

Notice that the inventors have given Messrs. W. H. & R. E. Henson the entire control of the new system of Telegraphs for the United States.

Along, it made the street appear as if there was a wall, and that, formed by neglect, which was the reverse.

But since you have inserted my name with the name of Mr. McKay's amendment to the Resolutions moved by the Honorable Speaker.

The following extract from the forthcoming publication of Hedges, Davis, & Co., of Montreal, will convey some idea of the interesting character of the work.

The circumstances attending the foundation of the press for this country, were than for encouraging; and notwithstanding its exposure on all sides to the attacks of the bold, crafty, and unscrupulous impostors, it daily improved in commerce and respectability.

I would not, Mr. Editor, what we are doing in good order? The thing answers for itself. No person can be more useful than myself to have the streets freed from cables, and am very ready to sign the act, and all one upon, when I see one; but I do not expect to have any success.

It is not the way to get our citizens to keep the streets in good order? The thing answers for itself. No person can be more useful than myself to have the streets freed from cables, and am very ready to sign the act, and all one upon, when I see one; but I do not expect to have any success.

Commercial.

Montreal, Feb. 28.—We have no improvement to notice to date; every branch of business, so far as we can learn, is as usual as possible, without any prospect of material improvement before the opening of the navigation.

We learn from the New York Express that the public mind in New York is much occupied as to the method by which a reduction may be effected in the price of bread stuffs.

There arrived at New York, on Monday and Tuesday, last week, from Hamburg, 193 lasts (15,640 bus.) of wheat, and 189 tons of flour; from Bremen, 4855 bags of wheat; from Odessa, 160 lasts (12,800 bus.) of wheat; from Havre, 350 bags; and one cargo from Trieste, the quantity of which is not stated.

REVIEW OF THE NEW YORK MARKET FOR THREE DAYS PRECEDING.

WEDNESDAY, February 25, 1857.
Wheat.—Holders continue firm, but there is no disposition shown by shippers to purchase at the same prices as last week.

The proceedings of the New Brunswick Legislature are of a very discordant character. The Lieutenant Governor has deferred giving his assent to the Civil List Bill, in the hope of receiving answers to his Despatches on the subject before the close of the Session.

The House of Assembly passed a resolution to the effect that the country had no confidence in the Governor or his Executive Council. His Excellency, determined to be even with them, replied, among other things, that the "Address of the Assembly was to him a matter of perfect indifference."

A great deal of excitement prevailed in New Brunswick, in consequence of these serious jarrings between two branches of the Legislature. The office holders, it was said, were about to dispatch an agent to England to defend their claims, which they do not think are sufficiently provided for in the Civil List Bill; and on the other hand, the House intend sending home their former delegates to thwart the machinations of their opponents.

Mr. J. A. PIERCE, proprietor of the Montreal Globe, has been arrested on the Speaker's warrant, and dragged off to Fredericton, for some five minutes on the conduct of Mr. Wilson, one of the members of the Assembly. This is generally considered, where all the circumstances of the case are best known, to be a harsh and tyrannical procedure on the part of the House.

It will be seen by a communication, in another column, on the subject of MARIA MOSE, that public opinion, at New York, requires from the Protestant inhabitants of Montreal some decisive movements with regard to the fabrication of that impostor, and we are happy to learn that a requisition for a public meeting had been previously prepared, and will be immediately presented to our citizens, which we hope will produce a large attendance. The subject is really growing more important than we had conjectured it could ever have become.

The captain of a vessel, arrived at Boston, which sailed from Santa Martha on the 21st Jan. states, that the affairs relative to the imprisonment of Mr. RUSSELL, the Consul at Panama, had not been settled, and that the satisfaction demanded by the British Government, viz: the immediate liberation of Mr. Russell, and indemnity to that gentleman of £1000, and the removal from office of the judges who had acted on his trial, had been peremptorily refused by the Government of New Grenada, and consequently the latter Government were making great preparations of defence on the sea-board. Owing to this state of things, business was at a stand.

The Bill allowing Foreigners to hold real estate, under certain conditions, in Upper Canada, has been thrown out by the Legislative Council. This is to be regretted. A new battle scene, about the disposal of the Clergy Reserves, is, it is stated, about to be brought upon the carpet. Nothing but the unconditional appropriation of these lands to the purposes of education will put to rest this harassing question. The Kingston Chronicle states that the outline of the new plan is somewhat as follows:—The endowment of the Rectories already made will be respected, but no new appropriations to be taken. The Clergy Reserves to be re-vested in the Crown for the purpose of being sold—the proceeds to be at the disposal of the Provincial Legislature, subject to pay the demands now existing on the Clergy, and Territorial Revenues for the support of the different religious denominations.

The Bill allowing Foreigners to hold real estate, under certain conditions, in Upper Canada, has been thrown out by the Legislative Council. This is to be regretted. A new battle scene, about the disposal of the Clergy Reserves, is, it is stated, about to be brought upon the carpet. The Kingston Chronicle states that the outline of the new plan is somewhat as follows:—The endowment of the Rectories already made will be respected, but no new appropriations to be taken.

A novel and interesting ceremony took place on the 18th ult., in the Parish Church of St. Raphael, in the County of Gloucester, which was witnessed by upwards of two thousand persons. In conformity with an ancient practice of the Roman Catholic Church, Bishop Macdonell, of Kingston, who completed the fifty-fourth year of his priesthood on the above day, celebrated a jubilee, and renewed his vows in the Church of St. Raphael. The services on the occasion are said to have been impressive.

There was an attempt at revolution made in Hayti in January, by a colonel who commanded a regiment of carabineers, but which entirely failed. The leader and his accomplices, after a successful attack upon the arsenal at Cape Henry, were attacked in their turn, and obliged to seek safety in flight. President Boyer has issued a proclamation announcing the insurrection, which is drawn up in the most approved fashion of more potent commanders.

Van Buren's Cabinet, however, to be agreed on all hands, will remain the same. Secretary of State—Mr. Fish. Secretary of War—Mr. Cameron. Secretary of Treasury—Mr. Woodbury. Secretary of Navy—Mr. Mallory. Postmaster General—Mr. Blair. Attorney General—Mr. Bates.

A volcanic eruption occurred on the island of Guadaloupe on the 13th December. Engraving.—In the communication which appeared in Tuesday's Courier, signed "Anna," in the second line of the third paragraph, for "Irish Republics," read "French Republics."

TO THE EDITOR OF THE MORNING COURIER.
Sir,—Will you be good to forward the following extract from a letter written by a gentleman from New York:—

States. Under these circumstances, there would be a public meeting of the Protestant inhabitants of our city. It is public opinion, at New York, requires from the Protestant inhabitants of Montreal some decisive movements with regard to the fabrication of that impostor, and we are happy to learn that a requisition for a public meeting had been previously prepared, and will be immediately presented to our citizens, which we hope will produce a large attendance.

TO THE FARMERS OF CANADA.

AGRICULTURAL IMPROVEMENT. BY THE EDITOR OF THESE PAPERS. PART II.
No. IX.
The successful progress of a general education will depend in a great measure on the competency of teachers. It will not be possible for a man to be a good teacher, who is not a good scholar.

The successful progress of a general education will depend in a great measure on the competency of teachers. It will not be possible for a man to be a good teacher, who is not a good scholar. The successful progress of a general education will depend in a great measure on the competency of teachers.

As it is to Agriculturalists an art of writing, it is not only a means of conveying instruction to persons who would be unable to learn in any other way, but it is a means of conveying instruction to persons who would be unable to learn in any other way.

A novel and interesting ceremony took place on the 18th ult., in the Parish Church of St. Raphael, in the County of Gloucester, which was witnessed by upwards of two thousand persons. In conformity with an ancient practice of the Roman Catholic Church, Bishop Macdonell, of Kingston, who completed the fifty-fourth year of his priesthood on the above day, celebrated a jubilee, and renewed his vows in the Church of St. Raphael.

There was an attempt at revolution made in Hayti in January, by a colonel who commanded a regiment of carabineers, but which entirely failed. The leader and his accomplices, after a successful attack upon the arsenal at Cape Henry, were attacked in their turn, and obliged to seek safety in flight.

A volcanic eruption occurred on the island of Guadaloupe on the 13th December. Engraving.—In the communication which appeared in Tuesday's Courier, signed "Anna," in the second line of the third paragraph, for "Irish Republics," read "French Republics."

ment I make should apply to any school, or system of education in Canada, that belongs to the class not agricultural. It will not be possible to find instruction in the ordinary course of the young. All that can be done is to prepare the most competent that are to be found for the present, and to provide for the future, by the establishment of a Normal School, and at the College, that may supply the place as soon as possible.
