were conspicious among the crowd. A football match between soldiers and civilians was pulled off in the afternoon, which resulted in a score of 2-1 in favor of the civilians. In the afternoon the presentation of wrist watches to our three soldier boys, Gordon Kelsey, Gerald Botsford and Lloyd Kirkland took place accompanied by the following address:-

To Privates Kelsey, Botsford, and Kirkland:

Dear Boys:-We your friends and neighbors assembled here this afternoon, having learned of your intended departure from our midsy. We all are proud that you have donned the khaki and so nobly and courageously respon ded to the call of your country by enlisting in our home battalion of Leeds and Grenville. We realize that you will bring credit and houour to your native land and yourselves.

By this noble act you are showing vou recognized that this is Canada's war and you have also shown you considered there is something better and higher in life than home comforts and material things you, boys of your type are winning and will win a name which Kelly. will be honorably remembered for generations to come. Gordon, Gerald and Llovd we will often think of you and follow with the greatest interest the achievements of the Athens squad. We feel as though we cannot let you leave this section without showing in some degree the high regard in which you are held. We take great pleasure in presenting these wrist watches and we assure you that the very best wishes of your friends and neighbors will accompany you overseas.

Signed on behalf of your friends and neighbors. Flossie Hefferman

THE SALAD BOWL.

Interesting Discussion About This Health Giving Entree.

Salads are capable of infinite variety, so when fish and cheese fail vegetables which approach animal foods in nutrition may be served, and cither the oil in the dressing or the fat in the cream or melted butter of a boiled dressing may be depended upon to supply th necessary oil. Try a bean salad. A pound of this vegetable contains as much protein as is found in half a pound of lamb chops or half a dozen eggs. Cool freshly boiled limas, also some rice (dried in the oven un and bone states (dired in the oven dif-til the grains separate), salt slightly and mix them in equal quantities; fold in some stiff mayonnaise and sold in some stift mayonnaise and serve very cold in lettuce cups. Peas and lentils, which are so rich in pro-tein, are very desirable for salads in place of meat. Cover two cupfuls of cold baked beans with French dress-ing and let stand a half hour; drain, sprinkle with half a teaspoonful of onion dice mix with come draceing onion juice, mix with cream dressing, arrange on lettuce leaves and garnish with parsley and hard cooked eggs. Lentils combined with onions, peppers bottle of will and parsley and served on cress with wrappings?

French dressing make a hearty and asty salad. A fruit salad has the advantage of being very healthful, for nearly all fruits hold acids and salts in solution which are cooling to the blood, and there are so many fruits available that none needs to become thresome. Pears as a soled once the will appear as a salad, once tried, will appear often this way: Peel large pears, haive them, remove the cores and drop them into coid water in which is a table-spoonful of vinegar to keep them white. Fill the core cavity with either grated cheese or cream cheese balls and serve on lettuce with French.

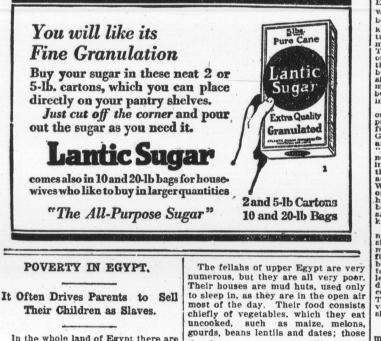

dressing. When mayonnaise is used with fruits leave out the mustard and pepper, put in a little sugar and use lemon instead of vinegar. In no case should a boiled acid dressing be used with fruit salad.

which I can vouch. A Parisian petite bourgeoise, who, being half a Lorrainer, knows German, was traveling in the tube. In the same carriage, were two men in the uniform of British otifeers. They spoke in a low voice to one an-other. She does not know English, and though they might be speaking English, but one or twice they spoke fouder, and she thought what they said sounded re-markably like German. She noticed both men particularly, as both were strik-ing looking and handsome. At one station a fat, heavy man got out and trod on the toes of one of the german. The French-woman was more and more interested. When the two British" officers got out at a station mear the Etolle a cistance. They went it to a small: low-class lodging-house near the Porte Maillot. She took note of the address and looked for a policeman. When she found one he washed his hands of the whole thing, and said he could have nothing to do with spies; she had better be to the nearest police commis-sary. She did so, and reported what she knew.

In the whole land of Egypt there are now only two cities. Alexandria and Cairo. Yet once Egypt was the grandest country of the world, having as many as 200 cities. but these have been all long swept away or covered with the sand of the desert.

In these two cities, Alexandria and Cairo, all the principal people of Egypt reside, while in the country districts up the Nile there are no towns and hardly any villages, but only scattered settlements of peasants, who are call ed fellats or fellahin.

ed feliabs or feliabin. These feliabs, though of the same Arab race and religion as the people of Cairo, are very different in most other ways. Instead of the turban, the flowing robe and the gay slippers, which the men of the city wear, we see only a half clad figure with matted hair and skin blackened by the sun; instead of the velled lady in a robe of silk, here is a poor woman with naked feet in a dress woven of grass. One thing, however, both use in common-a

that have a cow can get milk, and all can get fish. Meat they seldom taste, and their bread is only a half baked paste of bruised maize or millet. Rice is too dear for them. One luxury, how ever, all the men-and women, too-manage to get whatever else they go without-that is, the ever present long

wooden tobacco pipe, smoking. The poverty of many fellahs is so reat that a family of children is often a great burden to the parents. Many cases yearly occur of parents selling their children as slaves to ϵ scape from the expense of their support

A parent will sometimes make a long journey to Cairo to get rid of his young children. Some time ago a woman brought to a rich lady of that city an infant, which she said she found at the door of the mosque. The lady said she would take the child and adopt it and handed the woman a small sum as a reward for her trouble in bringing the child. The woman refused the offer blushed and withdrew. She was the child's own mother.

In 1889 a hunter in the northwest of New South Wales wounded a kangaroo. The animal went off through

the mulga and the salt bush at a pace too fast for the hunter to follow and was soon out of sight. The hunter was a bushman and did not despair. He followed the blood trail, hopeful of a short search and a speedy bag. At one pint of the pur-suit it may be that the trail grew faint and necessitated a closer inspec-tion. Anyway the hunter stopped and picked up a piece of stone. This he examined. The red spot was not on it; it was in it. It was not blood that he saw. It was opal. Such was the beginning of the White Cliff's opal fields.

The date for this has not yet been fixed.

An army order was issued to-night for all officers to wcar mourning in memory of Lord Kitchener for a week, commencing to morrow.

• In connection with suggestions that information of Earl Kitchener's movements may have been conveyed to the Germans by spice, it is inter-esting to note that the Official Gazette last night contained an order placing new restrictions on passen-gers landing at ports in the Orkney Islands. Henceforth no person may land at such ports without specific permission of the military authorities at Kirkwall. WHOLE KINGDOM AFFECTED.

Reports from all parts of the king-dom, from the biggest cities to the thiest hamlets, reflect the deep and painful sensation caused by the Kitchener tragedy. Flags were flying at half-mast everywhere. Among those who sent telegrams of condolence were the King and Promier As-quith. Public bodies passed resolutions expressing profound grief, in which there was generally included the determination to prosecute the war until a favorable peace may be concluded. Tributes to Lord Kitch-ener's life and work were paid wherever people met. The neutral Ambas-sadors and Ministers expressed their formal condolences and warmly voiced their appreciation of Kitch-ener as a man, while the envoys of the allied Governments were also eulogistic in his untiring efforts in be-half of the Entente cause and his achievements in raising a new army.

The King, who was absent from London, returned immediately upon learning the news. One of his first acts was to send a telegram of con-dolence to Lord Kitchener's sister, Mrs. Parker. Soon after receiving Premier Asquith he received General Sir William Robertson, and also Lord Kitchener's private secretary, Sr George Arthur, through whom he sent messages of sympathy in behalf of himself and the Queen to Kitch-

ener's family. Premier Asquith was greatly shocked by the news, as apart from his official connection with the dead War Secretary, he was the latter's close personal friend. Numerous tributes to Lord Kitch-

The Archbishop of Canterbury said: "His life was laid down for the cause in which we were all striving to do cur part in prayer and resolve, so it may bring about something better than we have been in the past."

Earl Kitchener met death at moment which will ensure his posi-tion in British history. He was al-most the only member of the Government who from the beginning confi-dently asserted that this would be a long war—his lowest estimate was three years—and he insisted that the Government should make its plans accordingly. The organization of the enormous new British army is well under way. The general staff, under General Sir William Robertson's direction, according to the belief, has well in hand the task of working out the details which Kitchener's brain was largely instrumental in planning and aunching.

GERMANS EXPELLED.

The Baltic Exchange closed when the news of Lord Kitchener's death was received. On the stock exchange, where business was suspended when the announcement came in, no news since the outbreak of the war caused since the outbreak of the war caused such bitter feeling against the German members. While most of the mem-bers of German birth were expelled some months ago, a few who had sons fighting at the front were allowed to remain. To-day the members, after the close, met and passed a resolution asking the committee publicly to ex-pel all the German members.

"The most miserable feature of the Verdun afair is that the price at stake is the heritage of the Hohenzollerns. Hundreds of thousands of French and Germans are sacrificed striving for a prize which, according to all authoritles, is of no military value whatever, that the Crown Prince may be made a Marshal of the Emperor on the field of Verdun, and, bathed in their blood, then have permission to return to Berlin

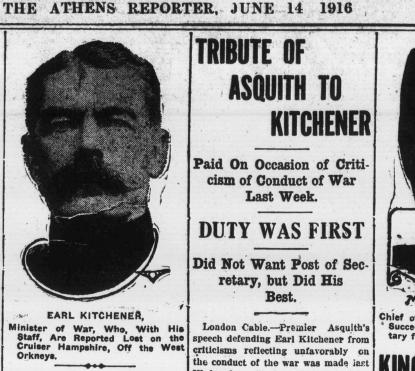

"From my personal knowledge of conditions, I believe that all the German armies may be concentrated on the task. While by sheer weight they may momentarily hold advanced points of defence, they will never reach Verdun. Never!"

Kitchener had frequently crossed the seas since the outbreak of the war. He often went to France, and made one trip to the Dardanelles. His intentions at that time were known by many several days before

his departure. If it had been possible for spies to report his plans, it is believed it would have been done then.

GREATEST SOLDIER HAS CONE. While only a few days ago Kitch-cner had hundreds of enemies who freely criticised his actions, it is certain to-day that the entire nation recognizes that its greatest soldier has gone. Even his most violent opponents admit that he worked more than any other man since the first day of the war for the success of the British arms. All agree that he silenced argument. When beckled in the Commons he insisted that it was not advisable to divulge military affairs to the public, but declared himself willing

to receive all members privately and reply to all questions. His hecklers were unanimous in declaring after their conferences with Kitchener that he satisfied everyone.

A high official who frequently voiced the most strenuous opposition to the War Secretary told the corre-spondent that the whole British En-pire will recognize that it has lost a very great man. He continued: 'Kitchener gave his life to his country as much as any soldier killed on the battlefield. PLANS FOR IRELAND.

Lloyd George's Proposals Are Likely Lyn were visitors at Mr. J. A. Herbi to Go Into Effect. It gives the proposals of Mr. Lloyd Goerge, formulated on his own responsibility as a result of his consultations with all the parties, which may be regarded as the Government's proposals.

The proposals were: "First, to bring the Home Rule Act into immediate operation; second, to introduce forthwith an amending bill

as a strictly war emergency act; third, that during the interim the Irish members were to remain in Westminster in their full numbers; fourth, that during the war emérg-ency period the six Ulster counties should remain under the Imperial Government; fifth, that immediately after the war an Imperial conference of representatives of all dominions be held to consider the future gov-ernment of the Empire, including the government of Ireland; and, sixth, that following this conference and in the interval provided by the War Emergency Act a permanent settling of all great outstanding problems would be proceeded with. Passing Souls.

This beautiful hymn. Passing Souls, has been adoptel for use in his Majesty's Chapels Royal. The words are by Constance Lady Coote.

For the passing Souls we pray. Saviour, meet them on their way; Let their trust lay hold on Thee Ere they touch Eternity.

Holy counsels long forgot Breathe again mid shell and shot Through the mists of life's last pain None shall look to Thee in vain.

To the hearts that know The Lord, Thou wilt speak through flood or sword; Just beyond the Cannon's roar, Thou art on that further Shore.

For the passing Souls we pray,

Russians Now Hold Great Triangle in Volhynia.

Irresistible Advance of Czar's Armies Has Resulted in the Capture of 108,000 Austrian Prisoners and Hundreds of Cannon Within a Week-Dubno and Dovno in Russian Hands.

PETROGRAD, June 12 .--- Unchecked in their mighty rush against the Austrians, the Russians are sweeping forward in Volhynia and Galicia. In the latter sector, after capturing Buczacz, the important railway town on the west bank of the lower Stripa, regarded as the strategical gateway to Bukowina, and smashing the encmy lines along the Stripa and Dniester, General Brusiloff's troops are moving on the Gnita Lipa, 12 miles west of the Zlota Lipa at Potok, and are seriously threatening Lemberg. At sev-eral points the Austrians' defence has crumpled completely and their retreat has become almost a rout. The town and fortress of Dubno,

miles from the Galician frontier. fell into the hands of the Russians Sunday. With it the Czar's forces are again in the possession of the Volhynian fortress triangle, consist-ing of Lutsk, Dubno, and Rovno. Dubno, which had been in the hands of the Austrians since Septem-har J hast his on the Rowno Body.

ber 7 last, lies on the Rovno-Brody-Lemberg railway, and is about 82 miles from the Galician capital.

Simultaneously with the drive in Volhynia the exertme left wing of the Russian southern army forced the Austro-Hungarians to withdraw their whole line in north-east Bukotheir whole line in north-east Buko-wina, and advanced to within only 16 miles of its capital, Czernowitz. The Austrian War Office admits the withdrawal of the lines in north-eastern Bukowina

The Petrograd official stories of the fighting, as contained in the com-munications of Saturday and Sunday make interesting reading.

"Our offensive in Volbynia, Galicia and Bukowina obtained fresh successes yesterday. The enemy armies continue to suffer enormous losses in prisoners alone," say the War Office reports.

"Troops under General Brusiloff, fighting with enemy rear guards, have crossed the River Styr above and below Lutsk. The forces which crossed the river are pursuing the enemy, who is endeavoring to hold his position in the rear.

"In Galicia north-east of Tarnopol, in the regions of Gliadki and Tsebroff, heavy fighting is proceeding for the possession of heights which have changed hands several times.

"The piercing of the enemy front in the region of the Stripa has resulted in our occupation of a fortified position on the east bank of the hed position on the east bank of the river. At dawn to-day our troops entered Buczacz, and, developing the offensive along the Dniester River, carried the village of Scianka. In the village of Potok Zlota we seized a large artillery park and large quan-tities of shells.

"The fierce attacks of our troops are throwing into our hands thou-sands upon thousands of prisoners and booty of all kinds, the exact esti-mation of which is as yet impossible

"During Friday's fighting we cap-tured 97 officers, 5,500 men, and 11 guns, making the total up to the present 1,240 officers, about 71,000 men, 94 guns, 167 machine guns, 53 bomb mortars, and a large quantity of other war material.

"During Saturday's fighting we took as prisoners one general, 409 officers, and 35,100 soldiers. We also captnred 30 guns, 13 machine guns, and five bomb throwers. This makes the total trophies in the recent operations one general, 1,649 officers, and more than 106,000 soldiers, and 124 guns, 180 machine guns, and 58 bomb throwers. "In a single sector on the enemy front we captured 21 searchlights two convoys, 29 field kitchens, 47 trains of machine guns, 12,000 poods of barbed wire (a pool is equivalent to 36 pounds), 10,000 concrete planks, 7,000,000 cubes of concrete, 10,000 poods of coal, enormous pots of ammunition, and quantities of arms and other material. "In another sector we captured 30,000 rifle cartridges, 300 boxes of machine gun cartridges, 200 boxes of hand grenades, 1,000 useable rifles, 4 machine guns, 2 range finders, and a Norton portable pump for the ex-

and gesticulating; the Italian was unruffled and listening to what the other was saying.

"Lizette," said the mistress, "I have been calling you for some time." "Yes, madame. I didn't hear you, madame. Mrs. Carrington returned to her room, followed by Lizette. As soon as

they were alone together the mistress "Lizette, of course what goes on be-

"She does not interfere, madame." was the almost inaudible reply.

Mrs. Carrington was puzzled. She said no more, but kept up a good deal of thinking about this strange status between the two maids. Had it been between Lizette and the butler would not have been surprised, for a concealed love is a common mystery. But the lady could not understand any relationship between two girls that needed to be kept secret.

One evening when Mrs. Carrington was dressing for a function calling for her most resplendent adornments she sent Lizette for her jewels. They were kept in a safe set into the wall. Mrs. Carrington and Lizette were the only two persons who knew this combination. Lizette went to the safe. opened it, but when she looked in the box containing the jewels they were not there.

Mrs. Carrington, hearing something fall and Lizette not returning with the jewels, went into the hallway and saw the girl lying in a heap before the safe. Running to her, she picked up Lizette, who, at the same time came to herself and looked with terrible distress at the empty jewel box lying on the floor beside her. Mrs. Carrington took in the situation at once.

The lady on this occasion exhibited great presence of mind. She closed the safe door and turned the combination to lock it. Then she raised Lizette and supported her, taking the jewel box with her, to her own room and, locking the door, placed her on a lounge. No suspicion of Lizette was entertained, for she had evidently met with a surprise. She said that she had never given the combination of the safe to any one.

Mrs. Carrington went to a telephone booth and rang up a detective agency, giving the chief a brief statement of the case. He advised that the loss of the jewels be kept a secret, and it was arranged that Mrs. Carrington should add to her staff of language instructors a German, who should really be a detective.

Mrs. Carrington gave out to the household that she had become suddenly indisposed and kept her room, Lizette remaining with her. The next morning the mistress was relieved to learn that none of her servants had disappeared. After breakfast Professor Sweitzer appeared, and it was announced that he would remain a short time in the house to ground Mrs. Carrington in the rudiments of the Ger man language.

He had a private conversation with Lizette, and after it was finished told her mistress that she knew who had taken the jewels, but would not peach. The next item of news he gave his employer was that Bianca was a man.

Mrs. Carrington, as soon as she had recovered from her astonishment, saw through the strange status between her two maids. The man had doubtless revealed himself to Lizette and had very likely made love to her. Both she and the detective felt sure that the so called Bianca had stolen the jewels. and the question was how to prevent his knowing that the theft had been discovered and his slipping away be-

Languages said. For the Purpose of a Sojourn Abroad By LOUISE B. CUMMINGS

"Lizette" said Mrs. Carrington to her maid, who was dressing her hair, "I expect to go abroad in the autumn. I shall go first to Italy, then to Switzerland, then to France. I shall get on very well in France, because I have learned to speak the language in talk-ing with you. I have been studying Italian, but in order to converse in that language I need practice in it such as I have had with you in French. I am thinking of getting another maid for that purpose. Not to interfere with you, she will have the care of my wardrobe and wait upon me when you are otherwise engaged." "Will you give her the care of your

jewels, madame?"

"Not at all. You will remain in charge of them. I have perfect confidence in you and would not think of intrusting them to the care of any one else.'

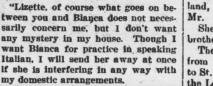

This announcement was to prepare Lizette for the coming of one she might otherwise think was intendeed to take her place. Mrs. Carrington ap-plied to her Italian teacher to furnish her with a woman who would accept a maid's place, but who could speak Italian more correctly than one usually occupying a menial position. He promised Mrs. Carrington to interest himself in the matter.

In due time a young woman appeared with a note from Signor Speretti, the Italian teacher, introducing her and vouching for the correctness with which she spoke the Italian language. Her name was Bianca Morelli. She seemed rather younger than the age she gave, which was twenty-two, not appearing to be more than eighteen. Instead of having the black hair and eyes usual to Italians, she was a blond. Since Mrs. Carrington needed her to converse with and Signor Speretti vouched for her pronunciation and general knowledge of the Italian lan-

guage she was engaged. Indeed, Bianca was found not to be of much use for any purpose except that for which she was especially needed. She had nothing to do with her mistress' toilet: that was attended to by Lizette, but when called upon to bring some article of clothing she manifested a singular obtuseness. On one occasion when told to bring a tea gown she brought a bath robe. On another, when the Italian was called upon for a brassiere, she handed in a brush and comb.

Lizette laughed at the girl for her stupidity, but her mistress believed that Bianca had not been brought up with well to do women. She had doubtless associated with those who wore only the plainest clothing. But Mrs. Carrington could not understand, if this had been her condition, how she could speak the language of a well bred person. Bianca explained by saying that she had never had a sister; that her parents, though they had been well to do persons, during their childhood and youth could not give her the variety of dress enjoyed by other girls of her class.

Bianca had not been long in the house before her mistress began to notice that the relations between her two maids had changed. Lizette had at thizing with her stupidity as to her duties and instructing her in them. All of a sudden her manner toward her fellow servant changed. The freedom with which she had treated her disappeared and was replaced by a reserve. Then, too, she was at times inclined to speak harshly to the Italian, while at other times she would seem singularly complacent.

traction of drinking water. "The capture of such enormous war materials prepared by the enemy for various operations affords proof of how opportune was our coup against the enemy.

"Among the various episodes may be noted the plucky struggle of our young formations near Rolitche, on the Styr near Lutsk. Here the Ger-mans attempted to render assistance to the Austrians, but by our infantry attack, delivered under cover of heavy artillery, they were dislodged from the town, losing over 2,000 prisoners, two guns, and some machine guns. Our troops pursued the retreating Germans. "Our forces operating in the region

of Dubno (one of the fortresses comprising the Volhynian triangle) captured the town and fort and are on the enemy's heels. Some Russian detachments crossing the Ikwa River have developed their offensive. part of the Russians occupied the re-gion of the village of Damidovka, on the Mylnoff-Berestetchno road, forcing the enemy at his Mylnoff point of support to surrender. Besides dislodging the enemy from his prin-cipal position north of Boutchatche we made many prisoners there, including the staff of an Austrian bat-talion, and also took a great guantity of arms."

Mrs. Carrington one day spoke to Lizette about this change. "Lizette," she said, "I know the dif-

ficulties of servants constantly under the same roof getting on with each other, but I do hope that you and Bianca will not disagree. I am rapidly be coming able to give her orders and understand what she says to me in Italian. Now, if you and Bianca quarrel I shall have to send her away, and that will be the end of my practice in Italian. Try to get on with her for the few months that remain before we go abroad."

This brought no explanation of the status between the two maids." Lizette did not admit that there was any ill feeling on her part for Bianca, and she did not deny that there was. She was "doing" her mistress' hair when the subject was broached and went on brushing the glossy locks without a word. But Mrs. Carrington saw by reflection in a mirror before her that her maid was perturbed by what she had said and was evidently concealing something.

Mrs. Carrington was more interested in keeping her two maids on amicable terms than in ferreting out the cause of this singular change that had come between them. Nevertheless she noticed that Bianca seemed to have an influence over Lizette. On one occa sion, when the mistress had called Lizette without getting a reply, she went to the servants' quarters to see what was the matter. Opening a door without warning, she came upon the two maids in earnest conversation. The French girl was talking rapidly

fore he could be secured. He showed apprehension on the introduction of Professor Sweitzer into the household but no sign of intended flight.

The practiced eye of the detective was not deceived in the Italian's make up, though it had deceived every one in the house. Of course, this fact being known, no other evidence was re-quired that he was the thief. The professor not only kept his knowledge from the household, but disarmed any suspicion the rascal might have that his sex was suspected. This he did because he wished to recover the stolen jewels as well as the criminal. However, no time was lost. Calling for a couple of assistants the detective arrested Bianca. Of course the Italian knew that his game was discovered, and it was all up with him. Without putting his accusers to the trouble of making an examination he confessed that he was a man; that he had learned of Mrs. Carrington's desire for an Italian maid and had disguised himself for the purpose of securing the situation and plunder. He had got Lizette under his influence and concealed himself behind her when she opened the safe, thus learning the combination. He h: 1 taken the jewels during the night before the loss was discovered and was watching for an onportunity to get away with them. They were concealed where they would not be easily found, and Mrs. Carrington decided not to prosecute him if he would give them up. This he did, and. so far as she was concerned, he was not troubled.

When Mrs. Carrington went abroad she took Lizette with her, having forgiven her for having been captivated by the Italian, which was her only sin, for she was not suspected of any complicity with his dishonesty. Her mistress was enabled to call for what she wanted in Italy and understand, in a measure, what was said to her. She prized the little Italian she had learned from "Bianca." inasmuch as it had nearly cost her her jeweis.

June 11, 1916 The Philippian Jailer.-Acts 16: 16-40 COMMENTARY-I. An evil spirit cast out (vs. 16-18). / Evil spirits undertook to testify of Jesus during his earthly ministry (Mark 1;24; 5;7), and he was unwilling that the declaration of his Messiahship should be made by demons, so he cast them out. The demon-possessed girl in Philippi undertook to declare the reliability of the apostles as religious teachers, and Paul, in the name of Christ, commanded the evil spirit to come out of her. The apostles were unwilling to have such witness borne to their mission. The young woman was cured of her malady, and this was the occa-sion of a bitter outbreak against the

PRACTICAL SURVEY.

Topic.-Apostolic ministry defined. I. By the statement of a slave girl, II. By an overruling Providence. III. By a converted Roman jailer.

i, By the statement of a slave girl. This lesson presents a remarkable example of the champions of faith and falsehood and the characteristics of each. The apostles appear as men of each. The apostles appear as men of transparent integrity, living for one object, the presentation of truth to men for their present and eternal good. The masters of the slave girl represent self-interest in arms against the truth. The message of the apos-tles was directly antagonistic to pag-anism and idolatry, and they were right in guarding it against all peril-ous association. Paul had to dissoci-ate the conjurer from Christianity to prevent the gospel from being regard-ed at Philippi as another form of di-vination. Paul was grieved to see a human being the victim of demoniacal power; to see the malignant design with which her testimony was given and to see the sordid motives of the masters of the girl. Paul did not act from immilse but unon the meta-

This is the way women everywhere are talking about Dr. Chase's Nerve Food. Seldom has any treatment ever aroused so much favorable comment. While natural and gentle in action, this food cure is wonderfully potent in building up the rundown system. Ask your friends about it and put it to the test when found that I was sleeping better and in need of restorative treatment.

Where the soil is properly tilled and where the soli is properly tilled and attention given to a suitable rotation of crops, weeds are of little conse-quence. The Farmers Cyclopedia of Agriculture says the possibility of a hyperbolic granth and and and and a subuxuriant growth of weeds simply furnishes an urgent reason for thorough tillage of the soil, and the result is seen in better crops of cultivated plants.

In gardens, cultivation and handpulling are the sovereign remedies for weeds. In lawns, annual weeds may be destroyed by repeated mowing. Perennial weeds may be eradicated by digging and pulling and by sowing

planted in rich, mellow soil in either spring or fall. Poor soil should be made rich by spading out at least three foeting of the surface, filling with well-rotted manure to within one foot of the level, throwing in the top soil, setting the roots with the crowns four induces below the surface and firming them with the feet. The stalks should not be cut for use until the second year. See that the plant does not want for water when it is making its near the formation of the second

making its neavy leaf growth. In fall, coarse manure should be thrown over the crown, to be forked when spring or spaded in lightly sorens. Cultivation will not be neces-sary throughout the summer if a mulch is placed over the ground on each side of the plant. The great

more and better grass seed. Weeds in grass lands are to be crowded out by securing a thick sod. If the grass seeds is impure and the stand of grass is poor, it may become necessary to plow and reseed.

In cereal and other field crops the use of horse-power weeders has been attended with good results. Where a rational rotation of crops is followed, weeds seldom obtain a foothold. Special attention should always be

given to waste-places and roadsides in order to prevent weeds from going to seed in such localities Many weeds may be destroyed by

repeated cutting before the seeds have become mature. If, for example, the exeve daisy is cut within ten days after blooming it will be prevented from esecding.

In recent years extensive experiments have been made in destroying weeds by means of chemicals. At the Rhcde Island station it was found that common sorrel could be gradually driven out of acid soils by liming. Lime increases the yield of timothy, orchard grass, brome grass and clover, but greatly checks the growth of tut greatly checks the growth of sorrel. This may be accomplished by applying five tone of air-slaked lime per acre, followed by an application of three tons per acre during the next year. In North Dakota it was found that nearly all the annual weeds commonly found in grain fields could be killed by spraying with copper sul-phate without injuring the grain. About one barrel (30 to 60 gallons) of a solution of copper sulphate in the proportion of one pound to four gal-

Icns of water is required per acre. This application is not effective in Ary weather. Spraying should be done when the young weeds are just out of the ground, while the grain stands from five to ten inches high. Experiments in Vermont showed that the various species of wild mustards could be cheaply destroyed in this manner A number of other chemicals have been tested in spraying weeds, but but

It May Mean Wrecked Nerves and Not a Disordered Stomach.

"I suppose that there is no more in eradicable idea in the mind of the doc-tor than that the furred tongue is essentially an indication of a deranged stomach," writes Sir James Goodhart, consulting physician to Guy's hospital, Lendon, in the London Lancet. Yet, ac cording to Sir James, it is by no means always so. And he goes on to prove it by cases in his own extensive prac-

Always so. And he goes on to prove it by cases in his own extensive prac-tice. One of these was of a man in a very responsible position, a leader of men, to whom he had to give orders that had to be obeyed and from whom he had to hear much grumbling; a very hard worker and "the fastest talker I have ever struck," full of energy and playing every ounce of it. He was in splendit health, but suffered from a furred trague and a bad taste in the mouth. In his case these were not due to the stomach at all, but to a disordered state of nerve control. "Nervous Rears and nervous tastes are common enough, and they deserve a special thought," says Sir James. He believes that man is kept sweet and vholesome largely by nervous control, and when he loss this control "the parts become fevered, the mucous membrane dry, the nerves irritated, and taste is perverted." The men so affected are those who are nervous, anxious, hard workers, taking their work home with them to think about and dream about in bed.

He was in a delightful mood this morning, as he held his head high to catch the fresh, invigorating January breeze, walking quickly onward the while. Did not each step bring him while. Did not each step bring him nearer to her who was his chief thought, nearer to the time when he should see her, hear her voice, touch her hand again? The world seemed to him a beautiful place just then, free from stain of care or sorrow, the leafless trees even, as they sighed in the wind and rattled their naked arms ing a charm unknown r, po to him be

But no further did he go, for even as he stopped his eyes fell upon the sole occupant of the building-upon Mildred-as with clasped hands 800 ended head she knelt before the altar-rails.

She might have been almost carved in stone, so motionless she knelt, nothing betraying the life within her; while from the stained glass above a stream of crimson, gold and blue, born of the wintry sun, fell down upon her, illuminating all her yellow hair and violet velvet dress. Her attitude might betoken devo

tion, sorrow, or despair; who could say? She was on her knees, lost to the world, ignorant of Denzil's presence, as he stood, spell-bound, and watched her. Then all at once her white fingers trembled, and a faint, sad sound escaped her. Was it a sob

Denzil went out into the churchyard again, and continued his way, the memory of that faint, uncertain sound chilling to death all the gladness that had been in him. Was it a Could anything have happened?

At the park gates he came upon lit-tle Paul, the heir of Ryelands-Lady Caroline's only grandson-engaged in "fisticuffs" with the gate-keeper's boy. Denzil being a special favorite of his, as indeed he was with most children, Paul at once forgot all about the score he had been so anxious, only a minute before, to settle with young Duffy, and, running to his newly-recovered friend, threw his arms around his neck with boyish fervor and enthusiasm

"Oh, Denzil, is it you?" he cried, rap-turously, while young Duffy looked on in high disgust at having his chance of "licking a swell" so unceremoni-ously put an end to. "I am so glad to see you; and it was only this morning Eddie told me he firmly believed you were not coming at all. How long are you going to stay? Why don't you come for Christmas? Did you remember to bring me the knife you promised?

Denzil certainly had not remembered but he wisely refrained from saying so, and, putting his hand into his pocket, drew out a very handsome knife of his own, which he presented to the expectant boy. "Oh, what a beauty!" cried Paul.

"Three blades—and what is this? A corkscrew! Oh, father's has a cork-screw! How did you guess the one I should like, Denzil? But"-checking home and himself suddenly-"come see them all

heavy emphasis on the personal pronoun.

"Come away, Paul," interrupted Denzil, "I am in a hurry. You can fight him to morrow, if you wish itbut come with me now.

"Frightened of him indeed!" mut-tered the incensed Paul, as he suffer-ed himself to be led off without further parley. On his way he recovered his spirits.

"We have all been so awfully dull," he confided to Denzil—"every one of us—even Aunt Queenle. You know Mr. Blount went away to Ireland, so she has been in the bleus ever since. When I heard you were coming, I asked mamma to let me stay with gran-ma for a while, and she let me, because Florence is getting her teeth, and that makes her dreadfully cross, you know, and mamma was glad to get one of us out of the way-we are so many, and so extremely trouble-some," prattled Paul, with artless candor, borrowing words and phrases originally uttered by his elders.

"Well, I consider it rather a fortu-nate thing for me, that Florence should be cutting her teeth just now," said Denzil; 'otherwise I might per-haps have missed the pleasure of your society."

"Just so," returned Paul; "mamma is so particular about us, and says Eddie is not at all a good child's guide. But I did not tell you about my white pony that papa gave me as a Christmas box-such a darling-goes like wind, and jumps, mind you-jumps"in a mysterious whisper—"as well as a big horse. But don't tell that to gran-ma, hecause she would tell mam-Madge away from me. It is a horrible nuisance being the only boy, you know," wound up Master Paul, plaintively; "they make such a fuss about one, and coddle and bother one so." "Poor fellow!" said Denzil, sympathetically.

"I suppose there will be some fun The suppose there will be some run now that you have come," went on the lad, with that happy inability to pre-serve silence peculiar to boys; "and I am sure I hope so. Aunt Mildred mopes so, and looks so discontented, though one would think she ought to be satisfied at last, now she has made

"Why, she is engaged to him," "Part of the sense of the s she was going to be buried instead of

When she once more moved to proceed on her way homeward, he turned also and walked on beside her in silence, until they reached a smal path, gravelled and hedged in on either side by laurels, rhododendrons and myrtles, which led more directly to the house. Already the chimneys were visible, and Denzil, knowing that another turn would bring them within full view of the windows, stopped abruptly. "I hear you are to be congratu-

lated," he said-"is it true?"

"Yes, it is quite true," answered Miss Trevanion, steadily, disdaining to put off the evil hour by equivoca-tion or pretended ignorance. "Then you are compared. "Then you are going to marry him

after all," said Denzil. "I am engaged to be married to Lord Lyndon," returned Miss Trevan

lon, coldly. "And have been so for two months," said Denzil, hurriedly, "yet I never heard it—no one remembered to tell me, leaving the news to be broken to me by a boy—a mere child."

"Was it Paul who told you?"

"Yes-Paul. I met him at the entrance gate, and he told me as he came along." Then, very abruptly, Denzil asked, "Are you happy?" "Of course I am happy," she an-swered, with a faint accession of color.

Why do you ask me such a strange question? Do I look unhappy?" "I think you do," he said, gently;

your face seems changed to me, it loes not wear its old expression; and just now, as I was passing the village church, I glanced in for a moment"-she raised her eyes anxiously-"and saw you. You were kneeling at the altar rails, and, as I watched youforgive me, it was but for an instantthought I heard-Mildred, were you crying

"And so," observed Mildred, pettishly, giving no heed to his question, tecause one happens to feel a little fretted about some trifling matter, and cries a few silly tears, one is to be considered in the lowest depths of despair? It is absurd. I will not listen to such folly; Lord Lyndon, I af sure, would not wish me to do so,

"And he is everything to you now, while I and all the rest of the world count as nothing," interrupted Denzil. bitterly—"is that so? Do you expect me to believe that? Because, if you do, I shall tell you plainly that I do not believe it, and never shall. He is unsuited to you in every way, having not an idea in common with you. Oh, Mildred"-passionately- "why have you done this thing? Why have you sacrificed your whole long, sweet life so miserably? Was there not some good reason for it of which I never heard? Could you not have waited? My love, my darling, is there

nothing I could do for you?" His whole heart was in his voice as he concluded, while his beautiful eyes, large and dark always, appeared now haggard and almost blue-black with the pain that filled them Looking at him, Miss Trevanion felt her own eyes grow dim and sad with

They were standing v They were standing with hands clasped and eyes reading each other's hearts. Denzil drew his breath quickly. "Good-bye," he murmured, despair-ingly, and turning away abruptly, passed rapidly out of her sight.

And now began his misery; not un-til now—in spite of all Paul's infor-mation—did he thoroughly realize to himself the full extent of the misfor-tune that had befallen him. True, he had been refused, slighted, almost scorned by this girl; yet not until the hour came when all hope must neces-sarily be at an end did he learn how vivid his hopefulness had been.

Vivid his hopefulness had been. For the past months, almost un-known to himself, he had lived on the thought of seeing her again-had been picturing her in ev-ery graceful attitude and position his too faithful memory had kept warm within his heart. And now everything was at an end; never more could he think of her but as of one dead, or suddenly removed and passed away from him forever. Lyndon had gained easily, and as it seemed to Denzil, easily, and as it seemed to Denzil, without any very great desire for it, that for which he would have willing-ly bartered away all he gossessed on

earth. And yet had he obtained it? Some And yet had he obtained it? Somes' how Denzil could not divest himself of the belief that Mildred's love was a thing not included in the wedding arrangements already going forward. She was giving only the half-and that the worst half-of herself to the man she was going to marry, and he was either wretchedly deceived, or Dossessing this knowledge was conpossessing this knowledge, was con-tent to take her as she was. It appear-ed a horrible thing and unnatural to accept a woman's word and make her a wife, knowing her heart to be still safely locked within her breast-for never for a moment did it seem pro-bable to Denzil that he alone might

be the one who could unlock that stronghold. And indeed there was no reason why he should have thought so; of all the lookers-on not one in Cliston imagined that Mildred Tre vanion had given her heart to Denzil Younge. Perhaps, had such an idea taken hold of him it might have made the pain a little more bearable; as it was, he covered his face with hands

and groaned aloud. CHAPTER XX.

Cliston

When all the people at King's Abbott met to dine Denzil was among them, and very welcome he found himself. Charlie alone of all the family was absent; but even he had written word to say that he would be with them for a day or two in course of the following week. I It was a bitter night and freezing hard, so hard as to indicate great things those who were fond of skating.

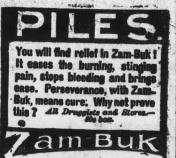

"We ought to get up a party and go to the lake to-morrow," suggested Eddie, during a pause in the conversuggested sation.

Lyndon, who was also dining with them, and who generally agreed with everybody, said he thought it was "a capital plan," and appealed to Miss Trevanion, who sat beside him. She thought she had lost her skates, or misplaced them or something. misplaced them, or something; but Frances Sylverton—who had beautiful feet, and never objected to show them in appreciative society—over-ruled all such opposition by declaring that she had several pairs to lend, and that a day on the ice would be delisted by the several pairs of the several be delicious.

"But perhaps it will be hardly safe enough this week," she added, some-what anxiously. "Shall we wait until Tuesday next?"

"Charlie said he would be down on Monday night," put in Eddie, inno-centiy, a propos of nothing, and with-out lifting his eyes from the cream, on which he was seemingly intent# where-upon Miss Sylverton blushed furiously, and declined any further investigation of the subject.

Finally, however-chiefly through he instrumentality of Mildred- the the ins expedition was arranged to take place on the Tuesday following, so that that

Bullets in the Brain.

Several months ago a Belgian was struck by a dart dropped from a German aeroplane. It went right through man aeroplane. It went right through his head vertically and between the two sides of his jaw, coming out under the chin. It was a clean cut. The man was treated in a London hospital and recovered. He is in London to-day, perfectly well, and had no symp-toms except once a slight fit. Another instance of marvellous re-covery was that of a youth who was shot through the frontal lobe. Lon-don surgeons took away the whole of the bone of his forehead and a large plece of his brain. He made an immed-

piece of his brain. He made an imp late recovery. A medical student re-ceived a shell wound in the frontal lobe. He spent six months in various hospitals and made no progress. They told him he would heal up. He came to London, and it was found there was a chunk of shell in his brain. This was removed and he is now getting better. Playing his part in heroic action, an Australian got a bullet through his brain, the effect of which was loss of speech and paralysis of one side of his body. He was brought over here, the bullet was removed from his brain and he recovered his speech.

All Are on Time at Sydney.

At Sydney, Australia, any telephone subscriber can obtain correct standard time by calling up the Sydney observatory, says the Scientific American. If he wishes merely to check his watch or clock he asks for "Time," and is connected with an operator who reads off the correct time to the nearest half minute from a clock controlled by the standard clock of the observatory. If more accurate information be required asks for "Exact Time" and is connected with a high frequency buzzer, which transmits the actual beats of the observatory clock.

SIR JAMES WATSON'S OPINION **CONSIDERED MOST VALUABLE**

He says that the commonest of all disorders, and one from which few escape is Catarrh. Sir James firmly believes in local treatment, which is best supplied by "Catarrhozone." No case of Catarrh can exist where Caterrhozone is used; it is a miracle worker, relieves almost instantly, and cures after other remedies fail. Other treatments can't reach the diseased parts like Catarrhozone, because it goes to the source of the trouble along with the air you breathe . Ca tarrhozone is free from cocaine; it leaves no bad after-effects, it is simp ly nature's own cure. Beware of dangerous substitutes of-

When the boy was out of sight, Denzil turned, and entering a smaller avenue that led away toward the park; walked on rapidly in a direction leading from instead of to the house. This path wound its way through the wooded parts of King's Abbott almost into the village, and was a favorite short cut with the Trevanions, being in summer shaded from the sun, and ir. winter dry and sheltered.

Suddenly, without a moment for reflection, with no sound of approaching footsteps to warn him, he came upon Mildred Trevanion, advancing slowly and with listless footsteps to where he stood, stayed by the unex-

Any one can hear this insect buz-zing in the pine woods in midsummer or perhaps see the flash of its yello wings. Sirez gigas is its formidable scientific name, but we know it simp-ly as the horn-tailed wasp. This wasp bores into the tree in various places with its long tail and in each hole leaves an egg. The ensuing larvae, a white, six-

legged grub, fitted with powerful jaws, takes up the work of boring in-to the wood, and as it advances closes the passage behind it with sawdust. If uninterrupted the larvae continues boring deeper and deeper into the tree, and since it is, of course, grow-ing all the time, it makes a larger and larger passage.

After about two years it makes its cocoon of silk in the burrow. Then, after the pupil skin is cast off, the winged insect breaks through its cocoon. Immediately, with feverish haste, it begins boring toward liberty. Finally it reaches the bark of the tree and then the open air.

It is often the case that during the larval period the tree in which the horn-tailed wasp is burrowing may be felled, sawed into planks and used may

STORY OF A DREAM No Excuse to Be Without Reliable Up-t Date News from the Battle Front

Since assuming control of the Reporter, the present editor has been looking for some means of adding to **Curious** Slumber Vision and Its the list of, subscribers those who in Athens and surrounding district, do not receive the home paper. There is no reason why the circulation of the A WARNING OR A COINCIDENCE Reporter can not be doubled. Subscribers are requested in their interest and ours, to draw the attention of their non-subscriber friends to this It Was a Singular and Puzzling exceptional offer.

We have pleasure in announcing an arrangement completed with that great family paper, The Family Her-ald and Weekly Star of Montreal, by which we can offer The Reporter and The Family Herald and Weekly Star for the balance of 1916, or until January 1st, 1917, for the small sum of 75 cents.

The Family Herald and Weekly Star is noted for its reliable war news each week, and is replete with most interesting stories from the battlefront. The Family Herald and Weekly Star is a family paper all Canada is proud of, and when combined with The Reporter, our readers are supplied with all local news and news of the world. In addition to the news, the reader receive in The Family Herald each week a magazine section equivalent to several of the best monthly magazines printed. The Agricultural section is another feature of that great weekly which is keenly appreciated and is alone worth many times the subscription price. We now offer the two papers for only 75 cents until January, 1917. Present readers of The Reporter may have The Family Herald and Weekly Star for the balance of 1916 for only 40 cents.

It will be worthy of note to all parties sending papers to England or to the front, that the postal 'rate has been changed and all papers are now charged at the rate of one cent for every two ounces. The old rate was one cent for every four ounces. Many papers with insufficient postage have been sent to the dead letter office. This can be avoided if parties sending papers overseas will place their addresses on the wrappers so that if the postage is insufficient, the papers can be returned to the mailer for sufficient postage, and this save delay, or the entire loss of the papers. ,

"For several minutes we stood there, and neither of us said a word. Then the dark man walked off in one direction and I in the other. When I had gone a short distance something prompted me to look around. I did so and was startled to see the man of my dreams looking thoughtfully at me. Instantly it flashed over me, 'He has had a dream of me and recognizes me as I did him."

"Whether or not such was the case I have never learned, but I do know that so far I have escaped smallpox. Was my dream a warning, I wonder, or was it merely a dream, and was my meet-ing the tall, dark, thin man nothing re than a coincidence?"

The Ptarmigan.

There are few birds whose plumage is so variable as the ptarmigan's. Three times in the year its plumage changes. It has separate coats for spring, au-tumn and winter. At the beginning of November it puts on the last costume of the season. Its spring brown and summer gray serve well to hide it among the scanty herbage of its haunts from the keen eye of the soaring falcon.
