## WHAT WOULD CITIZENS DO?

What would happen in a city where the members of the council let all contracts for public improvements, such as sewer work and street improvements generally, with the understanding that the contractor should give a percentage

of the amount he received for the work to some friend of the members of the council?

What would happen in a city where the members of the council purchased all supplies from their friends at double the market price and refused all the other merchants in the city even the privilege of tendering for them?

What would happen in a city where the members of the council secretly disposed of municipal lands to their friends at prices so much below the market value that the purchasers were able to immediately turn them over at many times the amount which they had paid for them?

What would happen in a city where

Nelson, B. C.

MINARD'S LINIMENT CO., Ltd.  
Gentle—A customer of ours cured a very bad case of distemper in a valuable horse by the use of MINARD'S LINIMENT.  
Yours truly,  
VILANDIE FRERES.

the members of the council, when a piece of land was wanted for corporation purposes, quietly passed out a tip to a friend as to the particular piece of property required so that this friend might buy up the land and turn it over to the city at a big profit?

There is only one thing that the people of a city, where the members of the council acted in this way, would do. They would rise in their might and they would hurl that council from power, if more drastic measures were not taken. Why then should a different stand be taken in regard to the affairs of the country as a whole? The present Dominion government has done all these things and it is now asking the people of the country to endorse their actions and to return them to power again. In Kootenay Mr. Smith Curtis is asking the people to vote for him as a supporter of the government which has been guilty of all these things.

## THAT MACKENZIE PLOT.

Mr. Buchanan, independent candidate in MacKenzie, has shed further light on the plot of senators Watson and Ross and John Crawford, ex-M. P. and liberal candidate for Portage la Prairie, to secure a pledge from him that, if elected, he would support sir Wilfrid Laurier. Mr. Buchanan admits that at the solicitation of Mr. Malcolm McMillan, a Grand Trunk Pacific contractor, he signed the pledge with Mr. Crawford, his brother-in-law, sent him but says that at the time he did not realize the trap into which this sweet-scented relative was leading him. He did not know anything of the Watson-Ross-Crawford conspiracy.

The facts are that senator Watson and Mr. Crawford got together in the matter and Mr. Crawford wrote his brother-in-law, Mr. Buchanan, suggesting that it would be a good thing for him to sign a pledge which he sent him to the effect that, if elected, he would support sir Wilfrid Laurier. In this pledge Mr. Buchanan was relieved from endorsing either the government's land policy, or its expenditures, but in signing it he bound himself to support its general policy. Mr. Crawford gave senator Watson a copy of this pledge and also of his letter to Mr. Buchanan covering it and senator Watson sent both to senator Ross who was asked to "see" Mr. Buchanan. In the meantime senator Watson and Mr. Crawford had sent Mr. Malcolm McMillan, the Grand Trunk Pacific contractor, to Mr. Buchanan with the original letter and a copy of the pledge. When Mr. McMillan met Mr. Buchanan he was in very much of a hurry and implored him to sign the pledge at once. The idea apparently was to have Mr. Buchanan commit himself without an opportunity to think the matter over or consult any of his friends. After some hesitation Mr. Buchanan gave into Mr. McMillan's en-

treates that his mother was dying and he wanted to get back home at least in time to attend her funeral and signed the pledge which took away his independence.

Having secured this senator Watson, senator Ross and Mr. Crawford were congratulating themselves on their success in having both candidates in MacKenzie pledged to the support of sir Wilfrid, when the plot was exposed and Mr. Buchanan seeing the manner in which he had been made a tool of renounced his pledge and offered that if the conservatives liked he would withdraw and would support with all his might whoever they might nominate. It was decided, however, that Mr. Buchanan should remain in the field as the conservative and independent liberal candidate and as such he is being supported.

The participation of Mr. McMillan in this deal is enlightening. Mr. McMillan is a member of a large contracting firm. At the time of the last Dominion elections this firm was anxious to secure a contract from the Grand Trunk Pacific. This, it is said, they were promised if they would see to it that Mr. Nathaniel Boyd, at that time conservative member for Portage la Prairie, and one of the ablest members from the west, was defeated. The members of the firm threw their whole souls into the fight and from some source an abundance of money was forthcoming. Mr. Boyd was defeated by the most barefaced corruption and shortly afterwards the McMillan firm was given a contract for the grading of 275 miles of the Grand Trunk railway. Apparently the partnership formed in 1904 between the members of the firm and the liberal machine is still in existence. Otherwise why should Mr. Malcolm McMillan make a trip from Portage la Prairie to Kamsack in the province of Saskatchewan to get Mr. Buchanan to sign this pledge?

The whole incident illustrates the manner in which the liberal machine works and the methods to which it goes in the interests of sir Wilfrid Laurier.

## WAR CLOUDS LOATH TO LEAVE.

The Balkan war cloud continues to hover about the horizon as though loath to depart. One day there is talk of war; the next day peace is assured. Thus matters have gone on for some weeks. One by one most of the difficulties in the way of peace have been brushed out of the way, but the new-fledged kingdom of Bulgaria still appears anxious to herald its advent to the world by measuring its strength with its late master, Turkey. Whether its desires will be gratified remains to be seen.

Some day the various Balkan states may settle down and be like other countries, but at present the sole reason for their existence would almost appear to be to give Europe heart failure every little while by a threat of the outbreak of hostilities which would involve the larger nations. The people seem to have a perpetual thirst for each other's blood and it takes the strong of Europe to prevent them from quenching it.

Until they do settle down to be good little countries they will continue to supply copy for the papers of the world when there is nothing more exciting or important at hand. In the present

NO MORE  
HEADACHES

Buffered From Constant Headaches—  
Cured by "Fruit-a-Lives" When  
Doctors Failed.

"I was a sufferer from fearful headaches for over two years, sometimes they were so bad that I was unable to work for days at a time. I took all kinds of medicines, was treated by physicians, and yet the headaches persisted. I was rarely free from headache. A short time ago I was advised to try 'Fruit-a-Lives' and I did so with, I must confess, very little faith, but after I had taken them for three days my headaches were easier and in a week they left me. After I had taken a box of the tablets my headaches were quite cured. My appetite was always poor and my stomach bad, and now my appetite is splendid and my digestion is excellent. I had become thin and weak from the constant headaches, but now not only have I been cured of all these awful headaches, but my strength is growing up once more, and I feel like a new man. I have taken in all three boxes of 'Fruit-a-Lives.' I am exceedingly grateful to 'Fruit-a-Lives' for curing me, and I give this unsolicited testimonial with great pleasure. I hope thereby some other sufferer of headaches will be induced to try 'Fruit-a-Lives' and will be cured."

(Sgd.) B. Cornell  
Taylorville, Ont.

"Fruit-a-Lives" is now put up in the new 24c trial size as well as the regular 50c boxes. Write Fruit-a-Lives Limited, Ottawa, if your dealer will not supply you.

instance the election campaigns in Canada and the United States rather overshadowed the war scare so far as these two countries are concerned but Canadians and Americans need not worry over this. There will be lots of other Balkan crises in the days to come. They are not, therefore, missing much just now and if a real war should break out as a result of the present trouble the elections will over in lots of time to allow of their getting all the news they want about it.

## EDITORIAL NOTES.

Says the Kaslo Kootenian: "Here is another way the deferred election is doing injury and injustice to the Kootenay district. For some years we have been boosting the fruit growing and other industries. We have been pointing with pride to our many prosperous towns and our good rail and steamboat transportation facilities. The advertising propaganda cost a good deal of money and was certainly doing much good. Now a few liberal politicians step in and put a blight on the good work accomplished by creating a wrong impression. For no feasible cause our is deferred, and it is scattered broadcast that the reason therefor is that the bal-

lot boxes could not be delivered in time; implying that our transportation facilities are not as represented and that glorious Kootenay is merely a collection of sparsely settled communities, when the facts are exactly the reverse. Few outsiders will take time to think out the situation and put the cause to its proper motive of political trickery. There's where the shoe pinches and constitutes one of the best reasons for turning down Mr. Smith Curtis and coterie of grit heelers on November 12. Mr. Fruit Grower and Mr. Land Owner it's up to you!"

Hon. William Templeman, speaking for the Dominion government, says that better terms are "as dead as Julius Caesar." The people of Kootenay will, on November 12, show Mr. Templeman that he was mistaken.

Sir Wilfrid Laurier says he does not share the views of the people of British Columbia on the question of Asiatic exclusion. Sir Wilfrid is at least candid about the matter but surely the people of British Columbia prefer a man like Mr. Borden, who does share their views, at the head of the government. That is the only way that they can be sure of having their wishes met in this important matter.

The government has been so busy enriching its friends at the expense of the public that it could not find time to even consider the establishment of an experimental farm in southern British Columbia. On November 12 the electors of Kootenay will be so busy marking their ballots against Mr. Smith Curtis, the government's apologist in this constituency, that he will wonder what happened to him when the result of the poll is announced.

Mr. Goodeve will make a representative of whom the people of Kootenay will feel proud.

This is nomination day in Yale-Cariboo. Nominations were made in Kootenay on Monday last. Neither Mr. Curtis nor any of his friends have yet explained why it should take five days longer to print the ballots and distribute the ballot boxes in Kootenay than in Yale-Cariboo, but perhaps they haven't asked Mr. Duncan Ross yet. He set the date of the Kootenay election for Mr. Curtis and perhaps he has the explanation in his pocket.

Mr. Joseph Martin is to fore with a definite charge regarding the sale of judgeships in this province. Joe certainly has a faculty for saying things.

Judging from the despatches the government is making a big effort to buy its way into power. Several arrests have

Do You Think  
For Yourself?

Or do you open your mouth like a young bird and rattle down whatever food or medicine may be offered you?

Unquestioning intelligent thinking woman, to need of help from weakness, nervousness, pain and aching, then it means much to you that there is one tried and true honest medicine of proven reputation, sold by druggists for the cure of women's ills.

The makers of Dr. Pierce's Favorite Prescription, for the cure of weak, nervous, run-down, over-worked, debilitated, pain-racked women, knowing this medicine to be made up of ingredients, every one of which has the strongest possible endorsement of the leading and standard authorities of the several schools of practice, are perfectly willing, and in fact, are only too glad to print, as they do, the formula, or list of ingredients of which it is composed, in plain English, on every bottle-wrapper.

The results of Dr. Pierce's Favorite Prescription will bear the most critical examination of medical experts for it contains no alcohol, narcotics, harmful, or habit-forming drugs, and no agent enters into it that is not highly recommended by the most advanced and leading medical teachers and authorities of their several schools of practice. These authorities recommend the ingredients of Dr. Pierce's Favorite Prescription for the cure of exactly the same ailments for which this world-famous medicine is given.

No other medicine for women's ills has any such professional endorsement as Dr. Pierce's Favorite Prescription has received, in the qualified recommendation of each of its several ingredients by scores of leading medical men of all the great schools of practice. Is such an endorsement not worthy of your consideration?

A booklet of ingredients, with numerous authoritative professional endorsements by the leading medical authorities of this country, will be mailed free to any one sending name and address with request for same. Address Dr. R. V. Pierce, Buffalo, N. Y.

already been made and Hon. W. J. Bowser is to be congratulated on the prompt measures he has taken to prevent crooked work in this province.

## NO SUNDAY GAMES.

Presbyterians Ask President to Stop Practice in Vogue.

KINGSTON, Oct. 22.—At today's session of the Presbyterian synod, of New York and New England it was decided to send petitions to president Roosevelt and after election, to the president elect, asking that he put an end to Sunday baseball in the army and navy and also request congress to prohibit Sunday banking by the government post offices and to compel corporations doing an interstate service to give their employees 24 hours rest every Sunday.

Total	1,830 68,272

The total receipts for the past week were 31,128 tons and for the year to date 1,405,768 tons.

## SNOW AND RAIN.

Tempestuous Weather in Kansas and Oklahoma.

KANSAS CITY, Oct. 23—Tornado reports that snow has fallen almost constantly over that section of Kansas for the last twelve hours. The temperature reached thirty-three degrees. Trains were delayed. At Bartlesville, Okla., the Caney river is two feet higher than at any time since 1855. Rain has been falling along its valley almost constantly for twenty-four hours. North Bartlesville is under four feet of water. At Muskogee, Okla., twenty thousand persons shivered in a cold north wind as a result of the washing out during the night of a gas main across the Arkansas river. A steady downpour of rain that began thirty-eight hours ago continues. Several railway bridges have been washed and many passenger trains stalled near Muskogee.

## SMALLPOX IN N. B.

Sixty Cases Reported at Edmonton—Mild Type.

FREDERICTON, Oct. 22—Dr. B. Fisher, secretary of the provincial board of health said tonight that there were sixty cases of smallpox in the town of Edmonton, N. B., that 25 houses are quarantined. The disease he says is of a mild type and he thinks that it will be prevented from spreading. The only known source of contagion is that of working on G. T. P. construction gangs.

## AEROPLANE MEETING.

Frenchmen to Have Great Competition Next Fall.

PARIS, Oct. 22—The Aero club of France has decided to organize a big aeroplane meeting in the autumn of 1939 when the "Grand Prix" will be competed for. The value of this prize is \$2000 and there will be other prizes. The flights will be judged for both speed and duration.

## Have Killed Trout.

MALONE, Oct. 22—Sportsmen have just discovered that the forest fires in the Adirondacks have wrought havoc among the trout with which many streams throughout the burned section are stocked. Thousands of dead trout have been found in the bottoms and along the edges of the streams and it is believed they have been killed by impurities in the water caused either by ashes or smoke.

## Story is Denied.

NEW YORK, Oct. 22—A story to the effect that commander Ernest E. Starling had collided with an iceberg before he reached Etah recently, told by Henry Johnson, a sailor

## JOIN POULTRY AND FRUIT

MAGAZINES URGE COMBINATION OF TWO BRANCHES

WRITERS POINT OUT BENEFITS TO BE DERIVED

While the Fruit Grower has always contended that fruit farmers should also be poultry raisers, and while we have been publishing poultry articles in a fruit paper, some of the poultry papers have been working on the same line, from the other end, and have been publishing fruit articles in their columns.

The reliable Poultry Journal has been one of the leaders in this, and from this publication we take the following article by Mr. M. S. Gardner, assistant editor, whose article is intended to be suggestive of the form of horticulture which will work best with the poultry industry. Mr. Gardner, the author, grows fruit and raises poultry at Auburn, N. Y., and the article below is from his experience in this work:

The profits to be derived from a poultry and fruit farm depend so largely upon the prices obtained for the products that it is of the utmost importance that these commodities be not only of the highest quality, but placed upon the market in the nicest, most attractive condition. In this, as in all other lines of business, there is always a reward for the man who will do a little extra work necessary to place more appetizing fruit in the hands of the consumer or dealer than his neighbor and places them on the market in better condition, need never look for a buyer; the market will come to him. A basket of large, clean, well ripened strawberries, carefully selected, will sell as readily at fifteen cents as an inferior basket of ten. Plenty of cherries can usually be bought in the Auburn markets for five and six cents per quart, but those from the Gardner & Dunning poultry farm find a ready sale at nine and ten cents. The difference in price is due entirely to a difference in quality and manner of handling. As we sell each from 6,000 to 10,000 quarts, it can readily be seen that the extra three or four cents per quart well repays us for the work of placing them on the market in the best possible shape.

One serious problem to be considered nowadays before engaging in any kind of business, is the obtaining of desirable and competent help in sufficient numbers. This is imperative in the successful growing of cherries and berries, as often a delay of one day in harvesting means a loss of the fruit. For this reason, it is safer, on the average, to employ a few more men than to have a variety of crops ripening at different seasons of the year, rather than to confine one's efforts to one kind of fruit. It might be impossible to find pickers enough to secure the crop of strawberries from a patch of five acres, all ripening at the same time, while if the same five acres were divided into three or four acres, one acre strawberries, one acre red raspberries, one acre of cherries and one acre of tomatoes and asparagus—there would be no difficulty in securing enough pickers to pick the fruit at any different times of the year. Another advantage in a diversity of crops is that it prevents a total failure, as it is highly improbable that all of the kinds I have mentioned would prove a failure in the same season. A late frost might injure a field of strawberries, while red raspberries or blackberries, not yet in blossom, would escape unharmed.

## STRAWBERRIES THE FIRST CROP.

As the strawberries are our first fruit to ripen, I will first take up the cultivation and profitable sale of this crop. It requires more than one season to produce a famous trotter, or even a Madison Square Garden winning chicken, so with a record-breaking crop of strawberries grown in weedy fields with only one cultivation.

One should begin preparing the ground for strawberries at least one year before the plants are to be set. This preparation should consist of a heavy application of well-rotted manure, plowed under and well mixed with the soil, and perfectly clean cultivation of the crops that precede the strawberries. Potatoes and corn are excellent crops for this purpose. Do not let one go to seed on a field or garden plot that is to be set to strawberry plants the coming season. Apply the manure the year before unless commercial fertilizer can be used. In this manner a plant-bed free from weeds can be in readiness for our strawberry plants. Secure plants of a reliable grower. There are dozens of comparatively new kinds far superior to those in use twenty years ago.

April and May, in this state, are the best months in which to set plants. They can be grown in hills or narrow mat rows. If hill culture is preferred, the rows should be 2 to 3 feet apart, and the plants 18 to 20 inches in the rows. Cut off all runners as fast as they appear, in order to throw all the strength of the plant into the building up of the new growth around the original plant. Good crops of fine berries may be grown in this way. If narrow mat rows are preferred, the rows should be 3 to 4 feet apart, and the plants 2 to 3 feet apart in the rows. Some varieties make long runners and will fill up all the space between the original plants, if set the latter distance. If large berries of the best quality are desired, do not let the rows grow wide or the plants too thick in the rows.

## BLACK AND RED RASPBERRIES.

Black and red raspberries are in great demand at remunerative prices. Last year black raspberries sold at sixteen cents early in the season, and the lowest price of the year was 12 to 13 cents. Red raspberries, sold at seven to eight cents. They are paid one cent per quart and make from 50 cents to \$1.25 per day. The cherries are picked with the stems on into quart baskets, and shipped or carried to the local market in quart crates. The pickers are carefully watched, and those who are not near and careful in their work are sent home. About half of our berries are sold in quart crates, the balance shipped to Syracuse and other convenient markets.

## BLACK AND RED RASPBERRIES.

in the strawberry bed—if all weeds are kept out up to the last of September, the bed will then be in good shape for a fine crop the coming year. In this climate it is advisable to protect our strawberries with a mulch of swale hay or straw. The hay is preferable, as it is free from weed seeds that will grow on the upland. The covering should be applied as soon as the ground is frozen solid. In the spring, as soon as the leaves begin to grow, it should be loosened just over the plants so that they can get through. It should be left around the plants, however, as it will keep the ground moist and the berries clean.

## MARKETING STRAWBERRIES.

We now come to the important process of turning our strawberries into the largest possible sum of money. Never hire young children to pick berries. Better pay a cent a quart more and get experienced pickers, or at least those who have picked many quarts of berries. Never pick any kind of berries when the vines are in good shape for future pickings. A careless picker can ruin half the crop by breaking and musing up the vines and leaves at the first picking. Never pick any kind of berries when the leaves are wet with dew or rain. Berries picked when wet look mussy and will not keep.

Each picker should have a carrier that will hold at least four quart baskets. One of these baskets should be used for the small, seedy and muddy berries, and only the perfect ones should be put in the baskets that are to go to the market. We find that seedy or muddy berries will spoil the appearance of a whole basket of fancy fruit. If the berry patch is small and the owner has plenty of time to his disposal, the berries should be set aside in a family where a willing to pay a fancy price for first-class fruit delivered fresh from the farm or garden. If, on the other hand, the strawberry field is large, and time limited, the manager should make his berries as good as he can, at a price several cents above the market. We have no trouble to sell all the fine strawberries that we can produce at fifteen to eighteen cents per quart.

But someone asks, "Will not chickens injure a strawberry bed?" If a fence of poultry netting three or four feet high is placed temporarily around the strawberry bed to keep the chickens out, the bed will be protected. The difference in price is due entirely to a difference in quality and manner of handling. As we sell each from 6,000 to 10,000 quarts, it can readily be seen that the extra three or four cents per quart well repays us for the work of placing them on the market in the best possible shape.

## THEN COME EARLY CHERRIES.

Before the strawberries are gone, the earliest of the early cherries should be there is no more delicious and profitable fruit than the cherry. While the sweet or orchard varieties command higher prices, usually, we consider the tart or pie cherries as the most profitable. They are much more numerous and stand transportation much better. Of the sour varieties, we prefer the early Richmond and the Montmorency Ordinaire. The Richmond is a late variety, but it is the middle of June with us, the Montmorency ten days or two weeks later.

In setting out an orchard of sour cherries, the trees can be set eighteen or twenty feet apart. The ground should be cultivated and kept free from weeds and at least until the trees begin to bear. The Montmorency makes a low top, and can be picked from a step-ladder for a number of years. One hundred trees of one season from our old, produced for us, in 1936, one hundred and fifty bushels of cherries that sold at three dollars per bushel. Our sour cherries are nearly all picked by girls from twelve to sixteen years of age. They are paid one cent per quart and make from 50 cents to \$1.25 per day. The cherries are picked with the stems on into quart baskets, and shipped or carried to the local market in quart crates. The pickers are carefully watched, and those who are not near and careful in their work are sent home. About half of our berries are sold in quart crates, the balance shipped to Syracuse and other convenient markets.

## BLACK AND RED RASPBERRIES.

Black and red raspberries are in great demand at remunerative prices. Last year black raspberries sold at sixteen cents early in the season, and the lowest price of the year was 12 to 13 cents. it is a difficult task, and much of the fruit would be muddy and unsalable. For this reason we tie our Outbushes to stakes driven near each hill, using ordinary binder twine for the purpose. After the young canes are planted off, they should be trimmed off or pruned again until the following spring, but should be allowed to branch out, and will sometimes grow to a height of six feet.

In the spring, after a few warm days, the buds will begin to open on all live wood. Then go over the bushes with pruning shears, removing all dead canes and tops and cutting back the live canes to a height of 3 to 4 feet, leaving not more than four of the most vigorous canes in a hill. A good top dressing of straw manure around the hills each spring helps to retain the moisture and increase the size and yield of the berries. Red raspberries are easy to pick and easily bruised; that if they are to be shipped any distance it is better to pick and ship them in pint baskets rather than in quarts.

## FINALLY THE BLACKBERRIES.

Last, but in my estimation, not least, is the blackberry, the blackberry. Our small patch of Snyder blackberries has probably given us a greater net profit in the last three years than any other piece of ground of equal size on our twenty-acre farm. We find them the hardest of all berries and the surest croppers. Last season we received a maximum of 16 cents with 12 to 13 cents as the minimum, one store taking the rate families who are willing to pay a fancy price for first-class fruit delivered fresh from the farm or garden. If, on the other hand, the strawberry field is large, and time limited, the manager should make his berries as good as he can, at a price several cents above the market. We have no trouble to sell all the fine strawberries that we can produce at fifteen to eighteen cents per quart.

## THEY FIGHT VERBAL DUAL

MINNESOTA AND MARTIN HAVE LATELY TIME IN VANCOUVER

COWAN DEALS WITH THE ISSUES OF THE DAY

The meeting held in Vancouver on Monday night under the auspices of the Trades and Labor Council at which each of the four candidates for that city spoke—proved an interesting one. The candidates drew lots for the order of speaking with the result that Joe Martin opened the proceedings, followed by T. Kingsley, socialist, George H. Cowan, W. W. B. McInnes in the order named.

In the course of his remarks Mr. Cowan said: "Now, if labor is entitled to protection against the greed of capital and alien labor then that protection is the birthright of every Canadian workman. But what protection does he get in Canada under liberal rule? The courts have shown that the alien labor legislation of the Laurier government and its immigration law are not worth the paper they are written on."

He followed with his reference to the easy importation of strikebreakers from American cities. They had not been compelled to undergo the inspection provided in the immigration act, in fact, opened the door to alien labor just as it had to Asiatics. "But Hon. R. L. Borden has promised a rigid and effective alien labor act."

When the applause and discord of dissent had subsided, Mr. Cowan entered upon a merciless arraignment of the Laurier administration upon the fisheries question to this concluding effect:

"The whole of our valuable halibut fisheries have been handed over to the Yankees, while the rest of our great fisheries have been given over to the Japanese."

Concerning the meeting the Vancouver Province says:

The climax in the most spectacular political drama in the history of Vancouver followed, with historic fitness, at its close with William Wallace Bruce McInnes preceding the fall of the curtain. Then an end was put to his outburst of his finger-tips.

"The hand of fate," he intoned with added gestures, "has made me last. But I have holy writ for it that the first shall be last, and the last shall be first."

That tone not being wholly reverent, the great audience renewed a license which chairman Harry Cowan had two hours before summarily cancelled, and a riot of laughter and shouts and cheers again followed. It was apparent that an end was coming to the normal calm that had attended the hearing of Martin and Kingsley and Cowan, a calm frequently threatened but never broken, save at the outset when cowbells, triangles and bachelors in a riot of discord from the upper gallery. It was instantly silenced by the chairman threatening expulsion of the man who dared to repeat it.

Then McInnes stepped over to the footlights, turned dramatically to Martin, the climax came and the calm was broken:

It was a verbal battle such as has not been witnessed in the political arena in Vancouver's history. Facing Martin, McInnes in thundering tones began:

"There are broader issues than the Kelly graft, the McMillan graft, or let me add, the Martin graft. The truth is that Martin is malicious against every one who has turned him down."

When Martin interrupted, McInnes was up in an instant, but was unable to be heard. The gladiators faced each other over the table. The uproar continued. When chairman Harry Cowan had quelled it and demanded that Martin be

**NELSON NEWS OF THE DAY**

W. A. Gallier, ex-M.P., is arranging to open up a law office in Vancouver.

Typographical union No. 340, will hold their monthly meeting tomorrow afternoon.

The Western Federation of Miners will hold a meeting tonight in Miners' union hall.

The employees of the city electrician's department are busy fixing up the lights throughout the city.

The subject of Rev. R. Newton Powell's address in the Methodist church tomorrow evening will be "The Brotherhood of Man."

The Nelson lodge of the United Commercial Travelers will hold their regular monthly meeting in Fraternity hall tonight.

Mrs. J. Patrick has gone to Halcyn with her son Stanley, and is expected to be away for upwards of three weeks or a month.

W. A. Macdonald, K.C., who has been attending the Cranbrook assize, has gone on to Brandon to accompany Mrs. Macdonald home.

R. A. Brown, superintendent of electric light for the city, arrived back from Calgary accompanied by Mrs. Brown on Thursday night.

In the matter of the goods of Helen Twiss, deceased, letters of administration of the estate were granted yesterday to Edward D. Twiss.

The fire brigade was called out by telephone yesterday at 1:30 a.m., some rags having caught fire in the chimney of the Kootenay Lake general hospital. The flames were suppressed without damage.

Rev. Father Atthoff will arrive home from Europe on Monday evening, and it has been arranged that a special deputization will meet him at Kootenay landing to extend to him a hearty welcome on his return.

The students of the Nelson high school held a most enjoyable taffy pull in the east room of the school last evening. Practically all the students were present, and besides the taffy pull there were games. A pleasant evening was spent by all.

According to C.P.R. advice, president sir Thomas Shaughnessy is leaving Vancouver for Seattle and will be in Spokane tomorrow. He will return east via the Spokane International and Crown's Nest railways and will not visit Nelson district on this trip.

The Hume hotel has had a special view installed and the full, complete election returns will be announced in the rooms on Monday next. Special arrangements have been made to the end that those desiring to hear the results throughout the dominion may do so and all will be cordially welcome.

Now that the underwriters have settled the question of insurance, the Wood-Vallance company are removing the damaged stock and other debris from their warehouse, which was gutted by fire early last week and will arrange at once for the erection of a new building in which to store their merchandise.

The election results will be announced on Monday night in the Young Conservative club rooms in the K.W.C. block on which occasion all friends of the conservative party and of A. S. Goodhue will be heartily welcome. Arrangements have been made to keep correct record of the results so that the respective standing of the parties may be accurately known.

Favorable Report.

It is understood that the visit here this week of W. Y. Williams, the well known mining engineer now of Spokane, was to look over the Queen Victoria mine at Beasley Sliding to the west of the city.

The property was bonded last August to New York capitalists, and it was on their behalf that Mr. Williams made his inspection, being accompanied by J. A. Devishon and S. S. Rosenstamm of New York, two of the interested parties. Mr. Williams would not give out any information for publication as to the result of his inspection but it is stated that his report will be wholly satisfactory to the bondholders.

A large force of men is at work on the well known property and further developments are keenly awaited by local mining men.

**MARVELOUS SUCCESS**

C. P. R. Irrigation Lands Make Splendid Record Sales.

CALGARY, Oct. 23.—The feature of the week has been the optimistic statements of Mr. Thomas Shaughnessy in his interview with the board of trade committee, regarding the marvellous success his company has attained in the colonization of the Canadian Pacific irrigation block east of Calgary, and what the development means to the city. The company's sales since the beginning of the year exceeds \$24,000 acres. As compared with the corresponding period last year the sales have increased by leaps and bounds each month. The sales this year are June \$600 acres, July \$500 acres, August \$600, September, \$600 and to date in October \$4,000 acres.

The company's development policy has proved most successful. The acreage broken and seeded to winter wheat under contract for non-resident purchasers, represents

**NEW SURGICAL INSTRUMENT**

Photographs Heart Beats and Diagnoses Disease.

PARIS, Oct. 23.—Paris medical circles are much interested in the invention of the Dutch physiologist, Dr. Einthoven, who has constructed an apparatus which enables heart pulsations to be photographed.

This delicate instrument, the sensibility of which is finer than the human ear, is an ingenious combination of the stethoscope, microphone, phonograph and galvanometer. When auscultation is performed by Dr. Einthoven's invention, a photographic record of the oscillation of a sheet of aluminum shows the nature of the heart beats. Photographs of normal heart beats are very different from those of diseased organs. An experienced operator would be able to tell by examining the photographs, tracings not only whether the heart was unsound, but what was the specific affection.

**FATAL MISTAKE**

Detective Takes Policeman for a Highwayman.

PITTSBURGH, Oct. 23.—City detective Ed. Burns, early today shot and almost instantly killed policeman Thomas Farrell, whom it is said he mistook for a highway man, although the police department refuse to give out any details of the tragedy.

Officers stationed on the north side say that Farrell had just arrested a bar tender and his prisoner was fighting him when Edburne appeared. Farrell fired several shots just then and Edburne opened fire when he reached the pair.

Shoots Graft Prisoner Frisco

**HENEY IS ST**

MORRIS HAAS, JEW AN EX-CONVICT FATAL SHOT—EX COURT WAS INTERESTED OF CRIMINAL.

SAN FRANCISCO, N. J. Heney, graft process and it is believed fatal the court room today who is a member of the Heney is still alive but be dying.

Heney was shot during of the trial of Abraham charge of bribery. At Heney, was still unconscious assistance had no Mr. Heney was shot by who was a venture man graft trial. Haas, who immediately into custody reason for the shooting, ruined him.

The court had taken minutes and the jury had Heney and Rauf's attorney, had just returned Lawlor's chambers where been summoned by the conference. After the and Dozier returned to and Heney returned to seat. He was talking vervisor Gallagher, who viously undergone a examination by Rauf's Haas rushed up out of Haas approached Heney vover against the temple and fired. Hen the desk, blood was wound. Haas was im by bystanders and th empty jury box, where his back until the police Haas, while a year ago, was shot by a severe examination he was being examined. He asserts that "brought out by Heney's results. After the When Heney fell, sl temple, there was an for the assassin who was dued. Dr. Hafink, who building at the time resistance. Heney's central emergency hospital.

Though the bodyguard been constantly employed Heney, were within a shot before any one in realized what was going Haas is a Jewish son a former convict. In a trial he had been passed. There was one day in court, taken at San Quentin, convict garb and with his hands across his chest. When he was discharged from the jail, Haas stated, after "Heney exposed my and ruined my business with him now and I happens to me."

News of the shooting and immense crowds in the corridors. It was a large force of police, Biggs surrounded the court was held and back. A number of ar by the police, who men who were suspected to make trouble.

Mr. Heney is attend geney hospital by Dr. chief surgeon of the pital, E. P. Moffatt, J. O. V. Pinkham, Mr. H her mother hurried to wounded man, as did of St. Ignace church. At 6 o'clock tonight recover said: "I will Haas and Rauf."

The physicians ext ion that the assistant would live. The bullet, which had cheek had lodged on and had not entered ed any important at Mr. Heney was tak of shillings surgeons. It was during a te court and while the prosecution had return room, from a short and Va. Lawler in his, having resumed his and entered into chief clerk McChab of Heney's office. Haas, among the spec Heney and placing a Heney's right cheek the court room was
