Lentze, the minister of finance, according to a Reuter dispatch from Amster diam, made th following statement:

After prophecying that the attacks of Germany's fees would fail before the Briand Ministry, and the premier in particular, is being accused of being too long suffering with the King of the Hellenes. The lobby believes that Constantine is outwitting the Entente Allies and gaining time, while Gen. von Falkenhayn, whose name has been long and expenditures was established on the estimates, this was only in appearance, because many important financial questions had to be postponed until later. ### RAIDER REPORTED OFF BRAZILIAN COAST.

Norfolk, Va., Jan. 17.—Wireless warnings that a German raider was off the Brazilian coast last Friday were picked up here last night. The messages were addressed "to all ships," and were repeated in English and French. They piaced the raider in latitude 7 degrees south and longitude 25 degrees west, which would put her off the Brazillan coast near Pernambuco.

The German vessel was described as a ship of about 4,000 tons, well armed, and with torpedo tubes. She had one black funnel capable of extension, and two masts, and prob-

### FOOD SO SCARCE, BERLIN POTATO RATION UNDER FOUR AND HALF POUNDS, SAYS CORRESPONDENT

Situation in Germany Growing Steadily Worse During Past Six Months-Burgomaster Complains of Larger Towns' Hardships.

The food situation in Germany has grown much worse during the last six months, according to experience of an Associated Press correspondent who has returned from a rip to Berlin. Potatoes are so ration in Berlin was less than four and a half pounds. This is attributed in part to the farmers withholding shipments until February 15, when it is not denied that the potato crop is insufficient to meet normal de-

mands. No cheese has been on the market since August, and eggs are unobtainable except surreptitiously at 16 to 25 cents apiece. Berlin's daily milk receipts are about 850,000 litres

against a normal 1,000,000, and it is impossible to buy clothing, shoes, stockings or blankets except by permission of the police. This latter however, may be merely a precautionary measure, as the shops appear well stocked with clothing. Chief Burgomaster Wermuth, as well as the heads of other cities,

complains that the larger towns are compelled to suffer unnecessary hardships because the system of dis tribution of foodstuffs has failed in many respects. In some cities the situation seems to be better than in others, and a Berlin businessman told the correspondent that he had spent Christmas week in a Rhine and bread without being required to show a bread card or meat card.

Companies Supplying This District Have Heaviest Calls in History.

Owing to the shortage of coal all through this district the natural gas companies have had the greatest demands made upon their supplies in their history. Manager F. B. Tombstated to The Advertiser today that Hamilton manufacturers are at present receiving 7,000,000 feet a day from the Tilbury fields, and in addition all the other points along the line are being supplied. He stated that at ill-sonburg where there has been a shortage, the supply is not from Tilbury but from Vienna. The demand, owing to the severe cold and the shortage of coal, has been very great, and there was not enough gas. New wells are being drilled, and every effort made to get more gas for Tillsonburg.

which gives best results. If you do, you will buy Zam-Buk, for this herbal balm has been proved by thousands to be the most reliable ointment on the market. It not only cures when other ointments fail, but its cures are permanent.

Mr. Isaac L. Phinney, of Lower Five Islands, N.S., writes: "Zam-Buk is, without doubt, the most reliable ointment on the market. For two years I suffered with an ulcer on my leg, which defied all treatments -although I tried many and spent no end of money. Finally I tried Zam-Buk and the results were most encouraging. The ulcer soon showed signs of healing, and perseverance with Zam-Buk worked a complete cure." Zam-Buk is equally good for eczema, ringworm, abscesses, run-

Those papers were addressed to individuals in Ottawa, and it might be worth while to have these persons were their connection with the case. If there are people in Canada who are buying or accepting these papers knowing them to have the series and selections, the reverse has been the case; the "vision in the electoral college and in the House of Representatives is far closer than the popular vote.

On the whole, the Republican party has gathered itself together again only after receiving the telegram telling of her son's illness to give the cook directions for ordering the telegram telling of her son's illness to give the cook directions for ordering and to commit the care of the thirty boarders to her keeping. Then she went to Mrs. Lester's room and told her just because she knew she would feel just because she knew of sympathy and encouragement.

Philadelphia, we find a single paragraph that should force home to all the need for sound thinking in government. In an analysis of the temper and situation of the cabinet ministers and people of his day he wrote:

"The situation of the state, with respect to the internal government, is not more pleasing. Here we find the general disease which infects all our constitutions, an excess of popularity. There is no order that has a will of its own. The inquiry is constantly what will please, not what will benefit, the people. In such a government there can be nothing but temporary expedient, fickleness and folly."

How truly the words of Hamilton, what will please, not what will benefit, the people," may be applied to modern government, local and otherwise! Perhaps never before has there been so much humbug effort to win office as to-day. Proposals which may be advanced in the name of the people by a spectacular manner of promising are all tacular manner of promising haps never before has there been sq day. Proposals which may be advanced Government leaders in Ontario! that the candidates usually care about.

They know that an element in the community is very shallow-minded and may be caught with the high-sounding phrase and by superficial flattery of the people. They make lavish use of every expedient, and unfortunately the civic government cannot be all red-fire ing on their part to a more than equal and circus "ballyhoo," is slow to as- extent

bitter tonic. London's greatest problems were almost entirely lost sight of in the recent campaign, Candidates who took up most of the time at the meetings eried "public ownership" until they were red in the face. "Public ownership" is all very well with proper consideration, but the men who were shouting it most loudly are the least capable of conducting it.

London's level crossings were never mentioned, London's thousands of reeking outhouses remain; London's sewers are clogged and, foul in many districts. The river is an open cesspool. London's duty to returned soldiers, to Belgium, to Serbia and Armenia were not matters by which the selfish element could be inspired. But these things are not municipal nosegays, and most of the candidates were busy trying to please the people, not to benefit them, as Mamilton so simply and forcefully remarked more than 10

that in England alone some \$5,000,000 bushels of grain, and \$60,000,000 pounds of sugar are used in one year to make beer (and it would be interesting to know what Canada is doing along this line), enough sugar to supply every family in the kingdom with \$5 pounds, and that the acreage required to grow this amount of material would grow enough wheat to supply the whole of London (England) the year round.

Not only does the manufacture of intoxicants destroy this great quantity of the two most important articles of food (it might better be burned than used to make beasts of man), but it requires thousands of man to manufacture it who might be employed in the manufacture of other and much needed articles. It uses up tonnage, fuel and power both on land and sea, to distribute, and it slows down the human machine and thus interferes with the powers and efficiency of the men who are doped with alcohol.

To the Editor of The Advertiser:

Being the wife of a returned soldier, and as I consider that my husband is not getting the consideration and treatment he should, I take this opportunity of presenting the facts in his case.

My hustand returned from the front in May last, having been discharged in Occober last from the Convalescent Hospital here.

Since that time he has received no pension, and the family have received no patriotic grant.

# Canada must 'Carry On' If Belgium's Children Are To Be Saved - -

To punish the violation of Belgium and free its land from the Huns has been one of the strongest rallying cries of British and Canadians throughout this war. For it our men have fought hard and long, and, stronger and more determined now than ever, they are "Carrying on"

When the soldiers first went out to fight the despoilers of Belgium, we who could not go undertook to help feed the starving women and children who were victims of German savagery. Are WE carrying on as the soldiers are doing? Or has our enthusiasm cooled our sympathy died out-our help lessened or ceased?

Certainly the Belgians' need of help has not lessened, but rather increased! Three million women, children and old men are depending for food-for life itself-on the Belgian Relief Commission. The Commission in turn depends on us Canadians for a substantial share of the necessary food, or the money with which to buy it. If we fall short in our contributions, thousands of Belgian kiddies must go painfully, if not fatally, short in their food supply Already an alarming number of them, weakened by scanty rations, are falling victims to tuberculosis.

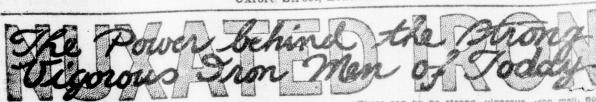

There would be little merit in restoring Belgium to a nation whose motherhood and youth we had allowed to be decimated and weakened by hunger and resulting disease Let us at home carry on the relief work as unselfishly, as steadfastly and as successfully as our soldier boys are carrying on the fighting! If YOU have not been helping, now is

He said a desire to contribute to the conclusion of a durable peace had induced Sweden to enter into relations with other neutrals, especially the other two Scandinavian kingdoms, with a view to common deliberation. "I trust the cooperation already effected," said the king, "will be further strengthened and extended."

To Reduce Cost of Living.

Reference was made by King Gustav to food difficulties arising from hindrances placed on Swedish imports by the belligerent powers, and he announced the intention to submit bills to parliament which would involve heavy state expenditures, alming at reduction of this high prices of foodstuffs in the interests.

The Riksdag today, says Reuter's Stockholm correspondent, King Gustav's
speech from the throne constituted a
serious appeal to the Swedish nation
in the grave circumstances of the world
war.

"To the present," said King Gustav"we have been able by the grace of
God to avoid being drawn into the war,
But the effects of the war none
the less have inflicted upon us many
sufferings, and the longer the war lasts
the greater will become our difficulty.

We cannot shut our eyes to the profound gravity of the present hour."
King Gustav made an appeal for
national unity, and announced the need
of maintaining the special preparations
by the land and see of the stock.

London, Jan. 17.—Money was plentiful and discount rates were dull today.
The stock market is still affected by the war loan, which caused further shrinking in British gilt-edged shares today. Dismond and rubber stocks continued firm, and Japanese and Chinese bonds were well supported. Central Argentine and Mexican rails were again easy, and shipping shares were weak, on the news of further mercantile losses.
American securities recovered with Wall Street, but apart from a small business in the low-priced rails, ruled dull.

Chicago, Jan. 17.—Although reports that many ships bound from South America for Europe had been sunk led to something of a setback in wheat prices today, the market soon rallied and scored a moderate advance. Previous instances of successful German operations on the Atlantic have usually had a decidedly bearish influence, but this time a number of traders took the view that the effect was more in favor of the bull side, as likely to cause an increased demand for wheat from the United States. Leading houses were conspicuous buyers, and offerings were for speculation and export, and and scored a moderate advance. Tells of Hardships in Early Days Here.

Interesting Address at Last Night's Historical Society Meeting.

In an interesting address before the London and Middlesex Historical Society, in the public library, on Tuesday evening, Dr. Cl. T. Campbell told of the pioneer doctors in the vicinity of London, when this city was a village. He paid a high tribute to their heroism and courage in enduring hardships, and told of men who rode in the saddle for days to attend to their patients. Speaking of the doctors of the early days in this section of Ontario, the speaker said very few, or none at all, so far as he knew, came here with the United Empire Loyalists.

Legislation to regulate the practice of medicine was brought in some years before, but had very little effect.

When Delaware was the only sign of a village in this district, a Dr. Duncan came here, but later returned to Brantford where he practiced successfully for a number of years.

Can Find No Record.

About the time the first house was built in London, there is a mention of a Dr. John B. Crouse, but no other record of him is obtainable.

"The first doctor of whom I could find an authentic record is Dr. Archibald Chisholm, who came here in 1828," said Dr. Campbeil. He died in 1830 at the age of 35 years. Dr. Chisholm married a daughter of Dr. Hooker Lee.

Some years before a medical board was appointed by the governor, but had little effect, as it was not necessary to pass its tests before beginning to practice.

About 1832 London had its first epidemic. Principles of sanitation were not understood, and the diseases were usually brought in by immigrants, Quite a number of people died from the cholera, including a Dr. Donnelly who came about that time. Those who died were buried in what is now Callaghan Terrace. Dr. Stimson lost his own wife and daughter, and he left here and settled in St. George, near Paris.

"About the same time that the Blakes settled in Adelalde, a Dr. Phillips came here and lived in a frame house on Maple street, west of Richmond, a house which remains there yet, think," said the speaker.

Dr. Cattermole was one of the next doctors to live in this section. He settled in Simcoe street, near William, and lived here till his death.

Dr. Andrew MacKenzie was educated in the old country. After serving in the rebellion he settled in London in the hirtles. He lived on York street, west of Richmond.
