Insane Hospital, and appropriating \$20,000 towards that object; and resolves appropriating \$20,000 towards the erection of the Reform School at Portland; \$50,000 to be paid to the State Prison at Thomaston; and specified amounts for the repair of various roads in Aroostook county. But the most important act of legislation, perhaps, was the passage of a very stringent liquor bill.

This law forbids the manufacture or sale of all spiritous and intoxicating liquors, except by authorized and licensed town agents, and only for medicinal and mechanical purposes. If any unlicensed person shall manufacture or sell these liquors he is subjected, for the first conviction, to a fine of \$100, and for the second and third to a fine of \$200, and for the third to \$500 and four months' imprisonment.

It authorizes the search of stores, &c., for spiritous liquors where there is reason to believe that such liquors are intended for sale without license, and the destruction of the liquor, unless proved to be imported and in the original packages in which it was imported. No person engaged in the sale of such liquors is allowed to sit on a jury in any case arising under this act; and all such cases coming before the Superior Court, are to take precedence of all other business except those criminal cases where the parties are actually under arrest and awaiting trial.—*Traveller's Friday.*

TO OWNERS OF AND DEALERS IN HORSES.

CARLTON'S FOUNDER OINTMENT.

For the cure of Founder, Spilt Hoof, Crooked heels, Bruises in the Flesh, Galled Backs, Crack Heels, Scratches, Cuts, Kicks, &c., on horses.

RING-BONE CURE.

For the cure of Ring-Bone, Blood-Spavin, Bone-Spavin, &c. This Ring-Bone Cure and the Founder Ointment are prepared from the recipe of a very celebrated English Farrier, and will cure in ninety-nine cases out of one hundred, all the above complaints. They have been used by Farmers, Livermen, Stage Proprietors, and others, with the most marked and decided success.

DR. LAZETTE'S JUNO CORDIAL.

Or Procreative Elixir, prescribed as an effective restorative in cases of Debility, Impotency, and all irregularities of nature. It is all that it professes to be, viz. Nature's Great Restorative, and generally for those in any of the above complaints. It is a certain cure for Seminal Emissions, General Debility, Gleet, Weakness of the Genital Organs, Nervous Affections, &c. &c. As a vigorous tonic, remedy for Incipient Consumption, Indigestion, loss of Muscular Energy, Physical Lassitude, Female Weakness, Debility, &c. It is warranted to please the user in any of the above complaints, and is of priceless value to those without offering.

SOLE PREPARED AND BOTTLED BY DR. LAZETTE'S JUNO CORDIAL.

Or Procreative Elixir, prescribed as an effective restorative in cases of Debility, Impotency, and all irregularities of nature. It is all that it professes to be, viz. Nature's Great Restorative, and generally for those in any of the above complaints. It is a certain cure for Seminal Emissions, General Debility, Gleet, Weakness of the Genital Organs, Nervous Affections, &c. &c. As a vigorous tonic, remedy for Incipient Consumption, Indigestion, loss of Muscular Energy, Physical Lassitude, Female Weakness, Debility, &c. It is warranted to please the user in any of the above complaints, and is of priceless value to those without offering.

FOR THE HAIR.

If you wish a rich, luxuriant head of Hair, free from dandruff and scurf, do not fail to procure the genuine Balm of Columbus. In cases of baldness, it will more than exceed your expectations. Many who have lost their hair for twenty years, have had it restored to its original perfection by the use of this Balm. Age, state, or condition, appears to be no obstacle whatever; it also causes the hair to flow with rich, healthy, and glossy curls, which means health and beauty for the hair.

SICK HEAD-ACHE REMEDY.

If you suffer with that distressing complaint, when a remedy is at hand, it will not fail to cure you. This remedy will effectually destroy any attack of Head-ache, either chronic or acute. It has cured cases of twenty years standing.

DR. LAZETTE'S ACUSTIC OIL.

For the cure of Deafness, Stomachic, Indigestion, &c. It is composed of essences of plants, faling of water, whiting of steam, which are directed from within, for facilitating which galleries are provided at different parallels of latitude.

The Diet of Sweden has voted a sum of nearly three thousand pounds to send one hundred of their best workmen to London. The King has also sent a large party at his own expense.

VICTORIA HOUSE,

Prince William Street, Saint John, N. B.
MARCH 15, 1851.

FIRST SPRING IMPORTATIONS,

Per Steamship "EUROPA"—Thirteen Days from England.

Great Reduction in Prices.

JAMES DOHERTY & CO.
British and French Importers,

Big leave to inform the public that they have received the first part of their SPRING GOODS—consisting of

SHAWLS.
An IMMENSE STOCK OF LONG & SQUARE SHAWLS, Newest and most superior styles, in RICH FILLED PAISLEY, FRENCH BROCH, CASHMERE, MERINO, THIBET, GALA, and ALL Wools.
NEWEST STYLES in SPRING BONNETS; New British and French Bonnet and Cap RIBBONS;
BRITISH and FRENCH RICHEST SATINS and SILKS, in Watered, Brocade Figures, Stripes, Plaids, and all new Colourings, Patterns, and Black;
RICH SILK POPLINS, most fashionable colorings;

Astonishing Efficacy OF HOLLOWAY'S PILLS And OINTMENT.

EXTRAORDINARY CURES BY Holloway's Ointment.

CURE OF A DESPERATE CASE OF ERYSIPELAS. Copy of a Letter from Mr. Joseph Gildon, Jun., a Farmer, East Kent, near Spisbury, Lincolnshire, 8th April, 1851.

To PROFESSOR HOLLOWAY, Sir,—I have the gratification to announce to you a most wonderful cure wrought upon myself by the use of your Ointment and Pills. I had a severe attack of Erysipelas in my right foot, which extended along my ankle, and was attended with swelling and inflammation to an alarming degree, inasmuch that it was unable to move without the use of crutches. I consulted a very eminent Physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, which, strange to say, in less than two weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocation, to the entire surprise and amazement of those who were acquainted with my case; so that I was cured so quickly. I and my family are well known here, as my father holds his farm under the Rev. J. Spence, Rector of the Parish of Spisbury, East Kent.

Amputation of Two Legs Prevented. Extract of a Letter dated Haslemere, February 25th, 1851, by the most respectable Professor of the "Roscomjohn" Journal.

To Professor Holloway, Sir,—Mr. Ryan, the well known proprietor of the Hotel next door to me, had two very bad Legs one with eight ulcers on it, the other with three which were in such a fearful state that the effluvia from them was very great. Some time since he made a journey to Dublin for the purpose of consulting some of the most eminent professional men, but returned home to his family with the choice of two alternatives—to have both Legs amputated, or die.—On his way home he met a gentleman in the Coach who recommended the use of Holloway's Pills and Ointment, which he had recourse to, and was perfectly cured by their means.

Bad Debility, with extreme Weakness and Debility.—an extraordinary Cure.

Mr. J. GARDNER, of No. 9, Brown street, Grosvenor square, had been in a very bad state of health for a long time, suffering much from a distended Stomach, very impaired digestion, with constant pain in his Chest, was extremely nervous, and so greatly debilitated as to be scarcely able to walk one hundred yards during the long period of his declining health. The advice of four of the most eminent Physicians besides the Surgeon of the greatest celebrity in London, from whose aid he derived no benefit whatever. At last he had recourse to Holloway's Pills, which he declares effected a perfect cure in a very short time, and that he is now as strong and vigorous as ever was in his life. This being so extraordinary a case, may lend more credence to the efficacy of this medicine, it may therefore be necessary to say that Mr. Gardner is a broker, and well known.

Cure of a Desperate Scorbatic Eruption of long standing.

Extract of a Letter, dated Wolverhampton the 10th of February, 1847, from Mr. Simpson, Stationer.

Sir,—Having been wonderfully restored from a state of great suffering, illness and debility, by the sale of others to make my case known to you, for the last two years I was afflicted with a violent Scorbatic Eruption, which completely covered my chest, and other parts of my body, causing such violent pain, that I can in truth say, that I was not able to get sleep for more than a very short time together. I applied here to all the principal Medical men, as also to those in Birmingham, without getting the least relief; at last, was recommended by Mr. Thomas Simpson, Stationer Market-place, to try your Pills and Ointment, which I did, and I am happy to say, that I may consider myself cured, and I can now get sleep all the night through, and the pain in my back and limbs have entirely left me.

It is all Diseases of the Skin, Bad Legs, Old Wounds and Ulcers, Bad Breasts, Sore Nipples, Stony and Ulcerated Cancri, Tumours, Swellings Gout, Rheumatism, and Lumbago, likewise in cases of Piles; Holloway's Pills in all the above cases, ought to be used with the Ointment and not alone. The Ointment is proved to be a certain remedy for the bite of Mosquitoes, Sand-flies, Chigoeft, Yaws, Coco-bay, and all Skin Diseases common to Europe, the East and West Indies, and other tropical climates.

Burns, Scalds, Chilblains, Clapped Hands and Lips, also Bunions and Sore Corns, will be quickly and completely cured by the use of the Ointment.

Sold by the Proprietor, 244, Strand, near Temple Bar, London; and by PETERS & TILLEY, Provincial Agents, No. 2, King Street, St. John, N. B.; James P. Galt, Fredericton; W. T. Baird, Woodstock; Alexander Lockhart, Quaco; James Beck, Bend of Pettaquamscutt, O. C. Sayre, Dor; S. J. Bull, Shediac; J. J. Lewis, Hillsborough; John Curry, Canimog; James G. White, Belleisle; in—Pots and Bays, at 1s. 9d. 4s. 6d. and 7s. each. There is a very considerable saving in taking the larger sizes.

N. B.—Directions for the guidance of patients are affixed to each pot.

TO LET.
