Victory over Death.

Lo ! I come, exultingly : What a triumph 'tis to die ! All the bands of mortal life, All the struggle, all the strife, Death, and Death's ignoble bed, Underneath my feet 1 tread.

Lo! I see, exuttingly, Visions bursting from the sky Glowing light from paradise Gleams uqon my ravish'd eyes Odors, sweeter than the spring, Wafting zephyrs gently bring.

Hark ! the music steals along Welcome, sweet, of angel-song; Now my spirit joyously Mounts aloft, from bondage free ; Upwards rising, high and higher, Light as flame of heavenly fire.

Through the open gates of light, Streaming glory fills my sight; I on blissful myriads gaze, — Stars of light! Scraphic blaze! Swells my heart, my loosen'd tongue Warbles an immortal song. - Wesleyan Methodist Magazine.

dom, and led to many a prayer, and many a high resolve, and many an act of liberality to the cause of God, in both England and America, and excited, for Italy, expectation and interest which will never subside.

Malan was driven out of the country ; band of soldiers conducted Geymont to the both of New Brunswick. On that night a vio frontier, and expelled him ; a devout nobleman, Count Guicciordini, (a name more noble in the literature than in the aristocracy of Italy,) was exiled; several persons were imprisoned. The tragedy of the Madiai family followed, wringing the heart of all evangelical Christendom. And then came the case of the Tuscan confessor, Cecchetti, deepening still the impression made upon the public opinion of Europe against Italian intolerance.

Incalculable advantage has arisen from these scenes to the cause of religious liberty and evangelical faith. The newspapers of most of the world have denounced them .---The true character of Popery has been shown to be unaltered; but, above all, Italians themselves have been led to detest the hierarchy which not only oppresses their fellow-citizens, but disgraces their country before all the nations.

The light has not been extinguished in Tuscany; far otherwise. It lingers in many small, dispersed household lamps, and will blaze again on the common altar when the opportunity comes. The dispersion of labourers sent them into a the evangelical more hopeful field in Piedmont, where perhaps, they are working more effectually for the salvation of all Italy than they could have done in Tuscany itself. But of that section more hereafter

The light lingers, I repeat, in Tuscany and Demenico Cecchetti is one of the exam ples of the fact. He was not really obnoxjous to the law by which he was tried .-That law, however, is an example of the repressive policy imposed upon Tuscany by the present pope, against all guarantees oaths and constitutions. The 137th article of this wretched code provides that, " who soever, by public speaking, or by writings, either in manuscript or print, or by figura tive representations distributed or fixed up. or in any other manner brought before the public mind, has attacked the religion of the state, will be punished with imprisonment. with hard labour, for from five to ten years if his intention has been to propagate wicked doctrines, and to separate from the Catholic Church persons who belong to it; and with imprisonment from one to five years if he only intends to insult religion; and whosoever shall make use of private instruction or persuasion, to gain the end contemplated ider the preceding article, shall suffer from three to seven years' seclusion in prison, with hard labour." Such is the law. Poor Cecchetti had not exposed himself

to this law, for it requires some open actsome manifest proof of a disposition to make proselytes, or to insult the Catholic religion. A humble workman in a manufactory.

MR. EDITOR-DEAR SIR,-While I learn with unbounded satisfaction that the spirit of re vival is being plenteously poured out upon many parts of our beloved Zion, and that numbers are mrendering their hearts to Christ-I am unfeignedly thankful to state that the Great Head of the Church is remembering us also in mercy upon this Circuit, and making bare his arm in the salvation of precious souls. On Monday, broadly is the result of its fearful mission. March 23rd, a series of special services were commenced at the West Cornwallis Chapel for the purpose of promoting a revival of religion. Many prayers were presented with fervour to the mercy seat to implore the outpouring of the Holy Spirit upon the people, without whose influence we telt assured Paul might plant and Apollos water in vain. The members of the Church evidently felt the responsibility resting upon them individually; and at once, with unit ed effort, came up " to the help of the Lord against the mighty." It was soon apparent that the Lord had come down to wound and healto kill and make alive, for numbers were arons ed from their sleep of sin, became conscious of their guilty and undone condition, and felt deinvitation was given for the penitents to come forward to the altar, many did no, requesting an interest in the pravers of the Church and anxed. " The things impossible to men Are possible to God."

Since the commencement of the Meetings b tween 40 and 50 have been led to choose the better bath, and with their faces Zionward are rejoicing in the possession of that peace which passeth human understanding. We are sanguine in our expectation that many of those brought to a knowledge of the truth during this revival will become bright and shining lights, titled "the paradise of monks and nuns."and prove pillars in the temple of our God. Sussex Vale Circuit The Rev. JOHN PRINCE writes us,

It affords me much pleasure to be able to state that during the year past, God has been pleased to visit this Circuit with seasons of refreshing from his presence. At English Settlement, a Goshen Settlement, and New Canaan, revivals of religion have taken place and many have been added to the Lord. In other parts of the Circuit also individuals have been converted to God, and have given pleasing evidence of the gen-

uineness of the work wrought.

There are on every side new and inviting fields of labour, and I think it would not be difficult to extend our border, in every direction provided we had the men. At the present time there are twenty-one preaching places, and to the numerous conversions to Protestantism; Dr. meet the wants of these is sufficient to tax the

The Lone Chimney.

Lone and tall in the moonlight dim, Covered with ivy and mould, Like a sentry wrapped in his martial cloal Stood a chimney dark and old, The gray hearth-stone, which in years agon Glowed bright with a genial ray, All worn and broken by Time's rude step, At the foot of the chimney lay.

But while I gazed through the transient gloom Which the drifting clouds threw o'er, Slowly the shadowy pile was changed, And a living semblance bore. Then a spirit voice with a plaintive tone, Rose full on the midnight air, And in mournful measures of long ago, Bowed my heart with sorrow there.

It sung of a cottage, where sunlight came And peeped through the open door, All broken with struggles through cedar a

And checked in its coming by clambering vine, Till it kissed every blossom its clasp could entwine

Ere it fell on the sanded floor

And it sung of a mother's holy love. And a father's tender heart : Of the lofty spirit and noble frame Of an only son, who had borne his name, And whose strength they should yet rejoice claim, When Time bade their own depart.

And then of a bright and blooming bride, With a gushing heart and free Who came in her morning's early prime, With the first wild rose of the summer time And turned her spirit to sweetest chime-The joy of that home to be.

But again, in sadder strains it sung-Of a dark and treacherous foe. Who crossed the threshold in angel guise, To inflict a demon's woe. The reeling step that had once been firm : Coldness where love had reigned; And the slow but certain rule o'er all Which the tyrant Want had gained :

A conscience seared, which the dying love Of a mother's heart could brave, Nor heed that Grief bade the almond tree Bloom fast for a father grave: Of the sunshine which came and went away With the bridegroom's early bride, But which lighteth not up the turf roofed home Where they laid him by her side :

Of a little, weeping orphan pair, Turned from their home away ; Till the stranger's fire on the hearth-stor gleamed, Nor heeded its decay. The voice was hushed, and the form was gond But alike in the moonlight fair, The chimney kept watch o'er the old hearth

stone, And the hopes that lay buried there

well, it will mark a new era among horses : ney !" with a ferocity of tone and manner

The patent horseshoe attracted a good perfectly appalling. able improvement, though that must be decided by more extended experience of its use. This improvement does away entirely with the cruel practice of driving nails into the horse's hoof, which not unfrequently "touch the quick," causing great pain to the animal, lameness and sometimes ruin. The new shoe has not a nail or nailhole in it. Otherwise, it is made in the shape of a low cut vamp of a man's leather shoe, or the leather peak on the front of a boys's cloth cap. This iron cap on the hoof is about two inches wide at the toe but nariower on each side toward the heel

It is so thin as to be a little flexible, and is fastened to the foot by a screw passing through the two ends behind the heel .-The lower edge of this cap fits into a grove

cut into the outer edge of the shoe, which depart." holds them together, and the screw fastens them both to the hoof. This cap does not come to much wear, and will last our many shoes, so that the inventor thinks the cost will be no greater than the common shoe. while it possesses many advantages, besides being more comfortable for the horse.

The horse cau go to bed at night with shoes off, like other folks, and have them put on his feet again in the morning. He can run bareloot in the pasture, and put on his shoes to go to mill. He can have a pair of smooth shoes on hand for warm and soft weather, and also shoes with sharpened corks to slip on when the ground is suddenly covered with ice. The inventor had used these shoes on an active and valuable horse about three months, and said the horse seemed to be well pleased with them He thought, fit horses could speak, he'should receive from them a vote of thanks.

Another fact worthy of notice is this, that the water arising from an unprepared subsoil to supply rapid evaporation, is charged with poisons, and these conspire with drought to kill the plant.

A soil deeply stirred with the common or subsoil plow, and thus exposed to the air, is pulverized and freed from poisons; and the roots of plants, instead of being confined drought. They receive a more full and constant supply of sap, and are ready at all the air. The water rising to the surface soil is already freed from poisons by the ac-
