**TOWER 1964**

**DR. WILLIAM RAMSAY**  
Dean of Regina College 1934-1940

# DEDICATION

Dr. W. Ramsay, Dean Emeritus of Regina College, who received his B.A. from Queen's University in 1902 and his Ph.D. in the Greek Language and Literature from the University of Chicago in 1927, taught for thirty years in this province, from 1910 until 1940. In November of 1961 the degree of Doctor of Laws, *Honoris causa*, was conferred on Dr. Ramsay, teacher extraordinary.

In 1916 Dr. Ramsay was invited to join the faculty of Arts and Science of the University of Saskatchewan as Professor of Classics, and in 1934 he was appointed Dean of Regina College when it became part of the University. He served in that capacity until 1940. Here Dr. Ramsay faced a situation fraught uncertainty and insecurity among the staff, and tensions within the administration all heightened by the general economic stress of the nineteen thirties. His very human approach to the problems and his warm personal interest in faculty, staff and students was probably more effective in allaying fears and producing a unity of purpose than an impersonal administrative approach could have been.

To Dr. Ramsay the human mind was the most rewarding garden to cultivate because it produced the finest fruits. The individual was of supreme importance and he showed this in his deep personal interest in students, staff, friends and social contacts. Regardless of the situation, his devotion to teaching and the

development of mental discipline was always apparent. Even a slice in golf was considered to be the result of inadequate mental discipline.

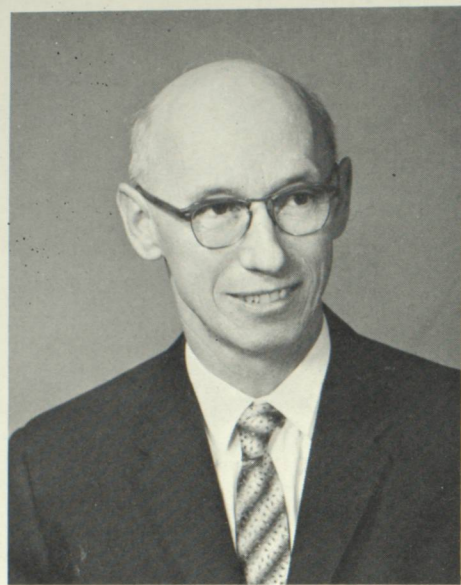

He often said "the great thing in teaching is to identify yourself with the student" and those who came under the spell of his teaching will testify that he achieved his objective. People from all walks of life — business, professional and academic — speak with warmth and enthusiasm of the powerful influence he exerted upon them in the classroom. His was the ability "to lead the student out of his own locality into a world of universal truths." Truly it can be said that contributed tremendously to the development of that uniquely human attribute, the human mind.

It is with great pleasure and pride that we dedicate **TOWER 1964** to Dr. W. Ramsay, an exemplary scholar, Professor and Dean, who provided Regina College with a strong foothold in her struggle to attain full University status and autonomy today, as the University of Saskatchewan, Regina Campus.

Point of interest:

Ramsay Drive is to be the name of the new drive in front of the present Regina Campus.

Dean of Arts and Science

### PRINCIPAL'S MESSAGE

On behalf of the faculty I wish to thank the students for a successful and active year. The initiative shown in getting student activities organized within the first few days of the term has produced excellent dividends of student participation in many activities and increased interest in the work on the campus. The admission of the student body to NFCUS (now CUS) marks a further step in the transition of this campus from a Junior College to a University, and the way in which the students have addressed themselves to consideration of important aspects of life and facilities here gives evidence of a mature attitude in dealing with the problems facing them.

Our best wishes go with you as you proceed with further studies, enter professional schools or embark on a career in business, industry or the public service. We expect that your experience here will cause you to make a greater contribution in your field of responsibility.

W. A. Riddell  
Principal

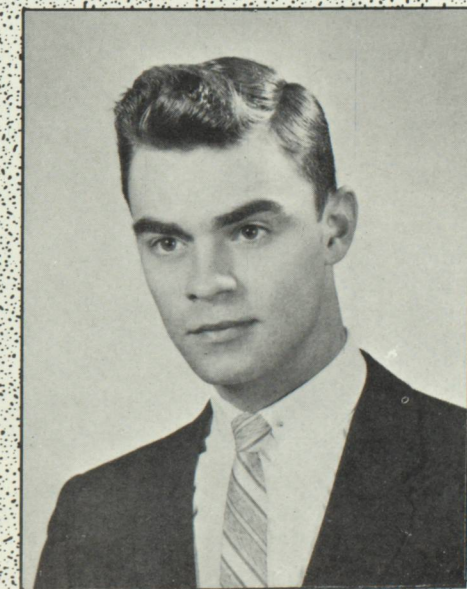

### PRESIDENT'S MESSAGE

I would like to congratulate the students of Regina Campus for having made the 1963-64 university year the success it was. The Students' Representative Council has initiated many changes this year to increase the atmosphere of university life on this campus. Some of our most noteworthy activities were: Frosh week-end, the establishment of the Western Canadian Entertainment circuit, the appointment of a Students' Union Building committee, a bi-monthly television program, new membership of this university into the Canadian Union of Students and Canadian University Press, and many badly needed changes in the constitution. It was with much appreciation that the Students' Representative Council saw interested and serious students doing their part to insure the success of student activities.

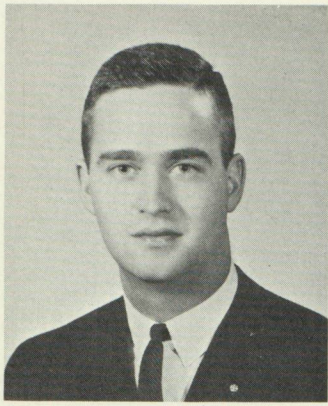

I would like to thank the members of the faculty, administration, and fellow student councillors for their fine work this year, and I can honestly say that it has been a pleasure to have worked with you. This year has been a milestone in my life because of many new, valuable experiences and many new friendships with students and professors that I shall never forget.

I wish success to you all in your particular areas of study and life work, and I hope that in the future, you will look back upon this year with many fond memories of 1963-64 at the University of Saskatchewan, Regina Campus.

# EDITORIAL

Student life is a product of people and their ideas; its character is a total of these personalities. Because of this, the individual finds in campus life whatever he expects.

By means of photo essays, news copy, and a fresh approach to layout we have tried to capture the spirit of Saskatchewan's Regina Campus. Thus, the TOWER tells the story of a year of physical growth and the new milestones of the campus, intellectual and spiritual growth of the inhabitants of the campus, and is only as exciting and sound as the students make it.

May I at this time thank all my staff for their co-operative assistance in making The TOWER '64 a reality, and to Mr. and Mrs. John Toth of Vienna Studios, Mr. Alan Stobbs, CKCK-TV, and The Leader Post sincere thanks for your wholehearted co-operation.

**DR. CALVIN VANDER WERF**  
President, Hope College,  
Holland, Michigan

The Steward Basterfield Lectureship has been established in honour of Dr. Steward Basterfield (1884-1954), Dean of Regina College from 1940 to 1950, and in recognition of his interest in the philosophy and history of science.

The first of these annual lectures was delivered by Dr. Calvin A. Vander Werf, who was recently appointed president of a liberal arts college. Dr. Vander Werf is a distinguished teacher, author and research scientist.

The topics of the 1964 Basterfield Lectures, Delivered by Dr. Vander Werf, President, Hope College, Holland, Michigan, were — "Is Science Here to Stay?" and "Science as a Human Enterprise."

E. Toews.

1963-64 at Regina Campus saw the formation of a new and dedicated group. After the student body voted last fall to join the Canadian Union of Students (then National Federation of Canadian University Students).

Shortly after its formation under Ken Mitchell, the C.U.S. committee undertook several projects, including: an investigation of the university-operated bookstore; the setting up of a program to orient local high school students to the university way of life; a professor-student seminar on the purpose of a university; support of the Freedom from Hunger campaign; and the winning of \$150.00 on the local television quiz program. In fact, the C.U.S. committee ended up with more money at the end of the year than the S.R.C. did.

World University Service of Canada is a voluntary service organization, governed by national committees of students and professors, and supported by local committees on almost every university campus. On Regina Campus the Faculty Committee was headed by Dr. L. W. MacMillan. Its funds are used to assist overseas students to come to Canada, to enable Canadian students to travel abroad to take part in special summer seminars, university courses and voluntary work schemes, and to give support to projects on the international scale and help to needy students and professors in developing countries and in emergency situations. On Regina Campus two fund raising ventures were held — Treasure Van and a Cabaret and dance, with the proceeds from the latter going towards the expenses of the Algerian Conference.

Treasure Van this year displayed its wares in the Blue and Gold Rooms of the Regina Central Public Library, and due to its location was not as big a success as those of previous years.

In October Miss Betty Henderson and Louise Million went to the WUSC Eighteenth National Assembly in Quebec City. This summer Louise Million will represent the University of Saskatchewan at a WUS conference in Algeria.

The Psychology Club had an interesting and successful year. The membership was composed primarily of aspiring social workers, along with some psychologists and teachers.

The activities of the club included two discussion periods — one on the problem of alcoholism, and the other a discussion of the work done by the John Howard Society, but much of the activity of the club was concentrated on the display for University Night and the annual field trip. This year a group of forty students visited the Saskatchewan Training School at Moose Jaw. The Psychology Club completed the year's activities by providing an evening of entertainment at the Munroe Wing.

# BIOLOGY CLUB

**BACK ROW:** Dr. R. W. Nero, Mr. W. B. Clarke, B. Wright (president), W. Clarke, M. Stein, B. King, Dr. G. F. Ledingham.

**FRONT ROW:** B. McGregor, C. Stein, J. Kennedy, M. Gatin, D. Nelson, M. Bogdan, G. Jones.

What better way for university students to explore the mysteries of nature than by joining the Biology Club, and Regina Campus' Club had an excellent representation of eager students.

Their enthusiasm led them to have many interesting discussions (at meetings every two weeks), tour many interesting places (Cancer Clinic, the Brewery and Saskatoon's Biology Show) and have fun-filled socials (the Christmas party, the evening of bowling). Biology professors attended our meetings, guided us in our activities, and gave us food for thought (remember the "Sprite," Dr. Nero?).

One of the major activities of the club this past year was the Biology part of University Night. We proudly thank all the non-members who aided us in our ambitious undertaking, for we received many compliments for our efforts on the theme "Applicational Biology."

Members who are in town during the summer will also be making field trips out to the country for on-the-spot observations.

With the university expanding as much as it is, the Biology Club can look forward to even more successful years in the future.

# CHEMISTRY CLUB

University Students proceeding to a degree in chemistry or chemical engineering are eligible for student membership in the Chemical Institute of Canada – a national body representing chemists and chemical engineers in all provinces of Canada.

Through the efforts of the 1962-63 Chemistry Club and the Chemistry faculty, the Regina Campus Chemistry Club was recognized as a student chapter of the Institute. Each member receives a copy of the monthly journal - "Chemistry in Canada" and may attend the monthly meetings of the South Saskatchewan Section of the C.T.C. to hear prominent speakers from all over Canada.

Industrial visits and films were part of the program for the year but the major project was University Night – prepared for weeks in advance. Varied interesting and informative displays were set up – Chem-Study movies were shown continuously and the "Alchemists Show" drew much attention.

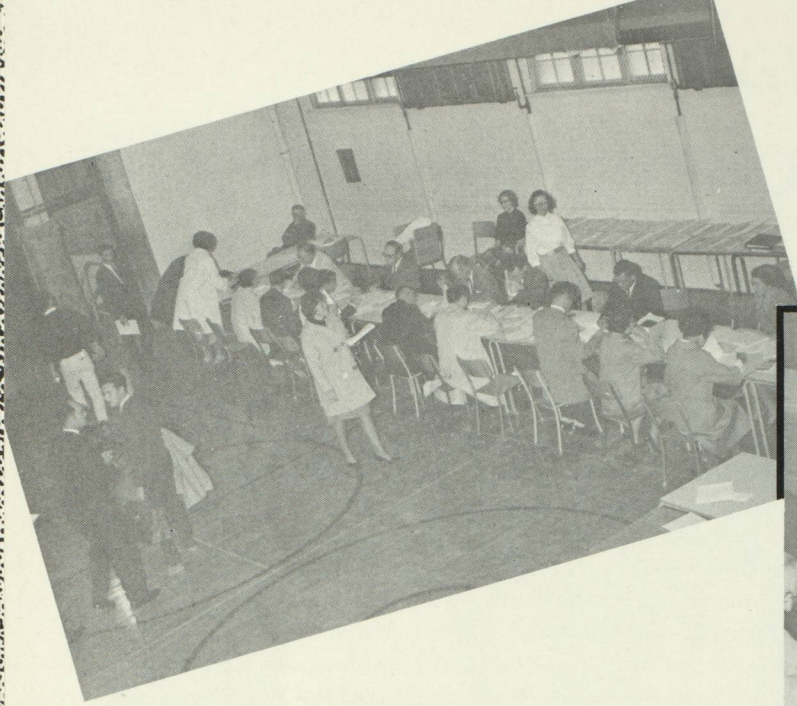

We wish to acknowledge our indebtedness to the faculty of Chemistry for their assistance throughout the year.

## Pioneers of Progress —JOHN MACOUN Helped Change a Railroad's Route

John Macoun came west in 1872 with the Fleming expedition surveying a transcontinental railroad route through central Saskatchewan. For ten years he studied the flora and fauna, particularly in the southern regions of the province. He wrote enthusiastic reports of the boundless possibilities for agricultural development. So factual and convincing, so completely different to previous pessimistic reports, Macoun played a large part in the decision to change the route of Canada's first transcontinental railroad from central to southern Saskatchewan. Today, the land Macoun recognized as rich in agricultural production shows new promise as the minerals beneath the soil add a new dimension to the Saskatchewan economy.

IS  
YOURS  
THE  
LAST  
WORD??...

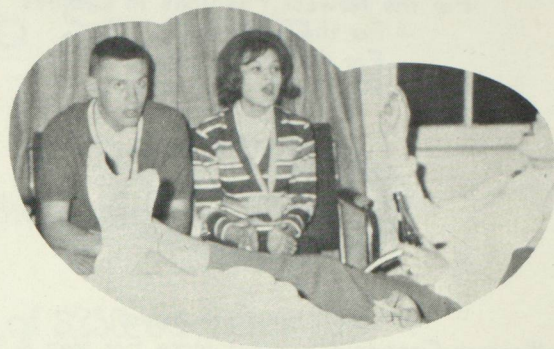

A long time ago, an Arabian king wished to select the wisest man in his country to serve as his personal adviser. Finally narrowing the choice to three sages, each of whom claimed to be the wisest in the land, the king proposed the following test. "I will put a fez on each of your heads," he said. "There are five fezzes altogether, three red and two green, and I may use any combination of them. The first wise man to know the color of his own will become my adviser. "If you make a wrong choice," the king added, "you will be beheaded." Then, in such a way that none of them was able to see which color he got, three of the five fezzes were placed on the heads of the wise men. After a glance at the other two, and a few moments of thought, the wisest said, "I am wearing a red fez." How did he know?
