PROMOTERS OF ATHLETIC CLUB HAVE NOT LOST HOPE

Some Definite Steps Are Being Planned By Executive—Leaders Want To Be Sure of Approval of Citizens.

Although not having made any actual progress in recent weeks the officials of the Campbellton Amateur Athletic Club have not given up hope in this worthy undertaking on behalf of good clean sport in our town and are now making arrangements for some definite move which, it is hoped, will result in the founding of an all-round athletic association in Campbellton, without further delay. It is possible that this next step may take the form of a mass meeting of the citizens of the town and if this course is considered advisable it is hoped that citizens generally will manifest their interest by being present.

It should be borne in mind that it is not the desire or intention of the leaders of the sport movement to advance without the approval of the townspeople and it is with a view of making them thoroughly familiar with the aims of the club that this next step in the work of organization is being arranged for. While much interest has been aroused and much moral and financial support promised to those behind the enterprise it is felt by the executive of the newly-formed association that a more formal and more definite expression of interest and sympathy is necessary before the undertaking can be successfully consummated.

Another thing that should not be lost sight of is the magnitude of the project and the far reaching benefits which are certain to eventuate if the scheme is carried through to a successful issue. That this cannot be done without the co-operation of everyone is obvious but in view of the wide appeal of the movement untiring support should be forthcoming from all sides.

To those who are interested in sport for sports sake this movement offers a splendid opportunity and they should throw in their weight without delay. To the young people of Campbellton on whose behalf the enterprise was launched the appeal is a direct one for it is they who will benefit most if success crowns the efforts put forth. Among the parents of the community the appeal should be heeded without hesitation for it is their children the enterprise is primarily destined to help. To business men and women of the town who may not, for obvious reasons, feel the urge of any parental responsibility, the question at hand has a moral claim to their earliest consideration for it is a sane and feasible business proposition practically inestimable in its potential benefits from a business standpoint. As far as public-spirited men and women are concerned the matter under discussion has every right to their support. If Campbellton is put on the map athletically the advertising that the town will derive will produce returns which would warrant the outlay of much more money than it will be necessary for us to spend. Then there is the moral and educational value of the project to be considered to say nothing of the incalculable good of systematic physical training among our young people—the future citizens of our town.

Thus, with its undeniable appeal to citizens at large the athletic club should not suffer from lack of support. A timely movement on behalf of a most worthy cause has been auspiciously started. Let us as liberal-minded, public-spirited, conscientious and generous-hearted citizens respond with a promptness and liberality in keeping with our traditions and carry this movement through to a degree of success befitting the worthiness of the cause.

N. B. BURSARIES ARE AWARDED

Items of Interest in Connection With the Educational Work of I. O. D. E.

In order to perpetuate the memory of the men and women who gave their lives in defence of the empire in the Great War, the Imperial Order Daughters of the Empire has inaugurated a War Memorial which should be of great educational value to the youth of Canada. It includes Bursaries in Canadian Universities, Overseas Post-Graduate Scholarships and the placing of Historical Pictures in schools.

The winner of the Canadian bursary in New Brunswick this year is Mr. Ralph H. McKee of Fredericton, son of Lance Corporal G. M. McKee of the 29th New Brunswick Battalion, who died in active service in 1915. Mr. McKee has attended the High School in Fredericton where his record is good. He is taking an Arts Course in the U. N. B.

As there was no candidate in P. E. I. this bursary was awarded to Mr. Chas. M. Jones of Dalhousie, N. B., son of the late Major Jones of the 128th Battalion C. E. F. Mr. Jones has attended the Superior School at Dalhousie, and the Grammar School at Campbellton, and is now taking two years in medicine at Dalhousie, and will then enter McGill University.

The announcement of the Sarah Maxwell Prize competition for the best essay on "Heroism" was sent out in January to the capital cities of the provinces. The winners this year were Norma Barnford, of Victoria, and Malcolm Ross, of Fredericton, N. B.

Applications are now open for the Overseas Post-Graduate Scholarships, particulars of which may be obtained from the Provincial Educational Society. The winners this year were Norma Barnford, of Victoria, and Malcolm Ross, of Fredericton, N. B.

Twenty-seven sets of the War Memorial Pictures have already been framed in schools, leaving sixteen sets that can still be obtained on application to the Educational Society.

ROYAL BRIDE IS AN EXPERT ANGLER

That is, She Has Caught Some Big Salmon—An Expert Swimmer.

Princess Maud, London's royal bride of today, is the second daughter of the Princess Royal and the late Duke of Fife, and a niece of King George, with whom she is a great favorite. The Princess is thirty years old and has spent most of her life quietly with her mother, widow of the Duke of Fife, who lost his life as a consequence of a shipwreck off the coast of Mexico some years ago. Like her mother she is an expert angler and in this respect has spent many happy hours with King George on the banks of the River Thames.

She holds a record of having caught the biggest salmon ever taken on the Dee. She is a very strong swimmer and delights in open-air life. Lord Carnegie, whose bride Princess Maud will become at the ceremony in the Queen's Chapel in London today, is the eldest son and heir of the Earl of Southesk. The marriage will unite the royal family of England with a family which centuries ago had its estates forfeited because of a rebellion against the Crown.

SEVEN K. OF C. SCHOLARSHIPS

Plan of Order in New Brunswick Working Out Well So Far.

At the last meeting of the New Brunswick State Council of the Knights of Columbus, held here in May, 1923 a resolution was unanimously adopted, accepting a plan for scholarships for this jurisdiction which was submitted to the Convention by Dr. William P. Broderick, chairman of a committee which had been appointed at the meeting of the previous year. According to this plan, each Council of the Order in this province selects a boy, who is given a scholarship of one hundred and fifty dollars a year for six years.

These scholarships are given in alternate years until there are twenty-seven students at college when the number is continued thereafter. There are nine councils of the order in this province, which means that, on the fulfillment of the plan, each council will have three students at college in perpetuity.

Mr. State Deputy of the Province, Bliss A. Bourgeois, Moncton, appointed and the following committee to carry out the scholarship plan: Dr. William P. Broderick, St. John, chairman; A. J. Doucet, Notre Dame, Kent county; and George M. McDade, Chatham, secretary-treasurer.

The plan is working out very satisfactorily and up to the present the following students are at college under this arrangement:

St. John—Thomas Hennessy, West St. John, attending St. Joseph's University, Moncton.

Campbellton Council—Leander Arsenault, Jacques River, attending St. John's College, Chatham.

Bathurst Council—Cleophas Hachey, West Bathurst, attending Sacred Heart College, West Bathurst.

Miramichi Council of Chatham—T. Kehoe, Red Bank, attending St. Thomas' College, Chatham.

Woodstock Council—Paul Bowlin, Woodstock, attending St. Francis Xavier University, Antigonish, N. S.

Edmundston Council—Lorne Dube, Edmundston, attending St. Joseph's University, Memramook.

Grand Falls Council—Thomas McCann, Grand Falls, attending St. Thomas' College, Chatham.

BUSINESS OPPORTUNITY

S. W. Dimock is offering to rent his coal business for the winter. Any one wishing to take over a good business will do well to call on Mr. Dimock. Oct. 18-19.

HELD BABY CLINIC

Miss Maloney, Public-Health Nurse held the first Baby Clinic on Thursday afternoon last. Dr. J. H. Cookhouse from 2 to 5 o'clock. Dr. Murray was the examining physician and twenty-three babies were examined. This clinic will be held on Thursday afternoon of each week. More definite information and an account of the splendid Health Work being carried on here will appear next week.

You know Haskell Coffin—his page of the leading monthlies. One guesses a new Christmas box of Moll's Chocolates.

Johnnie—"It's no use. BIL, we can't steal anything because the key doesn't fit the pantry door."

Charlie—"All right then, we'll wait till Mother comes home and ask a reward for being such good boys."

MGR. ROSS CALLS DIOCESAN PARLEY

Railway and Development Problems to be Discussed in Gaspe.

Gaspe, Oct. 16.—His Grace Mgr. Ross, the newly appointed and consecrated Bishop of the Diocese of Gaspe, has forwarded a circular letter to the members of the clergy of his diocese calling a meeting of the Parish priests, delegates of all the municipal councils and representatives of professional and business men of the district through which the Bale Des Chaleurs Railway runs, for Oct. 30.

Special rates will be offered on the Bale Des Chaleurs Railway.

His Grace states that the object of the meeting is to discuss the railway problem in that region of the Province and take means of improving it where possible without coming in conflict with any interests. In addition questions which might affect the general development of the region are to be taken up.

The circular points out that after years of difficulties the Gaspe region wants to benefit by the same advantages as those offered to other sections of Canada and with this object in view, will seek co-operation. At the close of this congress, the first of its kind ever called by a Bishop, delegates are expected to wait on both the Provincial and Federal Governments.

Ottawa, Oct. 16.—Sir Henry Thornton, president of the Canadian National Railways, will attend a meeting at Bonaventure, Que., on Tuesday, October 30, to discuss ways and means of improving the railway service in the counties of Bonaventure and Gaspe along the lines of the Quebec, Ontario, and Atlantic, Quebec and Western railways. These lines connect with the Canadian National at Matapedia, Que., and run along the Gaspe coast for 202 miles down to Gaspe.

Among those who will attend are: Hon. R. Lemieux, member for Gaspe in the Federal Parliament and Speaker of the House of Commons; Hon. Charles Macle, member for Bonaventure; Hon. J. H. Kelly, Hon. Frank Carroll, J. F. Dugard, M.L.A., representing the Quebec Government; Dr. Gustave Lemieux, M.L.A.; Angus McLean, president of the Bathurst Lumber Company; J. S. Gordon, general manager of the two railways mentioned. A banquet is to be tendered to the delegates.

GIANT FISH CAPTURED IN
HARBOUR
JESDAY MORNING

A Dozen Shots Fired Before the Monster Gave Up Struggles—Is Exactly 30 Feet Long—Is a Species of Whale.

After an exciting chase about the harbour in a motor boat Tuesday morning a trio of local young men captured a monstrous fish just below the lower wharf and now have it on exhibition on the beach just off Ramsay Street. The giant fish is thirty feet long and measures about eight feet in diameter and it was only at high tide and with considerable difficulty that the curious creature was towed ashore.

Heading down river about seven o'clock Tuesday morning, George Richards, accompanied by Jim Chatterton and Billie Charlton sighted the big fish in the channel farther downstream. Hurrying back and securing a rifle the excited trio of amateur whalers chased the big stranger to shallow water and began to give it a warm reception with the use of their gun. It was a merry chase while it lasted for the big fish circled and dodged about to escape capture and clearly showed its alarm by lashing the water with its tail. Once when its pursuers came too close the frightened Barry nearly upset the boat with a sweeping movement of its great caudal fins. It was not long however until it ran aground and helplessly splashing in the mud. It is said that at least a dozen shots were fired before the big fish gave up its struggles. Another huge fish of the same species and presumably the mate of the one captured here was also chased on the same morning and was captured by another party on the Quebec side of the river.

The killing of the big fish aroused much interest along the riverfront. Housekeepers forgot unwashed dishes and other household duties and watched the chase from the wharf and river bank and great crowds thronged the beach when the curious monster was finally towed to the shore.

The exact name of the strange fish is not certain but it is believed to belong to the whale family for it greatly resembles the fin-back whale. Like that particular species it has a prominent dorsal fin five feet in height and it was this big fin protruding above the surface that first drew the attention of those who captured it. It has no anal fin but has two great fins on the forward underparts which seem to be thoracic fins rather than pectoral as they are located well down under the body. These measure exactly five feet in length and like the dorsal fin, are about three feet broad and five or six inches in thickness. The tail, measuring from tip to tip of the caudal fin, is nine feet in width. The body which is almost oval shaped is black excepting two large blotches of white on the underparts and the skin which resembles rubber seems very flexible and extraordinarily tough. The mouth and eyes are comparatively small. It is thought that these huge creatures were chasing small fish up the river and temporarily lost their bearings.

OPEN FALL PREDICTED.

A very open fall is predicted by fishermen, on account of the mackerel and cod coming so close to shore in the Northern portion of the province.

NIGHT CLASSES OPENED TUESDAY

Fifty Students so Far Enrolled—Classes To Be Held Twice a Week.

The free evening classes in vocational training held under the auspices of the Campbellton Vocational Education Committee began on Tuesday evening in the Grammar School here with an enrollment of fifty pupils. The different instructors have taken up their duties and there is no doubt but what this important branch of educational work so auspiciously started will soon win the appreciation it deserves.

With opening of the fall term four different subjects are being taken up, namely: Typewriting, book-keeping, dressmaking and motor mechanics. The last mentioned class did not open on Tuesday as applicants are still being received but it is expected that instruction in this branch of vocational study will be started on Thursday evening.

The dressmaking class so far leads in numbers having an enrollment of twenty-five pupils and is taught by Miss Nellie Annett. The class in typewriting comes second with an enrollment of fifteen. Madame Dugay, Principal of the Campbellton Commercial College is the instructor of this class. Book-keeping under the direction of Mr. J. R. Vallis comes next having so far an enrollment of ten pupils. Mr. Alexander Jamieson, of Harrison & Jamieson Ltd., will be the instructor of the class in motor mechanics. The class in dressmaking was organized last week by Miss R. N. Inch of Fredericton, Provincial Vocational Supervisor of Home-making Classes.

The classes in vocational training will be continued throughout the winter months meeting every Tuesday and Thursday evenings from 7.30 to 9.30 o'clock. It might be said that this free instruction in vocational training is a fine work which many citizens do not appreciate at its full value. For many years where this branch of educational work has been carried on many students have benefited greatly by attending these night classes. This may be a feature of our town life of which little will be heard, but the work which will be accomplished by earnest students and capable teachers is most valuable and worthy of every commendation.

WEDDING GIFTS

If you are contemplating the purchase of a gift to some friend who is about to embark on the "great adventure" call at the Central and choose something from our assortment of Cut Glass and Ivory. We also have many attractive things in Table Lamps and other bits of furniture that would be most appropriate.

RADIO

We have been receiving some particularly fine things in Radio lately. Why not get one for your own enjoyment during the cold fall evenings.

Healing

by the Zam-Buk method is far in ad-
vance of anything else yet obtainable.
Try Zam-Buk on any pimple, cut or
cold-sore and you will be astonished
at its swift, effective healing.

Zam-Buk is a super-balm scientifically
prepared from the richest herbal
oils and extracts. The wonderful

Soothing

action of herbal Zam-Buk is second
only to its powerful antiseptic and
germicidal influence.
When you apply Zam-Buk there is
never the danger of poison or disease
being 'locked in' the wound or sore as
with fatty salves and ointments. On
the contrary, Zam-Buk prevents your
sore or injury from taking 'bad ways',
kills off poisonous germs and grows
fine healthy new skin. Thus Zam-Buk
provides you with a handy ever-ready
healer and powerful natural

Antiseptic

Zam-Buk is unequalled as the sooth-
ing, swift and safe remedy for Cuts,
Burns, Scalds, Chaps, Chilblains,
Cold Sores, Eczema, Ringworm, Piles,
Ulcers, Poisoned Wounds, etc.

THE GREAT HERBAL BALM
It soothes, heals and restores everywhere.

Nervous Feeling Due
to Gas on Stomach

Pressure of gas on heart and other
organs often causes a restless, ner-
vous feeling. Simple burping bark,
glycerine, etc., as mixed in Alderika,
expels gas and relieves pressure and
nervousness almost INSTANTLY.
Acts on BOTH upper and lower bowel.
Alderika removes matter you never
thought was in your system which
poisoned stomach, causing gas and
nervousness. EXCELLENT to guard
against appendicitis. A. McG. Mc-
Donald, Druggist.

SAVED FROM PNEUMONIA
BY VICKS
Nova Scotia Lady Secures Relief
Overnight

Mrs. Charles Denier, of 2 Ert.
Queen Street, Amherst, Nova Scotia,
writes: "I have had pneumonia for
the last two winters and was on the
verge of having it again when I
bought I would try Vicks VapoRub.
Before retiring for the night I rub-
bed it thoroughly on my chest and
back and went to sleep. Although I
hadn't slept for three nights. In the
morning I got up feeling like a new
woman."
Dr. Oiler says pneumonia has taken
the place of tuberculosis as "Captain
of the Men of Death." It is a phrase
coined by old John Bunyan. And
Influenza is not far behind. The
germs of both these diseases are con-
stantly with us. The only reliable pro-
tection against them is the healing
power which comes from good health.
To avoid these dangerous diseases in
winter, don't let yourself get run
down and above all never neglect a
cold. Break it up in its early stages
with Vicks VapoRub, the external
vaporizing treatment for colds.
At all drug stores, 50c a jar. For
free test size package, write Vicks
Chemical Co., 344 St. Paul St., W.,
Montreal, P. Q.
Though Vicks is now in Canada it
has a remarkable sale in the States.
Over 17 million jars used yearly.

Suits for
Large Men

For the man who has rounded out the slenderness
of youth, Fit-Reform makes the selection of suitable
Suits and Overcoats an easy and gratifying success.
Fit-Reform designers have created special models
for large men—not merely large sizes of the regular
styles—but individual models that lend the desired
air of character, dignity and distinction to those
above the normal in height or weight.

BANDITS KILL FOUR OF TRAIN CREW; BLOW UP MAIL CAR AND ESCAPE

Choose Tunnel on Southern Pacific Railway for
Cold Blooded Crime—Escape in High Pow-
ered Auto Along Pacific Highway.

San Francisco, Oct. 15.—Leaving
four dead men behind, a gang of four
bandits fled toward the north after a
sensational hold-up and robbery of the
Southern Pacific crack San Francisco
express train No. 18, at the highest
point in the Sierran Mountains, sev-
enteen miles south of Ashland, Ore.
The dead are:

BATES, S. L., engineer, of Dunsmuir,
Cal., shot through the head.
EDWARDS, mail clerk, killed
when an explosion wrecked the mail
car.

JOHNSON, C. D., brakeman, of Ash-
land, Ore., shot through the chest.
SENG, MARVIN, fireman, of Dunsmuir,
shot through the head.

Poses from three points are com-
ing the wild country where the hold-
up occurred in a search for the bandits.
Only one report, on which a posse un-
der Sheriff Calkins of Yreka, Cal., is
working, gives a clue to their number.

This report says that the hold-up
men four in number, fled north along
the Pacific Highway, which parallels
the Southern Pacific tracks, in a high
powered touring car bearing a Wash-
ington license plate.

The robbery appears to have been
one of the most cold-blooded crimes
ever recorded in this section.
The train had left Ashland at 11:10
a. m. and was about 10 miles from
the engine crew had started their run
there.

Seventeen miles out, the train, car-
rying eight coaches in all, entered
tunnel 13.

The hold-up seems to have taken
place as the locomotive emerged from

the western end of the tunnel. Since
the engine crew and Johnson, who
was "deadheading" on the locomotive,
were killed, the details of the tragedy
cannot be ascertained.

"All that is known from passengers
and Conductor Marratt is that the
train came to a sudden stop while the
passenger coaches were still in the
darkness of the tunnel."

"Immediately after the train stop-
ped we heard an explosion," Marratt
later reported to J. W. Fitzgerald,
who went from Dunsmuir to the scene
in a special train.

Marratt found the bodies of the
three lying beside the locomotive when
he investigated after the explosion.
The engineer was at the right of the
engine, the other two on the other

After killing the men, the robbers
apparently entered the mail car. Just
how Edwards, the mail clerk, died is
unknown, but no bullet wounds were
found in his body.

The scene of the hold-up is on the
mountain divide, practically on the
California-Oregon State line. It is
rugged, unpopulated country. The
Pacific Highway for miles parallels
the railroad and offered a chance for
the bandits to escape with the aid of
confederates waiting with automob-
iles.

As soon as word of the hold-up
reached San Francisco, J. Dyer,
General Manager of the Southern Pa-
cific, offered a reward of \$2,500 "for
information leading directly to arrest
and conviction."

The editor of the Durham Chronicle
writes of his brief visit to Campbell-
ton as follows:

"From Bathurst to Dalhousie Junction
the scenery is beautiful. The railway
skirts the beautiful shores of the
Bay of Chaleur, giving the tourist
a continuous and ever-changing scene-
ry that would be hard to surpass any-
where."

A few miles farther on, but now
going almost straight West, we reach
the thriving town of Campbellton. It
is situated at the head waters of the
Bay of Chaleur and near the mouth
of the Restigouche River. The town
is beautifully situated and has a popu-
lation of 6,000, and is noted as a
prosperous business centre as well as
an attractive summer resort. It is a
well built town with paved main
streets, and others to follow. About
twelve or fifteen years ago the whole
town, with the exception of three or
four houses, was destroyed by fire and
the Campbellton of to-day has since
risen from the ashes and will be a very
attractive place in the near future. We
had only a short stop and were war-
ned not to get far away from the
train. In a swift motor car through
the town the party was shown the
chief points of interest but the time
was all too short. The motorist who
had the writer in charge had a bag
full of salmon in the car and was
very anxious that we should take it
as a present from him to remind us
of the place. It seems from what we
learn that fishers as well as lumber-
ing is an important industry. We
were reluctantly obliged to decline
the generous offer of the fish as we
had no way of preserving them, and
without ice they would be spoiled be-
fore our arrival home. We do not
know that other visitors were similar-
ly treated by their drivers. Camp-
bellton is near the northwestern cor-
ner of New Brunswick and only thirty
miles from the Quebec boundary line.
The run to Metapedia possesses a lot
of fine scenery, but darkness had ar-
rived and little more was to be seen
by the company till the train reached
Point Levis about six o'clock in the
morning.

Very Bad Year.
The loss in 1923 has been huge.
Over-estimates probably have been
made but there is no doubt that the
total will be staggering. New Brun-
swick has not been alone in suffering
from forest fires however. Quebec
has lost much worse, in fact no com-
prehensive statement has been issued
from that province. The heavy losses
everywhere were accounted for by the
fact that the spring and summer were
very dry, precipitation being much be-
low the average. The season of 1921
was very similar serious fires occur-
ing then at Westfield, Kedgwick and
elsewhere.

4-Wheel Brakes
Demonstrates to
Chief of Police

At the request of H. E. Loomis,
of the Buick Agency, Chief of Police La-
Verne Fonda and local newspaper men
yesterday afternoon "tried out" the 4-
wheel brakes on one of the Buick's
seven passenger touring cars. As a
result of the test many motorists han-
dling out west Main Street and
West Main Street road between the
hours of three and four o'clock used
their brakes rather hurriedly.

Travelling at a speed of thirty-four
miles an hour near the city limits,
the driver of the car suddenly applied
the brakes, stopping on the pavement
in a distance of thirty-one feet. The
next test of the brakes was made at a
speed of 48 miles an hour and the car
was halted in 98 feet.

Several tests were made on the gravel
road extending beyond the West
Main street pavement. At a speed
of 38 miles per hour the driver was
able to halt his machine within three
times its length. This was accomplish-
ed without skidding as was the stop-
ping made on the pavement after war-
ning had been applied. At a speed of
48 miles per hour on the slippery
pavement the car was stopped in
eighty-two feet—Battle Creek (Mich.)
Journal.

BUYS MORE
NEWSPAPERS

London, Oct. 14.—It is authoritative-
ly stated that Lord Beaverbrook has
purchased the Pall Mall Gazette
which will be absorbed by the Even-
ing Standard.

Lord Beaverbrook has just complet-
ed the purchase of the Standard from
Sir Edward Hulton as well as the
Daily Sketch and the Sunday Herald,
all Sunday publications.

"Bake Your Own Bread"

How healthy the family that eats home-made
bread at every meal!

Do you give it to your family? You would,
if you knew how good it is and how easy it is
to make. Baking, done the Quaker way, is
not a troublesome labor. It is a real pleasure.
Start now to make your own bread. Send a
postcard for our collection of original recipes
of home bread-makers.

Every sack of Quaker Flour is sold under
this guarantee. If it does not satisfy you,
the dealer will refund your money without
question.

had the writer in charge had a bag
full of salmon in the car and was
very anxious that we should take it
as a present from him to remind us
of the place. It seems from what we
learn that fishers as well as lumber-
ing is an important industry. We
were reluctantly obliged to decline
the generous offer of the fish as we
had no way of preserving them, and
without ice they would be spoiled be-
fore our arrival home. We do not
know that other visitors were similar-
ly treated by their drivers. Camp-
bellton is near the northwestern cor-
ner of New Brunswick and only thirty
miles from the Quebec boundary line.
The run to Metapedia possesses a lot
of fine scenery, but darkness had ar-
rived and little more was to be seen
by the company till the train reached
Point Levis about six o'clock in the
morning.

Very Bad Year.
The loss in 1923 has been huge.
Over-estimates probably have been
made but there is no doubt that the
total will be staggering. New Brun-
swick has not been alone in suffering
from forest fires however. Quebec
has lost much worse, in fact no com-
prehensive statement has been issued
from that province. The heavy losses
everywhere were accounted for by the
fact that the spring and summer were
very dry, precipitation being much be-
low the average. The season of 1921
was very similar serious fires occur-
ing then at Westfield, Kedgwick and
elsewhere.

4-Wheel Brakes
Demonstrates to
Chief of Police

At the request of H. E. Loomis,
of the Buick Agency, Chief of Police La-
Verne Fonda and local newspaper men
yesterday afternoon "tried out" the 4-
wheel brakes on one of the Buick's
seven passenger touring cars. As a
result of the test many motorists han-
dling out west Main Street and
West Main Street road between the
hours of three and four o'clock used
their brakes rather hurriedly.

Travelling at a speed of thirty-four
miles an hour near the city limits,
the driver of the car suddenly applied
the brakes, stopping on the pavement
in a distance of thirty-one feet. The
next test of the brakes was made at a
speed of 48 miles an hour and the car
was halted in 98 feet.

Several tests were made on the gravel
road extending beyond the West
Main street pavement. At a speed
of 38 miles per hour the driver was
able to halt his machine within three
times its length. This was accomplish-
ed without skidding as was the stop-
ping made on the pavement after war-
ning had been applied. At a speed of
48 miles per hour on the slippery
pavement the car was stopped in
eighty-two feet—Battle Creek (Mich.)
Journal.

Relieved Rheumatism Too, Says Contractor

Thousands of people everywhere
have learned of Tanlac through the
statements of others and have taken
the treatment with such splendid re-
sults that they in turn deem it only
fair to relate their experience for the
benefit of suffering humanity. Such
is the case with L. Desnoes, well-
known Electrical Contractor, living at
1066 Berri St., Montreal, who says:

"I couldn't do otherwise than pub-
licly endorse Tanlac for I am lucky
to find out about the medicine. The
same way myself. For nearly a year
I suffered from indigestion, and also
rheumatism in my legs. About a

month ago I was laid up in bed for
two weeks with this rheumatism and
a bad case of grippe. I lost about
eight pounds and felt miserable.

"Three bottles of the Tanlac Treat-
ment, besides greatly improving my
rheumatism, has made my eating and
digestion better than they ever were.
I have regained my lost weight, and
am feeling extremely well. Tanlac
is great."

Tanlac is for sale by all good drug-
gists. Accept no substitute. Over
37 million bottles sold.

Take Tanlac Vegetable Pills.

PUBLIC MUST PAY IF INCREASE GIVEN

Contention of C. P. R. Official
Before Conciliation Board
At Montreal.

Montreal, Oct. 11.—If the Canadian
Railroads are forced to pay the main-
tenance of way now increased rates
of pay demanded and involving ap-
proximately from 4 to 4½ million dol-
lars per annum there will be no alter-
native but to pass on such exorbitant
rates to the public in higher freight
charges.

The Board of Conciliation has
not been able to reach a settlement
with the C. P. R. eastern lines,
before the Board of Conciliation has
the authority to deal with the
application of the employees for
an increase in wages of five cents an
hour, all around.

The presentation of the employees
case was made by A. McAndrew,
Chairman of the Men's Committee
who conducted his case, and was fol-
lowed by Mr. Hodge who spent the
afternoon in laying before the board
the views of the company.

Proceedings were adjourned until Fri-
day so that the employees committee
may have opportunity to examine the
many documents filed by Mr. Hodge
with the understanding that if this
time is required for such study it
will be granted.

Mr. McAndrew, for the employees
presented a carefully drawn up case
the essence of which was that pre-
sent wages did not permit of decent
living standard, illustrating his con-
tention with figures from official sur-
veys, and drawing comparisons between
wages paid maintenance men, and
other classes of labor. Dealing
with the human element of employ-
ment, Mr. McAndrew pointed out the
need of greater risk for the main-
tenance of way men, resulting in a
greater percentage of break down, ph-
ysical and mental deterioration, of
greatly increased insurance rate
and no insurance was allowed in
instances. He claimed that the
greatest hazard of all was that
trying to live and provide for their
families on the wages they received.

He believed that from an econo-
mic point of view the efficient opera-
tion of the railway required that the
men should be experienced, and that
they must be paid at least as
equivalent to men in other lines.

WHY LUMBER IS
KEEPING UP IN PRICE

A group of Long Island build-
ers, New York, whose interest in lum-
ber is primarily in the construction
dwellings, houses, and just com-
pleting an inquiry into the cost of
building materials. They have re-
ceived the interesting conclusion that
mounting costs are due to a con-
sumption of timber in ways
which the general public rarely
thinks of.

Forests fires in this country,
learn for example, destroy re-
enough good timber to build a ro-
ad five-room frame dwelling, and
400 feet apart on both sides of
highway running from New York
to Chicago.

They find also that the railroads
the United States use about 125,
000 new wooden cross-ties every
year, or about four times the yearly
number of ties would be enough
to build of 40,000 miles of
railroads. The same quantity
of lumber could set Long Island
with homes.

If all the farm wood-lands in
country were joined together, they
would make a tract of about 200,
000 acres, or an area as large as
New England States plus New
Jersey, Pennsylvania, Ohio,
Illinois, and Indiana. Were this
to be used as building material
instead of firewood to heat homes
ready built, it would suffice for
construction of several score
cities.

The printing and publishing
trades have come under the ac-
cuse also for they learn that every
paper, magazine, and book con-
tains an amount of non-printing
text to a strip as wide as the
very daily newspaper, and each
46,000,000 miles, or half the dis-
tance to the sun. If such a quanti-
ty of wood had been turned over to
the pulp, it could have been made
into houses, creating the con-
dition of timber covered
Even lead pencils have been
found to contain a quantity of
wood more than a billion a year
of waste and an amount of waste
Eastern just paper and just
already become scarce and
makers are eagerly hunting for
suitable woods. Builders are
trying to get these woods—Ex.

Escuminate Flat

Mr. and Mrs. Forest Wood
Benton, N. B. spent a few days
here last week.

OBITUARY

The death took place on Sept. 15th at the residence of her sister, Mrs. Henrietta McEwen, 2214 Lydia St., Victoria, B. C., of Miss Mary Lodge, daughter of the late Henry Lodge of the term to the last of September. Runnymede, P. Q. She was born at Matapedia, Que., and had been a resident of this city for the past four years and is survived by her sister of this city. The remains will be removed to the Sands Funeral Chapel on Monday, Sept. 17th when the remains will be removed to her sister's residence where the funeral will take place at three o'clock and interment made at Ross Bay Cemetery.

Alexander C. Ferguson.
The death of Alexander C. Ferguson occurred at his home at Dalhousie Junction on Sept. 26th after an illness of only six weeks. He was 55 years of age. He leaves to mourn his loss a widow and three children. The funeral was largely attended. Services being conducted by the Rev. E. J. Shaw and interment was made in the Presbyterian cemetery at Dalhousie.

Escuminac

A meeting of the Loyal Orange Lodge was held here recently. A prayer meeting was held here last week in the school house by Rev. Mr. Gough.
Mr. Gilker accompanied by Miss Bessie Garret and Miss Hardy motored from New Richmond on Sunday last and were the guests of Mr. and Mrs. Herbert Gault, Glen Bridge.

Kedgwick River School Report

The following is the report of the Kedgwick River School from the first of the term to the last of September: Number of pupils enrolled 17. Number of pupils daily present on an average 15. The following are the names of pupils present every day: Isabelle Broderick, Barbara Ferguson, Gertrude Broderick.

Those who missed not more than two days are: Lenna Sullivan, Stella Sullivan, Jean Sullivan, Patricia Broderick, Barbara Ferguson, Gertrude Broderick, Grace Ferguson, Marjorie Ferguson.

The following are the names of pupils who made over 60 of an average on examinations.
Standard V.—(advanced) Emily Farran, 76.6; Standard V.—Beatrice Ferguson, 71.6; Isabelle Farran, 67.3; Alice Broderick, 61.2.

Standard IV.—Grace Ferguson, 75; Bernard Broderick, 61. Standard II.—Lenna Sullivan, 90.5; Barbara Ferguson, 85; Bruce Curtis, 73.5; Patricia Broderick, 69.

In order to handle the grain this fall the Port William mill force of 300 elevator men will be increased to 700. From 120 to 150 grain trimmers will be employed.

For the five months to August, 1923, Canadian new-mill exports were valued at \$35,304,043 against \$27,257,382 for the same period in 1922. Pulp exports in the same period were valued at \$20,008,461 against \$16,075,533.

Grain loading on Canadian Pacific lines during the month of September totaled 26,376 cars or 38,240,200 bushels. This at the beginning of the loading season which was two weeks late this year on account of the retarded harvest.

This has been the greatest season for automobile tourists Montreal has ever experienced, according to the Secretary of the Automobile Club of Canada. Cars, he stated, had come into the city over the King Edward Highway at the rate of one hundred a day, an unusual number from California, Florida, Carolina and Virginia being noticeable.

There was nearly \$120,000,000 increase in the total trade of Canada for the first five months of the current fiscal year, according to a return made by the Department of Customs and Excise. The total trade of the Dominion, according to the return, for the five months ending with August, was \$785,000,000, as against \$625,000,000 during the same period a year ago. Imports during the period were about \$335,000,000, as against \$305,000,000 a year ago, while exports of Canada as a producer rose from \$315,000,000 approximately to \$385,000,000.

There is a heavy demand for bushmen, according to the Government Labor Bureau at Montreal. The big lumber companies have been recruiting men for the bush, and the prospects are that the demand will be sufficient to make fall and winter conditions good. Wages paid this year by the lumber companies are higher than last year, the rate paid being \$40 and \$45 a month, whereas a year ago the schedule was down to \$23 a month.

With the completion of the harbor works now in progress, Montreal will be in a much better position in 1924 to handle a record flow of grain than ever before. Windmill Farm elevator will be increased by 1,250,000 bushels storage capacity, making its total capacity 3,250,000. Four additional shipping berths are being provided at this elevator and will be in commission early next month, and the elevator's loading capacity will be increased from 30,000 to 50,000 bushels an hour.

Reports to the Canadian Pacific Railway, show that there arrived at Winnipeg from the British Isles this year for the purpose of working on the harvest, 11,883 men. Social efforts are being made to find occupation for as many as possible to cover the winter period, and it is stated that it is now probable that a considerable number of these harvesters from Great Britain and the Irish Free State will remain in the Dominion.

Addressing a recent meeting of the Vancouver Board of Trade, President E. W. Beatty, of the Canadian Pacific Railway, announced that the company proposed immediately to add two large modern steamers to its coast fleet in order to take care of increasing tonnage. He also announced the early completion of a new pier at this harbor at a cost of several millions, which has been made necessary by the increased traffic of Canadian trans-Pacific trade.

Cars Equipped With 4 Brakes Set New Record

Portage avenue was the scene of the police test of the four wheel braking system that is the standard equipment on the 1924 McLaughlin cars, and several hundred spectators witnessed Paul Welch shatter the safety limits that are set by the Canadian National Safety Council and the police departments throughout Canada.

Two tests were carried out, one on dry pavements and one on wet. In each test the McLaughlin car fully demonstrated that the four wheel braking system is capable of giving over one hundred per cent. more protection emergency than a car equipped with the old style two-break system.

One of the features that Welch showed on Saturday was driving at a twenty-five mile an hour clip without his hands on the steering wheel and coming to a full stop in the short distance of 29 feet 9 inches, without any perceptible skid. This demonstration of driving and braking without any control of the steering, which was for the purpose of showing that the front brakes do not grab and interfere with the desired directional steering of the car.

The following are the limits set by the C.N.S.C. and the police departments throughout Canada, including Edmonton, and the distances taken by the McLaughlin car to come to a stop while driving at the different speeds.

Official Limits
(Tests always carried out on dry pavement)
10 m. p. h. takes 9 ft. 2 in.
15 m. p. h. takes 20 ft. 8 in.
20 m. p. h. takes 37 feet.
25 m. p. h. takes 58 ft.
30 m. p. h. takes 83 ft. 3 in.
35 m. p. h. takes 113 ft.
40 m. p. h. takes 148 ft.

McLaughlin Six (dry pavement)
10 m. p. h. took 2 ft. 2 in.
15 m. p. h. took 10 ft. 1 in.
20 m. p. h. took 16 ft. 8 in.
25 m. p. h. took 27 ft. 1-2 in.
30 m. p. h. took 33 ft. 8-12 in.
35 m. p. h. took 41 ft. 3-12 in.

McLaughlin Six (wet pavement)
10 m. p. h. took 3 ft. 11 in.
15 m. p. h. took 11 feet 9 in.
20 m. p. h. took 20 ft. 8 in.
25 m. p. h. took 29 ft. 9 in.
30 m. p. h. took 42 ft. 9 in.
35 m. p. h. took 59 ft. 1 in.
40 m. p. h. took 90 ft. 6 in.

McLaughlin Four (dry pavement)
10 m. p. h. took 2 ft. 9 in.
15 m. p. h. took 10 ft. 3 in.
20 m. p. h. took 22 ft. 3 in.
25 m. p. h. took 28 ft. 5 in.
30 m. p. h. took 40 ft. 2 in.
35 m. p. h. took 58 ft. 8 in.

All these tests were carried out under the supervision of Chief of Police Shute, Sergeant of Police, traffic officer, and F. H. Needham, automobile editor of the Edmonton Journal.

Before and after the tests the speedometers on the cars were tested by Traffic Officer Smith and found to be registering correctly—Edmonton Journal.

A GREAT STORY YEAR
A golden sheaf of stories is in preparation for 1924 readers of The Youth's Companion. There will be stories of Western ranch life and thrilling adventures; stories of gumption in getting a job and making a success at it; stories of lively romances on the athletic field—football, college and working their way in the world of business; stories of the old farm folks down in Maine, told inimitably by C. A. Stephens; stories of Caleb Pease's shrewdness and horse sense; stories of resourcefulness and pluck in situations of danger and extremity; stories of the sea and of the mountains—stories to please every fancy of old readers and young, for readers who love the story of character and for those who like best the story of swift action. It will be a great year in the history of The Youth's Companion.

The 52 issues of 1924 will be crowded with serial stories, short stories, editorials, poetry, facts and fun. Subscribe now and receive it:
1. The Youth's Companion—52 issues in 1924.
2. All the remaining issues of 1923.
3. The Companion Home Calendar for 1924. All for \$2.50.
4. Or include McCall Magazine, the monthly authority on fashions. Both publications, only \$2.00.

Effective October 10, the cost to you of the famous Exide Battery for your car will be materially reduced. The following comparison of old and new prices will give an idea of the extent of these reductions:

CAR TYPE OLD NEW

Ford and Chevrolet 490 6 volt, 11 Plate \$25.75 \$18.90

Ford, Chevrolet 490, Durant 4, Essex, Gray-Dort 4, Maxwell, McLaughlin-Buick 4, Overland, Star and others 6 volt, 13 Plate 34.35 23.60

Durant 6, Hudson, Hupmobile, McLaughlin-Buick 6, Reo, Studebaker and others 6 volt, 15 Plate 41.20 28.20

Dodge, Franklin, Maxwell and others 12 volt, 9 Plate 48.00 34.50

F.O.B. DISTRIBUTORS' WAREHOUSES
Quebec City, Que., Sherbrooke, Que., St. John, N.B., Amherst, N.S., Halifax, N.S.

These lower prices have been made possible through the adoption of certain changes in merchandising methods by the manufacturer, based on the present day requirements of car owners.

The quality of the Exide Battery remains unchanged. It is the same as that which has brought world-wide acceptance of the Exide as the standard storage battery.

The new low prices put the Exide within reach of any car owner who wants the comfort and satisfaction of driving with the rugged, long-life Exide Battery.

NEW LAMP BURNS

94 P. C. AIR

BEATS ELECTRIC OR GAS

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps.

It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene.

The inventor, J. M. Johnson, 240 Craig St. W., Montreal, is now offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency and without experience or money make \$250 to \$500 per month.

KEEP THEM WORKING

Advantages Of Autumn Ridging

(Experimental Farm Notes)

At the Experimental Station at Charlottetown the advantages of autumn ridging have been so evident that we have always recommended it as one of the best autumn methods of preparing the soil for the following crop.

The term "autumn ridging" is applied to the throwing of the land up into ridges or ridges about 30 inches apart, similar to strip drills, in November, or just as late in the autumn as it can be done before the freeze-up. A double mouldboard plough may be used, but an ordinary plough run just on the right of the previous drill will make a very satisfactory job. With a three furrow plough the removal of the centre section permits the making of two ridges at once.

From a number of experiments conducted for seven years to determine the best preparation of soil in late autumn for the following results are of interest:

Soil land, ploughed in August, top-worked occasionally during the autumn, and ridged late, gave average yields of 47 bushels, 85 pounds oats. Similar treatment, except late cross-ploughing instead of ridging, 44 bushels, 4 pounds. Ploughed in October and top-worked only 40 bushels 18 pounds. Ploughed in the spring, 33 bushels, 6 pounds of oats. The ridging proved superior to any other autumn method of the eight tried, and produced an average of 14 bushels and 77 pounds more oats than spring ploughing.

Experiments conducted for six years in duplicate, to determine best method of preparing turnip land for oats, gave the following results:

Ridging late, 50 bushels, 14 pounds; ploughing shallow in spring, 48 bushels 12 pounds; ploughing shallow in autumn, 46 bushels 9 pounds; no autumn treatment, 45 bushels 28 pounds. The ridging again gave a considerable increase over other methods. These experiments were carried on in connection with a five-year rotation.

The following is a summary of the advantages of autumn ridging:

- (1) When the ridging follows the contour of the land, it prevents wash-erosion and the formation of gullies on allides.

- (2) Ridging exposes a greater surface to the action of rain, snow, wind and frost, more or less, and thus aids in the breaking up of the soil.

- (3) Ridged land can be worked from week to ten days earlier in the spring. This frequently means the difference between a poor crop and a good one.

- (4) Ridging exposes the roots of biennial and perennial weeds to the killing action of sun, wind and frost, and thus aids in their destruction.

- (5) Land that has been ridged will be more quickly obtained, and the average crop on soils prepared by autumn ridging will be considerably increased.

Her Advice
Ned—"Darling, say the words that will make me the happiest man in the world."

Edna—"Shall I really?"
Ned—"Oh, if you only would."

Edna—"Well, then stay single."

Exchange.

Thousands of chicks were lost in my community last spring but much of the trouble was due to poor cold. The chicks should not be brooded in flocks larger than five hundred. Half of that number is better. However, one has chicks to brood when it becomes necessary to brood them in large flocks. White diarrhoea has largely been eliminated by state testing and careful breeding. Broilers bring good prices at a weight of two pounds or a little less, and when the flock runs fifty-fifty as to sex, the cockerels should pay the feed bill until the pullets begin to lay. Quick maturity is assured for the pullets by careful feeding and large runs. At maturity the birds may be placed in the laying-houses to remain until called out for market after their days of productiveness are over. Of course, other things that produce poultry money are careful buying of feeds and good methods of marketing.

Making Poultry Pay "Stabilizing" Agriculture

Poultry keepers come and go with the passing seasons. Some make money out of the proposition and some fail. The latter are always dropping out by the wayside, as is attested by the abandoned plants and quietly seen about the countryside. However, there are fewer failures than in recent years than formerly, and this must be attributed to the fact that farmers and others are making more success with hens. I have studied the successes of a number of prominent eastern poultrymen and the farmers, but the commercial poultryman—and I have learned that all seem to follow a well defined plan. I have been following this plan for several years and have learned, I believe, a few things that will help you.

Briefly outlined, the plan is this: Early hatching and quick maturity of pullets, selling the broilers at the earliest possible stage of the game, eggs when eggs are high, forced winter production and rapid curing during the spring and summer. It really does not matter what the breed, although I have found that the general purpose breeds have the preference in the section where I have made my investigations. This might be called intensive poultry keeping. Here is my plan, which I confess to have learned from others, particularly from the poultry book department of New Hampshire University: Chicks are hatched or purchased as day-olds in March, they are matured as rapidly as possible, the cockerels being sold as broilers at the age of about ten weeks. They should be on the feed to feed the entire flock until the pullets commence to lay. If properly matured, the pullets will start production in August and lay a high percentage during the fall. A second crop of pullets should be hatched in the first of the year. During the winter, spring, summer and fall, the birds will follow closely on the heels of the first flock. During the winter, spring, summer and fall, the birds will follow closely on the heels of the first flock. During the winter, spring, summer and fall, the birds will follow closely on the heels of the first flock.

What has all this to do with stabilizing agriculture? Just this, that butler is a product that better than most defies distance, which is the enemy of the Prairie farmer. It is an alternative product which is in immediate competition with the whole world and Canada will be at a disadvantage in competition with New Zealand until she can turn out as good and even a product. To do that we must have as good equipment. In the populous dairy sections of Ontario and Quebec the production of milk ought to warrant at least as good factory facilities as New Zealand has, yet the exporter says Ontario butter is not wanted in the British market. In the more sparsely settled west, quantity production is not so easy, yet the quality is very high. A greater volume of production would enable them to further improve their product and take New Zealand's place in the British market on an even basis of lower transportation costs. This, of course, means that more cows must be kept and more land must be brought into production. There is no question that the best contributor to stability is mixed farming, in so far as that is attainable. In most cases the farmer who is in a fairly well settled section would profit by changing from purely grain farming to dairying, but that is not the case in all sections. The possibilities of stabilizing agriculture by diversified production are so great that they are not to be lightly cast aside. The difficulties may not be as insuperable as, at first sight, they appear. There is even now a decided trend in that direction, and many farmers have made a start. If readers will send their experience to the Witness they should be of very great help to many who are trying to find methods and means of making farming a stable occupation for themselves.

NOTICE OF SALE

JOSEPH ALAN LEBLANC of the Town of Campbellton in the County of Restigouche and Province of New Brunswick, do hereby give notice that he has been appointed by the Court of the County of Restigouche and Province of New Brunswick, to sell by public auction, on the 18th day of November, 1923, at 10 o'clock in the forenoon, at the Court House in the Town of Campbellton, the following described lands, to-wit: A certain lot of land situate in the County of Restigouche and Province of New Brunswick, bounded by the south-western corner of a lot of land sold by the said William West to one Gustave E. Asher, thence running North by said Asher lot one hundred feet, thence by the northern boundary line of said Asher lot one hundred feet, or until it meets the northern side of the street, thence Easterly along the northern side of the street fifty feet to the place of beginning. Together with all buildings and improvements thereon, and the rights, privileges and appurtenances to the said lot and premises belonging or in any manner appurtenant thereto.

"How good it smells"—for it is packed fresh roasted, and the doubly sealed can preserves its rare aroma and flavor.

ROYAL COMMISSION ON PULPWOOD

Will Hold Meetings At Newcastle, Bathurst and Campbellton.

Hon. John Morrissey, M. P., has been advised that the Royal Commission on Pulpwood which is now holding its hearings in the Province of Nova Scotia will also hold meetings in New Brunswick on the following dates: October 16, 17—St. John; October 18, 19—Fredericton; October 22, 23—Newcastle; October 24, 25—Bathurst; October 26, 27—Campbellton; October 30, 31—Edmundston.

The commission is most anxious to bring out all shades of opinion on the large pulpwood and related questions and all the lumbermen and holders of timber lands are requested to attend the hearings at Newcastle for the purpose of giving evidence.

THE WONDERFUL HEROINE

Word has just been received of a most wonderful picture which is being given as a premium to all who subscribe to the Family Herald and Weekly Star of Montreal. This beautiful painting, entitled "The Wonderful Heroine" in the most delicate colors, is in keeping with the subject. In size the picture is 18x24 inches, on rich, heavy paper.

When one considers that two dollars secures the Family Herald and Weekly Star for a whole year (52 issues of 72 pages each) including this beautiful and inspiring picture, one wonders how it is done. It is really a marvel. Each subscriber, new or renewal, will receive the picture provided he acts quickly.

The amazing life story of "The Wonderful Heroine" has been printed in booklet form and our readers may have a copy free by sending a postal card for it addressed to the Family Herald and Weekly Star, Montreal. No charge of any kind is made for this wonderful story.

Buffalo steak will be abundant in Canada this fall. A herd of 2,000 surplus Buffalo, wintering on the range in the National Park at Banff, Alberta, will be given away to the people of the Dominion by the Government. Each subscriber, new or renewal, will receive the picture provided he acts quickly.

There have been large increases in the number of pure bred animals in Canada during the decade between the last two censuses. The increase in the number of pure bred horses between 1911 and 1921 was 44 per cent; of cattle, 130 per cent; of sheep, 75 per cent, and of swine, nearly 44 per cent. The number of pure bred horses in the Dominion in 1921 was 47,777, cattle, 260,658; sheep, 93,643, and swine, 81,143.

A conservative estimate of the amount of money spent in Quebec by tourists reaches \$2,335,750. From the beginning of May until the first of September, 15,000 motor tourists had called for information at the offices of the Quebec Auto Club. Taking an average of four people to each car, this meant that at least 60,000 people had come to the city by automobiles. Of this number there were approximately 3,000 camping parties, or 12,000 people.

At the Chateau Frontenac, Quebec, recently, Colonel J. S. Dennis, Chief Commissioner of Colonization of the Canadian Pacific Railway, outlined in a detailed speech existing conditions in Canada and prospects for the future. He emphatically stated that there was no cause for discouragement, but on the contrary, every prospect of a canonical of rapid development, including an increase in our population and the development of our latent natural resources in a way as to insure, in the comparatively near future, that we should be one of the woods, and progressing rapidly to a large population of a stable business and financial conditions.

MAKING GOOD.

Although certain Canadian correspondents of English papers did much to prejudice Hon. W. L. Mackenzie King with the English people before his arrival to attend the Empire Conference, that prejudice, as cable correspondents report, has been dispelled by the Premier's public utterances and dignified attitude to question imperial concern. The London correspondent of The Montreal Gazette writes enthusiastically of his public utterance, at the Royal Colonial Institution Dinner, where "the gathering was the most representative in the history of the Institute and Canada's Prime Minister scored a distinct triumph."

Replying to the toast, "United Empire," proposed by the Duke of Connaught, former Governor-General of Canada, Hon. Mackenzie King, the Gazette correspondent reports, "made a lofty but restrained speech, dealing with Empire problems. The Premier's eloquence made a profound impression on the entire company, and in contrast with the speakers of four other Dominions he scored a signal success."

"His peroration on the spirit of youth, as represented by the Dominions influencing the old world," says the correspondent, "was received by the entire company with prolonged applause. The chief note in Mr. King's speech laid stress on the desire for closer co-operation within the Empire, and he forcibly urged that Canada's destiny lay only within the Empire."

Mr. Mackenzie King is meeting at the Conference the most distinguished statesmen of the British Commonwealth, and Canadians may well be proud that their young Premier, like his predecessors in office, is worthily maintaining the prestige of the Dominion.

Optimistic and encouraging President L. W. Beatty of the Canadian Pacific Railway, on his return to Montreal, made a brief statement to the effect that the year's results (speaking of the crop) could not but be encouraging to the whole of Canada. The news of the excellent yield had gone round the world and once again brought Canada to the forefront as a desirable country in which British immigrants and others of a desirable class might find the opportunities for betterment denied them in their

own lands. The splendid crop, too, was not without its effect upon general business conditions throughout the country. There was noticeable a more cheerful outlook towards the future. The full effect upon business would only be told when the crop had been marketed, and if that were successfully accomplished, next year should be much better in a business way than either of the two preceding years. Considerable activity in the fishing and lumbering industries of British Columbia was also a great help. The labor situation was, on the whole, decidedly encouraging. The bringing out of the British harvesters had proved an excellent thing. Even with these men in the field there had been a shortage of harvest labor and without them conditions might have been serious. As it was, comparatively few of these men were returning to England, and Canada would be the permanent gainer by several thousand first class settlers.

Mr. Beatty stated that the west has shown a great interest in immigration matters and there apparently was a strong body of public opinion throughout the country which realized that the problem of peopling its vast spaces was the most urgent important of those facing Canada today. This opinion of the President of one of our great railway systems will be regarded as fairly optimistic and encouraging. When he comes to the Maritime Provinces as the hope is he will in the near future, we may expect to hear more directly from him regarding some of the problems in which we are keenly interested here.

PERSONAL

Mr. and Mrs. Blouin, Quebec, were in town on Wednesday attending the Bernier wedding. They returned home on Wednesday evening.

Mr. A. McE. McDonald of Campbellton is in town. Our old friend "Teddy Roosevelt" keeps well up in his traditional form—Chatham World.

The many friends of Mr. J. J. Bernier who were operated on for appendicitis at the Hotel Dieu Hospital, will be glad to learn that he is progressing favorably.

Mr. and Mrs. R. B. Roseborough entertained at their residence on Wednesday evening in honor of Mr. and Mrs. W. R. Fitzmaurice. Prizes were won by Mr. and Mrs. Fitzmaurice. The guests were Mrs. Fitzmaurice, Mrs. Hugh Carr, Mrs. M. M. Mowat, Mrs. T. G. Adams, Miss Ruth Cameron, Messrs. Colquhoun, Earl Starzak, M. M. Mowat, W. R. Fitzmaurice and T. G. Adams.

Mrs. (Dr.) Henri Brennan held her post-nuptial reception yesterday afternoon at her residence on Water Street. She was assisted in receiving her guests by her mother, Mrs. Calixte Champoux. The bride wore her wedding gown of lavender satin with silver lace and tulle. The room was profusely decorated with sweet peas, dahlias and potted plants. The color scheme in the dining room was pink and mauve. Mrs. Frank Champoux and Mrs. Philip Dupuis presided over the daintily appointed table.

Mrs. A. T. LeBlanc cut the loaves and assisting in serving were Misses Jeanne Champoux, Rosa Vermette, Grace Vermette and Marion Hareau. Mrs. (Dr.) Martin ushered the guests to the dining room and Miss Marguerite Champoux attended the door.

NEW OFFICES IN MOWAT BUILDING

Fine, Large and Well Lighted Offices Completed This Week.

The fine new offices just completed on the second floor of the B. A. Mowat at Co's store on Water Street are a notable addition to the number of fine new business offices which may be found in Campbellton. The new offices in the Mowat building just finished this week consist of two suites and two single offices to the rear. The front suites consist of two apartments each and are of pleasingly large dimensions. The rear offices may be rented as a suite or singly. The whole floor was well-lighted and the matter of proper ventilation has been given due consideration. The different rooms have been finished in two shades of yellow and these bright colors add much to their attractiveness. The offices are fitted with hard wood throughout. The varnished doors are of a pleasing design and are fitted with glass panels, which adds to their appearance. A separate side entrance has been constructed, its front being on the side of the building. The offices are reached by means of a substantial hardwood staircase, recently wide to permit the taking in of office furniture such as large desks, safes, etc. One of the front suites is already occupied by Mr. Wesley M. A. pastor of the church, performed the ceremony. The bride, who was given away by her brother, Percy G. Chalmers, wore a smart suit of navy blue point twill, with corsage bouquet of sweetest roses, fawn velvet hat and stone marten hair.

Professor Bayard Currie presided at the organ, playing the wedding marches and "O Promise Me" while the register was being signed. Immediately after the ceremony, Mr. and Mrs. Duncan left on a honeymoon trip to Boston, New York, Toronto and Montreal. On their return they will reside in Campbellton. The sister of the bride, Miss Lillian Chalmers, of Bathurst, was a guest at the wedding and was becomingly attired in a suit of brown point twill with square taupe velvet hat. Percy Chalmers, brother of the bride was the only other out-of-town guest. He wore a tuxedo, and was accompanied by his wife, Miss Elfreda Dobson, both of St. John, were among those who attended the wedding, which was informal but very pretty.

OBITUARY

Mrs. Jennie Hamilton. The sad news was received in the death of Mrs. Jennie Hamilton, widow of the late John K. Hamilton, who died at her home on Tuesday Morning Oct. 9th, at the Soldiers' Memorial Hospital. Although in failing health for some time she showed great faith and trust in her Saviour, never murmuring nor complaining. She is survived by three daughters, Elizabeth and Lillian, all at home, also two sisters and three brothers, Mr. G. H. Watt, Providence, R. I., Mrs. Peter Doucet, River John, John Henderson, El River, M. H. Henderson, and Alex Henderson, Dexter Maine.

A short and impressive service was held at her home Thursday morning conducted by the Rev. Mr. McNair. The remains were taken on the funeral service to New Mills for burial. The funeral service was conducted by Rev. C. F. McLennan. The pall bearers were Dr. P. McNichol, Alex Berahy, Peter Fraser and John Hamilton. The floral tributes were many and beautiful. Much sympathy is expressed for the bereaved family.

Mrs. Margaret Henderson. Mrs. Margaret Henderson, widow of the late Alexander Henderson, passed away at her home here, on Thursday evening, Oct. 11th, after an illness of about two weeks.

The late Mrs. Henderson was in her eighty-first year and was the daughter of the late John Galbraith of Charlottetown. Mrs. Henderson is survived by three sons and two daughters. The sons are J. Everett, James R. and A. Allan, and the daughters are Mrs. P. A. Macdonald and Miss Harrie of Campbellton.

Rev. Mr. McNair of St. Andrew's Presbyterian Church officiated at the funeral services which were held on Saturday at 2 p.m., and a quartette from St. Andrew's Choral beautifully rendered the hymns "The Lord is My Shepherd," "Safe in the Arms of Jesus," and "Lead Kindly Light." The cortege left the house at 2:30 for the Campbellton Rural Cemetery where interment was made. The funeral was largely attended, friends from near and near being in attendance to pay their last tribute of respect to the departed. The pall-bearers were Messrs. Andrew Adams, Allan Adams, McMillan, Wm. Miller, Donald McLaughlin and A. McE. MacDonald. The floral offerings were many and most beautiful, testifying to the general high esteem in which the deceased lady was held.

LOCAL ITEMS OF INTEREST

News Notes of Town and Country
Happenings Gathered by Graphic Reporters

NATIONAL FISH DAY. Notice has been received that October 22nd has been named as National Fish Day.

CARD OF THANKS. Mrs. Elizabeth J. Ferguson and family wish to thank their many friends for their kindness to them during their recent bereavement.

ESCUIMAC CHURCH SERVICES. Oct. 18th—11 a. m. Communion. 7 p. m. Communion and singing.

CONGRATULATIONS. Mr. and Mrs. Philip H. Bugold are receiving congratulations on the arrival of a son and possible future proprietor of the Florence Hotel at their home last evening.

PROFESSIONAL. Dr. A. Pierce Crockett, eye, ear, nose and throat specialist will be at the St. Louis Hotel, Campbellton, Friday, October 19th, where he may be consulted professionally.

MARRIED. At the Baptist Parsonage, Oct. 16th by Rev. W. W. Camp, Mr. Charles Herbert Main was united in marriage to Mrs. Louisa Main, formerly of New Castle. The happy couple will reside in Campbellton. The bride party were unattended.

ILL WITH BRONCHITIS. Toronto, Oct. 16.—Sittings of the operations court, inquiries into the claims against Germany for losses incurred yesterday were postponed until further notice, owing to the illness of Hon. William Purdy, who is suffering from bronchitis.

ENLARGING SIDING. The Canadian National Railways have a crew of men at work enlarging the yard at Patterson's crossing about five miles from Newcastle. The present yard has two sidings, each with a capacity of one train, and two more sidings of the same length are now being installed at the upper end of the yard. Considerable work is necessary before the rails are laid and a bank of about fifteen feet is now being removed. A large steam shovel and about sixty men are employed on the work.

UP-TOWN BRANCH. The management of the Central Bookstore has rented the store on Roseberry St., recently occupied by R. W. Stevens and will about the first of November open an up-town bookstore there. Owing to the steady increase of business the proprietors of "The Central" have found that the space at their disposal at the old stand has become insufficient to provide for carrying the extensive stock that their business requires. A general bookstore stock will be carried at the new up-town branch and in addition a large range of sporting goods, such as sleighs, toboggans, skis, etc., for the fall trade.

FOR JAPANESE RELIEF

A report of the results of the Japanese Relief Fund Drive, under the auspices of the local Red Cross Society, placed the total collected at \$394.90. Of this amount \$100.00 was collected in Ward I, \$200.00 in Ward II and the balance \$88.90 in Ward III.

NEW HOTEL COMPANY.

Alfred S. Veniot, Mrs. Josephine Landry and Clavia T. Elward all of Bathurst are incorporated as Queen Hotel, Limited, with capital stock of five thousand dollars and have offices at Bathurst. The company is to carry on a general hotel and restaurant business.

BIG BARQUE IN PORT.

The barque "Marborough Head" a Finland vessel, arrived in port yesterday afternoon and is unloading her ballast at the Government wharf. The "Marborough Head" which was here last season is a craft of 2418 tons register and has a crew of 26 men.

KEEN DEMAND FOR WOODSMEN IN NORTHERN PART OF NEW BRUNSWICK

Frederickton, Oct. 17.—A. T. Murchie, chief scaler of the department of lands and mines, who has returned from a visit to Charlottetown, P. E. I., said today that there was a shortage of woodsmen in that section of the province, though some "harvesters" have commenced to return from the west. Lumber woods operators are also being attracted to the province of Quebec and Ontario, he said, by the reports of high wages in some cases said to be as high as \$100 per month.

EDITOR'S MAIL

Campbellton, Oct. 18th, 1923.
To My Customers:—
On the 16th of October I had the honor of a visit of two bright individuals, Mr. and Mrs. H. W. MacKenzie, who have been in the business of selling groceries which is more favorable than to sell liquor.

I wish the Liberal party would go after bootleggers and rum runners, instead of bothering a citizen of Campbellton trying to make an honest living.

Thanking you Mr. Editor for space, I am, yours truly,
A. ALLAIN, Proprietor
RIVERSIDE MEAT MARKET.

Simon Collick.
At the home of Alexander Robertson of Robinsonville on the evening of Sept. 19th, Simon Collick passed away at the age of seventy years. The funeral took place on the 21st Sept. Interment being made at Dawsonville. Rev. Mr. Yates officiating.

DINNER AND SALE.
The Ladies' Aid of Wesley Methodist Church will hold a Dinner and Sale on Friday, November the 23rd. Oct. 18-19-20.

PRESENTATION TO RECENT GROOM.

By Many Friends of Mr. Adjutor Bernier on the Eve of His Marriage

Messrs. J. R. and E. A. Cantin were hosts at one of the most largely attended social functions of the season when a host of friends of Mr. Adjutor Bernier, whose marriage to Miss Corinne Roy took place yesterday morning, gathered at a stag given in his honor on Monday evening.

The evening abounded in fine speeches both short and long and of a varied nature. Many local business men spoke in flattering terms of the splendor of the occasion.

Mr. J. W. Howar, made the presentation address on behalf of the friends and in well chosen words voiced the sentiments of all present for the happy occasion.

WOMEN FROM FORTY TO FIFTY

Will Be Interested in Mrs. Thompson's Recovery by Use of Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"Lydia E. Pinkham's Vegetable Compound has done me good in every way. I was very weak and run-down and had certain troubles that women of my age are likely to have. I did not like to go to the doctor so I took the Vegetable Compound and am still taking it right along. I recommend it to my friends and to any one I know who is not feeling well."—Mrs. Thompson, 308 Liasie St., Winnipeg, Man.

When women who are between the ages of forty-five and fifty-five are beset with such annoying symptoms as nervousness, irritability, melancholia and heat flashes, which produce headaches, dizziness, or a sense of suffocation, they should take Lydia E. Pinkham's Vegetable Compound. It is especially adapted to help women through this crisis. It is prepared from roots and herbs and contains no harmful drugs or narcotics. This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful cures it has effected.

Women who suffer from the above troubles should write to the Lydia E. Pinkham Medicine Co., 222 Central Bldg., Lowell, Mass., for a free copy of Lydia E. Pinkham's Private Book, upon enclosing a few lines.

The merchant handling Coristine furs is a reliable dealer you can depend on.

How to Make Delicious Dishes With Nuts

Nuts of different kinds enter largely into cooking plans nowadays, but home cooks do not always make a wide selection in combining the best kinds and the food with which they are used.

Nuts cook in various ways according to their own characteristics. Some have more oil or fat and flavor than others. These points should be considered.

Pecans, for instance, are very rich and flavorful and should be used with rather lean meats and in fruit salads, with boiled dressings preferably. Walnut meats and blanched sweet almonds are best in cake. Pine nuts which are very rich and oily, are at right for dressing in hot sauce, but should be used sparingly in salad. Pistachio nuts are good in stuffings as well as in sweet dishes but they are not much of an addition to salads. The oily Brazil nut cooks well, but is at its best glazed or sautéed. The peanut is useful in many ways in its natural state, while peanut butter is used in many new dishes that are a revelation in good cookery. Almost all of the fatty nuts make good soup material.

Savory Ramekins.
Dice enough cold, cooked veal to make a cupful and a half. Chop very fine one onion, half a red pepper, a little parsley and a few celery leaves and add them to the meat with three-quarters of a cupful of fine crumbs, a teaspoonful of chopped onion, a beaten egg, a little pepper, salt, a half teaspoonful sugar and a little cream. Fill ramekins with this mixture after battering them well, dot the tops with butter and dust them with just a little grated cheese. Bake the mixture for from fifteen to eighteen minutes, browning it delicately on top.

Chestnut Soup.
Remove the shells from three-quarters of a pound of French or Spanish chestnuts, then place the nuts in a pan of warm water and let them come almost to the boiling point. Throw off the water, add a little cool water and remove the skins from the nuts. Throw the nuts into clean water and rinse, then wipe them dry. Put the nuts into a saucepan with a pint of good, clear stock and stew them for from half to three-quarters of an hour. Add during the boiling, a cupful more of stock. When the nuts are soft, put all of them through a puree sieve and add the juice of an egg, salt, pepper, a saltspoonful of mace and a cupful of hot cream.

Scalloped Asparagus.
Drain and cut fine a small can of asparagus tips. Add a half cupful each of crumbs and chopped walnuts, a beaten egg, pepper, salt, the juice of an onion, and a tablespoonful of chopped celery leaves. Heap these ingredients in buttered ramekins, dot them with butter and add to each dish a tablespoonful of cream. Bake the asparagus until it is brown.

Nouvelle

The weather has been favorable for the past few weeks and almost every one has finished with farming. Mr. and Mrs. Harvey Parker are receiving congratulations on the arrival of a baby boy.

Mr. John Wafer of Fleurant, Quebec, visited friends here last week. We regret to learn of the sudden illness of Mrs. Esther Bels, who has been employed with Mr. J. A. Allard. All wish her a speedy recovery.

Mr. J. McNeil of Eganville, was the guest of his brother, Charles McNeil on Friday.

Mrs. Geo. Williamson was visiting in Campbellton last week.

Mrs. J. Landry is visiting friends in Carleton.

Some Peculiar Facts About Women Of the Day

Census statistics indicate that one out of every five women in the United States remains single.

Mrs. Dolly Wilson, a widow living in Stokes County, N. C., is the mother of nine veterans of the World War.

Equal educational facilities for women are among the first demands confronting the new government in Egypt.

Sir Walter Scott's mother was a woman of marked individuality and talents, while his father has been described as rather dull.

Mrs. Lloyd George is a strong believer in prohibition and intends to make a careful study of the problem during her stay in America.

The only Chinese woman doctor in America, so far as records show, is Margaret Chung, who is engaged in practice in San Francisco.

Adolescents for girls and women will be one of the leading topics for consideration at the tenth National Recreation Congress, soon to be held at Springfield, Ill.

Membership in the "Club of 13," a new Boston social organization, is limited strictly to women who find popular superstition, especially those regarding Friday and 13.

Three hundred and forty-five women are serving in every elective office in town government in Connecticut, according to a bulletin just issued by the Connecticut League of Women Voters.

In the Turkish theatre the female roles are nearly always played by Armenian actresses, as Turkish women are forbidden by law from taking any part in a theatrical performance.

Mrs. B. A. Moore, one of the first women members of the board of aldermen in Charleston, S. C., never attended a political meeting till the nomination and election.

Bachelor of Laws and Doctor of Jurisprudence were the degrees conferred upon Miss Gladys Turner, Clinton, N. C., the only woman in a graduating class of one hundred and twenty-eight at the University of Michigan Law School this year.

There have recently come to light some extraordinary facts of strength by a Hindu woman, who is declared by competent observers to be a person of greater physical prowess than the renowned Sandow.

The woman in question is Miss Tarabai, born some thirty years ago in a village in Rajpootana. One of her remarkable feats is to lie upon the ground and permit a cart laden with men to be drawn across her chest without arms or feet. Miss Tarabai had placed upon her chest, while two men pounded upon it with heavy sledges.

ity and exercise of restraint on the part of the parent.

During the three years prohibition has been in operation there has been a steady falling off in industrial accidents and an increase in the worker's efficiency.

There has been a continuously increasing activity in home-building. The volume of new homes built in 1922 was five times greater than that of 1918, the last war year.

There has been a definite movement towards more wholesome forms of social life and recreation. During each month of the year 1922 there were social and recreational buildings constructed that represented an expenditure of \$3,164,000, or an outlay for these purposes of \$2,200,000 a month greater than that of 1918.

There was, as shown by figures given by the Comptroller of the Currency in savings banks, an increase in savings bank deposits.

The next meeting of the Campbellton W. C. T. U. will be held Oct. 23rd in St. Andrew's Church Hall at 8 p. m. when the delegates to the convention held in Montreal will give their reports.

OBITUARY
Mrs. Duncan McKinnon

Mrs. Duncan McKinnon formerly of Campbellton died at her home 97 Webber Street, Lowell, Mass., Wednesday evening, Oct. 3rd, at 8:15 o'clock, aged eighty-two years, seven months.

Mrs. McKinnon was a daughter of Daniel and Margaret Macdonald and is the last of a family of eleven. She was born in Restigouche County and married Duncan McKinnon May 22nd, 1862.

She leaves behind her a husband, seven daughters and three sons: Mrs. Angus Dewar, Mrs. Ruth McGovern and Miss Katherine McKinnon, Lowell, Mass.; Miss McKinnon, New York; and Mr. McKinnon, Harve, Montreal.

Mrs. McKinnon, Everett, Wash.; and D. Cooke McKinnon, Vancouver, B. C.; twenty-two grandchildren and five great-grandchildren live to mourn her loss. Mrs. McKinnon was a present at the funeral.

member of the Campbellton Baptist Church and during the seventeen years of her life here was always active in church affairs. Mr. and Mrs. McKinnon moved to the United States eleven years ago, making their home in Lowell the greater part of that time. The funeral services were conducted by Dr. Edward Babcock, Brookline, Mass.; Mrs. Ellen Miller, Mrs. Ruth McGovern and Miss Katherine McKinnon, Lowell, Mass.; Miss McKinnon, New York; and Mr. McKinnon, Harve, Montreal.

Mrs. McKinnon, Everett, Wash.; and D. Cooke McKinnon, Vancouver, B. C.; twenty-two grandchildren and five great-grandchildren live to mourn her loss. Mrs. McKinnon was a present at the funeral.

New Beauty for Dainty Fabrics and much longer wear

The two worries you have in washing fine fabrics, dainty garments, are removed. You can launder them now with full confidence that fabric will not be harmed, or delicate colorings dulled.

Silks, satins, crepes, and dainty, expensive cottons come from the wash with new brilliancy and beauty. Thousands of homes women are using PRINCESS SOAP FLAKES.

These pure white, crinkly flakes give a wonderful "whipped cream" lather that dissolves dirt easily.

And save money in two ways: By giving longer wear from fine fabrics; and, being nothing but pure soap, they last longer—cutting soap cost.

You can't find anything better for use in the washing machine—nor, in fact, for all laundry or household use. In handy one-pound packages or bulk. Order some today and begin saving next time you wash.

PRINCESS SOAP FLAKES

Carnation Milk

Your Grocer can supply you with pure, convenient Milk

YOU'll welcome the wonderful convenience of Carnation Milk. You'll welcome it because you never need run out of milk at any time—you can keep a supply on your pantry shelves—always ready, always fresh and sweet, always the same.

What's more, your grocer can supply you. He is the Carnation Milkman. You can order it with your groceries.

Carnation Milk is just pure cows' milk with about 60% of the natural water content removed by evaporation, hermetically sealed in the container and sterilized. When diluted with a little more than an equal part of water, Carnation Milk has the consistency of milk as it comes from the cow.

Use it as cream in tea or coffee, on cereals or fruit; as milk for every use. Order several tall (16 oz.) cans or a case of 48 cans from your grocer.

Try this recipe and write for a copy of the Carnation Cook Book. It contains 100 tested recipes.

SCALLOPED POTATOES
One tablespoonful salt, 4 medium-sized potatoes, 1 1/2 cups water, 2/3 cup Carnation Milk, 1/4 tablespoonful butter. Wash, pare and cut potatoes in thin slices. Put a layer in buttered baking dish, sprinkle with salt and dredge with a small amount of flour. Add milk mixed with the water and butter and bake until potatoes are soft. This recipe serves six people.

Listen!

Have you heard about Peps? Peps is a scientific preparation put up in paste form, which provides an entirely new and effective treatment for coughs, colds, chest and throat troubles.

Peps contains certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapor, and are breathed down the air passages to the lungs. On their journey they soothe the inflamed and irritated membranes of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the lungs.

In a word, while no liquid or solid can get to the lungs and air passages, these Peps fumes get there direct, and at once commence healing.

FREE TRIAL Cut out this coupon, fill across it the name and date of this paper, and mail it (with 1c stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps, 50c. box.

LORD RENFREW AWAY.
Quebec, Oct. 18.—Lord Renfrew sailed for England on Saturday afternoon at 3:30. The ship was dressed for royalty, but that was the only evidence of formality about his departure. The Lord's departure gave Lord Renfrew an enthusiastic send-off.

APPOINTED TO WOMEN'S INSTITUTE OFFICE.
Frederickton, N. B., Oct. 18.—Miss Estelle Leblond, of Edmundston, has been appointed assistant superintendent of women's institutes of New Brunswick, succeeding Miss Benoit Leblond, of Moncton, who resigned prior to her marriage to W. A. Parson, of Quebec.

MURIC.
If interested in singing, piano or composition lessons, write MISS DE CORREY, Flat Lands, N. B. Oct. 18-4-wks.

DRY SHIPS CROWDED.
The announced policy of the United States government, to keep its ships dry has adversely affected the passenger travel on those ships. Under date of July 9, President Johnson, who is on his way to South Africa to conduct a prohibition campaign, called to the World League Against Alcoholism, who is in the country and the United States shipping lines and London to America are booked up to October 14. Dry ships are highly profitable, Mr. Johnson says.

ENGINEER NOT TO BLAME FOR ACCIDENT AT CROSSING.
From the item published in our last week's issue regarding the collision at the Andrew Street railway crossing last Thursday afternoon between the yard engine and a motor truck belonging to the Imperial Oil Co., it would appear that Engineer Glicker failed to sound a warning as the engine approached the crossing. We have since learned that such was not the case. The engine's bell was rung as it should have been and eye-witnesses of the accident, as well as the driver of the truck declare that the engine was in no way responsible for the accident. However it is contended by parties who were near the station that a warning as the engine approached the crossing did not ring. The driver of the motor was felled and a truck assets that he did not hear it, road, but managed but adds that it is possible that he stopping or damage might not have been if it had not been warned all of sounded as the noise of the vehicle ing through this. He was driving might have drowned to Chatham and e cut the sound of the bell. The Group, torn around the o he was just going to press as the act of the obstru client happened, otherwise this error were they just pl would not likely have occurred.

OBSTRUCTIO

LeBLANC CONCERT WAS AN EXCELLENT MUSICAL TREAT

(Moncton Transcript, Sept. 10th.) Before a large and appreciative audience in the City Hall Auditorium last evening an excellent musical concert was given by Mr. Arthur LeBlanc, violinist of this city. Those Monctonians who heard Mr. LeBlanc some years ago and were privileged to listen to his playing last evening could not help but note the rapid progress he has made and any doubts there might have been as to his promise for a brilliant career were entirely swept away last evening.

The programme was so selected as to give abundant opportunity for the display of technique and high artistic ability and the choice was not lost sight of by the talented young performer. That the audience were delighted with his playing was evident by the volume of applause that greeted each number and the warm encores to which Mr. LeBlanc very graciously responded.

"THE 1923 REVUE"

(Moncton Transcript, March, 1923.) The second part of the programme was opened with a Spanish scene featuring Desiré J. Bourque, talented singer and actor. He was assisted by Miss Margaret Thompson, from the Passes School Boston, who was brought to Moncton, specially for this scene. Mr. Bourque besides possessing a rich bass-baritone voice, has a wonderful stage appearance and is a brilliant actor and in his solo "The Bandster" he was given an opportunity to display his ability. NOTE:—Mr. Bourque will appear in his Spanish costume at "The 1923 Revue" and sing "The Bandster."

VOL. XXVII—No. 14

DRASTIC ACTION OF COUNCIL FAILS TO DISCOURAGE A

Severe Blow Struck By Radical Council—Sport Leaders May Be Out—Fine Meeting Held—Committee Appointed To Owner.

Despite the unexpected blow received through the sudden loss of their resources for an athletic field, the leaders of the sport movement are not discouraged by any means and have already formed a committee to fight for the proposed field. These plans were definitely decided upon at a meeting of the executive of the club which was held in Mr. J. W. Howarth's office on Monday night.

Besides the executive committee, Messrs. May, McKay and Combs, Messrs. Macdonald and Graham were present. Members of the Council, Messrs. May, McKay and Graham were present. Members of the Council, Messrs. May, McKay and Graham were present. Members of the Council, Messrs. May, McKay and Graham were present.

Others interested in sport were also in attendance and clearly demonstrated by their attitude that the athletic movement should be carried along to a successful issue.

Visitors Spoke. In addition to those mentioned, Jack Redfern, well-known athlete, athletic instructor and trainer of St. John was also at the meeting and upon being requested to speak, delivered a most able and convincing manner.

Redfern declared that he had been hoping for some time that there would be an organized movement on behalf of sport started in Campbellton. He stated that he had watched our senior hockey team and also many of our younger boys on skates last winter and emphatically declared that he was confident that Campbellton had abundant material which, if properly developed, would bring honor to our town. He further stated that he had been shocked and also slightly angered to learn that certain parties in the council had been instrumental in having the athletic grounds of the newly formed club taken away from them. He urged upon the meeting the necessity of fighting for their rights for in so doing they would be championing the rights of the working man's children.

The meeting went on to outline some of the work done on behalf of athletes in St. John and clearly showed that the athletic movement of there, was not a new thing.
