THE old newspaper definition of a good journalist was a man with a nose for news, but The London Advertiser's requirement is a man with a passion for the truth.

59TH YEAR. NO. 23419

LONDON, ONTARIO, SATURDAY EVENING, AUGUST 19, 1922.

PRICE, THREE CENTS

HURL BOMBS AS RAIL WALKOUT. GROWS

Will Place Order for Five Thousand Tons of Coal

CITY DECIDES TO INSURE WINTER SUPPLY OF FUEL

Municipality to Guarantee London Dealers Against Loss by Action.

MERCHANTS TO SIGN BOND

Claimed Enough Wood in London to Keep Community All Season.

Placing of an order for 5,000 tons of the best coal available at once by the city of London, which the coal dealers have agreed to take in proportion to their tonnage, and deliver to city homes, was decided at a conference between coal merchants, Mayor Cameron Wilson, and the Chamber of Commerce Friday afternoon.

Guarantee Coal.
The city will guarantee the coal dealers against loss, and a committee of these businessmen, consisting of J. G. Orchard, John Daly and Douglas Hunt, has been appointed to advise Mayor Wilson as to the best sources and types of coal to be obtained.

In the opinion of the conference, the public must accept whatever coal is obtained as a substitute for anthracite, or accept the alternative of forfeiting a warm fire in the furnace this winter.

After discussing the matter informally for one hour, the delegates present at the conference were unable to reach a solution to the probable coal shortage in London, but following Mayor Wilson's suggestion, the dealers went into a round-table discussion of the question and reached the decision as outlined above.

Urged to Get Fuel.
Ald. O. I. Cunningham, who represented London at the conference of Ontario municipalities held at the call of J. E. Ellis, provincial fuel controller, at Toronto, Thursday afternoon, reported that the conference advised the coal merchants to handle the situation if at all possible. If not the city was urged to obtain fuel.

"We have got to have a guarantee from coal dealers that citizens will get some coal, otherwise we will go into the coal business, much as we dislike it," declared Mayor Cameron Wilson in opening the discussion.

"If enough dealers club together and get coal you will be protected," said Ald. Oscar Cunningham. "The fuel controller will not allow any other coal sold until your emergency supply is disposed of."

John Daly stated that in the fuel famine of 1902 he had a supply of good lump coal, and lost money on it. He could not suggest any solution to the problem in view of the many factors of uncertainty entering into the matter.

Drifted to Europe.
Ald. Cunningham pointed out that many miners in the United States have drifted to Europe since the strike, and that this will necessitate a delay in obtaining fuel even after the dispute is settled. J. G. Orchard opined that the coal dealers were better enabled to look after the trade than any other parties.

He ventured the opinion that the arrival of 10,000 tons of Welsh anthracite coal for the McClary Manufacturing Company next week will ease the situation here, adding: "That will care for a lot of people. That coal will not stop at the foundry."

"That there is an ample supply of wood to solve the fuel problem this winter in London was the statement of a representative of the Jenkins Fuel Company.

"The dealers of London have enough wood to keep the whole city going all winter," he asserted. "I take issue on that. The constitution of the country says the people can have the best for their money, and I don't care what the fuel controller says."

Details regarding ordering of the coal and the protection to dealers in case anthracite coal is available before the emergency supply is disposed of will be worked out by the merchants' committee in co-operation with Mayor Wilson. The latter official made it plain to the merchants that they must sign a bond agreeing to take the coal from the city on delivery in order to protect the ratepayers from financial loss.

Will Give Automobile to Pope Benedict.

ROME, Aug. 19.—Pope Pius is to have an automobile. The people of Milan, where the pontiff was archbishop before his election, have presented him with a machine of the latest Italian model. The pontiff, it is said, will use the car within the Vatican gardens, which he now circles twice daily in his promenades, a distance of three and a quarter miles. This is the first time a pope has ever owned an automobile.

MINES DAMAGED BEYOND REPAIR

Officials Report Some Nova Scotia Pits Can Never Be Opened.

Government to Man Pumps Under Special Police Protection.

Sydney, N. S., Aug. 19.—The end of the fourth day of the Nova Scotia coal mine strike saw the collieries in the Southern Cape Breton county coal area being invaded more and more by water and gas, and company officials reported grave damage, and stated that some of the more worked-out collieries would never be opened again.

The Nova Scotia government, according to the statement of Hon. E. H. Armstrong late last night, to protect the mines will man the pumps under the protection of special provincial police. It is not known definitely when pumping under government protection will begin.

The 22nd Royal Canadian Regiment from Quebec was added today to the military forces at New Aberdeen, after being twice held up while passing through the coal strike territory. There have been no disturbances of moment to date. The mines in the Northern Cape Breton county are being kept out of danger by company officials. At Springhill and Stellarton on the mainland, the mines and company have come to an agreement for protection of the mines.

REBELS ENGAGE FREE STATERS NEAR DUBLIN

DUBLIN, Aug. 18.—An engagement lasting two hours occurred early today between National troops and irregulars at the Beggars' Bush Barracks on the outskirts of Dublin.

The irregulars attacked from the roofs of houses, from the railway line and other positions. The Free Staters relied from within the barracks, but beyond alarming the civilian inhabitants nothing serious was reported. No details of casualties were available this afternoon.

ADMITS KILLING BROTHER-IN-LAW BY KICKING HIM

Hillcrest, Alta., Aug. 19.—Nick Joy, his wife, Mary, and Sam Villa were committed for trial at the preliminary hearing here yesterday on a charge of murdering Sam Joy, brother of Nick Joy, on July 26 last. Mrs. Joy gave herself up to the police, confessing that she had killed her brother-in-law, Sam Joy, who had assaulted her. She had done the killing one week before her confession, the body lying in the Joy house during the entire week after death. When questioned she said that she had kicked her assailant to death.

The police do not credit the evidence, as Mary Joy is a frail woman, weighing less than 90 pounds. Sam Joy was a comparatively big man. Because of the unlikelihood of the tragedy occurring in that way, the police also arrested her husband and also Sam Villa, who was in the house near the time of the tragedy.

Arrest Millionaire Operator For Issuing Worthless Check on Bank

DETROIT, Aug. 18.—John P. Hehl, millionaire realty operator, is out on \$1,000 bail today, because he gave a check to his well-digger for \$20.35, which was not honored at his bank.

The trouble began with a well that wouldn't work, and ended Thursday in a complaint against Mr. Hehl made at Milford, Oakland County, where the Hehl summer home is located. Olie Morrison, the well digger, was the complainant.

Mr. Hehl explained all about the check for \$20.35 at his office at 1205 Griswold street today. In April Morrison repaired a well on the Hehl estate. The bill was \$20.35. Mr. Hehl sent a check for the amount the next day.

The next day my caretaker telephoned me that the well didn't work," said Hehl. "That made me angry so I ordered the Commercial State Savings Bank to stop payment on the check."

He then told the well digger that there would be no pay until the well worked. In July Mr. Hehl said he closed his account at the bank on which the check was issued.

Wednesday Hehl was requested to appear at Milford before the magistrate. When he arrived he found he was charged with issuing a check on a bank in which he had no funds.

Dogs That Defended Mistress Against Attack Executed

SACRAMENTO, Cal., Aug. 19.—Mrs. Mabel Belardi's dogs paid with their lives for their faithfulness to the mistress at whose frightened cry when attacked, she says, by Albert Bise, a neighboring ranchman, the entire pack of eight-year sprang on the man and almost tore him to pieces.

Louis Belardi's dogs had long been known around the town of Antelope for their ferocity. On all ranches in the vicinity they were feared. Belardi and his wife loved them, however, and though the Belardis were too poor to feed themselves, took good care of them.

Bise, whose place adjoined the Belardis', had been keeping the couple, according to his own account, in enough to eat, but a few days before his death he told Constable Davis, of Antelope, that he intended to cut off the supplies. When shortly afterward his body, terribly mangled,

was found in his cabin, it was suspected that the Belardi dogs had killed him. An arrest followed, and after prolonged questioning Mrs. Belardi, breaking down, confessed, according to Sheriff Ellis Jones. She and Bise met at the well used by both ranches, according to her alleged confession.

They quarreled, and Bise, she declared, snatching up a club, threatened to strike her. He had known him for the past ten years, during which period, he related, Coyne had labored but lightly, and was usually noticed about with loose characters, both men and women.

Sergeant William McCullough, relating in a similar manner, testified that he had known the prisoner for the past 17 years, and had himself arrested him about a dozen times.

Sergeant William Middaugh added the information that he always noticed Coyne loitering about the streets at all hours of the day or night with questionable characters. P. C. Percy Last said that he also knew the prisoner for about three years, and had arrested him upon certain occasions.

The defendant protested that he always worked when he got the chance, but was handicapped considerably by a sore hip. "These people are just lining up and trying to put me down," he declared.

CANADIAN RAIL REVENUES RISE

Grand Trunk and C. N. R. Lines Show Marked Increases For Month.

C. P. R. Receipts During the Same Period Indicate Quarter Million Decrease.

OTTAWA, Ont., Aug. 18.—(By Canadian Press.)—Revenues of the Canadian National and Grand Trunk Railways during the month of May increased, while revenues showed a decrease on the Canadian Pacific, according to the bulletin of operating expenses and revenues of Canadian railways issued tonight by the Dominion Bureau of Statistics, transportation branch.

Canadian National Railways showed an increase in revenue during the month of \$1,344,990, or 15 per cent increase in freight receipts, which increased \$1,702,939, or 23 per cent, with an increase of 41.5 per cent in revenue ton miles.

Grand Trunk Railway had an increased freight traffic of 17 per cent, increasing the freight revenue \$166,014, or 4 per cent, but passenger traffic fell off 4 per cent, and passenger receipts \$168,963, or 14 per cent, the total decrease in revenue being \$175,034, or 3 per cent. Operating expenses decreased \$481,420, or 8 per cent, giving a net operating revenue of \$610,507, and an operating profit of \$150,000.

WOMAN COP FINDS JOB TOO TOUGH

Desluch, N. D., Aug. 19.—Mrs. Bertha Ward, elected village marshal last spring when a complete feminine administration was swept into office, has surrendered her star to the village council because a "drunken man or someone acting in a disorderly manner would just laugh at me, and I was helpless." Her husband favored her resignation. "The job is too tough," Mrs. Ward said today.

SAYS AUSTRALIAN PREMIER LUCKY

London Saturday Review Sure Hughes Has Many Anxious Moments.

London, Aug. 19.—(Canadian Press Cable.)—The Saturday Review says the luck of Premier Hughes of the Australian Commonwealth has passed into a proverb in Australia. During the present session of the federal parliament he had triumphantly surmounted crisis after crisis, the Saturday Review says, though on several occasions this was accomplished by no more than one vote. The opposition consists of the Country party and the Labor party, and there is trace of disaffection in Premier Hughes' own party, but the Country party is not keen to see the fall of Premier Hughes, which might result in a Laborite victory. The Country party and Labor party have little in common.

The Saturday Review asserts that Premier Hughes, who is extremely able, seems to be fairly safe in the saddle, but adds that he can scarcely escape having anxious moments.

CURRYGAME HOUSE BURNS

Belfast, Aug. 19.—Currygame House in Longford, birthplace of the late Field Marshal Wilson, was destroyed by a fire of incendiary origin yesterday. The house lately has been the home of Field Marshal Wilson's brother, James MacKay Wilson.

Summer residents of Erie Rest, Port Stanley, were treated to an amusing entertainment Friday afternoon, and at the same time were accorded a demonstration of the "treat 'em rough" methods employed by some men toward their life partners.

A resident of one of the cottages on Erie Rest had "a tiff" with his wife Thursday afternoon, and as they made no effort to disguise the fact the neighbors "listened in."

Finally, friend wife apparently got the best of the argument, and in desperation the man in the case picked her up in his arms and, carrying his spouse down to the beach, threw her bodily into the lake.

This sudden immersion in the waves cooled the hot words and settled the dispute, which it is said gave birth to several miniature debates among the neighbors as to whether the cave-man tactics were warranted.

HEARS SHERIFF IN WILSON CASE

Los Angeles Jury Listens To Description of Attempted Jail-Breaking.

Deputy Official Testifies At Trial of Former London Evangelist.

LOS ANGELES, Aug. 18.—An account of an attempted jail break was given today in the superior court here by R. H. Wright, a deputy sheriff, in the trial of Herbert Wilson for murder.

Wilson is accused of having shot down Herbert Cox, as the two of them failed in an attempt to escape from the county jail here last April. Wilson was once a clergyman in London, Ontario.

A "bridge of sighs" leads from the jail to the courtroom, and the sheriff had been told the escape would be attempted by that route.

Wright told of seeing the men work at bars and screens leading to this bridge, and finally of seeing Eddie O'Brien, one of the prisoners, emerge. The deputies in the next room began shooting with rifles, and O'Brien jumped back out of the range. The deputies then approached the bridge and heard a revolver shot. Then they found Cox on the floor with Wilson standing over him and a revolver lying nearby. They took Wilson and O'Brien back to jail and questioned them.

Asked what Wilson's demeanor was when they found him with Cox's body he replied: "Just about like it is now."

Wilson has been unusually cool and untroubled in the court room.

OTTAWA PUBLISHER DIES

Ottawa, Aug. 19.—At the advanced age of 85, James Thomas Pattison, veteran printer and publisher, died here last night after only two weeks' illness. He founded the Pontiac Advertiser 50 years ago.

WAGES WAR ON CITY VAGRANTS

Court Sentences W. Coyne to Six Months at Jail Farm.

Authorities Declare Accused Seldom Worked and Loitered on Streets.

Reiterating his determination that the city of London "shall be rid of those persons who will not work, but hang around drinking bad whiskey, Jamaica ginger, Florida water, or anything that they can obtain," Police Magistrate A. H. M. Graydon, in the city police court Saturday morning sentenced William Coyne to six months at the provincial jail farm.

"I find you guilty of the charge of vagrancy," the magistrate declared. "There are a number of men like you in this city, who have been convicted time and again, but it seems to do them no good. If you can't get whiskey to drink, you drink eau de cologne or the like. It is about time that London was well rid of you. Six months."

Opening his campaign in this respect a week ago, Magistrate Graydon sentenced two other old offenders to similar terms at the jail farm.

From the evidence submitted it appeared that Coyne was fairly well known to the members of the police department. Sgt. James Oakley, testified that he had arrested him at one of his favorite haunts, the corner of King and Richmond streets. He had known him for the past ten years, during which period, he related, Coyne had labored but lightly, and was usually noticed about with loose characters, both men and women.

Sergeant William Middaugh added the information that he always noticed Coyne loitering about the streets at all hours of the day or night with questionable characters.

P. C. Percy Last said that he also knew the prisoner for about three years, and had arrested him upon certain occasions.

The defendant protested that he always worked when he got the chance, but was handicapped considerably by a sore hip. "These people are just lining up and trying to put me down," he declared.

CAN SELL BEER, IF QUALITY GOOD

Johnstown, Pa., Aug. 19.—Brewers and saloon keepers of Johnstown have been notified by Mayor Joseph Cauffman that they may "manufacture good beer," and if they sell "poor beer" they will be arrested. The mayor said he took the step to see if he could not "rid the city of bootleggers, who have been selling poisonous liquors at fabulous prices."

WOMAN SENT BACK FOR ONE WEEK

Adjudged insane while in the United States, a woman resident of Amherstburg was brought to this city on Friday by an immigration officer and remanded on Saturday for a week by Police Magistrate A. H. M. Graydon in the city police court. The police were directed by the Ottawa authorities to hold her here pending further instructions.

MONTREAL BENDS TO WISH OF CANADIAN RAILWAYS

Montreal, Aug. 19.—Upon the protest of the Canadian National, Canadian Pacific, Grand Trunk and other railways, as voiced through the Railway Association of Canada, against the proposed reversion of this city to standard time on Sept. 1, the city council yesterday agreed to let summer time remain effective in Montreal until Oct. 1, as originally resolved early this year.

Will Admit U. S. Coal Into Ontario Only on Signed Order From Ellis

TORONTO, Aug. 18.—Coal can be brought into Ontario from the United States only on a signed order from the fuel controller and then only fuel that is absolutely necessary for immediate consumption.

None can be obtained at present for storage purposes or household use, but only for use in hospitals and other similar public institutions and for manufacturers who have quantities of perishable goods on hand.

J. A. Ellis made this quite plain today when discussing the statements of W. C. Cox, president of the local coal wholesalers, who said that there was any amount of American bituminous coal available. Mr. Ellis stated that he had been informed from Washington that any misuse of fuel orders might result in a cutting off of the supply.

Mr. Ellis is going to Ottawa tonight to confer with the federal committee and it is expected that a joint statement will be issued within a few days.

It is understood that the Provincial Government will be asked to take with Ottawa the question of a reduction on freight rates for wood fuel and the matter of duty on Welsh coal coming in.

Burmese Romance

MISS SYLVIA HELEN FORDE of England is to marry Prince Maung Maung Gyi, of Mandalay, son of Theebaw, last king of Burma.

SPECULATES ON TIMES' FUTURE

Press Hints That Lord Rothermore May Succeed Northcliffe.

Outlook Suggests That British Museum Is to Take Over Journal.

London, Aug. 19.—(Canadian Press Cable.)—Much speculation concerning the future of The Times is being indulged in. Many people think that the late Lord Northcliffe's interests will come under the guidance of his brother, Lord Rothermore.

The Outlook, a weekly democratic review, suggests that if this is the case, The Times will lose a certain amount of distinction, and recalls Lord Rothermore's principal feat in journalism as the "canonization of the Bottomley." In this connection the Outlook refers to the fact that Bottomley, for a long time, was the featured writer of Lord Rothermore's Sunday papers.

Sir John Ellerman has a large interest in The Times.

The Outlook, a weekly review, suggests that Lord Northcliffe, at one time, had an idea of leaving The Times' future in the hands of the trustees of the fact that Bottomley, promoter or speculator, The Outlook regards the death of Lord Northcliffe as being likely to prove a benefit to The Times, which of late years, according to The Outlook, has become tinged with his prepossessions and involved in his feuds. "It may, in the future," The Outlook says, "more correctly represent the average opinion of the solid classes, and be what it latterly ceased to be, a fairly accurate barometer for foreigners of British opinion."

BUDAPEST METAL WORKERS STRIKE

Budapest, Aug. 19.—A strike has been declared involving approximately 30,000 metal workers. It is ostensibly in support of demands for more pay, but an attempt to gain political power is hinted at.

STRIKERS TAKE VIOLENT MEANS TO GAIN ENDS

Outbursts Reported at Scattered Points From Coast to Coast.

TRAIN CREW ESCAPES

New Complications Arise in Missouri Pacific Circles.

Chicago, Aug. 19.—With railroad peace apparently hanging in the balance until next Wednesday, when spokesmen for the railroads and striking shopmen are due to meet again, dynamite and violence featured the strike activities of the past 24 hours.

Outbursts occurred at scattered points from the Atlantic to the Pacific. Bombs were thrown into the Atchison, Topeka and Santa Fe yards at Albuquerque, N. M., and a heavy blast rocked the trestle of a Chesapeake and Ohio railroad bridge near Huntington, W. Va., early today. According to early reports, neither explosion caused much damage.

Dynamite tore up the track of the Illinois Central at Paducah, Ky., just ahead of a coal train. Two passenger trains and a freight had passed a short time before and the explosion burst behind a bridge crew. The oncoming coal train was flagged in time to prevent a wreck. Illinois Central detectives expressed the belief that the dynamite was placed on the tracks in an attempt to wreck the bridge train on its way to make repairs.

All available United States deputy marshals in the district were rushed to Shawnee, Okla., early today to guard against violence in the shops of the Chicago, Rock Island and Pacific.

Transportation difficulties, due to unauthorized strikes of train crews, continued to clear away rapidly as the trainmen returned to their jobs in most places where walkouts occurred.

New complications on the Missouri Pacific arose when ninety per cent of the Brotherhood of Railway Clerks employed on the road voted in favor of a strike. It was said that no walkout was contemplated until further attempts at settlement of controversies were made.

Similar marches to London from other parts of England are promised by the organized unemployed, who believe that this makes excellent propaganda. The Birmingham "hikers" signed on at every labor exchange which they passed on their journey to the metropolis, this being partly by way of maintaining their contention that the exchanges are useless. "The Welsh miners' choir is meeting with a favorable reception in London, where the choir is singing for the purpose of relieving the distress among the children of over 100,000 workless Welsh miners. The choir itself has suffered much privation during its journey through the country." Last week the members had only one meal daily.

BIRMINGHAM IDLE MARCH TO LONDON

Unemployed Present Case to British Minister of Labor.

London, England, Aug. 19.—(Canadian Press Cable.)—The unemployed men of Birmingham marched to London and interviewed the minister of labor, Rt. Hon. T. J. MacNamara, yesterday, with reference to the question of employment. The minister expressed the hope that the export credit scheme, under which the expenditure of £16,000,000 has been sanctioned by the government, would do something towards getting trade moving again and improving conditions generally.

Similar marches to London from other parts of England are promised by the organized unemployed, who believe that this makes excellent propaganda. The Birmingham "hikers" signed on at every labor exchange which they passed on their journey to the metropolis, this being partly by way of maintaining their contention that the exchanges are useless. "The Welsh miners' choir is meeting with a favorable reception in London, where the choir is singing for the purpose of relieving the distress among the children of over 100,000 workless Welsh miners. The choir itself has suffered much privation during its journey through the country." Last week the members had only one meal daily.

EXEMPT PART OF INCOME. Ottawa, Aug. 19.—The assessment commissioner of Ottawa has finally decided to exempt from the taxable income such portion of the salaries of federal employees as is retained by the government as superannuation or retirement deduction.

The Weather

FORECASTS.

Today—Moderate to fresh northwest winds; fair, cooler.

6 Sunday—Moderate winds; mostly fair and cooler; showers in some localities.

LOCAL TEMPERATURES.

The highest and lowest temperatures recorded in London during the 24 hours previous to 8 o'clock last night were: Highest, 87; lowest, 69.

The official temperatures for the 12 hours previous to 8 a.m. today were: Highest, 70; lowest, 63.

Barometric Readings. Friday—8 p.m., 29.11. Today—8 a.m., 29.12.

TWO

WILLIAM TITE DEFENDS ACT

Answers Arguments Against Provincial Adolescent School Measure.

Well-Known Labor Representative Replies to Chairman E. Smith.

At the last regular session of the Trades and Labor Council, the adaptability of the adolescent school attendance act was the subject of a thorough debate. Edwin Smith, chairman of the board of education, leading in the argument against certain clauses of the act in question.

William Tite, machinist delegate to the council, led in a defence of the legislation, lauding the provincial administration for the passage of the same.

His address follows:

The national welfare should be the first consideration of the various legislatures. And parents and employers of labor should be in their own interests be subservient to the commonwealth of the community. A nation cannot have real prosperity if the working people are becoming a race of degenerates. A nation cannot be judged by the financial statements that appear in journals from time to time, but by the "health, intelligence and education" of the inhabitants. To get the best results of this basic principle one must commence at the birth of a child, viz., the pre-natal period of the child.

The first claim of the child upon society is proper care while a helpless babe. He was not consulted in regard to coming into existence, and had no power to will or forbid this event. The individuals who are responsible for his birth have therefore incurred the responsibility of its well being. The child has a right to a fair chance of life. If parents are delinquent in giving their children this opportunity, it is the clear duty of the state to interfere in behalf of defrauded childhood.

The duty of society to the child must be extended, because parental neglect imposes great social loss and cost to civilization. Nothing militates against future industrial and social efficiency as does the absence of health. Without health, education and training are almost impossible, and the physical and mental faculties are permanently impaired.

Boys need to be given the opportunity to grow up into robust men, and as to girls, physical training and muscular exercise are even more necessary, especially since the tendency of society has been to retard that symmetrical development which our future mothers need. The keen competition of today and the new demand of social and industrial life demand that the growing child must demand that he be physically prepared to meet the exigencies of a new era, otherwise he will soon join the ranks of the great and constantly increasing army of the unfit and unemployed. The movement in favor of medical inspection of school children is a case in point.

The legitimacy of the prohibition of child labor is in part based on the physical injury which such work entails, the pernicious influence of factory life upon the immature and undeveloped body, and the inability of the plastic and growing body to withstand the arduous task of continued manual labor. That the child must not be compelled or allowed to sacrifice his health for the mere pittance which he earns is now generally accepted.

"The Right to Play."

All animals play. Play is likewise one of the fundamental instincts of the child. If there are any inherent rights of childhood, the right to play is one of them. It is unquestionable that play promotes physical and mental development of the child, and that it is no mean factor in his social and moral elevation. The ancient attitude toward play was that of toleration of the high spirits of the growing boy, the utilitarian function of play was undreamed of. The physical weakness of the child and his incapacity for concentrated thought and endeavor saved to him the enjoyment of play until his parents could use his services in some gainful occupation. Work to be substituted for play should not be tolerated, and even at the present day its value is minimized by many who do not recognize its varied functions. The backward child, through the influence of play, accelerates his feeble intellectual development and becomes capable of better work. The normal child adds new mental qualities, such as initiative, alertness, mental ability and foresight. The need of alertness stimulates the child to activity, and the task of solving the problems which every play presents require a fresh display of initiative for each added instance. The quality of leadership develops, and this requires constant planning and

Thousands Left Discouraged As Cupid Quits Job in Court of Love

HAMMONTON, N. J., Aug. 18.—Hammon's "Cupid's Court" blew up with a bang today, and the 2,000 persons who applied to the Co-operative Lovers' Union for mates will have to go out in the open market.

The wholesale attempt at mail order matrimony fizzled when Mrs. Helen Long Rodgers, the judge, announced she was through, or her husband made the announcement for her, and the jury went fishing.

The use of judgment. Play does not imply complete mental relaxation. The mental development of the child is merely hidden behind a mass of pleasurable sensations. Therefore the ethical values of play must be carefully guarded, and, in consequence, must receive the attention of every student of society. The playground movement is alive with tremendous social possibilities.

"The Right of the Freedom From Work."

Prominent among the rights of the child must be the right to abstain from the task of earning money, either for his own support or to increase the family income. Premature child labor is an absolute evil, and is wholly without justification. Employment of children under a certain age in factories, mills, workshops, mercantile establishments, and the steel trades inflicts irremediable consequences. Among the principal results of such premature child labor are: The damage to the health and physical development; the loss of future social and industrial efficiency; the incentive to criminality afforded and the consequent moral degradation. The question of child labor is, therefore, fraught with deep meaning for future generations and has become an important social problem. The enlightened view of today refuses to regard the child as a mere commercial asset of the parent. On the contrary, until children reach a certain age, it is absolutely necessary that they be supported by their parents, and society must enforce this obligation. The child, as an interest-bearing capital, has no place in the enlightened civilization of our industrial age.

"The Right to Education."

The educational advantages which society must grant to the child are at least threefold, literary and industrial training, moral education, and a knowledge of the elements of sex physiology. Without extensive developments along these lines, many social evils will remain to retard the progress of mankind. The training required must be the direct occupational need of the child, otherwise it is only a half-way measure and society has not fully discharged its obligations. Machine production and the consequent extensive division of labor necessitates some preparation for trade life. The growing problem of unemployment cannot be solved unless greater attention is paid to the untrained child. Low wages and shameful conditions of living are partly due to defective education. Society must furnish the individual with the initial equipment necessary for a life of usefulness and profit. The most important step in the direction of equalization of opportunity is training for industrial efficiency. But the other interest of the child should also receive due recognition, therefore literary training cannot be neglected. Recent developments also demand a revision of the methods pursued in providing our youth with a moral education. "The child is the unshaped marble out of which is hewn the virtuous man or the criminal. Shall no one superintend the sculptor's work?" The results of improper and insufficient moral training are already too evident. By providing effective moral training for the child society can prevent such criminality as is due to wrong methods of training, and so much at least the present owes to the future.

A form of education that is now demanding increased attention is directed education along the line of sex physiology. So direful has been the consequence, especially to the female sex, of the absence of needed knowledge, that advanced thinkers are justly demanding reform. The adolescent youth of today should be protected from the bitter results of an ignorance which depends on the mistaken ideas of parents and upon the failure of the schools to appreciate the problems. The physical welfare of society, the happiness of the home, and the emancipation of the women depend in large part upon sufficient, rational, and timely instruction in this subject. It is a child problem, because the instruction cannot be delayed until the young mind is blackened by the evil teaching of the vicious. The duty of society to care for the child admits of no controversy. Children come into the world not of their own accord, and society must grant to them opportunities for a useful life. The bad effect on bodily growth and physiological development is one of the most important objections to child labor. In childhood the foundation is laid for strength, vigor and general healthfulness. Activity is the keynote of this development, but this does not imply that the work in the factory will furnish the needed exercise. The vigorous man requires a symmetrical

Thomas Dekker, secretary of the union, and originator of the movement, frankly didn't know how it was all going to come out.

Furthermore, if Dekker did secure another jury he would probably have to hold his sessions in a tent. For Henry J. Culshaw, manager of the Palace Theatre, where "Cupid's Court" was held for two days, stated "there will be no more 'Cupid's Court' in my theatre except over my dead body."

development, and this can only be done by combining the use of all the four hundred muscles of the body. By means of play, exercise, outdoor sports, and other similar activities, the child develops brain, nerves and muscles, promotes a good circulation of the blood and compels nature to provide a strong and adequate physical structure. Industrial capacity depends upon this development. The need of strong men and women in industry is greater than ever before.

Heart diseases, such as angina pectoris, heart disease and Bright's disease are increasing their proportion of fatalities. The stress of the factory and workshop shortens the trade life of thousands of laborers. After the age of 45 and the individual who has not established himself or loses his job has a hard time of securing a position in the industrial system. There is a large group of confessedly dangerous trades, besides many others that slowly undermine the strength and vitality of the worker. The average physical requirements are, therefore, much higher in all industries than formerly. During the period of its growth the body of the child is more or less plastic. This susceptibility to external impressions and the long years of plasticity make the highest degree of plasticity possible or under untoward circumstances may cause the individual's ruin. At the age of puberty the body undergoes a considerable transformation and injuries often leave permanent effects. The boy is harmed by improper development, but the girl suffers more severely from the effects of unnatural activities at this period, and overstrain is especially dangerous. The muscles are easily affected, at about the 15th year, as it is the period of their hardening, and the excessive strain may produce a tension which will prove permanently injurious. The child may also become dwarfed or stunted. The physical decline of the English people is in a large measure attributed to child labor. The seeds of child labor yield a harvest of physical degenerates. The working child becomes anemic, and the various organs of his body receive insufficient nourishment. Muscles in certain parts of his body are overdeveloped, while others, owing to their weakness and lack of exercise, fail to develop and the child becomes deformed. Work, as carried on in modern industry, cannot perform the beneficent function of play. Certain specific conditions of child labor are especially harmful. The constant standing to which many children are subjected is the cause of very injurious results, and in some industries girls are often compelled to stand for hours at a time. Besides, acquiring flat feet and placing excessive strain on certain muscles, the girls frequently suffer from internal derangements. In the candy and paper box factories as well as many textile mills, standing is common, while in stores small girls are almost invariably on their feet. The bundle wrappers often stand in one place all day. Rest while at work depends on a change in position, and the use of a new set of muscles, so as to allow the wearied ones to recover from their fatigue. For this reason constant sitting is nearly as laborious and tiresome as the standing posture and frequently involves a cramped position, which injures the lungs and prevents the full development of the chest. The worker subjected to these conditions are very susceptible to the various lung diseases. The cramped position which constant sitting necessitates also tends to deform the growing child. In certain industries are by nature injurious to the worker, and especially to the growing child. Among these are certain industries in which a large amount of dust is formed. Boys working in coal mines; coal dust fills their lungs and stunts their growth. In textile mills lint and dust are injurious. The air is breathed by the child, the lint penetrates to the lungs, and can with difficulty be thrown off. Therefore, the child is constantly inhaling a substance, wool dust is especially harmful. The dust of tobacco leaf is injurious, because it contains a poisonous substance. The effects of the dust on the child are the development of nervous affections and nausea, more frequently among girls than boys. A predisposition to disease is also developed, and even adults suffer from the effects of work in tobacco factories. This is especially true of the smaller shops, where the child is frequently found. Injurious dusts are common in mills of various kinds, and in all cases the child suffers more severely than the adult worker because of the physical immaturity. Rapid variations in temperature in glass works, where boys work close to a furnace, and others run to and fro, and thus alternate between hot and moderate air; the excessive heat, the cooler air and the drafts combine to undermine the health of the boys. In candy factories, rooms are heated or cooled to required temperatures. The cool room is more unhealthy, as the girls employed do not exercise the necessary precautions against the cold. In laundries the heat, and girls breathing the steam, and the long hours in summer months, when frequent fainting occurs, both children and women suffer from this misfortune. Moisture is another cause of physical discomfort. Dr. Sewall, in her investigations, found barefooted girls in some of the spinning rooms, while in others girls wore rubbers to protect them from the wet floors. In bleacheries, half-naked boys tramp cloth in deep vats. Varnish and paint also injure boys. It is true that many times children do not appear to be injured by factory life, but are nevertheless physi-

cally affected, and when older reap the results. Resume: The emphasis which is increasingly placed on good physique and growing need of this qualification demonstrates the importance of the consideration of the physiological effects of child labor. For in this phase of the problem lies much of the rationale of stringent child labor laws. Premature employment during the day or employment at night paved the way for those physical disabilities which result in an early incapacity for self-support or in excesses of divers kinds which hasten the breakdown of the individual. The conservation of energy and the production of the best types of physical vigor are inextricably necessary in the complicated civilization of today. Both economic and social conditions require high standards of physique, and the following summary of the physiological effects of child labor will indicate the various results which must be prevented if we are to retain a vigorous manhood and womanhood:

- (1) Physical development is retarded or entirely stopped.
- (2) The muscles remain weak, anemic conditions ensue and nervous excitability results.
- (3) Cramping leads to tuberculosis and insufficient chest development.
- (4) Certain postures produce lateral curvature of the spine.
- (5) Pelvic disorders occur among girls who are subjected to constant standing.
- (6) Slow devitalization follows the inhalation of poisonous substances.
- (7) The child does not develop symmetrically and deformities follow.
- (8) In overtime and night work, all the bad conditions of day work is aggravated.

KITCHENER GAINS LONDON FACTORY

Special to London Advertiser. KITCHENER, Aug. 18.—Kitchener secured a new industry today, when the North American Cigar Company, formerly of London, opened its factory here and started business. The firm has been negotiating for a site in this city for a number of months, and finally, as the result of the efforts of the board of trade, was induced to locate here.

TWO BURN TO DEATH AS AIRPLANE CRASHES

BRATTLEBORO, Vt., Aug. 18.—Two persons were burned to death, and a third, a woman, probably fatally burned today, when an airplane crashed during the dedication of a new flying field here. The three were passengers in the machine, piloted by E. Hughes of Mineola, L. I., who escaped with minor injuries.

The dead are: James Traham of this city and his 5-year-old son Norman.

Miss Evelyn Harris of Brattleboro was burned so severely that it was believed tonight she would die.

RECOMMENCE WORK ON SCHOOL AT STRATFORD

STRATFORD, Aug. 18.—For one whole week operations in connection with the erection of the new separate school at Brunswick and Well streets have been at a standstill owing to brick shortage. It was not until this morning that work was recommenced, a load of bricks having arrived late yesterday.

WORKMAN'S HAND CUT WHEN BOTTLE BURSTS

Special to London Advertiser. CHATHAM, Aug. 18.—John D. Egan, an employee of the Libby, McNeil & Libby plant of this city, suffered bad cuts on his right hand when a bottle burst in his hand late yesterday afternoon.

Several stitches were required to close the wounds.

DIES OF BURNS AFTER IRON SETS HAIR AFIRE

LONG BEACH, N. Y., Aug. 18.—Her hair set afire by the short-circuiting of wires in an electric iron, Mrs. Izetta McGill, youthful wife of the groundskeeper at the Lido Golf Club, suffered burns that caused her death early today. Attracted by the screams of the young woman, her husband smothered the flames with blankets, but she died soon after being taken to a hospital.

BULLET MISSES TROTZKY, KILLS HIS CHAUFFEUR

LONDON, Aug. 18.—An unconfirmed dispatch from Stockholm today reported that an attempt had been made during a recent inspection of the Soviet army to assassinate Leon Trotsky, people's commissar for war.

The chauffeur of the military motor car in which Trotsky was seated was struck and killed by a bullet said to have been intended for Trotsky.

GERMANY WILL INCREASE ASSESSMENT ON EXPORTS

BERLIN, Aug. 18.—The economic council of the empire decided today by a small majority to increase the assessment on exports in order to make the amount correspond with the present depreciation of the mark. The surcharge on customs was fixed at 174 per cent for the period between August 24 and August 29.

FOREST FIRES IN ITALY DUE TO INTENSE HEAT

ROME, Aug. 18.—Forest fires are raging in many parts of Italy. The fires are generally due to natural combustion owing to the intense heat, although some are said to be of incendiary origin. Firemen and soldiers, assisted by members of the Fascist organization, are making strenuous efforts to combat the fires.

MARTIN TAKES OATH. REGINA, Aug. 18.—Hon. W. M. Martin, former premier of Saskatchewan, took the oath as a member of the Saskatchewan Board of Appeal.

OPPOSES DRURY PLAN TO MAKE PARTY BROADER

Miss Agnes MacPhail, M.P., Discusses Differences Between Morrison and Premier.

ELLIOTT FAVORS SCHEME

KINCARDINE, Aug. 18.—Miss Agnes MacPhail speaking at a garden party tonight, dwelt on the differences existing between Premier Drury and J. J. Morrison, secretary of the U. F. O.

"Only the U. F. O. can say whether or not a new political party will be formed and their opinion cannot be expressed until the annual convention or the calling of a special meeting of the organization," said Miss MacPhail.

"Personally I am opposed to the formation of a new political party as outlined by the premier. I am an admirer of his splendid qualities and regret very much that there has been any difference of opinion between the government and the organization."

Miss MacPhail spoke for more than an hour and her first speech here was listened to with great interest.

AGREES WITH DRURY.

GALT, Aug. 18.—Asked for his opinion of Premier Drury's broadening-out policy, William Elliott, M. P. for South Waterloo, elected on the Progressive ticket, said the Progressive party of this constituency was solidly behind the provincial premier, since the Progressive party of this riding since its inception had been by no means a U. F. O. organization, both urban and rural voters having selected K. K. Hornum, M. P. P., a town man, and himself as their standard-bearers. To combine the U. F. O. originally organized for commercial purposes with the political life of the country, he felt, would destroy the life of the movement.

SELLS 9 PER CENT BEER, FINED \$500

Brantford Man, Police Testify, Charged Only 30 Cents a Bottle.

Special to London Advertiser.

BRANTFORD, Aug. 18.—Following a "raid" by Chief Constable Donnelly and Detective Boylan on No. 2 Darling street yesterday afternoon about 5 o'clock, Stanley Snape appeared in the police court this morning and was fined \$500 and costs when he was found guilty of a charge of selling overproof beer.

The police found 54 bottles of nine per cent beer on the premises and, according to the police, Snape was catering for a large number of patrons. The beer was not hidden, but was nicely stored in the ice box where it was kept cold, awaiting the convenience of the purchasers. Snape was charging 30 cents per bottle for the "wet" goods.

ISSUE REGULATIONS ON OLEOMARGARINE

Canada Gazette Publishes States Effect On Importation, Manufacture and Sale.

OTTAWA, Aug. 18.—(By Canadian Press).—Regulations governing the importation, manufacture and sale of oleomargarine in Canada, effective from the date of publication tomorrow, are issued in the current issue of the Canada Gazette.

Importation and manufacture, it is provided, shall be by license only, such licenses to be approved by the minister of agriculture.

Manufacture of oleo will not be allowed in any premises used for or connected with the manufacture or reworking of butter, and materials intended to be used for its manufacture must be inspected and approved by an inspector of the department before their use. Provision is made that the words "butter," "creamery" or "dairy" or the name of any brand of cattle shall not be used in advertising or describing oleomargarine nor shall any of these words be placed on packages.

Sale provisions include one that oleo must be sold in the original package, stamped with the official inspection mark, and that each package shall bear the words "oleomargarine" as a conspicuous label. Hotels, restaurants and public eating places serving oleomargarine are required by the law to announce that fact in a prominent notice to the public. Fines running as high as \$500 are provided for anyone violating the new regulations.

PLANK PROTRUDING FROM ENGINE HITS MAN ON HEAD

John M. Dennis of Sarnia Lies in Hospital in Critical Condition.

Special to London Advertiser. SARNIA, Aug. 18.—John M. Dennis, 50, an employee of the Pere Marquette Railroad, lies in the Sarnia Municipal Hospital seriously injured, as a result of a blow received on the head from a 12-foot plank, Dennis, who has been with the company 20 years and is a married man with a large family, was working on the engine when an engine passed. The plank was protruding from the engine and struck Dennis.

A fractured skull was feared at first, but reports this afternoon state that a fracture was not sustained, but the man's condition is serious.

Want Drury To Reconsider Appointment of New Oxford Official.

Special to London Advertiser. WOODSTOCK, Aug. 18.—A petition is being circulated among the businessmen and merchants of this city protesting against the appointment of Leonard Sifton, a farmer of East Nissouri, to the vacant registration of Oxford County. The petition, which is to be presented to Premier Drury, asks that Wallace MacWhinnie, who has been deputy registrar for fifteen years, be elevated to the position.

POLICE RAID HOME OF KENT FARMER

Maxwell Brown, Pleading Guilty, Pays \$449 Fine For Manufacturing Liquor.

Special to London Advertiser. CHATHAM, Aug. 18.—County police, following a spectacular raid on Wednesday last, found materials for the manufacture of liquor on a large scale at the home of Maxwell Brown, a colored resident of Chatham township.

Following an exciting automobile chase, Brown was captured by a police detail.

Before Magistrate Arnold in the county police court this morning, Brown pleaded guilty and paid a fine and costs which amounted to \$449.

URGES AMENDING OF CRIMINAL CASE

Canadian Bar Association Declares Economy and Humanity Should Be Aim.

VICTORIA B.C., Aug. 18.—(Canadian Press).—Election of Mr. Justice Martin of Montreal as vice-president at large, the reading of an invitation from the attorney-general of Great Britain to members of the Canadian Bar to help entertain the American Bar Association, should they decide to hold their 1924 convention in London, and an address by H. A. Robinson, K.C., of Winnipeg, featured the closing session of the seventh annual convention of the Canadian Bar Association this morning.

Election of a vice-president necessitated an amendment to the constitution which was unanimously voted on the recommendation of Sir James Aikins, president. He declared the creation of the new office would prove of great benefit to the association and would materially aid the president to keep in touch with the membership.

Will Meet in Quebec.

The council of the association decided that next year's meeting would be held at some point in Quebec Province.

The report of the committee of administration of criminal justice read by Judge Coatsworth of Toronto, stated that if the criminal can be reformed, it must be both from the standpoint of humanity and economy, and ratification of the criminal code must be sought. Some amendments to the criminal code were needed, the most urgent of which was more perfect machinery for administering criminal justice and dealing with prisoners. This should be always prompt and fair sentences just and uniform, and judges trained specialists along criminal lines.

Urges Probation.

Probation, the report continued, ought to be universal, being no longer an experiment, and parole should be developed so as to increase its high percentage of reformed men. It should be in a continual state of improving evolution and a well regulated system of classification of prisoners brought into effect. Industries of various kinds may be established until every prisoner became a bee in the hive of industry, thus enabling prisoners to be self-supporting while incarcerated.

Suffers Severe Burns in Extinguishing Fire

John T. McLean of Melbourne Succumbs in Checking Oil Stove Blaze.

Special to London Advertiser. MELBOURNE, Aug. 18.—While preparing dinner the oil stove, over which Mrs. Stanley McLean was working, suddenly caught fire. She removed the oil tank and tried to lift the stove outside, but could not carry it.

Her father-in-law, John T. McLean, heard her call and hurried to her assistance. With much difficulty he managed to extinguish the fire, but not until his hands and arms were very badly burned.

Fortunately a doctor was not far away, so he received medical attention at once.

He suffered a great deal from the burns.

BOY BREAKS ARM. Special to London Advertiser.

GALT, Aug. 18.—Falling from a kitchen cabinet, Arthur, son of C. M. Wackmuth, had his arm broken below the elbow.

MIDLAND MAN DROWNS. MIDLAND, Ont., Aug. 18.—By falling overboard from the passenger steamer City of Dover, Donald Letty, only son of James Letty, last night lost his life. The body has not yet been recovered.

RATIFIES TREATIES. WELLINGTON, N. Z., Aug. 18.—The House of Representatives today ratified the Washington treaties.

TWO HURT IN COLLISION NEAR VILLAGE OF FINGAL

Mrs. Fordham and Daughter Suffer Serious Injuries When Auto Demolishes Buggy.

Special to London Advertiser. FINGAL, Aug. 18.—While driving to their home in the village last night, Mrs. Harry Fordham and daughter Eva were hit by an automobile. The buggy was completely demolished, and Mrs. Fordham and her daughter were thrown into the ditch.

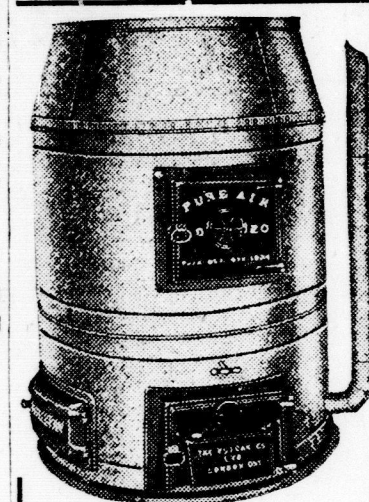

The driver of the car took the injured women to their home, where medical aid was immediately called.

Miss Fordham suffered from cuts and bruises, her teeth having protruded through the upper lip. Mrs. Fordham received internal injury, and is reported to be in a critical condition.

STRIKE OF MAINTENANCE WORKERS NOT IMMINENT

NEW YORK, Aug. 18.—E. F. Grable, head of the maintenance of way workers, who is here watching the negotiations for the settlement of the shompen's strike, today said that no strike of maintenance of way men was imminent.

The eye of the cel becomes enlarged during the mating season. Four-fifths of all the money spent in shipbuilding goes in wages.

You Can't Dent an EDDY PAI!

The knocks, blows and bumps inseparable from day in and day out usage can't dent an Eddy Pail.

The Eddy Pail is a one-piece Pail. It has no joints or seams, no hoops to creak off, no staves to fall apart.

It is as strong as steel and lighter than wood. Its glazed surface baked on in the machine-hardened pulp wood, defies the roughest treatment—can't collect odors or taints.

The Eddy Household Pail is moderate in price and will outlast any other kind of pail. Ask for Eddy's Household Pail.

SHRINERS VISIT PORT STANLEY

Members of Mocha Temple
Present Thames Pearl Pin
To Imperial Potentate.

Mr. and Mrs. J. S. McCandless
of Honolulu Laud London
Hospitals.

The red fez and the elaborate and richly ornamented costumes of the Mystic Shriner of North America, who visited Port Stanley Friday afternoon, when hundreds of nobles of Western Ontario, besides many from Mocha Temple, Detroit, and other American cities made a pilgrimage to the hot sands of Port Stanley to honor in a befitting manner the visit of Imperial Potentate J. S. "Sunny Jim" McCandless, of Honolulu, who had come to the city of London, and to show them how greatly he Shriners of this district appreciate the interest taken in the Canadian people by the distinguished visitor.

At the conclusion of a banquet in the Indian room of the Tecumseh Hotel, and at which Mayor Cameron Wilson officially welcomed "Sunny Jim" to the city, a special train carried the pleasure-seekers to the lakeside. Although the sports program was held up for a short while by a shower of rain, the ardor of the picnicers was only increased by the long delay, and the lengthy and novel program was run off without a single missing incident.

Shrine Band Pleases.

The splendid music played by the Mocha Temple Band throughout the afternoon delighted the hundreds that lined the shore, and many a visitor was heard to remark that it was the finest Shrine Band that he had ever had the opportunity of hearing. Other commendable features on the program were, entertainment by Fred Weekes Orchestra and an exhibition drill by the Mocha Temple Arab Patrol under the direction of Captain Somerville.

At five o'clock a supper was served in the cafeteria. The outstanding event of the evening was the presentation by J. F. Reid, potentate of Mocha Temple, on behalf of the Shriners in this city, of a beautiful pearl pin with a diamond setting. The pearl, a lovely specimen of the fresh water variety, was one of the two found in the river Thames a year or so ago.

Presented With Watch.

On behalf of the ladies, Mrs. Reid presented Mrs. McCandless with a handsome diamond studded platinum wrist watch.

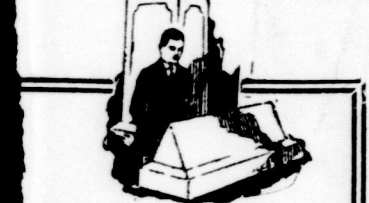

In short addresses the genial potentate expressed his thanks at the wonderful reception he received during his short stay in the city, declaring that his Canadian tour had been one of the happiest times of his life.

Praising highly the hospitals in the city, he declared that London should be justly proud of the roomy and beautiful War Memorial Sick Children's Hospital, which was visited by the Imperial potentate Friday morning, and that a movement was fast spreading over the entire continent whereby more attention will be given and more interest will be taken in sick and crippled children by the municipalities, was one of the most commendable things that had ever happened, he said.

Win Raising Events.

The results of the races are: Boys' race, 5 to 8—Hugh Douglas; Girls' race, 5 to 8—Ruth Ellis; Helen Dyson and Peggy Rogers.

Boys' race, 8 to 12—George Mills.

G.W.V.A. WILL GIVE CONCERT SUNDAY

The band of the Great War Veterans' Association will play the following program in Queen's Park Sunday evening at 8:30, weather permitting, proceeds to go towards defraying expenses to Toronto August 31 next:

"God Save the King;" march, "The Gladiator's Farewell," Blankenburg; overture, "In Rosenbain," Ellenberg; overture, "Rienzi," Wagner-Moselli; concert, "Overture," Toronto; 31. Waltz, "Destiny," Sydney Bayner; nolette, "Sparklets," Miles; March Militaire, op. 51, No. 1, Schubert; melodies, "Moon Moths, op. 8, No. 1, 1 and 2," Kussner; "O Canada."

PERMITS CITY WOMEN TO VOTE UNDER NEW LAW

At the next civic election all women who have an interest in property with their husbands will for the first time in this city be allowed to cast a ballot without the husband being compelled to go to the expense of securing a joint ownership deed.

A resolution to this effect was passed by the city council in November, 1921, and subsequently became law, and ex-Ald. Wm. Wilson has advanced the claim that he was the member of the city council of that day who was primarily responsible for this legislation.

"I introduced that motion," he declared Saturday, "and it was adopted by the council, and comes into effect next December."

Kenneth Alexander and Evan McDonald.

Girls' race, 8 to 12—Ruth Jagoe, Blanche Walker and Helen Nash.

Fred and the monkeys, for nobles—R. F. and Ella Cascarden, D. Davidson and Esther De Brewer.

Hoop race for nobles—A. R. Skelton and L. H. Douglas.

Ladies' 50-yard dash—Lenore Henry and Bernice Ceason.

100-yard dash for nobles—John A. Nash and William Whitehall.

Back-to-back race, lady and noble—Mr. and Mrs. B. F. Cascarden, Mr. and Mrs. R. Sage.

Biscuit race for nobles—N. A. B. Smith and E. R. Burgess.

Past potentate and potentes' race—Henry Robe and W. W. Gammage.

Fat nobles, 225 lb. and over—V. G. Blackall and Alex. Zimmerman.

Skinny nobles, 145 lb. and under—Bill Forbes and W. A. McWilliams.

RETURN AFTER 800- MILE CYCLE TOUR

William McLeod and William
Moffatt, of City, Enjoy
Long Trip.

Completing a bicycle tour of more than 800 miles, William McLeod and William Moffatt, two East London youths, returned to this city Friday, with the unique experience of having to contend with one puncture only, in the manner of trouble on their trip.

McLeod and Moffatt planned to spend their two weeks' holidays on a bicycle tour, and their itinerary included Chatham, Windsor, Detroit, Toledo, Cleveland, Buffalo, Niagara Falls, Toronto, and about 113 miles, although for few nights spent with relatives in Jeanette's Creek, Detroit and Buffalo, the boys camped in the open whenever the weather permitted, during the entire eleven days of their trip.

They report the roads to be in excellent condition in Western Ontario, and across the border, particularly the paved stretch of highway from Detroit to Cleveland. Encountering a storm at Chatham, and another near Hamilton, was part of the hazard which went to make the trip an ideal holiday venture.

The two cyclists also report that the residents along the route of their tour were very cordial toward them, and that one puncture was the only mishap of the trip. The best distance for any one day was 113 miles, although McLeod and McLeod declare that they did not exert themselves.

They carried light camping equipment on the Perfect bicycles which they rode, and purchased provisions on the road.

Both the youths informed The Advertiser that the trip was a most enjoyable means of spending their summer vacation, and that the beautiful scenery and the people met along the way were the chief reasons for any hardship which they may have endured.

Hugh Cameron, another London boy who took the same trip, arrived back in London on Friday, riding a Perfect bicycle, and reported no trouble at all on his tour.

FEAR 3 CHILDREN PERISH IN HURON

Inverhuron Residents Search
in Vain For Young Bathers
Last Seen At Beach.

KINCARDINE, Aug. 18.—Three girls, Florence McKay, aged 12, Margaret McKay, aged 13, and Lorraine Stevens, aged 14, are believed to have been drowned while in bathing at Inverhuron at 6:30 this evening.

The lake was very rough and the children had been playing on a log in the water.

Mrs. Robert Stevens of Detroit, the mother of Lorraine, went down to the water's edge to call the children and then discovered that they were missing.

Mrs. Stevens immediately raised an alarm, and the residents started to search the lake for the missing girls.

At the present time none of the bodies have been found. It is now believed that the little girls drifted out into the lake and were lost.

The McKay sisters are daughters of Dan McKay of the 2nd concession of Bruce Township.

BLAME RAILWAYS FOR LACK OF HELP

Manitoba Farmers Allege That
Transportation Companies
Denied Harvesters Stop-
Over Privileges.

WINNIPEG, Aug. 18.—Complaints are continuous from numerous points throughout the province that insufficient men for harvesting are arriving and the blame for this is attached to the railways by J. A. Bowman, provincial superintendent of the employment services of Canada.

Find Advertiser of 1873 When Tearing Down Old House

REFERS TO BYGONE DAYS.

Musty, tattered and stained with time, yet with a vast amount of interesting reading matter still legible upon it, a copy of The Daily Advertiser, dated Saturday evening, Jan. 11, 1873, came to light with the tearing down of the old structure on the McDonagh property at 347 Dundas street.

It is impossible to glance at the paper without noticing the immense strides journalism has taken since the days of 1873, and on reading through the names are discovered of buildings which, old and decrepit now, were then in all their glory of newness, and who knows but they were the cause of criticism similar to that hurled at the innocent head of one or two of the new structures of present London? The names mentioned are those of people long since departed, but the problems with which they wrestled have changed much in form, but little in intent, since that day.

In vast contrast to the 1922 papers where the only mention of a still is made in the columns dealing with the police court, is a forerunner of the classified ads, which not only advertises brazenly for a still, but has the audacity to mention the size desired as from 25 to 50 gallons in capacity.

Favors Prohibition.

However, it would seem that even in those early days, prohibition was not entirely an unknown issue, for in the editorial column there is mention of a "Mr. Farewell, M.P.P.," who, alluding to the clause relating to Inebriate Asylums, spoke strongly in favor of a prohibitory liquor act, believing that to this complex problem must come at last. Were Mr. Farewell alive today he might be surprised to know that not until 1919 did his prediction come true.

Few men would venture to propound an answer to the Irish question for today, yet in this edition there is an editorial of a column headed "Ireland's Remedy," and written around the subject of an English historian, Mr. Froude, who came over to America for the express purpose of pleading the case of his own country, and, if possible, to dissipate the idea of Saxon perfidy, which has been so energetically spread by certain enthusiastic Irishmen.

Unfortunately, Ireland's remedy is worn off into a ragged edge just at the paragraph where it seems as if the writer's solution might be found, so that what might have been a solution to this long perplexing question may not be learned.

Election of Mayors.

Mentioned amongst petitions introduced at the second session of the second parliament of Ontario are the following two: From David Nelson and others of London for an act to provide for the election of mayors of cities by the vote of the people, and from the county council of Middlesex, for the prevention of the running of trains on Sunday.

The reader would be impelled to contrast strongly the unobtrusive manner of printing such information with the manner in which the "fare heads" of modern journalism convey the news of the day. However, it is easily conceivable that whereas nowadays the average man wants to grasp the whole world situation from the headlines, with his hastily swallowed morning cup of coffee, men in those days had the time to read the morning paper at their leisure.

Here is an article which strongly contrasts with modern journalism, in which a Mr. Blake (apparently it was assumed that everybody knew just who Mr. Blake was and just where he was speaking) is claimed in the introductory paragraph as being received with loud and tumultuous cheering.

Congratulate Themselves.

After much preamble comes the gist of the article, "that they had met here tonight to congratulate themselves on the success of the Liberal party in the late general election," stating that one could not help but be impressed with the magnitude of the victory. Although much of the article is missing, there is much to be learned of the politics of the day. Allusion is made to the "lavish expenditure of John A. (presumably Sir John A. Macdonald), and his 'signal' failure to carry the government, and the belief expressed by the speaker that 'John A.' would 'repeat the supply and shabby experiment of trying to govern Ontario by the votes of other provinces.'"

Reference is made to "the community of sentiment that actuated the Liberal party," to the "Washington Treaty, upon which his friend, Mr. Mackenzie, had been mentioning particularly the importance of preserving in our own hands the navigation of the St. Lawrence, 'the necessity of arranging, for the satisfaction of the past and the security of the future, with reference to the United States, and the fact that the United States had made an apology for the Alabama affair.'"

It is interesting to note that the whole article is headed "Mr. Blake at the Banquet," and gives no information as to who Mr. Blake was, or where the banquet was held. It is to be assumed that people kept closely in touch with all situations at the time of printing, and such information was regarded as superfluous.

There is an enlightening sentence in a paragraph acclaimed as telegraphic news from Toronto, commencing: "The address concluded after midnight." Reason is given for the session being so short in the fact that "Tom Ferguson" made no speech; further stating that "there debate on any subject will not be allowed to close without 'Sore Toes' having a blow-off."

Coming foremost in point of interest amongst the European news is the article headed, "The Cause of Napoleon's Death: result of the post mortem examination, Queen Victoria

WILL NOT TRY TO OUST STEVENSON

Local Labor Not in Favor of
Rumored Plan.

While a certain member of the local political labor body has been credited with the declaration that it is about time that Dr. Hugh A. Stevenson resigned as the provincial member for London, it has been noted that this attitude is not acceptable to all who are involved or interested in the labor movement.

From the headquarters of labor itself comes the decisive assurance of those who are admittedly within what might be termed the "inner circle" that there will certainly be no move to eliminate Dr. Stevenson from their midst, either as member for London or as one of the rank-and-file.

All those closely associated with the local labor units who were questioned Saturday respecting the suggestion that emanated from a certain quarter, admitted that such a move would be received with great favor by a certain element, but were confident that these persons would be doomed to disappointment.

LAUD GOVERNMENT ON NEW FISH LAWS

Fish and Game Association
Pleased Over New Booklet
Issued.

The Western Ontario Fish and Game Protective Association held its regular meeting in the court house last night. The new issue of the game and fish laws is now being distributed by the government, and will be in the hands of the association early next week. Opinion has always been divided as to the legal size of the various game fish that may be taken, and this year's issue of the book sets forth the size of all these. It is illegal to keep the following fish under this size:

Black bass (large and small mouth), 10 inches.

Pickering (blue), 10 inches.

Pickering (yellow), 15 inches.

Perch (yellow), 9 inches.

White or silver bass, 9 inches.

The other fish not ordinarily considered by the rod and line fishermen as a game fish are restricted as follows: Whitefish, 2 pounds; sheepshead, 12 inches; carp, 3 pounds; lake trout, 2 pounds.

There is no closed season on pickerel in the waters of the Great Lakes.

The association heartily indorsed the government for the concise manner in which the laws have been set forth in the new book, as it is the first time in many years that fish of all varieties have been classified as to lawful size.

A live bait box is being installed at Pond Mills, so that members may not be put to the trouble of procuring either minnows or frogs previous to a few hours at the pond. The officers expect that members who do take out their own bait will, if they have any left over, place it in the box and endeavor to keep a supply on hand for all times.

The committee in charge of the annual picnic have decided to hold the picnic on the pond on Wednesday, Aug. 23. Southbound 2:20, 4:20, 5:20. Return 6:45, 10:07 and 12:20.

Everything will be in readiness for a good day's sport, and members are requested to leave at the pond, as it is the duty of the committee to have the pond open to the public for fishing purposes.

ATTEMPT TO STEM MINNESOTA FIRES

Settlers Fighting Hard to Get
Strangle-Hold on Forest
Blaze.

Duluth, Minn., Aug. 19.—After a night of virtual calm, men fighting the 200 odd forest fires spread over 200,000 acres in Northern Minnesota, set out today to attempt to strangle-hold on the blazes before they could be stirred into greater menaces by heavy winds. A light rain fell early today.

Settlers remaining in threatened settlements have been warned by Governor Preus, who is in personal charge of the situation here, and W. T. Cox, state forester, to be prepared to leave their homes should high winds develop today.

According to Mr. Cox, only the lull in the wind yesterday prevented a repetition of the 1918 disaster, when 453 persons were killed.

Buchanan Issues Statement to Refute Charge of Ald. Cunningham

Resenting the allegation of Ald. O. L. Cunningham, that the street lighting system of London is poor as compared to the previous system maintained by the London Electric Company, E. V. Buchanan, general manager of the public utilities commission, has issued a statement covering the present lighting system and its predecessor.

"I do not wish to engage in any controversy," said Mr. Buchanan, "but wish to draw the attention of the public to a plain statement of facts. Mr. Cunningham says that the hydro street lights are never cleaned, but Superintendent Alford informs me that they were washed less than a month ago."

WILL ARRANGE FOR SALE OF DAKIN ST. SCHOOL SITE

Disposal of the property acquired by the board of education on Dakin street for a new public school will have to be arranged in the near future, now that a new site has been approved at Trafalgar and Oliver streets, according to W. A. Tanner, secretary of the board. The abandoned site was purchased for approximately \$5,000, and has been relegated to the background by the sale of the new site to the city for \$14,500. The sale of the former site for a school in Southeast London will likely be arranged at the next meeting of the board of education.

TURKEYS AWAIT RIGHTFUL OWNER

Magistrate Refuses to Proceed Against Robinson
Brothers Until Tuesday

With copper bands fastened securely about their legs, labelled "S," a pair of turkeys, as well as 20 or more chickens, seized by the detective department, are still awaiting possible claimants at the Carling street station.

On Tuesday next, William and Albert Robinson, brothers, and said by the police to be residents of the Far West, will appear before Magistrate Graydon charged with the theft of the poultry.

In police court Saturday morning, Howard Cluff, counsel for the accused, asked that they be allowed to appear for immediate trial. This was denied him by the magistrate, who explained first that it was the short day and he did not care to introduce a case that had been adjourned for a week, and secondly that Crown Attorney A. R. Douglas was out of the city.

Attorney Cluff pointed out that the latter's representative was present. The latter pointed out, however, that he was not conversant with the facts of the case. Police magistrate expressed himself likewise, as did Attorney Cluff, who asked that he be given an order for particulars of the charge from the detectives.

As Attorney Douglas will not be in the city until Tuesday, the case was set for that day. The detectives suspect that the Robinson brothers have been busy in the surrounding district for several weeks past, selecting the best of other people's fowl and offering them for sale at reasonable prices on the market square.

FREE PRISONER TO HARVEST CROP

Newbury Magistrate Suspends
Sentence in Immoral
Conduct Case.

Newbury, Aug. 18.—Convicted on a charge of making a home unfit for children by immoral conduct, George Costig, alias George Smith, who has made his home at Stratford, Ellen and St. Thomas, was on Friday allowed his freedom on suspended sentence by Squire D. M. MacKenzie of Wardsville, owing to the fact that a jail sentence would not permit the crops on his farm to be harvested.

The woman in the case, who is the mother of several children, was also allowed to have her suspended sentence, conditional that she return to relatives and keep away from Costig. The prisoners were arrested on information provided by Inspector W. E. Kelly of the Children's Aid Society, London, and A. R. Douglas of London prosecuted.

Evidence was introduced in the court to show that the woman had separated from her husband and was residing on a farm near here with Costig, who pleaded ignorance of the law as an excuse for his offense.

Costig promised there would be no recurrence, and on this condition Squire MacKenzie allowed him to go on suspended sentence, after delivering a scathing lecture to both accused.

MOVED TO KITCHENER. Special to London Advertiser.

GALT, Aug. 18.—Capt. and Mrs. Howlett, who have been in charge of the Salvation Army at Hespeler for the past fourteen months, have been transferred to Kitchener, and will be succeeded in Hespeler by Ensign and Mrs. Chambers of Collingwood.

A THOUGHT FOR TODAY

I the Lord have called thee in righteousness, and will hold thee in hand, and will keep thee.—Isaiah 42:6.

FOR it is beautiful only to do the thing we are meant for.—Florence Nightingale.

WORRIED OVER ADOLESCENTS

Dr. Weir Says Question De-
pends Greatly on Attitude
of Employers.

Whether the board of education will be compelled to care for any adolescent children next September depends mostly upon the various employers of labor, explains Dr. George S. Weir, London's public school attendance officer.

"Except that we have cancelled all present working and home permits," Dr. Weir stated, "nothing further definite can be accomplished, as required by the adolescent school attendance act, until all the prospective part-time students have consulted their employers to ascertain what their arrangements, if any, can be made."

"If the employers regard the situation unfavorably and decline to hire the pupils for only part time, then there will be no adolescent children to furnish accommodation for."

"I believe that while it is quite possible that the manufacturers and the other big employers of labor will raise a storm of protest, they will eventually adapt themselves to the new provisions of the act and employ students at certain periods."

"I have been collecting data from Detroit and other American centers where similar acts have been enforced and I find, as an instance, that in Detroit the employers first objected strenuously to part-time employment, and declined to hire. In the finish, however, I learnt that they changed their opinion, when they discovered that they were compelled to pay larger salaries to older children, and even then were unable to acquire them in adequate numbers."

TO HOLD GLADIOLI SHOW IN ST. THOMAS AUGUST 23

Ottawa, Aug. 19.—The Canadian Horticultural Council announces that the first annual exhibition under the auspices of the Ontario Gladioli Society is scheduled for St. Thomas, Ont., on Aug. 23 and 24.

The society was organized last spring to foster the culture of the gladioli in Canada, and the fact that the American Gladioli Society held its show in St. Thomas in 1921 gave impetus to the movement.

The leading gladioli growers of the United States and Canada have contributed to the prize lists.

AUSTRIAN FINANCE CRISIS STEADILY GROWS WORSE

Vienna, Aug. 19.—The financial crisis in Austria is daily growing in intensity, and rumblings are heard forecasting catastrophe unless means are found to remedy the situation.

An official statement issued to the newspapers, says the Central European problem, as left by the London conference has assumed so grave a form that it may "press for practical solution earlier, perhaps, than the world expects."

The phrase, "practical solution" as far as it concerns Austria, is construed to mean either a convulsive fusion with Germany or the disintegration of the state.

Must Make Decision.

WHETHER those most interested in the case care to admit the fact or not, it is generally conceded that the time has come in the history of the United Farmers' movement when a showdown between PREMIER DUBRY and J. J. MORRISON is inevitable.

Things have been working to this end for some time past, and it did seem at one time that there was a chance of the spread between the opinions of these two leaders being breached in such a way that an open break would be avoided, and the movement might have the support of both factions and the antagonism of none.

It is impossible for a person living in a city to get the drift of conversation that is taking place on this point. The aftermath of some of the political piques that have been and are being held in Western Ontario under the auspices of the U. F. clubs brings forth a current of comment and thought that shows there is a lining up taking place now for the showdown which is now regarded as inevitable, and which it is anticipated may come to a head this fall.

The MORRISON faction believe that it is in the interests of the Farmers' movement that there should be a hard and fast understanding that it is a movement in the interests of the farmers only, and that the only entrance to the fold is by a statement that the applicant for membership is a farmer, and nothing else. This faction is quite outspoken in the belief that if it allowed any others than farmers to come in it would mean in reality the beginning of the end, and that it would be only a short time before the movement started to break up, or become easily turned off on so many tangents that it would get no place in particular, and have accomplishments of the same order.

On the other hand, there are those who believe that PREMIER DUBRY is quite right when he strives to get away from the confines of a purely agrarian movement, and get into what is now known as the Progressive party.

Premature publicity given to the move that PREMIER DUBRY was seeking to work out with his colleagues has brought the matter more to public attention, and has undoubtedly widened the distance between DUBRY and MORRISON.

This means that in Ontario we really have five distinct political parties: Labor, Liberal, Conservative, Farmer, and Progressive. Which of the two, Farmer or Progressive, can claim to be the real representatives of the real agrarian movement is something that remains for the future to show us with more certainty than it has even hinted in the past.

Even in sections where the majority of the people connected with the movement are in favor of retaining the strictly farmer bearing, there is a very strong admiration for and appreciation of PREMIER DUBRY for the strength he has lent to the movement, and for the manner in which he went in and took over the leadership on short notice, and without much previous identification with provincial politics.

Even those who should be in a position to know, claim to be at a loss in trying to figure out the relative strength of the DUBRY and MORRISON factions, although some of the best informed are willing to admit that although MORRISON has a strong following, there will be serious thinking before there is any move to turn down DUBRY. A final showdown is coming, and it has in it the makings of a very interesting situation in an otherwise quiet season politically.

Offers Sound Advice.

DURING his witty address, delivered to members of the Irish Benevolent Society at the banquet which concluded their annual picnic at Port Stanley, Thursday, R. L. BRACKIN, K. C., M. L. A., for West Kent, offered some sound logic which might well be applied to the community life of Canada.

"We should emphasize not our differences but the things that we agree on," was one of the bits of advice offered by the member for West Kent, as a solution to present-day problems. "So long as we all think nationally, with the one goal in view, Canada will dominate."

Mr. BRACKIN realized that he was speaking to a society, which knows no politics or creed, yet whose membership is made up of citizens of London whose religion and politics is at variance with those of their fellow members. His words were well-chosen, and convincing to his audience.

Continuing, Mr. BRACKIN pointed out that the Irish Benevolent Society is a living example of the absence of tolerance, and absolute absence of bigotry. He expressed the hope that such an ideal would grasp the country, and rid it of national and religious prejudice, which is threatening to assume serious proportions, unless speedily checked.

He asserted that the foundation of the Dominion is not politics, but the men and women who are true Canadians. Mr. BRACKIN pro-

ALL OVER BUT THE SHOUTING.

nounced the too frequent practice of citizens who invariably attribute ulterior motives to every man in public office, to be most unfair, declaring that practically every such man is serving the people as best he can, and is not infallible.

He commented on the fact that the people as a rule do not consider these mistakes as mistakes, but are too prone to brand them as deliberate machinations.

Mr. BRACKIN is in public office himself, and his words were products of experience. "Give the man in public life credit for what he does," was his reasonable plea to the Irish Benevolent Society. "The future of the Empire lies not in London, England, but in the hearts and minds of the people who go to make it up."

The address delivered did not savor of politics, as such a thing would have been out of place at the Irish Benevolent Society. However, it did savor of good common-sense reasoning, and gave those citizens fortunate enough to hear Mr. BRACKIN speak, much food for thought to take home with them.

The Invasion of the Car.

IT IS HARD to get a good idea of the extent to which the automobile has invaded and taken possession of the rural districts until one witnesses the number of them that congregate at some event in a rural center in which the farmers themselves are very much interested.

PREMIER DUBRY was the speaker at a big gathering under the auspices of the U. F. O. at Grand Bend a few days ago, and to say that cars were there by hundreds and thousands is putting the case mildly. Many of those present had come as far as thirty, and in some cases, forty, miles to attend the meeting.

This quickness of locomotion must have a big effect on keeping the farmers more up to the minute on the questions that most seriously affect them. Right now they are discussing things of more than usual interest to the men on the land. It is possible for them, without losing a great amount of time, to go and attend any or all of these meetings, and be well informed as to the latest move that has been made, and the likelihood of the one that is going to be made before long.

Nor is there the long, tedious drive home after the meeting is over. Imagine, a few years ago, a man starting out on a 20-mile drive with a horse and buggy in the evening to get home. It would take him some hours to make the trip, and he would be thoroughly tired by the time he reached home. Now a distance like that is just a nice hour's drive in the cool of the evening, and it really means home before dark.

People in the city imagine they see a good many cars parked along the streets some time, but if they want to see cars, cars, and then more cars, they must bestir themselves and attend some of these political picnics, which are dearer to the heart of a farmer than a day's work.

Rumor and Scandal.

WHY IS IT that so many people are always willing and ready to jump at conclusions, pass judgment, and proceed to spread the verdict, on the veriest shreds of information?

Within the last three or four days one case has been drawn to the attention of THE ADVERTISER, the injustice of which is so flagrantly apparent, and the harm and hurt so direct and so misplaced as to warrant mention.

At one of the summer resorts near London, a pastor is spending a month with his family. Nothing unusual about this, except for the fact that this one in particular is one of the best campers on the grounds.

The other day he received a letter from a member of a church—not his own—saying that he was surprised and disgusted at the manner in which the pastor was conducting

himself, as the writer of the letter had seen him "with his hat on the side of his head and a cigarette stuck in the corner of his mouth," and conducting himself in a way that was generally unbecoming of a man in his position.

Now it so happens that on the same street where the pastor lives is a man who bears somewhat of a resemblance to him, and this was the man who was seen by the outsider.

The accuser did not take the trouble to verify his suspicion—he was satisfied that he was right—he had a chance to leave his brick, and he let it fly.

The result was that a perfectly innocent person got a letter that took all the enjoyment out of his holidays for the time being—a report was put in circulation that can do considerable harm to the pastor's reputation, for it is sure to grow in proportions.

Now that is only one isolated case, but it is used because the evidence is so certain in the matter.

We are mighty fond of talking about what a change would take place in life and business generally if the golden rule were put into effect; we are always ready to applaud to the echo a man who talks on giving the other man a chance. That's fine.

But in actual practice how much of it do we use day in and day out, week after week?

If we happen to pick up a choice bit of scandal, do we stop to think that it may not be true—that it may be very much exaggerated—that the telling of it may create a very unfortunate position—that, even, if true, we are not going to help matters by passing it along to new quarters?

As a rule, we don't do any one of these things. The habit is to wait until we run into some friend "who appreciates a good story," and unload to his delight, always making certain that nothing is lost in the telling.

A careful, shrewd analysis would probably assassinate more than one-half of our scandal; the same process would make the going a great deal easier for many who are now victims of half-truths or whole-cloth fabrications.

In theory we admit the point—in practice we defy it.

LITTLE 'TISERS

And now we suppose a good many sensible folks will be anxious to have a little whiskey in the house in case the coal bin is empty.

Between the school board figures and the assessment department estimate of the children in London, there's a difference of some 3,000 children. As this would mean only a half dozen schools one way or the other, why worry about the trifle?

The practice still continues of driving horse-drawn vehicles along the roads at night with no lights attached. As a matter of protection to the driver alone, there is sufficient argument to put on the light. Especially when there is much dust on the road at night, the practice is particularly dangerous.

Things have all been made right about the number of freshmen to be admitted in medicine at Western University. One report placed it at 15, but in reality 50 will be let in. The inauguration department better get a wiggle on or there won't be patients to grow enough aches and pains to ward off starvation.

The suggestion was made in St. Catharines that rooming houses be done away with to throw the trade to hotels. Many families, on account of high rents and taxes, find it necessary to take roomers to help out financially. It would be unfair to interfere with such arrangements. Many of these roomers would not be

able to pay the schedule a hotel finds it necessary to ask.

What could be more inspiring than the story of the way in which the boys went to work to pull children out of the fire at the Jewish Orphanage at Shawbridge? Think of boys 13 and 14 risking and giving their lives for younger and more helpless lads. It is a picture that we hold in hallowed memory, and a sacrifice that proves the God-given spark of heroism comes into reality in early years.

LEARN A WORD EVERY DAY

TODAY'S word is DIRIGIBLE.

It's pronounced dir-i-j-i-b'l, with accent on the first syllable.

It means steerable, something that can be directed, a steerable balloon or torpedo.

It comes from Latin "dirigere," to direct.

It's used like this: "The popular definition of a 'dirigible' is that of a cigar-shaped, heavier-than-air craft, supported by gas and responsive to a rudder, and in this sense the word has indeed gained official recognition; but primarily it means simply 'steerable,' so that it can be applied equally to a water-borne vessel, an automobile or practically any mechanism to which a guiding hand can give direction."

JEST

CAUSE FOR SMILING.

Old Major Shrapnel was walking with a friend when they passed a pretty girl. At once the major turned to his friend with a grin. "There," he said triumphantly, "did you see that charming young lady smile at me?"

"Oh, that's nothing to worry about," replied his friend, consolingly. "The first time I saw you I laughed out loud, but I soon got used to your face."

DR. BISHOP'S ADVICE

Bright's Disease

BY DR. R. H. BISHOP.

BRIGHT'S disease is one of those maladies that give few definite warnings until it is so far advanced as to be practically incurable. It is a great argument for periodic medical examinations, for only thus can the general condition of the body and its organs be checked up and incipient Bright's disease discovered.

The average case of the disease—sometimes called nephritis—lasts about 15 years. A person will go on constantly complaining of "dyspepsia," "nervousness," "liver trouble," "sick headaches," "anemia" or "biliousness," not realizing that perhaps there is something far worse at the source of things.

25 YEARS AGO TODAY

HERE WE HAVE ITEMS OF LOCAL AND DISTRICT INTEREST AS RECORDED IN THE ADVERTISER OF 1897.

AUGUST 19, 1897.

A number of Londoners left today for England. The were: Mr. E. Loosenan, who will sail by the American Line; William McCarthy, wife and child, by Dominion Line; John James and Mr. and Mrs. Charles Hitchcock and child, by the Allan Line.

Mr. and Mrs. Harry Puddicombe of this city left this morning for Ottawa, where the former has secured a position as instructor in the Conservatory of Music. He will also act as organist in one of the leading churches of the Capital City. Mr. Puddicombe is the son of Mr. John Puddicombe of Sydenham street, and recently returned from Germany accompanied by his bride. He pursued the study of music in Germany for some years.

Twenty-five special trains have already been chartered to carry the Grand Army of the United States to

READ YOUR CHARACTER

By Digby Phillips.

NO. 300—FIFTH ANALYSIS. And what kind of character would you say is indicated by the following hand?

The letter you are considering is written in a heavy hand. The writer apparently bears hard upon his pen. The letters are decidedly angular in formation, and rather rounded, and they slant forward at a sharp angle.

The writing is large as well as heavy, and the writer makes no attempt to close what is known as a "copperplate" hand. The first few letters in each word are well formed, but the last two or three trail off as though the writer were in too much of a hurry to finish writing them well. Sometimes you have to guess what a word is from the first few letters.

His "a," "o," "u" and "s" are all made without the loops being well closed. In fact, his "a" often looks like a "u."

Would you be right in assuming that this is really the handwriting of a man? And what sort of character do you suppose he has? Yes, the chances are decidedly in favor of this being the writing of a man. And it is the writing of a man of rather "fleshy" make-up, using the term in its figurative sense. It is the type of man of activity and energy and quick impulses. He is inclined to be talkative and outspoken, frank, honest and sincere, but impatient and probably a bit irritable.

Tomorrow—Sixth Analysis. (Copyright, 1922, by Public Ledger Co.)

TO THE EDITOR

To the Editor.—We desire to give a brief outline as to the dispute that has arisen between the firm of Dambra & Walsh, tailors, and local union No. 30, Journeymen Tailors' International. The dull season in custom tailoring is invariably in January and February, July and August. Besides a clause in all agreements, it is a recognized principle by merchant tailors that employees giving their services in the busy season should receive a fair share of work during the dull season. Two members of the union have been laid off by the above firm, one not having worked since the 10th of July, the other having worked four days. In conference with the firm on the 17th, they declared their intention to run a non-union shop. The result is that the union has declared a strike against this firm. A special meeting will be held Monday night to make all arrangements for carrying on the strike. Local 20 is determined to protect its members against such unjust treatment.

GEO. SANGSTER,
General Organizer.
London, Aug. 18, 1922.

Our Own Country

CANADA'S TOBACCO CROP.

Q.—Canada is becoming a tobacco-growing country. To what extent? A.—Canada grows tobacco in Ontario and Quebec, the production reaching nearly 30,000,000 pounds in 1920, worth \$10,000,000.

WIRELESS TELEGRAPHY IN CANADA.

Q.—Where does Canada stand in wireless telegraphy? A.—Canada ranks high in wireless telegraphy, with stations covering the ocean coasts and inland to the head of Lake Superior.

INDUSTRIES IN CANADIAN WEST.

Q.—Western Canada is becoming an important industrial part of the Dominion. To what extent? A.—The Prairie Provinces have nearly 5,000 industrial establishments, employing 50,000, and with an annual production value of \$70,000,000. Per census of 1919.

LOSING AN ELECTION DEPOSIT.

Q.—What does it mean when an election candidate loses his deposit? A.—A candidate in a federal election loses his deposit of \$200 when he fails to poll half as many votes as were polled by the winning candidate.

ARRANGE WALLACEBURG PROGRAM FOR LABOR DAY

Employees' Association Offers \$850 in Prizes For Racing Events.

WALLACEBURG, Aug. 18.—At the Labor Day celebration under the auspices of the Wallaceburg Employees' Association \$850 is being offered in race money. There will be four classes, 2:17 class trot or pace, \$350; 2:25 class trot or pace, \$250; 2:50 class trot or pace, \$150; running race, open to all, \$100. The races will be run under Canadian rules, and the management makes a special offer to all those entering races of free hay from Friday night till Tuesday morning, September 5. Entries are to be forwarded to Lynn Askin, secretary, Wallaceburg.

Amongst the many attractions will be a baseball game between Tupperville and Wallaceburg, a lacrosse game between Chatham and Wallaceburg and a monster parade. The chief speakers of the day will be Hon. Manning Doherty, Hon. Howard Ferguson, R. L. Brackin, M.L.A., and J. M. Webster, M.L.A.

GRANTS TOTAL \$19,822. Special to London Advertiser. STRATFORD, Aug. 15.—The legislative grants in rural schools for Perth and the town of Mitchell and Milverton, amount to \$19,822.51.

News of the World as Told by The London Advertiser Camera

And He Had a Wooden Leg.

THIS stork is like the old soldier of the famous rhyme, he lost his leg in a fight with another stork at the Paris Zoo. His keeper fitted him with a wooden leg, and now he is able to get about very nicely.

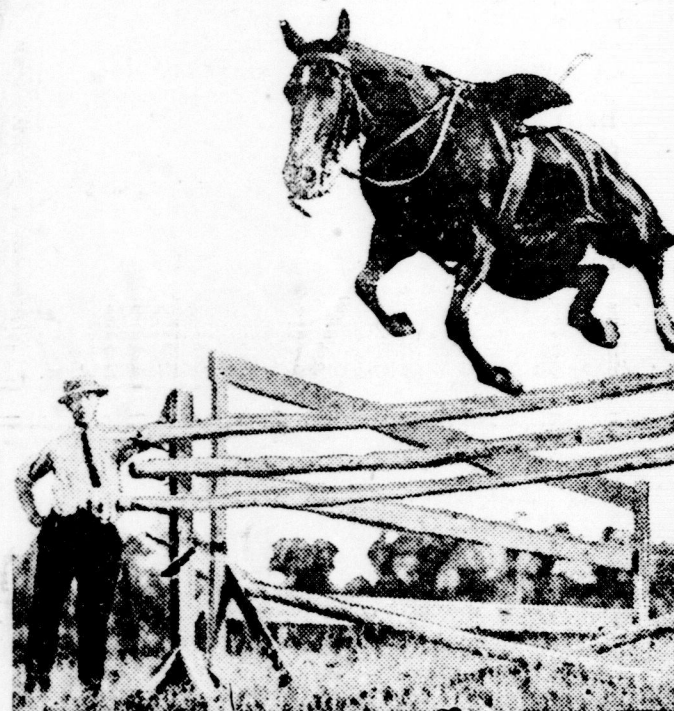

Oswald's Some Walker.

GEORGE OSWALD EDWARDS, aged 10, walked all the way from London to Brighton, England, a distance of 35 miles, without a stop. It took the youngster 11 1/2 hours of steady plugging to cover the course. Here he is at the finish, making some of the big boys step out to keep up to him.

In spite of his tender years, he has successfully competed in many "hiking" matches against competitors much older than himself.

"Yet Whiskey" Goes It Alone.

SOMETIMES it is hard to coax a horse over a bar when his rider is with him. But it's harder still to have him go over alone. This is supposed to be the best-trained saddle horse in the United States army, and he will top the bars at Fort Snelling, Minn., at the mere word of his owner, Lieut. Haselrigg, who just stands at the obstacle and calls to his mount.

A Tip for London Bridge Fans.

FOLKS who enjoy a good game of cards, need not forego their favorite pastime even when in the water. Celluloid cards that float are now all the rage at fashionable summer resorts. Of course, the playing surface might be a little unsteady, but why worry about a little thing like that?

This pastime should prove a great favorite during the sweltering hot days of summer, when a dip is about the only relief from the heat.

WHAT next? Mrs. Lillian Atherton of New York demonstrates the new device on the handle of a golf stick, which enables a player to pick up the ball without stooping.

HARRY LLOYD, film comedian, who, it is declared, is fast encroaching on the glory that was once entirely Chaplin's.

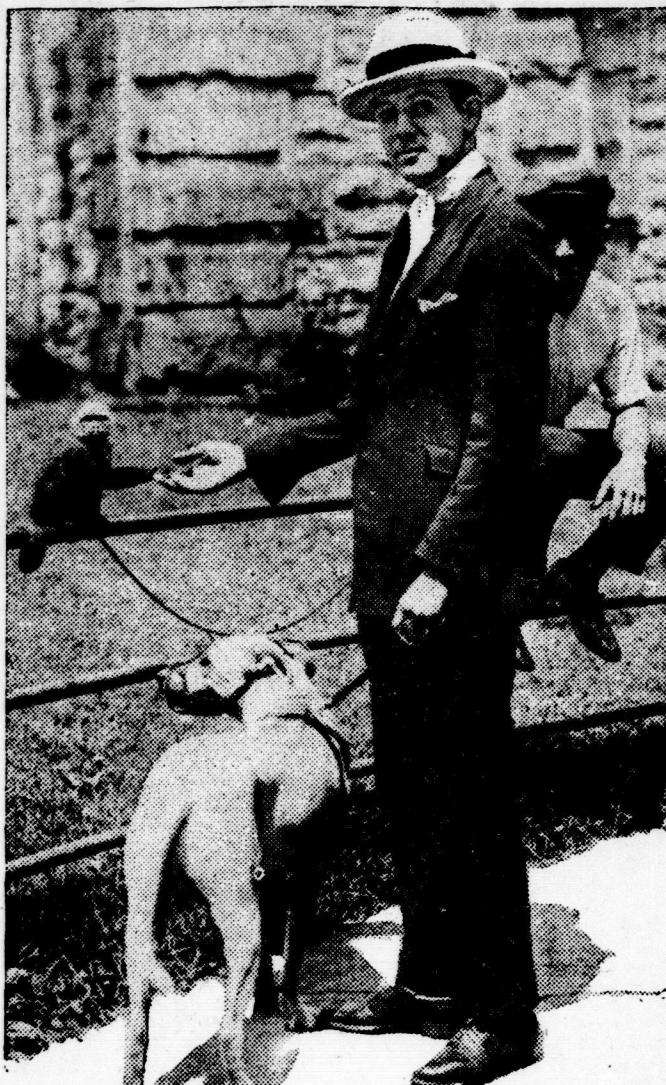

MISS ERNEST CAMPBELL of Atlanta was crowned as Dixie's beauty queen at the Pageant of Progress held in Chicago.

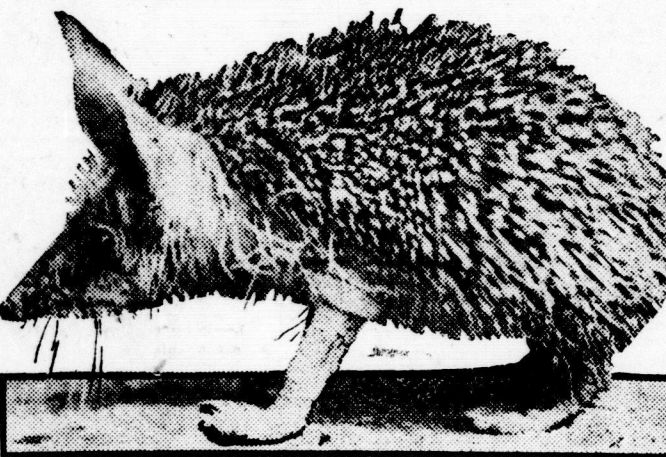

PAT McCARTY was doing a "standing on his head" act on the wing of a plane at Tarkio, Mo., when it crashed 100 feet to the ground. He didn't change his position, and his head was rammed through the wing. He lost several gold teeth, and that was all.

Folks, Meet the Prince.

THIS fellow thought a prince should have a pet monkey and blooded dogs. He called himself Prince Louis Henri de Chateroux de Bussigny de Bourbon, but New York police allege he is Harold Schwarm, a factory hand, and beau brummel of New Britain, Conn. They would like to find him to ask about four or five girls who claim him as their husband.

Be Careful! Don't Pet Him.

THIS hedgehog, which recently became an inmate of the London Zoo, is not only unusual because of his long ears, but his quills are also longer than ordinary. None of the spectators have attempted to fondle him since his arrival.

From Montreal to New York City.

ANTOINE CHAUVINE and Philippe Brals, prominent Canadian attorneys, finish thrilling canoe trip from Montreal to New York. They made 412 miles in 10 days, paddling 9 hours a day.

WOMEN have their styles. Why not men? This is the new idea of being attractive on the beach by wearing a pretty, flowered robe over one's bathing suit.

A regular little "tempest in a teapot." The smallest marmoset monkey in the world owned by Mrs. J. W. Brown of London, England. The little animal weighs only seven ounces, but he can cut up just as many monkey-shines as the regular fellows do.

THE famous comedian, Charlie Chaplin, all dressed up, is a handsome looking fellow.

"THE" layingest hen that ever laid. This bird laid its first egg when 7 months old, and in the 561 days that followed laid 505 eggs. Mrs. J. J. Skinner of San Diego, Cal., who is holding the hen, believes she has the champion egg layer.

A King in Suspenders.

IT'S NOT often that a ruler is seen so intimately garbed as King Alfonso of Spain was photographed, trudging along with his coat peeled off, while visiting peasants in "Los Hurdas," the most desolate and remote region in all Spain.

Good News for the Young Men.

SHEILA TERRY, now Mrs. Roy Sedley of San Francisco, decided that the fairest thing to do with the young man she had jilted was to stand her share of the courtship expenses, so she paid a bill of \$150. Sheila, by her action, has constituted one of the most dangerous precedents in the annals of wooing. Now what chance has a poor girl got?

Strikes Can Wait. But Cupid Never.

SERGEANT FRANK BECKER of the Illinois Guards and Theresa Frank of Chicago had everything arranged for their wedding when he was ordered to rail strike duty at Bloomington. So they were married at camp, and Becker's commander, Lieut.-Col. Richmond, assured them of good luck by being the first to kiss the bride after the ceremony.

WOMEN'S HOME AND MAGAZINE PAGE

Highland Golf Club Getting Peep At Very Own Cosy Home Monday

The fact that the clubhouse at the Highland Golf Club is to throw open its doors for the first time on Monday is arousing pleasurable anticipation, especially among the women members. The broad verandas, which have been built around the substantial-looking square brick house, were completed some days ago, and assurance is given that the peep show will be a very good one. Inside the clubhouse, which has been decorated by decorators and electricians have been busy and furnishings are all in place. From the capacious electric range in the kitchen to the last chintz curtain in the ladies' lounge and writing-room.

The experienced steward has been in charge for several days, and the first hospitality dispensed in the new clubhouse will be the serving of luncheon at noon Monday. After that all will be in order for afternoon tea in the dining-room, sitting-room, on the verandas, or out under the trees, or under the old apple trees. Ability to remain for dinner will add to the hours in which the links can be enjoyed by the members.

Throughout the clubhouse deep blue and tan have been chosen as the keynotes in decoration, worked out with dignity and charm in the dining-room at the end of the central entrance hall, and the big men's lounge

on the east side. Across the hall is the spacious ladies' lounge, in which the decorators have "said it with chintz." Very special consideration has been shown for the women members in the arrangement of the clubhouse, with the whole of the second floor turned over to them. Down the entire length at one side is the locker room, with a number of shower baths. Over the way are two well-equipped dressing-rooms, and tucked in at the front a cosy writing-room, overlooking the green lawn with their gay flower beds, and away beyond, right over the top of London. The men's lockers, shower-baths and dressing-rooms have been relegated to the "annex." True, the original purpose it served before the Highland Golf Club materialized was that of a barn. With its coat of straw and the transformation effected inside, its plebeian early estate will soon be entirely forgotten.

The ceremonious opening of the clubhouse has been postponed until later, when more of the members are in town, and possibly blazing fires on the lounge hearth will be much more acceptable than in this present August weather. There is even a possibility this may be deferred until the permanent eighteen-hole course is completed.

CHILDREN'S HOSPITAL WELCOMES POTENTATE

Committee Hostesses Present Mrs. McCandless With Corsage of Sweet Peas and Roses.

Members of the War Memorial Children's Hospital committee appointed to act as hostesses at the hospital Thursday expressed themselves as delighted with the opportunity afforded to get a glimpse of the genial imperial potentate of the Shriner, Mr. James S. McCandless of Honolulu, and his charming wife, when they paid a brief visit of inspection. Most gratifying to the number present who have been working indefatigably to see the hospital an accomplished fact were the complimentary things said of it by the distinguished visitors.

Prominent guests also of the occasion were Mrs. J. Reid of Windsor, potentate of Mocha Patrol, and Mrs. Reid, Lieut.-Col. W. M. Gartshore, chairman of the hospital building committee, and also of the hospital trust, was first in the receiving line. With him were Mrs. Gartshore, Mrs. J. J. Foote, Mrs. E. B. Smith, regent of the Municipal Chapter, I. O. D. E., Mrs. P. J. Greenaway, honorary secretary of the hospital committee, and Mrs. A. E. Miller. On behalf of the hospital committee, Mrs. Greenaway presented Mrs. McCandless with a corsage bouquet of sweet peas and sunset roses. Accompanying Mrs. McCandless were Mrs. W. H. Abbott and Mrs. W. W. Gammon.

Among others present were Mr. James Gray of the hospital trust, Mr. R. H. Heard, Miss Elizabeth Ross and Miss Callard, representing the Victoria Hospital staff, and a number of city doctors, as well as civic officials.

Chin Strap

The newest hat style from Paris shows the chin strap effect, but the strap isn't tight enough to prevent one from talking.

Personals

Miss Clara Moore was a visitor in Woodstock this week.

Mrs. E. C. Bowker is spending the week-end in Toronto.

Mrs. Arthur Butchart is visiting in Toronto and Hamilton.

Miss Marian Stark of this city is the guest of Miss Irene Anderson in Windsor.

Mrs. Moore of Ann Arbor is returning home after a visit with Mrs. Harris Elliott.

Mrs. Ed. Westland left Friday for Winnipeg to visit her brother, Mr. William Jex.

Mr. and Mrs. W. McRoberts of Cambricht are visiting in Goderich and London.

Mrs. I. Lockley of Rochester, N.Y., is the guest of Mrs. C. L. Campbell, Queen's avenue.

Miss Frances Farren of New York City is the guest of the Misses West- by, 393 William street.

Mr. and Mrs. W. H. Parker and Miss Gertrude Parker have left on a motor trip to Kingsville.

Mr. George T. Hiscow and Mrs. Hiscow have returned after a trip of several weeks to England.

Miss Nettie Jones has left on a two weeks' visit to friends in Detroit, Windsor and Cambricht.

Mrs. J. D. Tyrell has returned to Toronto after spending a week in town with Mrs. C. L. Campbell.

Kenneth Dunlevy is spending a couple of weeks in Windsor, staying with his sister, Mrs. J. J. Pierney.

Miss Ada Pape and her niece, Miss Amelia Moss, are visiting in Kitchener, guests of Mr. and Mrs. Fay.

Mr. Dave Reece, superintendent of the Polk Printing Company, Detroit, spent a day or two in London this week.

Mrs. E. J. Liddicoat, Hellmuth avenue, has returned home after a pleasant fortnight holiday in Muskoka.

Miss Jennie Duncanson of Ann Arbor, Mich., is visiting her aunt, Mrs. Macoun, and Miss Moore of Lambeth.

Mrs. John Jones, 368 Horton street, has returned to the city after a happy visit to her old home in Mount Brydges.

Miss Margaret Smith of the Brockville Collegiate Staff is visiting her sister, Miss N. Smith, Colonial Apartments.

Mr. and Mrs. Fred Dalton of Detroit returned home by motor after a pleasant visit with friends and relatives in London.

Miss Viola Grose of Granton has been spending the past week in town with her cousins, Misses Dorothy and Irene Burnett, 146 Maitland street.

Misses Annie Turner, Maude Turner, Ida Westman, Christine Livens and Lena Rapley are guests at the Nephewin, Lake Rosseau, Muskoka.

Mrs. Marshall and Miss Marshall of Toronto, who are spending the remainder of the summer in London, have gone to Goderich for a few days.

Messrs. Frank and Noel Steers of Ottawa have returned home. They have been in London for the past two months in connection with a survey party.

Mr. and Mrs. Charles Mason and Miss Lucy Mason, Queen's avenue, are also in Clinton attending the Tanner-Walker wedding. Mrs. Mason is an aunt of the bride.

The Waukeeta Club held an enjoyable dinner party at the Bungalow Tea House this week. The tables were arranged with summer flowers, and covers were laid for sixteen.

Misses Lillian and Jessie Summers have returned home after pleasant visits with their brother, Mr. Edmond Summers of Toronto, and their sister, Mrs. Charles Miller of Hamilton.

Mr. John Tagg, general secretary of the Y. M. C. A. of Lockport, N.Y., with Mrs. Tagg and daughter are visiting their uncle, Mr. George B. Tagg and the Misses Tagg at 144 Colborne street.

Mr. and Mrs. Richard Greensides are in Clinton attending the wedding of the latter's niece, Miss Grace Isabel Walker, daughter of Mr. and Mrs. William Walker, to Mr. Wilfred M. Tanner, which is taking place at high noon Saturday.

Miss Mildred Delke of Washington, D.C., is visiting her sister, Mrs. J. Brown, Wellington street north. She will spend a couple of weeks in London, and is then going on to Toronto, where she will be the guest of her sister, Mrs. Arthur Adams.

The girls of the Cavell Club of Centennial Church were charming hostesses on Thursday evening when they entertained their friends at a lawn fete. Among gay decorations of Japanese lanterns and ribbon streamers games were entered into with zest, after which a delightful supper was served. The committee in charge consisted of Nellie Warner, Helen Carrothers, Mattie Young and Lillian Parker.

HEMORRHOIDS
Do not suffer another day with itching, bleeding, or protruding piles or hemorrhoids. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c a box; 25c dealers, or Edmanston, Bates & Co., Limited, Toronto. Sample box free.

MAIL-BOX RULES.
1. Write on one side of paper only.
2. Sign name and address.
3. Inclose stamped envelope for postage, patterns, etc.

ARTICLES NECESSARY FOR LAYETTE.

Dear Miss Grey—This is my first letter to your Mail-Box, but I have been an interested and sympathetic reader for some time.

I have a very nice vegetable garden, and I thought if some of the needy in the city who have no garden would write I could send them a few vegetables, cucumbers, carrots and beets. I also have beans, but they do not keep fresh long when picked. I could send enough for a few days anyway if the family isn't too large.

I also have a green heather jersey suit coat. The skirt is gone, but I thought as the coat is a sport model with large side pockets it might do for a young girl for school. It's size 38, I think. I have another suit coat of blue serge. It wouldn't be suitable for a separate coat, of course, but the serge is good and it might be made over for a small girl's reefer.

Worried if some of the experienced mothers would come to my rescue? I am preparing for my first baby, and would like to know what is necessary for a complete and sensible layette. I am making everything myself and would like it as nice as possible, of course. I am very sorry my first letter reached such dimensions, but hope you can find room for some of it. Best wishes to all the Boxites. Am inclosing wee mite.

HAPPY.
If the express on cool vegetables does not come very high it would be a great treat for some poor souls to receive nice fresh vegetables. I am a vegetarian myself, and am always sorry when the season is through, and one has to resort to canned goods. I will give your address to anyone wishing the articles of clothing, or the vegetables, you have so kindly offered. Many thanks too, for the hospital mite. Part of your letter goes under the head of advertising, and I am unable to publish it.

The following is a layette, which has been compiled by the Victorian Order of Nurses, and contains only the essential articles:—

Layette—Only Essentials.—Three day slips, 3 flannellette night slips, 3 flannellette Gertrude slips, 3 straight bands (wool and cotton mixed), 3 knitted bands (wool and cotton mixed), 3 shirts, 3 pairs long wool stockings, 8 cheesecloth quilted pads, 24 diapers, 2 washable wraps of flannel.

ADVERTISER PATTERNS

A Popular Style.
4017—This jaunty style is girlishly graceful and withal comfortable. The jaunty collar is finished with "Dotted Swiss" and is combined in this instance. Gingham and linen would be equally attractive. The pattern is cut in three sizes: 12, 14 and 16 years. A 15-year size requires 4½ yards of 32-inch material. One may have this dress finished as a one-piece style, or with separate blouse and skirt. Pattern mailed to any address on receipt of 15 cents in silver or stamps. Address all pattern orders to the pattern department.

Name
Town
Province
Age (if child's or misses' pattern)
Measurement: Bust Waist
CAUTION: Be careful to inclose the above illustration, and send size of pattern wanted. When the pattern is sent measure, you need mark only 38, 44 or whatever it may be. When in waist measure, 22, 24, 26, or whatever it may be. If a skirt, give waist and length measure. When misses' or child's pattern, write only the figure representing the size. It is not necessary to write "inches" or "yards." Patterns cannot reach you in less than one week from the date of application.

SO MANY PEOPLE ARE NERVOUS

"Fruit-a-tives" the Greatest of All Nerve Remedies.

This Fruit Medicine Restores Health.

The increase in the number of persons suffering from Nervousness is world-wide; due in a measure, to the reaction following the war. Sleeplessness, Headaches, Mental Depression, Rheumatism, Nervous Dyspepsia, Bad Heart Action, are the results of a disturbed condition of the Nervous System.

The nerves and the blood are so intimately, so vitally connected that the condition of one is bound to affect the condition of the other. If the blood is laden with impurities, it is impossible to have strong, steady nerves.

The first essential in treating nervous troubles is to purify and enrich the blood. This, "FRUIT-A-TIVES" will do.

"FRUIT-A-TIVES" stimulates the bowels, kidneys and skin and purifies the blood. "Fruit-a-tives" improves appetite and digestion and insures food being properly digested, thus enabling the blood to carry wholesome nourishment to build up the body, particularly the nerves. Men and women who take "Fruit-a-tives" for some form of nervousness—because they cannot eat or sleep or work or enjoy life—say that this fruit medicine is simply marvelous in its action.

50c a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid by Fruit-a-tives, Limited, Ottawa, Ont.—Adv.

Fine for Skin Exposed to Sun or Flying Dirt

These days the face needs special care and attention. Flying dust and dirt, the heating sun, are severe on any skin. Their despoiling effects are best overcome by the application of pure melleocized wax. This keeps skin and pores in a cleanly condition, the complexion beautifully soft, spotless. Reddened, tanned, freckled or roughened cuticle is actually absorbed by it. One ounce of melleocized wax, obtainable at any drug store, is sufficient to completely renovate a soiled complexion. It is used like cold cream, allowed to remain on over night, and washed off in the morning. Fine lines and even the deeper wrinkles often appear at this season. In such cases nothing is better than a face bath made by dissolving an ounce of pure powdered exfolite in a half pint of water. This is remarkably effective.—Adv.

MIRACLE
WASHING CREAM
"THE WASH LADY IN A BOTTLE."
Costs less than five cents a washing.
No need of rubbing—Use Miracle.
At Your Grocer's

RIDLEY COLLEGE
For BOYS
St. Catharines, Ontario
Upper School
H. C. Griffith, M.A., Principal.
Lower School
H. G. Williams, B.A., Principal.
IDEALLY situated in the Garden of Canada, 80 acres of magnificent grounds, Canadian Residential College. Four separate dormitories. Separate Lower School for boys up to 14. Course leading to prize, honour and scholarship matriculation to universities, B.M.C. and business. For illustrated prospectus write
The Banner, Ridley College, St. Catharines, Ont.
School re-opens September 12.

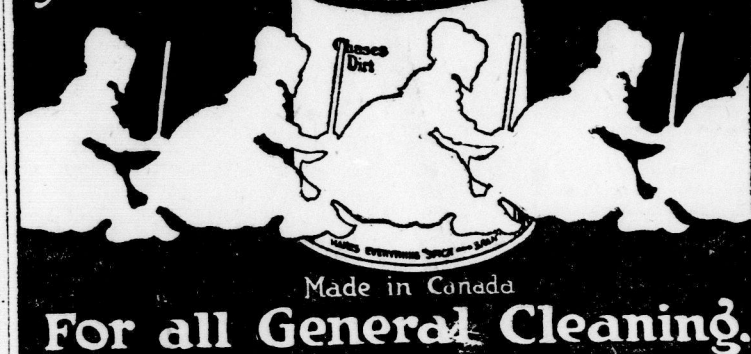

FRESH MUSHROOMS AND FROGS' LEGS ARE DELICIOUS
They are a delicacy that delights the palate of most people. We are now serving some of special quality. Try them.

Wong's
434 Richmond Street.
Where Appetite Meets Satisfaction.

Preserving Plums Ready
Good varieties of preserving plums, Bradshaws and Gages, are now on the market at reasonable prices. The mark of the Niagara Peninsula Growers, Limited, Grimsby, Ontario, on the containers stands for carefully-packed, evenly-graded fruit.

Old Dutch

Soft and flaky—wont scratch—Contains no lye or acids. Goes further—does better work.

The advertisements in your own daily newspaper safeguard your purse. They are the traffic police of the world's commerce, turning the stream of human earnings into well charted highways.

Manufacturers and merchants in their advertisements tell you the latest news about the world's efforts to keep you in health, happiness and comfort. They stake their success, their reputation and their pride on the truth of these public claims they make for their products. The fate of an advertised article is in your hands and the maker knows that it is. He must back his statements with honest values or be smothered under competition.

Unless you read the advertisements in your daily newspaper you overlook that half of the day's news which tells you what is being made to keep you in comfort and luxury, not ten years from now but today.

Issued by the Canadian Daily Newspapers Association, Toronto.

The RED HOUSE MYSTERY

by A. MILNE

(Continued From Our Last Issue)

Bill pushed it through the mouth-piece, blew again, said, "That's better," and returned the pipe to his pocket.

"How are we going to get out without Cayley knowing?"

"Well, that wants thinking over. I wish we were sleeping at the inn. Is this Miss Norbury, by any chance?"

Bill looked up quickly. They were close to Jallands now, an old thatched farmhouse.

"Yes—Angela Norbury," murmured Bill. "Not bad-looking, is she?"

The girl who stood by the little white gate of Jallands was something more than "not bad-looking," but in Bill's eyes she must be judged and condemned by all that distinguished her from Betty Calladine.

Angela, unimpaired by these standards of comparison, she seemed, quite simply, beautiful.

"Cayley asked us to bring a letter along," Bill explained to Betty Calladine. "Here you are."

"You will tell him, won't you, how dreadfully sorry I am about—about what has happened? It seems so hopeless to say anything; so hopeless even to believe it. It is true, what we've heard."

Bill repeated the outline of the events of yesterday.

"Yes... And Mr. Ablett hasn't been found yet?"

"No."

She shook her head in distress. "It still seems to have happened to somebody else; somebody we didn't know at all." Then, with a sudden grave smile which included both of them, "But you must come and have some tea."

"It's awfully decent of you," said Bill awkwardly, "but we—"

"You will, won't you?" she said to Antony.

"Thank you very much."

Mrs. Norbury was delighted to see them, as she always was to see any man in her house who came up to the necessary standard of eligibility. When her life work—a completed, and summed up in those beautiful words: "A marriage has been arranged, and will shortly take place, between Angela, daughter of the late John Norbury... Then she would utter a grateful Nunc dimittis and depart in peace to a better world, if heaven insisted, but preferably to her new son-in-law's more dignified establishment."

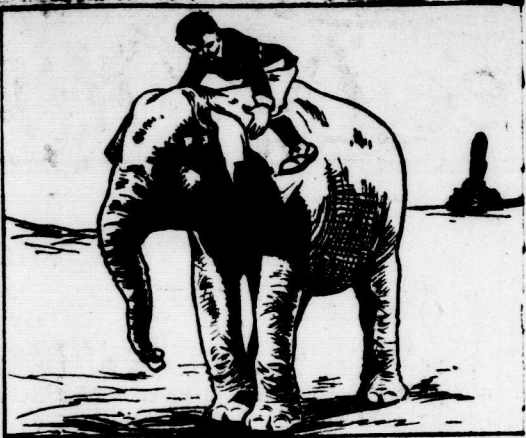

But it was not as "eligibles" that the visitors from the Red House were received with such eagerness today, and even if her special smile for "possibles" was there, it was instinctive rather than reasoned. All that she wanted at this moment was news—news of Mark. For she was bringing it off at last; and, if the engagement columns of the "Morning Post" were proof, as in the case of its obituary columns, by a premonitory bulletin, the announcement of yesterday would have cried triumphantly to the world, or to such part of the world as mattered: "A marriage has very nearly been arranged (by Mrs. Norbury), and will certainly take place, between Angela, only daughter of the late John Norbury, and Mark Ablett of the Red House."

The girl was often amused by her mother's ways; sometimes ashamed of them; sometimes distressed by them. The Mark Ablett affair had seemed to her particularly distressing, for Mark was so obviously in league with her mother against her. It was a pleasure to turn to Cayley, that hopeless ineligible.

JACK DAW'S ADVENTURES

JACK RODE MERRILY ALONG THE ROAD ON BOARD THE OLD ELEPHANT'S BACK. THIS WAS SOMETHING NEW FOR HIM AND HE ENJOYED EVERY MINUTE OF IT.

AFTER HE HAD RIDDEN IN THIS MANNER FOR A FEW MILES JACK FOUND THAT THE ELEPHANT'S BACK WAS NOT AS SOFT AS A WAGON. THE LITTLE BAREBACK RIDER THEN CHANGED HIS POSITION.

THE BIG LUMBERING ELEPHANT HAD NOT STOPPED ONCE DURING THE DAY, SO THEY HAD COVERED A GOOD MANY MILES THE HUGE ANIMAL NOW STOPPED, HOWEVER, AND REFUSED TO SUDGE ANOTHER INCH.

JACK THOUGHT THAT THE MYSTERIOUS OLD MAN HAD GIVEN THE ELEPHANT ORDERS TO CARRY HIM JUST SO FAR, SO HE HOPPED OFF THEN THE ANIMAL TURNED, AND STARTED BACK. CONTINUED IN NEXT CHAPTER.

BY ELTON

"Ah!" said Antony, under his breath. He had been waiting for it. He would have liked now to have gone away, so that he might have thought over the new situation by himself. But Mrs. Norbury was still talking.

"Girls are so foolish," Mr. Gillingham said. "It is fortunate that they have mothers to guide them. It was so obvious to me from the beginning that dear Mr. Ablett was just the husband for my daughter."

"THINK OF MY FEELINGS AS A MOTHER."

Little girl. You never knew him?"

Antony said again that he had not seen Mr. Ablett.

"Such a gentleman. So nice-looking, in his artistic way. A regular Velasquez—I should say Van Dyck."

Angela would have it that she could never marry a man with a beard. As if that mattered, when—? She broke off, and Antony finished her sentence for her.

"The Red House is certainly charming," he said.

"Charming. Quite charming."

She gave a deep sigh. Antony was about to snatch the opportunity of leaving, when Mrs. Norbury began again.

"And then there's this scapegrace brother of his. He was perfectly frank with me, Mr. Gillingham. He told me of his brother, and I told him that I was quite certain it would make no difference to my daughter's feelings for him... After all, the brother was in Australia."

"When was this? Yesterday?" Antony felt that, if Mark had only mentioned it after his brother's announcement of a personal call at the Red House, this perfect frankness had a good deal of wisdom behind it.

"It couldn't have been yesterday, Mr. Gillingham. Yesterday—" she shuddered, and shook her head.

"I thought perhaps he had been down here in the morning."

"Oh, no! There is such a thing, Mr. Gillingham, as being too devoted a lover. Not in the morning, no. We both agreed that dear Angela—Oh, no, no; the day before yesterday, when he happened to drop in about tea."

"It occurred to Antony that Mrs. Norbury had come a long way from her opening statement that Mark and Miss Norbury were practically engaged. She was now admitting that dear Angela was not to be rushed, that dear Angela had, indeed, no heart for the match at all.

"The day before yesterday, as it happened, dear Angela was out. Not that it mattered. He was driving to Middleton. He hardly had time for a cup of tea, so that even if she had been in—"

Antony nodded absently. This was something new. Why did Mark go to Middleton the day before yesterday? But, after all, why shouldn't he? A hundred reasons unconnected with the death of Robert might have taken him there.

He got up to go. He wanted to be alone—alone, at least, with Bill. Mrs. Norbury had given him many things to think over, but the great outstanding fact which had emerged was this: that Cayley had reason to hate Mark. Mrs. Norbury had given him that reason. To hate? Well, to be jealous, anyhow. But that was enough.

"You see," he said to Bill, as they walked back, "we know that Cayley is perishing himself and risking himself over this business, and this must be for one of two reasons. Either to save Mark or to endanger him. That is to say, he is either wholeheartedly for him or wholeheartedly against him. Well, now we know that he is against him, definitely against him."

"They had come to the gate into the last field which divided them from the road."

"Tolly little place, isn't it?" said Bill.

"Very. But rather mysterious. Isn't there a drive, or a road or anything?"

"Oh, there's a cart-track, but motor cars can't come any nearer than the road."—he turned round and pointed—"up there. So the week-end millionaire people don't take it. At least, they'd have to build a road and a garage and all the rest of it, if they did."

"I see," said Antony carelessly, and they turned round and continued their walk up to the road. But later on he remembered this casual conversation at the gate, and saw the importance of it.

CHAPTER XVI.

WHAT was it which Cayley was going to hide in that pond that night? Antony thought that he knew now. It was Mark's body.

(Continued in Our Next Issue.)

MOLDED RICE WITH FRUIT

RICE lends itself to many treatments and easily becomes a different dessert. It may be cooked in water, but is richer and has more food value if cooked in milk. Skimmed milk may be used and cream served with the rice. All kinds of fruits—dried, canned or fresh—may be combined with the cooked rice.

The following recipe is a good cold rice dessert:

1 cup washed rice
4 cups milk
1 teaspoon vanilla
2 strips of lemon or orange rind
In a double boiler heat the milk and add the rice, salt and lemon or orange rind. Cook about one and one-half hours, or until the rice is tender.

Add sugar, remove from fire and cool. Then fold lightly in the beaten cream, and turn the mixture into a mold.

Thoroughly chill, and at serving time turn from mold and surround with the fruit.

(Cut this out and paste it in your cook book.)

Cynthia Grey's Mail-Box

TO MAKE BREAD.

Dear Miss Grey,—Could you or any of the Boxites kindly tell me how to make first-class home made bread as I am a new beginner and am having poor luck with my bread, also how to make good elderberry pie, and how to cook summer squash. Hope I am not asking too much, and will try to return the favor another time. Thanking you in advance,

LARKSPUR.

The best results are gained from having everything in connection with the setting of the sponge quite warm, and keeping it warm.

Yeast in the house is none too good for the sponge while rising, for we have the whole week after to enjoy or regret the care for a few short hours of attention. A small board about 12x18 inches is large enough to mould the loaves on, and handy too.

The very best of flour is the cheapest, for with good bread, very little yeast is needed. Here is Conie's method of making yeast and bread:

"I often make the yeast two or three days before I need to set bread, but the only object in doing so is that there will be no chance of being caught short. We never know when a neighbor may borrow a loaf, or some one may be called for on short notice. But to make the yeast the day or evening before is quite as good."

Yeast—I save the potato water, and when the potatoes are taken up for dinner I leave two tablespoons in the pot. After dinner I mix one tablespoon of flour into the potatoes and add about two cups of the water, stir well and boil it set off to cool. Then soak one-third yeast cake in one-quarter cup of warm water. When batter is ready beat in the yeast cake (and beat for five minutes as though it were white of eggs), then pour it into a quart jar and put jar into cosy and leave in a warm place to rise, turning sometimes to get even heat. The yeast will rise and then fall; then I put it away where it won't freeze until needed.

To set the sponge—Into a small quart measure I put ½ cup of white sugar, one teaspoon of salt, ½-inch slice of butter or other shortening. Half fill the measure with boiling water and stir to melt it. While cooking, put about five quarts of flour into kneading pan, set it on the stove and stir constantly till quite warm.

It occurred to Antony that Mrs. Norbury had come a long way from her opening statement that Mark and Miss Norbury were practically engaged. She was now admitting that dear Angela was not to be rushed, that dear Angela had, indeed, no heart for the match at all.

"The day before yesterday, as it happened, dear Angela was out. Not that it mattered. He was driving to Middleton. He hardly had time for a cup of tea, so that even if she had been in—"

Antony nodded absently. This was something new. Why did Mark go to Middleton the day before yesterday? But, after all, why shouldn't he? A hundred reasons unconnected with the death of Robert might have taken him there.

He got up to go. He wanted to be alone—alone, at least, with Bill. Mrs. Norbury had given him many things to think over, but the great outstanding fact which had emerged was this: that Cayley had reason to hate Mark. Mrs. Norbury had given him that reason. To hate? Well, to be jealous, anyhow. But that was enough.

"You see," he said to Bill, as they walked back, "we know that Cayley is perishing himself and risking himself over this business, and this must be for one of two reasons. Either to save Mark or to endanger him. That is to say, he is either wholeheartedly for him or wholeheartedly against him. Well, now we know that he is against him, definitely against him."

"They had come to the gate into the last field which divided them from the road."

"Tolly little place, isn't it?" said Bill.

"Very. But rather mysterious. Isn't there a drive, or a road or anything?"

"Oh, there's a cart-track, but motor cars can't come any nearer than the road."—he turned round and pointed—"up there. So the week-end millionaire people don't take it. At least, they'd have to build a road and a garage and all the rest of it, if they did."

"I see," said Antony carelessly, and they turned round and continued their walk up to the road. But later on he remembered this casual conversation at the gate, and saw the importance of it.

CHAPTER XVI.

WHAT was it which Cayley was going to hide in that pond that night? Antony thought that he knew now. It was Mark's body.

(Continued in Our Next Issue.)

Irritable People

Are Usually Victims of Poor Blood and Weak Nerves.

Irritability is one of the manifestations of nervousness, and it becomes worse as the nerves become more unstrung and approach a state of exhaustion. No one is irritable from preference, and this state is often only the outward expression of a great deal of physical suffering which friends do not realize. It is accompanied by headaches, sleeplessness, nervous indigestion and depression. Unless it is promptly checked more serious trouble develops.

The treatment for the earlier stages of nervousness, as well as the more advanced condition, is one of nutrition of the nerve cells, requiring a tonic. As the nerves get their nourishment from the blood, the treatment must be directed towards building up the blood. Dr. Williams' Pink Pills act directly on the blood, and have proved of the greatest benefit in a great many cases of this kind. A tendency to anaemia or bloodlessness, shown by most nervous people, is also corrected by these tonic pills. This is shown by the case of Mr. Kenneth R. McDonald, of New York, who says: "For a long time I was a severe sufferer from nervous trouble, with the result that I grew pale and weak, lost weight, slept poorly, and always felt tired out. Various medicines I tried had no beneficial effect, until finally I was persuaded to try Dr. Williams' Pink Pills. I found these just what I needed, as after taking them a couple of months I not only gained in weight, but felt stronger, more cheerful and better in every way. I feel that I cannot praise these pills too highly for what they have done for me."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, at 50 cents a box or six boxes for \$2.50. From The Dr. Williams Medicine Co., Brockville, Ont.

Fall Fashions For the Little Ones

PEG-TOPPED rompers are fashionable for very young men, and shops are showing blower dresses with a new collar for small girls. An attractive example of the latter was made of tangerine-colored cotton crepe and trimmed with brown velvet ribbon stitched with blue and brown yarn.

Velveteen, by the way, is expected to be fashionable for all two to ten-year-olds—at least, so we are told by those designers who consider children's clothes very serious matters.

Velveteen will be used especially for little girls' dresses, and the favorite trimmings will be ribbon quilting and hand embroidery.

Long waisted and straight lines, they tell us, will be modish for little girls as well as their mothers, and several new materials are promised for coats and dresses.

Radio Radiations

DETROIT, Mich., Aug. 18.—Passengers taking the 30-minute flying trip between Detroit and Cleveland may soon be listening in on radio concerts during their journey.

Experiments with a radio set in the cabin of one of their flying boats have led officials of the company owning them to plan the installation of a permanent set in each boat.

PASSENGERS LISTENING IN ON RADIO OF A DETROIT- CLEVELAND FLYING BOAT LOWER RIGHT, HOWARD E. CAMPBELL, OPERATING THE RADIO SET, CENTER, ONE OF THE BOATS.

These experiments were made with the co-operation of Howard E. Campbell, chief radio engineer of the Detroit News broadcasting station, WWJ. Campbell installed a three-foot loop antenna with a three-stage radio frequency and three-stage audio frequency set for reception of a special concert broadcast from WWJ.

A loud speaker was also installed, but the noise of the powerful motors overhead drowned out the music from the horn. When ear phones were put in place, however, the music came clearly. At times it was found unnecessary to use the radio-frequency tubes.

LONDON, Aug. 18.—The widely scattered dominions and territories of the British Empire will be more closely united by radio.

Work is going on rapidly toward the completion of a wireless system by which almost instant communication between the mother country and its dependencies will be possible. This work has been entrusted to a wireless commission of experts in connection with the engineering department of the general post office.

Back in 1919, parliament appointed an imperial wireless telegraph committee to consider the scheme of intercommunication between all parts of the British Empire. The next year this committee advised the establishment of imperial wireless stations at distances of about 2,000 miles, connecting the various communities of the empire.

On the basis of this report, a wireless commission of experts was appointed. This commission has just issued its findings for the installation of radio lines connecting the British Empire.

They are planned to be of even greater power than the immense Marconi station at Carnarvon. Here a panel of some 60 large transmitting tubes are used, capable of putting into the great aerials currents of 300 to 400 amperes. The radio waves so generated, it is said, will be of even greater power than the immense Marconi station at Carnarvon. Here a panel of some 60 large transmitting tubes are used, capable of putting into the great aerials currents of 300 to 400 amperes. The radio waves so generated, it is said, will be of even greater power than the immense Marconi station at Carnarvon.

THOROUGH TRAINING AIM OF
O'BRIEN BUSINESS COLLEGE

Graduates of School Now Hold Responsible Positions in Cities of Dominion.

Among the outstanding commercial schools of the province London may justly boast in possessing the O'Brien Business College, one of the foremost of its kind. It numbers its successful graduates by the hundreds, and is constantly expanding in influence and efficiency.

The success of the school, which warrants the prediction that it will eventually develop into a great extension institute with a continent-wide system of correspondence courses, centers about the personality and ability of William J. O'Brien, its founder and principal.

Mr. O'Brien was born and reared in the city. He was educated in the public schools and the Collegiate Institute. Mr. O'Brien holds a Collegiate Institute commercial specialist's certificate, and a chartered accountant's intermediate certificate, and has had several years' experience as public accountant.

In less than six years, Mr. O'Brien, by hard work, combined with up-to-the-minute methods, and assisted by qualified public school and collegiate institute teachers, who give strictly individual instruction, has built up a business college that has a reputation for thoroughly trained graduates.

Graduates of the O'Brien Business College are now holding responsible positions in Toronto, Hamilton, Winnipeg, Vancouver, Vergerville, Alberta; Buffalo, Cleveland, Chicago, Detroit, Windsor, Sarnia, Wallaceburg, Kitchener, Brantford, Ingersoll, St. Thomas, Hart, Michigan, and other places, besides the large number of business firms in the city that are demanding efficiency in their offices, and asking for graduates of the O'Brien Business College.

The commercial department is equipped with the most modern desks, chairs, and the typewriting department has the latest Underwood typewriters and Dalters calculating machines. The fastest typist in Western Ontario for the past two years has been a graduate of the O'Brien Business College.

LAYS SUCCESS TO HARD AND STEADY PLUGGING
L. R. Folley, Proprietor of Commercial Electric Company, Started as Helper.

When L. R. Folley, proprietor of the Commercial Electric Company, 477 Richmond street, one of the largest electrical firms in the city, first entered the business in London more than 27 years ago, incandescent lamps were rare indeed, and he remembers well the old-fashioned arc lamps which had to be trimmed every little while or there would be no illumination.

Mr. Folley served his apprenticeship with the London Electric Company, and began at the bottom of the ladder as a helper. He remained with the same firm for more than 16 years, and when he handed in his

Succeed In London

LONDON is a city eminently designed for progress. All indications point to a definite forging ahead in the business life of the city. Its transportation facilities, as the hub of Western Ontario are unexcelled and its manufacturing concerns are among the foremost in the Dominion. Its industrial advantages are superb, for, in addition to its transportation facilities, it combines easy access to an adequate supply of labor and raw material.

Not alone in material advantages, however, is London making progress. These would be of no avail, were it not for the splendid spirit of citizenship, which prevails throughout the city, and the carrying out of the social service motto, "Each for all and all for each."

Pleasant home surroundings and home life make men certain to put forth their best efforts for themselves and the city.

London is a city destined to become great. It has steadily progressed during the past years from a small group of pioneer homes clustered in a forest to a foremost place in the Dominion and even greater things are in store for those who work for and with the city of London and succeed with it.

resignation to branch out for himself, held the important position of chief electrician. On July 19, 1905, he, with Wesley Forbes, opened an electrical store on the premises of the Grand Opera House, a few doors north of his present location. After four years the partnership was dissolved. Mr. Forbes going out west. Since then Mr. Folley has been sole owner of the Commercial Electric Company.

"My success in the electrical business is due to hard work and steady plugging, every day and not a few nights," was a comment he made in the midst of his reminiscences. The business has grown from a small store and clientele until now the Commercial Electric is regarded as one of the leading and most reliable stores of its kind in the city of London.

Everything imaginable in connection with electrical supplies for the home, office or factory is stocked by this progressive firm. One who could devote a few minutes to examining Mr. Folley's stock, such as fixtures, artistic lamps of all designs, boudoir lamps, electric bells, vacuum cleaners, and kitchen utensils, such as irons, toasters and grills, would come to the conclusion that the Commercial Electric Company has the largest stock of any store of its kind in London.

Most of the glass shades on the fixtures are hand-painted and all are imported from the best known firms on the continent. The most artistic of electrical novelties that have become very scarce, and are rarely seen since the war, are kept for sale in Mr. Folley's store. They are the genuine French bronze images. These can be obtained with either one or two lights, and make a very pretty decoration for the mantel or hall table.

Every kind of wiring is done by the firm, house, telephone, bell, factory, as well as installing electric motors. The Commercial Electric Company has wired some of the largest business concerns in the city, and have secured the electrical contract for the new Cowan hardware store that is being erected on Dundas street.

APPOINT FUEL OFFICIALS.
QUEBEC, Aug. 17.—F. L. Yanklyn, vice-president of the C. P. R., and Arthur Picard of Quebec were appointed at today's cabinet meeting as representatives of the Province of Quebec on the federal fuel committee.

Cows used for milk production in New Zealand are all subject to veterinary examination. Shoplifting is said to be a "seasonal" crime, the worst periods being when the sales are on. Goldfish were first brought to London sixty years ago.

NO ELECTRICAL JOB TOO BIG
FOR STEWART AND MORKIN

Modern Equipment Insures Satisfaction at Shop on Fullarton Street.

"Never lost a customer in ten years" is the proud boast Stewart & Morkin, electric motor experts, make in regard to their work of rewinding and repairing motors.

There is no motor too small or too large that, when it burns out, does not need an expert to put it in proper running order.

This business, that has been in existence more than ten years, has been built up on the policy of efficiency and service. All the employees, from the manager down, have a thorough practical knowledge of their work, and absolute satisfaction is assured to anyone having trouble with motors or generators of any kind or type.

A fully-equipped workshop on Fullarton street, with a large staff of experts, enables this firm to do any kind of work on electric motors, besides handling the Bosch magneto service for the city.

Stewart & Morkin have made their business and reputation on service, and are ready at all times to attend to any trouble in a motor, from the one in a sewing machine to the largest motor made.

"WE KNOW HOW" IS SLOGAN OF AUTO ELECTRIC SERVICE
Proprietors Served as Electrical Experts With Canadian Transport Service in France.

"We Know How" has been the slogan of the Auto Electric Service since the formation of the company a little more than a year ago, and one has only to look at their long list of satisfied customers to recognize the success already attained.

Both L. Price and J. Hawke served in the motor transport section of the Canadian forces overseas, where the ambulances and other motor vehicles had to be operating on "all fours" or "all sixes" all the time.

In August 1921, they opened their electrical business at 347 Ridout street, but their work has increased to such an extent that they have found it necessary to employ extra men, and in April they moved to larger quarters at 38 King street, so as to handle efficiently their increased business.

With their equipment and machinery, modern throughout, the firm is able to do all kinds of automobile repair work, such as fixing batteries, starters, generators, coils, etc.

As he twirled the ends of his waxed moustache, the prisoner apologized for a tear in the knee of his trousers. "I have other clothing," he said, "but I use these to just lay around in." Then as an afterthought he added: "I guess I have a lot of laying around to do before I'm set free."

Edwards sighed again. The prisoner, who is said by Philadelphia detectives to be the uncrowned "automobile stealing king," has been brought from his prison cell to talk to a visitor. The prisoner has admitted to detectives that in eight months, from November, 1921, to June of this year, he had stolen several hundred cars in this city and vicinity, valued at \$70,000; took part in a hold-up of a paymaster here when \$16,000 was stolen, and was one of the principals in a \$50,000 silk robbery near this city.

"How many automobiles have I stolen?" Edwards said, as he leaned back and blew a cloud of cigarette smoke toward the ceiling. "To tell the truth, I don't know the exact number, but I do know I am 25 years old at the present time, and if I was sentenced for ten years for every car I would have gray hair and long whiskers when I got out of jail."

As he twirled the ends of his waxed moustache, the prisoner apologized for a tear in the knee of his trousers. "I have other clothing," he said, "but I use these to just lay around in." Then as an afterthought he added: "I guess I have a lot of laying around to do before I'm set free."

WEEKLY MOTOR NOTES.

ABOLISH THE SPEED LAWS, SAY AUTO SPEEDERS

THE speed laws are all wrong. If there is any kind of a "speed law" it should be one establishing a minimum rate of travel on certain highways. That is, a motorist going five miles an hour at a certain point would be liable to arrest.

These are some of the points brought out by opponents of speed legislation who have made considerable noise in various parts of the country. It isn't the speeder who is dangerous, they say. It is the reckless driver.

And, they emphasize, speed isn't necessarily a component part of reckless driving. On a clear, wide highway what danger is there in opening "er up"? But in a crowded section of the city the motorist who decides suddenly to stroll along at five miles an hour ought to be arrested for reckless driving.

The driver behind might run into him, and a pedestrian might believe he was stopping.

In England.

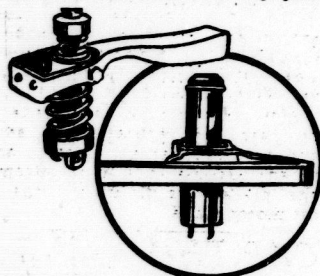

This move against the speed laws has gone quite far in England. There the Automobile Association of Great Britain has collected a mass of evidence on the subject and presented it to the ministry of transport and to parliament. Part of the report reads: "The main proposal the committee on road regulations made was that the speed limit should be abolished. The danger is not on account of the

conditions of traffic on the roads. A speed higher than 20 miles an hour may be perfectly safe on a wide, open road, and a speed of five miles an hour may be dangerous passing a school when the children are coming out. The danger is not in the speed, but in the mode and method of driving."

What has increased the ranks of speed law opponents more than any other factor has been the speed traps along important highways. Automobile associations throughout the country are centering their efforts toward the abolition of such traps and the curtailment of effort on the part of country constables and magistrates.

FOR SHOCKS AND BUMPS.

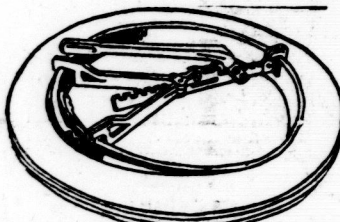

Shock absorber and bumper are combined in this model for a popular

car. The shock absorber is of the coil spring type, and is attached to the front or rear springs. From this extend the arms holding the bumper.

TIRE CHANGED EASILY.

There is little bother changing tires with the use of the rim tool shown here. This is made so that it shrinks the rim for removal of the tire, and extends it into proper shape when the new tire is put into place.

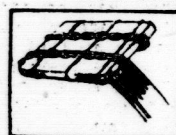

during the instant that this is being accomplished that causes the noise.

We speak of the speed of the teeth rather than the rotational speed of the gears because the gears are invariably of different diameter. One gear might be four inches in diameter whereas the gear to be meshed with it might be eight inches in diameter; when these two gears are rotating at the same speed (in revolutions per minute), the teeth of the larger one are traveling twice as fast as the smaller, and when the teeth are traveling at the same speed the smaller gear is making double the number of revolutions of the larger gear. Hence the necessity for talking of tooth speed rather than speed

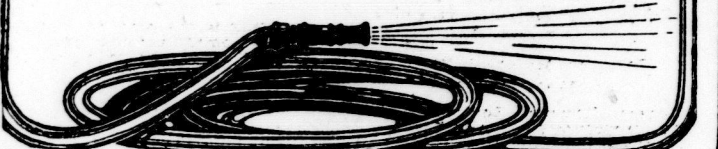

NON-SKID PEDALS.

Your foot is liable to slip off the clutch or brake pedal just at the time of emergency. To avoid accident, put skid chains on the pedals. Wrap a length of chain around each side of the pedal arm and hold them down with wire. They insure safety at all times.

GRAY-DORT The Truth Spreads

The truth about the Approved Gray-Dort is being given by Gray-Dort owners with willingness and enthusiasm.

"My Gray-Dort car has given me much more satisfaction than I ever expected to get from a light car. Running through winter and summer, it has always met any demand I made on it. Adjustments have been practically nil and the cost of operating is very low. I am not likely to part with it until you produce a finer Gray-Dort," says E. W. Bickle, President of Electrical Systems Limited, Toronto.

Let us show you why the Gray-Dort can give this satisfaction.

The "Class" of the Light Car Field

TELLS PROPER WAY TO BRING AUTO TO STOP

States Clutch Should Not Be Disengaged Until Speed Reduced.

SHIFT GEARS SILENTLY

Advises Against Decutching For Small Bumps, Curves or Corners.

The majority of motorists—often in compliance with the instructions of car salesmen—decutch before or synchronous with starting to brake. Yet there is not an authority worthy of the name who sponsors this practice or rather malpractice.

The clutch should not be disengaged until the speed of the motor vehicle has been reduced to that at which the engine would propel it with spark and throttle fully retarded.

The correct procedure is to close it, fully retard spark and throttle, apply brakes and disengage clutch when the car or truck has decelerated to the speed its lowest speed on high.

There is much, too much, use and abuse of the clutch—and clutch riding is costly.

"But," objected a motorist whom we had endeavored to cure of bad clutch habits taught by the salesman who sold him the car, "that is wrong, because it is breaking against the engine." Try it both ways, he replied, and see for yourself.

Because some fool salesman told you it was breaking against the engine you accept it as orthodox gospel. As a matter of fact, it is breaking with the engine—not against it. Think it over, or if that is too much of an ordeal, next time you are on a traffic-clear street, your car moving at say 15 miles per hour, throw your clutch and note how far your car will coast before its rate of speed drops to four miles per hour, the low limit of its high gear performance.

Drives Without Clutch. Then accelerate to 15 miles per hour again, and at the point you started the coast fully retard spark and throttle, and see how far the car moves before its rate of speed is down to 4 miles per hour. Then say whether you break against or with the engine when suiting your action to our advice.

A really good driver can shift from first to second and second to third and back again without touching his clutch, or for that matter, from any forward gear to any other while the car is moving, simply by regulating engine speed, increasing it or decreasing to the right extent in accordance with whether the movement is from a higher to a lower gear or vice versa.

C. E. Hastings, B.Sc., M.S.A.E., of Hastings & Jennings, consulting engineers to the Ontario Motor League, Canadian Automobile Association, the Dominion government, several insurance companies, won a bet in Ottawa during the war while instructor of the M. T. officers training school and adjutant in charge of Canadian Mechanical Transport, from the chief automotive engineer of one of the leading motor car companies that he could start and drive one of the company's new cars without touching the clutch. No conditions were imposed. The engineer had offered to bet the car. After he admitted that he had lost the wager, Hastings said: "Just to impress on you the folly of backing a mere opinion with a big stake I'm going to make you buy me a good dinner at the Chateau and let you keep the car."

Warm Up Engine.

How was it done? The engine was warmed up, then shut off with a rich explosive mixture in the cylinders. Low gear was then engaged, throttle and spark advanced a bit, brakes, of course, released, ignition switch turned on and the starting switch slipped on—and the car moved off in low. The rest of the performance was as already indicated. With the exception of the "starter" start, this was an old stunt with him, dating back to 1910 or 1911. We have never heard him flash gears, even this stunting with so much for that.

But before considering the plain or garden variety of gear shifting, another word or two about the clutch.

By leaving the clutch engaged when slowing down in traffic, the exigency requiring speed retardation has been eliminated in many cases before the car has decelerated to a point requiring re-clutching—and so much wear and tear on the clutch is saved. Don't decutch for very little bump or corner or curve, and never slip the clutch or ride it. In order to shift gears well on all cars under all circumstances, one must have some definite idea of what goes on under the floor boards when pedals and levers are manipulated.

Marks Finished Driver. Silent shifting, without rasping or grinding, is desirable, because it marks the finished driver, but it also indicates that the shifting is being done with minimum of strain on the car's mechanism. Noisy gear changes presage chipped and broken gear teeth, and excessive wear and play all through the driving mechanism right through from clutch to tires.

The value of a silent shift is easy to understand. When the teeth of the two gears about to be meshed are running at about the same speed they may be engaged silently, but if the teeth are moving at widely different speeds when they are meshed they are abruptly brought to run at a common rate, and it is the rasping of the teeth of the two gears

AUTO NOTES.

There are 20,000 motor busses in the United States.

More than 300 cities now have municipal camp sites.

Motor trucks haul 97 per cent of its milk supply into Cincinnati.

There are nearly 1,000 motor truck lines in the United States.

Alberta is the first province in Canada to impose a gasoline tax.

United States leads the world in the export of motor cars and trucks.

Canton, China, has only 24 passenger automobiles.

Rubber for road surfacing is being tried out in Colombo.

Keep to the right at the crest of a hill.

Seven hundred of the 1,630 cars in Alexandria, Egypt, in 1921, were of American make.

While in 1921 fifteen countries owned 97 per cent of the world's automobiles, this year they have only 96 per cent.

Keep the spare tire covered against sun, rain and dirt.

Never leave the car rest on a deflated tire.

TRANSMISSION LOCK.

Locking the transmission of a popular low-priced automobile is a new

way to keep it from being stolen.

This new lock replaces the regular transmission cover, and prevents the engine from starting. The lock does not change the design of the car's mechanism, yet enables it to be moved and steered in case of emergency.

Tommy Milton's eight-cylinder motor in the Indianapolis races used a carburetor for each cylinder.

SORE THROAT

IS A COMMON AILMENT WHICH UNLESS CHECKED IN TIME MAY LEAD TO A SERIOUS CONDITION. SIMILARLY A COUGH OR COLD MAY DEVELOP AND REQUIRE SUSTAINED TREATMENT BEFORE IT IS OVERCOME. BUT IF TREATED AT ONCE MUCH INCONVENIENCE AND SUFFERING MAY BE AVOIDED. AN OLD AND RELIABLE REMEDY IS FOUND IN

DR. THOMAS' ECLECTIC OIL

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

Brantford, Boasting

OUTSEAM BALL IS NOT FAVORED

S. H. L. Broomfield Also Favors Shorter Base Line.

BRANTFORD, Aug. 18.—When interviewed this afternoon regarding the new rules that have been adopted by the A. A. U. of C. for softball, S. H. L. Broomfield of the Y. M. C. A., who has been responsible in no small measure for the popularization and promotion of the game in this city, expressed great disappointment with the attempt that had been made to standardize the rules.

"Messrs. Fitzgerald and Smith, who, according to reports, prepared the new rules, have apparently been influenced in no small degree by their Toronto friends. Softball is being played too much favor and is being played too universally in Ontario, and this very popularity warranted a more thorough study of the facts and broader representation in the preparation of the new rules.

"The self-appointed committee from Toronto has practically ignored the tendencies in the game as played in Brantford and Hamilton, and it must be recognized by even some of our regular Toronto friends that the game has reached a higher stage of development and skill in Hamilton than in Toronto. In Brantford alone we have practically 100 teams, and in organized softball this season, and yet, to my knowledge, the Brantford viewpoint was not secured.

"Aside from the general tendency which runs throughout the new rules, there are several points of thought on the part of the committee. The longer base line and pitching box, together with the small French seam ball, make quite a different game than the shorter base line and pitching box with the fourteen-inch soft ball. It is ridiculous to adopt the rule about obliging the runner to hold the base until the ball crosses the plate on a 50-foot base line. It is extremely difficult for a runner to make a base on a shorter base line, and this practically eliminates the chances for a steal. The use of the outfield ball appears to be ill-considered. It is true that this type will last longer, but its exclusive use, especially by the girls' and boys' leagues, is dangerous.

"It is used would be almost prohibitive without gloves of some type if they are made with a cork center.

"Judging from the unprecedented growth in the game in the past few years, it is clear that softball is fast becoming one of the most important branches of summer sports and the organization of a provincial committee will be most welcome. This appears to be the only solution for the present trouble, and no doubt it would meet with universal approval if the headquarters of such a committee were in Hamilton rather than Toronto."

ORIOLES GET HITS, BUT DIE ON PATHS

Bentley Achieved Seventeenth Homer of Season.

BALTIMORE, Aug. 18.—Baltimore outbatted Rochester today, but had 18 men left on bases and lost the final game of the series, 8 to 5. Bentley got his seventeenth homer of the season.

The score: R.H.E.
Rochester..... 111 002 200—8 12 2
Baltimore..... 000 001 300—5 15 3
Moeran, Allen and Lake, Frank, Farnham and McAvoy.

CARTS BEATS STARS AGAIN

READING, Aug. 18.—Allowing but four scattered hits, Lefty Carls sent the Stars to the club house with a defeat, pitched 18 innings against the Stars in his second win of the series. Lefty has the series, which Reading took from nothing, without a run being scored on him.

The score: R.H.E.
Syracuse..... 000 000 000—0 4 1
Reading..... 110 050 000—7 10 0
Stuart, Montgomery and Niebergall, Carls and Clarke.

City Playgrounds

By defeating Queen's Park last night, Birkett's boys clinched the championship of the London City Playgrounds for the second consecutive year. The race for second place is still a very close one. Birkett's and Queen's girls are still tied for first place, with Thames one point behind. Following are last night's scores:

Boys.
Simcoe 12, Thames 8.
Birkett's 12, Lord Roberts 7.
Birkett's 11, Queens 7.
Thames 19, Riverview 6.

Girls.
Birkett's 25, Lord Roberts 5.
Thames 21, Birkett's 11.
Queens 15, Birkett's 12.
Thames 11, Riverview 11.

Standing.

Birkett's..... 10 1 1
Simcoe..... 8 4 0
Birkett's..... 8 0 1
Queens..... 5 6 1
Thames..... 5 6 0
Riverview..... 4 6 4
Lord Roberts..... 3 8 1
Thames..... 3 8 1

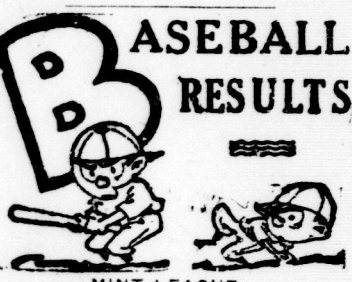

GOVERNOR STILL OBSCURE

INDIANAPOLIS, Ind., Aug. 18.—Governor McCray, after listening to a delegation from Michigan City today, said he was still firm in his intention that the Jack Dempsey-Bill Brennan match should not be held. The delegation, which represented the John M. Dempsey of the American Legion at Michigan City, refused to make a statement.

Chump or Champ?

THIS is Dave Rosenberg, middleweight champion of New York. That is to say, he's champion by virtue of the state boxing commission's decree. The commission ruled that Johnny Wilson had defaulted the title by disregarding challenges the members considered he should have accepted. Rosenberg was next in line. How much respect the public will have for championships won thus remains to be seen. They're only good in New York state.

SCOTS GOALIE SUSPENDED BY ST. THOMAS LEAGUE

At a meeting of the St. Thomas League council held in St. Thomas last night, the case of Adamson of St. Andrew's for striking Referee Taylor at United Vets game on Saturday last was dealt with. Adamson apologized and offered full restitution to Mr. Taylor. The council decided to suspend Mr. Adamson for four weeks from Aug. 12 to Sept. 11.

Australian Pair Beat Spaniards in Davis Cup Tennis Doubles

WITHIN NOTCH OF RIGHT TO PLAY U. S.

Spain Must Win Both Singles Today—Considered Impossible.

PHILADELPHIA, Aug. 18.—Australia's Davis Cup team tonight stands within one notch of the challenge round and the right to play the United States trophy defenders.

On the courts of the Germantown Cricket Club this afternoon Gerald L. Patterson and Patrick O'Hara Wood defeated Manuel Alonso and Count Manuel de Comar, the Spanish representatives, in the doubles match in straight sets by scores of 6-3, 6-3, 6-4.

While the play was closer than the score would appear to indicate, the Australians always dominated the contest and seldom failed to come through with the winning stroke when a point was actually necessary. Patterson and O'Hara Wood teamed better than their Spanish opponents and there was at times a finality to their strokes, particularly those made close to the net that was completely absent in the racket work of the Spaniards. Both Alonso and de Comar were fast foot and with racket, but even when close to the corded barrier they hit overhead shots that were repeatedly hurled back by one or other of the Australians. Patterson was the best of the quartet in this form of play, and his overhead kills from forecourt seldom were even touched by a Spanish racket.

Wood was not quite as powerful in killing overhead, but balanced the team work with repeated cross-cut and cut-to-net returns which slipped between the Spaniards before they were aware of what had happened.

Tomorrow Patterson will play Alonso and O'Hara Wood will meet Count de Comar in singles, and in order to reach the challenge round the Spanish players must win both matches, a feat considered improbable by tennis experts here.

HELEN WILLS WILL MEET MALLORY

FOREST HILLS, N. Y., Aug. 18.—Helen Wills, 16-year-old San Francisco girl, defeated Ray Sutton Bundy of Los Angeles in the second semi-final match of the women's national singles championship today 6-4, 6-3, and tomorrow will meet Mrs. Molla B. Mallory of New York in the final.

Mrs. Mallory defeated Leslie Bancroft, West Newton, Mass., in the first game, 6-0, 6-1.

In the semi-final doubles Mrs. Mallory and Edith Sikourney, Boston, easily defeated Clara Cassel, Elberon, N. J., and Marie Wagner, New York, 6-1, 6-2.

Helen Wills and Marlon Jessup, Wilmington, Del., defeated Ray Sutton Bundy and Helen Hooper, Greenwich, Conn., 6-3, 6-3, and will meet Mrs. Mallory and Miss Sikourney for the national doubles title tomorrow.

ENTRIES POUR IN FOR ALBY ROBINSON'S MEET

WOODSTOCK, Aug. 18.—The athletic tournament which was postponed on account of rain from August 7, will be held Wednesday. August 21, Alby Robinson, the promoter, is in receipt of scores of entries from the best athletes in Ontario and some from across the line. In the sprints the competition, judging from the entries received, will be exceptionally keen. In the mile and five-mile events the class of the province will compete. In the five-mile 18 entries have been received. Today the entries of the Hamilton Collegiate champion relay team and the London and York teams will be received. The host team will witness three exceptionally well-matched contests. Mr. Robinson promises this to be one of the best athletic meets ever held in the province, and he should know, for he has conducted some very successful afternoons of sport.

SARAZEN WINS PRO TITLE, TOO

OAKMOUNT COUNTRY CLUB, Aug. 18.—Eugene Sarazen of Pittsburgh, national open golf champion, bested the national professional champion also here this afternoon by winning the final match of the tournament from Emmet French of Youngstown, Ohio, 4 and 3.

SPOTLIGHTS FOR SEDANS

Many kinds of spotlight attachments are being produced for use on enclosed cars. Two are shown here. Above is a spotlight which can be controlled by a handle within the coupe or sedan. Below are spotlights of the gun variety. Holes are drilled through the lower windshield for their attachment. Each has a handle like the butt of a pistol.

REPORT BUSINESS OF WEEK AS QUIET

Creditmen Find Nothing Starting in Trade Summaries From Leading Cities.

WINNIPEG, Aug. 18.—(By Canadian Press).—Nothing startling in the business situation is disclosed in the weekly trade report of the Canadian Creditmen's Trust Association, published here today.

Montreal, with other eastern cities, reports wholesale trade fair, generally speaking. Wholesale hardware is on the busy side, both with heavy goods and builders supplies. There is an increased demand in boots and shoes, and ladies' and men's wear is doing a satisfactory trade. Owing to unfavorable weather retailers are quiet. Collections show improvement.

Winnipeg wholesalers are expecting a busy fall, although at the present moment several lines are decidedly quiet. Boots and shoes continue to be quiet, but wholesalers are preparing for the usual pickup during the last week of August, and early in September. Wholesale hardware is dull, orders coming in being chiefly in connection with harvesting implements. Later a first-class fall business is expected.

Wholesalers in men's and ladies' wear are fairly busy with orders and preparing for a still better trade in the fall. Retailers in larger cities report business normal for this time of year. Collections are slightly better.

Trade centers further west, such as Regina, Calgary and Edmonton, report business normally quiet for this time of the year, farmers being busy on the land. Owing to excellent crop conditions a good fall trade is expected.

Special to London Advertiser.

GALT, Aug. 18.—Mrs. Margaret Seyffert, 384 Middle street, Preston, yesterday celebrated her 91st birthday.

She is hale and hearty, about every day doing household duties. Born in South Germany in 1831, her parents came to America in 1837. The trip across the Atlantic taking 62 days. By horse and wagon the newcomers traveled through the wilderness to Waterloo.

She was married in 1852, her husband dying in 1901. For the past 60 years she has lived continuously in Preston. Two sons and six daughters, all living, make up her family.

A GRIEVANCE.

Tommy had been punished. "Mamma," he sobbed, "did you mamma whip you when you were little?"

"Yes, when I was naughty." "And did her mamma whip her when she was little?"

"Yes, Tommy." "Well," asked the child, "who started it, anyway?"

Pekingese does have a history dating back more than 1,000 years. In Europe there are estimated to be 25,000,000 more women than men. One raw vegetable or one raw fruit should be included in every meal.

PRESTON PIONEER, 91 YEARS OLD, CONTINUES TO WORK

Life and Character Reading.

AUGUST 19.
Children born under the govern-
ing sign of Leo, must be under con-
stant observation, but must not
know it. If he is conscious of being
watched, he will immediately com-
mence to deceive and prevaricate.

These little ones should never be
pushed to one side. They should be
the constant companions of their
judicious parents or guardians. Par-
ents must be careful not to trans-
gress the rules they have made for
these little ones.

The selfishness of this sign must
be overcome before any true pro-
gress can be made. Leo people
should often take a careful inventory
of themselves and their faults and
weaknesses and in this way learn
charity toward others.

The faults of these people are
most marked and no progress will
ever be made until they are over-
come. The strongest is jealousy
and trickery.

Read the Want Ad. carefully, and
be sure that you will find just what
you are looking for there. It is your
best friend in times of need.

bank. Laidlaw and Johnston, auction-
eer.

REAL ESTATE

The Permanent Home Is the Ideal Family Investment.

A home is the safest and most
profitable family investment.

The money you invest in a per-
manent home yields you a far
larger return in actual material
profits and in the other things
that people strive for and spend
money for, than you could pos-
sibly secure through any other
investment of the same amount.

Its safety is unquestioned. It is
the recognized standard of
security.

It earns a substantial direct
profit through its increase in
value.

It gives the large indirect pro-
fits through the increased earn-
ings and savings it induces.

Besides the usual requirements
of safety, it has many unusual
features that place it in a class
by itself.

When all the facts are con-
sidered no other form of safe in-
vestment can show the amount
of profit that a home can be made
to yield its owner.

REAL ESTATE

The Permanent Home Is the Ideal Family Investment.

A home is the safest and most
profitable family investment.

The money you invest in a per-
manent home yields you a far
larger return in actual material
profits and in the other things
that people strive for and spend
money for, than you could pos-
sibly secure through any other
investment of the same amount.

Its safety is unquestioned. It is
the recognized standard of
security.

It earns a substantial direct
profit through its increase in
value.

It gives the large indirect pro-
fits through the increased earn-
ings and savings it induces.

Besides the usual requirements
of safety, it has many unusual
features that place it in a class
by itself.

When all the facts are con-
sidered no other form of safe in-
vestment can show the amount
of profit that a home can be made
to yield its owner.

Griffin & Co. REALTORS.
418 TALBOT STREET. PHONE 3193.

Come to Church Tomorrow

"YES, I know all the excuses. I know that one can worship the Creator in a grove of trees or by a running brook, or in a man's own house, just as well as in a church. But I also know as a matter of fact the average man does not thus worship."

Here are a few benefits to be derived from church attendance:

"You will listen to and take part in reading some beautiful passages from the Bible. And if you are not familiar with the Bible, you have suffered loss."

"You will take part in singing some good hymns."

"You will meet and nod or speak to good neighbors. You will come away feeling a little more charitably inclined toward

all the world, even toward those excessively foolish young men who regard church-going as a soft performance."

"Join in church work for the sake of showing your faith in your works."

Make your start in church service tomorrow. A fair trial of church attendance will convince you it's well worth while.

ANGLICAN

ANGLICAN

ST. PAUL'S CATHEDRAL

Rector, REV. L. NORMAN TUCKER, M.A., D.C.L.

BANKS AT ST. THOMAS

DISCOUNT U. S. CHECKS

Special to London Advertiser.

ST. THOMAS, Aug. 18.—The tables have turned in this city. For the first time in years the banks here are discounting United States checks brought in to be cashed. This means a big loss to railroads, as a number have been paid with American checks and have been reaping nice little premiums. The exchange stood at 1-16 cent in favor of American money here today, but bankers look for a par situation in a few days or Canadian money to take the lead. Bankers are not anxious to accept large amounts of American money.

LIGHTNING DESTROYS TWO BARNES, HOUSES, STORE

APPOHAQUI, N. S., Aug. 18.—In a bad electrical storm this evening the residence, the general store, two barns, repair shop and several out-buildings at Lower Mill Stream, the home and property of J. E. McAuley, were struck by lightning and burned to the ground.

The damage is estimated at about \$30,000, and only a small amount of insurance was carried. It is understood that the insurance will be only about \$7,000.

DECLARES LIFE AND PROPERTY TO BE GUARDED

Premier States Federal Government Will Take Action At Mines.

ORGANIZE POLICE FORCE

No Disorders in Nova Scotia Coal Fields As Troops Arrive.

OTTAWA, Aug. 18.—(Canadian Press)—Whatever action is necessary on the part of the Federal Government to safeguard both life and property in the Cape Breton strike areas will be taken as the occasion for it arises. This was the statement of the prime minister at the close of cabinet council's second meeting this afternoon.

Right Hon. Mr. King emphasized, however, that the sending of troops into action in the strike area had been merely the automatic function of the law which provided that when a request was received from any of the specified sources for militia to preserve order in a strike area the department of militia was required by the law to provide the troops asked for.

A reminder of the war conditions was given to Ottawa people tonight when a train of six coaches, containing a detachment of men from the Royal Canadian Dragoons from Petawawa Camp passed through the city bound for the strike area.

Soldiers Equipped.
The men had been in training at Petawawa and were fully equipped for service. These men were included in the troops for which the call was sent out in the early hours of the morning.

That there had been no new developments during the day so far as the department of militia and defence was concerned, was the information given out at the department tonight. The matter is being watched carefully by the government, however, and was fully discussed at today's meetings of the cabinet, following which the premier made his announcement to the Canadian Press.

Rumors as to further departure of troops were plentiful in the capital this afternoon, but at the department of militia it was stated that no further troops had been ordered out for service since early morning.

ORGANIZE POLICE.
HALIFAX, N. S., Aug. 18.—A provincial police force will be organized to protect pump men in the Nova Scotia coal mines, said Hon. A. H. Armstrong, minister of mines and public works, tonight. Its sole purpose will be protection of public property and maintenance of law and order, he said. Proclamations have been issued giving the new body jurisdiction in the Glace Bay, New Waterford, Dominion and Southern Cape Breton County areas, where the collieries are declared to be falling victims to inflowing water.

Lieut.-Col. Eric W. MacDonald of Wolfville, N.S., has been appointed commissioner of the provincial police and will start recruiting in Halifax tomorrow. These men will be stationed in groups, and each group of about fifteen will have a magistrate with them, who will have the power of reading the riot act and calling in the aid of the military. Authorization has been given for 1,000 men.

Officials to Pump.
Asked who would man the pumps, Mr. Armstrong said that it would probably be done by company officials or perhaps some of the union men who would aid in order to protect the mines. There was no question of strike breaking, he said, it was a matter of protecting public property. The provincial police would give all the protection possible to the men doing this work.

The minister of mines said that the government was prepared to take very drastic steps to prevent profiteering in coal. A conference would be held with the dealers soon and many had already assured him that there would be no undue increase in prices. Dealers found guilty of profiteering would be prevented from selling, Mr. Armstrong said, even if

Bury Eight Little Victims of Orphanage Fire in One Coffin.

MONTREAL, July 18.—Inclosed in a small white casket, all that rescuers were able to recover of the eight little victims of the Jewish Boys' Home fire at Shawbridge, Que., Tuesday night, were placed in a grave at Mount Royal Cemetery this afternoon. The service was conducted by Rabbi M. J. Merritt and Dr. Herman Abramowitz.

It was necessary to cancel the lease of the mine owners supplying them.

CONDITIONS QUIET.
GLACE BAY, N. S., Aug. 18.—There was no disorder up to this evening at any of the Cape Breton collieries, not even No. 2, which is the recognized storm centre of the strike. It is here that the Phalen local rules, the local which sent out the original strike resolution.

However, with fans and pumps at a standstill in the mines, gas is collecting and water accumulating, and an alarming rate. It is stated by mine officials that Nos. 5 and 10 at Reserve, and No. 21 at Birch Grove will never be reopened. These mines are said to be nearly worked out, but would ordinarily have been good for two or three years more.

In two of the Waterford collieries

the gas is now so prevalent that nobody is permitted to go near them.

WILL MAN PUMPS.
HALIFAX, N. S., Aug. 18.—Hon. E. H. Armstrong, minister of mines and public works in the Nova Scotia government, announced late tonight that the Provincial Government had decided to man the pumps at the Nova Scotia mines threatened with flooding. The men will work under the protection of special provincial police, who will have power to call in the aid of the militia.

One thousand men are being advertised for to engage in police duty.

Mr. Armstrong said the government was taking these steps in order to protect public property.

KILLED BY TRAIN.
NORTH SYDNEY, N. S., Aug. 18.—Jacob Anthony of Sydney Mines, and John Andrea of North Sydney, were instantly killed, and Harold McSweeney of Sydney Mines was dangerously injured when a motor truck driven by Anthony and carrying the three men and a load of empty bottles was struck at Leitch's Creek level crossing on Canadian National Railway near here by a troop train carrying the 22nd Quebec Regiment to Sydney. The accident occurred about 3 o'clock today.

The troop train struck the truck fair on, throwing it into a concrete culvert, from which a large piece was broken by the impact. The men were

thrown about a hundred feet and the truck smashed to bits.

FIRE CAUSES HUGE LOSS TO BYNG INLET LUMBER

TORONTO, Aug. 18.—Damage by fire, roughly estimated at \$100,000, was done to the plant of the Graves-Bigwood Lumber Company at Byng Inlet early Thursday morning.

Few particulars have been received as yet at the main office of the company in this city, but it is understood that the planing mill, barns and power house with their contents are all a complete loss.

The sawmill, which is not closely situated to these buildings, escaped injury. Fire was caused by lightning. In addition, several cars of lumber were lost.

LIGHTNING DESTROYS TWO BARNES NEAR MORRISBURG

MORRISBURG, Aug. 18.—Lightning early this morning visited the farm of J. Wesley Allison on Allison Island, in the river, opposite here, and destroyed two big barns, silos, granaries and contents, valued in all at about \$30,000, partially covered by insurance. The big farmhouse and other buildings were not harmed. Mr. Allison, the owner, became

prominent during the war in regard to his relations with the late Sir Sam Hughes and various war contracts.

GRAND TRUNK RAILWAY SYSTEM

COMMEND MAYOR FOR BUYING FUEL

Brantford Aldermen Approves Order Given by Committee To Welsh Collieries.

City To Receive Shipment of 5,000 Tons Early in October.

Special to London Advertiser. BRANTFORD, Aug. 18.—Brantford is assured of getting at least 5,000 tons of anthracite coal this winter, according to the statements of Mayor Parker this evening.

A special meeting of the council was called for the purpose of authorizing the mayor and Alderman Ballantyne to purchase the coal from Wales. It was unanimously decided that the coal be ordered, and that a hearty vote of appreciation be passed to the mayor and to Alderman Ballantyne for the quick action they took in the matter of providing the city with its supply of coal for the coming winter.

Find Coal Available.

Last Tuesday they went to Toronto to interview the fuel controller to get full information about getting a supply. They at once took the matter up with many of the collieries in Wales, and on Wednesday they received word that there was a quantity of coal to be had. They at once placed their order on behalf of the city for 5,000 tons of anthracite lump coal, without waiting for the council's consent, assuming that any action they took would be satisfactory to that body.

The matter was turned over to a special committee, who will act as fuel controllers for Brantford during the coming winter. The committee comprises the following aldermen: Ballantyne, Freeborn, Minshall, Fisher, Simpson, Bragg, and Mayor Parker.

In discussing the matter, Mayor Parker said: "We are assured that the coal that we have purchased is the highest grade of anthracite coal that could be obtained. It is superior in quality to any Pennsylvania anthracite coal."

A bylaw was passed at the special meeting authorizing the city to go into the coal project for the winter. A copy of the bylaw is to be sent to the fuel controller, and the mayor states that he has no fears for the winter passing his inspection.

Assured of Sales. "The local merchants will have the opportunity of handling the coal if they desire, and the provincial fuel controller stated, while we were in Toronto, that if they did not fall in line with our project that orders would be issued prohibiting their selling coal until our supply was depleted. This will safeguard us against having a lot of high-priced coal on our hands," declared the mayor.

It is expected that the first shipment will leave Wales about the middle of September, and that it will be in Brantford about October the first.

We beat the majority of cities by at least 48 hours in getting in touch with the mines at Wales, and we stand a better chance than some of getting our supply," affirmed the mayor.

MUST MAKE LIVING IN SOME WAY, BOY CLAIMS

Sarnia Juvenile Tells Magistrate Why He Received Stolen Ferry Tickets.

Special to London Advertiser. SARNIA, Aug. 18.—"You have to make a living some way these days," was the explanation given to Magistrate Henry Gorman today by a bright youth of fourteen, who with five others was charged with receiving ferry tickets stolen by a nine-year-old child from the office of the Northern Navigation Company.

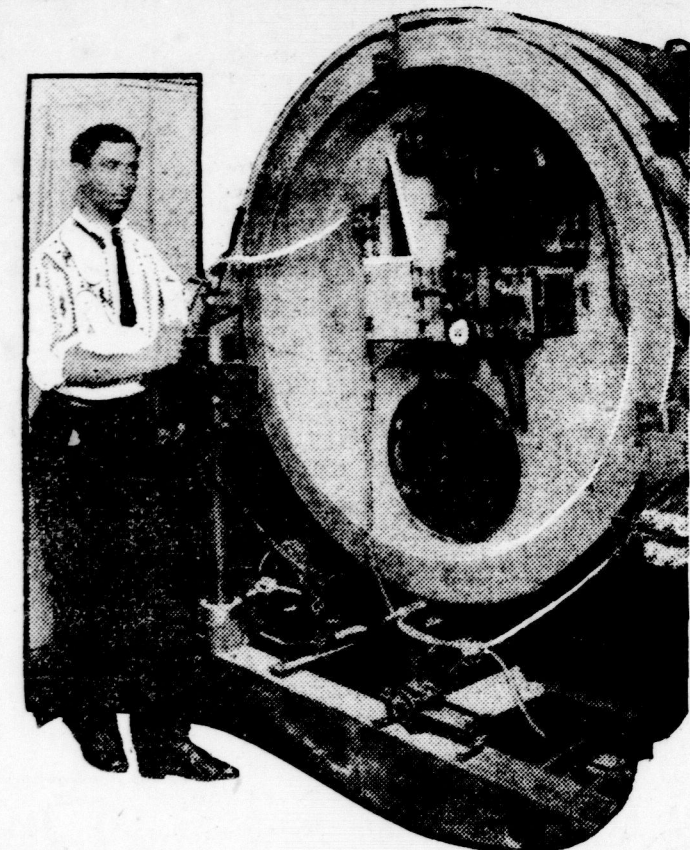

This was in reply to a question from the magistrate as to why the boys had sold the tickets.

The five were allowed to go on suspended sentence on paying costs, while the boy who stole the tickets and gave them to his playmates was handed over to the care of the Children's Aid Society here. The tickets were valued at \$21.25.

FINDS HERD HEALTHY.

INGERSOLL, Aug. 18.—The entire herd of 51 cattle owned by Walburn Rivers of West Oxford, which has been entered in the accredited herd system was found to be immune from tuberculosis on the first examination. Mr. Rivers is one of the prominent Holstein breeders of Western Ontario.

TO ELIMINATE FILM FLICKER Philadelphia Inventor To Overcome Movie Trouble

NEW YORK, Aug. 18.—The flickerless movie is here, according to Samuel R. Brady, a Philadelphia inventor, who claims to have perfected a projection machine that throws a non-intermittent picture upon the screen.

If this is so, the greatest physical handicap of the motion picture has been overcome. Although the present type of projecting machine has been brought to high efficiency, motion pictures lack the eyes because the images upon the screen are not shown in continuous motion. This is demonstrated by slowing down the rate of projection.

Brady asserts that with his machine projection can be slowed down until only three pictures a second pass the aperture, without the projected images losing continuous motion on the screen.

Light is continuously projected through the film. The film is continuously in motion. Ordinarily this would produce just a streak across the screen.

In Brady's machine 50 lenses are interposed in the rim of a wheel that moves in unison with the revolving film.

These are so placed and so ground that they deflect the rays of light and thus the figure on the screen is prevented from moving with the revolving film.

The result is obtained through the reflecting power of the lenses, there being at all times a constant picture on the screen, the effect of motion being gained by one picture dissolving into another.

This differs from the present method of projection, which produces the effect of motion by showing successive pictures on the screen with such rapidity that the images appear to be moving in one picture.

Lighting Department Showed Net Surplus of Over \$8,000 Last Year.

Special to London Advertiser. WOODSTOCK, Aug. 18.—The local price of hydro power has been increased from \$18 per horsepower to \$21 for steady users of power and a still higher rate has been imposed on intermittent users.

The hydro commission has set the local rate for power to the local commission at \$27 per horsepower, an increase of \$6 over the rate of the past year.

While the new rate set by the hydro commission dates back to January 1, the new rate for local power users dates merely to Aug. 1, the local commission taking care of the balance.

No change has been made in the rates for commercial domestic and street lighting.

The local commission showed a slight deficit under the power head last year, while the lighting department showed a net surplus of over \$8,000.

4 SISTERS ATTEND PARTY OF WOMAN 78 YEARS OLD

Special to London Advertiser. BRANTFORD, Aug. 18.—A novel birthday party was held yesterday at the home of Mrs. W. B. Robbins, 63 Brant avenue, in honor of Mrs. Philip Butler, who celebrated her 78th birthday.

Four sisters of Mrs. Butler were present at the festivities and the combined ages reach a total of 358 years. The sisters, Mrs. Sarah Deagle, Middleport; Mrs. Lucy Vanevery, city; Mrs. Maria Slaght, Boston; and Mrs. Emily Lutes, Toronto, range in years from 70 to 84.

MRS. W. STAHL OF KITCHENER DIES

KITCHENER, Aug. 18.—Wilhelmina Stahl, widow of Edward Stahl, passed away at her home here today following a lingering illness.

Mrs. Stahl was born in Germany, 85 years ago, but was one of the pioneer residents of this city. She is survived by three sons and three daughters.

The record number of lightning flashes for England is 1,244 in two hours, counted on June 6, 1889.

DEATH BLOCKS "HOLY" EMPIRE

Enver Pasha Hoped To Unite Asiatic Countries Under Moslem Banner.

Won Confidence of Soviet Government To Further His Plans.

Death of Enver Pasha, former minister of war in the Turkish government, announced in press dispatches recently, brings to an end, temporarily at least, plans for a great Moslem empire embracing not only Turkey, but all the former monarchies abolished by the Bolsheviks and the Transcaucasus.

Enver died on the battlefield in Eastern Bokhara, where his body was found. He was stabbed five times Aug. 4, in an engagement with the Bolsheviks.

The story of Enver Pasha reads like fiction. He began as an agitator among the Young Turks and was one of the triumvirate which dethroned Sultan Abdul Hamid. He was made chief of staff in the Turkish army in 1913, and in 1917 minister of war.

As war minister, Enver is credited with wielding the influence which threw Turkey into the World War on the side of the Central Powers.

After the war he was forced to flee Turkey because of accusation of war profiteering and other charges. He made his way to Moscow and allied himself with the Soviet government.

Had Soviet Confidence. Enver easily won the confidence of Soviet leaders, and was entrusted with important missions, one of which paved the way for his remarkable adventure in Transcaucasia.

The Soviet government had contracted a treaty with Kemal, head of the Turkish Angora government, one of the few governments which would consent to dealings with the Bolsheviks. But, having entered into this agreement, Kemal saw a danger that Bolshevik propaganda would end his rule and convert his country into a Soviet republic.

Therefore, last November he forbade circulation of all Bolshevik literature.

The action of Kemal angered the Soviet, and they entrusted to Enver Pasha plans for a coup d'état in Adjaria. Equipped with a plentiful supply of money, Enver went to Batoum and set up the Angora Soviet government with himself at its head.

When Kemal Pasha heard of it he made strong representations to Moscow, and threatened to break off all relations with the Soviet if Enver were allowed to continue. As a result Enver was told to dissolve his government and return to Moscow.

This action angered Enver, and he determined to even up matters when opportunity came. Last winter there was an insurrection in Bokhara against the Soviet, and Enver was entrusted with the task of arranging peace with the rebels. When he reached Bokhara he immediately joined the rebels and took the lead in the revolution.

Forms "Green" Army. Instead of minor disorder by a group of bandits, under Enver's military genius, the rebellion grew until it became a serious outbreak against Bolshevik rule. The Red banners were changed to green, and as a "Green" army, Enver's followers succeeded in clearing a great portion of Bokhara from Tarmes to Kerki. Everywhere the "Greens" were meeting with success. Town after town fell under their control.

Finally Kameneff, commander-in-chief of the Bolshevik armies, went to Enver Pasha with peace overtures. Enver refused to see him, so rapid was he in enthusiasm for his new Moslem empire. Kameneff went back to Moscow and Enver continued his military plans.

Throughout the country, troops of "Green" soldiers were sent to drive out the "Reds." In many sections "Red" soldiers dared not appear away from their hiding places in the hills. Just what will happen to Enver's movement now is conjecture. He had the able assistance, but it is doubtful if any one of them can muster to the anti-Bolshevik cause the genius displayed by Enver Pasha.

HEROIC BRANTFORD GIRL STILL CONFINED TO HOME

Special to London Advertiser. BRANTFORD, Aug. 18.—Miss Emily Emmett, the young lady who at the St. Paul's picnic on Wednesday set out to rescue little Marnie Dawson, and as a result fell into trouble herself, suffering from exhaustion, is still confined to her home.

The rescue of Miss Emmett was effected by a young lad named Carpenter of Fairfield, through whom a double drowning was undoubtedly averted.

HOLD FUNERAL OF GIRL.

Special to London Advertiser. STRATFORD, Aug. 18.—The funeral of Irene Purcell, whose body was found in the river at Buffalo, takes place here Saturday. The remains have reached the city.

It is felt that some action should be taken here to protect the interests of citizens during the winter months. It is pointed out that if Welsh coal is required no time should be lost in arranging to have a supply brought here.

Experiences during previous fuel famines are still fresh in the minds of many citizens, and they are anxious to avoid a repetition.

CANADIAN RAIL REVENUES RISE

Continued From Page One.

ing ratio of \$9.47 per cent, compared with \$824,186 and \$4.57 per cent, respectively, for May, 1921.

The Canadian Pacific Railway showed a decrease in revenue of \$284,104, or 1.8 per cent, from May, 1921, and operating expenses of \$701,191, or 6.5 per cent, giving an operating ratio of \$2.72 per cent, as against 76.28 per cent for May, 1921.

FINANCIAL AND COMMERCIAL

GOOD DEMAND FOR SPRING CHICKENS

Thimbleberries Sell at 20 Cents a Box on City Market.

The attendance at Saturday's market was unusually large, and the trading in most lines was brisk. Vegetable prices were fairly large, but the price of fruit had a tendency to drop. Dairy butter was more plentiful than it has been in a few weeks, and the price was firm.

Dairy butter was selling retail at 40¢, and the demand was strong. Creamery butter was also in good demand at \$24.50 per cwt.

Fresh eggs were going at 25¢ and 27¢ retail and 22¢ and 23¢ wholesale.

Spring chickens were offered in large quantities, and found a good market at 75¢ per lb. each. Other chickens ranged from \$1.00 to \$1.25.

Tomatoes were very plentiful, and in some cases were hard to sell at 10¢ per cwt. The price for the 11-quart size was 12¢.

Small red and green peppers were selling at 15¢ per dozen, while the large kind brought 8¢ each.

One load of old oats went at \$1.30 per cwt.

Five loads of hay were brought to the market during the past week, and James Dean, weigh scales clerk, stated that the demand for hay for the fall was filled. The price during the week ranged from \$1.14 per ton.

Barley, per cwt., \$1.40 to \$1.55. Buckwheat, per cwt., 1.40 to 1.55. Corn, per cwt., 1.10 to 1.25.

Do, old, per cwt., 1.30 to 1.50. Grain, per bushel, 67 to 72. Oats, per bushel, 51 to 55.

Do, new, per bushel, 51 to 55. Wheat, old, per bushel, 1.20 to 1.25. Do, new, per bushel, 1.25 to 1.30.

Hay and Straw. Hay, old, per ton, 17.00 to 17.50. Do, new, per ton, 18.00 to 18.50. Straw, per ton, 10.00 to 10.50.

Fruits. Apples, per bushel, 75 to 1.00. Peaches, 11 quarts, 40 to 50. Do, 6 quarts, 40 to 50. Plums, 11 quarts, 40 to 50.

Do, 6 quarts, 30 to 40. Raspberries, red, 25 to 30. Thimbleberries, 25 to 30. Watermelons, each, 25 to 30.

Beans, butter, 11 quarts, 35 to 40. Beans, per doz., 35 to 40. Cabbage, each, 5 to 10.

Do, per doz., 10 to 20. Cauliflower, each, 10 to 20. Do, per doz., 1.00 to 2.00.

Carrots, per doz., 35 to 40. Corn, green, doz., 15 to 20. Cucumbers, doz., 20 to 30.

Egg plants, each, 20 to 25. Lettuce, per doz., 35 to 40. Do, green, 11 lbs., 75 to 80.

Do, large, each, 5 to 10. Peas, shelled, 25 to 30. Do, green, 25 to 30. Radishes, per doz., 35 to 40.

Rhubarb, per doz., 35 to 40. Tomatoes, per lb., 4 to 5. Do, 15 lbs., 40 to 50.

Money, Wholesale. Heavy 10-lb. gold, 75 to 85. Do, strained, 17 to 17. Do, comb, 15 to 17.

Money, Retail. Heavy 10-lb. gold, 90 to 100. Do, strained, 15 to 20. Do, comb, 10 to 15.

Dairy Products, Retail. Butter, creamery, lb., 42 to 43. Do, dairy, lb., 40 to 42.

Do, crocks, lb., 40 to 42. Eggs, doz., 25 to 30. Do, crate, doz., 25 to 30.

Poultry, Dressed, Retail. Chicken, per lb., 1 to 1.30. Do, old, per lb., 25 to 30. Do, spring, each, 75 to 1.10.

Chicken, per lb., 30 to 35. Do, old, per lb., 12 to 18. Do, spring, per lb., 20 to 25.

Geese, per lb., 20 to 25. Live Stock. Hogs, alive, 12.50 to 13.50. Do, fat, 9.00 to 10.00.

Pigs, small pair, 10.00 to 15.00. Hens, dressed, 11.00 to 12.00. Cow beef, 400 to 500 lbs., 10 to 10.00.

Beef, hinds, lb., 16 to 18. Do, fronts, lb., 14 to 15. Hogs, dressed, 17 to 17.50.

Lamb, choice, 25 to 25.00. Do, hinds, lb., 27 to 27. Do, fronts, lb., 18 to 18.

Veal, choice, 160 to 160. 125 lbs. cwt., 13.00 to 14.00. Do, 25 lbs. lb., 25 to 25. Do, fronts, lb., 20 to 20.

Hides. Cow hides, No. 1, 11 to 11.50. Do, No. 2, 10 to 10.50. Do, No. 3, 9 to 9.50.

Horse hides, each, 2.00 to 3.00. Kip, No. 1, per lb., 11 to 11. Do, No. 2, 9 to 9.50.

Lamb skins, each, 25 to 35. Wool, Unwashed. Wool, coarse, per lb., 12 to 12. Do, fine, 13 to 13. Do, medium, lb., 15 to 15.

corresponding reductions in independent plants. Failure of the allied premiers to reach an agreement on German reparations imparted an irregular tone to the foreign exchanges. German marks falling to the extreme low level of 7 1/2 a hundred, or about 6¢ below the rate of a week ago.

Money rates continue to be easy, with the supply generally in excess of the demand. This explains in part the steady rise in bond prices. A marked decline is noted in new bond offerings, but two large preferred stock issues of well-known department stores were well taken.

CHEESE. Iroquois, Aug. 18.—At today's session of the cheese board \$15 boxes were boarded. The bidding started at 14¢, and was raised to 15¢, at which they were sold.

Victoriaville, Que., Aug. 18.—About 1,600 boxes of cheese were sold here today at 15¢.

Napawee, Ont., Aug. 18.—At the cheese board today 300 colored and 310 white were offered; 400 sold at 15¢; balance refused.

Pictou, Ont., Aug. 18.—There were 365 boxes of colored cheese boarded here today, and all sold at 14¢.

Chicoutimi, Que., Aug. 18.—At today's cheese board meeting 1,200 boxes white were offered and sold at 14¢.

FLOUR. MONTREAL, Aug. 18.—There was little movement in the flour market. Millfeed and rolled oats were dull.

Flour—Man. spring wheat patents, fine, \$1.50. Rolled oats—Bag, 90 lbs., \$3.20@3.30. Bran—Per ton, \$23.25. Shorts—Per ton, \$25.50.

TORONTO, Aug. 18.—Good feed flour, per bag, \$1.01. Bran, \$22@23. Shorts, \$24@25.

MINNEAPOLIS, Aug. 18.—Flour unchanged to 10¢ higher; family patents \$6.60@7.10 a barrel; shipments, \$7.25 a barrel.

NEW YORK, Aug. 18.—Flour, early spring patents, \$6.25@7.25. Spring clear, \$5.25@6.25; soft winter straight, \$4.50@5.25; hard winter straight, \$5.50@6.25.

HAY. MONTREAL, Aug. 18.—Hay, No. 2, per ton, carlots, \$12@13.

TORONTO, Aug. 18.—Hay, per ton, carlots, \$12@13. Mixed, \$15@16. Clover, \$14@15. Straw—Carlots, \$12@13.

FRUIT AND VEGETABLES. TORONTO, Aug. 18.—White & Co. report the following wholesale selling prices of fruit and vegetables: Cherries—Sours, 11 quarts, 50¢; 6 quarts, 40¢. Cabbage—Dozen, 50¢. Currants—Black, 11 quarts, \$2.50@3. 6 quarts, \$1.50; red, 11 quarts, 75¢; 6 quarts, 40¢.

Peaches—Eleven quarts, 65¢@1.25; 6 quarts, 40¢@50¢. Plums—Eleven quarts, 25¢@40¢; 6 quarts, 20¢@30¢. Blueberries—\$1.35@2. Apples—30¢@50¢. Lettuce—50¢. Tomatoes—Firsts, 25¢@30¢; seconds, 20¢.

Peas—75¢. Green Corn—White, 15¢ dozen; Bantam, 20¢ dozen.

LIVE STOCK. East Buffalo, N.Y., Aug. 18.—Cattle—Receipts, 875; steady. Calves—Receipts, 200; 50¢ lower at \$8.00.

Hogs—Receipts, 2,800; slow; steady to 25¢ lower; heavy, \$9.50@10; pigs, \$9.25@9.50; roughs, \$7.25; stage, \$4.50@5.00. Sheep and Lamb—Receipts, 412; steady.

GRAIN. Chicago, Aug. 18.—Opening: Wheat—Sept., 11.00; Dec., 11.01. Corn—Sept., 55¢; Dec., 53¢. Oats—Sept., 30¢; Dec., 31¢.

COFFEE. NEW YORK, Aug. 18.—Coffee futures closed today at 2 to 3 points net higher. Sales were estimated at about 23,000 bags. Close: Sept. 2.26, Oct. Dec. Jan., March and May, 2.27; July, 2.22.

LINSEED. DULUTH, Aug. 18.—Linseed, Sept., \$2.10 asked; Dec., \$2.25 asked; Nov., \$2.24 asked; Dec., \$2.20 asked.

LONDON, Aug. 18.—Calcutta linseed, \$19.100. Linseed oil—40s 6d.

SUGAR. NEW YORK, Aug. 18.—The early raw sugar market was quiet, with no sales reported. It was rumored that business was pending at 5.15¢, compared with the last previous sale of 5.10¢ for Cuban sugar.

Raw sugar futures were irregular. Early weakness during which prices declined, was followed by a renewed western selling, was followed by a sharp rally. This was accompanied by heavy buying, presumably against sales of raws. At midday the market was about 1 to 3 points net lower.

The refined market was a little easier, and a refiner who has been holding at \$7.10 dropped back to \$6.75, making the range \$6.75 to \$7 for fine granulated.

Refined futures nominal. Later there was a sale of 14,000 bags of Cuban from store at \$15.00 paid. This is a decline of 10 points.

Foreign Banking Facilities

The many extensions in recent years in the foreign connections of The Bank of Nova Scotia—both by branches and banking correspondents—enable us to give customers a service that is both efficient and prompt either in remittances or collections.

If you are developing a foreign trade you will find our facilities very useful.

THE Bank of Nova Scotia

ESTABLISHED 1832. G. H. MONTGOMERY, Manager, London. Paid-up Capital \$9,700,000. Reserve \$13,000,000. Resources \$220,000,000.

A Joint Account

Is our method of making banking easier for relatives or partners, and is particularly convenient for housekeeping accounts. Money may be withdrawn by either party, and it can be arranged that in the event of the death of either the account remains for the survivor. It is therefore immediately available for the heavy expenses incurred at such a time.

The delay and embarrassment usually experienced in the case of illness or death of the holder of a one-name account is eliminated.

Free to Asthma and

Hay Fever Sufferers

Free Trial of a Method That Anyone
Can Use Without Discomfort
or Loss of Time.

We have a method for the control of
Asthma and Hay Fever that you can
use at home. No matter whether your
case is of long standing or recent de-
velopment, whether it is present as
Chronic Asthma or Hay Fever, you
should send for a free trial of our
method. No matter what climate you
live in, no matter what your age or
occupation, if you are troubled with
asthma or hay fever, our method
should relieve you promptly.

We especially want to send it to those
apparently hopeless cases, where all
forms of inhalers, douches, opium pre-
parations, fumes, "tobacco smoke," etc.,
have failed. We want to show every-
one at our expense that our method is
designed to end all difficult breathing,
all wheezing, and all those terrible
paroxysms.

This free offer is too important to
neglect a single day. Write now and
begin the method at once. Send no
money. Simply mail coupon below. Do
not today—You do not even pay postage.

VISIT GERMANY
TO SEARCH KEY
FOR PROBLEMS

Delegation Sent To Berlin by
Committee On Reparation
Problem.

TO MOBILIZE SECURITIES

PARIS, Aug. 18.—The reparations
commission is to send a Berlin dele-
gation to confer directly in the Ger-
man capital with Chancellor Wirth
and other officials on the reparations
problem.

The delegation will consist of Sir
John Bradbury, British member of
the reparations commission, and Eu-
gene Meuleure, president of the al-
lied committee on guarantees, and
two experts. The party will leave
Paris for Berlin Sunday night.

One of the chief purposes behind
the decision of the commission to
have representatives confer direct
with the German authorities is to de-
termine whether Germany can mobil-
ize sufficient securities to float a loan
of £12,000,000 with which to meet
the remaining cash payments this
year. The commission has reason to
believe that if adequate collateral can
be found certain international bank-
ers would arrange the loan.

With such a loan affected the
reparations commission would be
able to avoid the question of a mora-
torium for at least six months. The
feeling is gaining ground that at the
end of this time the Allies would be
ready to meet in conference to dis-
cuss the general reparations settle-
ment in connection with a reduced
indemnity and cancellation of war
debts.

Although it is officially stated that
Sir John Bradbury and Mr. Mauciers
are going to Berlin for the purpose
of getting a first-hand impression and
information regarding the German
situation, Sir John is very hopeful,
and expects some compromise can
be arranged with the Germans, either
through the suggested loan or by
means of additional guarantees.

LITTLE CHILD DROWNS

IN LAKE NEAR GUELPH

Two-Year-Old Daughter of Mr. and
Mrs. A. Benallick Falls off
Wharf.

Special to London Advertiser.

GUELPH, Aug. 18.—Elizabeth, the
2-year-old daughter of Mr. and Mrs.
A. Benallick of this city, was drown-
ed this afternoon in Puslinch Lake.

The little one wandered down to
the edge of the wharf, and before
anyone noticed the danger she fell
into the water, which is quite
deep at that point.

She was rescued in a very few min-
utes, and medical assistance was
right at hand, as well as a nurse, but
all efforts at resuscitation proved
fruitless. It was stated that a weak
heart was the contributing factor in
her death.

The affair has cast a gloom over
all the cottages at this resort.

The funeral will take place on Sat-
urday.

FARM LABORERS.

It is estimated that to harvest this
year's bumper crops in Manitoba,
Saskatchewan and Alberta it will re-
quire more men than in previous
years.

The Canadian Pacific has arranged,
and is advertising, usual special fare
of \$15 to Winnipeg.

Special trains will be run from
Toronto Union station to Winnipeg,
August 21 and 23. First train leaves
Toronto Union station at 10 a.m.,
other trains to follow as required un-
til 10 p.m.

Special accommodation for women
and children. See any Canadian
Pacific agent for full details. H. J.
McCallum, city passenger agent, cor-
ner Dundas and Richmond streets—
Adv.

SHOWERS ASSIST RANGERS

TO PUT OUT FOREST FIRES

C. A. Duval States Number of Con-
flagrations Not as Numerous as
in Previous Years.

SUDBURY, Aug. 18.—Timely
showers during the last ten days
have assisted the fire rangers in the
Sudbury district in extinguishing
several forest fires which started
near Burwash, and in the townships
of Falconbridge, Brodie and Dale.

The fire rangers kept the respec-
tive fires from spreading and heavy
showers of rain assisted the men in
extinguishing them.

It was learned at the office of
Chief Fire Fanger C. A. Duval to-
day that the number of forest fires
has not been as numerous or as ex-
tensive this season as in previous
years.

HALTS ON WORLD FLIGHT.

LONDON, Aug. 18.—The Central
News says that Major Blake is ill at
Calcutta, having undergone an oper-
ation for appendicitis. It is added
that Capt. Norman MacMillan,
Blake's pilot, will continue the world
flight.

Sought On Assault Charge

Man Asks Shelter in
Police Station.

Special to London Advertiser.

ST. THOMAS, Aug. 18.—With
a criminal record, and af-
ter having broken parole on a
serious charge of assault, John
Kirkland, 65 years of age, walk-
ed into the local police station and
asked for a night's lodg-
ing.

Local authorities had been
notified to be on the lookout
for the man, and as a result
he will be held here until Sat-
urday, when he will be taken to
the Guelph reformatory.

OFFER BASIS OF
PEACE IN RAILS
SHOP WARFARE

Five Great Brotherhoods Sug-
gest Plan Providing Em-
ployment For All.

RETAIN NEW WORKERS

NEW YORK, Aug. 18.—The five
great railroad brotherhoods, which
have stepped into the nation-wide
shopmen's strike as mediators, today
offered to the roads what they termed
a practical proposition for peace, and
the roads took the proposals under
consideration.

Neither side would disclose the
terms of the proposition.

In some quarters close to the con-
ference it was said that acceptance
by the executives would result in im-
mediate return of all strikers to their
old jobs with full and unimpaired
seniority and pension rights, in ad-
dition to retention of men hired since
the strike.

The proposition, on the other hand,
was outlined in other quarters as
providing for retraining of strikers
as rapidly as possible, with their sen-
iority rights to be adjusted ultimately
to the satisfaction of all.

The proposition, in these quarters,
was understood to be on the basis
of a gentlemen's agreement.

Those close to the conference said
it would give due respect to the
rights of the new men. This agree-
ment, it was said, would assure jobs
to both the strikers and the so-called
new men, since railroads and bro-
therhood officials have stated that
they could use 10 per cent of their
normal shopcraft forces to prepare
for the resumption of coal carrying
and transportation of a bumper crop.

The gentlemen's agreement, it was
understood, would provide that the
question, which will arise at the end
of the busy fall session, would be
handled as it has been in other years
according to the usual weeding-out
process.

The whole plan, it was unofficially
indicated, would mean that without
any apparent surrender by either the
railroads or the shop crafts, the
strikers would not suffer any more
in the long run than would be usual
after an industrial struggle of this
kind.

A committee of mine executives
appointed to meet the brotherhood
men, listened to this proposition,
hastily summoned a general meeting
of the representatives of 148 roads,
which probably will be held here next
Tuesday.

END OPEN SESSIONS.

MONTREAL, Aug. 18.—Open ses-
sions of the board of conciliation for
the settlement of the Canadian rail-
way shopmen's wage dispute were
terminated this morning and the re-
view of evidence and argument was
begun. The final decision is left to
the board, as the railway representa-
tives and the union officials were un-
able to come to any agreement at
the direct conference held yesterday
afternoon.

When the board meeting opened
today, George Hodge, assistant gen-
eral manager of the Canadian Pacific
Railway, Eastern Lines, stated on
behalf of both sides that it had been
mutually agreed to leave the final
decision on the question to the board.
Adornment was then made sine die
it is not felt that the decision will
be long delayed.

OTTAWA, Aug. 18.—Exposition of
the case for the employees was con-
tinued today, when the board of
conciliation which is investigating
the dispute between the Canadian
National, Grand Trunk Pacific Rail-
way and its employees who are
members of the Brotherhood of Rail-
way Employees, met.

A. R. Mosher, president of the C.
B. R. E., again handled the case for
the employees, devoting his atten-
tion to the cost of living and its re-
lation to present railway wages. The
cost of living of Mr. Mosher's wage
argument was as follows:

"Your honorable board is to decide
whether railroad wages of the em-
ployees here represented should be
reduced below the rates in effect on
the Canadian National, Grand Trunk
Pacific, prior to July 2, 1922. If
the reduction is made on that date
the reduction is permitted to stand, 30
per cent of the clerks in scheduled po-
sitions, which we have shown to be
the highest group of all, would earn
scarcely enough to permit a man
and wife to bring up one child
and maintain a standard for a
family approximately that of min-
imum health and decency. Other
classes for all are lower paid than
the scheduled clerks, will be worse
off."

At the conclusion of the presenta-
tion of the wage agreement, the
board of conciliation rose. It will
sit again next Tuesday, when Mr.
Mosher will proceed with other as-
pects of the case for the employees.

ASK FOR COMMISSIONS.

WASHINGTON, Aug. 18.—Presi-
dent Harding announced to Congress
and to the country today that his
administration, having exhausted
every means for a settlement of the
United States rail and coal strikes,
now resolved "to use all the
power of the government to main-
tain transportation and sustain the
right of men to work."

Accounting for his course during
the recent troubles, in an address
to the Senate and house, the presi-
dent said he did not propose to ask
any "hasty action" by Congress
in the railroad strike, but that author-
ity should be given to set up a com-
mission to make a sweeping investi-
gation into the coal industry "to re-
veal every phase of coal production,
sale and distribution."

As another measure in the coal sit-
uation, the president asked for the
creation of a temporary national coal
agency to purchase, sell and dis-
tribute coal in interstate shipments
as an "instrumentality of guarding
the public interest where private
conscience is insensible to a public
need."

LIBERAL ASSURED OF
VICTORY AT LABELLE

Seventy Polls Give LaHale Safe
Majority of 538 Votes.

PAPINEAUVILLE, Que., Aug. 18.

With 70 polls out of 78 heard from
in the provincial by-election for
Labelle County, the majority of De-
siré LaHale, the Liberal candidate, is
now 536. The balance of the polls
are small in voting strength, and are
not likely to affect the result much
either way.

Mr. LaHale, interviewed today,
thanked the electors of the county
for their votes, and said he would
take up his work as provincial mem-
ber with a view to promoting the
construction work of good roads, and
especially colonization roads. The
work of colonization itself also
would be the particular aim of his
endeavors.

FORM CHAIN TO
SAVE LIFEGUARD

TORONTO, Aug. 18.—Fred Lanth-
downe, former bantam and feather-
weight champion boxer of Canada,
now a lifeguard at Kew Beach, this
city, while rescuing an exhausted
bather, Alexandra Margrett, from
drowning at Kew Beach last night,
became exhausted himself and had to
be assisted to shore by a group of
spectators, who formed a human chain
for this purpose.

WOMAN UNDER TREE

KILLED BY LIGHTNING

BURKS FALLS, Aug. 18.—Mrs.
Archie Morrison was instantly killed
yesterday afternoon during an elec-
tric storm, when a tree beneath which
she was sitting was struck by light-
ning.
