A NERVOUS BREAKDOWN

Miss Kelly Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Newark, N. J.—"For about three years I suffered from nervous breakdown and got so weak I could hardly stand, and had headaches every day. I tried everything I could think of and was under a physician's care for two years. A girl friend had used Lydia E. Pinkham's Vegetable Compound and she told me about it. From the first day I took it I began to feel better and now I am well and able to do most any kind of work. I have been recommending the Compound ever since and give you my permission to publish this letter."—Miss FLO KELLY, 476 So. 14th St., Newark, N. J.

The reason this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, was so successful in Miss Kelly's case was because it went to the root of her trouble, restored her to a normal healthy condition and as a result her nervousness disappeared.

BELGIANS CHECKED FIRST SIGNS OF GERMAN OFFENSIVE.

Stirring Story of Ten Men at Bridge-head With Machine Gun Holding Half a Battalion.

(By The Associated Press) British Army Headquarters in France, March 8—Great gallantry and individual heroism was displayed by the Belgian soldiers in the face of great odds in the blooded zone northwest of Dixmude Wednesday. The German attack was futile. This operation has been characterized as a raid, but, as in the case of the recent attack on the Portuguese there is little doubt that the Germans mean to occupy certain posts permanently. They succeeded temporarily in one place, but were driven out with heavy losses after spectacular fighting. King Albert personally congratulated his troops on their remarkable work.

Ten Men Hold Three Hundred.

A Belgian commander, at this juncture with only nine men and a machine gun occupied a bridge head, where he resisted three hundred Germans and twelve machine guns for an hour before help arrived in the shape of a patrol headed by a lieutenant. With this small reinforcement the Belgian commander took the offensive, rushing and re-capturing the position taken by the Germans in front of a small bridgehead. Several German prisoners and machine guns were taken in this daring assault.

In the meantime, the chasseurs had been organized for a counter-attack and these troops advanced under excellent support by the Belgian batteries. In order for the chasseurs to reach the posts held by the Germans it was necessary for them to cross the flooded space on a single board walk, which was dominated by German artillery and machine gun fire. Dismounted horsemen went forward as though on parade amid the crashing of great shells and hurled themselves fiercely upon the invaders. Sanguinary fighting followed and at 1 o'clock in the afternoon the Belgians succeeded in taking the first of seven posts lying in a semi-circle in front of the bridgehead. The savage battle continued until 5.30 in the afternoon when the last of the posts was regained.

The German losses were exceedingly heavy. Forty bodies were found lying on the barbed wire alone, while many perished under the gruelling fire of the Belgians. One German officer was decapitated by a

shell as he was running away. Five officers and 111 men were captured, together with twelve machine guns.

The Germans claim to have captured a considerable number of Belgians and they undoubtedly carried away some prisoners. Although it is impossible to give the exact total of the Belgian losses, they were light.

ROAD MAKING.

There are many miles of roads which must be maintained by some means, more or less inexpensively. On the Dominion Experimental Farms, the Split-Log is found to be one of the most useful implements for this purpose. It is now in use in many localities and an increasing mileage of the rural highways of this country is being kept in repair economically by the use of this simple implement.

Construction of the Split-Log Drag.

A dry, sound red cedar log is the best material for a drag, the hard woods being usually too heavy for this purpose. The log should be from seven to eight feet long and from ten to twelve inches diameter and carefully sawn down the middle. The heaviest and best slab should be selected for the centre, both flat sides to the front and set on edges thirty inches apart, giving the back half a set-back of sixteen to eighteen inches at the right end so that when the drag is drawn along at an angle parallel to the ditch on the right side of the road, the end of the back half will be directly behind the front half, as otherwise the ditch end of the rear slab would stick out past the ditch end of the front slab, crowding into the bank and interfering with the proper working of the drag.

Two cross-pieces are wedged in two-inch auger holes bored through the slabs and on the right hand side a piece of scantling inserted between the ends of the slabs. This is of great value in strengthening and stiffening the end of the front slab.

In working a clay or gumbo road it is advisable to put iron on the lower edge of both flat sides. Handles may be attached to a piece of iron similar to a piece of wagon tire, the irons to be hinged to the back of each end of the front slab. By pressing the handles the drag could be raised, thus depositing a load of dirt which is desired to fill a hollow or increase the crown at some particular spot.

A platform of inch boards held together by three cleats should be placed on the stakes between the slabs. These boards should be spaced at least an inch apart to allow any earth that may heap up and fall over the front slab to sift through upon the road again. The end cleats should be placed so that they will not rest upon the cross stakes, but drop inside them. These cleats should extend about an inch beyond the finished width of the platform. An extra weight may be added if necessary but it is seldom needed.

To use the drag, attach a chain to the left cross piece which is behind the front slab, running the other end of the chain through the hole in the front slab near the right end. It is a mistake to hook this end of the chain over the front slab as in the case of the other end when the drag strikes a stone or snag there is great danger of toppling forward. With the right end of the chain drawn through the hole in the slab as suggested, this danger is entirely obviated.

The operation of the drag is very simple though there are many fine points that may be learned by experience. For ordinary smoothing purposes, the drag may be drawn up and down the road one or two rounds commencing at the

WEAK, ANAEMIC GIRLS.

Can Regain Good Health Through Dr. Williams' Pink Pills.

Bloodlessness is the trouble of many girls who ought to be full of life and good spirits. Instead they are pale, their lips have no color, they have no appetites, their digestion is poor, and if they walk fast, either in the street or going up stairs they are so tired and out of breath that their hearts beat as if to bursts. Always such girls are thin, flat-chested and sallow, with nothing attractive about them. If they do not get better they will have a cough in the winter and then, not unlikely, consumption, that most hopeless of all diseases will develop. No girl should be like this. She should be plump, rosy-checked and full of life, able to talk fast and to stand exertion without being breathless and palpitating. To be in this healthy, happy condition she must have plenty of good, rich, red blood as it is only through the blood that the body can be healthy. And the only medicine that will keep the blood supply rich and red and pure is Dr. Williams' Pink Pills. Their effect upon the pale, weak girl who gives them a fair trial is wonderful. They improve the appetite, back aches and headaches disappear, the glow of health tinges the cheeks, the eyes sparkle, and the step becomes light and elastic. Thousands of girls throughout Canada owe their health and attractive appearance to Dr. Williams' Pink Pills and do not hesitate to say so.

Miss Jennie Book, Beamsville, Ont., says:—"I suffered for over two years from anaemia, and gradually grew very ill. Previously I had been strong and robust, but grew pale and a mere shadow of my former self I tried several medicines, and while some seemed to give me temporary relief, I soon grew worse again. As the months went by I began to despair of getting better, when my mother happened to read an advertisement of Dr. Williams' Pink Pills and suggested that I should try them. By the time the first box was finished I knew they were helping me, and I continued the pills for nearly three months, using in all nine boxes, when I was restored in every respect to my old time strength. This was several years ago, and as I have not since had any return of the trouble, I cannot speak too highly of Dr. Williams' Pink Pills as a permanent cure for this trouble, and I strongly recommend them to all anaemic girls."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

edge and working towards the centre. Usually it is drawn at an angle of about 45 degrees. For the last stroke or two the drag may be drawn backward with the round side of the slab to the front and with comparatively little angle.

There are two stages when roads will drag and one when you cannot do a job satisfactorily. The first stage is when they are in a very sloppy condition inspiring or in other seasons after a heavy rain. A road may then be shaped up wonderfully well, and after the surface has a chance to dry a little, before it is cut up with traffic, it will make a smooth, fine road. Dragging at this stage fills ruts and sends the water to the ditches. After this soft stage, comes a sticky stage when the mud will roll up under the drag and the road cannot be reduced to a satisfactory condition. After this again, when the surface approaches a crumbly texture, the drag may be used very successfully.

Minard's Lintment Relieves Neuralgia

A PROMISING NEW WHEAT.

By bringing out Marquis wheat the Dominion Department of Agriculture did a service to Canada and to the Empire that it would be difficult to over-estimate. On account of its vigorous habits of growth, excellent yield and superior milling qualities this variety which year after year as an exhibit from Western Canada has carried off premier honors at the International Soil Products Exhibition in the United States, has largely supplanted the old standard Red Fife that also gained for Canadian wheat an enviable reputation in the flour markets of the world.

A service rendered by the introduction of Prelude a few years later was also of great importance, inasmuch as it extended the wheat-growing area of this country by millions of acres. To these two very valuable accessions to the hard wheats of Canada is to be added a new sort that comes midway between Marquis and Prelude in the matter of yield and ripening. This new sort has been produced at the Central Experimental Farm, Ottawa, by Dr. Chas. E. Saunders, the Dominion Cerealist, who gives the following account of the new wheat in the March number of The Agricultural Gazette, the official organ of the Federal Department of Agriculture:

"The new wheat, which has been named Ruby, Ottawa 623, possesses characteristics in ripening and other qualities midway between Marquis and Prelude. It is beardless, possesses hard, red kernels, gives a fair yield, and makes flour of the highest quality in regard to colour and strength. Bread made from it ranks in the first class. This wheat is the result of a cross between Downy Riga and Red Fife. Downy Riga was produced from two early sorts, Gehun, an Indian variety, and Omega from Northern Russia. Ruby is recommended for trial where Marquis does not ripen satisfactorily. A very limited distribution of five-pound samples is being made to farmers requiring an early sort. A sufficient crop will be grown this year on the Experimental Farms to provide for a generous distribution next Spring."

The boys of Canada are being called to the front at home is to aid in the work of increased production on the farms. "The Soldiers of the Soil" will wear a special khaki uniform, and those who work the full three months on the farm will be presented with a bronze badge of honor. The work of March 17 to 23 has been set aside for enrolment week.

The citizens of Calgary are now receiving milk from the Union Milk Company, Limited, which concern has been formed

At 50 years of age THE KIDNEYS NEED HELP

There is no reason why, when a man or woman reaches the fifty mark, he or she should not feel full of energy and happiness. It is true, greater care must now be taken to drive away the forces which, if neglected, may develop. Proper attention to the Kidneys suggests

GinPills FOR THE KIDNEYS

At the first evidence that Kidneys are not working properly, that is, if you have pains in the back or sides, twinges of rheumatism, constant headaches and restless nights, swollen joints or urinary troubles, take GinPills. You will benefit almost from the first dose. It costs nothing, if you are not benefited, for the doctor will refund the money back if not satisfied.

Get a box or 6 boxes for \$2.50. A free sample if you write to National Drug & Chemical Co. of Canada, Limited - Toronto U. S. Address: No-Drug Co., Inc. 202 Main St., Buffalo, N.Y.

by the amalgamation of the four largest dairy companies in the city. Cost of distribution has thus been reduced to a minimum.

Be Canny With Food.

Two hundred pounds of codfish were caught by Canadian fishermen last year, of which only 5 per cent were consumed at home. Canadians at home should eat more codfish and save pork an d beef for the fighting men.

Peel Thin and Win.

Maple sugar and maple syrup were never in greater demand than this year, and it is doubtful if prices to producers were ever so high. Sugar is quoted at 16 to 18 cents for best quality.

Wise Wives Won't Waste.

Vacant lot and home garden production is to be a feature of the Canada Food Board's campaign in 1918. The Dominion Department of Agriculture has received reports from all the principal centres of population in the country as to plans for the coming season, and the movement is wide spread.

Capt. Vernon Castle, who had a national reputation as a dancer, has been killed in Texas, while practicing as an aviator.

\$\$\$

Ich Dien.
(I Serve.)

The motto of the Prince of Wales might be adopted as the slogan of modern business. "To Serve" is the keynote of 20th century merchandizing. The up-to-date merchant realizes that it is good business, as well as good morals, to render real service to his patrons, and he tells you about it in his advertisements.

It pays to patronize consistent advertisers. They are modern in their methods and imbued with the modern spirit of service.

Settle the Flour Question

BY USING

PURITY FLOUR

Once you know how good Purity Flour really is, you will rely on it constantly for all your baking needs. It goes further, too, and is therefore the cheapest flour you can use.

More Bread and Better Bread---and Better Pastry, too.

CABBAGE GROWING.

Any soil except that having a gravelly sub-soil will produce good cabbage. The heavier soils may be inclined to be too wet, in which case drainage may be necessary. Poor sandy soils are unsuitable, but sandy areas rich in humus may produce abundantly. It is essential that the soil should contain plenty of plant food in an available condition. The best soil and plant conditions can be furnished by using stable manure at the rate of 15 or 20 tons per acre, and to this may be added 600 to 800 pounds of fertilizer containing 4 p. c. nitrogen and 10 p. c. phosphoric acid. If a mixed fertilizer is not used, 150 to 200 pounds of nitrate of soda and 400 to 600 pounds of acid phosphate per acre will be as satisfactory. If no manure is available, a clover sod should be selected and 1000 to 15000 pounds of fertilizer applied per acre. Limestone improves the crop and 2 tons per acre will prove satisfactory.

A thorough working of the soil is advisable, particularly so if the soil is heavy. If the soil is sandy, level culture may be best, but usually as cabbage are planted on the heavier soils, it is considered best to ridge the soil into rows 30 inches apart. The manure is spread broadcast and plowed in, after which the limestone is applied and the ground thoroughly disced and levelled with the harrow. The fertilizer is then scattered broadcast and the land put in drills with the horse hoe, thus throwing all the fertilizer into the row, giving the plant a needed vigorous start.

If cabbage are grown for an early market, a southern, well drained location should be selected, but for late cabbage a northern exposure will prove most satisfactory. For early cabbage, the plants should be started in the hot-beds the first of April. These are transplanted 1-2 inches apart into flats about the middle of April, and after being hardened off in a cold frame early in May, will be ready for planting to the open ground about the 8th of May. Copenhagen Market handled in this way will be ready for market the latter part of July or early in August.

For late cabbage the seed is usually sown in rows about 6 inches apart in good garden soil, or in a cold frame about the middle of May. It is wise to provide for a cheese cloth covering to keep out the fly of the cabbage root maggot if this pest is troublesome, otherwise the plants may be ruined. These plants should be set to the field by the latter part of June. It is wise not to seed too thickly as the plants will not be as stocky and are likely to become leggy when crowded.

Cultivation should be such that the ground is kept loose, forming a fine mulch on the surface to help conserve moisture. The cabbage uses large quantities of water, and every provision should be made to prevent the soil from becoming hard and dried out by giving frequent cultivation, particularly when dry

enough after rains. The cost of growing cabbage per acre should be approximately as follows:—

Manuring, 15 tons	\$ 30.00
@ \$2.00	30.00
Fertilizer	30.00
Plowing and working	5.00
Half pound seed	2.00
Work on seed bed	5.00
Transplanting	15.00
Cultivating	7.00
Spraying	6.00
	\$100.00

The plants are usually set 18 to 24 inches apart in the row. If the plants are spaced 18 by 30 inches, it would require 11616 plants to set one acre. Assuming that 10,000 plants would develop into 5 lbs. cabbage, this would give a total of 25 tons per acre, which at 1c. per pound, or \$20.00 per ton would amount to \$500.00 per acre. One must take into account losses from insects, etc. and probably 12 1-2 tons of marketable heads per acre would be an average crop. This, however, would give a crop worth \$250.00 at 1c. per lb., with an outlay of approximately \$100.00.

The Copenhagen Market is the best early drumhead variety. Succession is a good mid-season drumhead and the Flat Dutch is a reliable sort. Fottlers Brunswick, Flat Swedish and the large Drumhead are other good ones. For winter storage purposes the Danish Roundhead and Danish Ball-head, are two of the best.

The cabbage Rott Maggot is the most difficult to control of all cabbage insects. The white egg is deposited by a small fly at the base of the plant, and on hatching the maggot penetrates the root and destroys the plant. Disks of tarred paper placed around when they are set is considered effective by many. Success in using them is dependent upon their being properly applied to fit tightly so that the fly will be unable to obtain access to the soil at the stem of the plant to lay her eggs. The cabbage worm is usually controlled by using arsenate of lead, 2 pounds to 40 gallons water. To this is added a sticker made by boiling together for one hour 2 pounds resin and 1 pound of sal soda in a gallon of water, and this is added to the 40 gallons. This may be used safely until the heads are half formed. Fresh Pyrethrum insect powder, 1 pound to 4 pound of flour thoroughly mixed and allowed to stand in a tight vessel for 24 hours before using is an entirely safe preparation to dust on cabbage or cauliflower to kill this caterpillar.

The above article is written by Prof. Blair of the Experimental Farm, Kentville, and will be found of great interest to all who can and will grow cabbage this year. There is no doubt about a market as cabbage found a ready sale the past year. In consultation with the Supplies Limited of this town they inform us that they will be paying \$20.00 per ton for cabbage this season and will be in the market to buy 600,000 lbs.— Editor Advertiser.

EDUCATIONAL DEPARTMENT CANADA FOOD BOARD.

"The Food Controller Says."

Rationing is a subject that is receiving much newspaper attention in Canada at present. It is a thing that is as new to us in theory and practice as war was three years and a half ago. That must be the only excuse for some things which are written. The general assumption is that rationing can be carried out, just as some people thought price-fixing could, by a mere wave of a magic pen. When it is remembered, however, that Canada's seven and a half million people are scattered over an area greater than Europe the question at once arises: "Who is to see to the carrying out of the rationing scheme?" For rations mean that each family would be under an obligation not to eat more on any day or in any week than a certain set amount of particular foods.

It would not be hard to make a rule that so much bread should be used by each person at a meal. But how many million police would be wanted to attend to the execution of the order? Even the making of orders that would be fair in a large city as compared with a country home offers difficulties little thought of. In the Maritime Provinces fish is plentiful and comparatively cheap as in the West are wheat and beef. But more fish is not needed "at the front" to anything like the same extent that beef and wheat most urgently are wanted.

What rationing plan could ignore the "customs of the country"? Yet immediately here a discrepancy arises. One might prescribe the use of beef and wheat in Canada by decree but its incidence would be unequal from the first. There is, one way in which the food saving could be made which the whole end and object of rationing. It is by a voluntary pledge of each home. In three words this is nothing else than by unremitting patriotic saving of the food-stuffs that are known to be wanted by the Allies. No amount of talking can make up for this. It is not a legal question at all but a moral one, which must be left to the conscience of each household. There is not better way for the present in which

those who cannot go to the trenches can actually help in the fight in Europe for moral rightness and pure ideals of life than in practicing in each home at all times of the day that honest carefulness to avoid waste which would have to be done under a compulsory rationing scheme.

In a way this is a new factor which hitherto it has not been possible to utilize. The Canadian women is here especially indicated to aid. So far woman's work in the Dominion had to do with Red Cross and similar works of mercy. This opens out the field enormously. Every woman who saves bread, beef and pork products is in fact and deed wielding an unseen weapon in the war as truly as her sisters behind the trenches are in caring for the broken and the maimed.

SEVEN WEEKS IN SHELL HOLE.

One of the most remarkable experiences of the war was that of Pte. J. Taylor of the London Regiment, whose home is at Holloway and who received the D. C. M. for "extraordinary pluck and endurance in his determination not to fall into the enemy's hands." He was cut off with his company and received a bullet in the thigh, causing a compound fracture. To avoid capture he crawled into a shell hole, where he remained during the whole of which time the surrounding district was subjected to a severe bombardment by our artillery. He lived on tins of bully beef collected at night from dead bodies, and water which he obtained in a waterproof cape.

After some weeks three of the enemy visited his shell-hole, but by feigning death he avoided capture and eventually succeeded in crawling back to our lines—a distance of some 900 yards.

Newfoundland is rapidly learning how to build her own vessels. The Province is filled with excellent timber of almost every description. The Curling Star says the shipbuilding concern at Harbor Grace has laid the keel of a 600 ton ship. Four other ships of over 400 tons each will be laid down shortly. About two hundred and fifty men are employed there at present, and the "second city" promises to be a busy spot in the very near future.

Letter Received by Mrs. G. W. Woodworth in answer to a Xmas Stocking.

FRANCE, Feb. 5, 1918.

Dear Friend:— I take the liberty of calling you a friend. For I have been lucky enough to receive one of the stockings which you sent to a soldier. And I know that you are indeed a friend.

It is friends like you and other ladies at home that keep the spirits of the boys at the highest point. It is not only the lads in the firing line who are doing their bit. But you the women of Canada are also doing their bit and a big bit at that. When they give of their time and money to send comforts to the lads in France. While I sympathize with you over the fate of your brother, Capt. Allen. Still I really believe he is better off after all. Through fear the Hun is forced to treat his prisoners now in a decent manner. Which was not always the case.

Again thanking you for your very nice parcel, I remain, Yours, F. TUFTS.

THE ONLY MEDICINE FOR LITTLE ONES

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Their use teaches her they are absolutely safe; that they never fail to give relief and that the little ones do not dread taking them as they do castor oil and other harsh purgatives. Concerning the Tablets Mrs. John M. Weaver, Blissfield, N. B. says—"I have used Baby's Own Tablets for the past ten years and have found them so good I always keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

ESTATE WORTH \$72,000

The inventory of the estate of Mrs. Mary Alice Sheffield, (widow of Dr. M. A. Sheffield, St. John), who died at Southern Pines, North Carolina, has been filed in the probate court at Halifax. The inventory shows the estate to be worth \$72,000.37.

Real West Canadian Fur

THOSE who have never had the privilege of seeing a wild fox in the full glory of his winter clothing cannot begin to form a conception of the beauty of the dress. In the foothills and mountains of western Canada these animals reach practically the same perfection they do in the bitter cold of the Arctic. Some people claim they possess a more showy coat because they generally fare better.

The ordinary dweller of the cities pictures a fox as an indefinite red creature something like a wolf or a dog, but possessing a big tail. They know a fox is called red generally, but they do not know the shades. Those people who have seen foxes in cages also cannot appreciate the vast difference between the captive and the free.

The true wild fox in winter is a wonderful creature of soft blendings of bright gold, cream, the palest of white, the sharpest of black. Every hair shines with life and vigor, and the brush is a magnificent appendage which would make a true cross-country fox-hunter kill an Irish hunter to obtain.

A splendid type of red fox trotted up the snow-covered ice of the headwaters of the Red Deer River in Alberta. He heard the sound of splintering shell-ice and he paused to listen. Far ahead some Stoney Indian, returning from their big annual game drive to the Clearwater and the Saskatchewan were crossing southward, their ponies laden with the meat of bear and deer and moose. They were bound for their homes in Morley, thirty miles distant, where they would sit in comfort in the warm log cabins for the remainder of the winter, going out perhaps only to feed their saddle horses or to pose in their blankets on the Canadian Pacific Railway platforms for the benefit of any tourists who might be travelling.

The fox took to the brush. It was high noon; clouds had rolled down from the peaks and soft new snow was falling. Crossing another bend of the river he came to a river flat where the body of a dead horse lay. He was as cautious as any fox but he

was confident that no harm lay in the meat of this carcass because on the preceding night he had slunk by unspooked, at the foot of an open, snow-filled gulch he spied his catch. It was dead, its toes turned up as is usual with the victims of strychnine. Its shining red and white and black coat, its huge, soft brush, were as striking points of beauty as anything else in that ermine covered, green and silver studded spot of northern beauty. But the hunter was material. He was pleased because he had procured a girl in New York that when he returned home from his holiday in the foothill hunting country he would bring her some real Canadian fur.

But sometime during that morning a hunter in the district had "sited" portions of the dead animal. He had heard the coyotes at it and he had been waiting for just that development, knowing that after their caution had been blunted by one feed they would be back again and he would be able to harvest some fur. By and by he came to inspect his "bait." He saw the fox tracks in the

PUBLIC CLOSING FOR ACADEMY AND COMMON SCHOOL.

In an effort to create increased interest in the work of our schools it has been formally decided by the School Board that a public Closing will be held in September next at which the certificates won by the graduating class will be presented and prizes distributed to successful and hard working students. The matter had already been considered by the large and representative Educational Committee of Kentville progressive Board of Trade, who immediately took steps to outline, with the aid of the teachers of the Academy and of the Common Schools, a list of prizes calculated to promote a healthy rivalry in every branch of the school work. In the multitude of counsel there is wisdom and every pains has thus been taken that these prizes shall do the greatest good to the greatest number, the plodding, patient worker being remembered as well as the more clever leaders.

The report of the Educational Committee was heartily endorsed by the Board of Trade at its last meeting and the list of prizes and rules governing their distribution, as there read, are given below:

- GRADE (XI).**
1. Highest Aggregate.
 2. " in Mathematics including Trigonometry Algebra and Geometry.
 3. " in English, Chemistry and History.
 4. " in French and Latin.
 5. Greatest improvement and effort.
- GRADE (X).**
1. Highest Aggregate.
 2. Highest in Mathematics, including Algebra, Geometry, and Arithmetic.
 3. " in English and French.
 4. " in Latin.
 5. " in History and Physics.
 6. Greatest improvement and effort.
- GRADE (IX).**
1. Highest Aggregate.
 2. " in Arithmetic and Geography.
 3. " in Algebra and Drawing.
 4. " in English and Agriculture.
 5. " in French and Latin.
 6. Greatest improvement and effort.
- MANUAL TRAINING (all classes).**

Greatest Progress and effort in Wood-working and Drawing.

DOMESTIC SCIENCE. (All Classes).
Greatest Progress and effort in Sewing.

COMMON SCHOOLS.
Grade (VII).
Highest in English, Mathematics, and Drawing.

GRADE (VII).—Highest in English History and Arithmetic.

GRADE (VI).—Highest in English and Arithmetic.

GRADE (V).—Highest in English and Arithmetic.

GRADE (IV).—Highest in Writing and Arithmetic.

GRADE (III). Best in Drawing and Arithmetic.

GRADE (II). Best in Writing and Arithmetic.

GRADE (I).—Greatest Progress in Writing and Drawing.

KINDERGARTEN: Greatest Progress in Writing.

Provided that a sufficient sum is raised to approximate an average of Five Dollars per prize for the above list this sum will be divided into a first and second prize in Manual Training, Domestic Science, and in each of the Common School grades.

RULES GOVERNING DISTRIBUTION OF PRIZES.

1. Aggregates and Highest marks to be determined from Provincial Examination marks for Academy Students, from Academy Entrance marks for Grade (VIII), and from Grading Examination marks in the Common Schools.
2. Greatest Progress and effort to be determined by Academy Staff for Academy Students by Principal and Teacher in Common Schools by reference to Quarterly Examination Records and exhibit of work done at beginning and end of the year.
3. In Academy Grades no pupil is to receive more than two prizes. Should a pupil make the mark necessary for a third prize, public announcement will be made of the fact but the prize will go to the pupil coming second highest.
4. Any pupil winning a prize under rule three, shall not obtain a second prize in the same way, but the prize will pass to the next highest pupil announcement to be made as above.
5. Any person giving a prize may offer it for any subjects mentioned herein, or for an additional prize, or simply contribute a sum of money or an article as a prize, to be assigned to its place by the Academy Staff.
6. Unless requested otherwise,

any prize, whether assigned to any place by the Donor or by the Staff will be announced from the platform at the Closing as having been offered by the donor and won by the receiver.

7. Any money or article pledged as a prize to be handed in on or before Sept. 1, 1918. Keeping in mind, again, the desirability of doing the greatest good to the greatest number, the committee decided, not to appeal for assistance to those public minded citizens, only, who would have readily subscribed, the funds needed, but to make a general appeal through the children of which the public will hear more next week.

On Easter Sunday, March 31, the choir of St. James Church will be voted in cassocks and surplices for the first time and the music on that day will be of a very high order and worthy of the "Queen of Festivals." There will also be three celebrations of the Blessed Sacrament, at 7, 9, and 11 a. m. In the afternoon at 3 o'clock a special service for the Sunday School children will be held when the Linten boxes will be placed upon the altar of the Church as a Thanksgiving. The 7 o'clock service will consist of Evensong East hymns and Anthems, and a sermon on the Resurrection. Strangers will be cordially welcome.

DIED.

William H. Sturk.
The death of William H. Sturk took place at the home of his daughter, Mrs. Walter R. Dickie Hillaton, on the 26th day of February at the age of 71 years.

Mr. Sturk came to Canning when a young man and married Eliza Blenkhorn, daughter of the late James Blenkhorn and lived in Canning until his wife's death two years ago.

Mr. Sturk had been in failing health about four years, the last eight months he was confined to the house.

He spent one year with his daughter, Mrs. Smith of Diligent River, Cumb. Co. returning to Hillaton last August gradually failing until the end came as a great relief.

He was consistent member of Canning Methodist Church being a member of the Trustee Board for some years.

Burial at Hillaton Cemetery by Independent order of Eggesters of which he was a member.

He leaves to mourn the loss of a kind and loving father, John of Roland, Manitoba, Mrs. James Smith, Diligent River, Cumb. Co. Mrs. (Dey) Stanley Spicer of Brooklyn, N. Y. and Mrs. Walter Dickie Hillaton.

Grandmother's Pies are done

How luscious they look as she takes them from the oven. Here is a kind well worth your attention, made from dried apples, small raisins and brown sugar. "Spring mince pies" grandmother called them. She had many other delicious pies and pudding made from brown sugar.

In fact she hardly used any other sugar for cooking.

Lantic Old Fashioned Brown Sugar

Is just like the sugar that Grandmother used to use. It comes in Light, Brilliant and Dark Yellow, but the Brilliant Yellow is about right for most of the things Grandmother made and for your own favorite brown sugar dishes. You should keep brown sugar in your pantry and you should use it often. It has a delicious characteristic flavor essential to the success of many dishes. It is economical, too, costing less per pound than granulated.

If you don't know how to make Grandmother's good old-fashioned dishes, no matter. We have just printed a delightful new booklet called "Grandmother's Recipes." It is devoted entirely to brown sugar goodies. Send for it to-day enclosing 2 cent stamp to cover cost of mailing and please add the name of your grocer. Lantic Old-Fashioned Brown Sugars are made by the same firm that makes the famous Lantic "FINE" Granulated.

Atlantic Sugar Refineries, Limited - - Montreal, Que.

Income Tax Forms Are now available

Returns must be filed on or before 31st March

THE Dominion Income War Tax Act requires you to fill in one or more of the five special Forms provided before 31st March, 1918. In order to assist the public to understand just what is required of them, information on each Form is given below. Read carefully, then get three copies of the form that fits your case and fill them in. Answer all questions fully and accurately. For making false statements, a penalty of \$10,000 or six months' imprisonment, or both, is provided.

Individuals.—All persons unmarried, and all widows or widowers without dependent children, whose income is \$1500 a year or more, must fill in Form T1. All other persons whose income is \$3000 or more, use the same Form. Where any income is derived from dividends, list amounts received from Canadian and Foreign securities separately. Fill in pages 1, 2 and 3 only. Do not mark on page 4. Partnerships, as such need not file returns, but the individuals forming the partnerships must.

Corporations and Joint Stock Companies, no matter how created or organized, shall pay the normal tax on income exceeding \$3000. Use Form T2—giving particulars of income. Also attach a financial statement. Under Deductions, show in detail amounts paid to Patriotic Fund and Canadian Red Cross or other approved War Funds.

Trustees, Executors, Administrators of Estates and Assignees use Form T3. Full particulars of the distribution of income from all estates handled must be shown as well as details of amounts distributed. A separate Form must be filled in for each estate.

Employers must use Form T4 to give names and amounts of salaries, bonuses, commissions and other remuneration paid to all employees during 1917 where such remuneration amounted in the aggregate to \$1000 or over.

Corporation Lists of Shareholders.—On Form T5 corporations shall give a statement of all bonuses, and dividends paid to Shareholders residing in Canada during 1917 stating to whom paid, and the amounts.

Figures in every case are to cover 1917 income—all Forms must be filed by 31st March. For neglect, a fine of \$100 for each day of default may be imposed.

In the case of Forms T1 and T2, keep one copy of the filled in Form and file the other two with the Inspector of Taxation for your District. In the case of T3, T4 and T5, keep one copy and file the other two, with the Commissioner of Taxation, Dept. of Finance, Ottawa.

Forms may be obtained from the District Inspectors of Taxation and from the Post-masters at all leading centres.

Postage must be paid on all letters and documents forwarded by mail to Inspector of Taxation. Department of Finance, Ottawa, Canada

Inspector of Taxation, J.P. Edwards, 411 Dennis Building, Halifax, N. S.

OUT OF IT.

Up and down the village street walked old Tompkins, dressed all in his Sunday best and with a clean collar on. "Hello, old fellow" a friend

hailed him. "Aren't you working today?" "No," replied the old man proudly. "I'm celebrating my golden wedding." "Really? Then you've been married fifty years?" "Yes, I have."

"Then where's Mrs. Tompkins? Isn't she celebrating, too?" "The present Mrs Tompkins," the old man coldly, rebuked the idle questioner, "has nothing to do with it."

Every Little Helps.

Every available maple tree should be tapped this spring and every sap bucket, pail and pan pressed into service, whether it is the most up-to-date equipment or the old time sugar making outfit that has not been used for years. Every little helps. Every pound of maple sugar is wanted.

Herd on The Decrease.

Figures compiled some months ago by the French authorities show how the herds of livestock have been depleted since the outbreak of the war. Cattle have been reduced by 16.5 per cent, sheep by 36.6 per cent and hogs by 40.2 per cent. Canada has been supplying only the following percentage of the Allies import requirements: Beef—2.23 per cent, pork products 8.55 and butter 1.40.

Big Demand For Maple Products.

The Canadian market has hitherto readily absorbed 75 per cent of the Canadian sugar maple production. The United States takes all we can send and would gladly take more. The demand for the pure products has for years exceeded the supply.

Meat Consumption on Decline.

The consumption of beef and mutton in Britain during the last year of peace was 150,000 tons per month. During 1916-17 this amount had fallen to 120,000 tons per month. The total available supplies at present in sight for the current year are not more than 88,000 tons per month.

Clergy Promise Support.

The clergy of all denominations in Canada are promising to do everything in their power to promote the work of food consumption and production. In a number of cases the Bishops are sending out pastoral letters to their clergy. Archbishop Matheson, Primate of Canada, has promised his fullest support to the Canada Food Board.

Worth Thinking About.

Every little bite makes a muckle. The second helping is getting to be bad form. There's lots of money to go round but bacon, beef and wheat can't make the circuit. Fish may not be a brain food but brainy men are eating more fish. Waste and want are twin sisters and neither is beautiful. Learn to control your own appetite before you try to control your neighbor's. A good citizen is known by the

DON'T YOU KNOW

that you can soon get rid of the agony of chapped hands by using Zam-Buk. Mrs. William Elstone, of Haliburton, Ont., writes:—

"Last winter my hands were very badly chapped. I used a lot of different so-called remedies, but my hands only seemed to get worse. Finally I tried the great herbal healer—Zam-Buk—which completely healed them."

Mrs. M. A. Bateson, of Souris, Man., writes:—"I have used Zam-Buk for chapped hands, and know of nothing to equal its wonderful soothing and healing powers."

Zam-Buk is also unequalled for chafings, frost bites, cold cracks, and cold sores; as well as eczema, scap sores, old wounds, ulcers, blood-poisoning, piles, burns and scalds, cuts and all skin injuries. 50c. a box. All druggists and stores, or Zam-Buk Co., Toronto.

food he eats.

Free Men For Farm Work.

The Canada Food Board is preparing plans for the mobilization of labor for spring seeding operations. Men familiar with handling horses will be specially needed and it is essential that they be secured to work on the land. For this reason employers of such labor, in urban centres, will be well advised to consider the adoption of co-operation methods of delivery in order to free the men capable of driving horses and especially those with farm experience.

JOHN REDMOND'S SON WON D. S. O.

LONDON, Friday, March 8.—The circumstances under which Captain William Archer Redmond, son of the late John Redmond, and member of parliament for East Tyrone, won the Distinguished Service Order are announced in the London Gazette. Captain Redmond was decorated "for conspicuous gallantry and devotion to duty when in command of a company holding a line of posts."

"Following a heavy barrage," the statement continues, "the enemy attacked in strength and a bomb fell in his post knocking out half of the occupants. He immediately led the survivors out and drove the enemy back, which enabled him to establish a new defensive line and hold it against repeated attacks until day broke."

There were 34 persons killed and 79 injured in Paris as the result of Monday's air raid by the Germans. In addition to the bomb victims 66 persons suffocated in a panic.

For years, I suffered with these
dreaded diseases, trying all kinds of
treatments until I was told I was
incurable.
One day a friend told me to try
'Fruit-a-tives'. To my surprise, I
found this medicine gave immediate
relief, and in a short time I was all
right again."

Limited, Ottawa.

ENGLISHMEN ARE TRAVEL- LING AND CANADIAN ARE WITH THEM.

"Englishmen," says the Lon-
don Daily Express, "know more
of the earth than they ever did.
Today some four million Brit-
ishers are looking at the world
in the intervals of looking after
the trenches. In the eight-
teenth century young men of
good family were sent abroad
to complete their education by
travel in foreign countries. This
was called making the grand
tour. Today young men of
all sorts and conditions are
completing their education in a
different way. They are
scattered all over the terrains
of the Seven Seas. They are
leaving their footprints in nearly
every quarter of the habit-
able globe. They know all
about the manners and customs
of France and Belgium. They
have viewed the rough con-
figurations of the Balkans.
They have adventured at large
along the lines of Russia. They
have seen death at the Dar-
danelles. They have been back
in the original home of John
Company. They are in Egypt,
where the strange gods sleep.
They are smoking fags in Mes-
opotamia, and have marched
with reverence into Jerusalem.
They have been at home in Brit-
ish East Africa, and have made
German South-West Africa no
home for Germans. They have
made Gallipoli their washpot.
They are bearing witness that
there are more things done in
Italy than the eating of Maca-
roni. Decidedly the young En-
glishmen of today have been
and are making the grand tour.
Their children will be able to
learn geography at first hand."

FRUITFUL FRANCE.

(From the New York World.)
France is a wonderful coun-
try. With the foe on her soil

and millions of men in arms,
her food is reported today as
far more plentiful than in Eng-
land, and she is perhaps not
much nearer than we should be
to general compulsory ration-
ing. There must be very few
people in France who are not
working at some useful task.

CAUTION REQUIRED.

(Exchange.)
Mr. Moneybags was a rich
man and a generous one, but
he did not like to be "done."
On one of his visits at a fashion-
able resort the hotel proprietor
took advantage of his visitor's
wealth and the bill he pre-
sented was exorbitant.
Moneybags, however, paid
without a murmur. Then he
said, as he folded the receipt:
"By the way, have you got
any one-cent stamps?"
"Yes, sir," said the manager.
"How many would you like?"
"Er," said Moneybags, mild-
ly, "how much are they apiece?"

Hawthorn, N. B. Sept 1st, 1905

Food Value of Potatoes.

Canadians who eat them free-
ly can help to save wheat
flour.

People who wish to help in
food conservation should con-
sider potatoes as a partial sub-
stitute for wheat flour. Potatoes
are the chief staple of the
semi-perishable foods. Cana-
dians do not eat their fair
share of potatoes even in nor-
mal times. We have been large-
ly a wheat, beef and pork con-
suming people. These staples
are now required for overseas
and it behooves us to substitute
other foods for them whenever
possible. We consume, perhaps,
two and one-half bushels of
potatoes per capita per year, or
about one-third of a pound per
potato. In some European
countries one pound per day per
capita is consumed, and in some
districts four pounds per day,
and nearly twenty-five bushels
per year.

Despite the increase in price
since the war, potatoes are still
among the cheapest of foods.
One pound of roast beef costs
ten times as much as a pound
of potatoes, and twenty per cent
of beef is bone. Three and a
third pounds of potatoes supply
1,000 calories of energy, at a
cost of less than 10 cents, while
about 2,500 calories are requir-

ed for full grown persons work-
ing indoors. That is to say,
if all foods were as cheap as
potatoes we could live on 25
cents a day. Healthy men have
lived and worked for months on
a diet of nothing else than pota-
toes, oleomargarine and a little
fruit. Potatoes contain pro-
tein of the very best kind. They
also contain mineral salts which
neutralize harmful acids in the
body. The food material in
potatoes is 98 per cent digesti-
ble.

Canadians have large suppl-
ies of potatoes, carrots, onions
and turnips and by consuming
these vegetables freely, they
can economize with bread.

More than 300 ways of cook-
ing potatoes are known. They
combine well with many flavors.
They can be used to economical
advantage with meat and fish,
in stews, croquettes, hash
chowders, meat pies, etc. One
half a cup of mashed potatoes
and two cups of flour make a
bread mixture that helps the
bour go farther.

Good cooks know the ways
of using potatoes are various—
boiled, steamed, lyonnaise,
baked, chipped, fried hashed
brown, creamed, scalloped,
stuffed, au gratin, and scores of
combinations.

Canada has plenty of pota-
toes and, although the price is
high compared to normal times,
it is not high in comparison
with other foods in war time.

FAIR PLAY.

Possibly your best cow earned
over two hundred dollars for
you last year; possibly, too,
your poorest cow proved to be
well worth keeping, for your
records of each individual may
have re-assured you.

But if no records were kept, if
the total income from all the
milk was just credited up to the
whole herd showing simply the
average income from each, have
your cows been treated fairly?

For on studying individual
records it has of ten been found
that some cows earn three and
four times as much as others.
So if one cow brought in only
forty dollars but another brought
in one hundred and sixty,
is it fair to say the average in-
come was one hundred dollars?
Evidently it is not: Yet that
is precisely what happens every
time only the average is known.
Give the cows fair play: they
may have the best of feed and
care, but go a step further and
see that your best cow, the most
vital food producing machine, is
getting full credit for her mag-
nificent work.

Then by retaining the best
cows, as shown by their respec-
tive records, the whole herd can
soon be made to give a far bet-
ter return at no greater outlay.
A letter to the Dairy Commis-
sioner, Ottawa, will bring you
milk record forms free of
charge.

C. F. W.

The Pacific Coast is now en-
gaged in sending forward grain
to Great Britain. A steamer
completed in 1917 at Portland,
Ore., and which was taken by
the English Government as a
trial ship to carry wheat from
Vancouver to England via the
Panama Canal, has arrived
safely at her destination, after
a voyage of 52 days. She had
100,000 bushels on board. Other
grain laden ships are following.
This is a distance of over 8000
miles. Formerly before the
Panama Canal was opened the
distance from Vancouver to
England by water was over 15,
000 miles.

FARMERS AND DAYLIGHT SAVING.

A Hector Cutten, farm inspec-
tor for the Nova Scotia govern-
ment, is at the Halifax. Last
evening to a Herald representa-
tive he said: "I hear a lot of talk
among the farmers in regard to
what O'Brien, MacMahon and
Black said on daylight saving.
The farmers certainly are op-
posed to the idea. For my part
I believe that in a matter of such
far reaching importance there
should be a plebiscite. The
people should rule."—Herald.

SEAPLANES FOR U. S. ARMY.

Washington, Mar. 14—Amer-
ica's first fighting seaplane
equipped with liberty motors has
been tried out and accepted, it
was learned last night, and a
number of craft are now being
delivered for use of naval air
service. They are the advance
guard of a big fleet which has
been added to the forces engaged
in submarine hunting in the
war zone. The second type
of fighting plane for the Ameri-
can army, known as the Bristol
model, also has now reached the
production stage and a consid-
erable number will become avail-
able during the present month.
Still another type of a two-
seated machine is being manu-
factured.

SOLDIERS OF THE SOIL.

Mr. L. A. Buckley, Maritime
Province Secretary for Y. M.
C. A. work among boys has
been appointed to act as direc-
tor of the plans to recruit Mari-
time Province boys for working
the soil this Spring and Sum-
mer. Two thousand boys are
expected to enroll in the pro-
vince as a whole. Each boy
who serves as a "Soldier of the
Soil" will be given a suitable
medal by the Dominion Govern-
ment and it is expected that
in Nova Scotia the provincial
government will present each
boy with a bar to go with the
medal indicating that he served
on a Nova Scotia farm.
While Mr. Buckley's field is
the Maritime Province, he will
give special attention to the
enlistment of the young "Sold-
iers of the Soil" in Nova Scotia,
acting in co-operation with the
provincial department of Agri-
culture and the Provincial De-
partment of Education, as well
as with local committees. The
enlisting will commence March
7th, and the boys will be on the
farm in early May.

The loss by fire of Midway
Hall, Lunenburg the property
of R. C. S. Kaulbach, will a-
mount to \$20,000. This fine
residence was built by the late
Senator Kaulbach. There
were destroyed a fine lot of anti-
que furniture and family me-
mentoes of at least three gen-
erations which were most valu-
able and impossible to replace.
The fire is a mystery, as no one
was occupying the property.

Two Newfoundland schoon-
ers—Lottie A. Silver and Maid
of Harlech—have been torpedo-
ed and sunk. The former was
in midocean and Capt. Rod-
gers and crew of six Newfound-
land at New York. She was
130 tons and was built in Nova
Scotia four years ago. The
Harlech was sunk in the Medi-
terranean. No word of the
crew has been received. An-
other schooner—the Matanzas
—has been given up as lost, as
she is long overdue. Capt.
Oickle and crew of seven men
belonged to the Maritime Pro-
vinces.

PROHIBITION IN CANADA APRIL 1ST.

Prohibition regulations have
been prepared by the govern-
ment and with the exception of
a few technical points, are now
complete. At the same time
the government has prepared
regulations governing packing
houses. These likewise will
be issued shortly.

While no official announce-
ment is yet to hand, it is anti-
cipated that the regulations in
both cases will, in the main,
follow lines laid down some
time ago. An official state-
ment issued in December de-
clared that the importation of
intoxicating liquors would be
prohibited after Dec. 24, 1917,
except in the case of liquor al-
ready purchased and on the
war. It was also announced
that the transportation of liquor
into any part of Canada where
in the sale of intoxicants is il-
legal, will be prohibited on

and after April 1, 1918."
20,000 CANAIAN TO COME.
HOME.

Between now and June 1st
nearly 20,000 soldiers will ar-
rive in Canada medically or
physically unfit for active ser-
vice. About 7000 will arrive
during the next 4 weeks. The
principal laid down that men
are not to be kept on the pay
roll unless usefully engaged and
that invalided men are not to
be kept in England is being
rigidly adhered to. There is
to be no more allowing of men
to stay comfortably in England
at the expense of the country.
They must come home and re-
enter civilian life.

POTATOES 65 CENTS A BUS- HEL.

WINDSOR, Ont., March 11
—Four carloads of potatoes
from New Brunswick have just
arrived here. The price in
New Brunswick was 65 cents a
bushel, but the rate here is a-
bout 50 cents a peck.

A detachment of more than
100 recruits for the Jewish bat-
talion training at Windsor, N.
S., passed through Yarmouth
from Boston, Saturday March
2nd. The battalion after a
course of training, will form
part of the British army on
garrison duty in Palestine.

At the conference between
members of the Governmt and
representatives of transporta-
tion companies and harbor
commissioners at Ottawa it was
decided that the Atlantic ports
of Halifax and St. John would
be used to a greater extent this
summer than they have been in
the past.

It is possible that a battalion
of men, made up of soldiers
lower in category than A will
be detailed for guard duty at
Halifax. This may be done in
order to relieve men who are fit
for overseas, but who cannot be
spared unless other men are
provided.

A Good Impression.

First impressions are tenacious. The customer who gets an unpleasant impression on his first visit to a store, is not likely to be a permanent customer. On the contrary, a favorable first impression will insure a steady patronage.

First impressions are often obtained from a firm's advertising, even before the store is visited. A frank, straightforward statement of values and advantages, will create an impression of fair dealing, and bring the customer to the store in a receptive state of mind.

Our advice to merchants is to give careful thought to their advertising and to advertise regularly.
