A POEM with a PURPOSE. "The Indian warriors of North America," says our author, "fairly lay claim to a readiness at all times to face danger and shake hands with death. The principal destroyer in this exterminating process is of course the United States, not the people, who are a generous and a great nation; nor yet the Government, for a sufficiency of food and clothing is voted annually for their maintenance, for which indeed the natives bartered their lands. But their supplies never reach their destination, they change into dollars in their transit, and disappear into the pockets of the thieving United States Indian officials." The scene of the above is in the forests of Florida, where the Uchee Tribe of Indians were once lords of the soil until they were conquered in war and nearly exterminated, the few remaining chiefs amalgamating with another tribe.
