for Infants and Children.

HIRTY years' observation of Castoria with the patronage of millions of persons, permit us to speak of it without guessing. It is unquestionably the best remedy for Infants and Children the world has ever known. It is harmless. Children like it. It gives them health. It will save their lives. In it Mothers have something which is absolutely safe and practically perfect as a child's medicine. Castoria destroys Worms.

Castoria allays Feverishness Castoria prevents vomiting Sour Curd. Castoria cures Diarrhoa and Wind Colic. Castoria relieves Teething Troubles. Castoria cures Constipation and Flatulency.

Castoria neutralizes the effects of carbonic acid gas or poisonous air. Castoria does not contain morphine, opium, or other narcotic property. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep.

Cestoria is put up in one-size bottles only. It is not sold in bulk. Don't allow any one to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose." See that you get C-A-S-T-O-R-I-A.

AN OPEN LETTER. FROM A PROMINENT PHYSICIAN.

Remarkable Cure of Consumption in its Last Stages-Is This Once Dread Discase Conquered ?-Important Facts Friday, September 14, 1894 to all Suffering from Diseased or Weak

DEAR SIRS :- I wish to call your at-DEAR SIRS:—I wish to call your attention to a remarkable cure of consumption. In March, 1893, I was called in my professional capacity to see Miss Christina Koester, of North Brant, who was then suffering from an attack of inflammation of the left lung. The attack was a severe cue, the use of the lung being articly gone fewerts for the lung for cooking and heating purposes, stoye pipe for cooking and heating purposes. flammation of the left lung. The attack was a severe one, the use of the lung being entirely gone from the effect of the disease. I treated her for two weeks when recovery seemed assured. I afterwards heard from her at intervals that the progress of recovery was satisfactory. The case then passed from my notice until June, when I was again called to see her, her friends thinking she had gone into consumption. On visiting her I found their suspicions too well founded. From robust health she had wasted to a mere skeleton, scarcely able to walk across the room. She was suffering from an intense cough, and expectoration of putrid matter, in fact about a pint each night. There was a burning hectic fever with chills daily. A cateful examination of the previously diseased lung showed that its function was entirely gone, and that in all probability itswasentirely destroyed. Still having hopes that the trouble was due to a collection of water around the lung I asked for a consultation, and the following days with the could be asked for a consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation and the lung I asked for a consultation, and the following days with some consultation and heating purposes, store for cooking and heating purposes, store and the necessary fittings complete at reasonable that the received w

of water around the lung I asked for a consultation, and the following day with a prominent physician of a neighboring town again made a careful examination. town again made a careful examination. Every symptom and physical sign indicated the onset of rapid consumption and the breaking down of the lungs. Death certainly seemed but a short time distant. A regretful experience had taught me the uselessness of the ordinary remedies used for this dread and fatal disease, and no hope was to be looked for in this direction. I had frequently read the testimentals in layor of Dr. Williams Pink Pills in wasting diseases, but to knowing their composition hesitated to use them. Finally, however, I decided to give them a trial, and I am free to say that I only used them at a
