NO. 22

### MARITIME PRESS ASSOCIATION.

#### Convention at New Glasgow—Election of Officers—Visits to the Various Industries and to Top of Mount Fraser.

During the past week the above association has been holding its annual convention in New Glasgow, and at which there was a very fair attendance. Splendid papers were given by various members and discussion ensued. Mr. A. B. Cotton, Truro News, gave the session on Sept. 5th, an account of the recent convention held at Ottawa, and of the effort made to obtain better postal privileges. The advertising problem was also ably dealt with by Mr. Cotton, and this resolved into an interesting debate.

Mr. W. A. Craik of the Printer and Publisher, Toronto, gave a most excellent paper, urging the Maritime Association to affiliate with the Canadian Press Association. The paper had been prepared by Mr. J. M. Inrie, Secretary of the latter association.

The election of officers resulted as follows:—

President, John T. Hawke, Transcript, Moncton.  
Vice-president for Nova Scotia, James A. Fraser, Eastern Province, New Glasgow.  
Vice-president for New Brunswick, J. P. Mulaney, The Press, Woodstock.  
Vice-president for P. E. Island, R.

L. Cotton, the Examiner, Charlottetown.  
Secretary Treasurer, D. P. MacLean, Greetings, Port Hood.  
Corresponding Secretary, Mrs. P. M. Fielding, the Tribune, Windsor.  
Auditor, James A. Stairs, The News, New Glasgow.  
Executive committee, J. L. Stewart, the World, Chatam, N. B.; A. R. Coffin, the News, Truro; J. C. Keating, the Times, Moncton; F. E. Cox, the Outlook, Middleton; M. Donavan, the Casquet, Antigonish.

The afternoon was devoted to sight-seeing, and visits in autos were made to the various industries of the town viz. The Eastern Car Works, Nova Scotia Steel Works, Brown Machine Works, Baily & Underwood Works, Humphrey's Glass Factory, I. Matheson & Co., Fraser Motor Works, W. P. McNeil & Co.'s Bridge Works, Nova Scotia Tool and Specialty Co., J. W. Cumming's Factory, Standard Drain Pipe Co., Colonial Granite Works. A run was also made to the top of Fraser Mountain, and also to Stellarton, where a visit was paid to the Allan Shaft. All were delighted and much impressed with this busy hive of industry, and were unanimous in expressions of thanks for the many kindnesses shown them during their stay in New Glasgow.

### Sad Death at Torbrook.

Frank Woodbury, of Torbrook, was taken ill last week, and after an examination by the medical gentleman called in, his case was diagnosed as that of appendicitis. On Sunday Dr. McKay performed an operation, but from the first the case seemed hopeless, and on Tuesday he passed away. Much sympathy is expressed for his wife and young children. A thorough business man, genial and sociable, he will be greatly missed.

### Allan Liger Ashore.

Montreal, Sept. 7.—The Allan line S.S. Hungarian, bound from Liverpool to Montreal, grounded in the river of Contrecoeur early today. The Hungarian in cargo left three Rivers during the afternoon and steamed slowly, owing to thick weather on the river. The Marine reports the S.S. Hungarian fast ashore on the South Ledge at Contrecoeur. Wireless was sent by the captain to Marine and Fisheries Department and two steamers went to her assistance.

### King's Trophy Won by N. S. Cadets.

Toronto, Sept. 5.—By a score of 147 the Nova Scotia Cadets won the King's Prize at the Long Branch Ranges this morning, the final competitions being fired off under ideal weather conditions. At the end of the 100 and 400 yards contests on Saturday the New Zealanders were in the lead, but by good work in the final stages the "Blue Noses" crept up and finally managed to carry off the coveted prize.

SECOND STAGE.

The scores (second stage), were as follows:—

Nova Scotia	59
England	54
British Columbia	51
New Zealand	42
Australia	33
Alberta	26
Woodstock	21

THE TOTAL SCORES.

The total scores were:—

Nova Scotia	147
England	136
British Columbia	136
New Zealand	131
Woodstock	95
Australia	72
Alberta	79

The two leading teams used the long Ross. The competition this morning consisted of snap shooting at a figure target 28 inches in height at the 100 yards to the 100 yards, first; two rounds at the intermediate stages, yards distance. There they had to complete the performance. The announcement that the King's prize would remain in Canada caused great rejoicing among the Canadian Cadets.

CABLED THE KING. The English team at the commencement of the camp was looked upon as the sure thing owing to their reputation as marksmen though it experience they have had at Bayley would give them an insurmountable advantage. As soon as the results were received in the camp word was wired to Colonel Lowther, A. D. C. to his Royal Highness, the Duke of Connaught, and also cabled to his Majesty. This was at the request of the Duke, who made the formal presentation of the cup to the Croets at the review last week. At the finish of the second stage for the Lord Roberts medal, Cadet R. Watts, of the British Columbia team leads with a score of 18. Cadet Knight of England is second with 17, and there are five scores of 16.

THE NOVA SCOTIA TEAM. The following cadets comprise the Nova Scotia team:—  
Capt. Rowland Moore.  
Lieut. G. Keeler.  
Joseph Poche.  
Carl Bennett.  
Gavin Stairs.  
Fred Jones.  
Edward Dorey.  
Joseph Connolly.  
Charles Latter.  
Harold Neal.  
Clifford Mosher.  
Henry Wambolt.  
Piers Brookfield.  
William Ray.

DEATH OF REV. H. B. MACKAY. The death occurred last week at Halifax of Rev. Hector H. B. Mackay, one of the best known Presbyterian churchmen in Nova Scotia. The deceased gentleman was born in Scotland 87 years ago and was ordained in 1855. For a few years he had the charge of Chipman N. B., and from there went to River John, where he spent about 25 years, going thence to Wallace, N. S. in 1905 he celebrated the fiftieth anniversary of his ordination. Then followed his retirement from ministry, since which time he has made his home in this city residing with his son, A. A. MacKay, K. C., and daughter, Mrs. G. Skead. Another daughter, Mrs. M. G. McLeod resides at River John. Rev. Mr. Mackay's death, which will be regretted by a large circle of friends, occurred on the tenth anniversary of his wife's death.

### HYMENEAL LONGMIRE—CROWE

This (Wednesday) morning at 10 o'clock the marriage was solemnized of Miss Bessie Harrison Crowe, daughter of James E. Crowe, Annapolis Royal, and Curtis Benjamin Longmire, of the firm of J. H. Longmire & Sons, Bridgetown. The happy contracting parties were married in St. Andrew's Presbyterian Church, Annapolis Royal, by the Rev. W. B. Muir, the church being very prettily decorated for the occasion. Green festoonings were freely used, with an arch in green and yellow having a large bell in white suspended from the centre. The scheme of decoration was carried out by J. P. Edwards, who was assisted by friends of the bride.

Considering the popularity of the young couple, it was not surprising to see a very large number of friends present, all anxious to do honor to those whom they sincerely esteem. The bride made a lovely appearance, wearing a becoming gown of cream cloth, a black picture hat with plumes, and carrying a bouquet of pink roses. The bridesmaids were the Misses Beatrice and Bessie Crowe. They were charmingly gowned in pink crepe de chene with black beaver hats, pink plumes, and carried bouquets of pale pink asters. The groom was supported by Dr. A. Boyd Crowe, brother of the bride.

After the ceremony a wedding breakfast and reception was held at the home of the bride. The happy couple left by auto for Digby, whence they will proceed on their honeymoon to St. John, Montreal, Niagara Falls and other Canadian cities. The bride's going-away dress was a suit of navy blue whipcord with a hat to match. The wedding presents were numerous and costly, including cut glass, china, linen, silver and pieces of furniture. Before going away a reception was held at the Manse, where a delightful presentation took place, consisting of a china dinner and tea set, the gift of members of the Presbyterian Church.

### DARGIE—EVERETT

At the home of the bride, in the presence of a goodly company of relatives and friends, the nuptials of George Glendinning Dargie, of Round Hill, and Edith Olive Everett, daughter of the late Capt. Everett and Mrs. Everett, of Carlton's Corner, were celebrated on the morning of Wednesday. 4th inst., the Rev. E. Underwood, Rector of Bridgetown, being the officiating clergyman. The east parlor had been especially prepared for the occasion, and at 10.30, to the strains of the Wedding March played by Miss Madeline Spurr, the bride entered on the arm of her eldest brother, Horace, who subsequently "gave her away." For the marriage the bride was attired in white serge, with white satin trimmings, and black picture hat, and carried an ivory bound Prayer Book. After the ceremony the company immediately sat down to breakfast, daintily served in the east and west parlors and dining room, and were thus pleasantly engaged when the arrival of chauffeur Beeler with his fine motor car, suitably decked, warned them that time and tide waits for no man—not even bride and groom. Shortly afterward the wedding trip commenced under the happiest auspices. The sun shone out, and the first stage, a motor drive to Digby, was one long to be remembered. From thence the happy pair took the S. S. Prince Rupert to St. John, whence they proceeded to Boston and the New England States. The popularity both enjoyed in their respective circles was amply demonstrated by the company present and the display of most useful presents in the west parlor, and it is certain that a bridal couple never started out with more sincere wishes for future happiness than did Mr. and Mrs. G. G. Dargie as they left the Everett homestead on Wednesday morning last.

### St. John Exhibition A Great Success

The Greater St. John exhibition of 1912 is now an event of the past, but its memory will linger as one of the most successful, in many respects, of the fairs which have been held in this city. Following, as it did, the Dominion Exhibition, the management had a hard task to make as good a showing as they did with a \$50,000 grant to cover their expenditures, but their efforts were crowned with marked success. Fortunately a considerable part of the Dominion grant had been expended on buildings which will be a permanent asset of the exhibition association and which benefited this fair as much as the last.

What has been accomplished reflects great credit on the directors and other officials, who gave whole-heartedly of their time and energy to make the exhibition a success. One man who must receive a fair share of credit for the results achieved is H. A. Porter who, in his first year as manager of the exhibition, showed his fitness for the position and his ability in handling problems attaching to it. Other closing days have not been so interesting and, with the expectation of something of the same sort, the attendance fell off, the total being only 4,650, making the grand total 32,049. This is 3,000 less than for the same period of the Dominion Exhibition, but the comparison is hardly fair as the second Saturday in 1910 was not a closing day. The attendance is 13,000 ahead of 1908 and 11,000 greater than 1906.—Ex.

### BENSON—ROWE

A very pretty wedding took place last week at the residence of Mr. and Mrs. Lewis Rowe, 37 Chapel street, East Gloucester, when their eldest daughter, Miss Susan Milbury Rowe was united in marriage to Frederick Smallwood Benson of Cambridge. The ceremony was performed in the presence of the immediate relatives by Rev. C. H. Williams, Ph.D., of Trinity Congregational Church. The couple stood under a beautiful arch of laurel and golden rod, golden glow blooms being at the sides with pleasing effect. The single ring service was used.

The bride was becomingly gowned in a handsome costume of Duchess satin, cut en train and she carried a shower bouquet of brides roses and lilies-of-the-valley. She was attended by her young sister, Eleanor Rowe, who wore a pretty gown of pink crepe de chene over pink satin. The father of the bride escorted her to the arch and the wedding march was played by Miss Annie E. Parsons. Following the ceremony, a reception was held, relatives and friends of the couple attending to extend congratulations. The dining room in which refreshments were served by young ladies of the O. N. O. S. club was decorated with dahlias. Guests were present at the wedding from Boston, Cambridge and Beverly. The ushers were Messrs. Paul B. Oakley, Lendall W. Harding and John S. Pomeroy. The couple were recipients of a great many elegant wedding gifts including cut glass, silver, linen, bric-a-brac and china. Mr. and Mrs. Benson took their departure by auto to their new home on Lexington avenue, West Somerville, and then took their leave for a brief wedding trip. Both the bride and groom are popular and well known in the ward. Miss Rowe has been a book-keeper in the office of the Gloucester Gas Company for a number of years and Mr. Benson was employed here as a carpenter on the J. Sloat Fassett mansion at Grapevine Cove during its construction and is now a house carpenter for the Burns Construction Company in Boston, which erected the Fassett House. Mr. and Mrs. Benson have the hearty best wishes of all their friends for a happy future.—Ex.

Mr. Benson is the son of Mr. and Mrs. Freeman Benson, who reside at Bear River.

### FUNERAL OF WILBUR C. YOUNG.

#### Large Concourse in Baptist Church, Where an Impressive and Touching Service Was Held—Beautiful Floral Offerings.

The esteem in which the late Wilbur C. Young was held by the residents of Bridgetown and surrounding communities found adequate expression in the large congregation that met in the Baptist Church on Wednesday afternoon, the 4th inst., to pay a last tribute of respect to the remains and to unite their sympathy with the members of the bereaved family.

The funeral service at the house consisted of reading Psalm 23 by the Pastor, Rev. N. A. MacNeill, and prayer by Dr. Jost. At the Church two appropriate and impressive solos were beautifully rendered by Mrs. Purdy, and a select duet by Miss Gladys Reed and Mrs. Purdy was also tenderly rendered. Scripture selections were read by the Pastor, and prayer offered by the Rev. B. J. Porter, pastor of the Methodist Church, after which an address suitable to the occasion was impressively delivered by the Rev. M. W. Brown, pastor of the Baptist Church, Springhill, Annapolis Co., a life-long friend of the family.

The speaker took for his text the words found in Psalm 39: 7, "And now, Lord, what wait I for? My hope is in thee." He emphasized the importance of a consciousness of the abiding character of hope amid the changing circumstances that go to make up the experience of life. The service throughout was most solemn and impressive, and the subdued emotion of that large gathering was expressive of the pent-up feeling of the people.

The service at the grave was conducted by Rev. N. A. MacNeill. It consisted of the committal and a brief prayer.

The funeral procession from the house to the church and from the church to the grave was preceded by the Town Clerk, the Mayor, and the Town Council followed by many others marching in a body in token of their respect for the deceased. The funeral arrangements were most ably carried out by Mr. Reed.

The bereaved mother, together with the brothers and sisters, have the sincere sympathy of the wide circle of the acquaintance of the departed in this hour of their deep sorrow.

### Labor Congress in Session.

Guelph, Ont., Sept. 9.—Representatives of the brain and brawn of organized labor in the Dominion filled the Armories' building in this city this morning, when President James C. Waters called to order the twenty-eighth annual meeting of the trades and Labor congress of Canada. The attendance at the opening was the largest and probably the most representative in the history of the organization's annual meetings. Seated as guests of honor on the speakers platform were J. Keir Hardie, the noted British labor leader and member of parliament, and John T. Smith, of Kansas City, who was present as a fraternal delegate from the American Federation of Labor. The exchange of greeting appointment of committees and other routine business occupied the initial session. The business of the convention will probably last an entire week. The eight-hour immigration laws, the working man's compensation acts, the alien labor act and other legislative measures, both federal and provincial, are to be exhaustively discussed by the Congress.

### The Provincial Exhibition.

The Provincial Exhibition will open in a blaze of splendor on Wednesday, September 11th and from the very first it will be a great show. No exhibition in the past gave indications on the eve of its opening of being replete with interesting features. Every building will be full of exhibits of the resources and industries of Nova Scotia. Music, vaudeville, foot races, horse races, pyrotechnics, and greatest of all in novelty will be the flights by a world famed aerial navigator on a Curtiss aeroplane. This machine will be steered by Chas. Walsh from whom there is no greater birdman in America. Two flights of thirty minutes duration will be made daily. The rates on railroads and steamships have been made lower for the Provincial Exhibition and there will no doubt be a large throng of people in the city and on the grounds and seated on the grand stand. Take a holiday and go to the Provincial Exhibition at Halifax and it will pay you.

*A Bid!*

THIS is an earnest, honest bid for your good will. If what we say is true we shall learn it. Otherwise it will cost us heavily. Besides we shall sacrifice the respect of the housekeepers.

*We assert:*  
Regal Flour bakes the best quality and the utmost quantity of bread per barrel of any you have ever used. It is economical, little goes far. It makes delightfully light, white loaves. And fine, flaky pastry.

*Guarantee:*  
Your dealer will return your money if what we have told you here is not true. He loses nothing. For we pay him back. Will you meet our sincerity half way? Please remember—Regal.

THE FARM

FOWLS FOR SHOW.

The first thing to do is to pick out the most promising specimens, going over the whole flock, and place them in a separate pen. Then go over them again and cull out those fowls that are off somewhat in color, shape, color of eyes, lobes, etc. Repeat the culling process until you get down to the number you intend to exhibit. Now place them in separate coops so they can be properly trained and conditioned. Fowls properly trained and accustomed to handling will show up to better advantage, and often will score a few points higher than those not so prepared for showing.

Weigh the fowls to ascertain whether they are up to the weight required by the standard. If not, they must be fed in such a manner as to take on the required weight in time for the show. If only a short time remains in which to bring them up to the required weight they may be given sweetened milk to advantage. Wet mash, consisting of about two parts corn meal and one part bran and middlings, should be fed often. Feed this in a crumbly state and not as a thin slop. Animal meal or green cut bone should also be given, but in moderation. Too much will cause looseness of the bowels. Animal food will add color to the comb.

Handle the fowls often—several times a day—while training them. This handling and training should be commenced a few weeks before exhibiting. Take a stick about two feet long and go over each fowl with this, making it pose so as to show its shape to best advantage. Examine the legs carefully. If they show any tendency to roughness rub them thoroughly with vaseline. After applying this a few times the scales should become soft, and loose ones can then be rubbed off. Remove all dirt from beneath scales with a toothpick.

The fowls should, if a light-colored variety, be washed thoroughly the day before sending to the show. For this washing three tubs of water are required. The first should be comfortably warm, the second cooler and the third a trifle cooler than the second. Into this third or last tub place about as much blueing as is used in an ordinary wash. Into the first tub shave a cake of pure castile soap.

Two persons are needed to do the work. Have the assistant hold the fowl on its side in the tub of warm water while you open the feathers and rub in the soap and water. Rub the lather well into the feathers and always rub the way the web of the feather runs, to prevent feathers from becoming broken. After it has been carefully washed remove fowl to the second tub and rinse thoroughly. Be sure to remove every particle of soap from the feathers; otherwise they will cling together when dry instead of fluffing out as they should. When thoroughly rinsed place the fowl in the blueing water and rinse again. Remove from the tub and press all the water possible from the feathers. Then rub gently with a soft towel or cloth, rubbing the right way of the feathers.

After a thorough rubbing place the fowl in a coop littered with clean straw and set it beside a hot stove—just close enough to be comfortable. As the feathers dry, gradually pull the coop back from the stove. To give fluffiness to the feathers lift them up often and fan the fowl, thus ensuring a thorough drying of the under feathers. Clean the feet and toes carefully, rub the legs with alcohol and polish with a chamois cloth. Rub the comb and wattles also with alcohol. The plumage of dark-colored birds need only be rubbed with a silk handkerchief to remove the dust and bring out the lustre.—O. E. Hachman, St. John Telegraph.

COWS HARD TO MILK.

Hugh G. Van Pelt, an authority in a dairy matters, in Kimball's Dairy Farmer, says of hard milking cows:—

There are two methods of treating the hard milking cow. One is to use the test plug. These can be purchased through the local druggists from reliable veterinary medical supply houses. They are merely plugs made so that they may be inserted in the end of the teat where they remain between milking periods. The reason a cow milks hard is because the sphincter muscle which contracts the end of the teat is rigid. The test plugs remaining in the teat between milking hours have a tendency to gradually distend and dilate this muscle in such a way that the cow gradually becomes easy to milk.

The second method is to cut the teats, thus weakening the sphincter muscle. This is accomplished with a teat slitter which may be purchased from veterinary

medical supply houses. It is an instrument that is inserted into the teat and by pressing the end small knives are pressed out in such a way that when the teat slitter is withdrawn the muscle is severed.

It is necessary after this operation to milk the cow several times each day while the muscle is healing in order that it does not grow back together as tightly as before the operation. Often it is well to ent the muscle in this manner and follow the operation by the use of the teat plugs.

There is really no reason why one should utilize his time with hard milking instruments if they are rendered easy milkers.

One precaution that is necessary to take is that all instruments inserted in the cow's teat should be carefully sterilized before each insertion. This guards against infection of the udder.

ROTATIONS FOR THE EAST.

As rotations possible in Eastern Canada, and as rotations likely to give satisfactory results, Prof. J. W. Grisdale, Director of Dominion Experimental Farms, recommends the following:—

Two-year rotation—Grain, hay.

Three year—Grain, hay or pasture.

Three year—hoed crop, grain, hay.

Four year—Hoed crop, grain, hay or pasture.

Five year—Hoed crop, grain, hay, pasture, grain.

Six year—Hoed crop, grain, hay or pasture, pasture.

LATE BLIGHT.

The late blight and rot of the potato is so generally known that frequently this malady is simply called the potato disease, says Prof. E. M. Straight of MacDonald College, in Canadian Horticulturist. It is the oldest potato malady, and was the cause of the potato famine in Ireland. The spots cannot be easily confused with other potato diseases. These diseased areas frequently begin at the edge or top of the leaf and spread until the whole leaf is involved. They present in moist weather a dark, somewhat water soaked appearance, with slightly purplish tint. Upon the tubers this fungus develops the well known dry rot of the field and storage pits.

POTATO FLEA BEETLE

The potato is often attacked by a very small beetle which also attacks the tomato, cucumber and beans. This insect is commonly called the potato flea beetle. They often congregate in such numbers that the leaves or plants appear almost black with them. Potatoes and tomatoes often have their leaves so badly eaten that the leaves shrivel and die in the case of the tomato, although the potato pulls through.

COLORADO POTATO BEETLE

The Colorado potato beetle is a native of a strip of country which lies just east of the Rocky Mountain range and includes eastern Colorado. In its native land the beetle lives upon the wild weeds of the potato family. The chief of these is the Buffalo burr, but the beetle is quite a general feeder on plants of this group including not only potatoes but tomatoes, egg plants, tobacco and pepper. The adults passes the winter in the ground. In spring the beetles emerge, seek food plants on which they feed and deposit eggs. These adults sometimes, though not always, do much injury. They die shortly after depositing their eggs, shortly after depositing their eggs, days, depending on the temperature. The young reach full growth about three weeks later. Soon eggs are laid again, and the second generation hatches. Ordinarily two broods are all that we may expect.

REMEDIES.

All these maladies may be controlled by Bordeaux mixture and Paris green or arsenate of lead. Bordeaux mixture of the usual formula, four-four-forty, and if Paris green is used one pound to forty gallons of water is quite sufficient. Two pounds of arsenate of lead will kill the beetles with equal certainty, and it remains on the foliage longer, owing to its sticking properties. The first application should be made as necessary about the time the Colorado potato beetle is hatching, and at intervals of ten days as required. Usually three applications will be quite sufficient.

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery that it has effected. For sale by druggists and dealers.

MAKING A BASEBALL.

The Winding Process is Done in Secret in a Locked Room.

In the center of the standard baseball, as used by the professional players, there is a globe of compressed cork covered with rubber. This globe is about an inch in diameter and around it are wound a few layers of coarse twine. It is then sent to the winding room, where machines first wind on thick four ply blue yarn. At frequent intervals the ball is soaked in a cement solution and put aside to dry.

Many different workers have to do with the winding of the ball. Each worker tests it for size and weight before he passes it along. The machines insure tight and even winding and there are different machines for different sizes of yarn. These machines are operated in secret in a locked room. When the ball has been wound to the proper size with blue and white yarn and has been dipped in the solution, it is wound finally with smaller yarn. Thus the firm, rough center is overlaid with finer and finer material until at last it is smooth and perfect, ready for the cover.

The best horsehide obtainable is used for covers. The pieces are cut by hand and dampened and stretched. The ball is put into stamps and the cover sewed on with cotton thread, which has a greater frictional strength than linen or silk. Each ball is sewed by hand and then put into a machine that irons down the seams. The polishing is done by still another machine. Then, after being stamped and wrapped, the ball is ready for market.

A ball weighs five ounces and is nine inches in circumference. In the course of manufacture it is weighed and measured five times.—Harper's Weekly.

NEW YORK'S FIRST CHURCH.

And the Earliest Religious Services on Manhattan Island.

The first religious service on Manhattan Island was held in 1623. This resulted in the organization of a church, the services of which were held in the upper story of a mill which ground the grain of the colonists. The first minister was Jonas Michaelius and the first elder Peter Minuit, director general of New Netherland.

The first church building on Manhattan Island was situated on Pearl street, between Whitehall and Broad streets, facing the East river. This structure was a poor, plain building of wood and constructed in 1633 by the West India company. Its congregation was presided over by Dominie Bogardus, the second clergyman of New Amsterdam, and was regarded as a most fitting place than the loft of the mill for public worship.

William Kieft, director general of the West India company, caused to be erected a church outside of Fort Amsterdam, which contained three long, narrow windows on each side, fitted with small panes of glass set in lead, on which were burned the coats of arms of the chief parishioners. This building was erected in the meadow of Mrs. Dominie Dirinus and fronted on a lane, now called Exchange place. In those days, however, it was known as "Garden alley." A large bowl of solid silver for baptismal services was made by the silver workers in Holland. In the belfry was the bell which had been removed from the old church in the fort.—Westchester County Magazine.

Mark Twain's Question.

Mark Twain when visiting Melbourne was the guest of the mayor on a picnic trip down the river Yarra, a stream renowned for its crookedness and for the odor from its banks. On account of the many turns in the river numerous signs reading "Dead Slow" are placed at the turnings to warn ship captains to slacken speed, and these attracted Twain's attention. Sauntering cautiously at the tainted breeze that came from the slimy banks he turned to his host. "What are these dead slows that smell so strong?"

Radium's Wonderful Power.

Suppose that the energy of a ton of radium could be utilized in thirty years, instead of being evolved at its invariable slow rate of 1,700 years for half disintegration, it would suffice to propel a ship of 15,000 tons, with engines of 15,000-horsepower, at the rate of fifteen knots an hour for thirty years—practically the lifetime of the ship. To do this actually requires 2,000,000 tons of coal.—Sir William Ramsay.

A Household Hint.

Young Wife (sobbing)—George treat me awful mean. He—be promised to give me a machine for my birthday, and it—came none today. Her Mother—Then what are you crying about? Young Wife—It's a—it's a washing machine.—Baltimore American.

Getting Squared.

The Doctor—Hurt! Whence those cries of agony? The Lawyer—They come from the office of the dentist. Last week the chiropodist operated on the dentist, agreeing to take his bill out in trade, and now the dentist is taking it out.—Satire.

A Good Tonic.

Have you noticed what a tonic a good laugh is? The next time you are angry instead of frowning make yourself smile, then laugh. You'll feel better.

On the Street.

Mrs. Spruce—That man you just nodded to looks familiar. Do you see him often? Mrs. Walnut—Not very; he's my husband.—Philadelphia Record.

A TRICKY TONGUE.

It Won Dean Spooner a Reputation For Unconscious Humor.

QUEER BLUNDERS OF SPEECH

Some of the Gems Attributed to the Old Dean's Habit of Interchanging the First Letters or Syllables of Words—American "Spoonerisms."

"Spoonerisms" is a recognized and accepted word used in the best circles of English society, even though it has not yet found its way into the dictionaries. Derived from the last name of the Rev. William A. Spooner, warden of New College, Oxford, it characterizes a curious sort of blunder that is habitual with that man—the unconscious interchanging of the first letters or syllables of words with what are often directly humorous results.

The most famous of all the stories about him tells how he once thundered out from the pulpit, "Jehovah was not on the side of the tinkering congs," meaning, of course, "conquering kings."

At another time he converted his audience by boldly stating that he held concealed a half wormed fish (half formed wish) in his bosom.

At a university dinner given at the time of Queen Victoria's diamond jubilee he proposed, "Three cheers for the queer old dean," and they were given with a will, in honor not only of the dear old queen whom he had wished to remember, but of the queer old dean who had forgotten himself.

Exasperated by a would be humorist among his pupils, he informed him that he had a "weeble fit," not meaning any new disease, but the old, old complaint of a feeble wit.

To another who had been mainly occupied in wasting two terms at college he complained, "You have been incorrigibly lazy and, to top it all, you have tasted two worms."

In quoting the familiar text, "Bow not thy knee to an idol," he made it "Bow not thine eye to a needle."

One day he discovered a stranger sitting in his family pew. "Madam," whispered he, "do you intend to occur few this pie?"

Also he could blunder as blithesome in an action as in speech. One windy day, as he was walking down High street in Oxford, his hat blew off. He stooped to pick it up, but at that very moment a hen hurried by. He set off in full pursuit and never stopped until he had caught hold of the neckless hen on Magdalen terrace. Then and there he solemnly tried to put the bird on his head.

Such are a few of the blunders in word and deed that have been attributed to the humor old dean. Must we accept them all as genuine? Not if we are to believe a contributor to M. A. P., who informed that paper that at a church congress a well known delegate said to him:

"Have you ever noticed how spoonerisms have died out since Canon Liddon is no more? I will tell you how it is. Liddon and I used to make them up. One of our best, which is always attributed to Spooner, is 'From Ireland's Greasy Mountains.'"

Spoonerisms at all events existed before Spooner himself was born. Some humorous ones may be found in Moore's Diary. "There is the story, for example, of an old actor named Parker who used always to say the 'poisoned pop' instead of the 'poisoned cup.' On night when he spoke it right at the audience said 'No, no,' and called for the other reading. Another actor mentioned in Moore made a great hit with the misquotation: 'How sharper than a serpent's tooth it is to have a toothless cat.'"

John Keats was one night performing a favorite part in a country theatre when he was interrupted from time to time by the squalling of a child in the gallery. At length, angered by this rival performance, Keats walked with solemn step to the front of the stage and, addressing the audience in his most tragic tones, said, "Ladies and gentlemen, unless the play is stopped the child cannot possibly go on."

America itself is not without its Spooners and its consequent spoonerisms. There must have been at least three Spooners in the western court when the following scene is said to have taken place:

"How far is it between these two towns?" asked the lawyer.

"About four miles as the tow cries," replied the witness.

"You mean as the cry tows," "No," put in the judge; "he means as the fly grows."

And then they all looked at one another, feeling that something was wrong.

A sort of conscious spoonerism was that brilliant jest credited to Dean Briggs of Harvard. During the year when the slogan "No hell with Yale!" first became popular among Cambridge undergraduates the dean, in company with Dr. Edward Everett Hale, was hurrying on his way to a great football game between Yale and Harvard.

"Where are you going?" asked another member of the faculty.

"In yeh with Hale," answered Dr. Briggs.—Boston Post.

Life.

Life is the finest of the fine arts. It has to be learned with lifelong patience, and the years of our pilgrimage are all too short to master it triumphantly.—Drummond.

Opportunity is like a pitched ball. The time to hit it is before it gets past the plate.—Kath's Companion.

BALKED THE BULL.

Presence of Mind That Saved the Life of a Little Child.

A regiment of the German army resting in a country road was appalled to see a great bull madly pursuing a little child in a field near by and yet so far away that the child could not be reached in time to save it nor yet saved by the shooting of the animal.

The bull had his horns down, and all the soldiers were horrified to see that in another moment the child must be gored to death. For an instant no one seemed to know what to do, and then the drum major shouted to the buglers of the band, who stood near with their instruments in their hands, to sound a loud blast. They looked agast.

"Sound, I say, for God's sake, to save the child!" repeated the drum major.

Then the buglers blew a blast at the top of their lungs. The drum major knew that animals of that species were so much affected by strange and high pitched musical sounds that they seemed compelled to imitate them. This bull proved to be no exception to the rule.

As soon as he heard the bugle blast he paused in his pursuit of the child, glanced toward the band, raised his head and began to bellow madly. The buglers kept up as high and discordant a tumult as they could, and meantime soldiers were running to the rescue of the child.

Before the bull had finished his attention to the bugles the child was in a place of safety.—New York Tribune.

STOCKINGS OF SILK.

The First Pair Queen Bess Wore Made a Hit With Her Majesty.

Up until the time of Henry VIII stockings were made out of ordinary cloth. The king's own were made out of yard wide taffeta. It was only by chance that he might obtain a pair of silk hose from Spain. His son, Edward VI., received as a present from Sir Thomas Gresham "a pair of long silk stockings." For some years longer silk stockings continued to be a great rarity. Says Stow:

"In the second year of Queen Elizabeth her silk woman, Mistress Montague, presented her majesty with a pair of black knit stockings for a New Year's gift, which after a few days' wearing pleased her highness so well that she sent for Mistress Montague and asked her where she had had them and if she could help her to any more, who answered, saying, 'I made them very carefully, of purpose only for your majesty, and, seeing these please you so well, I will presently set more in hand.'"

"Do so," quoth the queen, "for indeed I like silk stockings so well, because they are pleasant, fine and delicate, that henceforth I will wear no more cloth stockings."

"And from that day up to her death the queen never wore cloth, but only silk stockings."—New York Herald.

Ant Colonies. An ant nest or colony arises from eggs laid by one or more "queens." The developing young are tended by the sexless workers, or "workers." The maggots, or larval ants, are fed by them, often nourished out of the nurses' mouths, and are as carefully watched in respect of the temperature and other conditions of the nurseries as are infants in human beings. When full development occurs the pupae change into ants, which are either winged or wingless. The latter are the "workers" or workers. They may develop six jaws and appear as the "soldiers" of the colony. Those which are winged are the founders of new colonies. They are of both sexes, and they produce the eggs whence the new generations will be evolved.

Doughnuts.

Light, tender doughnuts quite unlike the usual solid kind are made with a cupful of sugar, a teaspoonful of butter, two eggs and a cupful of milk. Mix a scant pint of flour that has been sifted with two rounding teaspoonfuls of baking powder, making a paste that is soft. Stand the bowl containing it on the lee until it is very cold and then roll it out and fry before it loses its shape. The idea is to make the paste a little softer than can be rolled before it is stiff with cold and to use as little flour as possible. The doughnuts should be turned continually while they are frying.—Baltimore American.

Too Professional.

"I saw that man gazing into your eyes," said Maud.

"Yes," replied Maud. "I felt complimented until I learned that he is studying to be an oculist. I had the same disappointing experience with a young dentist who was always anxious to make me smile."—Washington Star.

Seems So These Days.

Teacher—"The right to have more than one wife is called polygamy. What is it when only one wife is allowed a man? Willy—Monotony, ma'am.—Lippincott's.

Frank.

Manager (to applying office boy)—Why did you leave your last place? Boy—Well, I couldn't get along with de boss, an' he wouldn't git out.—Exchange.

His Suggestion.

Blotbe—Guzzler isn't very talkative, is he? I don't seem able to draw him out. Blotbe—Try a cork-screw.—Philadelphia Record.

Men think less for their crimes than for their weaknesses and vices.

HER PROGRESS.

The newly married man, as newly married men do, came home from his office happy. He was greeted as newly married men are greeted, with a kiss, and this in the fashion of his kind, he returned with an interest which any court in the land would declare to be serious.

"Of course, dear," he replied. "I am getting a long famously with my cooking lessons."

"And it will be such a change," he continued, "from the monotonous fare of the restaurants when we can enjoy home cooking—the work of your own dear hands! There were more kisses."

"Ah," said she "it will indeed!" "Did you take a cooking lesson today, darling?" he asked.

"Yes, dearest," replied the happy young woman. "But one of these days we shall have a dinner here, darling, shall we not, of your own cooking?"

The bride looked up into his eyes with a confidence that inspired half a dozen more kisses.

Harvesting in the West

Saskatoon, Sask., Aug. 17.—The wheat crop in Saskatchewan district, which comprises 46,000 square miles, is being generally harvested.

According to F. McClure Scanders, secretary of Saskatchewan Board of Trade, the labor situation here has not reached an acute stage as yet.

The crisis, so far as frost is concerned will be on Tuesday night, after which the weather will be favorable to the harvest.

Edmonton, Aug. 31.—The crops of Northern and Northeastern Alberta are still hanging in the balance. There were two degrees of frost in this vicinity Thursday night.

OTTAWA, Aug. 28.—Good scoring in spite of a fishal wind which marred an otherwise ideal day was done by the competing marksmen in today's shooting in the Dominion Rifle Association matches at the Rockcliffe ranges.

THE OLDEST ONE OF ALL. An old gentleman was proudly exhibiting some of his most valued possessions to a friend who had called to see him.

GAVE HIM AN OVERDOSE. "I don't hear of your boy taking your car out at midnight any more Barker, the way he had a habit of doing," said Wiggles.

There has been issued, by direction of the Minister of Agriculture at Ottawa, a conspicuous poster calling the attention of potato growers to the importance of examining their crop to ascertain whether or not it is infected with "Potato Canker."

Dr. Morse's Indian Root Pills is certainly one of the most disagreeable ailments which flesh is heir to. Coated tongue—bitter taste in the mouth—nausea—dizziness—these combine to make life a burden.

Windstorm in the West

Although the terrible gust that struck Regina is the first cyclone recorded in Canada, the prairie country of our west is noted for its high winds.

There is a saying that it is always blowing in Macleod. Indeed, on the calmest summer days there is generally a slight breeze in that section. The wind is believed to shoot out from the funnel of the Crow's Nest Pass, which is some fifty miles due west in the Rockies.

Calgary is scarcely less famous for wind than its southern neighbor. A real Calgary dust storm is something to be remembered. The writer saw one of the worst in years.

ACADIANS REJOICE OVER BISHOP LeBLANC'S APPOINTMENT. New York, Aug. 30.—The Acadians are rejoicing all through New Brunswick because justice has been done them at last.

LIKE A STORM. Another somewhat similar storm happened in Southern Saskatchewan in June, 1900. One very hot morning the wind started blowing from the south, and as it attained an ever-growing velocity the heat instead of abating, seemed to increase.

MORE CHRISTIAN VILLAGES BURNED. London, Aug. 28.—The destruction of Christian villages near Berana, Northern Albania, was continued yesterday, telegraphs the correspondent of the Times at Endritzira, Montenegro.

TURKISH AND GREEK TROOPS FIGHTING. Athens, Greece, Aug. 30.—Serious skirmishes between Turkish and Greek regular soldiers on the frontier yesterday resulted in a number of men being killed or wounded.

SERIOUS WRECK ON C. P. R. Conductor and brakeman killed.—A Number Seriously Injured. North Bay, Ont., Aug. 31.—A serious wreck occurred on the C.P.R. at Mattawa, forty miles east of North Bay, early this morning.

FOR sunburn, windburn, cracked lips, chaps, roughness or irritation after shaving try NA-DRU-CO Witch Hazel Cream. Its creamy ingredients soothe and soften the outer skin, while the Witch Hazel penetrates and heals the deeper tissues.

Dr. Morse's Indian Root Pills is certainly one of the most disagreeable ailments which flesh is heir to. Coated tongue—bitter taste in the mouth—nausea—dizziness—these combine to make life a burden.

Empire to Fight the Insect Pest.

Ottawa, Aug. 30.—As a result of a conference in London this month between representatives of the Colonial Office and of the Agricultural Department of the over-seas Dominions, a central Imperial Bureau has been organized to enable all the various parts of the Empire to co-operate in combating insect or other pests detrimental to agricultural, live stock, or horticultural interests.

Information will also be obtained as to the work being done along this line by other countries. Dr. Hewitt who returned to Canada on the steamer Royal Edward, was elected President of the Medical branch of the International Entomological Congress which met in London early this month.

Artifice of an Artist. The Secret of the Color in One of Turner's Pictures. The late Mr. Horsley, R. A., has recorded that at one time he studied almost daily one of Turner's finest water colors, called "The Snowdon Range," admiring especially the tender warmth of the light clouds surrounding the moon.

Walking Canes. From the time when man wandered through the pathless forests bearing on his shoulder a murderous bident with which to strike down his enemies the cane has never entirely gone out of fashion.

PERFECTLY FAIR. At a recent meeting of the Maritime Board of Trade, a resolution was passed in favor of making an appeal to the Railway Commission to fix excursion rates on trans-continental roads so that they will be the same east and west.

Belgium Marriages. In Belgium it is the custom to give certificates of marriages in the form of little books, which also contain a summary of the marriage laws and among a mass of other miscellaneous information directions for the feeding and care of infants.

Explained. "I hear that Miss Grumby is a wonderfully correct person." "That's because of her occupation. She is a dressmaker's designer."

Incontestable Proof. Insurance Agent—What are the proofs of your husband's death, madam? The Widow—Well, he has been home for the last three nights.

Ought to Know. "I wonder how it feels to be dead?" "How should I know?" "You work in a store that doesn't advertise."—Houston Post.

THE PHONOGRAPH.

Its Invention Was the Result of a Cut on the Finger. An accident—a cut on the finger—caused Edison to invent the phonograph or talking machine.

Mr. Edison told the story of this invention to a reporter. At the time, he said, he was singing into a telephone, and in the telephone's mouthpiece he had placed, for safe keeping, a fine steel point. Suddenly this point cut his finger.

Thus the principle of the phonograph—the registering and the reproduction of the voice's vibrations—was discovered through the cutting of a finger. It was Edison's finger, though, that was cut. Smith's or Brown's might have been quite backed off and no phonograph would have resulted.

ARTIFICE OF AN ARTIST.

The Secret of the Color in One of Turner's Pictures.

The late Mr. Horsley, R. A., has recorded that at one time he studied almost daily one of Turner's finest water colors, called "The Snowdon Range," admiring especially the tender warmth of the light clouds surrounding the moon.

Chance revealed the secret. The picture began to buckle from its mount, and its owner, Sir Seymour Haden, put it into the hands of a noted expert to be remounted.

From the time when man wandered through the pathless forests bearing on his shoulder a murderous bident with which to strike down his enemies the cane has never entirely gone out of fashion.

A Cheerful Reason. A French governor of the south Pacific colony of New Caledonia assumed his authority while the natives of New Caledonia were still cannibals.

Belgium Marriages. In Belgium it is the custom to give certificates of marriages in the form of little books, which also contain a summary of the marriage laws and among a mass of other miscellaneous information directions for the feeding and care of infants.

Explained. "I hear that Miss Grumby is a wonderfully correct person." "That's because of her occupation. She is a dressmaker's designer."

Incontestable Proof. Insurance Agent—What are the proofs of your husband's death, madam? The Widow—Well, he has been home for the last three nights.

**M. K. PIPER**  
PROPRIETOR AND PUBLISHER

WEDNESDAY, SEPTEMBER 11, 1912

—Over and over again the ques-  
tion has been asked: "What is  
being done about the Horticultur-  
al Exhibition?" There are now  
but three weeks before the Exhibi-  
tion opens its doors, and only this  
week has news come of a meeting  
having been held to talk over vari-  
ous details. It is time that all  
committees were up and doing.  
Eleven special committees have  
been appointed; three have already  
done good work, but where are the  
other eight?

And a fair amount of what  
should be done, it may be claimed,  
goes beyond the special commit-  
tees. The Town Council, in con-  
junction with others, ought to hold  
a public meeting to consider  
whether the main streets of the  
town should be decorated or not?  
It is so rarely an Exhibition comes  
this way, that every effort should  
be put forth to make the town  
kindly remembered by the many  
visitors who will attend it.

The merchants also should grasp  
the opportunity thus presented by  
showing that home goods can be  
purchased quite as cheaply here,  
and as of good quality (if not bet-  
ter) than in many cities, and to do  
this, their best plan undoubtedly  
is to have the most attractive  
window displays they possibly can.  
Visitors make a special point of  
visiting stores and carrying away  
mementoes, and a well-displayed  
window becomes a very valuable  
asset, as it causes the wayfarer to  
pause and look over the wares so  
set out.

There is not a moment to lose.  
Everyone interested in the forth-  
coming Exhibition should be up  
and doing, otherwise it will not  
meet with the success it deserves.

**NOTICE!**

Owing to an accident to the  
machinery and unavoidable contin-  
gencies the Monitor will miss  
its regular mails this week, which  
is a matter of sincere regret to  
the management. It is also necessary  
to hold over a quantity of interest-  
ing local correspondence until next  
week.

According to the postal law now  
in force newspaper publishers can  
hold for fraud anyone who takes a  
paper from the post office and re-  
fuses payment, as the man who al-  
lows subscriptions to remain unpaid  
and then orders a postmaster to send  
notification of discontinuance to the  
publishers lays himself liable to ar-  
rest and fine. Postmasters are also  
liable under the law for the cost of  
papers delivered to other persons af-  
ter the death or removal from their  
office district of the persons to whom  
the paper was first addressed.

**Grain Blockade Likely**

Toronto, Sept. 9.—Mr. E. J. Cham-  
berlain, president of the Grand Trunk  
Railway, has on a tour of the  
west with a party of Grand Trunk  
officials, predicts a more serious  
grain blockade this year than has ever  
occurred before. But he points out  
that the railways have facilities for  
moving the grain from the termi-  
nals, and it is not the railways  
that are at fault. "I don't hesitate  
to say," Mr. Chamberlain observed,  
"that the three railways are in a  
position as far as rolling stock is  
concerned to move all the grain they  
will be asked to handle, but it can-  
not be moved from the terminal  
points. There is now at Montreal a  
considerable quantity of last year's  
grain awaiting removal, and our  
company has a great many loaded  
cars standing idle. The labor troubles  
in England have contributed to-  
wards the probable blockade by delay-  
ing steamship sailings, but in any  
case there are not enough steamships  
to take the grain away with proper  
dispatch. As far as elevator accom-  
modation is concerned, as far as it is  
required for storage but only for  
transferring grain from the cars to  
the ships, every thing will be all  
right. There is no doubt though  
that better facilities for getting the  
grain out of the country, or addi-  
tional storage facilities are absolutely  
essential. Railroad cars are not in-  
tended for storage purposes, but they  
are obliged to be used for that pur-  
pose now.

Winnipeg, Sept. 9.—The prospects  
for harvesting this week seem to be  
excellent. There have been local  
storms, one of which hit Manitoba,  
the weather proved to be of a fine  
drying character and helped along  
the optimism. Flax will be a late  
feature in the harvest in Manitoba,  
but given dry weather the grain crop  
will be good.

Saskatchewan also reports quick  
drying after the rains and the bind-  
ers ready for business and the har-  
vest hands are ready and the crops  
heavy. Alberta has also had two fine  
drying days and high hopes of prac-  
tically ending the harvest this week.  
The storms so far all over have  
caused extra labor with the stooks,  
and with the promise of fine weather  
to-morrow and temperature to-  
night the best is anticipated this  
week over the three provinces.

**BISHOP MORRISON CONSECRATED**

Antigonish, N.S., Sept. 4.—Anti-  
gonish is in gala attire since early  
yesterday morning. The reception to  
Monsignor Stagni, who came to take  
part in the consecration today of Bis-  
hop-elect Morrison, was in the nature  
of a great ovation from the railway  
station to the cathedral, a distance  
of about a mile. Between four and  
five thousand persons took part in  
a procession headed by the band of  
the 75th Highlanders. A piper band  
from Pictou also had a place in the  
procession. Flags hung everywhere  
and bunting and drapery profusely  
ornamented every building along the  
line of march. His excellency was re-  
ceived in the cathedral where an ad-  
dress of welcome on behalf of the  
clergy and laity of the diocese was  
read by the very Rev. Administrator  
Dr. H. P. Mepheron. His excellency,  
personally, and as representative of  
the Holy Father made gracious ac-  
knowledgement of the expressions of  
loyalty and devotion contained in the  
address and shown by the enthusias-  
tic welcome he had received. Solemn  
benediction of the Blessed Sacrament  
was then given. At this writing the  
consecration of Bishop Morrison is  
taking place. About twenty Arch-  
bishops and Bishops and at least one  
hundred and thirty clergymen are  
present. Hundreds of people have  
been unable to obtain admission to  
the church. The sermon will be  
preached by the Rev. Dr. Ryan of  
New York.

Kingston, Ont., Sept. 9.—Fire early  
this morning destroyed the gener-  
al store of Wesley Bedcock at Hart-  
ington station on the Kingston and  
Pembroke Railway, and it was com-  
pletely destroyed. Loss \$2,200, with  
no insurance. John D. Oaker who  
lives close by, noticed the fire and all  
the neighbors turned out and suc-  
ceeded in saving other buildings.

**LOCAL AND SPECIAL**

The schools opened on Monday after a two months' vacation, and the attendance was more than up to the average.

Those who attended the St. John Exhibition from Bridgetown report that it was in every way a most creditable one and well worthy of a visit.

All interested in the Cemetery benefit tea meeting at Exhibition time will please meet at Warren's Hall on Thursday evening at eight o'clock.

Threshing is proceeding in the vicinity of the town, and those employed thereat appear to be very busy. Some of the returns have been excellent.

During the past week the streets have been enlivened by the appearance of members of the 69th Regiment, who proceeded to Camp this week at Aldershot.

A. deW. Foster, M. P., returned last week from his trip to Hudson Bay. His many friends are pleased to learn that he has fully recovered from his recent illness.

The roadbed between Queen Street and the bridge on Granville Street is now receiving its share of attention, and good progress has been made during the past week.

Haying is now nearly finished, and the barns quite filled with the results. The harvest altogether has been one of the best ever known, in some cases the crops being exceptionally heavy.

The various Committees connected with the Horticultural Exhibition to be held at Bridgetown are at last showing signs of activity, and ere long things are likely to take a definite shape.

A splendid locust tree in front of the Presbyterian manse, the residence of the Rev. G. Dustan, was felled this week, so as to give more light within the premises. It must have been upwards of 50 years old.

The adjourned case of Harvey Beals, in which it is alleged he outraged an imbecile named Ellen Gallagher, was again last Wednesday, and prisoner was committed for trial at the next Supreme Court in Annapolis. The poor woman is making but slow progress towards recovery.

To the lovers of poultry it must not be forgotten that there is a section allotted to them in the forthcoming Horticultural Exhibition. Prize Lists and entry forms can be obtained from Mr. R. J. Messenger, Lawrencetown, or from any of the Committee.

The Provincial Exhibition at Halifax opens to-day (Wednesday), and providing weather conditions are favorable there ought to be a record attendance. As can be seen by an advertisement in this issue, the visitor has a chance of seeing a flying machine, besides the other many interesting features.

Many of the readers of the Monitor will regret to hear that Mr. James J. Young, of the staff of the Bank of Nova Scotia, Montreal, is now lying in the Victoria Hospital, Montreal, suffering from typhoid fever. From a telegram received by his mother on Tuesday, it is reported that he has taken a turn for the better.

Nova Scotians will generally rejoice in the success achieved by the Halifax Cadets in winning the King's Prize at Toronto last week. They beat competitors from England, Australia, New Zealand, and various parts of Canada. It was truly an Empire match, and our congratulations are tendered to them in this their glorious win. It shows what can be done by personal application and with a good instructor teaching them.

A shocking accident, which had a fatal termination, happened near Brickton on Sunday night. A man named Taylor was riding on a trolley when suddenly he fell off, and it is supposed one of the axles crushed in his spine. He was taken to a relative's house closed by and medical assistance summoned. It was then found that his back was broken, and the lower parts of the body paralyzed. He gradually sank, and expired on Tuesday.

Now that the schools have opened, it is expected shortly to hear of the formation of the proposed Cadet Corps. Mr. Bustin must have, the Monitor understands, at least 30 boys to form same before he can proceed, and it is up to Bridgetown to see that he gets that number. The success of the Halifax Cadets last week should be a strong inducement to join. It is understood that some of the prospective Cadets are now in Aldershot.

**IMPORTANT NOTICE**

It is especially desired that all accounts due the Monitor-Sentinel up to July first be settled without delay. Accounts have in most cases been rendered to customers within the past few weeks. If you have been overlooked, remind us.  
M. K. PIPER

**PERSONAL**

Miss Letta Brown is visiting her father, Postmaster Brown.

Mr. Fred Young returned to his home in Boston on Saturday.

Mrs. J. C. Phinney, Paradise, is visiting her sister Mrs. Porter, Yarmouth for two weeks.

Mr. Harold Willett left on Friday on a trip to Boston, and will visit St. John on his return home.

Miss Gertrude Young, of Rosedale, Mass., arrived on Friday, and will remain a week or more with her mother.

Mr. and Mrs. Thomas Wilkinson, of Alberton, P. E. Island, were the guests of Mr. and Mrs. J. Wilkinson, during the past week.

Max Piggott arrived home, Monday, from Boston, after a delightful visit with his aunt, Mrs. F. L. Longley and other relatives.

Mrs. J. E. Beanson and Master Lloyd and Miss Susie Beanson, of Brickton, visited the former's sister, Mrs. W. A. Sluennwhite, over Sunday.

Mr. and Mrs. Arthur Morse spent last week in St. John, visiting their son Robert E. Healey, who is doing a good business there, also taking in the Exhibition.

Miss Gertrude Fisher, who has been visiting her aunts, the Misses Fisher, at Bridgetown and Hampton, returned to her home in Boston, Mass., on Saturday last.

Mr. and Mrs. L. J. Sands, who have been staying with Mr. and Mrs. Thomas Bartean, North Williamston the past fortnight, returned to Amesbury, Mass., on Thursday.

V. H. Parker, of the staff of C. P. Railway, Winnipeg, after spending three weeks at the home of his father, W. F. Parker, Belleisle, is attending the Dalhousie Medical College, Halifax.

R. J. Messenger, Lawrencetown, was in town on Saturday last, and was very busily employed on business connected with the Horticultural Exhibition, to be held here next month.

Mr. James Craig, of Cambridge, Kings Co., who has been staying with E. A. Craig during the past two weeks, returns to his home to attend the golden wedding of his brother Mr. T. T. Craig, at Cambridge.

We regret to state that Mr. E. G. Ramey has been confined to his home the past three weeks with congestion of the lungs. His present condition of health necessitates the greatest care being taken, and is the cause of some anxiety.

Mrs. M. K. Piper returned today from a trip to Boston, Mass., Dover, N. H., and York Beach, Maine, accompanying Mr. and Mrs. E. B. McDaniel and children of Annapolis. Miss Katharine Piper remained for a more extended visit with relatives in Dover.

Mrs. W. Burham and son Thomas Clarke, and John Gideon of Montague City, Mass., who have been spending the summer with her father Pastor John Clarke, of Maitland, Hants Co., after spending a few days at Edcoza, Paradise, spent last week with the Misses E. and E. Marshall at Fundy-side Cottage, Port Lorne, returning home last Saturday.

**CARD OF THANKS**

Mrs. E. C. Young and family wish through the Monitor to thank the many friends who came to her assistance in her recent great sorrow, and also thank those who in any way so kindly contributed to the beautiful floral offerings sent on the occasion of her dear son Wilbur's death.

**Baptist Church, Inglewood**

A Tea Meeting will be held on Wednesday, Sept. 12th, commencing at 3 p.m. in aid of the funds of the above church.

If stormy, next fine day.  
Admission 25 cts.; children 15cts.

**CANADIAN APPLES IN BRITISH MARKET.**  
(Canada, London.)

Most of the apples hitherto exported from Nova Scotia have been shipped to two or three British ports only. This year there is to be a change in this respect. Arrangements have been concluded with brokers in twenty-eight of the larger towns of Great Britain to sell Nova Scotia apples. In this way extra freight charges and sometimes a double commission will be avoided. Similar arrangements have been made with brokers in Holland, Belgium, Denmark, Germany and Newfoundland. This widening of the market will bring about an increasing demand for Nova Scotia apples. Farmers of the Annapolis Valley are therefore planting more orchards, finding that the fruit industry in Nova Scotia is a splendid investment. Lands suitable for raising fruit can be obtained for \$5 per acre. The Annapolis Valley alone is capable of raising ten times as many apples as at present.

Last year 2,000,000 barrels of apples were raised in Nova Scotia. The fruit growers, most of whom planted large deposits in the bank last autumn, naturally expected that the present season would find their orchards below the average in production. But now that the season is advancing the prospects point to a repetition of that record crop. Professor Cumming, principal of the Nova Scotia Agricultural College, says, "Unless something unforeseen happens, the farmers of Nova Scotia may prepare for the harvesting and marketing of fully as large a crop as last year." Professor Cumming attributes this splendid outlook to freedom from the usual pest this year, the ideal weather, and especially the fact that of late years the farmers of the Annapolis Valley have turned their attention to modern methods of treatment. The possibilities of this industry in Nova Scotia are being more and more appreciated, and the market in Great Britain and other European countries is practically unlimited, Nova Scotia being nearer the markets of Europe than any other part of the continent of America.

**Salvia is a Preparation That Will Grow Hair Abundantly**

This is an age of new discoveries. To grow hair after it has fallen out to-day is a reality.

SALVIA, the great Hair Tonic and Dressing, will positively create a new growth of hair.

If you want to have a beautiful head of hair, free from dandruff, use SALVIA once a day and watch the results.

SALVIA is guaranteed to stop falling hair and restore the hair to its natural color. The greatest Hair Vigor known.

SALVIA is compounded by expert chemists.

Watch your hair if it is falling out. If you don't, you will sooner or later be bald.

SALVIA prevents baldness by fastening the hair to the roots.

Ladies will find SALVIA just the hair dressing they are looking for. It makes the hair soft and fluffy and is not sticky. A large bottle, 50c.

A scientific explanation accredits hot southern winds in the Canadian West to the passing of air over the huge areas of the cornfields in such states as Nebraska, Kansas, etc., where corn is the staple crop, and where the radiation of heat from the ground is intense.

Sometimes hours in advance of a chinook wind in southern Alberta, a low distant roaring can be heard from the mountains. The well known chinook arch over the Rockies always betokens a strong blow from the west.

Discovery of arsenate of lead, a deadly poison, in quantities of Georgia canned peaches resulted in State health inspector Melvin announcing that at an examination of samples from each of the peach producing sections of the state would be made immediately. Spraying of the trees shortly before time for the ripening of the fruit is believed to be responsible for the presence of the poison.

**Lake Champlain Aground.**

Montreal, Sept. 8.—The C. P. R. steamer Lake Champlain, bound for this port from Liverpool, with passengers and general cargo, ran aground this evening on the south shore, opposite Dominion Park, about five miles below the city.

The vessel passed Long Point at 8.15, proceeding slowly on account of the dense fog which hung over the St. Lawrence tonight, and grounded at 8.30 just opposite Dominion Park. The passengers are still on board, and three tugs are working on the vessel trying to pull her off. She is resting easily on soft bottom.

The damage is as yet unestimated, but it is not thought to be large, and the passengers are in no danger. If it is seen that it will be a difficult job to pull the vessel back into the channel, the passengers will be landed by boat at Long Point.

**BIG TREES LIKE MATCHES.**

About six years ago a hurricane swept over Vancouver Island. It came up one winter night. The sky was clear and the moon gleaming. The wind blew in from the Pacific at a sixty mile speed. All night it lasted, huge Douglas firs and giant cedars crashing down in all directions, through the forests. The writer saw large limbs snapped from the trees and whirled through the air like feathers. Next morning railroads and highways were completely blocked by the fallen timber, and days elapsed before the barriers could be sawn away. In a somewhat similar storm a few years prior to this one of 1906, H. M. S. Condon, stationed at Nanaimo was swept out to sea. From that day to this, barring a stray life preserver or empty boat, nothing has been seen of the warship or any of her crew. It was thought she turned turtle and foundered.—Toronto Telegram.

Lord Charles Beresford and the Duke of Argyll were travelling together on the great Western Railway, in England. The only other occupant of their compartment was a prosperous drummer whose success had been due to natural talent for business rather than to sound education. The noblemen found their companion entertaining, so they listened to his talk until a small station in Gloucestershire was reached. Here Lord Charles alighted and was met by a servant of the people with whom he was going to stay. The drummer leaned out of the window, opened mouthed and wild-eyed. He saw his lordship bowed into a splendid carriage and driven down a country lane. Drawing his head within the carriage again he turned to the duke, and said: "Whose 'im?" "He is Lord Charles Beresford," the duke replied. "Well, now," said the drummer, "Fancy the likes of 'im 'obnobbin' with two cads like you and me!"

**Montreal Welcomes Premier Borden.**

MONTREAL, Sept. 8.—Few more enthusiastic welcomes have been accorded to any Canadian Minister than those which have marked the progress of the Hon. R. L. Borden since he landed at Quebec on Friday last. There irrespective of political complexion, his welcome was hearty and sincere, and a big demonstration was accorded him in Montreal on Saturday night.

Personalities have not entered into all these triumphs, for Liberal and Conservative alike have done him homage for the qualities he displayed while abroad, and for the manner in which he represented Canada. At all the receptions he has held since his return the partisan element has been eliminated. Adherents to both parties greeted him as a Premier worthy of respect, and who had in foreign countries worthily upheld the best traditions of the Canadian people.

No more ideal conditions could have prevailed than those of Saturday night, the threatening weather of the day clearing off at sun down. From start to finish the event was a success, neither fatality nor accident marring it.

The spirit of the thousands who lined the wharf and the long route seemed one of sincerity, and the tribute paid was appreciated by Premier Borden, who, in his brief address at the landing stage and at the Windsor Hotel, expressed his pleasure at being home again.

The keynote of both his utterances, in reply to addresses from the Mayor, was for a continuance of the entente cordiale which exists between the two nations, and between the two great races of this country.

To welcome the chief came colleagues from Nova Scotia, New Brunswick, Ontario and Quebec, and his growing popularity among the French was evidenced by the large numbers which turned out on Saturday and showed equal enthusiasm with their English colleagues.

French and English alike jostled each other in the throng at the hotel to shake the Premier by the hand and bid him welcome. So large was the crowd at the informal reception in the hotel that the original intention of having the Premier speak from one of the windows to the dense crowd which thronged Dominion Park was abandoned, as the time in which he and Mrs. Borden had to catch the train for Ottawa was run very close.

**All-night Telephone Service**

Kentville, Sept. 4.—The Board of Public Utility Commissioners, John U. Ross, Chairman; R. T. Macleith and Parker Colpitt, met here to-day to consider an application made on behalf of the majority of the telephone users to arrange with the Maritime Telephone and Telegraph Company for an all night service.

Peter Innes, H. H. Blign, W. W. Pineo, A. S. Burgess, H. H. Wickwire, M. P. P., and a number of others were heard objecting to certain of the conditions proposed. Mr. F. H. Winfield and G. Fred Parsons were heard on behalf of the company. The Board reserved its decision. The question at issue was as to whether some of the old subscribers to the original telephone company should continue to have a free service to the exchanges of Berwick and Colborne. The proposal of the company was to initiate an all night service if these subscribers surrendered the right to free communication to exchanges in the places mentioned.—Halifax Chronicle.

An article that has real merit should in time become popular. That such is the case with Chamberlain's Cough Remedy has been attested by many dealers. Here is one of them. H. W. Hendrickson, Ohio Falls, Ind., writes, "Chamberlain's Cough Remedy is the best for coughs, colds and croup, and is my best seller." For sale by druggists and dealers.

**GOV. WILSON CRITICIZES COL. ROOSEVELT'S POLICY.**

William Grove, Pa., Aug. 29.—Col. Roosevelt's analogy that the benefits of the protective tariff system constituted "prize money" of which too much was kept by the officers and too little distributed to the crew, was criticized by Governor Wilson to-day in his first campaign speech outside New Jersey. He wanted to know in his speech before the State Grangers' picnic, just where the "prize money" came from. He said the "plunder" came from the farmers who were taxed too highly by the tariff on agricultural implements.

The Governor confined himself to the tariff, and how it affected the farmer and drew attention to President Taft's veto of the farmers free list bill.

"I dare say he was right from his point of view," said Governor Wilson of President Taft in this connection, "for he represented the trusts and not the people."

The Governor argued that the Government of the country had been in control of "self constituted trustees" in the Republican party and that it was time for the people to gain control of their own Government.

**MINARD'S LINIMENT CO., Ltd.**

Dear Sirs.—I had a Bleeding Tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINIMENT, and after using several bottles it made a complete cure, and it healed all up and disappeared altogether.

## KEEP YOUNG.

If you would keep young, keep your mind active. An intelligent back number doubles her age. Keep your mind alert, writes Dr. Edith B. Lowry, in the Woman's World. Go some place where you will meet strangers, or at least people you are well acquainted with. If you continually talk with the same people you soon learn their opinions on all topics and there is no pleasure or benefit to be derived from a conversation. That is why many husbands and wives find it impossible to keep up an interesting conversation if left alone for a few hours. Each has heard the opinions of the other so many times that there is nothing new to be expressed. How different this would be if each had been talking with other people, or had been reading current literature and had some new ideas to express.

A woman owes it to her husband, to her children, and most of all to herself to keep mentally active. She is not doing her full duty to anyone when she allows her household tasks to absorb her entire time. Now do not mistake me and think I would have anyone neglect any real duties. That is farthest from my intention. But a woman can keep her house as well, nay even better, if at the same time she keeps her mind active. So many women settle down, become household drudges and lose their attractiveness soon after marriage. A man appreciates a good housekeeper, but he always values an enjoyable companion. As one woman expressed it, "A man would rather go without pie once in a while and have his wife meet him at the door with an attractive smile." Sometimes he would enjoy a bowl of bread and milk, if enlivened with cheerful conversation more than he would an elaborate dinner when seated opposite a tired and fault-finding woman.

Cultivate Your Enthusiasm.—Take a real live interest in the things about you. Get enthusiastic! It won't hurt you to get quite excited in your enthusiasm once in a while. It is dull, prosaic life, lived without interest, that ages one. You need it. Many a woman would like to get out and play with her children, or her neighbor's children, but she is afraid of what the neighbors will say, and so she sits indoors and grows old.

Never mind what your neighbors say. Do the things you would like to do and keep your youth. You, and you alone, are the creator of your destiny. It is you who is growing old.

In order to have time for both mental and physical exercise, plan your work carefully in the morning, and then avoid hurry, worry and getting frustrated. Earn self-control, and if your well-laid plans seem to be going all awry, take the interruptions coolly. Fold your hands, if necessary, until the interruption is over. Remember there is another day coming. To-morrow will be better.

Things to Forget.—Do not get in the habit of gossiping or talking about your past illness. Children forget any illness almost as soon as it is over with, but the older a person is the longer she remembers it. A sure sign of advancing age is to rehearse the illness or the operation you have undergone. There seems to be a desire, on the part of advancing age, to impress people with the severity of past illness. Each aging person has a stock phrase as "Yes, the doctor said he never knew anyone to be so low and then get well." Forget the past and live in the present!

Carelessness in Dress.—Another certain sign of advancing age is carelessness in dress. A young girl takes a great deal of pride in her dress, its style, its color, and its fitting. Aging women are too much inclined to dress in unbecoming colors, in dresses made severely plain. Clothes may not make the man, but they have a great effect upon his ability to accomplish anything. If you have to meet a person on business that requires ability on your part, you will find you are much better able to hold your ground and drive a better bargain if you are dressed in a becoming business suit than if you have on a soiled morning gown. The same is true about the household tasks. As soon as the morning's work is finished, bathe and put on a fresh, becoming dress. You will feel ten years younger, and the household tasks will assume different proportions.

Finally, to keep young, keep the thoughts of youth in your mind. Hold the thought, "I am well, I am happy, I am prosperous. I am young."

To keep a cabbage fresh and crisp when only half a head is used, wrap loose leaves over cut part and wrap in wet paper and put in a cool place. It will keep fresh for weeks.

## WORTH KNOWING.

To keep celery and lettuce fresh, stand the roots in cold water, not the stalks or leaves; throw a thin damp cloth over them, or a dry manilla paper to keep the air off; before using wash thoroughly, then soak in ice water for half an hour, dry on a towel. Soak cucumbers in ice water, never salted, as salt wilts and makes soft all such stuff.

The strong flavor of uncooked onions is satisfactorily removed by slicing them, put in a colander, pour boiling water on, then plunge in ice water and allow to remain half an hour; they will be sweet and crisp.

One level teaspoonful of salt seasons one quart of vegetable soup.

When making desserts, allow one heaping teaspoonful of granulated sugar to each egg and half pint of milk, one tablespoonful of extract for each quart liquid to be frozen, and one teaspoonful of flavoring for each quart of boiled pudding or baked ones.

One large tablespoonful of white flour and one tablespoonful of butter, blended, will thicken, half a pint of milk or water for sauces.

One and one-half teaspoonful of baking powder to one pint of sifted flour is a good rule to follow for biscuits and short cakes.

Four eggs to a quart of milk is the proportion for boiled custard; five eggs for frozen desserts.

More than twenty years ago we lost our father under painful circumstances. For a time mother was prostrate with grief, but having a family of eleven to provide for she roused herself. Two of the boys were serving an apprenticeship; one of the girls worked in a spinning mill; a third worked part of the day, and went to school the other part, while a fourth who was delicate, received a small sum weekly for services rendered during the day in a minister's family. Five had still to be provided for. Mother went out as a charwoman for years, keeping the boys at their trades, and doing the housework for her own home in the evening so as not to make her family chargeable to the parish. The cost of her devotion is the loss of her eyesight, but she feels proud that by the help of God she has been able to keep her family from being burdensome to others.—Mary A. Anderson.

Lazy Roast.—Two and a half pounds chuck rib of beef, 1 can of peas, 1 large carrot, 1 onion chopped fine, 1 teaspoonful vinegar, 1 teaspoonful bread crumbs, 1 teaspoonful tapioca, 1 teaspoonful salt, 1 clove, put in a bean pot with cover, fill it up with water and bake five hours with moderate fire. About one hour before serving add 1 cup of hot water. Needs no other attention. This is delicious. Hope all may try it.

Corn Meal Griddle Cake.—One cup flour, 1 cup cornmeal, 2 teaspoonful baking powder, 1 1/2 cups sweet milk, 4 teaspoonful melted butter. If sour milk is used, omit baking powder and use 1/2 teaspoonful soda; sift dry ingredients together, add a little milk and beat well; when all the milk is used, stir in butter and drop by teaspoonful on greased griddle. When light brown on one side turn it over. Serve very hot.

## DONE IN COLORS.

In the dainty hand embroidered linen Dutch collars, the scalloped edges are in many cases worked in colors. A collar of white pique decorated with dots worked in white floss has a brown edge, while another pretty collar in fine white linen is worked in dark blue. These four are pretty finish at the neckline of the tailored blouse, and as they match the skirt of the coat suit, when the coat is taken off a pretty little color scheme is revealed.

Earrings are no longer worn on the street by the better class of women—that is, the long pendant earrings are not—so writers of the high-class ladies' magazines, such as the "Queen" and the "Gentlewoman," tell us.

What a bad habit many people, especially women, have of taking headache powders or tablets. They are dangerous and should be left alone. Most of them contain drugs of some sort. A dose of castor oil and plenty of rest are best for the headaches.

Few, if any, medicines have met with the uniform success that has attended the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. The remarkable cures of colic and diarrhoea which it has effected in almost every neighborhood have given it a wide reputation. For sale by druggists and dealers.

are entirely different from others both in their composition and their effect—complete evacuation without purging or discomfort. 25c. a box at your druggist's. NATIONAL DRUG AND CHEMICAL CO. OF CANADA, LIMITED.

# "IMPOSSIBLE TO HELP MY KIDNEYS"

## Until I Used "Fruit-a-lives" World's Greatest Kidney Cure

Practically everybody in Toronto knows Professor J. F. Davis. For years, the elite of that city has taken lessons from Prof. Davis in the art of Dancing and Deportment.

His constant activity gradually weakened his kidneys, which calamity threatened to make him an invalid. But read Prof. Davis' letter—

563 CHURCH ST., TORONTO, ONT. DECEMBER 29th, 1911. "I want to say that 'Fruit-a-lives' is my only medicine, and has been for the past five years. Previous to that, I had been troubled with Rheumatism and Kidney Disease, and had taken many remedies without satisfactory results. Noticing the advertisements of 'Fruit-a-lives' I adopted this treatment altogether, and as everyone knows, I am now—and have been since taking 'Fruit-a-lives'—enjoying the best of health."

J. F. DAVIS, making you miserable, take "Fruit-a-lives" and get well. 50c a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

## LILLIAN NORDICA.

The Woman's Home Companion a short time ago published a series of articles describing "The Girlhood of Great Singers." The first article was devoted to the subject of this sketch, of which the following is but a brief extract:

Milane Tietjens, the dramatic soprano, came to Boston to sing in opera. She sent a message to the Conservatory asking to hear any unusual talent that they might have there. Lillian Norton (Nordica's name) was sent in response, her mother accompanying her. The visit was made on a matinee day, and the prima donna, to spare herself, deputized her sister to receive them. Though regretting a lost opportunity the aspirant started to sing. Before she had got very far a door was opened softly, then was thrown wide, and Madame Tietjens entered. In her enthusiasm she took the accompanist's place at the piano. "Work ahead and you will be great," she said simply. Being warm-hearted she added, "When you come to London I will help you."

That friendly offer was unfortunately never realized, for Madame Tietjens died not long after. While they were talking a little old lady came in, a harpist at that time in the orchestra, widow of the impresario. She had been a prima donna. Her interest took a practical turn. "Come to me on Staten Island next summer," she generously offered, "and I will coach you in your roles."

That summer Nordica studied twenty roles. In the autumn she came out in concert with Brignote, and in the early spring following was fairly launched on her career as soloist with Gilmore's Band. The test was strenuous for one so young; often two concerta day, and arduous travel, for they toured the whole country. Gilmore, with his warm Irish heart recognized her gifts as well as her pluck, once exclaimed, "You will yet be crowned Queen of Song in your own country." Years later Nordica recalled his words, when a diamond tiara from American admirers was passed over the footlights to her at the Metropolitan Opera House in New York.

Running up and down stairs, sweeping and bending over making beds will not make a woman healthy or beautiful. She must get out of doors, walk a mile or two every day and take Chamberlain's Tablets to improve her digestion and regulate her bowels. For sale by druggists and dealers.

## A CHANCE FOR HER.

She looked up at him in sudden doubt. "Can I?" she exclaimed, he was the only girl you ever told she was the only girl you ever loved?" He took time to reflect.

"No," he at length made answer, "but if distinction is what you are after you can, if you like, be the only girl that ever believed me."

## NA-DRU-CO LAXATIVES

are entirely different from others both in their composition and their effect—complete evacuation without purging or discomfort. 25c. a box at your druggist's. NATIONAL DRUG AND CHEMICAL CO. OF CANADA, LIMITED.

## SHADOW PICTURES.

Photographs That Can Be Made by the Aid of a Magnet.

It is possible to produce, with the aid of a magnet, shadow photographs resembling those made by action of the X ray. Either an electromagnet or a permanent magnet will answer the purpose.

Place a key or other iron or steel object on the sensitive film of an ordinary photographic plate, then bring the poles of the magnet near the other side of the plate and keep them there for five minutes or more. Upon developing the plate a shadow picture of the key or other object, as sharp and well defined as any of the X ray pictures, will be found.

By this method only iron or steel or other paramagnetic substances may be photographed, but the sensitive side of the plate is turned toward the magnetic poles and a disk of iron nearly as large as the plate is placed on the other side then shadow pictures of any nonmagnetic objects, placed on the sensitive film facing the magnet, may be obtained. The operations are, of course, conducted in a dark room.

With an electromagnet capable of lifting a weight of 100 pounds one scientist has made such pictures through two inches of interposed wood. He has also obtained shadow pictures with a compound steel magnet weighing little more than a pound.—New York Tribune.

## ORIGIN OF "BLACKLEG."

The Term Came From Race Track Men Who Wore Black Top Boots.

The term blackleg, which has come to mean one who systematically tries to win money by cheating in connection with races or with cards, billiards or other games of skill or chance and is used as synonymous with a swindler, a welsar, is of uncertain origin. Some authorities connect it with the black legs of a gamecock, so much used by the sporting fraternity for betting purposes.

According to another and more probable view, the expression had no disgraceful sense attached to it at first, but was applied to turf and sporting men because they were often in the habit of wearing black top boots. When blackleg had thus become a current phrase for professional sporting men it probably passed into use as applied more particularly to those who took an unfair advantage of their opportunities to cheat the unwary.

The derivation of this term was once solemnly argued before the full court of queen's bench upon a motion for a new trial for libel, but that learned tribunal was unable to decide its origin.—London Standard.

## The Bitter End.

You have probably often heard a person say "I will follow it to the bitter end" or something to that effect, but very few persons know that this is a nautical term and is borrowed from a ship's cable. If you have ever been on a big ship you must have noticed two big pieces of wood sticking up out of the deck forward, alongside each other. They sometimes have a wireless between them, and they are used to secure the cable that goes to the anchor. These pieces of wood are called the bits. When the ship comes to anchor and the cable is paid out all that part of it which is afloat or behind the bits is called the bitter end of the cable. In a storm or in poor holding ground for anchors the more cable that is paid out the better the anchor will hold, and when the captain is at all doubtful he pays out his cable to the bitter end sooner than risk any harm to his ship.—New York Press.

## Animal Ink.

Along the rocky shores of New England is much indelible ink. It is better than any that can be bought—a beautiful crimson in color and when applied to fabrics absolutely unchangeable. This ink is contained in little bottles put up by Nature herself, the receptacles in question being certain whelks, or sea snails, of the species known to science as *Prunum lapillus*. If the shell of one of these whelks be broken there will be found just under the skin of the back a slender whitish vein containing a yellow liquor. The latter when applied to linen with a small brush and exposed to the sun turns first green, then blue, then purple and finally a brilliant crimson. Nothing will wash it out.

## Somewhat Mixed.

"Willie, can you tell me what a vegetarian is?" "A vegetarian is a person who lives on vegetables," replied Willie. "That is correct. Now I wonder who can tell what an octogenarian is." "I know," replied Eddie. "Well, what is an octogenarian?" "An octogenarian is a person that knocks the other genarians."—Chicago Record-Herald.

## Weddings in Barcelona.

The wedding invitation means much in Barcelona, Spain, for then every one who receives one must go and give a coin to the bride. That is for her dowry. The father is usually unable to furnish one. He has had to buy a house for her and fit it up, and that is usually expensive.

## Very Extraordinary.

"Ed, doctor," said a gillie of a small Scotch town to a friend, "be usual has been an extraordinary man, that Shakespeare. There are things he has come into his head that never would have come into mine at all."—Chicago Register.

Oblivion is the rule and fame the exception of humanity.—Milton.

M. K. PIPER, Monitor Office. Bridgetown, June 18th, 1912.

### IMPORTANT NOTICE

According to the postal law now in force newspaper publishers can hold for fraud anyone who takes a paper from the post office and refuses payment, and the man who allows subscriptions to remain unpaid and then orders a postmaster to send notification of discontinuance to the publishers lays himself liable to arrest and fine. Postmasters are also liable under the law for the cost of papers delivered to other persons after the death or removal from their office district of the persons to whom the paper was first addressed.

### SWINGING A BUSINESS

Judicious advertising is the derrick that swings a business to success. Classified Want Ads. are terse business bringers that are suitable to any business. They help the small ones become big, and the big ones to become bigger.

Clarence.

Mrs. Ashley Harrison, of Magurville, N. B., is visiting her sister Mrs. F. W. Ward.

Mrs. Cossaboom, of Digby, N. S., is the guest of Mrs. Avar Jackson.

Roy Balcom, Lic., occupied the pulpit here on Sunday afternoon.

Mrs. H. C. Marshall returned home on Saturday, from her trip.

Mr. and Mrs. S. N. Jackson returned from their trip to St. John, on Tuesday, the 3rd inst.

The annual gathering of the W. M. A. Societies, of Clarence and Paradise, took place on Tuesday afternoon and evening.

A very enjoyable and helpful session was held in the afternoon. The ladies of Paradise, furnishing the entertainment. At the close of the session, tea was served in the vestry, from 5 till 7 o'clock.

At 8 o'clock the meeting was called to order by Mrs. E. J. Elliott in the chair. Roy Balcom, Lic., then read the Scripture and offered prayer, after which the Chairman introduced the Rev. and Mrs. Robie Longley, Methodist missionaries to China.

The Rev. gentleman had the undivided attention of the meeting from start to finish, as he carefully portrayed the position of China as a Kingdom, also her position in realms of Art, Science, Literature and their recognized position among themselves in the social scale.

Mrs. Longley also made a short address and by her pleasing manner won the hearts of all present. Miss Jennie Corbett, missionary elect to India, was also present, and gave an address on her call to the mission work.

She leaves in the course of a few weeks for India. During the evening Mrs. R. E. Williams and Mrs. C. Sanford sang a duet. The meeting was brought to a close by singing, "God be with you," and prayer by Rev. Balcom.

Miss Grace Williams is on her annual visit to Halifax, N. S.

A number of our young men have left for Aldershot today.

A new Fruit Co-operative Company has been formed here, with E. J. Elliott as manager.

Mrs. A. L. Bishop made a business trip to Halifax last week.

Mr. and Mrs. Putner, of Torbrook, were recent visitors here among their friends.

Miss Chambers has recently added two thoroughbred cows to her stock, having purchased them at the St. John Exhibition, both having carried off the red ribbon.

On Sunday evening the church and congregation enjoyed the opportunity of having the Rev. and Mrs. S. C. Freeman, missionaries of the U. B. Telugu mission. Mrs. Freeman spoke very interestingly on the work among some of the hill tribes, of the rapid progress being made toward Christianity.

Mr. Freeman gave a general survey of the work being done in the mission. In a few weeks Mr. and Mrs. Freeman will leave for their work in the East.

Service for Sept. 15th.—Bible School, 10 o'clock; Preaching Service, 11 o'clock; R. Y. P. U., at 7:30 o'clock; Leader, S. N. Jackson.

Paradise

Miss Pearl Covert of Lynn, has been spending the past few weeks with her mother, Mrs. Chas. Covert, Jr.

Mrs. J. L. Grant of Montreal, was a guest of Mrs. McNitch, at the parsonage last week.

Mrs. Robertson, of Yarmouth, is visiting Mrs. G. L. Pearson.

The members of the W. M. A. S. of Paradise, and several friends from Lawrence town, Bridgetown and Clarence, were entertained on Friday afternoon, by Mrs. G. L. Pearson, and had the pleasure of meeting and listening to Rev. and Mrs. S. C. Freeman and Miss Corbett, missionaries to India, and Rev. R. S. and Mrs. Longley, missionaries to China.

Mrs. Martin and family, who have been spending several weeks here, returned to their home in New York, last week.

Messrs Gibson and Williams, of New York, arrived last week, and are awaiting the opening of the moose season.

Mr. Roy Balcom occupied the pulpit, on Sunday last.

C. J. Durling, who has been spending his vacation here, returned to his duties at Havana, on Wednesday last.

Mrs. S. Small and children, after spending the summer with Mrs. Small's parents, Mr. and Mrs. W. H. Bishop, returned to their home in Mass., on Wednesday.

The marriage of Miss Blanche Jodrie and Mr. Schleicher of United States, takes place at the residence of the bride's father, Mr. David Jodrie, on Wednesday.

Phinney Cove

Phinney Cove, Sept. 10.—Mrs. Watson and Mrs. Otis White have returned from their visit to Boston. We regret to report Mrs. Bent on the sick list, but she was improving when last heard from.

Miss Sadie Gesner and Hiram Young, of Belesisle, accompanied by Miss Lindsey of Truro, were the recent guests of Mrs. Ann White.

Mrs. Grifton Bauckman and baby, of Bridgetown, after spending two weeks with her parents, Mr. and Mrs. Burket Chute, returned home on the 2nd, accompanied by her husband and his parents, Mr. and Mrs. John Bauckman, who came over to spend Labor Day.

Congratulations are due to two of our young men who were recently married: Herbert Chute to Miss Lillian Haynes of Granville, on the 16th ult., and Edmund Bent to Miss Lydia Sarty of Parker's Cove, on the 28th ult.

Mr. Israel of St. John, after spending a week with friends here, has returned home, accompanied by his wife and children, who have been spending the vacation with Mrs. Israel's parents, Mr. and Mrs. Alton Bent.

Mrs. John Chamberlain and children have returned to their home in Lynn, Vernon Bent, of this place, also Mr. and Mrs. Robert Young, of Young's Cove, took advantage of the excursion on the "S. S. Ruby L." to visit the exhibition at St. John.

Port Lorne

Port Lorne, Sept. 8th.—Capt. S. M. Beardsley and family returned to their home in Wolfville, last week.

Mr. P. J. Smith and family left on Friday last for their home in Nutley, N. J., after spending a very pleasant summer here.

Mrs. Alfred Morse and family have also returned to their home in Providence, B. I., all hoping to return again next summer.

Among those who have recently visited friends in this place are Mr. and Mrs. Harry Smyth, St. John; Mr. W. Anthony, Bridgetown; Mr. Charles Durr, of Walleston, Mass.; Mrs. G. B. McGill, of Middleton; Miss Robinson, of Malden, Mass.

Capt. F. A. Beardsley made a business trip to St. John last week.

Mrs. Jason Anthony, of Boston, and daughters Helen and Madeline, are visiting friends here.

Seward Corbett and Wilson Banks have gone to Keene, N. H., to seek employment.

Belleisle

Belleisle, Sept. 9th.—Mrs. R. L. Dodge is visiting relatives in Boston and vicinity.

Miss Gussie Wade is spending a few weeks with her brother, Mr. Fred Wade at Kentville.

Miss Bertie Longley, of Marlboro, Mass., is a guest at her old home here. Miss Reta Ruffee, of Bridgetown, was her guest over Sunday.

Mr. Fred Gesner, who has been stopping in New Brunswick, during the summer, is home.

Most all the residents of this locality have purchased and put up the new boxes issued by the Post Office Department for the free delivery of their mail.

A number of our young men are getting ready to go to drill at Aldershot on Tuesday.

The farmers of this locality are about through with their haying. A very large crop has been stored, mostly in good condition, considering the wet season.

The Death Roll

Annapolis, Sept. 3.—News has been received here of the death of Edna, wife of the Rev. T. M. Savary, which occurred at Kingston, Ont., on August 28th. The Rev. Mr. Savary, is a son of Judge Savary of this town.

The sudden death of Capt. John Rudolph, occurred at River Herbert on Sunday evening, Aug. 25th, aged 72 years. The deceased was well known to seafaring men in all parts of the world. A man of sterling qualities and of great business ability, he was highly respected by his many friends.

He is survived by three sisters, Mrs. Albert Clarke, with whom he resided; Mrs. Robert Smith of Parrsboro; and Mrs. J. Albert Delap of Grandview Ferry. The funeral took place on Wednesday last, Rev. B. M. Parker, of the Presbyterian Church conducting the services. Interment was in the River Herbert Cemetery.

Bear River

Miss Annie Wade left for Boston on Tuesday last.

Miss Helen Raymond returned to her College duties at Sackville on Wednesday last.

Mr. C. Harris attended the exhibition at St. John last week.

Mr. Payette Tupper arrived home on Wednesday last.

Mr. and Mrs. Roy Henshaw arrived home from Boston on Thursday.

Miss Blanche Bishop, who has been spending several weeks with her aunt, Mrs. G. W. Croscup, returned to her home at Lawrence town on Saturday.

Mr. and Mrs. Benedict, who have been spending a few weeks here, returned to New York on Friday.

Miss Mildred Chalmers is spending a short time in St. John.

Bark Giacomo (Italian) is loading lumber for South America. She will carry 12 million feet.

The Digby County Sunday School Convention met in the Baptist Church on Monday. Rev. Dr. Brown, Field Secretary, was present at all of the sessions.

Mr. Arthur Purdy, who now resides in New Hampshire, with his family are visiting friends in his boyhood town.

Mr. W. Harper, inspector of the Royal Bank, has made an official visit to the branch of this town.

On Tuesday Capt. Jos. Warren with his Company went to Aldershot for their annual drill.

Sch. Valdaie arrived from Boston on Monday. She will carry a load of staves to Rockland, Maine, this trip.

Mr. Max Murdoch, formerly a commercial traveller, was in town Monday making friendly calls on some of his old customers.

Work started on Monday on the new public wharf.

British Motor Boat Victorious

HUNTINGDON, N. Y., September 4th.—The Royal Motor Yacht Club of England to-day lifted the Harmsworth trophy in the most spectacular race since the Americans brought the trophy across the Atlantic five years ago. The British-built hydroplane Maple Leaf IV, won the deciding race of the series on Huntingdon Bay this afternoon.

She covered the thirty mile course in 47 minutes, 45 seconds, defeating the only American entry then running, Baby Reliance III, by one minute and five seconds. Another of the American defenders, the 32 foot Ankle Deep, had led the race by about half a mile for 25 miles; when in sight of the goal the propeller snapped off. The remaining pair finished an exciting race, but the American hopes were severely set back by the Ankle Deep's mishap, and when the Maple Leaf finally scored her triumph, the second in successive days, it was a stunning blow to the American enthusiasts.

Sportsmanship asserted itself, however, and the British victor, her crew and owner, E. MacKay Eggar, were given a lusty ovation by those aboard countless yachts assembled near the finish.

Five boats, three American and two British, started in the race. Baby Reliance II owned by J. J. Stewart Blackton, aided by no small amount of luck, had won the first race last Saturday, and the Maple Leaf III, had won yesterday. The only boat other than the winner to finish to-day was the Baby Reliance III, owned by Commodore Blackton.

Shanghai, Sept. 9.—An immense loss of life is reported from Wen Chow, in the province of Che Kiang. The Chinese estimates gives the death toll between 30,000 and 40,000 as the result of a typhoon combined with torrential rains and high tides which occurred on August 29. Great floods followed, and the upper Wen Chow river overflowed its banks and swept over a vast area. The town of Teing Tien, about 40 miles to the northwest of Wen Chow, was overwhelmed and 10,000 of the inhabitants were drowned. Various other towns and villages were destroyed, and the prefecture at Cui Chow which is an important missionary station, was washed away.

Employing 15,000 Men. Figures also show that the Canadian Northern has 15,000 men engaged on the railway construction work in Canada. On the line now being constructed between Sudbury and Port Arthur, 3,500 men are employed, while about 3,000 men are working on the new Canadian Northern line through British Columbia.

Misard's Laminated Glass Bandrid.

QUAINT CHARITIES.

Ugly Women Provided for by German Bachelor.

A well-known bachelor who died the other day at Frankfurt, Germany, left an endowment for an annual prize of \$125 to the man who leads the ugliest woman to the altar. If the bride is lame as well as unprepossessing, the groom will receive an additional sum of \$25.

This reminds us that the town of Haschmann, in Germany, has a system of rewarding lovers who marry girls who have little or no personal attractions. A well-known financier left a sum of money to the town authorities to provide dowries for the plainest woman under thirty married in Haschmann every year, a cripple, and four women under forty who had been jilted several times.

Givette, a town in the Ardennes, was left some money a long time ago, and to-day it encourages matrimony by awarding money prizes to mothers who send the largest number of children to the schools.

It may not be generally known that the church wardens of Yattendon receive every two years, from the mayor and burgesses of Reading, the sum of eight shillings under James Pocock's charity. It appears that Pocock by his will, dated Sept. 26, 1610, gave to the mayor and corporation of Reading the sum of \$125, on condition that they should buy land with the money. "The rents thereof," so runs the will, "to be employed to provide eight shirts and eight smocks, of two shillings apiece, each, or above, and bestow five shirts and five smocks to ten of the poorest people in the town of Reading, and the remainder, one year, to six of the poorest people of the parish of Frilsham, Berks, and the other year to six of the poorest people of the parish of Yattendon." James Pocock also directed that the mayor should have sixpence and the churchwardens fourpence for their trouble in purchasing and distributing the shirts and smocks.

A singular ceremony was observed at Guildford a month or so ago, when several maid servants competed for the "Maid's Money," which was left by John How in 1674. According to custom the entrants had to throw dice, and Miss Edith Palmer, scoring the highest number, was declared the winner.

Every spring several young servant girls of Cardiff, who wish to get married, are handed a sum of money to spend at their own expense in getting a home together. The maidens are nominated by the Cardiff Council and the mayor pays over the dowries. This marriage fund owes its existence to the generosity of the Marquess of Bute, who placed in the hands of the mayor of Cardiff, in the year 1897, the sum of \$5,000, the yearly income from which was to be distributed each spring to deserving servants of the city whose wedding was impeded by the want of a dowry.

A Moorish Marriage. A remarkable wedding, uniting the two most powerful families, has taken place at Tetuan. The son of the celebrated Moor, Lebady, lately the Bashah of Tetuan, has married the daughter of the Moor, Alcazar, who is a resident in Tetuan. The ceremony, as well as others who journey from Ceuta.

The Moors who were invited to the feasting and revelry, which lasted two days, had such enormous appetites that for the purposes of different banquets they slaughtered 2,000 hens, 2,000 chickens, 500 sheep, 40 oxen, and 500 pigeons. Honey and cheese were consumed by the hundredweight, and bottles of lemonade disappeared by the thousand.

For coffee and tea, 5,000 pounds of sugar was required, and Lebady spent \$600 on biscuits, pastry, and confectionery. The Christians dined in European style in an hotel, and Lebady's house, which is a beautiful Moorish palace of high artistic merit, was full of presents.

The Habit of Acquisition. "It leads me," said the philosopher, "that people will keep piling up money long after they have several times as much as they'll ever be able to use."

Then he went out for a walk. Passing a bookstore, he saw half a dozen very cheap books, which, however, he doubted very much if he ever would have time to read. But they were cheap, and he bought them and sent them home to be added to his library, which already contained several volumes he had no time to read. Nevertheless he continued to wonder at the senseless accumulation of money.

Sir Walter's Pipe. Sir Walter Raleigh is credited with being the man who introduced tobacco into England. When he was led to the scaffold to suffer the loss of his head he nonchalantly smoked his pipe to the last moment and then handed it to Bishop Andrews, in whose family it has since remained. The pipe is soon to be sold at auction. It is of Virginia maple and bears a number of carved dogs' heads and Indian faces.

A Leather Road. A leather pavement has stood a successful trial of a year near Birmingham. The material is leather waste, shredded almost to pulp, and treated with bitumen and tar. The road is not affected by heavy wheels, gives off little dust, resists wear, and is not influenced by weather. Its noiselessness and springiness give a novel kind of comfort to horses and drivers.

Sydney, Sept. 8.—A young man, Hedley Vickers, son of Finlay Vickers, of Sydney Mines, was accidentally shot dead this afternoon at Schenackie, near Grand Narrows. Vickers, with two others from Sydney Mines, went to Schenackie on a shooting trip yesterday, and expected to return home to-morrow. No part of how the shooting occurred could be learned tonight. Friends of the deceased, with a casket for the body, left by tonight's express, and will have the body brought home to Sydney Mines to-morrow.—Ex.

LADIES' NEW FALL AND WINTER COATS HEWSON'S SWEATERS, UNDERWEAR. STRONG & WHITMAN

SHIPMENTS TO GLASGOW

Mr. F. A. Ruddick, the dairy and cold storage commissioner at Ottawa, has just issued the annual report for the year ending March 31 last of Mr. James A. Findlay, cargo inspector at Glasgow for the Dominion department of agriculture under the direction of that branch.

The Canadian apple season of 1911-12 was one of large shipments from Ontario and Nova Scotia, says Mr. Findlay, but viewed as a whole it was of a disappointing and unprofitable nature to those handling at Glasgow, as with the exception of a few parcels of colored varieties which realized good returns, prices generally were moderate. The course of prices was dominated in the early season by unusually heavy crops of exceptionally well grown fruit from England, which completed with shipments of Ontario summer apples, followed by large shipments of Nova Scotia gravenstein, Kings, Blenheim, etc. Ontario shipments consisted of 153,482 barrels, 103 half barrels, and 31,776 boxes, showing an increase from the previous year of about 72,000 barrels and 16,446 boxes. The pears imported from Ontario showed a large falling off from previous seasons, there being only 3,764 cases and 62 half barrels in cold storage and 27 barrels in ordinary storage. Glasgow's imports from British Columbia consisted of 2,407 boxes of apples and 648 boxes of pears, showing an expansion over the previous year.

Orchard competitions have been arranged for by the Ontario Department of Agriculture and the Ontario fruit growers' Association to take place this season. The money for these competitions has been secured from the federal grant. The province will be divided into six districts, and there will be prizes in each district of from \$5 to \$25, depending on the acreage. In two of the districts where apple orcharding is not carried on to as large an extent as in the others, the size of orchards specified is somewhat smaller, ranging from 30 to 120 trees, from 120 to 300 trees, and in orchards of from 300 trees up. A score card will be used in judging, with the following number of points given for each orchard operation: Pruning and scraping, 18; spraying 15; cultivating or mulching, 10; quality, 10; quantity, 10; cover crop, 8; marketing, 6; fences, 2; general excellence, 8-100.

MAN SHOT DEAD. Sydney, Sept. 8.—A young man, Hedley Vickers, son of Finlay Vickers, of Sydney Mines, was accidentally shot dead this afternoon at Schenackie, near Grand Narrows. Vickers, with two others from Sydney Mines, went to Schenackie on a shooting trip yesterday, and expected to return home to-morrow. No part of how the shooting occurred could be learned tonight. Friends of the deceased, with a casket for the body, left by tonight's express, and will have the body brought home to Sydney Mines to-morrow.—Ex.

JOINS NOVA SCOTIA TRUST.

J. C. Bourinot has been appointed agent and representative of the Nova Scotia Trust Company, for Eastern Nova Scotia and the Island of Cape Breton, to take effect on September the first. The company he represents has on its directorate men of the strictest integrity, who have been successful financially, conservative in business and thorough in dealing with all matters requiring their consideration and attention, they are all Nova Scotians. The shareholders are carefully selected, distributed throughout the Province and are all representative men who have made good. Mr. Bourinot is a shareholder. The company acts as financial agents, trustees for bond issues and as transfer agents. A specialty is being made of investment securities. Nothing but securities of undoubted merit will be offered the investing public. They will be thoroughly scrutinized and investigated before they receive the approval and endorsement of the Nova Scotia Trust Company.—Port Hawkesbury Bulletin.

SOLDIERS DISMISSED. Halifax, N. S., Sept. 3.—Fifteen men at the Nova Scotia military camp at Aldershot were dismissed today because they refused to be vaccinated. The rule is that if a soldier is not vaccinated when he arrives at the camp, this must be done that day or the day after. Six men from the 66th P. E. I. F. and ten from the 62d Rifles had not been vaccinated and refused to allow it. Accordingly their accoutrements were taken from them and they were dismissed and escorted under guard from the camp to the railway and sent home. One of them was a sergeant.

INVISIBLE LIGHT.

Only When It Strikes the Retina of the Eye Can It Be Seen. What is the simplest demonstration of the fact that light is invisible? The blackness of a midnight sky demonstrates this fact most readily. We may see the planets brilliantly illuminated by the sun's rays, but the surrounding space is dark, although we know that light must be passing there. The passage of a beam of light through a darkened room is only visible on the dust in the air, and the cone of light seen when the sun shines through a small hole in a shutter is not visible, but only light reflected from the motes in the beam. This can be easily and simply demonstrated by placing in the beam a glass vessel from which the dust has been carefully removed. The beam then may be seen before and behind the vessel, but is invisible within. A Bunsen burner or a red-hot poker held so as to destroy the motes will also render the beam invisible at that spot. Light is only visible when it strikes on the retina of the eye, and it can only do so when it reaches it in a direct line or is turned by a reflection or refraction into a direct line. Just as the bullets from a gun do no harm unless aimed or turned in their course toward his body, so light is without effect unless it is aimed or turned toward the retina.—Pearson's Weekly.

DUMAS AND HIS BARBER.

Origin of the Practice of Speculating in Theater Tickets. The practice of speculating in theater tickets, strange as it may appear, was started by the elder Dumas. He patronized a Paris barber named Porcher, and one day this worthy while shaving the novelist asked him why he did not sell the tickets given him by the managers of the theaters where his plays were produced. "To whom could I sell them?" asked the author of the "Three Musketeers." "Why, to me, if you like," replied Porcher. "And what would you do with them?" asked Dumas. "That's my business," replied the barber, continuing to lather the bronzed face of the famous story teller. "But I give you tickets whenever you ask for them," said Dumas. "All one or two are not sufficient for my purpose," responded Porcher. "I must have all your tickets, and every day too." "And you will pay for them?" asked the dramatist. "Cash," was the simple yet practical reply. Dumas at that moment was very badly in need of money, so he at once concluded the bargain. Porcher, who shortly after this gave up shaving and cutting hair, made similar bargains with other authors and quickly became rich.

STICK TO YOUR JOB.

In the current issue of Farm and Fireside appears the following advice to farmer boys. It seems to apply in every line, however: "No boy or man will ever be a success if he drops a plan or quits work on anything before he has brought it to a successful end. True success in life is simply the leaving of no job unfinished. When a boy, I hated to leave a job half done and then go back to finish it. It seemed as if I hated it worse than ever then, and it was more tiresome. Learn to plan every detail first, then carry each step to a successful finish. I have worked for men who were not sure what they meant to do. We hired men were flying from one job to another. We spent half the time in walking around, all because the boss had no plans outlined for the day. We finished, tired out with little done."

The Spread of Spoils.

One of the problems that confront the naturalist is that of accounting for the distribution of identical forms of life through widely separated localities. Investigation frequently shows that this has been accomplished in many ways that appear quite simple when once discovered, although one would hardly have thought of them. Some interesting facts have been gleaned concerning the dispersion of fresh water mollusks, accounting for their appearance in remote and isolated ponds. Waterfowl play an important part in this work. Ducks have been known to carry mussels attached to their feet a hundred miles or more. Bivalve mollusks not infrequently cling to the toes of wading birds and are thus transported for considerable distances. Even aquatic insects have been known to carry small fresh water mollusks attached to their legs.—Harper's Weekly.

SHIPMENTS TO GLASGOW

Mr. F. A. Ruddick, the dairy and cold storage commissioner at Ottawa, has just issued the annual report for the year ending March 31 last of Mr. James A. Findlay, cargo inspector at Glasgow for the Dominion department of agriculture under the direction of that branch.
