HOW QUEEN VICTORIA RECEIVES HER MAIL.

Edmund Yates, writing in a London magazine, *Time*, says: The train which we may assume is bound due north, and which contains the royal messenger and his precious freight of mail boxes, has crossed the border, and before it has arrived at Perth day has broken over the tops of the Scotch mountains. Balmoral is reached at last. It is a sweet summer day, and the Queen is seated in the tent on the lawn, where she frequently breakfasts in warm weather, and remains for hours by herself or with her ladies. The sorting of the contents of the colossal mail-bags will take upwards of an hour, and then her majesty will be informed that all is ready. Many letters are left for the royal hands to open. Thus a foreign sovereign, or one of the Queen's children, or it may even be one of her subjects whom she honors with her friendship, has addressed an epistle to Her Majesty, in the same way that friends, acquaintances and connections write to each other in ordinary life. But even this communication only reaches its proud destination by a slightly circuitous route. The autograph communications of the Czar or Kaiser would first go to the Russian or German embassy in London, would then be sent to the Foreign Office in Whitehall, and would travel from the Foreign Office to Balmoral in one of the above mentioned boxes. In the same way will be treated the letters of those members of the royal family who may from time to time be abroad, or for the matter of that at home. The Prince of Wales may employ the penny post in writing to an acquaintance. His royal Highness has resort to the state boxes when he addresses his august mother, and the letter is usually enclosed under cover to the Queen's secretary. There is not one paper in these boxes which the Queen will fail to examine. On many she will ask for more information; on some she will give definite opinions which cannot be confined within the limits of a sheet of note-paper.

The May Number of HARPER'S MAGAZINE is very richly illustrated, containing over one hundred engravings that may confidently challenge comparison. The illustrated subjects offer unusual opportunities for picturesque treatment. At the outset the reader, in "A Peninsular Canadian," is transported to that wonderful region known—though it can scarcely be said to be known at all—as "the Eastern Shore," on the Chesapeake Bay. Howard Pyle, who writes the article, also illustrates it with eighteen novel pictures of character and scenery.

Colonel Waring's third Tyrol paper takes us from Botzen to Widdbruck, and then unveils the wonders of Grotter Thal—the most curious and interesting of the Tyrolean valleys—where to this day "the old Rhoti-Roman heathen hold to their old Romance language," and make wooden toys for the world.

The Art paper of the Number is devoted to "The Study of Art in Boston"—an admirable and comprehensive treatment of the subject by Geo. P. Lathrop, with 28 fine illustrations.

Julius Wilcox contributes an interesting article, amply illustrated, on "The Piano and its Antecedents."

The principal article in the Number as regards timely interest, is Wm. Winter's beautiful paper about Stratford-upon-Avon—now the theatre of a festival commemoration on the occasion of the dedication of the Shakespeare Memorial building.

The illustrated story of the Number, "Lord Allen's Daughter," by Mrs. E. W. Latimer, is full of thrilling incident.

Poems are contributed by R. H. Stoddard, Will Wallace Harney, and Fannie R. Robinson.

The *Editor's Easy Chair*, besides much that is interesting in the way of social and literary gossip, has a timely discussion of the present outlook of the question of international copyright. The *Literary Record* is simple and incisive. The *Scientific Record*, with its full review of scientific progress, meets a want not otherwise ministered to in current literature; and the *Editor's Drawer* contains a rich fund of amusement for every class of readers.

THE RED FLAG ON THE CANADA PACIFIC.

St. Paul, Minn., May 7.—A special despatch to the Pioneer Press says that 1500 men are now engaged in the Canada Pacific strike, and that violence is threatened. The strikers are marching under the red flag and threatening to prevent all work till the demands are complied with. The military has been ordered from Winnipeg to the scene.

The St. Andrews Standard.

SAINT ANDREWS, MAY 14, 1879.

THE *Hansard* reports contain the speeches in *extenso* in all Parliamentary discussions, and as they are official documents are reliable. The arguments *pro* and *con* on the tariff are worthy attentive perusal, many of them are very able and instructive. It matters not what a person's political bias may be, such arguments should be carefully weighed, and in common fairness a reasonable time should be given to test the correctness of the new policy. If, as has been alleged by its advocates, a moderate Protectionist policy will benefit the Dominion, foster its manufactures, develop its resources, afford employment, and increase its population, the people will rejoice, and award that merit of praise to its promoters, to which they may be entitled. It is not just, however, for those who oppose that policy, to assert that it will lead to an increase of price in domestic manufactures; why should it? The most rabid free trader must admit, that encouragement to home industries increase a country's wealth; he will also acknowledge that there is in reality no such thing in the abstract as free trade. Whence would a revenue be derived were no duties collected, and how could a government carry on the affairs of any country without a revenue? No one of common honesty will deny that had the late Government remained in power the tariff would have been increased, perhaps not to the extent of the present one, but still it would have increased the duties on some articles; the necessities of the country, its debt, and deficiency, required some method to be adopted to meet the demands against it; and much, very much, depends in the fiscal policy of a comparatively new country with its large public works in progress to foster its industries, and carry out its engagements in the construction of its undertakings.

While, however, admitting that the tariff required readjustment for the causes stated, we do not wish it to be understood, that we advocate high protective duties which would be onerous to the people, as the present tariff undoubtedly is. We believe with many others that it will lead to the disintegration of the Dominion—alienate the Parent country, as it leans heavily against its interests, and create hostility against the Dominion in the United States who will retaliate on the trade of Canada. As yet there are no signs of material prosperity—revival of trade, increase of employment or those good times promised prior to the election, by those enjoying the sweets of office in the new administration.

ACCIDENT.—On Thursday afternoon last while Mr. D. F. Campbell was driving his wagon along the street a little boy named Burt Waycott, got into the vehicle, and when passing near the sidewalk a barrel of flour in the wagon rolled out carrying Burt with it. The little fellow fell on his face and the head of the barrel struck his shoulder and rolled over both shoulders. The boy was picked up by Mr. Glenn, who carried him into his store, where he remained insensible for a few minutes. He was afterwards conveyed to his home, and attended by Dr. Gove. We are pleased to state that "Burtie" who is a general favorite is fast recovering, and will be out again in a short time.

SERIOUS ACCIDENT.—As Rev. Thomas Connor was returning home from Woodstock, on Wednesday evening, when about one mile below Victoria Corner, his horse taking fright jumped suddenly to one side, throwing Mr. Connor out. He was taken up and carried to his home and Dr. Colter sent for. Examination showed that the unfortunate gentleman had suffered a fracture of three of his ribs. At the present it is hoped that this is the extent of his injuries, and that he is not at all affected internally by his heavy fall. We hope to hear of Mr. Connor's speedy recovery.

Correspondence.
 Mr. Editor.—Can you explain the meaning of a common phrase recently introduced—"All right now, we'll set her up!"

Mr. HERBERT LAMB, one of the promising young men of St. Andrews, left for the United States on Monday last.

RAILWAY MEETING.

On Thursday evening, a meeting of the inhabitants was held in Stevenson's Hall. The number present was not as large as was anticipated, indeed it is a difficult matter at any time, to secure a large audience on almost any public occasion, but it was supposed there would have been a more general attendance when the matters to be considered were of such importance to the towns people. Sheriff Paul was elected chairman, and Mr. J. S. Magee secretary. The Sheriff in his usual clear and comprehensive manner, stated the object of the meeting, viz.—to hear the Report of the Committee appointed at the public meeting held last August, and to devise measures for carrying out the action with reference to running of daily trains.

Mr. Magee then read an exhaustive report which contained a statement of what had been done by the Committee, and the measures they had adopted to effect an amicable arrangement with the Railway Company. Among other passages in the report was that "they met the Company more than half way, and yielded much more than could be expected of them," but was unsuccessful. The report was adopted.

The meeting was then addressed by Messrs. Campbell, Hatch, Robinson and others. Mr. Stevenson, a director of the Railway Company, also addressed the meeting, and showed that the Company would save money by the time occupied in the decision on the Appeal, but that he believed the Town would ultimately be successful.

A subscription list was then opened, and several persons subscribed liberally. The thanks of the meeting were given to the Reform Club for the gratuitous use of the hall and also to the Sheriff, for his able and impartial conduct as chairman. We took notes of some of the speeches, but are obliged to hold them over for the present.

THE policy of the Government with regard to the Pacific railway was announced by Hon. Dr. Tupper in Parliament on the 10th inst. when he moved fourteen resolutions, and made an explanatory speech; the total amount estimated, required to complete the railway is \$23,396,000. Sir John A. Macdonald said "the Pacific Railway could be built without it costing the people of Canada one cent."

FIRE.—The old Johnston homestead about three miles from town, was destroyed by fire on Friday last. Very little of the furniture was saved, and the barn was only saved by pulling down the outer kitchen of the house. Mr. Johnston had no insurance we are sorry to learn, and has suffered a great loss.

The Government has ordered that all periodicals and pamphlets, received from without the limits of Canada, addressed to private individuals and not for purposes of sale or commerce, shall be delivered to their addresses by postmasters, without reference to customs officers.

THE PERMISSIVE BILL is being voted for and against to-day. There appears to be very little interest taken in the matter, and we are safe in stating that it will be carried in this County. The opponents of the measure here would not even go to vote.

FRUIT TREES.—Mr. Rogers of Bebec Plains, Que., delivered a choice lot of fruit trees, rose bushes and other shrubs last week to parties here who ordered them last fall.

Geo. S. GRIMMER, Esq., returned from his visit to Ottawa, on Friday last, by rail and steamer. Our thanks are due to him for late papers.

According to a Roman correspondent, grave differences have arisen between the Marquis of Bute and Monsignor Capel, and it is not improbable that the Marquis will leave the Roman Catholic Church. "The step," it is added, "is not likely to surprise the dignitaries of the Papal Church, as serious doubts have been lately expressed concerning the orthodoxy of Lord Bute."

The news from South America continues to be of warlike import. General Diaz with 4000 troops, is marching toward the territory occupied by the Chilians.

A shocking Railway Accident occurred on the 11th inst., near Toronto, when an engine sent out to bring in some excursionists into a passenger car, wrecking it, and killing Mr. Gooderham, and injuring several others.

FREDERICTON ITEMS.—The examination for admission to the Normal School were held last week. Out of one hundred and fifty applicants, one hundred and thirty were successful, the remaining number being "plucked" as the local phrase puts it. The summer term opened yesterday.

Mr. Andrew Lipsett, Chief Engineer of the Fire Department, was severely injured on Saturday last during an alarm of fire. In attempting to get upon the hose cart while in rapid motion, he missed his footing and fell, the wheels of both carts (one was attached to the other) passing over his chest, breaking two ribs and bruising him severely. He is progressing favorably.

The contractors of the new Post Office are pushing forward the work with a large force of men, who are now making excavations and laying foundation walls. Our laborers grumble, and say it is bad enough to let the contractors to Americans, but when they bring their own laborers, it is time that "protection" should be applied to their interests.

The work of clearing up the grounds about the Normal School has begun, and now those ill-shaped willows are disappearing from in front of the building, preparatory to the erection of that long talked of fence.

Capt. Cropley expects to take his company to St. John on the 24th, to take part in the Military demonstrations there. A number of sports are being arranged for the holiday here—among others a walking match, which will be the first of its kind in this city.

The new ferry-boat lately placed on the lower route, gives great satisfaction, and is by far the best boat in this vicinity, especially as regards speed and accommodation.

THE *Illustrated Journal of Agriculture*, is the title of a newspaper, published in Montreal, by the Department of Agriculture for the Province of Quebec, and sent gratuitously to members of Agricultural Societies, and those not members at \$1 per annum. There is no doubt that it will prove a sure guide to farmers, and is essentially Canadian. The articles, original and selected, are written with a view to benefit our agriculturists, and adapted to the soil and climate of all parts of the Dominion. The work is neatly printed and contains sixteen pages. A specimen copy may be seen at this office.

Sir John Macdonald and his colleagues are in a very precarious position. Defeated in the House of Commons on the Insolvent Act, the Senate has gone back on them and declined, by a considerable majority, to endorse their policy with respect to the Supreme Court of British Columbia. That Province was once the death of them, and now that they have risen again may once more be the means of consigning them to obscurity. The membership of neither House of Parliament seems prepared in majority to allow Sir John Macdonald to lead them where they would not go.—*Montreal Star*.

The Rev. Dr. Burchard, for forty years pastor of the Thirteenth-street Presbyterian church, New York, has resigned. On accepting his resignation the church presented him with \$15,000.

Protection forms the subject of the most recent discussions in the French Chambers, where assurances were given that the interests of the commerce of the country would not be sacrificed. In the Reichstag, too, Bismarck has declared that the German Empire required moderately protective duties, while in the mother country the declarations of the *Times* and other journals show that the same policy is gaining strength by which we in Canada have resolved to govern ourselves. One of the German Chancellor's latest declarations is hostile to the slaughter business with which ordinary stolid Germany can no longer put up.

The measure for taking the census in the United States in 1880 will be more complete than any of the preceding ones, and the work is to be completed within two weeks from the 1st June, in all places of ten thousand and over, and before the 1st July in all other places. It is calculated by some that the population of the States in 1880 will be 55,858,000. No one puts it lower than 48,000,000. The centre of population is travelling steadily westward. In 1800 it was on the meridian of Washington; and by the end of the century it will very likely be the Mississippi.

BALLOON'S MONTHLY MAGAZINE FOR JUNE.—The June number of this cheap and popular magazine is out, and will be found of unusual interest. It is fresh, and full of the best stories, poetry, engravings, and useful matters; and such a magazine can be welcomed in every family in the country. It contains various and interesting. Published by Thomas & Talbot, 23 Hawley Street, Boston, at \$1.50 a year, postpaid, and for sale at all the periodical depots in the country, for 15 cents a copy. Buy a copy, and try it.

SPORTING MATTERS ABROAD.—London, May 7.—Hanlan will take a fortnight's rest before he commences his preparation for the match with Elliot on the 16th of June. Elliot is in strong work and rarely misses going over the entire course at top pressure once a day. Two to one on Hanlan is freely offered, with no takers beyond small amounts. The Sportsman advises English scullers to adopt the American style, which comprehends a longer slide and greater use of the legs and body than the English.

In reply to the challenge made by Mr. Barass, the backer of Boyd, Wallace-Ross offers to row Boyd for his own sun over the Thames championship course.

THE KILTERS AT THE CAPE.—The steamer "Pretoria" arrived at Natal on the 16th of March with the 91st Highlanders on board. The passage was made in 22 days 12 hours, the fastest on record. On the following morning the Highlanders landed amid much enthusiasm, the members of the band of pipers in their kilts being mobbed by Kaffirs. On their way to town from the wharf the pipers played the "Campbells are coming," and on their arrival in camp the Kaffirs kept shouting to the kilts pipers *Intanbe, Intanbe, (Women, Women)*.

A question of substrate sovereignty is likely to arise in the United States Indian Territory, land grabbers continuing their preparation to locate in that territory, notwithstanding the proclamation of the President, and force will probably have to be used to secure attention to his orders.

In the whole history of Medicine, no preparation has ever performed such marvelous cures, or maintained so wide a reputation, as AYE'S CHERRY PECTORAL, which is recognized as the world's remedy for all diseases of the throat and lungs. Its long-continued series of wonderful cures in all climates has made it universally known as a safe and reliable agent to employ. Against ordinary colds, which are the forerunners of more serious disorders, it acts speedily and surely, always relieving suffering, and often saving life. The protection it affords, by timely use in the throat and lungs disorders of children, makes it an invaluable remedy to be kept always on hand in every home. No person can afford to be without it, and those that have once used it never will. From their knowledge of its composition and effects, Physicians use the CHERRY PECTORAL extensively in their practice, and Clergymen recommend it. It is absolutely certain in its remedial effects, and will always cure where cures are possible.

Carpets.—Messrs. Woods & Co., Calais, advertise in to-day's issue, a new stock of Carpets and Room Papers, at very low prices.

It is considered that at present the New York banks are in a much sounder and stronger condition than they have been for many years past. The legal-tender reserve amounts to \$40,444,500, whilst at this time last year the Greenbackers reserve was only \$36,435,300.

An astonishing charge of forgery is made against Mrs. Sarah W. Underwood of Milwaukee, a woman who has moved in the highest society circles, and who not long ago possessed abundant wealth.

DIED.—On the 8th inst. Hannah, beloved wife of Capt. James Stinson, aged 80 years, leaving an aged husband and large family to mourn the loss of a devoted wife and affectionate mother, and many friends to regret her removal.

At Chicago, on the 1st inst., after a protracted illness, Catherine, wife of Mr. John Bond, aged 55, a native of St. Andrews, leaving a husband and large family, with relatives and friends in this place to lament their loss.

On the 12th inst., after a short illness, Wm. McKibbin, aged 30, leaving a wife and one child to mourn his sudden removal. The deceased was a young man of industrious and steady habits.

Parks' Cotton Yarns!

Awarded the Only Medal Given at the
Centennial Exhibition
For Cotton Yarns of Canadian Manufacture.
No. 5's to 10's.

WHITE, BLUE, RED, ORANGE AND GREEN.
Made of Good American Cotton with great care
Correctly numbered and Warranted Full
Length and Weight.

WE would ask the purchasers of Cotton Yarn
to remember that our Yarn is spun on Thro-
at Frames, which make a stronger yarn than the
Ring Frames, used in making American yarn.
It is also better twisted and more carefully reed-
ed; each hank being tied up in 7 leas of 120
yards each. This makes it much more easy to
wind than when it is put up without leas—as the
American is—and also saves a great deal of waste.

Those acquainted with weaving will understand
the great advantage it is to them to use yarn put
up in this manner.

COTTON CARPET WARP,

Made of No. 10 Yarn, 4-Ply Twisted.
WHITE, RED, BROWN, SLATE, &c.
All fast colors.

Each 5 lb bundle contains 10,000 yards in
length and will make a length of carpet in pro-
portion to the number of ends in width.
We have put more twist into this warp than it
formerly had, and it will now make a more dur-
able Carpet than can be made with any other ma-
terial. Since its introduction by us, a few years
ago, it has come into very general use throughout
the country.

All our goods have our name and address upon
them. None others are genuine.

(St. George, on Saturdays)

NOTICE.

ALL persons having any claims against the
estate of the late Mary E. Clarke, are re-
quested to present the same, duly attested to the
Subscriber within three months from date, and
all persons indebted to the said estate are re-
quired to make immediate payment to
P. BRITT, Executor.
St. Andrews, March 18, 1879.

THE GREAT CAUSE OF HUMAN MISERY.

We have recently published a new edition
of the radical and permanent cure (without
medicine) of Nervous Debility, Mental and Phys-
ical Incapacity, impediments to marriage, etc.
resulting from excesses.

Price, in a sealed envelope, only 6 cents,
or two postage stamps.

The celebrated author in this admirable Essay
clearly demonstrates, from thirty years successful
practice, that alarming consequences may be rad-
ically cured, without the dangerous use of inter-
nal medicine, or the application of the knife;
pointing out a mode of cure at once simple, cer-
tain and effectual, by means of which every suf-
ferer, no matter what his condition may be, may
cure himself cheaply, privately and radically.

This Lecture should be in the hands of
every youth and man in the land.

THE CULVERWELL MEDICAL CO.
41, Anna St., New York.

includes postage. Discount to Agents. Single
copies, ten cents. Sold by all N-wsdealers. Re-
mit by postal order to MUNN & CO., Publishers
37 Park Row, New York.

PATENTS. In connection with the
Scientific American, Messrs. Munn & Co. are
Solicitors of American and Foreign Patents,
and now have the largest establishment in the
world. Patents are obtained on the best terms.
A special notice is made in the Scientific Ameri-
can of all Inventions patented through this Agency,
with the name and residence of the Patentee.
By the immense circulation thus given, public at-
tention is directed to the merits of the new pa-
tent, and sales or introduction often easily accom-
plished.

Any person who has made a new discovery or
invention, can ascertain, free of charge, whether a
patent can probably be obtained, by writing to the
undersigned. We also send free our Hand-
Book about the Patent Laws, Patents, Caveats,
Trade Marks, their costs, and how procured, with
hints for procuring advances on inventions. Ad-
dress for the Paper, or concerning Patents,
