Jan. 31, 1911.

Among the first of its members to be elected unopposed will be Arthur J. Baifour, the opposition leader, the Liberais having decided not to contest his seat for the City of London. On the stock exchange, where regular dealings have been instituted in bets on the election, the feeling to-day seemed to anticipate a reduction in the Liberal majority.

anticipate a reduction in the Liberal majority.

In Ireland the struggle is growing more bitter every day. A meeting of delegates representing every Ulster county constituency was held in Belfast to-day, at which a resolution was adopted, on motion of a Presbyterian minister, to draw up a solemn declaration refusing to pay rates or taxes imposed by a Dublin parliament, or obey its decrees, while \$50,000 was subscribed on the spot to organize the Ulster men into regiments and purchase arms.

**Ulster Breathes Defiance.*

At night a monster union demonstration was held at Ulster Hall, Belfast, an overflow meeting of \$20,000 people being held in the open air. Because two swords and one revolver were stolen Sunday from H.M.S. Rainbow by souvenir hunters, the afterend of the ship may hereafter be closed to visitors.

The liquor question and its application to the men of the Rainbow is still a live subject. The city council made an early regulation against beer or whiskey at any civic function, but at Friday evening's smoker, at which the mayor presided, liquor flowed in plenty. On Sunday Dr. Spencer, secretary of the local optionists, took the officials to task for this alleged breach of early arrangement.

The wireless operator and one recruit, who signed on the Rainbow at Victoria, have been dismissed because they flagrantly broke the leave regulations.

Better Off Without the Lands.

D. B. Neeley (Liberal, Sask.), declared that the Provinces of Alberta and Saskatchewan were better off without having the administration of their public lands than they would be if they were given the lands, as Mr. Borden suggested. At the present time the provinces were getting a subsidy, but, if they got the lands, there would be no income from the free homesteaded lands.

He criticized Mr. Borden for his demand that the government had been dilatory regarding the question of the grain elevators. On the other hand, he said, under the legislation of the present government, the condition of the grain trade was a hundred per cent. better than it was twelve years ago.

Dr. Sproule (East Grey) declared there was an absolute need for a plebiscite or reference to the people on the naval question, and described the governments attitude as "arbitrary, autocratic, tyrannical, and out of harmony with the principles of constitutional government, as known and carried out by the imperial parliament and the colonial dependencies of the empire."

An altogether optimistic love story has been evolved without losing the caustic witticisms which are the chief charm of the text. The title role is ably handled by Miss Adele Blood, a woman of rare beauty. The cynical role, which has always proved too sombre for the success of other dramatizations of the piece, has been saved by making it an actor's part, played only for effect, so that if some or the only for effect, so that if some or the lines are daring, the sting is washed away when you find that they were only used as a means for the greater teaching of optimism. Altogether it is an artistic effort not often seen in

vaudeville.
Howard and North are back with their delightful bit of human appeal, more humanous, more human and more senuine all the way thru. Then there is Jack Wilson with his wife, Ada Lane, and Franklyn Batte with the golden voice. Jack is as funny as ever, and his clothes are funner yet. Belle Adair, a dainty newcomer, has a pleasing assortment of songs which she sings with real witchery. Jack Connelly and Margaret Webb, have a piano act with a novel hurricane finish. There is some good comedy as well as a deal of good catchy music in the Four Musical Hodges' offering, and The Kratons are surely wizards with the hoops which they make perform wondrous antics. Rice, Sully and Scott have a good comedy tumbling act and the motion pictures are new and good.

At the Gayety.

A bright, bubbling, breezy entertainment is that which the well-known burlesque organization, Rose Sydell's London Belles, offer at the Gayety. "The Girl from Sherry's," an extravanganza with an elaborate setting, it a highly diverting concoction of comedy and music, introducing a chorus which in looks, coetume and singing qualities leaves little to be desired. Many of the Gayety's steady patrons gave the verdict last night that this is the best show of the season to date.

Rose Sydell as the "Girl" is charming as usual, and her songs, which are well rendered, have a pleasing lift. John Weber shows up in excellent style as a Dutch comedian. The other principals, including Monta Parker, are all good.

A THANKLESS TASK

R.v. Dr. Clark Addresses Opening Meeting of Bible Class Conference.

About 20 cities and towns were represented at the two-day Bible class conference, which opened yesterday at Bloor-street Presbyterian Church.

Frank Yeigh presided in the afternoon, when the speaker was the Rev. E. A McIntyre, rector St. Addan's, Kew Beach, who gave an address on the benefits of "Seeing Things Together."

A woman's conference followed, led by Mrs. (Rev.) D. T. L. McKerroll, and a men's conference by A. J. Keeler.

A tea table conference followed the afternoon meetings.

Rev. W. G. Wallace addressed the evening meeting on the Bible in rela-

attractive.

Among the leading characters are Dorothy La Mar. Eva Muli, Herb Terry, Will Fox, Harry Stewart and Fay Innis. There are a number of pleasing specially features and, all in all, the show is sure to prove a winner for the week. Yesterday's audiences were both large and enthusiastic.

Last of the Season.

The last steamer of the Merchants' Multual Line, the Pellatt, left for the west yesterday with 600 tons of cargo. The last boat from the east, the Haddington, arrived with 1000 tons.

Among the leading characters are evening meeting on the Bible in relation to the Fible in relation to the Sunday school. He pointed out that it should be part of and the climax of the Sunday school. William Hamilton presided.

J. L. Baines, Brantford, spoke on the Bible class in relation to the church. The Bible class members should be given work to 40 for the School and they would have their interest maintained.

Rev. Joseph Clark, D.D., secretary Ohio Sanday School Association, gave an address on Bible class evangelism. He said that much had been done along to of entertainment, but the most import.

ant was the evangelical—to enrol Bible class members as soldiers of Christ. They must be brought to the point of desiring to enlist, and then be shown how to do so. After a decision to lead a Christian life, the recruit was not an efficient soldier of Jesus Christ until, like the soldier in a British regiment, he had become so by preparation. The Sunday school teachers had a thankless task, but ultimately they reaped the fruits of faithfulness, and no greater happiness was to be enjoyed than that of leading a soul to God.

SUGAR TRUST INDICTED UNDER SHERMAN LAW

It is Able, the Government Alleges, to Fix Prices Arbitrarily-Fraudulent Methods Charged.

NEW YORK, Nov. 28.-The federal government to-day began one of its most important actions against great corporations, which are said to have violated the Sherman anti-trust law. Henry A. Wise, U. S. district attorney, filed in the U. S. District Court for the Southern District of New York, a petition asking for the dissolution of the American Sugar Refining Company, and 29 other corporations, which compose the so-called sugar trust. The petition charges that it is an Ulegal combination in restraint of trade, and asks from the court relief in whatever form may be necessary, including a receivership, if deemed advisable. The thirty companies composing the sugar combine have an aggregate capitalization of \$230,000,000, and control a large percentage of the output of su-gar in this country. The combine is able, the government alleges, to fix prices arbitrarily. The petition charges hat for years the companies have vio lated the law, and have oppressed competitors and ground them out of existence. Railroad rebates and cus-

BAKERS DEFEND SMALL BREAD Counsel Declares to Court of Appeal That Public Want It.

-Third Floor.

"Is 'small bread' required to be sold loaves of small bread, so-called, be oined together and sold without being

detached by the vendor?"
Upon this question the court of appeal of five judges, namely, Moss, C.J., MacLaren, Meredith, Garrow and Magee, reserved judgment yesterday W. F. Nickle, K.C., M.L.A., who is responsible for the Bread Sales Act, appeared with Deputy Attorney-General Cart-wright to ask an interpretation of the wright to ask an interpretation of the act in accordance with the above question submitted by order-in-council. E. A. DuVernet, K.C., and J. C. Judd. K.C., of Lindsay represented the Bread and Cake Manufacturers' Association.

Mr. Cartwright contended that there should be a standard loaf to protect the public. Small bread was allowed to be made in any weight not exceeding 12 ounces avoirdupois. The question was whether this small bread could be sold joined together in loaves of, say 20 ounces, with just a slight seering on the top to indicate the boundaries of the alleged small bread.

RUGBY GOSSIP.

The members of the victorious team were warmly received yesterday around the university. Every class that was sufficiently fortunate to claim one of the champions furnished belosterous applause as he entered the room and was always encouraged by the presiding professors or lecturers.

Manager Jack Macdonald stated yesterday afternoon that in his opinion there wasn't a Rugby team in Canada except Varsity, that could beat the Tigers. As to Hamilton's chances if a second game was played, with Varsity Jack said: They couldn't beat us in a thousand years, and they know it. We had them nailed in every department of the play."

Gage and Dixon will rest on their laurels for a few days before commencing baskete ball practice. Both men are as handy at the indoor game as they are on the griding. They played on the Varsity I. basketball team last season.

Varsity Rugby officials say that the hlue and white have excellent prospects for another championship team next year. Several players, including Mike Kennedy, and Maynard, will still be on the line-up and Pete Campbell, the Varsity II. fast quarter back, will also be eligible.

HAMILTON WRITER SAYS TIGERS LACKED BRAINS

Newspaper Opinions in Regard to Rugby Finally Agree That the Best Team Won.

Montreal.

Montreal Herald: With Varsity's victory over Tigers this year the question is bound to arise. "Do they play better football in the Intercollegiate than in the Interprovincial?" Judging from the expositions given on the McGill campus, one is tempted to believe that the collegians play straight football; that is to say, by runling, by kicking, by pushing always with the aim in view of crossing the opponents' goal line; which, combined with youth and the condition that the student sade is supposed to bring about, more than outbalances the "trick plays" and the Chinese puzzles of the coaches of the Interprovincial Union. And of the two, straight football is going to win most of the time.

Montreal Gazette: The match was probably the most brilliant exhibition of Canadian feetball description.

Montreal Gazette: The match was probably the most brilliant exhibition of Canadian football in recent years. Old-timers who have been following the game closely for fifteen years were at a loss to hark back to a gridinon contest marked by a higher standard of all-round play and more sustained interest.

Ottawa Free Press: Intercollegiate footbail is portrayed by Toronto Varsity again friumphed over the best the Big Four could put forth thru its representative fourteen, Hamilton Tigers. The victory was clean-cut, honestly and deservedly earned. Not one of the monster gathering of twelve thousand people doubted other than the best team won, thru superiority in every branch and department of Canadian Rugby. It was another case of thorobreds opposed to Clydesdales.

Bob Wessels, was overlooked in recounting the list of celebrities. He was on the Rugby suit of blue and white, and enjoyed the play thoroly.

"If the Tigers can hold together they have good prospects of carrying off the Dominion championship next season," said a Varsity official last night.

Controller Church is making an effort to have a civic reception or something of the sort accorded the champion Varsity players. He suggests public subscriptions and trophies for the men.

Ottawa Citizen accords the Varsity team tribute to Griffith, who, it says, has accomplished wonders, and states that Simpson and Gall were the finest players on the field. Had the ground been dry, says the field. Had the ground been dry, says a revelation, illustrating the fact that the time has come when Interprovincial teams must abandon time-worn tactics, as those adopted by Ottawa last year and Tigers this season.

Several new teams have applied for entrance. Al old clubs and any new ones wisning to join are requested to send two delegates.

Waterico to Have Pros.

WATERLOO, Nov. 28.—The prospects for a professional hockey team here are daily growing brighter, and, while last year's management declines to take charge again, it is probable that the announcement can be made in a few days that other parties will place a team in the Western Ontario League. There has been no dearth of hockey players, enough having applied for positions to form two good teams. The league will probably comprise teams from Waterioo, Berlin, Brantford, and either Gait or Stratford.

MONTREAL, Nov. 28.—If all goes well in Intercollegiate hockey circles, next Saturday will possibly see the final acceptance of McGill's suggestion to extend the league so as to include Laval (Quebec) and Ottawa College, and to play off the schedule in two sections. Toronto, Queen's and McGill playing in one division, and Laval (Montreal), Ottawa College and Laval (Quebec) in the other. Varsity has indicated its willingness to remain in the league under the proposed conditions, while Ottawa College and Laval (Quebec) have accepted the invitation, and Queen's and Laval (Quebec) have accepted the invitation, and Queen's and Laval (Montreal) have made no objection to the proposed arrangement. A meeting of the league will probably be held here Saturday to conclude arrangements and draw up a schedule.

HOW HAMILTON POLICE

Searched Without Cause and Arrested Because He Wanted Redress.

Five charges arising out of Saturday's "doings" after the football game were aired before Magistrate Pelfs at Hamilton yesterday, and a suit for damages against the municipality for false arrest will be the outcome of ont of them. A. K. Coulter, a former university student, and a nephew of the deputy postmaster-general of Canada, will be the plaintiff.

Mr. Coulter's story puts Acting Detective Barrett of the Hamilton force in a bad light. "I was standing in the Royal Hotel rotunda, in the crowd, when Barrett, who was in plainciothes, came over and asked me to step aside with him. Then, without explaining who he was or what he wanted, he

with him. Then, without with him. Then, who he was or what he wanted, he began to search my pockets. When I objected, he said 'will you shut your d—mouth?' and struck me in the face. After his search, he said I could go. I told him I would put in a complaint against him and went to the telephone to call the police department, when he followed me up and said he was ready to go to headquarters with me. We set off, he tightly holding my arm. About fifty people followed us, including some personal friends, all ready to testify in my behalf, but when we reached the city hall, he shoved me inside, shut the door, and threatened the crowd with arrest if

shoved me inside, shut the door, and threatened the crowd with arrest if they didn't go away, at the same time displaying a pair of handcuffs.

"Then he laid a charge of disorderly conduct against me. After he and the sergeant talked it over, the sergeant asked me if I was willing to let things go as they were, but I said I intended to get redress. So they called the pato get redress. So they called the patrol wagon and I was led out between two rows of police, anr escorteh by three uniformed men and three de-tectives, and in view of several hun-dred people, bundled into the wagon and taken to the cells. After an hour and a half or so, the police took \$15 cash hall provided by my companions and let me go. While we were hurrying to the train, we met a man who had been pointed out to me as a de-tective, and who shook his fist at me and asked if I had had enough."

Yesterday H. M. East of this city, an uncle of Mr. Coulter's, achompanied him to Hamilton. Barrett did not appear in court to press the charge and t was dismissed. Suit will be entered for false arrest.

The Hamilton Herald said last night editorially: "The case of Mr. Coulter, a respectable young Toronto man who fell into the hands of the Hamilton poice on Saturday evening, is a hard one, Without any apparent reason he was seized by a plainclothes officer in a downtown hotel and his pockets were searched in view of many onlookers. When he made a natural protest against this indignity he was threat-ened with arrest for disorderly conduct. When he went to the city hall police station to lodge a complaint against his treatment he was seized. handcuffed and hustled to the cells in the patrol wagon. A charge of dis-orderly conduct was entered against him, but when he appeared at poice court this morning there was nobody present to prosecute him. The Herald service, is announced, due to ill-

understands that Mr. Coulter intends to bring civil action for damages against the officer who arrested him. He ought also to bring the matter to the attenion of the police commission-

ers."

The reason why Coulter was searched, so the police say, was because a man in the rotunda had complained of having been robbed of \$15.

Adrian Rathburn, Toronto, charged with assaulting the police, falled to appear and \$25 bail was forfeited. Percy Sullivan, Toronto, who used ylolent language, was let go. Two Mamilton youths, also celebration yietims. ilton youths, also celebration victims, were in court. One was fined \$5 and the other got off.

Those who are considering the question of entering teams in the cribbage league are again reminded that the time set for club entries to close is Thursday, Dec. I, at 10 p.m., when a meeting of the executive committee (every team in the league is entified to one reprosentative thereon), will be held in Grenadier sergeants' mess, 77 West Queen-street, at \$.20 p.m. Entries must be accompanied with \$5, the team entrance fee, and a list of players eligible to play for their team. Teams will be composed of 12 men, but a team may sign any number of players. No player will be allowed to sign with more than one club during the season, but clubs may sign on new players at any time by giving the secretary of the league the requisite notice. It is expected that the league will start on Tuesday, Dec. 6, as the schedule will be drawn up as soon as all the entries are in. One game per week will be played by each team and a most pleasant season is anticipated. Any information may be obtained from A. Perks, president, 559 Dundas-street, or E. H. " The Shadow of the Cross."

Referring to the attempted hold-up in connection with the annual championships in Montreal, the report said:

"An attempt of certain of the Toronto athletes to force the union to pay a portion of their maintenance charges was the one regrettable feature of the meet. The union has heretofore treated the representative athletes of Canada in a more than generous way. Their expenses were paid to Halifax and Winnipeg at former champoinships, partly a sa recognition for their allegiance to the union, and partly with the hope of developing men who would be worthy to represent the country. The first opportunity that offered for these men to represent Canada at the Dominion championships, and when their success would have been a matter of national pride, they showed their lack of appreciation of our former consideration by attempting to hold up the executive of the union. As you may probably be aware, their attempt was very curily dealt with This incident would suggest that the union should deal much more strictly with the athletes than has heretofore been the custom, as these young men are evidently unappreciative of the consideration shown them."

The marvelous painting, "The Shadow of the Cross," which created such intrest here last September, will again be placed on exhibition here in the Grand Opera House building, beginning on Friday.

The painting represents the Christ, and when the lights are lowered a distinct cross slowly comes into view in the background. It is related that the artist is as mystified as the general public that view the picture as to how it occurs. hew it occurs.

find its way into a cabinet for any support which may come his way.

The proposal to enlarge the Welland Canal to 25 feet and the proposal to make a Georgian Bay ditch, along the Ottawa River, somewhat upon lines parallel to the Trent Valley Canal, in my humble opinion are both radically wrong, believing as I do that the time has come when the people of Ontario and of the west should centre their hopes upon a national movement to have ocean liners sail westward from Montreal to the upper lakes. I feel that a 25-foot Welland Canal will ultimately be shown to have been build in vain. built in vain. The place to commence canal building is along the St. Law-rence River; and that too upon a scale worthy of a great country, with a JIM HILL HAS THE FLOOR.

James J. Hill. the great American railroad man—and who by the by is a son of the Province of Ontario—continues, to predict hard times in the United States, chiefly, he says, because

'From Quebec to Montreal the distance is 160 miles. Owing to the shallowness of the waters on a portion of the river between these two places, particularly thru Lake St. Peter, vessels drawing more than 10 to 12 feet were formerly barred from passage for the greater part of the season of navigation. In 1826 the question of deepening the channel was first definitely mooted, but it was not until 1844 that any dredging operations definitely mooted, but it was not until 1844 that any dredging operations were begun. In that year the deepening of a new straight channel was commenced, but the scheme was abandoned in 1847. In 1851 the deepening with the public in the shape or dividends on millions and millions of watered stock which they created, and which dividends have for ever, if Mr. Hills has his way, to be paid hereafter by those who use that railroad

after by those who use that railroad and for which not one dollar ever went into the proposition. There is such a thing as extravagant freight rates as well as extravagant living and the extravagant living and gable. This of course can only be secured by getting a report from a comtravagant freight rates that Mr. Hill petent engineer; meanwhile we cannot do otherwise than study the facts helped to impose is the best answer at our disposal. The Province of Ontario and the City of Toronto have loyally supported every great scheme whose object was to build up any section of Canada. It is now about time to settle upon some plan of getting our great province and our great city in touch with the great ports of the world. Ocean vessels in Toronto harbor would soon make her a world city. The Georgian Bay Canal and the deepening of the Welland Canal should follow and not precede the deepening of the St. Lawrence for ocean vessels if the scheme administrative. The Toronto Railway Company has to thank the citizens for their co-operation with conductors in the inauguration of the Pay-As-You-Enter System. Most of the passengers had their fares ready as they boarded the P. A. Y. E. cars; those who had not were asked to stand aside until the others passed in. It is expected that in a few days every one will realize the advantage of securing tickets at a time when traffic is light; in order not to delay fellow-citizens at the busy hours.

Sunday's experience prompts the Company to offer the following suggestions to passengers:

1-Have your ticket torn off before reaching the fare box.

2-When two or more persons are boarding the car, one of them paying for the others, it is advisable for the tickets to be distributed among the party before getting on; or for the leader to mention the number in the party for whom fares are to be paid; or for the person paying the fares to thus advise the conductor, so that no mistakes or delays may occur.

3-Transfers are to be handed to the conductor, not dropped in the fare box.

4-As conductors have to scrutinize each transfer before the person presenting it passes into the car, the transfers themselves should not be crumpled or folded up when handed to the conductor. Otherwise passengers will be asked to stand aside till this is done, in order not to delay others.

5-Passengers requiring a transfer should ask for it as they are dropping fares in box, and not wait until they are passing

These are hints offered with a view to making it easier for the conductor to perform his duties, and to prevent passengers delaying

LOUISVILLE, Ky., Nov. 28 .- Joseph Wendling, charged with the murder of little nine-year-old Alma Keliner, who for months was supposed to be the victim of a mysterious kidnanning plot, was to-day placed on trial in the criminal court here.

The child disappeared on Dec. 8, 1909, leaving her home to attend mass at St. John's Church. No trace of the missing girl was found until May 30, when bones identified as hers were found buried in the cellar of the St. John's Church parochial school. Wendling, a former janitor of the church and school, who had disappeared Jan. 19, was arrested in San Francisco July 30, charged with the murder.

TOLSTOI'S FAREWELL MESSAGE TO THE WORLD.

An article (from which the following extracts were taken) by Count Lyoff N. Tolstoi, the great Russian reformer, idol of the

Russian peasant, thorn in the side of the Russian despotism, was

My farewell message to the world—at my age every greeting is also a farewell—is my view as to how Life should be framed in order

that it may be henceforth, not as heretofore, bad and sad, but as God

wishes, and as we wish ourselves; that is, that it may be full of happiness

our lives. If my conception of life is that my body (the body of John.

Peter, or of Mary) is given me in order that I may find in it as much

pleasure, joy and fortune as possible, in that case my life must always,

under all circumstances, be miserable or bad. The reason is that what I

desire everyone else desires. As everyone wants the greatest amount of

pleasure, and as the sum total of pleasure remains the same, there is not

enough to go around. Therefore every man who lives for himself must

take something from others; he must combat others, hate others and make

others unhappy. Even those who attain their purposes are never happy;

they are tortured lest others should deprive them of their wealth, and envy

such men are unhappy. Life is given to us for real happiness. But to

attain such happiness a man must understand that the real life is not in the

body: that happiness is not reached in obeying the body's dictates, but in

obeying the dictates of the spirit which lives in all men. The spirit asks

for spiritual happiness. And as the spirit is one in all men, it asks for

bad institutions; we need only, we are told, to change the bad institutions

into good ones, and life will change for the better. Do not believe that.

Do not believe that any particular institution can make life either better or

worse. Those people who most thirstily seek for the best institutions are

often themselves living in discord and quarreling. The institution which

some persons propose as the best others declare to be the worst; they desire

to substitute their own ideals, which opponents agree to be very bad.

And even if all institutions were the best conceivable, men could not live

with them owing to their being used to a bad life. At present we are

used to a bad life, and we are content with it. We pretend that we

would live better amongst better institutions. But how can institutions

not tried it. Make the attempt. Promise for a while to follow all the

commandments of love. Live so that in your relations with others, even

with thieves and drunkards, with superiors or subordinates, you will think

of what is best for them, not for yourself. And after you have made the

attempt, ask yourself: "Was it so difficult? Have I spoiled or bettered

my life?" Then decide whether love brings happiness or not. Try it.

Instead of returning evil with evil, try to return evil with good; to say

nothing ill of men; to act kindly even with the ox and dog. Live thus

one day, two days, or more, and compare the state of your mind with

its state in former days. Make the attempt, and you will see how the

dark, evil moods have passed away, and how the soul's happiness has

WOULD EXTEND QUEEN ST. WEST FROM SUNNYSIDE

Over Ground, Inclines to More Costly Plan.

To-Day at the City Hall.

4 p.m.—Special Committee on Hydro-Electric Celebration.

Despite the raw air, rain and sleet, majority of the members of the civic works committee yesterday refused to be turned from their purpose of visiting Sunnyside to get local color in deciding whether to do away with the deadly level crossing of the Grand Trunk by means of a bridge or by extending Queen-street to the High Park gates.

While City Engineer Rust and E. L. Cousins, the city's railway engineer, persisted in the view that the latter scheme, which would coet \$110,000 for construction, would involve too heavy land damages to be feasible, most of the aldermen declared that their sympathies lay with the extension plan. Controller Spence is also, a strong advocate, and the outlook is for its adoption unless unexpected difficulties arise, much depends, of course, upon the assessment commissioner's estimate of land damages.

The situation as it stands is this: The Dominion Railway Commission aube turned from their purpose of visiting

The situation as it stands is this: The Dominion Railway Commission authorized the construction of a subway under the present crossing, the company to pay two-thirds and the city one-third. Subsequently, the city and railway agreed that, owing to the low level of the prospective subway and the danger of inundation, it would be better to build a bridge 800 feet east of the crossing, at a cost of \$99.450 ax. the crossing, at a cost of \$99,460, ex-clusive of land damages, while the sub-way would cost \$145,000 to build, the same proportion of expense to hold

Subway at High Park.

Whether Queen-street is extended or not, a subway 80 feet wide in front of High Park gates is contemplated, as there is a dangerous level crossing at that point. In the one case, all traffic westward on Queen-street would be carried north of the Grand Trunk tracks on an 80-foot roadway, and would be emptied into Lake Shore-road thru the subway, and in the other it would be carried to Lake Shore-road t would be carried to Lake S thru the medium of a high bridge with

Ald. McBride claimed that the long ramp needed for the bridge undertaking would mean extending the damage zone nearly as far.

As the Grand Trunk is understood to be willing to allow the city five weeks to decide what to do, a hurry up decision is not required. The works committee will hold a special meeting on Thursday at 3 p.m., the main object being to deal with the schemes of assessments for the widening of St. Clair and Danforth-avenue. as prepared by Assessment Commisstoner Forman.

The city engineer, referring to St. Clair-avenue, which the city proposes to widen to a width of 86 feet from Yonge-street to Avenue-road, and to width of 100 feet from Avenue-road o Weston-road, says it would be inequitable to assess the whole cost upon the properties fronting on that thorofare. A Complaint.

A citizen writes: "While coming down in a pay-enter car this morning, an incident occurred which I think is worshy of being brought to the notice of the company. Between blocks, at a time when the conductor was quite disensaged, a lady passenger came to the back of the car and asked for a transfer; it was refused in a very disagreeable manner. I have always understood that the company's grounds for refusing a transfer, other than at the time of payment of fare, was the possibility of the passenger not having paid his fare, but where a passenger is already inside a pay-enter car, the logical conclusion would seem to be that he had paid his fare, and that he was entitled to a transfer, and the company would appear to be taking advantage of an oversight on the part of a patron to compel him to pay a second fare.

Manager Viewed Pay-As-You-Enter Operations at Busiest Hours and Was Satisfied.

It was a severe test that the pay-asou-enter system on the street railway revelved yestertay. The pelting sleet at th busy hour between 5.30 and 6.30 p.m. discouraged the most ardent padestrian, and the result was a rush for the cars that taxed them to the last inch of capacity. However, Manager Fleming professed himself entirely satisfied last night.

"The weather was very bad, but the The weather was very bad, but the system worked first-class," he said. "The reports from all sides were satisfactory. I was with officials on Yongestreet, just north of Queen, up till 6.50 p.m. The cars were pretty well loaded up by the time they reached that point, but there was little noticeable ielay beyond what is unavoidable at any time under such conditions."

Mr. Fleming said that he expected to have the College-street cars equipped with the stationary boxes by the end of the week.

Conductors Satisfied.

with the stationary boxes by the end of the week.

Conductors Satisfied.

The views expressed by conductors are that, when the rear platforms are sheltered, as they expect the company will have done before long, they will not regret the change. That the system itself is not unpopular with the men is shown by the statement of Joseph Gibbons, business agent of the Street Railwaymen's Union, that he is in favor of its adoption and that it works satisfactorily in Montreal.

One conductor told The World that his main worry was over transfers. Many passengers presented these slips of paper in such a badily crumpled condition that it took some time to straighten them out.

During the rush time, Yonge-street cars were, in many cases, so thickly packed that it was impossible for passengers on the platform to get near the fare box. The conductors had to so after them in the old-fashioned way, collect their fares and deposit them in the box.

"While the American cities mentioned by the Street Railway Company have adopted the pay-enter system during the winter months, the very large bulk of the traffic in these particular cities is handled by elevated and "tube" lines, the surface cars having little of the rush traffic. Such cities as Chicago and Cleyeland, where the traffic is handled solely by surface cars, had not, at the time of my last solourn in these places at any rais, found the pay-enter system practicable."

Negligent Inspection of Newark Factory Found, Prosecution Sure.

NEWARK, N. J., Nov. 28 .- "If I find any city or state official guilty of neg-ligence in the inspection of this build-ing," said Prosecutor of County Mott to-day, as he stood by the ruins of the factory in which 24 girls lost their lives by fire last Saturday, "there will be the bitterest sort of prosecution."

Accordingly, a coroner's jury of six was sworn in, the first of its kind that was sworn in, the first of its kind that has sat here in 20 years. There will also be separate enquiries by the grand jury, which visited the scene to-day; by the state labor department, and the city building department.

Funerals of many of the victims were

held this afternoon. Many of the girls and women killed were supporting their families, in part or in whole. One woman left a blind daughter almost penniless, and there is much actual want in other households. A relief fund started yesterday, has now fund, started yesterday, has reached \$2000.

TRENTON, N. J., Nov. 28.—General Lewis T. Bryant, state commissioner of labor, after an investigation to-day in Newark's fatal fire of last Saturday, issued a statement absolving the own-

ers from any guilt.
"The records," he said, "show that the owners conformed to all the fire regulations imposed on them by the state, and that the building was absolutely safeguarded with fire escapes, as provided for under the laws."

Presentation to A. U. Merrylees.

The presentation of a handsome clock to A. U. Merrylees, secretary of the Mississauga Golf Club, who is leaving for London. England, to accept a position with Robins' Limited, was a feature of the club's annual banquet held at the Queen's Hotel last night, Speeches were made by A. R. Capreol and C. J. Webster, captain of the club, and Mr. Metrylees expressed appreciation of the honor paid him.

Fight to a Finish.

RUNNEYMEDE, Nov. 28.—(Special.)

A meeting of the Runneymede ratepayers was held in the new schoolnouse
to-night to protest against the narrow
subways the C. P. R. proposes to build
at Jane-st. and Scarlett-rd. Robert
French was in the chair, and Ald. A. J.
Anderson, who has been looking into
the case, was the chief speaker. He
gave several reasons why the railway
should build wider subways at these
points, emphasizing Jane-st. especially.
At this point the railway intends to
lay 20 tracks, covering altogether a distance of 300 feet, and under these
tracks to put a subway only 20 feet for
vehicular traffic. Unless a wider subway was laid here, all the speakers declared, it were better to close the road
ul, as many accidents might result
from the long narrow tube.

Finally a motion was put by E.
Johns, seconded by Mr. Smith, "That
this meeting is of the opinion that at
both Jane-street and Scarlett-rd. the
C. P. R. should build subways under
their tracks allowing 30 feet for vehicular traffic and 6 feet for foot traffic."

This will be presented at the next "We are all Bloor-st. viaduct men us carry the gospel in other parts of the city," was the slogan parts of the city." was the slogan thrown out by the speakers and workers at a rousing meeting held last night in Danforth Hall, called to discuss the big Bloor-st viaduct scheme. From first to last there was unbounded enthusiasm toward the project, and President H. R. Frankland and the controllers and aldermen who were present and endorsed the project, got the reception of their lives.

Controller Ward was not present, but sent his regrets and hearty approval of the plan and following the reading of that letter there was a hearty response.

of that letter there was a nearly response.

Secretary Barker of the Riverdale Business Men's Association started the ball rolling in his hearty support of the scheme, as did Dr. Sneath, the president of the association. "We are into this thing until the finish," said the doctor, "and we must win." The doctor threw out the suggestion that an aldermanic candidate should be named at every nomination meeting to preach the gospel of the Bloor-st. viaduct, and in every way carry the war into Africa.

This will be presented at the next meeting of the township council, and it is expected that they will lay it before the railway board.

Controller Foster reviewed briefly the great works carried on in the west and centural points of the general funds, and to none of which exception had ever been taken by the citizens east of the Don. "Anyway this is getting to be a big city and we must get away from the sectional ideas," said U. a increase in the land values would pay the cost of the interest on the council chamber on Adelaide-street for the closing session of the year, out the covered the appendix of the year. The members of the York County Council met on Monday afternoon in the council chamber on Adelaide-street for the closing session of the year, but beyond the appointment of a few committees there was little doing. Councillor Pugsiey proposes throwing a bomb shell into the ranks of the city automobilists who travel on the country roads, or whether they travel the country roads or not, in the following notice of motion, which will come up for discussion on Wednesday. It is this: "That I will on Wednesday next move the council into committee of the whole to consider the advisability of memorializing the government hard personal work and the present

would go thru.

"We have been called reactionaries by The Globe and The Star, sold outroller Church," but the same papers that are calling us now, were the very ones to attempt to shout down Hon. Adam Beck, the hydro-ejectric, and the advocates of cheap light and power a few years ago. The Bloor-st. viaduct was last year loaded up with a lot of dead wool, bst would carry this time.

"I am heart and soul in sympathy with the project for bringing this big district into closer contact with the city and you have my loyal support," was the way Aid. Sam McBride achied his position. "The scheme has been bandied about too much by the board of control. You deserve this bridge, and if elerybody does his share, it bility of memorializing the govern to impose a tax, on all automo such tax to be according to the horse-power of the motor car, and that the the betterment of the highways of the province."

ed his position. "The scheme has been bandled about too much by the board of control. You deserve this bridge, and if elerybody does his share, it would go thru."

Ex-Controller Hubbard spoke at some length, warmly supporting the plan and scouting the idea that any part of the cost should be charged up as a local improvement. Monday Evening, Nov. 28.

The Toronto stock market was not visibly influenced by the break in Wall-street securities to-day. The volume of business was light, and the selling insufficient to make itself felt to any extent on prices. Pressure was tried on Rio and Duluth-Superior, but these issues only responded to a fractional extent. The probable effect of the American structure of density stocks were because its days and these was can situation on domestic stocks was discussed to-day, and there was an impression abroad that Canadian investors and speculators would become disgusted with Wall-street and turn their attention to securities, which, if not so flippant, offer a much safer field. The investment demand continues good here, and recessions, if such occur, will invite an extension of this, the best support a market can get.

New York Stocks

NEW YORK, Nov. 28 .- A number of factors combined to cause the acute weakness of stocks to-day, some positive and some merely passive. The most significant fact in the day's greatly expanded dealings, however, was that Unifed States Steel, Union Pacific and Reading held to the full the over-whelming preponderance of activity over the whole market combined, which have characterized these stocks for

weeks on end. This fact offered convincing evidence that reversal of position by the small group of wealthy speculators and bankers, who have practically carried the whole of recent markets, was in progress.

The disappointing action of Lehigh Valley on its introduction to the New York Stock Exchange was a mere passive influence in the day's weaknews. It had been expected that the capitalists active in Lehigh Valley and in Rock Island, with a supposed supplementary speculative interest in Reading, would signalize the entrance of the new stock by a bullish demonstration. Instead there seemed to he efforts to take advantage of this expected demonstration to market stocks. Labigh Valley itself dropped to 179 1-2.

EDDY'S MATCHES

TUESDAY MORNING

Continued From Page 1. ese, but a careful research shows

An industrial Proposition.

For upwards of three years now it has been acknowledged that the silver mines must be operated as an industrial proposition. Honest and assiduous work with a careful expenditure of funds has resulted in handsome profits, and built up a mining camp, the peer of any in the world. Claims which were formerly prospects under the influence of aynamite and the drill are revealing a depth of mineral wealth altogether inconceivable in the early stages of Cobalt's able in the early stages of Cobalt's

history.

To get a true conception of the gradual and improving position of this camp, it is necessary to make comparisons by occasional visits. A revolution has taken place in the town it-

self within a year.

Whole streets of frame dwellings and stores have been replaced by modern brick and cement buildings within that period. But it is not only in the town itself that improvement is noted. Within the year most of the mines have added substantially to their camps, and in no one instance of more importance than the installa-

of more importance than the installation of concentrators which make for the economical operation of all the mines, be they working in either high grade or low grade ore. An exceptional instance of progressiveness is the establishment of a smelter. There is only one as yet, but this has already shown its value and might lead to the extension of these necessary adjuncts of mineral recovery. This smelter is located on the Balley mine, a property by the way of which little has been heard, but which if the present energetic operations are carried forward will be a content of the extension of the extension of these had to the extension of these and occupied by him or by his father, mother, son, daughter, brother or sister. valuable addition to the yearly output from Cobalt.

Chemist's Invention.

The Bailey smelter is the invention of the high-salaried chemist and mineralogist of the Puliman Car Co. This company does its own smelting of all the precious metals used at the large construction works. Mr. E. A. Ben-son, mechanical superintendent of the Pullman Car Co., is president of the Bailey Mine, and it was by this connection that the Easley smelter was

It is generally believed that the smelting process is a most intricate one, but to see the Bailey smelter would seem to altogether dissipate this would seem to altogether dissipate this idea. The furnaces are situated in a building specially prepared, as to its fireproof character. Crude ore concentrates are put into crucibles, and in 45 minutes silver 700 line can be poured off into moulds, the spice and slag separating from the builton in a perfectly natural way. The smelter is oil, which with air pressure is capable of treating treating the different control of the smelter is capable of treating treating the different control of the smelter is capable.

TROUBLE.

COULD NOT CROSS THE FLOOR PAIN WAS SO GREAT.

Miss Hazel Hess, Winchester Springs, Ont., writes:—"I was troubled with my kidneys for five years. They were so bad, at times, I could not cross the floor for the pain. The doctor could not do me any good and a friend advised me to use Doan's Kidney Pills. I bought six boxes and now I have been cured for over four years. I will recommend them to every sufferer."

No woman can be strong and healthy unless the kidneys are well. When the kidneys are ill, the whole body is ill, for the poisons which the kidneys ought to filter out of the blood are left in the system. Then how important it must be to see to it that this system of sewerage be not clogged up.

Doan's Kidney Pills are a purely vegetable medicine, realizing quick, per-manent relief, without any after ill effects. A medicine that will absolutely cure backache and all forms of kidney and bladder trouble.

Doan's Kidney Pills are 50c. per box or 3 for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

If ordering direct specify "Doan's."

Only Fractional Price Changes Shown in Mining Securities

Some Signs of Resiliency Apparent, But Advances Are Held With Difficulty-Speculative Movement Continues Narrow.

Monday Evening, Nev. 28-There were no indications of any material change in the sentiment on the local mining markets during to-day's session. Trading was only moderately active, being about on a par with that witnessed last week, and while one or two of the general active specialties firmed up to a certain extent, the dealings clearly showed that the advances were only held with difficulty.

In the majority of instances price changes were too small to admit of even fractional scaips, while public trading was limited to such an extent that no breadth of movement developed thrucut the day. The buying was generally of a responsible nature, however, and securities, when bought, were taken off the market, giving rise to the belief that purchases were more for investment than for an immediate turn. Little Nipissing opened with a little flurry in the stock, the shares changing hands two points above the close of last week. The advance did not hold in the later trading, the security being sold on a scale down, and losing practically the whole of its gain. Beaver and Balley were both fractionally firmer, but otherwise than these there were no changes of any moment in the list. The market closed dull and with no specific signs of either strength or weakness. The situation is still fraught with uncertainty, and until the trading broadens considerably, the movement is not likely to be productive of any material change in the run of values.
