AUTOMOBILE LAW.

City Clerk W. G. Mayrith has received from the Provincial Secretary's Department a copy of the Ontario's Legislation Respecting Motor Vehicles, which was passed at the last session of the (Provincial) House, to come into effect on the First day of July, 1906.

The act is a very strict one, and contains a few clauses which it might be well for motorists in this and other cities to become thoroughly acquainted with. According to the strict reading of the act as laid down, there are very few motorists in Canada who are adhering strictly to the law in this respect. The future alone will tell if the act is workable or not.

Among the new clauses which have been added, are those stipulating that the motorist must keep his number exposed at all times. When it is dark he must have a light so placed that the number may be plainly seen. He must not carry a search-light. The speed in public highways in cities, towns and villages, shall not exceed 10 miles an hour, while the speed on highways outside of these must not exceed 15 miles an hour. A driver who drives his machine recklessly or carelessly comes under this act as punishable. Any motorist who, while passing any vehicle, sees that he is causing danger to the occupants of such vehicle, must remain at a standstill until such vehicle has passed. The raising of the hand of any occupant of any vehicle is an imperative command to the motorist to stop.

The new clause, which at present is the one which is possibly most lost sight of, is relative to a motor vehicle crossing a bridge. It is clearly stipulated that the motorist cannot drive faster than a walk over any bridge. Many motorists may not be aware that this clause is contained in the act. Ignorance, however, would not be considered a very strong plea in the courts if an action were entered.

This is the law as it stands, and under it there is no doubt that a person who wished to be disagreeable might put a damper on the pleasure of the majority of people who own automobiles. It is something for the enthusiastic auto-drivers to think over.

THE BOWLERS' BLARNEY.

The fact that a majority of the visiting British bowlers are Scotch does not alter the fact that they are as smooth of tongue and as full of blarney as Irishmen are popularly supposed to be, says Editor P. H. Bowyer, M. P. P., in his paper, the Ridgeway Dominion. Every place they visit is the "prettiest place," and every "time" they have is the "most enjoyable." We have been amused at comparing the various tributes paid at the different places—they are all so much alike. At Clinton, according to the press:

At no point in this country have we enjoyed ourselves more, said one of the most prominent members of the party. You made us feel at home and your kind hospitality we will not forget.

At Ridgeway we were assured that the visitors felt more at home than at any place they had visited in Canada. The Ridgeway men were the real stuff, and the ladies—well, words failed, etc., Ridgeway would long remain stamped upon their hearts, and more to the same effect.

Whereat Ridgeway people felt pleased, and went home from the green well satisfied with themselves and took a long look in the mirror.

The bowlers went straight from here to Chatham and next day we read in the papers:

"We had easily the most truly enjoyable time in Chatham that we have had on our tour," was the way the captain of the visiting British bowlers put it yesterday.

From Chatham the bowlers went to Walkerville, where they had "the time of the tour."

Now all this is very human. The visitors know and feel the warmth of the welcome with which they are received at every point. It is nat-

ural that they should make acknowledgment in kind words. The hosts, in truth, expect it, and the guests derive sincere pleasure in saying nice things of their entertainers.

The lesson is that while words of praise are pleasant to hear they must not be valued too highly. We must not become vain and don't superior airs.

A BOARD OF TRADE.

The annual report of the Berlin Board of Trade, as reported in the Toronto News, affords some clue to the steady and general prosperity which marks the town and the district. The year 1905 showed an increase in population which brings the total to nearly 12,000; the assessment is nearly \$5,000,000. Three hundred new residences were built during the year (and no vacant houses to-day) a number of new industries have located in Berlin during the year; others have made important extensions, even to doubling their capacity. The address of the President of the Board of Trade contains a reference to the reasons for the steady progress of the town. He gave as the chief reason that the people of Berlin are a unit in anything which pertains to advancement. They have abounding faith in its future, and never lose an opportunity of saying a good word for the town to which they belong. Also, it may be added, the council does not waste whole meetings in oratorical floods of debate. It is more like a consultation between the partners of a firm. That is something which communities larger than Berlin might study with advantage, and Chatham is one of the chief of these. There was a time when Chatham also had a Board of Trade, but that time seems to be passed. It is plainly seen what a live Board of Trade is doing for Berlin. Chatham in this respect lies dormant. A shaking up is in order in the Maple City.

THE CAUSE OF CRIME.

Cocaine is the cause of the sudden and enormous increase of degeneracy and crime in one of the most notorious sections of Chicago, according to a clergyman who is familiar with conditions there. He says there are at least three drug stores in the neighborhood where this most horrible of all drugs is freely sold to all comers, in spite of the stringent law against it. Cigarettes, whisky, morphine—all these are destructive to body, mind and morals, but they are all harmless compared with cocaine. This terrible poison wrecks the strongest physique within two or three years, whereas the whiskey drinker and cigarette smoker may drag out a miserable existence for many years, and the morphine slave may live long. Cocaine eats away the brain in even a shorter time, and while morphine makes men sleepy and feeble, cocaine fills their minds with murderous impulses almost from the beginning. After the cocaine habit has once been firmly fastened upon its victim, as it invariably is within a few weeks, he is doomed to continual insanity with homicidal mania, growing constantly more violent. He is absolutely irresponsible, and the most dangerous individual in the community.—St. Thomas Times.

Seven seats are vacant in the House of Commons, and bye-elections must be held in Ontario, North Renfrew, North Bruce and East Elgin are without representation. Quebec county is vacant through the retirement of Hon. Charles Fitzpatrick. St. Mary's division of Montreal must select a successor to Mr. Piche, who has gone on the bench, and an election must be held either in Nicolet or Gaspe, both of which returned Hon. Mr. Lemieux. The Nova Scotia bye-election is due to the unseating of Hon. W. S. Fielding.

The editor of a Windsor paper, who resided for some time in Chatham, writes:—"An evangelist speaking at Chatham on the subject, 'Hell and Back,' told his hearers that hell is only a hole in the ground with temperature at normal and no suspension of brimstone. To that wayward hamlet the message was one of great and ineffable comfort."

In spite of the comforting assurance, there is as yet no great influx of Chathamites at Windsor. The Chatham people are not worrying, and are by no means anxious to test the truthfulness of the preacher's assertions.

HARMLESS.

What does your friend do? He's a road agent. What? Oh, a harmless one. He now represents a miseducated concern.

To be entirely tolerant we must tolerate those who are intolerant.

Falsehood has an affinity of combinations, but truth has only one mode of living.

WHAT

Fruit-a-tives ARE

Fruit-a-tives are the marvels of modern medicine. They have accomplished more actual cures—done more good to more people—than any other medicine ever introduced in Canada for the time they have been on sale.

Fruit-a-tives are fruit juices. They are nature's cure for

- CONSTIPATION
- BILIOUSNESS
- BAD STOMACH
- DYSPEPSIA
- HEADACHES
- IMPURE BLOOD
- SKIN DISEASES
- KIDNEY TROUBLE
- RHEUMATISM
- IRRITATED HEART

Fruit-a-tives are the juices of apples, oranges, figs and prunes. These juices are concentrated—and by a secret process, the juices are combined in a peculiar manner. This new combination is much more active medicinally than fresh juices—yet so perfect is the union that Fruit-a-tives act on the system as if they were in truth a natural fruit, medicinally stronger than any other known fruit.

To this combination of fruit juices, tonics and internal antiseptics are added, and the whole made into tablets.

These are Fruit-a-tives—sold everywhere for 50c a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED - OTTAWA.

JUST A LITTLE BIT OFF THE TOP

The straw hat crop has turned a beautiful ripe yellow. It will soon be time the harvest were garnered in.

Shoes have been raised in price, and coal took a mean advantage by sneaking up a notch or two while we were not looking.

One physician says that cigarettes are good for the complexion. This is quite right. Provided a man smoked enough of them, there would probably come a day when his friends would drop in, and in the customary tones of condolence, tell his relatives how natural he looked.

The old market bell showed praiseworthy obedience by coming down out of the tower without being tied.

They are going to reform spelling, but of course the only kind of spelling that can have gone wrong are the bad spells.

A Windsor editor says that Chatham is hell. We would like to ask the Windsor editor what portion of this city he figures on locating in when he arrives.

A Jack the Huggler has been operating on Grand Ave., London, and now they say they have to put a special policeman on after nightfall to avert a stampede of Forest City young women to that direction.

THE BRIDGE HABIT.

From the Detroit Journal. A family passionately devoted to bridge whist was plunged into mourning by the loss of the father. A discussion arose as to whether the deceased would have chosen to be buried or cremated. The decision was left to the eldest son, who, looking at his mother, said, "I will leave it to you." To which the lady replied, "I make it spades."

Many a Woman is Taking Headache Powders

who ought to be taking Bu-Ju. The kidneys are making the headache. They are not doing their work properly—not purifying the blood—not ridding the system of poisons. These impurities stagnate the blood—irritate the nerves—and bring the headaches that so many women suffer with.

Bu-Ju

THE GENTLE KIDNEY CURE

takes away the headaches because they take away the poisons in the kidneys. They act directly on these vital organs, strengthen and heal, reduce the inflammation—and stop the headaches because they remove every trace of Kidney Trouble. At Druggists.

AULD LANG SYNE

FROM PLANET FILES OF HALF A CENTURY AGO

From The Planet files, from June 29, 1865, to July 6, 1865.

An oil boom was on in the vicinity of Bothwell. No oil had yet been struck, but four wells were being sunk and the drillers were very hopeful of making rich strikes.

A Sabbath school festival in connection with the Middle Road Chapel, Raleigh, was held on the 22nd. The program consisted of speeches and songs.

A colored man, named Joshua Stanley, was scalded to death at Wallaceburg on the steam ship Union Express. The fatal accident was the result of an explosion, in which the article states several others were more or less injured.

A big fire occurred in Quebec City, Que., in which 150 houses were destroyed.

A disastrous fire occurred at Bramford in which the total loss was estimated at \$200,000.

Notice appeared for a by-law to raise \$4,000 for the construction of a bridge across the Sydenham River.

Humor and Philosophy

By DUNCAN M. SMITH

THE LONE MAN.

Say, what a snap he seems to have—The only man about the place Where women go in summer time To rest the brain and tan the face! No oriental potentate Has things more neatly in his mitt As round among the girls he struts And bills himself as Mr. It.

They hold a sunshade over him And bring a match to light his pipe, And if he'll only go along They'll show him where the fruit is ripe.

They sing for him their sweetest songs And charm him with their brightest wit, And they will even elude it If he will only stand for it.

But that is just the brighter side. If some one has a trunk to strap Or a valise to lug around Of course he is the handy chap. It is a boat that's built for three A dozen ladies wish to go, They like to have him come along That they may sit and watch him row.

It isn't such a lovely snap As you might for a moment guess. Were it as good as it appears, The man would die of happiness.

There are some drawbacks, you observe, That for the other things alone, And one is this: He never has A chance to stroll with one alone.

Needed Tinkering.

"Thirteen prisoners got away during the night," reported the officer to the commander of the Russian fortress. "Where was the watch?" "He claims he was on duty." "Send for him. Something is the matter with that watch's escapement," growled the commander.

Laying For Him.

Did you ever pause in the midst of a busy day to contemplate the egotism of the man who thinks it will rain because he forgot and left his umbrella at home?

He thinks that the powers which have the contract to make the rain, hail and other things in the wet goods line are hiding behind a tree as he passes by to see if he had put on his new spring suit and forgot his shower stick.

He doesn't know that the rain falls alike on the just and the unjust. He thinks that the condition of the crops, or whether some city along a river is needing a fresher to keep it from getting too fresh, is a secondary matter as compared to whether he is protected or not.

The man who feels that way about it is too hopelessly dense to provide himself with an umbrella in the natural way should a shower come, and deserves to get a dinking.

One Drawback.

"He has given up the chicken business that he went into with such enthusiasm."

"Yes; he made a great discovery that the poultry journals had not mentioned."

"What was that?" "That chickens eat as well as lay eggs."

Had Help.

"Has he changed his mind about running for congress?" "Well, not exactly. The voters changed it for him."

Down Grade.

We strive and plan to get ahead; To win the prize our coats we shed, But we are lucky if we stand A slender chance to get a hand, And more than likely from some "plute." Instead of both we get the best.

er, on the allowance of road between the fourth and fifth concessions, Gore of Calmden.

The members, attendants and others of the Primitive Methodist denomination held a "soiree" at the Ronald schoolhouse, Raleigh Plains, for the purpose of raising funds for Rev. Messrs. Hassard and Adams, who had withdrawn from the Chatham circuit. William McGuin acted as chairman, and speeches were delivered by A. McDougal, Mr. Parks, a teacher, and Rev. Messrs. Adams and Hassard, and others.

Lambert & Co.'s dry goods store was broken into in the night by burglars, and between five and six thousand dollars worth of goods was carried off.

Crops were reported to be looking splendid, and the harvest was expected to excel that of any previous year.

The Kent County Council was in session. Those reported present were: Warden Geo. Young, and Councillors Anderson, Cootsworth, Coll, Dolsen, Evans, Poott, Gonell, Johnson, Kerr, Kinney, McMichael, McKerricher, Ridley, Roberts, Smith, of Chatham, and White.

Big Fire at Arthur. Arthur, Aug. 31.—Fire broke out in the Arlington Hotel barn about 1 o'clock Wednesday morning, completely destroying the barn and sheds, J. Fair's carriage works and residence, M. Campbell's blacksmith shop, Dr. Fisher's and W. Buschalen's barns. Very little of the contents of any of the buildings were saved. The proprietor of the Arlington lost his valuable mare and outfit. The loss is estimated at \$1,000, partly covered by insurance.

Not of poverty, but of corns, itching corns, that can be cured by Putnam's Corn Extractor? Don't suffer, use "Putnam's"—sold everywhere in 25c. bottles.

Strike Movement Extends.

Madrid, Spain, Aug. 31.—The strikers' censorship is maintained in regard to strike news, but it is known that the movement is extending at Santander and Bilbao.

Sir Wilfrid Will Open It.

Ottawa, Aug. 31.—Sir Wilfrid Laurier was waited on by a deputation yesterday morning and consented to open the Central Canada Fair, Sept. 3.

WHY CHEST COLDS ARE DANGEROUS.

They lead to pleurisy and pneumonia. Follow the Advice of W. H. Fowler, of Fowler's Corners, Ont., says: "I used to be subject to attacks and although I used most everything nothing relieved quickly till I discovered Nerviline. I have used it for pleurisy and sore chest and found it just the proper thing. For Lumbago or Neuralgia it's as quick as lightning. I cheerfully recommend Nerviline." The strongest, cleanest, most pain-destroying liniment on earth is Polson's Nerviline, 25c. bottles sold everywhere.

Personated Mr. Stratton.

Toronto, Aug. 31.—J. R. Dundas, a year ago, posed at the Palmer House as Hon. J. R. Stratton, whose coachman he had been, and rolled up a bill he didn't pay. Yesterday he was given suspended sentence. He is on the Brantford fire department, and they want him back.

Election of the "Black Pope."

Rome, Aug. 31.—The delegates to the congregation of the Company of Jesus are arriving here to go into convention to elect a general of the society. The election will be held about Sept. 1. The important post has been vacant since May, when the last general, Father Martin, died.

CATARH CANNOT BE CURED

With local applications, as they cannot reach the seat of the disease, Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

BORN.

JACKSON—To Mrs. Isaac Jackson, Louisville, Wednesday, 29th, a son.

DIED.

BASKERVILLE—On Friday, August 31st, James Baskerville, aged 65 years and 8 months.

The funeral will take place on Sunday afternoon at 4 o'clock, from his late residence, William St., to Maple Leaf Cemetery.

LOCAL

Men's \$12.50 suits for \$7.50 at The Two T's.

The City of Chatham leaves Rankin Dock at 8 a. m., Monday, fare 50c for round trip.

Rev. Mr. Hoyt will conduct the services in his own church to-morrow both morning and evening.

Rev. Dr. Battisby returned from his European trip on Thursday, and will occupy his pulpit to-morrow.

The Pere Marquette Ry. will discontinue the Eau service after to-day. There will be a train on Monday leaving Chatham at 8:15 a. m., returning, leaves Brieux at 5:15 p. m.

A number of officers of the British Army are at the Idlewild Hotel to-day inspecting cavalry horses for the army. There are about 50 or 60 horses offered them for sale.

Messrs. H. W. Hall & Co. will take possession of Messrs. Thibodeau & Co's store on Tuesday, and will open to the public on Wednesday, Sept. 5th, at 9 o'clock, with a complete fall stock.

Mrs. A. H. MacGillivray, who has been so seriously ill in St. Joseph's Hospital, has so far recovered as to be able to leave the hospital. She is now at her home on Raleigh street, and while she is still very weak, she is considered past all danger.

The oil man who tore a young lady's dress on Thursday night, was brought up in the police court this morning, and was allowed to go after he had paid \$6.50. This was the price of the dress and the costs of the court.

The Fire Department was called out this afternoon about half-past two o'clock to the Defiance Iron Works. A spark from a railroad engine set fire to the grass along the track, and there was danger of the fire spreading to the factory. The firemen soon extinguished the blaze.

Rev. Mr. Laird, agent for the Queen's University, is in the city in the interests of his college. He will occupy the pulpits of the Presbyterian churches at one service each to-morrow. Mr. Laird was formerly pastor of the church now presided over by a brother of Rev. A. H. MacGillivray, of the First Presbyterian church.

George Meynell, clothier, who was appointed an officer of the All-Kent Football Club, desires to express his appreciation of being selected for the position tendered him. Mr. Meynell is an old football boy, and he likes the game, and has always been a liberal contributor to all athletic sports. The boys, at the same time feel that they could not have made a wiser selection, and will appreciate his services as a member of their club.

FOSTER FISH AND GAME

Ontario Association Would
Prohibit Export Of
Food Fish

THE BIG CONVENTION

Toronto, Sept. 1.—The convention of the Ontario Fish and Game Protective Association met in the main building of the University of Toronto yesterday. About seventy-five keen-eyed sportsmen and patient fishermen from all over the province faced the chairman, Chief Justice Falconbridge, who delivered a scholarly address, replete with good solid information regarding the initiation of the movement, the valuable work at present being done, and outlining what was proposed to be undertaken in the future.

Protection For Game Fish.
Dealing with speckled trout, the committee on game fish recommended that the minimum length for catching be seven, instead of six, inches; that sale under any conditions be declared illegal, and that no change be made from the prohibition against exportation; while bass should not be placed in waters where speckled trout were.

These other recommendations were made by the committee.
Black bass.—Twelve inches to be the minimum length for catching; open season to be from June 15 to Nov. 30, inclusive; approval of pond rearing of small mouthed fish.

Silver bass.—Not to include them in fishing regulations.
Maskinonge.—Open season June 15 to Nov. 30; propagation in fish hatcheries if workable; more Government attention to maintaining lake levels during the spawning season.

Pickering.—Not to include in fishery regulations.
Trout.—To prohibit sale or exportation of frogs' legs for five years.

No Export of Food Fish.
The absolute prohibition of the exportation of all food fish for five years was the radical recommendation made by the committee dealing with food fish. It was proposed that the 5-inch mesh be the smallest allowed for catching white fish and salmon trout, and that from Oct. 1 to April 1 be made a close season for white fish, salmon trout and pickering, and the close season for herring from Oct. 15 to April 1, also it is asked that the catching of sturgeon for five years be prohibited. Apart from the great lakes it is recommended that the use of nets be not allowed, and that the Government take pains to ascertain that licenses be given only to proper persons. The appointment of a commissioner, who as a member of the Government would have charge of the Department of Fish and Game, was also approved.

Furbearing Animals.
The committee on furbearing animals declared satisfaction with the law prohibiting the killing of beaver and other before Nov. 1, 1910, but believed it was not being sufficiently enforced. It was recommended that there be established for the purpose of propagation, and that there be strict Government supervision. It was declared that furs were being exported to the United States, contrary to law, and a remedy suggested was the establishment of reciprocal relations between Canada and the United States. A close season, from Nov. 1 to Feb. 1, was favored. The Government should adopt more stringent protective measures.

For muskrats. an open season in Northern Ontario, from Oct. 15 to May 1, and in southern waters, from Nov. 1 to May 1, was desired; and that 15 days be allowed for disposal after the season's close. The Government should take steps to regulate the taking of muskrat, mink and fisher, and the close season should be from Nov. 1 to March 1. The Government should establish more preserves for propagation.

Better Inspection.
The committee on fishery overseers and game wardens reported in favor of appointing efficient men to look after both fish and game, one to be assigned to each of the counties or districts where game and fish abounded, their whole time to be given to the work; that they have power to appoint assistants in special cases, and that two or more special detectives be appointed to investigate, where necessary, and report to departmental Minister. It was also asked that the officers of each branch of the association be appointed guardians by the Government, without salary.

Feathered Game.
A close season for feathered game, from Dec. 15 to Sept. 15, was favored. The meeting declared against duck-shooting in the spring, the use of gasolene or other launches or sailboats in duck-shooting, or rousing, and the use of stationary blinds or nets more than 100 yards from the shore line. Boats or punts should be allowed to be used in open water; but decoys not tolerated over 100 yards from any shore line or rush bed. It should be unlawful for plover or any other shore birds to be shot in spring. A law in favor of the cultivation of quail, and making it unlawful to shoot them for three years, was favored. Strong objection was expressed to the sale and exportation of ducks.

The committee on reciprocal arrangements with the United States reported in favor of taking steps to make arrangements to restrict the shipping of fish and game illegally captured in Ontario into the United States, and vice versa; also, that there should be uniform laws for the propagation and protection of fish of the great international waters, and arrangements made, by which the officials of both countries could work together for this object.

A linguist is generally a man who is a bore in several languages.

MUSIC

Misses Louise and Florence Hillman, Teachers' Piano and voice Theory. Students prepared for Toronto Conservatory or college examinations. Studio over McCall's Drug Store. Terms made known by letter or upon application.

CHARGES ARE UNTRUTHFUL

This Is The City Solicitor's
Answer To Ald. William
Stone

EXPLAINS HIS POSITION

Mr. Matthew Wilson, K. C., in answer to the statements of Alderman Stone, as published in The Planet, says:—

Every material statement made by the Alderman is untrue, and on my return home I wrote telling him that if he would meet me at my office or in the City Clerk's office I would show him how untruthful and unfair his statements as published are.

To summarise he makes four allegations:—

1. That the Auditors' Report shows that I collected \$2,300 for fees alone for 1905.
2. That for local improvements I have been getting four per cent. for just looking over the by-laws therefor.

3. That I got \$70 "for this work" on one street alone.
4. That all my fees would amount to more than \$3,300.

Now, these are matters easy of proof, if true, and there was no difficulty in finding the truth from the By-law appointing the Public Officers and from the City's Audit and cheques; yet such reckless statements are made without the slightest truth and for the purpose of justifying a personal income assessment larger than the assessor would make.

1. As to the first, the report does not show that I collected or that the city paid to me one dollar; but any collection was by my firm of Wilson, Pike & Gundy, so that we all would share in receipts, which would increase my income only to the extent of my share. Then, even my firm did not receive these moneys, as stated by Alderman Stone, for fees alone. As an illustration, the first item is \$710.18, which was received merely to be sent away, and none of it came to me. Likewise other items, such as \$325 for the Thompson suit, was not "for fees alone," but covered disbursements or moneys paid out by my firm. Also \$50 for services in Ottawa covered travelling expenses, etc. Thus it will be seen how entirely misleading is statement No. 1.

2. As to the second, a glance at the By-law appointing the officers, or at the cheques to my firm and the addition of the costs of the various works, would show how untruthful is the statement that I collect four per cent. for looking over the by-laws. While for some exceptional works my firm would receive more than \$70, yet in the great majority of cases they receive \$5 or \$7. A work for which we would receive \$70, would cost the City Clerk's office \$30,000, and four per cent. on \$30,000 would represent \$1,200, instead of which we would receive only \$70.

3. As to the third, while my firm would get \$70 or more for services connected with some of the City Clerk's extensive street pavements, like Queen St. or Wellington St., it is not true that the \$70 is received "for this work," that is "for just looking over by-laws drawn up by the city." These by-laws are all drawn up by me, and they are then printed, leaving blanks for the description of the work, the cost, the assessment, etc., and the Clerk being the custodian of these figures puts the items into the different by-laws and then I again revise the by-laws before they are finally passed. But the \$70 is not paid for just looking over this by-law. The Solicitor's services begin with the petition, which I draw, and after printing and signing follows the contests over the petition for and against the work, and the wrangling and contention extending for months, and sometimes years; then comes the first by-law deciding to undertake the work, and the engineer's report and the various notices, contracts, etc., etc., all of which are drawn by me and printed, and after being filled in with the details, are again revised by me; and then come the petitioners' or assessment appeals to the County Judge, and all the consultations and discussions with and advice to the officials extending in most cases over a year before the final by-law is passed and we receive the exceptional \$70.

Now you will understand how untruthful it is to say \$70 is received for just looking over a by-law.

NEW'S Clothing Store

Mr. New has opened an up-to-date Clothing and Boot and Shoe Store on King St., near the C.N.R. He has made in the shoe line, from \$1.00 to \$3.00, and is carrying a fine line of gentlemen's furnishings. Don't forget the place.

Y. W. NEW, King St.

Leader Brooms 20c. each.
Did you take advantage of the Sale of DINNER SETS? 11 Sets left yet. Sale pieces good until 9 p.m. Saturday night

H. MACAULAY.
PHONE 159

These various services are all rendered by me, and in many cases for \$5, this paid to my firm.
4. As to the fourth, a reference to the accounts referred to for the items of the Auditors' report would show that my fees for local improvements and litigation and advising and services of all kinds did not amount to nearly one-half of that stated by Alderman Stone.

Lawyers receive, and expect, much unjustifiable abuse by the unintelligent, but I do think that a man with the capacity to manage the city's affairs ought to correct instead of spread such erroneous ideas. All this talk by Alderman Stone had nothing to do with the correction, by common consent of both the calculation in arriving at my personal assessable income. The correction would make me liable for more than I am now liable for. All income is not assessable. The men in Chatham and elsewhere who perhaps have the largest incomes are not assessable for incomes at all. The assessor has no right even to enquire as to the income of myself or others from sources not assessable. This ought to be well known to an Alderman.

EQUAL TO THE OCCASION.

How does the Colonel find room on his box for all his medals? Why, the more medals he gets, the more his chest expands.

The glutton who loves his stomach may love not wisely but too well.

NEW ADVERTISEMENTS.

WHOLE GINGER 10c. a 1/4 pound.

ENGLISH MUSTARD, 40c. a pound.

Whatever you may want for your pickling, you will find best here.

H. Malcolmson

AN INTERRUPTED SONG.

The summer sky is bright and free
Of even a zephyr's wings;
High on the hilltop's loftiest tree
A redbird sits and sings.

A cloud appears; the breezes rise;
The cloud comes swiftly on;
The lightning fills the darkened skies,
And lo! the bird is gone.

But raging rain, and tearing wind,
And thunderbolt pass by,
Leaving their dripping wrecks behind.

The sun regains the day,
And on the ruins of the tree,
Mid shining drops of rain,
Every success, the session was closed.

The redbird sits, and merrily
Resumes his broken strain.

Nickle Plated Tea Kettles

We cannot remember the time when we had as good a lot of tea kettles as the ones we have just opened up. They certainly are heavier than any we have had for a long time. They are well made, too, and the plating is so uniformly heavy.

We know you will recognize their superiority the moment you see them. We have some samples in our window.

Nickle Plated Kettles, 5 to 9, 75c. to \$2.00.

Nickle Plated Tea Pots 75c. to \$2.25.

Have you seen our new line of Bath-room fittings? They are certainly well worth your inspection.

Sanitaris

Is Bottled at the Springs

Mineral water shipped in carboys and barrels and bottled at distant points—is like champagne kept over night uncorked. It's dull and flat.

"SANITARIS" is bottled at the springs at Arnprior, Ontario—just as it comes from virgin rock—with all its natural snap and sparkle retained.

When you drink "SANITARIS" you know you are getting water that is just as pure—just as delightful to eye and palate—as though you drank it at the springs at Arnprior.

The ideal table water. Blends perfectly with wines and liquors.

AT DEALERS THROUGHOUT CANADA

F. A. Robert, Agent, Chatham

TOWNSHIP COUNCIL

RALEIGH COUNCIL.

The above council met on the 23rd day of August with all members present except Mr. Jenner, who was in the Northwest.

Applications for collector of rates were received from M. A. Drew, E. H. Broadbent and Richard Lane.

Moved by Wellwood and Sykes that M. A. Drew be appointed collector at a salary of \$125.—Carried.

The rate for the present year was struck as follows: County 1 4-10 mills, Township 3 8-10 mills, and general school rate 2 3-100 mills. In 1905 the rate was: County, 1 8-10, Township 3 7-10, and general school rate 1 mill.

A deputation from the W. K. Agricultural Society waited on the council and asked for a grant for the Society.

Moved by Shreeve and Sykes that the W. K. A. Society be given a grant of \$50.—Carried.

R. D. Payne asked the council to proceed with the extension of Lacroix street to the 6th Con. road as petitioned for some time ago.

Moved by Wellwood and Sykes that the street be widened on the corner of Fairbanks property and the City Council in reference to the extension of Lacroix street, and report.

Dr. Young reported that he had examined the Merin drain and found same in an unsanitary condition.

Moved by Wellwood and Shreeve, that the sanitary inspector be instructed to immediately examine the Merin drain and any drains or other outlets leading therein, and to prosecute all persons using the said drain for sewage purposes and to take all necessary steps to abate the nuisance caused by the present condition of the said drain.—Carried.

A. Baird submitted report that he approved of the plan for the repair of the P. M. Bridge over the Vail drain.

A. Baird submitted report of the description of land needed for the turning space at the north end of bridge over the R. P. drain on the 3rd con. road.

The clerk was instructed to forward same to Geo. G. Martin to prepare a deed.

Milton Backus reported that F. Goulet had completed tiling worth \$573 on the w 1-2 153, T. R.

A by-law was passed loaning Mr. Goulet \$400 for tiling on the w 1-2 153.

The report of J. W. Shackleton, C. E., for the construction of a concrete bridge over the Waddick drain on the 8th concession road, at an estimated cost of \$900 was received.

By the report the lands are assessed \$450 and the roads \$450.

A by-law for the same was provisionally adopted, and the court of revision set for October 15th.

Mr. Pardo reported that he had the bar removed from the No. 1 Gov. drain at the outlet of the Simmons drain, costing \$15, and charged one-half to each drain.

That he had the bridge over Gov. drain No. 1, at the s h s h 13, con. 9, repaired at a cost of \$38.29, and charged to drain.

A petition was received from James Gray and others to allow James Rogers to drain 25 acres of his place into the 18th and 19th side road drain by paying a pro rata assessment for the last improvement.—Laid over.

A By-law to over-draw the Township's account at the Molsen's Bank in Merin, to the amount of \$10,000 if necessary, was passed.

A number of accounts were ordered paid.

Council adjourned to Sept. 17th.

A. E. ROBINSON, Clerk.

THE SURGEON'S TOOLS

AS FEW AS POSSIBLE USED BY THE MODERN PRACTITIONER.

To Remove an Appendix, For Instance, He Can Carry Everything Necessary In One of His Pockets. Hand Forged Instruments the Best.

"A surgeon used to carry a bag of instruments weighing often as much as twenty-five pounds when he was called to operate," said a member of the staff of the New York Postgraduate Medical School and Hospital the other day. "Today an average operation, such as the removal of an appendix, calls for no more instruments than can be carried in the pockets."

"I have just come," continued the doctor, "from removing an appendix, and here in this small package are all the instruments I used—a scissors, two artery clamps, two forceps and a needle. Many operations, of course—gastro-enteric, gynecological and those that have to do with bones—require more instruments, but modern science demands the use of as few as possible in order that time may be saved. Skill and haste are prime factors in an operation. In the old days, before anaesthesia was known, this was to shorten the patient's agony as much as possible. After ether was discovered, however, for a while operated more leisurely, but soon finding out that the shock to the patient was always dangerous and often fatal they again recognized the importance of swiftness. Diminishing the number of instruments was one of the methods for saving time. In the operating room in the old days there was always, no matter what the operation, a good sized table laid out with ten or fifteen score of instruments, fifty artery clamps, scissors, forceps and lancets by the dozen. It used to take over an hour to remove an appendix; today the average is about twelve minutes."

"The variety of instruments increases every year as surgeons meet with new needs or solve old problems. In our school here, as in others, many instruments have been devised. Especially to those having to do with the eye, ear, nose and throat have we made valuable additions as well as in the field of orthopedic appliances. The Hippocratic oath precludes the patenting of any such inventions; consequently all instruments are free to be made by all and every surgical manufacturer."

The making of surgical instruments in the United States is nearly contemporaneous with the beginning of the republic, and one or two of the prominent firms today date from long before the civil war. In no country are finer instruments made than in the United States. Though the number of men employed is small, every man is a skilled laborer and an artist, with an aptness often as fine as that of a journeyman jeweler, capable of making even the most delicate of the great variety of instruments, amounting to about 10,000, which a surgical house must keep in stock or be ready to produce upon order.

Cast and drop forged instruments have no lasting value, and once the edge is worn off they can never be satisfactorily resharpened. The process which they undergo demands that they be brought three times to a white heat. The first time the steel becomes tempered; the second and third time it becomes decarbonized and loses its temper, the result being an instrument with a shell of hard steel, capable of taking a fair edge, but beneath which the metal is soft and unfit to stand honing.

"All good instruments are hand forged. Thus prices are doubled and trebled over the prices of cast instruments because of the skilled labor and time necessary in their construction. The workman in a careful factory must make a study of his work and learn the physical qualities of the steel or metal he works with, its strength and cutting and tension qualities. General operating instruments are made of steel, silver, platinum, gold and aluminium. German steel, owing to its tenacity, is used for forceps and blunt instruments; English cast steel for edged tools, as it receives a high temper, a fine polish and retains its edge. Silver when pure is very flexible and is useful for catheters, which require frequent change of curve. When mixed with other metals, as coin silver, it makes firm catheters, caustic holders and cannulated work. Seamless silver instruments are least liable to corrode. Platinum resists the action of acids and ordinary heat and is useful for caustic holders, actual cauteries and the electrodes of the galvanic cautery. Gold, owing to its ductility, is adapted for fine tubes, such as eye syringes and so forth, while aluminium is by its extreme lightness suitable for probes, styles and tracheotomy tubes.

"Handles are made of ebony, ivory, pearl or hard rubber. Ebony and rubber are used for large instruments, though these at times have handles of steel. Ivory makes a durable and beautiful handle, though it and ebony are not entirely aseptic, because it is impossible to boil them for the purpose of sterilization without their cracking. Ivory and pearl are used for scalpels and for small instruments like those used in operating on the eye. On the whole, the best material for handles is hard rubber, since it may be vulcanized on the instrument, thus making it practically one piece, with no possible seam for the lodging of germs and hence perfectly safe.

"Next to the materials the mode of making determines the instrument's quality. Steel overheated in the forge is brittle or rotten. In shaping with the file the form may be destroyed. In hardening and tempering the steel may be spoiled. In every stage the value of the instrument depends upon the skill applied."

ORIENTAL FRUIT BATS.

They Descend Upon Orchards With Devastating Furry.

The big oriental fruit bats, or flying foxes, so familiar in India, Ceylon and the Malay region, feed on all sorts of soft fruits except acid ones, such as oranges; are especially fond of figs and guavas and are a destructive pest to orchards and gardens. In some parts of Java, for example, no delicate fruit can be raised except by protecting the trees with nets and fighting off the nightly forays of bands of kalongs.

They live and travel in vast companies, roosting by day on chosen trees, where they hang by one hind leg, each protected from the sun's glare and from rain in the closely wrapped mantle of its wings, and large branches frequently break under the weight. At sunset they fly away to their feeding grounds, scattering over a wide area.

Where a fig tree or banana thicket attracts a crowd the roughest fighting begins over coveted plunder, each one screaming, clawing, biting and struggling to seize something and get away to a secure retreat to enjoy it. There he hangs by one foot, and grasping the fruit he has secured in the claws and opposable thumb of the other, he hastily reduces it to lumps, with which he stuffs his cheek pouches until they become distended like those of a monkey. Later he chews and swallows this food at leisure.

At dawn all return to their roosts and, says Tickell, "hook themselves along the branches, scrambling about hand over hand with some speed, biting each other severely, striking out with the long claws of the thumb, shrieking and cackling without intermission."

No doubt these squabbles are rendered more violent by the disgracefully dissipated habits in which the bats indulge during their nocturnal expeditions, for, according to Francis Day and other observers, "they often pass the night drinking the toddy from the chattles in the coconut trees, which results either in their returning home in the early morning in a state of extreme and riotous intoxication or in being found the next day at the foot of the trees, sleeping off the effects of their midnight debauch."

—Ernest Ingersoll's "Life of Mammals."

SOME FIRST OCCASIONS.

The first lucifer match was struck in 1834.

The first steamer built in England appeared in 1815.

It was in 1565 that the first black lead pencil was sharpened.

During the reign of Edward the Confessor of England the practice of employing surburies began.

Lord Avebury, otherwise Sir John Lubbock, was the first person in England to have his photograph taken.

The first ship was brought from Egypt to Greece by Danaus in 1485 B. C. The first double decked ship was built by Tyrians, 786 B. C.

The first woolen cloth made in England was manufactured about 1330, though it was not dyed and dressed by the English until 1667.

The first record of coal is about 300 years before the Christian era. Coal was used, as fuel in Europe as early as 852.

A King's Rebuke.

The queen of Wurtemberg was one day walking in the streets of Stuttgart attended by a maid of honor, when she met a body of students who refused to make room for the ladies, and thus compelled them to walk in the gutter. The queen reported the matter to the king, and the next day the captain of the corps Suevia was summoned to the palace. A servant led him into a room where there were no chairs, and there the unfortunate student had to wait a full hour. At last the king appeared and finally the young man was dismissed by him thus: "I cannot demand that every student should know my wife, but I do demand that the Corps Suevia give place in the streets to ladies."

A Bridge That Surprises.

That old expression about the sidewalk coming up and hitting a man in the face takes on an actual expression the first time one sees the bascule bridge over the Gowanus canal in operation. On approaching the bridge at a moment when some barge or schooner is about to pass through it one sees the roadway rises up and stares the wayfarers in the face, tracks and all, remaining there until the vessel has passed through, when the whole thoroughfare drops back into place again. The operation of raising the wings of the bridge is performed so quickly that the surprise is all the more sudden.—New York Press.

His Little Joke.

"Yes," admitted the drummer, "there are a great many skins in my business."

"What is your line?" asked the portly passenger.

"Leather," answered the drummer as he lighted a fresh paper coffin nail.—Chicago News.

Deduction.

"That new farm hand of yours used to be a bookkeeper."

"How do you know?"

"Every time he stops work for a minute he tries to put the pitchfork behind his ear."—Pittsburg Blatter.

A Friend In Need.

Jannon (sententiously)—Ah, my boy, there's nothing like a friend in need! Samson—I don't agree with you. He's generally a thundering nuisance, for he's sure to want to borrow something.

"Hecla" Furnace

has not a fault from top to bottom.

I don't believe you can find fault with any part of the 'Hecla.' Waterpan—is placed so that it does just what is wanted—that is, it evaporates the water and keeps the air from getting dry.

Door—big enough to admit big chunks of wood. Lined, to prevent escape of heat into the cellar. Patent gravity catches keep the door shut.

Dust Flue—carries ALL the dust up the chimney.

Ash Pan—broad, deep, strong pan—big enough to hold the daily fall of ashes.

Fused Joints—that absolutely prevent gas, smoke and dust escaping into the house. FUSED JOINTS are the only possible way of having a clean house.

The "Hecla" is the only Furnace having Fused Joints. Send me a rough drawing of your house and I will let you know just what it will cost to install the right "Hecla" Furnace. I will also send you new catalogue of Hecla Furnaces, and Peninsular Stoves and Ranges. All free if you write to "Hecla Furnace Builder," care of

MEN DON'T SUFFER WITH SECRET DISEASE

For twenty-five years we have devoted our lives to the treatment of diseases peculiar to men. Our records show that during that time we have actually cured thousands. We believe this should be sufficient evidence to prove that as physicians we must be successful. You can afford to pay a dollar more than you would otherwise if you are cured. A dollar more need be paid for medicines or treatment if you fail to get cured. We cure on bank guaranty. Get honest treatment. When you write or come to us, state your ailment so that we may treat it in the proper manner.

NOT A DOLLAR NEED BE PAID UNLESS CURED. If you suffer from loss of vitality or weakness from any cause, come to us and we will cure you. We cure all ailments of the blood and sex, such as hemorrhoids, ruptures, the result of errors or excesses; producing weakness, despotism, falling memory, etc., should come to us at once, and we will stop that trouble before it gets too deep-seated. We give strength, vigor and nerve power. We cure all venereal diseases and skin troubles. Every electrical and magnetic apparatus known to the medical world enables us to effect cures after other methods have failed.

We cure **VARIICOLE**, **HYDROCELE** and **STRICTURE** without cutting. No pain or detention from business. Before you submit to the surgeon, let us examine you. We cure all ailments during medical treatment.

Our New Method Treatment for Blood and Skin Diseases. Scabies, ulcers, sores, falling out of the hair, bone pains, eruptions and other ailments of the skin. We cure all ailments cured by your sanitary treatment. Patients that we treated twenty years ago still enjoy good health because of a relapse. If you have **KIDNEY**, **BLADDER** or **UTERINE TROUBLES**, come to us. We cure them. We cure **WASTING** or **WEAKNESS** or **DISEASE**, come to us for scientific and reliable treatment.

Our offices are complete with the latest and best electrical and medicinal apparatus and remedies that are known to the medical world for the cure of these diseases.

If unable to call, write for **QUESTION BLANK FOR HOME TREATMENT**. Send no money. Write to

DISGUISED BLESSINGS

PREACHER BRINGS RECONCILING
REASON TO BIBLE PARADOX.

A NEW INTERPRETATION

How the "Prince of Peace" Could Say
"I am Come to Send Fire Upon the
Earth," and Still Maintain His
Character as a Benefactor of Man-
kind—Symbol of Heat a Strange
Blessing in Disguise.

Entered according to Act of Parliament of Can-
ada, in the year 1906, by Frederick Dyer, To-
ronto, at the Dept. of Agriculture, Ottawa.

Los Angeles, Cal., Aug. 28.—In this sermon the preacher gives an altogether new interpretation to a passage which teaches us that God's mercies and blessings sometimes come to us in strange disguises. The text is Luke xii, 49, "I am come to send fire upon the earth."

To the casual Bible reader these nine words may seem to convey a meaning which it is hard to reconcile with other passages. You cannot understand how Christ can be called the "Prince of Peace" and yet how he could send fire upon the earth. "Fire," you say—"why, fire is the agent of death, not the forerunner of life. It is the most ruthless destroyer known to man. Go to-day through any of our great forests, and what do you see printed by the road-
sides? It is a warning to the campers and the travelers to beware of starting a forest fire. Why do the Government officials in Yellowstone Park, Yosemite and in many of the mountain reserves refuse to allow the camper to carry a shotgun? Is it for fear that he will kill game out of season? Perhaps that is one reason, but the chief reason is that the forest rangers are afraid that the shotguns might set fire to the woods. Have you never attended a country college, and witnessed the deadly forest fires burn for weeks and weeks upon the mountain side? What was the only danger the western cowboy feared worse than the Indian's warwhorl? It was the prairie fire, which could lick up the dead grass, sweep faster than horse could run or deer could scurry away. Have you never read of the unsheathed sword of fire which razed Moscow to the ground? These flames were able to devour the indomitable ambitions of the "Little Corsican."

Will our people ever forget the ghastly tragedy that destroyed America's western metropolis, which overlooked the Golden Gate of San Francisco bay? One of the first lessons we teach our children is to leave matches alone and fear the danger of fire. The so-called "Prince of Peace" says, "I am come to send fire upon the earth." How can you explain this anomaly? I can only suggest some of the effects of fire, which may give you a hint of our Lord's meaning, for, though we may look upon fire as an agency of death, we cannot forget that it may become in God's hands an agency of eternal life and of the purest and the best of all earthly lives. May God help us as we try to understand these holy words.

Fire, in the first place, is the symbol of heat. Heat is the first and true life comes from God, even as all heat of the earth primarily comes from the fires of the sun. In every bird that flies, in every bee that hums, in every squirrel that chatters, in every flower that grows, in every tree that stands and in every human being that walks we see the great divine fact illustrated that the God who sent fire upon earth is the great God who was and is the Creator of all. Now, the fact that all animal and vegetable life is dependent upon fire and heat for creation and development is well understood.

I am sitting upon the farmer's kitchen porch, and I hear a cackling noise. The old speckled Plymouth Rock hen is calling: "I have laid an egg! I have laid an egg! I am going to hatch out a little chicken, for I have laid an egg!" But the farmer's wife has another use for the egg. Each morning she goes and takes that egg away from the hen. She is absolutely merciless in this respect. She cooks for her summer boarders the best food for a breakfast—namely, a fresh laid egg. When you break it open, there it lies out in half, with its centre of gold covered over with its wrappings of purest white. The snow could not be whiter than the albumen of a new laid egg. At last the old hen grows tired of having her eggs eaten, so she, in turn, finds a secret nest. She flies away to the top of the haystack, or she goes off to the other side of the grain field and crawls under an old board near the fence, and there she makes her nest. Day after day the white beauties grow in number. The old feathered fowl keeps very still about her secret. When you go out and say, "Biddle, where is your nest?" she looks as innocent as an old owl. Then after twelve or thirteen of those eggs have been laid side by side Biddle suddenly disappears. She comes around once a day for food, but that is all. Then after three weeks you hear a great commotion, and up to the kitchen door marches the proud mother, leading a large brood of fuzzy little creatures which are her children. Now, how were the contents of those eggs turned into little living creatures? Simply by the agency of heat. Day after day and week after week that old hen sat upon those eggs. She sat so long that the feathers were worn off her breast. She sat so long that her breast became like fire. The warmth of her body went into the eggs, and that warmth developed there the little germs of life which grew until they were able to burst asunder the shells and walk forth as perfect chickens.

Why do you not plant your flowers and vines on this side of the house? I asked a wealthy gentleman at whose country home I was stopping. "These archedways would form a perfect trellis where the vines could cling. Then, the first view the visitor has of the house is from this driveway. Instead of planting most of your flowers toward the east side of the house, I would plant them on the west." "Ah," said my friend, "nothing I would like better than that, but my flowers will not grow here. You must remember

that the sun rises in the east and that means that during the morning hours the west side of my house is shut out from the light of the sun. That means the ground here is always cold. Seeds and flowers must have heat in which to grow. Heat means life for the vegetable world, and cold always means death. So you see that fire is not always destructive, but is the symbol of life. Now, when I hear Christ say, "I am come to send fire upon the earth," in a broad sense, I seem to hear Christ say, "I am come in order to put children into the cradles of the nurseries and to weigh down the orchard branches with fruits and to cover up the harvest fields with golden headed grain and to fill the gardens with busy bees and to hatch out the salmon eggs which have lain in the shallows of the rivers." Oh, the wonders of nature as revealed in the miraculous creations of life! Have you ever ceased to be amazed at the first sentence of the Apostles' creed: "I believe in God the Father almighty, maker of heaven and earth, and in Jesus Christ, his only Son, our Lord?"

Utter folly it is to deny the Fatherhood of God and the divinity of Jesus Christ as revealed in the creations of nature. Many years ago in a debating society the Earl of Rochester, in order to fill out the list of debates, tried to prove that this world had no need of an overruling or a creating Providence. After he had finished his speech and won the applause of his auditors he turned and said, "How can a man who walks upright, who sees the wonderful creations of God and has the use of his senses and reason use them to the denying of his Creator?" So say we all of us. When we witness the miraculous effects of heat in the creation of life we bow before the great God who has built the fires of reproduction upon every hillside and in every valley, whether we see that life illustrated in the wing of a bird, the leaf of a tree or in the throbbing heart of a mortal and yet immortal man.

But I find that fire is the symbol of purification as well as of creation. When Christ says he will send fire, I remember that one of his purposes is to take the dross out of the hard metallic heart. This is as truly a part of his mission as to create the seeds of life and by heat burst those seeds into the white blossoms of the springtime. The more I study Christ's life the more I am impressed with the fact that Christ continually has to make us over and purify us, even as the nuggets of gold must be burned in the smelting furnaces to separate the alloy from the pure gold. "What," you say, "all?" Yes; all. There is no exception to the

Free to You,
My SisterFree to You and Every Sister Woman
Suffering from Woman's Ailments

I will mail, free of any charge, my home treatment with full instructions to any sufferer from woman's ailments. I want to tell all women about this cure, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand woman's sufferings. What we women know from experience we know better than any doctor. I know that my home treatment is a safe and sure cure for Leucorrhoea or White Discharges, Ulceration, Displacement or Falling of the Womb, Prolapse, Scanty or Painful Periods, Uterine or Ovarian Tumors or Growths, also pains in the head, back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, but fainter, weariness, kidney and bladder troubles where caused by weaknesses peculiar to our sex.

I want to send you a complete ten days treatment entirely free to prove to you that you can cure yourself at home, easily, quickly and surely. Remember that it will cost you nothing to give the treatment a complete trial and if you should wish to continue, it will cost you only about 10 cents a week, or less than two cents a day. I will not charge you for your case, entirely free, in plain wrapper, by return mail. I will also send you the fine, colored, "WOMAN'S OWN MEDICAL ADVISER," with explanatory illustrations showing why women suffer at home. Every woman should have it and learn to think for herself. It will not only save you money, but it will save you an operation. You can decide for yourself. Thousands of women have cured themselves with my home remedy. I cure all, old or young.

To mothers or daughters, I will explain a simple home treatment, which speedily and effectively cures Leucorrhoea, Green Discharges and painful or irregular menstruation in young ladies. Happiness and health always result from its use. Wherever you live, I can refer you to ladies of your own locality, who know and will gladly tell any sufferer that this "Home Treatment" really cures all women's diseases, and makes women well, strong, plump and robust. Just send me your address, and I will send you the "Home Treatment" free, also the book, "Write to-day, as you may not see this offer again. Address: MRS. M. SUMMERS, Box 4 Windsor, Ont.

rule. We have all erred and strayed like lost sheep. We have all followed too much the desires and the desires of our own hearts. There is none that doeth good—no, not one.

We have all been contaminated by sin from the very atmosphere which we have breathed. To a certain extent it is possible in operating rooms to keep the patient's wound free from poisonous infection. In the first place, the patient before being operated upon has his body thoroughly cleansed. Then he is etherized and carried to the operating table. There every instrument and every place of furnishing and cloth has been made antiseptic to receive the patient. There the nurses and the doctors are all dressed in pure, clean, antiseptic linen. They even wash their hands, their faces and their hair in carbolic solution. The very atmosphere is altered through apertures covered with gauze. Thus is the sick patient cared for in the operating room. The attendants are thus careful that no external dust or impurity touch that patient. But the atmosphere we breathe in life is not made antiseptic from sin. The hands that touch us upon the streets are not always pure hands. The lips which speak to us are not always pure lips. Indeed, we were born in sin; we have grown up amid the vitiating atmosphere of sin. Though we have again and again bowed in prayer, and made the publican's prayer, "God be merciful to me, a sinner," yet to-day we find that we have just as great a need of Christ the Purifier as we ever had of Christ the Creator of our souls and physical bodies. Now how does Christ purify our lives? It is done by the hot fires of trouble. A fire is always the best of all purifiers. I stand at one of the great kiln doors of an East Liverpool pottery. I say to the potter: "What are you doing? Why are you making those fires so hot?" "To bake the clay," he answers. "Why do you bake the clay?" I ask. "To get the impurities out of it," he answers. Then I stand and hear the roaring noise of those seething fires. They leap, they hiss, they try to burn asunder the heavy, massive brick walls which are confining them. As I peer through the little hole I seem to hear the clay calling: "Let me out! Oh, let me out! They are burning me to death!" "No," answers the potter, "we are not destroying you; we are merely taking the impurities out of you." Not only do they burn some of the clay once, but twice and even thrice. Each time the furnaces are made hotter. Then the clay comes forth as the beautiful vase, perhaps with its sides decorated by the flower boy by the master artist or into the exquisite features of a beautiful maiden, to be among the treasured wedding gifts of a king's bride. Thus Christ purifies us by the hot fires of trouble. He burns us and keeps on burning us until we may be like unto himself. So I begin to see that when Christ says, "I am come to send fire upon the earth," he may mean a fire that shall purge and purify us and make us fit for his companionship in heaven.

But God's fires do not allude only to the flames of creation and purification. Without doubt they allude to the fires of battle and carnage as well. If a human being will not be purified by the hot furnaces of trouble, then he must fight God and fight him to the death. In the book of Ecclesiastes we read, "There is a time to weep and a time to sew, a time to keep silence and a time to speak, a time to love and a time to hate, a time of war and a time of peace." Yes, there is a time for gospel carnage. And Christ furthermore said, "He that is not with me is against me, and he that gathereth not with me scattereth abroad." In other words, you and I must be mustered under Christ's standard and warm ourselves by the campfires or else we must be enrolled among the cohorts of his enemies and have different purposes and different purposes for which we fight. These fires of my text are the conflagrations of an advancing army on the march, as well as the signal flames which shall announce to the world a universal peace.

Now, war may be a curse or it may be a blessing. It depends upon the purposes or causes for which we fight. And when I speak thus I have well in mind the awful words, "Give me the money that has been spent in war," said a noted speaker, "and I will purchase every foot of land upon the globe. I will clothe every man, woman and child in an attire of which kings and queens would be proud. I will build a schoolhouse on every hillside and in every valley over the whole earth. I will build an academy in every town and endow it, a college in every state and fill it with able professors. I will crown every hill with a place of worship consecrated to the promulgation of the gospel of peace. I will support in every pulpit an able teacher of righteousness, so that on every Sabbath morning the chime on the hill shall answer to the chime on another part of earth's wide circumference, and the voice of prayer and the voice of praise shall ascend like a universal holocaust to heaven." That eulogy of the power of peace was most beautifully said, but, though past wars may have shed rivers of blood, I do not believe the awful gashes of the soldiers' grave trenches were too deep or too wide for the blessings which many of them brought to this suffering world.

Were not the blessings which came to mankind from the overthrow of the feudal system worth their sacrifices of human life? What was the intrinsic value of a few thousand or even a few million lives in comparison to the freedom of the home and sanctity of our loved ones and the independence of a man's life, whereby he could put his arm about his daughter and say to a petty king who claimed to be his master, "Haste thee off. She is my child. She is mine." Were not all the sacrifices for religious freedom well made? Would you put out the fires which burned to death the mortal life of Ridley, Latimer, Huss, Savonarola, and those who died to go to the stake and grope above amid the superstitions and the tyrannies of the dark ages? It is said when Gustavus Adolphus, the great King of Sweden, was fighting his last battle at Lutzen that amid the roar and crash of carnage a little frightened bird knew not where to go, so he alighted upon the shoulder of the mighty warrior. Gustavus reached up and took the little fluttering heart in his hand. Then he spoke a few

soothing words to the bird and hid it away for protection inside of his own armor. After Gustavus was slain and the loving soldiers reverently gathered about the bleeding corpse it is said that this little bird flew out of the cloak of the dead warrior, and no sooner did he start to fly away than he began to sing. So even upon the corpses of the martyrs and amid the persecutions of the covenants and amid the bitter attacks made upon Luther, Knox and Calvin we can hear the song birds of thanksgiving singing. We can say they died well. Aye, these martyrs died well, for by their sacrificial blood we won our religious liberty.

But, lastly, I learn from the words of my text that God's fires are to be the fires of triumph. The same soldiers who plod wearily along upon their forced marches and tramp through the long hours of the night doing sentinel duty; the same soldiers who, week after week and month after month and year after year, suffer exile from home and loved ones; the same soldiers who make the battlefields destructive, with the flames leaping out of the cannons' mouths and with the tongues of fire splitting bullets from rifle barrels, are the soldiers who will most joyfully build the campfires of triumph after glorious peace has been declared. It is said that when the peace agreement was signed at Appomattox every company plied the wood in its company streets. Then, as the flames leaped higher and higher, the soldiers, like a lot of schoolboys, joined hands and danced about these fires. They kept singing: "No more war; no more war! Peace has been declared! We are all going home to our loved ones! No more war! Thank God, no more war! Blessed peace—blessed, triumphant peace!" Thus shall it be when our Divine Leader shall be triumphant over sin. Then the campfires of war shall be changed into the leaping flames of triumph. Sin shall be forever done away. Dear ones shall then be reunited. Oh, the glorious triumphs of earth and heaven when God shall conquer all his enemies and everlasting peace and everlasting reunions shall be ours.

Can heaven be a truly happy place for our loved ones if we are not there to sing with them the song of redemption and of Moses and the Lamb? One of the saddest sights I ever witnessed was when the Second Illinois regiment was about to leave for the Spanish-American war. I was its chaplain. Just before we left the armory the cry was taken up, "Does any one know a man by the name of So-and-so?" "What is the matter?" I asked. One of the majors turned to me and said, "A young boy ran away from home to enlist. His mother is here, and she thinks he enlisted in our regiment. She wants to bid him good-bye and give him her blessing." No sooner did the major speak thus than I saw this little old mother in faded dress among the soldiers. I followed her. She looked from face to face, and as she looked she kept saying: "Do you know where my boy is? Do you know my boy?" Not a soldier laughed. Hardly an eye was dry. Why? They were watching a mother's breaking heart hunting for a lost child. Can it be that such a scene as this shall be repeated in heaven on account of our absence? Can it be that in the most momentous hour of all time, when Christ shall build his fires of triumph, our mothers and fathers and our wives and dear ones and our Christ shall be looking in vain for our faces among the rejoicing hosts of heaven? Shall it be? Shall some of us never be seen by the campfires of heaven which shall leap and blaze when the flaming torches of sin shall be forever snuffed out?

Paupers Make Rugs.

Some of the male inmates of the New South Workhouse have been utilizing their spare time in making wool rugs, which find a ready sale in the town and district.

A NOBLE ENEMY.

The Fate of Mokran, a Moslem Chief of Africa.

France was never in greater danger of losing her colonies in Africa than during the war with Germany in 1870. The troops were recalled from Africa to take part in the conflict that was going on against France, and Algeria was left almost defenseless.

The hour for which the conquered races had long waited had come, and if a holy war had been proclaimed it is probable that the French would have been driven from northern Africa.

But the tribes did not rise while the French had their hands full on the other side of the Mediterranean, and the fact was due to their fidelity to a solemn pledge.

When the war broke out a chief of great influence among the tribes, Mokran, gave his word to the governor general of Algeria that there should be no insurrection while the war lasted. That word was faithfully kept. Disaster after disaster followed the French arms. The defeats of the war culminated in the surrender of Paris. But not a man of the tribes of Kabylia stirred. The Moslem's faith was pledged; the Moslem's faith was kept.

When, however, the last battle had been fought and the treaty of peace signed, Mokran, then released from his word, gave the governor general notice that in forty-eight hours he would declare war. The French armies, released from duty at home, hurried across the Mediterranean, and war was inevitable. Mokran, seeing that all was lost, put himself at the head of his warriors and set fighting in the front rank. The French erected a monument to mark the spot where their noble enemy perished.

Where He Was.

"To what do you attribute your good health and remarkably robust condition?"

"To regular habits and early retiring."

"Then you have been so situated that you could carry out these excellent rules for the preservation of the health?"

"Oh, yes, I was in the Illinois penitentiary for twenty-three years."

Cleveland Plain Dealer.

A Ventilating Oven that Ventilates.

There is only one practical way of ventilating a range oven and that way has been adopted in the Pandora—is an actual, positive, working feature and not a mere talking point.

Fresh air is drawn from the outside through small vents into the oven while the odors and cooking fumes are forced by the fresh air out through small vents into the smoke flues, and up the chimney.

Roasts cooked in a Pandora oven retain their sweet, natural flavor, entirely free from cooking odors, absolutely unmixed with any foreign flavor. Puddings, cakes, bread, meats, etc., are always light, fresh and free from mixed odors or flavors.

In the Pandora range you get all that scientific study, practical experience, skilled workmanship and an immense and finely equipped plant combined, can produce—the highest possible attainment in range perfection.

Ask your local dealer to show you the Pandora range, or write to us for free catalogue before buying any other.

NO. 10. MASTER MINDS ON MUSIC

Being the 10th of a series of ten talks introducing sayings of great men, applicable to the Nordheimer Piano, the symbol to perfect music.

The man that has no music in himself, Nor is not moved with concord of sweet sounds, Is fit for treasons, stratagems and spoils. —Shakespeare

In this last of our series of what the master writers have said about music we have quoted the familiar words of the greatest English poet. Many times Shakespeare has credited music with being the greatest of arts, and in his day music had not reached the summit of its magnificence that it has today with such instruments as

THE NORDHEIMER PIANO

The "concord of sweet sounds" is but another name for the NORDHEIMER TONE, only the concord is is more perfect than can be realized in any other instrument, for the Nordheimer is now accepted by the Canadian people almost as a whole as the leader. Certainly it is the favorite among the most refined music lovers. If you are a music lover we would like to have you visit our ware-room and see the magnificent display.

Catalogues and prices mailed on request.

NORDHEIMER'S

One-Price System. Easy Terms if Desired.

188 Dundas St. LONDON, Limited

CURES GUARANTEED \$10 to \$25

We Trust you until Cured

This old established firm makes this special proposition for those afflicted and who are limited in circumstances, or who have taken treatment from other Doctors without success. Why pay exorbitant fees to Doctors who have neither the facilities nor the experience to cure you.

VARICOCELE—Cured without operation in 20 to 60 days.

STRICTURE—Cured by absorption in 30 to 60 days.

BLOOD DISEASES—Cured without mineral drugs in 60 to 90 days.

NERVOUS DEBILITY—Cured in 30 days.

URINARY COMPLAINTS—Cured quickly. Consultation and Examination Free. If unable to call, write for Question Blank for Home Treatment. Booklet sent Free (sealed).

Dr. Spinney Co. 290 Woodward Ave. DETROIT, MICH.

ence into twenty-four equal parts, numbered from 1 to 12, twice around, as shown in Fig. A. The best metal to use is zinc, as it does not rust and is easily marked and cut.

In the center of the disk is fixed a straight pin, called a style. It must be exactly perpendicular to the disk, as the accuracy of the dial depends on this, and also on its being placed exactly parallel with the earth's axis. This latter is effected in the following way:

Make a tiny hole in the metal disk, close to the style, and then on the first clear night place the disk on its support in such a position that by looking through the little hole you may bring the north star in line with the style.

When you have obtained the right angle, fasten the disk in place, and your sundial is complete.

The shadow thrown by the style will point to the hour of the day, and of course you need hardly be told that on cloudy days the dial will not work, as the sun is needed to cast the shadow.

Another way to find the angle or place in which the disk should rest is to cut a triangle out of pasteboard, as Fig. B designates, having the angle at C just equal to the latitude of the locality where the dial is to be used.

You may easily do this by finding the latitude on a map and then drawing the angle with the aid of a piece of metal called a protractor, which is marked off in degrees and which may be bought of any dealer in drawing materials.

Fix this triangle, with the aid of a compass, so that the angle B points due north and the base BC is horizontal. Then place the dial so that the style points along the line AC, with the free end toward A. When so placed the figure 12 in the dial must be directly below the style, as the picture shows.—New York Herald.

March Winds and April Showers. Perhaps you do not know that the old saying "When March comes in like a lion it will go out like a lamb" is founded on a scientific principle. If it comes in with high, blustering winds, there is an unusual degree of evaporation, caused by these winds, and hence an unusual amount of water vapor in the air. This results in constant showers during the latter part of March and in April, and these showers break the violence of the winds and give us the proverbial lamblike behavior.

The weather of March and April is of special benefit to the earth. The high winds of March are needed to dry the soil and thus keep the seeds from rotting soon after the planting, and the April showers supply the principal nourishment on which the seeds depend for development.

Conundrums. Why is "o" the noisiest of all the vowels? Because you can't make a horrid, loud noise without it, while all the others are inaudible.

Why can you never expect a fish-monger to be generous? Because his business makes him sell fish.

Why would an owl be offended at your calling him a pheasant? Because you would be making game of him.

What is that which is black, white and red all over, which shows some people to be green and makes others look black and blue? A newspaper.

Who is she? There is a little maiden—Who is she—do you know?—Who always has a welcome wherever she may go.

Each spot she makes the brighter As if it were the sun, And she is sought and cherished And loved by every one.

You surely must have met her, What! Must I introduce her? Her name is Cheerfulness.

SIMPLE SUNDIAL

The Way to Make One and Set It Up in Proper Shape.

Although we all have clocks and watches by which to tell the time, the sundial will always retain a certain charm by reason of its antiquity, and any garden possessing one has a feature added to it that nothing else can supply. So come, boys, especially you handy ones, and make a dial and then plant it at its base some quick growing vine and have a thing of beauty that is a joy forever.

One of the simplest sundials consists of a metal disk. You may make it any size you wish, dividing its circumference into twenty-four equal parts, numbered from 1 to 12, twice around, as shown in Fig. A. The best metal to use is zinc, as it does not rust and is easily marked and cut.

In the center of the disk is fixed a straight pin, called a style. It must be exactly perpendicular to the disk, as the accuracy of the dial depends on this, and also on its being placed exactly parallel with the earth's axis. This latter is effected in the following way:

Make a tiny hole in the metal disk, close to the style, and then on the first clear night place the disk on its support in such a position that by looking through the little hole you may bring the north star in line with the style.

When you have obtained the right angle, fasten the disk in place, and your sundial is complete.

The shadow thrown by the style will point to the hour of the day, and of course you need hardly be told that on cloudy days the dial will not work, as the sun is needed to cast the shadow.

Another way to find the angle or place in which the disk should rest is to cut a triangle out of pasteboard, as Fig. B designates, having the angle at C just equal to the latitude of the locality where the dial is to be used.

You may easily do this by finding the latitude on a map and then drawing the angle with the aid of a piece of metal called a protractor, which is marked off in degrees and which may be bought of any dealer in drawing materials.

Fix this triangle, with the aid of a compass, so that the angle B points due north and the base BC is horizontal. Then place the dial so that the style points along the line AC, with the free end toward A. When so placed the figure 12 in the dial must be directly below the style, as the picture shows.—New York Herald.

DOCTOR CURED OF ECZEMA

Maryland Physician Cures Himself of Eczema with Cuticura Remedies. Prescribes Them and Has Cured Many Cases Where Other Formulas Have Failed—Dr. Fisher Says:

CUTICURA REMEDIES POSSESS TRUE MERIT

My face was afflicted with eczema in the year 1897. I used the Cuticura Remedies, and was entirely cured. I am a practicing physician and very often prescribe Cuticura Resolvent and Cuticura Soap in cases of eczema, and they have cured where other formulas have failed. I am not a devotee of endorsing patent medicines, but when I find remedies possessing true merit, such as the Cuticura Remedies do, I am broad-minded enough to proclaim their virtues to the world. I have been practicing medicine for sixteen years, and must say I find your Remedies A No. 1. You are at liberty to publish this letter, or any part of it. I remain, very truly yours, G. M. Fisher, M. D., Big Pool, Md., May 24, 1905.

A SET OFTEN CURES Complete Treatment for Every Humour from Pimples to Scrofula.

Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle; dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation, and inflammation, and soothe and heal; and, lastly, take Cuticura Resolvent Pills to cool and cleanse the blood. A single set, often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, from infancy to age, when all else fails.

Cuticura Soap, Ointment, and Resolvent, also in form of Chocolate Coated Pills, in 10¢ and 50¢ boxes sold throughout the world. Cuticura Resolvent Pills, 10¢ and 50¢ boxes sold throughout the world. Cuticura Soap, Ointment, and Resolvent, also in form of Chocolate Coated Pills, in 10¢ and 50¢ boxes sold throughout the world.

May Delay Session. Ottawa, Aug. 31.—The appeal to the Supreme Court against the decision of the Nova Scotia judges in the matter of the personal charges against Hon. W. S. Mealing, is being put forward as an excuse why Parliament may not meet in November, provided the Government is not ready with its seasonal program.

Does Your Heart Flutter? You know heart fluttering means you're not as well as you should be. It's an evidence of impaired nerve and muscular power. To obtain cure, Ferrozene; it has a special action on the heart as seen in the case of Thos. Grover, of Cole Harbor, N. S., who says: "If I exerted myself it would bring palpitation. To carry any heavy weight or go quickly upstairs completely knocked me out. When bad attacks came on I lived in fear of sudden death. Ferrozene gave my heart the very assistance it needed and now I am quite well." For heart or nerves it's hard to exceed Ferrozene; 50¢ per box at all dealers.

Newspaper Man Dead. St. John, N. B., Aug. 31.—William Quinlan, for 25 years a member of the St. John writing staff, died yesterday at Montreal, where he had been undergoing treatment. He was one of the best writers in the Maritime Provinces and an authority on shipping.

36,000 Homeless. Santiago, Chile, Aug. 31.—The ambulance stations and hospitals at Valparaiso are now caring for 36,000 persons who sustained injuries during the earthquake, or the fires which followed.

BLUE PILLS NO LONGER USED. When the stomach needs cleansing, the bowels increased activity, the liver additional power, don't use mercurial pills, try Dr. Hamilton's. Vegetable in composition, extremely mild, yet sure to flush out all impurities and wastes, no remedy is so well adapted for family use. Positively a cure for biliousness and sick headache, unrelenting constipation and bowel trouble, exceptionally good for indigestion, no medicine is so universally needed in every home as Dr. Hamilton's Pills. Good for the young, the old, the sick and the well ones, the benefits of Dr. Hamilton's Pills are manifold. Sold everywhere in 25¢ boxes.

Egotism is merely the happy faculty of pleasing ourselves.

Mistakes are only funny when they don't hurt.

Ask any "JAP" that you may see, "Why the Czar, with Bear behind," had to climb a tree.

The Yanks, God bless the Yanks, says he, They gave us Rocky Mountain Tea.

A. L. McCall & Co.

It is impossible to gauge the good there is in others by the way they talk.

The lazy man is always willing to rest on his laurels.

CHILD'S PARTY DRESS. tended on it would defy the whole of Hens Andersen's cavern of winds. In shape it is nothing more than a very small cocked hat, a tiny Napoleon shape, in chip with a soft glaze rosette at each point. The most acutely Gibsonian headdress rises uncrushed in front of it, and the motor veil drapes over it neatly.

Colored shoes, with stockings to match, have superseded black shoes. It would look ugly even with a dark dress to wear black stockings and shoes. The little varnished shoe with paste buckles may be tolerated, but the stocking must be of some bright color.

The more varieties of trimming and the more varied the designs the smarter is the little linen bolero suit. Imitation Irish lace renaissance braid, embroidered motifs combined with net and Valenciennes lace are used on the same garment.

The little girl's dress seen in the picture is attractively carried out in white mill and English embroidery. The full skirt is tucked between bands of the embroidery. And the bloused waist has bands and neck trimming of the same embroidery.

JUDIC CHOLLET.

FASHION NOTES. Riding Habits For the Girl Who Sits Astride—Chiffon Bows on Girdles.

For the girl equestrienne who is following the accepted custom just now of riding astride the very latest habit shows the divided skirt buttoning in panel fashion down the front and topped by a loose pony jacket. This suit appears in rich, deep hues of green and blue chevron, while thin black serge showing a hair line stripe of white is the material which is considered very smart.

Chiffon bows and platings and small cut steel buckles trim many of the dressy girdles. Narrow black velvet or satin ribbon about a quarter of an inch wide is also used.

A stunning linen dress is of tan in a soft biscuit shade. The skirt, overskirt and bodice are scalloped and embroidered in white thread.

Not only linen gowns, but those of pongee and voile, are made stunning.

Baillie Wood & Co. TORONTO

Tompkins Couple Indicted. Toronto, Aug. 31.—Of the batch of men and women corralled some two weeks ago, on numerous charges of theft and pocket-picking, only two, Harry and Mrs. Tompkins, will go down. There were nine charges against the man; he was convicted in five and acquitted on four; his wife, on six charges of theft and one of vagrancy, scored four acquittals. Charles O'Neil, charged of theft and vagrancy, was acquitted. Hattie Dineen, two charges of theft and one of vagrancy, acquitted on the theft charges, remanded on the vagrancy charge; William Lennox, one charge of theft and one of vagrancy, with both drawn and vagrancy charge adjourned.

Nellie Lennox, one charge of theft and one of vagrancy, theft charge withdrawn and vagrancy withdrawn. The Lennox couple were allowed bail at \$1 each to appear this morning, "but," said the magistrate, "if you don't come back it will do equally well."

Nature has just one pigment on her palette with which she produces all the marvellous tints of beauty, and that one pigment is the blood. The shell-like pink beneath the finger nails, the delicate rose of the cheek, the cherry ripeness of the lips, the iridescent brilliancy of the eyes are all produced by the blood. Just as the permanence of a beautiful painting will depend upon the purity of the colors with which it is painted, so the permanence of beauty depends on the purity of the blood. Paint, powder and cosmetics will avail to preserve beauty. Beauty begins in the blood. Dr. Pierce's Golden Medical Discovery is a true beautifier, because it provides for nature that pure blood with which alone she can paint. The use of this medicine will cleanse the skin, lighten the complexion, brighten the eyes, and give to face and form that radiance of health which is the greatest charm of beauty. Dr. Pleasant Pellets are very effective in clearing the system of clogging humors, which accumulates with constipated habit.

Gamester Turns Turk. Ottawa, Aug. 31.—Louis Charette keeps a gambling house in Hull, Que., and for this offence he has been committed. To the amusement of the bench he has in turn brought charges of frequenting the same against three men who were witnesses against him. Magistrate Goyette deferred judgment until to-day.

DOCTORS CHANGE THEIR METHODS. Years ago they fought catarrh by internal dosing. They saw this rule of the stomach and changed to the ozonated air cure, better known as "Catarrhoid." This treatment is "Catarrhoid." It goes to the source of the disease; it destroys the causes that maintain catarrh and even in the worst cases permanent cure is guaranteed. Failure with Catarrhoid is impossible. Antiseptic, healing and far-reaching, it's bound to cure every case. Endorsed by more than twenty thousand physicians in America alone and sold in 25¢ and \$1.00 sizes by all dealers.

Lady Campbell-Bannerman Dead. Marienbad, Bohemia, Aug. 31.—Lady Campbell-Bannerman, wife of the British Premier, Sir Henry Campbell-Bannerman, died yesterday. She had been an invalid for years. She was the daughter of the late Gen. Sir Charles Bruce, K. C. B., and was married in 1880.

May Be Arbitrated. Hamilton, Aug. 31.—Indications last night with regard to the street railway question are that the matter in dispute will be left to arbitration. On the wage question the company and the men have not arrived at a settlement.

It arouses energy, develops and stimulates nervous life, arouses the courage of youth. It makes you young again. That's what Hollister's Rocky Mountain Tea will do. 35 cents, Tea or Tablets.

WALTER MILLS RETURNS HOME

Interesting Account Of A Pleasant Visit To Northern Ontario

A PROFITABLE HOLIDAY

Mr. Walter Mills, barrister, Hedgesville, son of the late Hon. David Mills, returned on Saturday from a trip through the Abitibi country. To a reporter of the Toronto News he made the following observations concerning that new and partly discovered district:—

"We started out the 4th of August. When I first sat in a canoe I trembled; I tried to see how deep was the water and how far it was from shore should I have to swim. After the second day out I paddled some, and after that I was well broken in. At the end of a week the canoe seemed the only boat a man should ride the river with. Well used to it, it is the nearest to being on the wing of anything I know. It seems to me now the way an office man should spend his vacation; he has to work and get rid of the useless fat which a sedentary life necessarily puts on.

"At the end of steel we launched on Lake Sturgeon, and before noon we had crossed the height of land. Beyond this and until one reaches the McDougall chute the land varies from rocky to clay soil. The Black River, which we entered from the Little White Clay River, is a good stream for canoeing, and there are plenty of fish.

ON THE ABITIBI.

"We entered the Abitibi from the Black River. The Abitibi is a wide and even water until few miles from confluence of the Frederick House River. Here we encountered the Dried-deer rapids, and the Long Sault rapids, which we were able to shoot, although pretty wild looking and more or less dangerous. But our guide was a good canoeist. All along the Abitibi River one is impressed by the splendid quality of the timber. The spruce, balsam, poplar, white birch and Balm of Gilead are of luxurious growth. Spruce is excellent, would make good standard logs. Poplar is much better than about Lake Huron; it grows 40 to 50 feet, straight and of fair size. I used to think it would be a hardship for a man to go up to that country without aid to carve out a home, but any ambitious man can take up a homestead, and build himself a house in a month or two, have plenty of game about him, and with a fair cache of supplies can do well. Moose are very plentiful. Their footprints are all along the shores, and they cannot keep out of your way.

MARKS OF RICHES.

"At Iroquois Falls I was shown claims which had been staked, bearing the marks of riches underground. Gold and copper seem to be indicated. This is 20 miles north of McDougall's chute. On the Black River we portaged over two water falls, besides the one at McDougall's chute. These waterfalls are sufficient for good water power for milling operations.

"The Iroquois Falls are divided in three, two of them with heavy volumes of water with 25 feet fall, and are a beautiful sight.

"On the hillside to the left of the river, near the Noyah's Falls, is a lone grave, with an oak slab bearing the inscription: 'Sacred to the memory of Joseph Thomas Bedds, who departed this life the 15th day of July, 1880, aged 18 years and 5 months.' The script is in the Spencerian style, and as good apparently as when done, nearly 60 years ago.

WITH AN OLD PROSPECTOR.

"On the Nedurch House River, we met an old prospector at Midland Rapids. He had some sample of rock from a claim he had staked out far from that point.

"On the Night Hawk Lake are numerous islands of solid rock rising up out of the water. They look like bronze. You may stand on any of them and count upwards of 50 more within the range of the eye. The Matschewan falls are 40 feet high, and offer a great power. The Hudson Bay Company's fort is three miles below on the east side of the Montreal River.

"We were rescued from the foot of the falls by Indians from this fort after we had tramped three days through the woods of the unsurveyed district from west of Mount Sinclair without food.

"The tramp through thick forest where it is difficult to see sometimes more than 20 or 30 feet ahead, is good experience for a tenderfoot. It makes a fellow think of home a hundred ways he never thought of before.

MINERALIZED ROCKS.

"Three of our party had to refit ourselves with clothing at the fort. It was done at a very reasonable cost. About 30 Indians were camped on the grounds about the fort, which was made the more picturesque spectacle thereby. The Montreal River is a beautiful stream, very rocky shores most of the way down. Rocks seem to be mineralized. Badly so. Some samples from Matschewan showed iron of 11 to 20 per cent., and no doubt there are better—but we were not prospecting—we were reducing superfluous flesh, and raising muscle."

LONG CANOE TRIP.

"We went by canoe over a strip of water that was more than 500 miles in length. We were as far north of Lake Huron as North Bay is north of Toronto. We saw every kind of fall, timber and rock that lies in North Ontario.

"The soil is a rich clay loam and suitable for grazing and grain when made fit for cultivation by the removal of timber. One thing occurred to me, and that was the need for encouragement for the pioneer farmer by allowing him to take 320 acres of land instead of 160 as at present. The timber is valuable, but it will be a generation at least before he can put it in the market. But the day cannot be far distant when the north should be alive with the activity of men building homes as good as any in Old Ontario. Fifty years ago the country of Lambton was a swamp. The north land has many advantages over many of the population sections of Old Ontario in the inherent qualities of the soil.

"From Latchford north to within a few miles of James Bay, a few years ago was one of the greatest farming, mining and lumber countries ever opened up in the world."

Accompanying Mr. Mills were Mr. J. Russell Coutts, Chicago; Mr. Geo. Jackson, of the Gutta Percha Rubber Company's works, and Mr. George Thompson, steward of McMaster University. Mr. Coutts lost all his personal effects in the fire at Haliburton.
