Only 76 First Class Passengers Saved

Little Prospects of News of Further Survivors --- Saved Now Total 703 --- United States Waits For Official Information

The latest available information indicates that about two-thirds of the persons on board the Lusitania lost their lives. The number of passengers is given by the Curard steamship representatives in New York as 1254, and of the crew as 665, a total of 1919. The number of survivors now accounted for is 703. This indicates a death list of 1216.

for is 703. This indicates a death list of 1216.

Hopes that the list of persons saved may be materially increased were dashed by an announcement from the British Admiralty that all but one of the rescue fieet which put out from Queenstown had been reported and that there was little prospect of news of further survivors. Nevertheless, inquiries are being made all along the coast in the hope that other rescues may have been made by small craft which put in at isolated points.

Of the 290 first-class passengers it is now believed only 76 were saved. No word has been received of Alfred Gwynne Vanderbilt, Charles Frohman and other prominent men who were aboard.

The story of the Lusitania came in slowly, owing partly to the confusion prevailing at Queenstown, where most of the survivors were taken. No information was available as to how many of the Americans on the steamer had gone down. Stories told by survivors seemed to confirm the earlier reports

normation was available as to how many of the Americans on the steamer had gone down. Stories told by survivors seemed to confirm the earlier reports that the Lusitania had been struck by two torpedoes. Ambassador Gerard at Berlin was directed to make inquiry of the German Government concerning the sinking of the vessel. While the situation is regarded at Washington as a serious one, on account of the loss of American lives, it is said the government will await the receipt of official information from Germany before deciding on further steps.

Trinity Professor Cabled Rev. Dr. Boyle to Say He Had Been Saved

Rev. H. C. S. Morris, teacher divinity at Trinity College, is safe at Queenstown, according to a cable reserved by Rev. Dr. H. T. S. Boyle, dean of divinity at Trinity College. The cable came to Dr. Boyle's home at 239 Crawford street. "Saved," was the text of the cable. The cable may have a double meaning, as Mr. D. Wordsworth, lecturer on the Trinity College staff, was also traveling home to Engstaff, was also traveling home to Eng-and in company with Mr. Morris. They occupied the same stateroom, and Dr. Boyle concludes from the cable that Mr. Wordsworth is also safe,

LOST WITH LUSITANIA ITALY WILL SOON **ASTONISH EUROPE**

Toronto Vice-Consul Declares Italy Has Over Three Million Soldiers.

Advices received at the Toronto offices of the Italian consulate indicate
that Italy will very soon enter the war
and attack the seaports of Austria.

Italy's importance as a factor in the
European situation when she enters
the war may exceed all expectations,
as never before in history has a country of her size been so well prepared
for war as the Italian nation is today,
according to P. Nardello vice-consul according to P. Nardello, vice-consul for Italy in Toronto, who, in an inter-view with The Sunday World, gives his reasons for believing the above to

be the case.

The fact that, while Italy's standing army on a peace footing totaled only about two hundred and fifty thousand, she has now more than a million and a quarter men under arms, the still at Quarter men under arms, the sti

army could be brought it would impress all nations with its importance.

Full War Strength.

The Italian vice-consul pointed out that Italy's full war strength, including territorials and mobile militia, numbered an army of 3,200,000 men.

These are all men in the prime of life. These are all men in the prime of life, between tre ages of twenty and thirty-five years. There would be more than a million men between the ages of thirty-five and forty-five who had received military training and who could be called upon in case of necessity. To be called upon in case of necessity. To these could be added the many thou-sands of Italians spread thruout the world, who would answer their coun-try's call to arms. It was estimated that should it be required Italy could mobilize an army of nearly five milion men of military training.

Saved From Drowning.

A drowning in Hamilton Bay was narrowly averted this morning by the timely arrival of the Macassa, bound for Toronto on its first trip of the day. A lad, 17 years of age, who refused to give his name, was sailing his dinghy to the beach, when it upset, and he floundered about in the water until his cries for assistance attracted the Macassa's crew. The steamer was steered from its course and picked the boy up some distance out from the Steel Company of Canada's plant. He was completely exhausted, but had sufficiently recovered by the time the Macassa reached the piers to get off.

Killed By Train.

Ernest Brick, a lad between fourteen and fifteen years of age, living with his parents near Vineland Station, was instantly killed by an eastbound freight on the G.T.R. about 5-o'clock yesterday afternoon. The body was badly mangled. The accident took place on the crossing at the town line, just west of the station. Young Brick and a number of companions were playing about the companions were playing about the tracks. He is the eldest of a number of children. The father is at present with the third contingent at Toronto.

Emergency Stock-Reducing Sale

It's a mighty fine thing to have the largest and best stock of home furnishings and this we try to have at all times, but it becomes a big handicap to us when faced with a situation such as we are now met with.

We are giving up our big William Street Warehouse in a few weeks—Lease expiring. Alterations we purpose making in a main reserve stock warehouse on Victoria Street cannot be completed in time to take in the vast stock now in the William

This condition of affairs has brought us under the necessity of making the most radical reductions of stock—and that quickly. In a very short time we will be without 50,000 feet of warehouse accommodation that we now possess. Our stocks must be lowered to meet it. It means a tremendous lot of selling and of course an immense sacrifice of profits to us but there is no no time for parleying over profits. We must forget all about what we paid for the goods now on hand. "Reduce and keep on reducing"—that's the orders.

We are Going to Begin the Sale With a Rush Monday by Underpricing a Vast Collection of Samples of Furniture. These Have Been Marked Down to Near Cost, Cost and Less Than Cost Prices.

Floor Coverings, Draperies, Electric Fixtures-all Departments will Contribute to this Great Bargain Feast.

Illlustrations or lengthy descriptions are not possible in the insufficient space, but we present a big miscellaneous list of special items below—taken at random through the store to indicate the immense money savings possible for those who take advantage of the sale.

No one can properly grasp the real possibilities of this sale without a visit to the store. Hundreds of special price tickets everywhere quickly reveal the tremendous values. The list which follows here tells of preparations made for opening the Sale Monday. Come and make the most of a first choice selection.

Straus Makes Significant Comment Only One of Three on Board Has had begun, but had as yet made little -International Situation is Been Heard Very Grave

NEW YORK. May 8.-O. S. Straus, former American ambassador to Tur-key, declined this morning to discuss issues between Germany and the United States growing out of the sinking of the Luzitania with Americans aboard. His remarks left no doubt that he reckons the international situation as very grave, and that he is anxiously awaiting the first move of the government at Washington. "This incident," said Mr. Straus, "puts a tremendous strain upon our

neutrality. Further than that I have nothing to say at this time." BORDEN'S ILLNESS **DEFERS DECISION**

OTTAWA, May 8.-Sir Robert Borden is indisposed and unable to be at his office. There has been no meeting of the cabinet for two days, and the formal decision regarding an election has therefore, not been made.

The Ottawa Journal, a Conservative newspaper of strongly independent views, comes out strongly for an election, declaring that "there is no reason to think this war will end beanother year, and within that time an election must occur in any case. Meanwhile there are tremendous problems to be faced. There is big work ahead for all of us. Would not be just well to have an election over with to have whatever gov-ernment is eleted, understand that it has the confidence and support of the nation, or is it better to go on with the present miserable campaign of calumny, abuse and encertainty unchecked?"

Germany's Discomforts. It is surprising how rapidly the men adapted themselves to dangerous conditions. Stories of the accurate aim of the German snipers are not at all exaggerated, and they give us a very warn time when we are out repairing the wife antendements out repairing the wire entanglements or on patrol duty. There is a fascination in hearing the bullets go whizzing by, how-ever, that those who have not experienced the sensation do not realize. Our men are in the very best of spirits, altho there is much discomfort to be endured and very little sleep obtained. In the early evening when every man is at his post the men begin singing popular songs, and as the dusic deep-ens the old favorites and hymns are sung. The Germans must enjoy the singing for they seldom fire a shot at

At the same moment that a German force was approaching Warsaw, the bulletins of all combatant nations reported the approach of the kaiser's troops to the Channel, to Calais and to the cliffs of Boulogne, from which Napoleon had surveyed the British shores century before.

French Army Stood Solidly. Consider now what were the allied reoccupations at this moment. From Switzerland to La Bassee the French army stood solidly in the trenches it had taken up after the German retreat to the Aisne. But in the desperate fighting at the Marne, in Alsace and in Lorraine, French losses had been enormous. Efforts to outflank the Germans from the Oise to of Soissons had ended in disaster. In that later time French offensives were being carried on in Alsace, about St. Mihiel, in Champagne, English forces were attacking north and south of Armentieres. For months the German energy had been concentrated in the effort to meet fresh allied heavy troops with numbers not equal, but adequate to parry dangerous thrusts from Alsace to Flanders. Everywhere on this broad front, too, ground was being lost, not much, not of decisive value, but actually the German line had been recoiling slightly for a con-

Now, in this period in which her foes had been advancing daily in numbers and in efficiency, in the time which had seen the arrival of the first Antwerp fell on October s, which defermed occupation began. In the next few days German invasion flow-order western Belgium like a torrent of over western Belgium like a torrent of the enlistment had assured this. What had the Germans accompany to the content of the content o plished? For the thousands and thousands who had given up their lives at the Yser, about Ypres, for the terrible month of fighting in Flanders, for the series of struggles that marked the proach of spring, what had Germany

Just this, she had held her lines, From Dec. 1 to May 1, with incidental local changes, she had retained her footing in France, her occupation in Belgium. But in doing this she had definitely accepted the defensive. In October her champions, her press, talked about the capture of Calais. the second advance to Paris, the siege and fall of Verdun, but in April the contest was a draw, that German defence could not be broken. To support this they pointed to the lines them-selves, to German resistance, as splendid as German attack had been.
Ends in Disaster.
In January a French offensive north

perior German numbers. The process of reorganization of French armies had begun, but had as yet made little real progress. Equipment was still lacking to the soldiers, ammunition was as yet insufficient for immediate reads. So far the German claim was subject. But how far was this from needs.

As for the British a "thin red line" the October frame of mind? In the was just taking root in the salinet Civil War the same transition followed about Ypres. After two months less Gettysburg, and Vicksburg. Southern than 120.000 British troops were in newspapers talked more and more the field. On this little army, presently reinforced by the remnant of the Belgian army retreating from Antwerp, the great storm was just that Richmond was impregnable, the breaking in Flanders. For a whole month the world was each day to wait with excited interest to learn sently reinforced by the remnant of more, Philadelphia, but more and troops, when they entered the southern capital fifty years before the pres-

Its failure would not in all probability have meant the advance of new German armies to Paris, but it war had become one of endurance, and the numbers were bound to be and the numbers were bound to be more and more with the allies. It had become a question of men and money, and Russia were certain to gain rather than lose in advantage henceforward. A neutral world supplied Germany's enemies with food and ammunition. hostile fleet shut Germany off from the outside world. British industry continued, French industry went on

The allied writers who had forecast immediate famine for Germany had plainly shot far wide the mark. German food held out and was likely to, yet Germany had already experienced the discomfort of a bread shortage. Lack of petroleum, and of copper had affected, if it had not crippled, her supply departments. So far she had been no more than inconvenienced, but this inconvenience was bound to increase. As for the allies, every shows new establishments adapted to making arms and ammunition, tween the south and Germany the parallel is not to be pushed too far.
The south had practically no manufacturing equipment. Germany was better off than any one of her opponents, but she had to face not her enemies, but a whole world Now, it is fair to say, that what had

whole character of German strategy in the opening weeks. Blunt Bern-hardi had said it in unmistakable language when he wrote:
"If Germany is involved in war, she need not recoil before the numerical superiority of her enemies. But so far as human nature is able to tell, she can only rely upon being successful, if she is absolutely determined to break the superiority of her enemies by a victory over one or the other of them before their total strength can come into action.'

And Germany had tried at the Marne, at the battles of Flanders in the west (her efforts in the east will be examined later), but in Novem she had given up the task. She had left France and England to bring their "total strength up," while she endeavored to put Russia out, and she had failed in the cent as in the west. had failed in the east as in the west. Thus reviewed, the second please, so far as the west is concerned, becomes simple enough. It saw the rise of a new German offensive, a fresh effort to dispose of one enemy, France, for England was still but a French auxiliary, holding a section of the French line. It saw the failure of this offen-

U. S. to Secure Official Report

WASHINGTON, May 8 .- The United States Government will today direct Ambassador Gerard to make enquiries of the German Government for its report of the facts concerning the sinking of the Lusitania. This became known after conferences between high officials. The ambassador will be in-structed to make his preliminary enquiry as a basis for whatever steps may eventually be taken. here any disposition to minimize the situation, but President Wilson, while seeing the acts, hopes that the country will assume an examining attitude and reserve full judgment until all complete nformation is at hand.

As more details began coming in activities at the White House and the executive departments of the government disclosed how much administration officials realize the tensity of the situation.

Secretary Bryan cabled Ambassader Gerard at Berlin to informally ask the German Government for its report of the disaster, and to Ambassador Page at London he sent messages urging renewed efforts to aid the suffering and gather information.

President Wilson, while he went to the golf links for his recreation, left strict instructions to be notified of any important despatches. Cabinet officers who had planned a week-end holiday away from Washington cancelled their plans and Secretary of War Garrison abandoned a week's official trip thru

Chairman Stone of the senate foreign relations committee issued a advising "don't rock the boat." Chair man Stone pointed out that qualifying circumstances must be taken into consideration because the Lusitania was a belligerent vessel, but he considered the attack on the American steamer Gulflight a much more serious offense against neutral rights.

The president, Secretary Bryan and other members of the cabinet were visibly depressed. Persons who talked with them found them sick at heart and grieved at the horror of the catastrophe. Notwithstanding that warnings had been given it had been regarded as inconceivable by high officials that the threatened sinking of the vessel would actually be carried

In many quarters it was thought probable representations to Germany will be general, covering all the cases of attack on American vessels. It was pointed out that the case of the Gulflight, also torpedoed without warning with a loss of three American lives, might be made the basis for action by the United States

Actress Was First to Give Benefit in Behalf of Hospital Ship

"I think Miss Haswell is so sweet, don't ou?" This was the tribute of little Vio-et Dunn, who played last week with To-peto's favorite actress at the Royal Allet Dunn, who played last week with To-ronto's favorite actress at the Royal Al-exandra in the pathetic old play. "East

philosopher summed up so truthfully character of her leading lady and tor, and the embryo artist made a mentor, and the emoryo artist made a quaint picture as she sat perched up on a chair in her pyjamas and night-jacket, her brown hair rolled tightly in a curl on the top of her head, and the remainder curled short to make her look as boy-like as possible, for she was taking the part of Willie, and was in the hands of the dreaser with whom she chatted dur-

ing the process.

Miss Haswell had just disappeared to take her place before the footlights, and The World representative had just had the somewhat unique experience of viewing the whole process of "making-up" for the part of Lady Isabel in "East Lynne"

When Miss Haswell came into her dressing-room she was wearing a simple black frock and a broad black hat, with velvet streamers. In half an hour she was transformed into the girlish English bride, with the beflounced and beflower-depicts of the process of the council of the full blown. ed pink gown, cheeks like the full-blown rose, and eyes which were, indeed as like pansies as anything to which one

like pansies as anything to which one could compare them.

It was interesting to watch this artistic woman work with deft fingers as she loosened the pretty fair brown hair which she first curied and then put away under a blue cap until she should put the 'make-up' on her face. The cold cream was first applied, then rubbed off, and powder put on with a great big puff. Then the deft fingers made the powder all smooth, and when this was done a dark blue pencil was used with fine effect on the cyclids and the cycbrows and cyclashes were darkened until the effect so often seen in the far-famed beautiful Irish eyes was achieved.

Rouge generously applied to the cheeks and red salve put on with delicate touch to the lips completed the make-up, after which the pretty hair was again released and coiffed softly and girlishly about the head. Slippers were then handed Miss Haswell, the girlish pink dress was thrown over her head, and just before being buttoned up, the artist gave the word to her waiting-woman that the orchestra might begin, and as the measures lengthened out into bars Miss Haswell placed the broad-trimmed straw hat with the pretty wreath about it on her head and disappeared thru the door of her dressing-room.

"No," she said, in answer to an enquicy,

the contrary, it was rather good for it, as
so much cold cream was used in its removal." Then she spoke of the Belgian
refugees of Toronto, in whom she is
much interested, and whom she was the
first to recognize by inviting them to occupy a box on her opening night with
"East Lynne."

"They were an incentive to me in playing," she said, "for I know these Celtic people are all artistic, and I felt they were entering into the spirit of the performance."

Just here it comes to mind that Miss flaswell is always foremost in patriotic service. It was she who gave the first benefit in Toronto for the hospital ship, in New Onleans she gave a benefit for the orphans during the past season, and now again she lost no time in doing the thing that lay in her power to show her sympathy with the Belgian people.

Is Murder, and everybody, there was not so much excitement as one would expect in The Kaiser Should Get Murder's Usual Penalty

T should not be forgotten in the general indignation and horror excited by the wanton destruction of the Lusitania that the loss of the vessel and all the innocent lives that went with it had nothing to do with the war itself, except in a casual way. War is war, and is conducted under certain rules laid down by the civilized nations and agreed to by them in various conventions. Murder is murder and has no rules and no conventions. The destruction of the Lusitania was an act of murder, and those who plotted it, and inspired it, and authorized it, are outside the rules and regulations of civilized warfare altogether. Under international, or any law, they would be tried for murder and dealt with accordingly. So far as we know at present the kaiser and Admiral Von Tirpitz are the instigators of this brutal and murderous attack. After the war is over it will be necessary to deal with them in the usual way, and we believe that public opinion among the allies will have no sympathy with recommendations to mercy. Hanging is the ordinary punishment in Great Britain. The guillotine is the fate of notorious murderers in France. Whatever hands the kaiser may fall into he may be sure that the nations will deal justly with him for his acts of legitimate war, but he must stand his trial like any other brutal assassins for the murders of which he has been the author.

classroom to make them so, but would consider the outlay more than jus-tified even the double the additional

amount were necessary.

The health and safety of the school pupils are the first consideration of the Boston commission. Instead of having basement floors of cement which absorb and give out dampness. the basement floors are laid with asphalt. For the upper floors a composition of cement and granite is used and it is absolutely fireproof. It is laid on reinforced concrete and steel beams. Such a floor is more noiseless than the inflamable maple wood floor used here. The inner walls are fire-proof as well as the outer and the wooden partitioned cloakrooms are not allowed to exist there. The stairs are of slate treads on iron frame work and he stairways are enclosed with wired glass and steel partitions.

house is used all year round for the benefit of the scholars. Here again fireprooof construction is to be found. The roofs are laid in tile instead of the old fashioned and highly inflamable tar and gravel roofing. Thru the use of the roofs as playgrounds the children enjoy even more space than is to be had in the average school yard and obtain the fresh air in a far purer form than that to be had on the

After comparing the Boston school buildings with those of Toronto, Trustee Ellis strongly favors the plan of placing the selection of sites and the building of the schools in the hands of bers, an architect, a builder and a When the board of education in-dicate the section in which they wish a site secured these men, who become experts in the purchasing of school property. lose no time in acquiring the most suitable site in the desired locality. This Trustee Ellis believes to be a considerable improvement and saving over the Toronto systems of outlaying money in securing a number of options and submitting them to the property committe when only one piece

of property is required.

The five school architects of Boston who were chosen after com-petition from among the leading architects, are given the task of drawing up plans for the new school buildings. The plans are drawn on the standard-ized system. This means that while the architect is given freedom as to the artistic in the design, the class rooms must be of a certain size, the corridors of a specified width, the height of ceilings settled upon, the floor per pupil ample and the use of speci-fied fireproof materials in the build-ing's constitution be made. Consider-able importance is also attached to the requirement of sufficient windows to rive plenty of light.

HOW TO CLEAN PLASTER STATUETTES.

SIMPLE but effective method for removing the grime which plas-ter statues, etc., gather in the atmosphere of cities is suggested by Les Annales. A thick solution of starch, such as laundresses use, is made, and the object is covered with it, care being taken to have it penetrate every crevice. The starch paste is then allowed to dry, whereupon it crumbles away, carrying with it the dirt on the surface of the plaster.

Following the nightmare of Langemarck, where so many Canadians lost their lives in their successful attempt to hold the allied lines, came the terrible revelations of the employment of deadly gases by the Germans, an, to crown all their enormities, the Eusitania was sunk last Friday, with as yet an unknown number of passengers killed, by a German submarine.

Speeding onward off the coast of Ireland, just in St. George's Channel, with the towers and spires of receding Queenstown still almost visible to the lookout on her tallest masthead, and the dangers of her voyage supposedly past, the gallant ship was hit by a deadly bolt and one of the worst marine disasters in history occurred. Full details of that terrible quarter of an hour, in which she went under the waves, are yet lacking, but prethe waves, are yet lacking, but prethe waves, are yet lacking, but pre-liminary estimates give the number of persons saved as 700, making the num-ber of the missing about 1250. United States Citizens Dead.

United States Citizens Dead.
On board the Lusitania, one of the peeresses of the Atlantic merchant fleet, were many prominent citizens of the United States and the news of the disaster naturally had an adverse effect on Wall street, where prices of stocks shot downwards in a terrible panic, based on the fear that the United States would be involved in the war. President Wilson had gravely war. President Wilson had gravely warned Germany about the consequences of her carrying out her pirati-cal submarine warfare against mer-chant shipping, as it affected the United States, and many American people believe that he will resort to the supreme test of war to exact retri-

German Problem in U. S. But the United States has the Ger But the United States has the German problem on her hands also and it would not be surprising that, if any hostile steps towards Germany were decided upon by the United States government, the German reservists, who are especially numerous in Chicago and the Middle Western States, would rise in rebellion. It was discovered some time ago that the Germans had smuggled two hundred thousand rifles into the United States from Brazil and that German clubs were constantly drilling in Chicago. When Prince Henry of Prussia, brother of the kaiser, visited the United States several years ago, he became convinced that a war with Germany convinced that a war with Germany would mean a civil war in the United States, and the question remains whether the officials at Washington are sufficiently wide awake to cope with the situation. Germans have crept up to high positions in the service of the government, one is in command at the Pahama Canal, German congressmen and senators are on the military and naval committees, and the same senators and congressmen are constantly in communication with the German ambassador at Washing-ton, All the naval and military sec-rets and plans of the country are known to the Germans. There are so many Germans in the States that there would be no accommodation for them, if they were made prisoners of war. The German peril has the Yellow peril reduced to a blessing in com-

But such terrorism and piracy war. But such terrorism and piracy on the high seas is enough to turn the whole of civilization to the camp and field against her, to turn this terrestrial sphere into a raging mass of armed men all bent on her extirpation. What President Wilson will do now is as yet unknown, but sentiment in the United States is for instant war. The New York mob who battered a German that cheered at the news of the sinking of the Lusitania, and would have killed him, but for police interference, represents a temper that is spreading among the non-Germanic elements from the east to the west, and forebodes impending doom to the political future of any president or cabinet minister who takes a weak stand in this emergency.

Germany's Terrible Plight. Why should Germany do this terrible thing, why wage this barbaric form of warfare? As for the United States, she cares little. It has no large stand-ing army like littly. Provided William ing army like Italy. President Wilson has repeatedly made known his determination to keep out of the war, and the Germans only interpret this decision in one way, that the United States Government is afraid. Another point comes up. Germany in the atrocious deeds that she has committed has put herself outside of international law. She is like a confirmed criminal, who is sure of being hanged once he is caught. There is only one possible end for him; there is only one possible end for her. She is being cornered by the allies, and is writhing like a wounded snake while Turkey on which she had snake while Turkey life and a merry, bloody one for him. Germany formally annexes Belgium.

eight months, and formal annexation represents merely the stroke of a pen.

Operations at Gallipoli.

Of war operations the most important are taking place on the Gallipoli peninsula. There the allies first landed 29,000 men, and every day since, for two weeks, they have been landing more. The Turks have been putting ap a desperate resistance, but they lack stamina. They cannot stand the fighting as long as the British, French or Australasian troops. They belong to a dying race, and so in the usual course of events, they must go under. course of events, they must go under. The attacking forces were first landed at the lower end of the Gallipoli peninsula. They faced extreme difficulcies in landing, but overcame them, the their casualties were heavy. Turkish attacks were repeatedly driven of the sin landing, but overcame them, tho their casualties were heavy. Turkish attacks were repeatedly driven off, and the Australasians pressed forward. Men were also landed at other points, and they have achieved success also. The Turks are burning villages as they retreat. Gallipoli is in flames. This looks as if they will burn Constantinople, if they are forced to give up this ancient seat of empire.

The plan of Allies.

The plan of the allies appears to be the occupation of the European side of the straits, and from this vantage of the straits, and from this vantage is huge rush against the Russian lines.

the occupation of the European side of the straits, and from this vantage point reduce the Turkish forts on the aitsAic shore. The exact progress already made has not been re-vealed. Many commentators think that it would be an excellent plan to land troops at the Isthmus of Bulair, which is only four miles across, and so cut off all the Turks on the peninsula from Constantinople. But across the Isthmus of Bulair extends one of the fortified lines defending Constantincple. Attacks on thse lines directly from the sea would therefore involve a tremendous loss of life. The real object could be gained by putting men ashore near the Enos-Midian line, close to the Bulgarian frontier. This has been done, and something decisive may be heard from this area at any time. But the forcing of the straights will come first. It is worthy of mention that in the Tripolitan war, the Italian fleet forced these straits, and four torpedo boats passed up into the sea of Marmora. It was then demonstrated anew that Constantinople could still be taken from the sea-Since that time the Turks have greatly strengthened their defences. But under a determined attack these must inevitably succumb. Fortresses are only expected to arrest the advance

theatre In the western theatre of land operations, the chief features of the past seven days were the fighting round Ypres, the opening of fire on Dun-kirk by a German naval gun with a range of 23½ miles, and the French retaliation by commencing the bom-bardment of the southern forts of the great German stronghold of Metz, a huge entrenched camp behind which troops can concentrate and advance to the attack whenever their commanders desire. Before they began this operation the ermans and Austrians announced a great victory, which was denied by the Russian war office, the intention of Berlin being probably to intimidate ltaly, which is reported as being on the verge of a breach with Austria-Hungary. The Russians at once countered this move of erman diplomacy, by summoning a prominent lomacy by summoning a prominent Italian as military observer to the headquarters of the Grand Duke Nicholas. Ingenious correspondents, who are friendly to the Germans, at once began to give out the German reports of success, as they did those reports ver the French and British at Ypres, where, in reality, the Canadians held their ground magnificently and foiled the whole German plan. Some Famous Offerings in Red Cross Sale at "Christie's."

ONDON, April 3 .- "Christie's" has been the scene of man a remarkable sale, but raely can the catalog even of these rooms have included articles belonging to the reigning King and Queen of England. It was no ordinary sale which was conducted here in mid-March, nor did the proceeds go to any ordinary object. Every shilling will diminish the suffering of the men who are fighting

our battles over-sea. To the Red Cross and St. John Ambulance will go all the proceeds of the sale, and King and subjects sent their gifts. CLERGYMEN IN THICK OF FIGHT

England Has many Who Are Not Acting Just as Chaplains.

ONDON, April 17,—The announcement that Captain Lionel Fairfax Stude of the 12th Battalion. London regiment, who before the war was ordained deacon, and held a curacy at St. James' Church, Holloway, has been killed in

fighting and have won distinction Captain Studd was the first clergyman to die in action, and his death will be widely deplored by all Polytechnic boys, for he was the son of Mr. J. E. K. Studd, who has been so actively associated with the Polytechnic in Regent street for many years. Among other clergymen soldiers now at the front are the Rev. Edwin Day, an army chaplain whose con-

duct has earned mention in patches, and who went thru the Boer War, during which he was also com-mended for bravery, and the Rev. Mgr. Bickerstaffe-Drew, who, too, has been commended for distinguished conduct in the field.

Mme. Verboven Describes Hardships Endured Before Reaching England

Some months ago in passing thru Some months ago in passing thru Toronto from the west, Father Pirot gave an address to the members of the women's auxiMary of Catholic Church Extension at the St. Philip Neri Hostel on Sherbourne street. Father Pirot told his audience that he was on his way to Belgium to see if he could find any trace of his relatives or if he could be of assistance to any of the people of his native country.

The party of Belgians—the first to arrive in Toronto—who are now at the

arrive in Toronto—who are now at the drand Central Hotel, the guests of Mr. Thomas Flanagan, form the sequel to the efforts begun a few months back and the terrible tales told by these poor Bolgian exiles bring home to those who hear their harrowing story the atrocities of the foe and the suffor-ings of the brave Belgians in a way that no second-hand medium could possibly do. The men, women and children now in Toronto were partici-pants and sufferers in the great cata-

pants and sufferers in the great catacysm that overswept the country, and the horror of what they endured and witnessed is still with them.

A Tale of Terror.

"I shall never forget it, never," said Madame Verboven, one of the party, who speaks English volubly, but with decidedly foreign accent and idioms. She had spent some time in England about ten years ago, and the language she acquired at that time she is now finding very useful. For a full hour the poured forth her story, and as she herself said, much of it could never be published, it is far too horrible.

Madame Verboven with her husband was in Antwerp at the opening band was in Antwerp at the opening of hostilities. They lived in the cellar for two months for fear of bombard-

"I took food and water down for fear of the Germans," she told The World representative, "tho my husband kept telling me as this was a neutral country we need not be afraid in Antwerp. Then one morning at five o'clock heard a great noise. I say to my firing. This kept on till seven o'clock Then at eight o'clock along come the paper telling us all to go to the station to leave Antwerp. At eleven o'clock when we got to the station it took us two hours to get thru the crowd. When we got on the train it was crowded with men, women and children and outside the men were holding on like this." and so vivid was the remembrance that Mme. Verboven arose from her chair and grasped the arms, while her face and her whole

Member of Varsity Corps Stands Six Feet Six in His Stocking Feet

By a Staff Reporter. NIAGARA-ON-THE-LAKE, Ont., May -Keen rivalry exists between the men of the two universities at the C.O.T.C. On the parade ground and the athletic field the old rivals seek to outshine each other. At the head of their lines, side by side, float the banners of McGill and Varsity. The blue and white U. of T. flaps along side of the red and white of Mc-Gill. The signallers of the two corps are perhaps more in contact with each other than are the rest of the battalions. The exponents of the Morse and semaphore codes of the two universities indulge in a

ntinual struggle to arrive at a higher state of proficiency than their rivals. Withal the competition is most friendly and it results only in giving the men a greater incentive to work. The great objects which the two contingents have before them is to create the best possible appearance before the Duke of Connaught hen he visits the camp on Thursday and

On the parade grounds "Tiny" acquits himself extraordinarily well. In fact his company commander says that he is a model soldier. The work is calculated to provoke a keener appetite than academic duties of the University, and it affects "Tiny" to a greater degree than the other members of the corps. He is the only man who objects seriously to the camp rations. He positively is unable to get enough to eat, Yesterday our elongated friend was sent to the rifle ranges on fatigue duty. Everything went smoothly until lunch time when two sandwiches were served out to each man. This was the undoing of Private "Tiny," who was in a condition of starvation by the time he arrived back at the camp. Following the lecture given by Major Butcher last night on "Infantry Attack," this line of work was taken up in today's drill. A lecture will be given tonight by Col. Lang on "Advance Flank and Rear Guards." Canon Gould of Toronto will address the men tonight on "Service." The Sunday church parade includes a sermon by Canon Garrett of Niagara-onthe-Lake. SULPHUR DYES TO REPLACE

A discovery that is likely to revolu-tionize the dyeing industry is that of a process for using sulphur dyes for fabrics other than cotton, for which sulphur dyes have heretofore been exlusively used The new process was developed in an English laboratory and is the result of experiments made for finding a substitute for the German miline dyes which have been practically shut out of the market by the war. Aside from the fact that sulphur can be obtained from many sources, one of the principal advantages claimed for the process is that wool, silk, artificial silk, and hemp can be

USE SOLDER TO ATTACH LENS TO NOSE-GLASS STRAP.

By employing a solder made of sand composition, rimless lenses are being attached to the metal parts of eyeglasses without the use of screws-This mounting process eliminates the hole in the lens and thereby gives it strength at the point where most often occurs. The metal frame has a lead lining with which the solder fluxes readily, as it does with glass. The solder contains hydrofluoric acid, lime, barium, and carbonate of lead.

New York Post Says to Speak of Rules of War is Waste of Time

WHOLESALE MURDER

No Plea of Military Necessity Will Now Avail Germans

NEW YORK, May 8 .- The New York Evening Post says:

"It is a deed for which a Hun would blush, a Turk be ashamed ,and a Barbary pirate apologize. To speak of technicalities and the rules of war, in given before the Lusitania sailed.

"But so does the black hand send its warnings. So does Jack-the-Ripper write his defiant letters to the Nothing of this prevents us from regarding such miscreants as wild beasts, against whom society has to defend itself at all hazards.

"And so must the German Government be given to understand that no plea of military necessity will now avail it before the tribunal on which sits as judge the humane conscience of the world.

"As was declared by Germany's own representative at the Hague congress ,the late Marschall Von Bieberstein, there are some atrocities which international law does not need to legislate against, since they fall under the instant and universal condemnation of mankind.

"Such acts have been called 'pure piracy.' Strictly speaking, they are not that. Pirates do not act under orders, but the officers of German submarines do. This throws the responsibility back upon their government which issued the order to sink without warning a merchant vessel with 2000 non-combatants and neutrals

"In the act that government become piratical and an outlaw. No sober mind can fail to grasp the extreme gravity of the crisis forced upon the United States.

"It is true that Germany has drunk too deep of the wine of military insolence to be turned from it just yet. She is the example of what the Greeks called Hubris-a mad defiance of God and man-then we may be sure that the true and righteous judgment of the Lord will be visited upon her. And a part of that divine judgment will certainly be such a world-sentiment, written into world-law, as will make the horrors and crimes of the past nine months impossible for evermore."

All Gifts Were Most Welcome, and Arrived in Good Condition-Enjoying Good Things

Mrs. Plumptre, superintendent of supplies, Canadian Red Cross Society, has received the following very interseting letter from Miss Edith Campbell, matron of the Duchess of Connaught Red Cross Hospital at Cliveden, Eng.:

"Col. Hodgetts tells me that he is sure you and the kind ladies who have helped so splendidly would be interested to hear from us how greatly appreciated all your efforts have been and how useful and sensible the gifts are, bankets, sheets, dressing gowns, wonderful bedside bags, filled with every. thing a man needs, even to a pipe and

"The jam, syrup, biscuits, apples etc., and lovely plum cake we gave them Easter Sunday all came over in splendid condition and the men enjoy them so-a treat after the trenches. The surgical dressings, binders, slings, etc., all are so useful and saved us such a lot, as we only had to make up for our first dressings for the operating room, also from supplies sent

from home "All the little parishes round here have formed their committees and are collecting and sending to us twice a week a lot of fresh eggs, also once a week a cake for Sunday tea. Poor boys, they certainly deserve all the good things of life; they are so brave and cheerful and in many cases it is only a case of getting fit and well to return to the trenches: others, of course, never can. I wish I could express their thankfulness and ours bet-

"Giving His Old Mother a Turn"

GAVE my old mother a turn," said one of the khaki dockers. "I went to see her in my new uniform on Saturday. 'Jim! You ain't going to the front?', said she, rather scared—she's getting very old, you know. 'No, I'm too old for the front,'-I says, 'but I'm doing my bit at the docks, and they've given me a uniform so as everybody will know it."

Dining at King's Cafe By T. M. HUMBLE.

"Tell me what you eat, and I'll tell you what you are," said a famous dietist. (Some things can be improved, so I'll just transpose the quotation slightly and have it read: "Tell me where you eat, and I'll tell you who you are.") The writer, like many other sensible people dines regularly at "King's Cafe, 14 King St. The associations are congenial, the food excellent and the service unequalled. At King's Cafe people are fed better and at less cost to the pocket than has ever been done in the city before. Another point to remember is that the Manager of King's Cafe is what people term a regular "crank" on pure foods. That is his hobby, and it is very fortunate for those who dine there to have a food crank around watching things. Every up-to-date restaurant would be better if it had a "food crank." The most necessary thing in the worldnext to pure air-is pure food. They believe so strongly in this principle at King's Cafe that all the pastry used is baked in ovens on the premises, and as a result there is a delicious home-made flavor to it that one cannot get elsewhere. Then the rich cream, the pure butter, the vegetables. all come in from a little farm a few miles outside the city limits. while the meats are the choicest and most tender parts. And this "Food Crank" Manager doesn't stop at that-not content with delivering the purest foods, he is careful to an unusual degree about the kitchen. You should step inside and see how the culinary department of this modern Cafe is looked after. Every tin and dish shining as bright as a new dollar. The knives, forks, spoons all go thru a special process of sterilization before they are put on the tables. This is just a brief hint of the way they do things at King's Cafe. and

There is something about the

any restaurant in this city. An atmosphere that seems to agree with you—even the waiters seem different, their demeanor to the guests is always decorous, genteel, modest, and is in marked contrast to what most of us have been used to, and yet, with this splendid sympathetic service, prices are most reasonable. The daily lunch at 35c surpasses anything attempted elsewhere, the table d'hote dinner at 50c is a marvel of culinary skill, the orchestra, the vocalists, the enterainers who entertain while you dine, are all star performers. The dining-rooms large, spacious and well lighted, the linen of snowy whiteness, accommodation ample for all who come; in fact everything possible that is calculated to give one respite from the daily grind, to drive away dull care, to inspire new thoughts, to revivify the mind, to put the human machinery in order for its daily duties. The human touch is evident everywhere—sympathetic service. If you have never dined at King's Cafe you ought to do so. It is just what Toronto needed, and I am glad that so many people are patronizing the place. No one has ever conducted this peculiar style of service to the same degree of perfection. Then there's the Cabaret, the only one in Toronto. An institution that is decidedly popular. It was a stroke of enterprise when the management introduced the Cabaret to Toronto, and it has caught on im-There is nothing mensely. common about the entertainment given here-popular songs, monologues. vaudeville, orchestra. by the most popular Cabaret music starts at artists. ten p.m. and continues until twelve. "Doctors, Institutions and Special-ists" Failed but ALEXIS Cured 29 Emmerson Ave., Toronto, April 15th, 1916

Alexis Eosema Cure,

47 McCaul street, City—

For three years I have had eczema on my face, neck, ears and arms. Most of the time they looked like raw beef, and I began to think I never woule be cured. Institutions that advertise to cure, doctors, specialists, and everything I could hear of, I tried. No matter what I used only cased it for a few days, then it would break out worse than ever. At last I went to Alexis, and they gusranteed to cure me. I didn't use it long before I got relief, and very soon got cured. My skin is so clear you would never know I had had eczema. It certainly made a complete cure of me, and I strongly advise anyone troubled with skin diease, no matter what kind to try it and get cured as I have.

HOLLINGER'S ADVANCE

Father, Who is Now in France, Porcupine Leader Touched Tenty-five-fifty, Finding New High Record

A measure of the supreme confidence that the United States feels in its posibrother with the second contingent, tion and that of the allies under the latest war ep!sode was given by the New York Stock Exchange on Friday and Saturday. The first result of the dastardly murder of innocent neutrals by the Germans was to provoke a wave of speculative selling of American securities, not comparable, however, to that immediately preceding the outbreak of the war. The technical position of the market permitted of this, however, as a rise lasting several weeks had built up a large speculative following which was forced to liquidate by the drop in prices. Cool deliberation Friday night found the market better prepared for the emergency, the comparative steadiness of prices on Saturday serving as a defi to Germany's new attempt to disorganize further the world's finances by involving other countries in the conflict. The market on Saturday must be accepted as indicative of Wall street's best financial judgment that retribution in full measure will ultimately be meted out to the country that has moved aside with present impunity every form of civilized warfare.

Toronto financial circles were not seriously troubled in stock market operations. Concern was felt for the loss of life, but amidst this gloom there was a quiet and determined confidence that the worst had mans was to provoke a wave of specula and went as trumpeter of the 48th ceived that he has succumbed to gas He was born in Bombay, India, and

Business in All Sections Was Dull, Owing to News of Lusitania

LONDON, May 8.—The stock market was depressed by the Lusitania disaster, which was the chief topic of conversation, and business in practically all sections was dull. Japanese and Chinese bonds hardened a fraction and Russian issues were better, but the war loan was easy. Cunard shares were nominal at 42s 64.

American securities reflected yester-day's decline in Wall Street, but only a few markings were reported, as New York is unable to sell here under the treasur; regulations. Prices hung around parit; and closed dull. Money and discount rates were quiet.

Editor World: I would very much like permission to reply to the state-ments of W. C. Hagan, business agent of the International Machinists, re I.A.M. and Amalgamated Society of

1st. The reason these unions are not working in conjunction is because the I.A.M. do not recognize a dual organization: 2nd. Mr. Hagen says that "hundreds of their members have paid their pas-sages to the old country, and are working in the different shops."

I say that dozens of I.A.M. members have made application to join the A.S.E., and we are giving them free transportation, also finding jobs for them on condition that they promise to carry the A.S.E. card when they come back to this country.

3rd. Mr. Hagen says that his members have been advised to carry our card when in Great Britain." They could not do otherwise, for the I.A.M

have no branches in Britain.

4th. He says that "the I.A.M. believe in an exchange of cards.

The A.S.E. is an industrial union composed of workers of all branches of metal trades, and has benefits for unemployment, strike, sickness, accident, legal defence, superannuation and death

The I.A.M. is simply a craft union, composed of workers in one branch of the metal trade, with only stake bene-fits, therefore the A.S.E. could not ex-change cards with the I.A.M. In fact, it would mean a backward step of 62 years, when a number of the craft unions of England joined together and 26 50 this formed the Amalgamated Society

10 00 of Engineers.
5th. Mr. Hagen says that "hundreds 10 00 of their members are at the front as-5 00 sisting the empire, and are being kept o in good standing by their union The A.S.E. has more than twenty thousand members at the front, including Corp. Jarvis, Royal Engineers, who won the V.C. for working under fire, laying explosives to plow appring at Jemappes. Belgium, on Aug. 23 last. All these members are kept at anding by the union. The in good standing by the union. The A.S.E. also contributed \$150,000 to the British War Loan. 6th. Mr. Hagen says "the I.A.M. is 150 001 the only recognized union in North

CANADIAN CASUALTIES

Another heavy list of casualties in the Royal Montreal Regiment was reported at noon Saturday. Fourteen more wounded are recorded, and two of these are missing. These losses occurred in the terrible

pattle of Langemarck, near Ypres, when the gallant Royal Highlanders and Royal Montrealers, the 13th and 14th Battalions, were left to cover the retreat, and it is believed were practically wiped out as attalions

battalions.

The story of it has been but meagrely told. How the brave fellows fought and fought till there was none left to fight, how their comrades, sick at heart, heard the shots from the Village of St. Juffer, which they were holding, grow fewer and fewer as they fell, but the complete story of the great stand those lads made against overwhelming odds, all to save their fellow Canadians from worse disaster, when it comes will be one of the most thrilling tales of the war.

HIS GREAT SCIENCE, originated by

WHICH RESTORE HEALTH.

THIS GREAT SCIENCE, originated by Dr. Palmer twenty years ago, has been developed into the most modern art, and deals with the true cause of diseases in man. The theories of many men have been advanced, and failure to produce a specific for cancer or even chronic bronchitis is laid at the door of materia medica (medicine). Much has been done to relieve pain and deaden symptoms by the family physician—also removing refuse from the body by the surgeon's knife. But what caused the refuse or growth of abnormal tissue? Chiropractic philosophy has proven in thousands of cases here in Ontario, and especially Toronto, that operations merely remove effects; the cause still remains; and that the real cause is in the spine, where the nerve is pinched by the bones (vertebrae) being slightly displaced. Poisonous drugs and serums are only a poor substitute for nature's secretions, manfactured by the glands throughout the body. Can your physician give you a real reason for the lack of glandular action in any part of your body? We claim it is because the nerve power is partly cut off by bone pressure in spine—nature's forces from the brain are obstructed. The competent Chiropractor who knows the body removes this obstruction scientifically and with no danger. We publish these facts through sense of duty to thousands of sufferers, who can regain health, just as the man did at the eleventh

and with no danger. We publish these facts through sense of duty to thousands of sufferers, who can regain health, just as the man did at the eleventh hour, who pays for this space. Chiropractic is logic and backed up by practical results, and does not use any form of superstition, electricity—stimulation by massage—absolutely no drug dictation to nature. We know disease exists, know its true cause, and can correct it. We know germs exist, but they do Nature's work, are for a good purpose in the tissues.—This science is growing in popular favor, and the graduate Chiropractor publishes the truth to enlighten the people who need health, and not deadly poison to deaden their pain. In summary, Chiropractic removes the cause of all diseases, acute or chronic, by adjustment of spine, allowing full flow of the body's nerve forces from brain to organs. Nature restores health. Send for explanatory book, "Disease and its Master." Telephone appointments for consultation.

One official said she had none, another that a few cases of small arms ammunition was aboard. It is understood that she had aboard a consignment of big gun shells, empty, and therefore not rated as ammunition that might lamage the vessel in case of an explosion aboard

On her manifest the largest single item was listed as "cartridges and am-munition." 4200 cases, \$152,400. The next item in value was a consignment of furs, valued at \$119,000, for Liverpool. The cartridges and ammunition cases were consigned to London. Miscellaneous items of the cargo included sheet brass, copper, copper wire and manufactured goods of varying de-scriptions. The vessel varried hundreds of tons of beef and bacon and many thousand pounds of butter, cheese and lard.

HORRIBLE CRIME'

Expression Strong Enough

LONDON. May 8 .- The Lord Mayor of London, Sir Charles Johnston, referring to the Lusitania disaster today, said:
"There seems to be no expression

strong enough or adequate to convey the intense indignation which everyone, outside of Germany, must feel at this cowardly outrage. It is imp sible to crystallize into a phrase what the world thinks of this abominable and horrible crime. Let us hope that before long the perpetrators, high and low, will receive their deserts."

How You May Reduce Your Weight

Overstoutness is a very unwelcom condition especially in the present day, when slender figures are so fashionable, and every reader of this paper has noticed the tendency of some people to put on an excessive amount of fat. If you happen to be one of those whose weight is more than it should be don't try to starve yourself, eat all you want, but go to your druggist and get oil of orliene in capsule form and take one with each meal.

Oil of orliene increases the oxygen-

carrying power of the blood and dis-solves the fatty tissue, in many cases at nearly the rate of one lb. per day. Be sure to get oll of orilene in capsule form. It is sold only in original sealed packages. Any good druggist has it, or a large size box will be sent on receipt of \$1.00. Address D. J. Little Drug Co.,

HICAGO, May 8.—Steve. Well Steve weve movved in to the flat that Gussy picked out and its the swellest little flat you ever see and right clost to garfield pk. so as we will have some place to go evry night in the summer and set a round with out it costing us nothing.

I got in from Pittsburgh Sun A. M. and Gussy come down to meet the train and wouldent leave me go out to the old mans house or nowheres till Id saw the flat so we got on the L and went out to the flat and I over looked it but I dident say whether I liked it or not and says I would have to think it over so next A. M. I ast Bresnahan to excuse me from practice and I went downtown and seen a atty at law and ast him did I half to stand for a lese sined by my wife and he says yes I did so I seen he dident know nothing a bout the law but I dident want to make no fuss so I come home and told Gussy yes we would take the flat and she says all right we would move in to it the next day. Well Steve it wasnt no job to move because all as we had was our close and a couple of twls and a few dishes and then I had to lay off of practice again Wed, A. M. and go down town with Gussy and get some furniture because of corse we couldent sleep on the floor or eat off of the mantle peace so we went to a store on wabash ave. where they dont only make you pay \$10.00 dollars down and the rest in weakly payments and we got a bout \$80.00 dollars worth all to gather and to see all of our

Lancashire ... 7 Hiawatha —Division III.— Caledonians secured their first point of the season when they drew with Queen's Park, 0 to 0, at Dunlop field Saturday afternoon. This is the first Saturday that the Caleys have really been able to put anything like a strong team on the field, and if the same team is kept together they will pick up a lot more points before the season is over. On the play today there wasn't much difference between the two much difference between the two teams, and a draw is a fair estimate

Caleys, with the wind behind them, got busy early and carried the ball down to Queens' end, where they forced a corner, but it was easily clearforced a corner, but it was easily cleared. The Parkers, on the other hand, had to keep the ball low and work hard to rush it toward their opponents' goal. McIntosh gave Hardman a bad scare when he just headed across from Barclay over the cross-bar. A hard, prolonged attack by the Caley halves and forwards spelt danger to Gildert and Co. but by strenuous work they managed to keep them out. Peden. Caley's inside left, received a bad kick cut the knee, which necessitated his removal from the field. In a second division game of the T. and D. Soccer League, staged at Harris Park on Saturday afternoon, Bank of Commerce broke away from their long list of defeats when they won from Sons of Scotland by the score of 4—2. The score at the end of the first half was 1—d, with the Sons of Scotland showing slightly fine better form than their opponents. showing slightly fhe better form than their opponents.

The second half opened up with a rush, both teams trying hard to get an early lead. Thempson started it for Sons of Scatland when he put a rebound in off Hickman's hands into the net; which soon tied it up, when he put a put a neat shot in from the side, which drew applause from the large number two men circling the Don halves and good work notching the sixth goal just before the whistle blew.

Resuming play, Dunlops still pressed the Orchard goal, the defence putting up a very loose article of ball and not giving Feenie a chance. Woods tallied the eighth on a beautiful kick from the side line to the corner of the goal.

The final period developed into a great tussle, both teams keeping the ball traveling up and down the field at express express speed. Hearts had a slight margin on the play, but were kept out of Dons' goal by a good strong defence. After a lot of rather even play, McCuish broke away and passed the Don defence, but shot softly into the goal-keeper's hands. A corner against Hearts was followed by another, which, after some passing in front of the after some passing in front of the goal, was finally cleared. McCuish, goal, was finally cleared. 'McCuish, combining with Allen, got around the Don backs and the former scored, giving the 'goalkeeper no chance with his final effort. Play started with the ball working up and down the field, both forward and back lines putting up a good game. The Thistles brought the ball thru, and Walker evened up the score on what looked as the he had pun the ball thru. However, the referee allowed the goal. Resuming, both teams worked their utmost to break the tie, helped by the large crowd of the tie, helped by the large crowd of rooters for both sides. Campbell unfortunately made a penalty and Dalzell in the kick broke the tie, making it 2—1 in Baracas favor.

Apparently in this half the referee couldn't tell a foul from an offside play, causing the game to develop into a continual wrangle on both sides. Game ended with no further scoring Line-up:

ing out to Cameron, who put his side two up with a beautiful first timer. Half-time was now called with Wychwood leaders by 2—0.

Fleld restarted for Wychwood. Davenports immediately pressed, Fiddler shooting just wide. Davenports continued to press and Wildash tested Wilcock with a hot one which he saved nicely. From a breakaway Wychwood got a corner which Apps cleared in good style. Davenports came down again and got a corner, but Wilcock was right on the job and cleared his lines well. Davenports continued to press and had the hardest kind of luck with their shooting, the strong wind seeming to handlcap the forwards. From a free kick against McColl. Fidler sent in a nice shot but Wilcock was not to be beaten and mada a fine save. It is all Davenports, the ball seldom crossing the half-woy line for Wychwood, but wild shooting and Wilcock's goalkeeping keot out a score. Wychwood are now spolling the game by continually kicking out, the ball being more out of play than in, from now until the ned it was all Albions but they could not score and Wychwood ran out winners of a good game by 2—0.

FRUITMEN HOLD ANNUAL TOURNEY

Bowlers Have Pleasant Time at Toronto Bowling Club-List of Prize Winners.

The wholesale fruitmen of Toronto had their night of nights at the Toronto Bowling Club Wednesday night, when thru the generosity of Manager T. F. Ryan, who turned over the alleys gratis, a five-pin tournament for prizes was molled, with an entry list of 143 contestants, and the array of presents, which consisted of the choicest cut glass was the biggest and most costly ever competed for by the fruitment Other features furnished by the management, and which were hugely enjoyed by the assemblage during the evening were "Al" Linton's celebrated entertainers, which consisted of orchestra and quartet, the latter making a hit in every number, rendering "Tipperary," which also had the assistance of "Tom" Vance, the well known Irish baritone; the feature, however, was a real treat by "Jim" Purvis, a Buffalo tenor, formerly with Haverly's minstreds, who got hand after hand for his numbers, "Ireland" and "Mother Machree," while "Jack" Walsh was also well received, especially in his megaphone selections. Two fourround boxing bouts by local boys followed the tournament games, and were of the eleganceut order with a pair of when thru the generosity of Manager megaphone selections. Two four-round boxing bouts by local boys followed the tournament games, and were of the clean-cut order, with a pair of feather lightweights doing the entertaining. This part of the program was greatly enjoyed, and as something not quite expected on the program, was more than appreciated. The presentation of the prizes, 27 in number, then took place, and was ably handled by Ted Oke, assisted by Manager T. F. Ryan, and Jack McBride, and to the latter belongs the success of the tournament, Jack rounding up the fruitmen on short notice in a la Kitchener manner, and making a name for himself in this respect, that once belonged to Kimpton, now of Bermuda Islands. At the conclusion of the presentation of prizes speeches of thanks to Manager Ryan for the big night tendered, including the high-class refreshments handed out, were touched upon by all the speakers, who said the night would long be remembered by every wholesale fruitman present. "Tipperary" and "God Save the King" then followed by all singing, after which three rousing cheers for T. F. Ryan and the Toronto Bowling Club broke up the night of all nights amongst the wholesale fruit trade of Toronto.

Two-Man League and the result was a
decided success. Tho the league was late
in starting it completed the two series,
and in both the issue was in doubt to the
final games, three or more of the teams
having a chance up till the last week. The
handicaps in most cases cut no figure in
the actual scores, but no doubt they had
often a moral effect in the winning of
games, the result being the evening up of
the chances of even the weakest teams. the chances of even the weakest teams. The first series was won by the Bigleys (Tom O'Connor and Dick Bigley) after a play-off with the Nationals (Tom Ryan and Jack Eastwood), with three teams. World, Wm. Davies and Manhattans one game down. The second series was won by The World (Billy Beer and Walter Williams), who came strong at the end and nosed out the leaders, Wm. Davies and the Boyds, while the Manhattans also came up to tie for second place. The roll-off between the Bigleys and The World

off between the Bigleys and The World will take place probably the coming week. One result to be noticed of the handicapping is the fact that the two high average teams, the Boyds and The News, did not reach the top in either series.

In individual rolling the honors of the league were carried off by Charles W. Boyd after a see-saw fight with Allie Boyd, with Walter Williams next in order, the latter securing third place in the last week, partly by the aid of his single game of 267, which was the high single for the league. The three high games were rolled by C. E. Boyd, 656 The Boyds, the two Charleys, were the high average team. Captain Tillinghast Huston, owner of the thoroly renovated part robably rejuvenated Yankees, made the offer. Captain Cushman Rice, the foremost American in Cuba, and

"But I don't care what happens Capt, Huston can't have that penny," says Capt. Rice "I might need that penny myself some day."

Capt. Huston wants the penny so that he can pass it along to -"Wild Bill" Donovan who is serving time Handicapping in two-man villing was just now as the manager of the Yan-iven a test the past season in the T.B.C. kees, "Wild Bill" wants the penny because he feels that if he gets the

penny he can win a pennant and a world series just as did George Stallings. Capt. Rice gave the penny to Stallings early last summer. At that time the Braves were hopelessly in "Take this, George, and keep it with you. It'll bring you luck," said Capt. Rice during the presentation

Stallings took the penny - and everybody knows what happened afterward. On the same day that Stallings got that penny the Braves won a game. The next day they wen arother. And they continued to arother. win until there wasn't any more use of winning. They had won everything

in sight. Stallings will tell you that it was the penny that whirled the Braves from the cellar position to the crest of baseball. Some persons think it was because the Braves played better baseball than anyone else. But that's an erroneous idea. The penny did it —the very same penny that Capt. Rice gave to Stallings.
Stallings never permitted the penny

to leave his possession. Many men have wanted to examine it, but they made their examination with Stallings holding the penny in his hand. One day, while Stallings was showing Ave. One day, while Stallings was snowing his penny to an anxious inquirer, one 186.37 184.6 183.7 184.6 183.7 181.3 180.29 185.1 Braves won. Ever afterward, when the Braves needed a hit in a pinch, stelling cardenic his penn to take the stalling penn Stallings ordered his men to touch the penny. When they did they usually penny. When they did they us delivered. Capt. Rice, who served in

American Army in both Cuba and the Philippines, found the two pennies around the neck of a Cuban negro who was killed in one of the recent racial wars in Cuba. The pennies were 162.13 in a little bag. In company with pennies were some little herbs, hoodoo clasing charms and other trinkets. "That fellow was one of the hoodoo doctors," said Capt, Rice, "That bag

Twenty-five thousand dollars in full of trinkets is used by those felreal, regular money was offered for lows to chase away evil spirits and bring good luck. I am not superstitious, but Stallings is. So I gave him that penny to see how it would work.

It seems to have worked fine.

"This other penny ought to work better. The one I gave to Stallings was in perfect condition. The one I am keeping is bent, That's where the bullet hit before it pierced the throat

the offer. Captain Cushman Rice, the foremost American in Cuba, and the owner of the penny, spurned it. And now Capt. Rice fears that Capt. Huston, who lives in Havana when he isn't living elsewhere, will bang him on the knob some dark night and try to take the penny away from him, or hire some one to burglarize his rooms.

"But I don't care what happens bullet hit before it pierced the throat of the negro.

"Capt. Huston is an old pal of mine and I'd do almost anything for him. But giving him that penny or even selling it to him is a bit beyond that. Since Stallings did so much with the penny to take the penny away from him, or hire some one to burglarize his rooms.

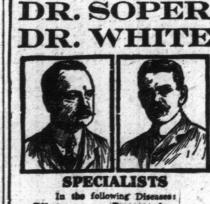

"But I don't care what happens

While the British gun is adopted for general military service, it may also be used with or against air craft.

The weapon is operated by recoil and has a maximum firing speed of approximately 500 shots per minute. This is slower than the water-cooled gun now in use, but the time contact in reality it can fire a greater number of shots in a given period than its predecessor.

The new gun has an effective range, varying from 2000 to 1800 yards, and also uses the .30-.30 cartridge employed by all of the service rifles. The ammunition is fed into it by means of belts holding 250 pounds each. The weight of the gun is 36½ pounds, and that of its adjustable tripod approximately 40 pounds.

Arise Out of East: War Ends in July

the war kings and royalty will disappear and a united republic of the world, of which Woodrow Wilson will he the lead, will take ever the ruling of the earth. A new prophet will come out of the East and the come out of the East and the world will enter upon a long era of peace, love and reason. This is the substance of a remarkable prophecy made by a well known operatic singer of New York, who claims to have received a message from Zoroaster, one of the founders of Persia's sun worship many thousands of years ago.

The "control," thru whose agency What will be the result? she claims to have received the information into the future, made himself, or itself, known as Zoroaster.

The seance in which the prophecy was revealed took place at Madame's — Madison avenue studio and was attended by friends and members of the New York press.

"My name is Zoroaster," the report round sphere the one God of universal law, the sun that dominates and rules all light, truth and force upon your earth and upon all planets. I lived 5711 years before Christ lived, as you count years on your side of life. I lived to be 210 years of age as represented on your earth calendar."

This accounted for the great, golden light. The author of sun-worship had assumed, in a measure at least, the great attribute of his Deity.

reign."

A big revolution, according to this revelation, is coming thru the great war. This is a degenerate age, Zoroaster" explained, in many ways behind even the ages of idolatry. Idol worship, he said, actually sprang from the recognition of spirit inspiration. The man who carved the sacred image had, or was supposed to have spiritual or was supposed to have, spiritual guidance; and the ordinary worshipper, bowed to the idol with a feeling that it was a work of inspiration. But art is decadent today. Painters and sculptors are not inspired and the best they can offer is but a repetition of ancient inspired. ancient inspirations. The great war, which is stirring the world to its depths, was necessary. It was incited by the spiritual world in order to bring mankind into a larger and fuller intelligence.

"At its close," said the sage, still speaking thru Madame's lips in a voice which suggested eternal calm, will awaken to a firmer truth. The whole world will break forth in the making of wondrous things never seen before. This will not only be a reawakening of the nations, but a re-inspiration of individual lives, the cre-ative instinct set free and overcoming the impulse to destroy.

"The end of the war is near. We may almost say it will end between the 21st and 30th of July, and by October war between nations will have been practically abblished. Between October and December there will be slight skirmishes, but by the latter month there will have been such a wearing of souls and men and such a wearing out of royalty that all will cry out out of royalty that all will cry out for peace. In January peace will be politically ratified.

"The spirit of the great Bismarck," Zoroaster said, "appeared to this instrument last night. He told her of seventy-one submarines of which the world knows nothing have slipped into the harbors along the coasts of the Americas and from their hidden places have repeatedly succeeded in sending wireless messages to their fleets. The newspapers will later contain references to these as yet unknown expeditions and they will tell of some of the mysterious messages which have been received."

"Men who have a right to speak say that the Roman Catholic Church might at this time have recaptured France. But what has France to say to a Church whose heads have for-saken her? What is Belgium to say to a Pope that has not even ventured to remonstrate on the treatment of Cardinal Mercier? For the Pope's letter was no real remonstrance, nor has it been taken as such in Belgium. What are the Russian Poles to say, who are Roman Catholics even to a man?"

"There have been many Christs," the revelation continued, "and now shortly will come from the East another Man who will give to the world a new thought and will dominate all the power and force of Europe.

"This Jewish Christ brought unto the world the personality of a pure life. The Romans and Greeks remained idolators along intelligent lines, yet to place something at the head they chose this man, Jesus Christ. Out of the East will come another Man, but of vastly larger intelligence, who will dominate most, if not all of Europe, and who will be able to solve all the great problems of that country before quiet shah reign."

Hundreds of lumberlacks came each spring after the drive for the usual free-for-all fight between members of rival camps. Even the "bohunks," as the Southern Europeans working on railway construction were called, visited the town after pay days. Many bars were wrecked each year, but that was never lamented, for the "booze" was poor and the charge high. But a party of prospectors with \$75,000, evidently to spend, was a novelty. It looked like trouble, for about fifty lumber-jacks had arrived the day before and were looking for a fight.

Tiring of the cheap liquor sold at the bar the party soon made for the dining room, prepared by White's instruction, for the biggest blow-out Sudbury had ever seen. Wine flowed Sudbury had ever seen. Wine flowed in abundance, rich food was served in many courses, and late in the morning, when the feasting eventually stopped, many a prospector had succumbed and was helped to bed.

White felt none the worse for the night before when he awoke about noon. Like most men who live the strenuous outdoor life, his physical capabilities were great. In the meantime the lumberjacks had been taunting the prospectors at quarrel. The prospectors swallowed many insults to abide by White's wish for a peaceful time. But one evening little Jacques Moreau was caught alone in a bar by a half dozen lumber-

"Want to have a little joy ride," said the prospector. "Rent it to us for a couple of days."

All efforts to rent the tug were fruitless, altho White offered him good payment. After considerable dickering the tug passed into White's ownership for \$5000.

When the deal had been concluded, White shoved afew bills into Moreau's hands and told him to hustle up-town and buy a "grammyphone" and all the records that could be located. Others were despatched willingly, on errands, and when the Gee Whizz pulled away from her moorings a half hour later she was heavily loaded with refreshments.

Next morning White's pocketbook was considerably slimmer than when he left Cobalt, less than a month be-fore. Calling the hotel proprietor he paid his bill and to his astonishment, had only about one dollar in loose change in his pockets.

As the train pulled into NorthBay the passenger-freight boat was being cast off for her regular trip down the French River. Lake Nipissing was calm as a mill pond, and the sight of the ferry started White thinking. Why couldn't they go for a boat ride? Perhaps there was a craft in the small harbor that might be rented for a day or two.

But the only boat that could accommodate the party was the Gee Whizz, a little tug that lay in a slip alongside high piles of lumber. That's the very thing," thought White "Where's the owner?" he asked of a grimy engineer-fireman who stood watching the crowd approaching.

These were disregarded until one night, when all his friends had succumbed to a strenuous evening, a poker game was suggested. The game started with White whning in the early stages, and becoming more daring as luck seemed to be favoring him. When four ages were dealt him, he could hardly suppress his excitement, and in anxiety to boost the ante did not notice one of the gamblers extract a card from the bottom of the pack. The betting was furious, and when White came to himself and "called," he knew he was beaten, and a pot of over ten thousand dollars lost. QUEST. notwithstanding the unusual nature of his surroundings, slept that night as only a tired and healthy man can. He was awakmed the next morning by the quiet movements of a manservant, who had brought back his clothes carefully brushed and pressed. He sat up in bed and discovered a small china tea equipage by his side.

"Say, what's this?" he inquired.

"Tour tea, sir."

Quest drank half a cupful without protest.

"Your bath is ready at any time, sir."

"T'm coming right along," Quest replied, jumping set of bed.

The man held up a dressing gown and escorted him to an unexpectedly modern bathroom at the end of the corridor. When Quest returned, his tellet articles were all laid out for him with primiprecision; the window was wide open, the blinds drawn, and a soft breeze was stealing thru into the room. Below him, the park, looking more beautiful than ever in the morning sunshine, stretched away to a vista of distant meadowlands and cornfields, with here and there a little farmhouse and outbuildings gathered snugly together. The servant, who had heard him leave the bathroom, reappeared. "Is there anything further I can do for you, sir!" he inquired.

"Nothing at all, thanks." Quest assured him. now half-past eight."
"Til be right there."

The man withdrew and Quest made a brisk toilet, The man withdrew and Quest made a brisk toilet. The nameless fears of the previous night had altogether disappeared. To his saner morning imagination, the atmosphere seemed somehow to have become cleared of that cloud of mysterious depression. He was whistling to himself from sheer light-heartedness as he turned to leave the room. Then the shock came. At the last moment he stretched out his hand to take a handkerchief from his satchel. A sedden exclamation broke from his lips. He stood for a moment as the turned to stone. Before him on the top of the little pile of white cambric, was a small black box! With a movement of the fingers which was almost mechanical, he removed the lid and drew out the customary little scrap of paper He smoothed at out before him on the dressing case oothed at out before him on the dressing case nd read the message:

"You will fail here as you have failed before. Better go back. There is more danger for you in this country than you dream of."

His teeth came fiercely together and his hands were clenched. His thoughts had gone like a flash to Lenora. Was it possible that harm was intended her? He put the idea away from him almost as soon as conceived. The thing was untimaginable. Craig was here, must be here, in the close vicinity of the house. He could have had no time to communicate with confederates in London Lenora, at any rate, was safe. Then he glanced around the room and thought for a moment of his own danger. In the dead of the night, as he had slept, mysterious feet had stolen acress his room, mysterious hands had placed those

the night, as he had slept, mysterious feet had stolen across his room, mysterious hands had placed those few words of half-mocking warning in that simple hiding place! It would have been just as easy, he reflected, with a grim little smile, for those hands to have stretched their death-dealing fingers over the bed where he had lain asleep. He looked once more out over the park. Somehow, its sunny peace seemed to have become disturbed. The strange sense of fereboding which he, in common with the others, had carried about with him last night, had returned. The atmosphere of the pleasant breakfast room to which in due course he descended was cheerful shough. Lady Ashleigh had already taken her place at the head of the table before a glittering array of diver tea and coffee equipage. The professor, with a plate in his hand, was making an approving survey of the contents of the dishes ranged upon the side-board.

"Quest! Quest!" he almost sobbed. "My brother:—George, whom I loved like nobody else on earth! Is he really dead?"

The professor gripped the oak pillar of the bed-ead. He seemed on the point of collapse. "The mark of the Hands is upon the throat,"

"We must not eat or drink or sleep," Quest de-clared, flercely, "until we have brought this matter to an end. Craig must be found. This is the su-preme horror of all. Pull yourself together, Mr.

The butler made an apologetic appearance. He spoke in a hushed whisper.

"You don't have any—what we call the white slave traffic—over here, do you?" Quest asked quickly.
"I can't say that I've ever come across any case of it myself, sir," the old lady replied. "I was house-keeper to the Duke of Merioneth for fifty years, and where we lived we didn't hear much about London and London ways. You see, I never came to the town house. But since I retired and came up here, and took to reading the Sunday papers. I begin to be thankful that my ways have been country ways all my life."

"No need to alarm ourselves, I'm sure," Quest intervened, making his way toward the door, "Lenora is a particularly capable young lady. I feel sure she'd look after herself. I am going right back

"George is dead." the professor said, slowly.

There was a moment's awful silence, broken by a piercing scream from Lady Ashleigh. She sank down upon the sofa and the professor leaned over her. Quest turned to the little group of frightened servants who were gathering round the doorway.

"Telephone for a doctor," he ordered; "also to the local police station."

"We'd better lock him up until the police arrive," Quest suggested. "I suppose there is a safe place somewhere?"

The professor awoke from his stupor.

"Let me show you," he begged. "I know the way. We've a subterranean hiding place which no criminal on this earth could escape from."

They led him down to the back part of the house, a miserable, dejected procession. Holding candles over their heads, they descended two sets of winding stone steps, passed along a gloomy corridor till they

It led into a dry cellar which had the appearance of a prison cell. There was a single bench set against the wall. Quest looked around quickly.

"This place has been used before now, in the old days, for malefactors," the professor remarked, "He'll be safe there. Craig," he added, his voice trembling, "Craig—I—I can't speak to you. How could you?"
There was no answer. Craig's face was buried in his hands. They left him there and turned the key.

The woman shook her head.

"Miss Macdougal stayed here the night before last," he said, "and her luggage is waiting for orders. She left here yesterday afternoon to go to her aunt's, and promised to send for her things later on during the day. There they stand, all ready for her."

Quest followed the direction of the woman's finger. Lenora's familiar little belongings were there, standing in a corner of the hall.

"You haven't heard from her, then, since she went out yesterday afternoon?" he asked, with sinking heart.

"No. sir." What time did she go?" "Directly after in early lunch. It must have been about two o'clock."

Quest hurried away. So after all there was some foundation for this queer sense of depression which had been hovering about him for the last few "Scotland Yard." he told the taxi driver.

"Scotland Yard." he told the taxi driver.

He thrust another cigar between his teeth, but, forgot to light it. He was amazed at his own sensations, conscious of fears and emotions of which he would never have believed himself capable. He gave in his card, and after a few moment's delay he was shown into the presence of one of the chiefs of the detective department, who greeted him warmly.

"My name is Hardaway," the latter announced. "Glad to meet you, Mr. Quest, We've heard of you over here. Take a chair."

over here. Take a chair."
"To tell you the truth," Quest replied. "my business is a little urgent."

"Glad to hear you've got that fellow Craig," Mr. Hardaway continued. "Ridiculous the way he managed to slip thru our fingers. I understand you've

got him all right now, tho?"
"He is safe enough," Quest declared, "but to tell you the truth, I'm very worried about another little "Go on," the other invited.

"My assistant, a young lady, Miss Lenora Mac-dougal, has disappeared! She and I and Professor Ashleigh left the steamer at Plymouth and traveled up in the boat train. It was stopped at Hamblin road for the professor and myself, and Miss Mac-dougal came on to London. She was staying at Clifford's Hotel in Payne street for the night, and then going on to the aunt. Well, I've found that aunt. She was expecting the girl, but the girl never appeared. I have been to the hotel where she spent the night before last, and I find that she left there at two o'clock and left word that she would send for her luggage. She didn't arrive at her aunt's and the luggage is still uncalled for."

The inspector was at first only politely interested. It probably occurred to him that young ladies have been known before now to disappear from their guardians for a few hours without serious results.

"Where did this aunt live?" he inquired.

"No. 17. Princes' Court road, West Kensington."
Quest replied. "She had just moved there from
Elsmere road. Hampstead, I went first to Hampstead. Lenora had been there and learned her aunt's correct address in West Kensington. I followed on to West Kensington and found that her aunt was still awaiting her."

A new interest seemed suddenly to have crept into Hardaway's manner.

"Let me see," he said, "if she left Clifford's hotel about two, she would have been at Hampstead about half-past two. She would waste a few minutes in making inquiries, then she probably left Hampstead for West Kensington, say, at a quarter to three."

"Somewhere between those two points," Quest pointed out, "she has disappeared."

"Give me at once a description of the received."

"Give me at once a description of the young lady."
Mr. Hardaway demanded. Quest drew a photograph from his pocket and assed it silently over. The official glanced at it. and down at some paper which lay before him.

Then he looked at the clock.

"Mr. Quest," he said, "it is just possible that your visit has been an exceedingly opportune one."

He snatched his hat from a rack and took Quest by the arm.

"Come along with me," he continued. "We'll They entered a taxi and drove off westwards. "Mr. Quest," he went on, "for two months have been on the track of a man and a woman whom we strongly suspect of having decoyed haif a dozen

perfectly respectable young women, and shipped them out to South America."

"The white slave traffic!" Quest gasped.

"Something of the sort." Hardaway admitted.

"Well, we've been closing the net around this interesting couple, and last night I had information brought to me upon which we are acting this afternon. We've had them watched and it seems that they were sitting in a tea place about three o'clock yesterday afternoon when a young woman entered who was obviously a stranger in London You see, the time fits in exactly, if your assistant decided to stop on her way to Kensington and get some tea. She asked the woman at the desk tho best means of getting to West Kensington without taking a taxicab. Her description tailies exactly with the photograph you have shown me. The woman who my men were watching addressed her and offered to show her the way. They left the place together. My men followed them. The house has been watched ever since and we are raiding it this afternoon. You and I will just be in time."

You've left her there all night?" Quest exclaimed.

You've left her there all night?" Quest exclaimed. You've left here there all night?" Quest exclaimed. "My God!"

Hardaway touched his arm soothingly.

"Don't worry, Mr. Quest," he said. "We don't want the woman alone; we want the man, too. Now, the man was away. He only visits the house occasionally, and I a mgiven to understand that he is a member of several west end clubs. When the two women entered that house yesterday afternoon there wasn't a soul in it except servants. The woman telephoned for the man. He never turned up last night nor this morning. He arrived at that house twenty minutes ago."

Quest drew a little breath.
"It gave me a turn," he admitted. "Say, this is a slow taxil"

The inspector glanced out of the window.

"If this is the young lady you're looking for," ne said, "you'll be in plenty of time, never fear. What I am hoping is that we may be shie to catch my fellows before they try to rush the place. You understand, with your experience, Mr. Quest, that there are two things we've got to think of. We not only want to put our hand upon the gullty persons, but we want to bring the crime home to them."

"I see that," Quest assented, "How much farther is this place?"

"We're there," Hardaway told him,
He stopped the cab and they got out. A man who seemed to be strolling aimlessly along reading a newspaper suddenly joined them,

"Well, Dixon?" his chief exclaimed.

The man glanced around.

"Tve got three men round at the back, Mr. Hardaway," he said, "It's impossible for anyone to leave the place."

"Anything fresh to tall me?"

away," he said. "It's impossible for anyone to leave the place."

"Anything fresh to tell me?"

"There are two men in the place beside the governor—butler and footman, dressed in livery. They sleep out and only come after lunch."

Hardaway paused to consider for a moment, "Look here," Quest suggested, "they know all of you, of course, and they'll never let you in until they're forced to. I'm a stranger. Let me go, I'll get in all right."

Hardaway peered around the corner of the street.

get in all right."

Hardaway peered around the corner of the street.

"All right," he assented. "We shall follow you up pretty closely, tho."

Quest stepped back into the taxi and gave the driver a direction. When he emerged in front of the handsome gray stone house he seemed to have become completely transformed. There was a fatuous smile upon his lips. He crossed the pavement with difficulty, stumbled up the steps, and held on to the knocker with one hand while he consulted a slip of paper. He had scarcely rung the bell before a slightly parted curtain in the front room fell together and a moment later the door was opened by a man in the livery of a butler, but with the face and physique of a prize-fighter.

"Lady of the house." Quest demanded. "Wart to see the lady of the house."

Almost immediately he was conscious of a woman standing in the hall before him. She was quiet-

Almost immediately he was conscious of a woman standing in the hall before him. She was quietly but handsomely dressed; her hair was gray, her
smile, altho a little peculiar, was benevolent.
"You had better come in," she invited. "Please do
not stand in the doorway."
Quest, however, who had heard the footsteps of

Wherefore I perceive that there is nothing better than that a man should rejoice in his own works; for that is his portion.—Ecc. iii, 22.

ENCH with a long hand, lazy one," I said to the punkah coolie. "But I am tired," said the coolie. "Then go to Jehannum and get another man to pull," I replied, which was rude, and when you come to think of it, unnecessary.

"Happy thought—go to Jehannum!" said a voice at my elbow. I turned and saw seated on the edge of my bed a large and luminous Devil. "I'm not afraid," I said. "You're an illusion bred by too much tobacco and not enough sleep. If I look at you steadily for a minute you will disappear. You are

"Fatuous yourself!" answered the Devil blandly. "Do you mean to say you don't know me?" He snivelled up to the size of a blob of sediment on the end of a pen and I recognized my old friend the Devil of Discontent, who lived in the bottom of the ink pot, but emerges half a day after each story has been printed with a host of useless suggestions for its betterment.

"Oh, it's you, is it?" I said. "You're not due till next week. Get back to your ink pot."

"Hush!" said the Devil. "I have an idea." Too late, as usual. I know your ways."

"No. It's a perfectly practicable one. You're swearing at the coolie suggested it. Did you ever hear of a man called Dante-charmin' fellow, friend o' mine?"

"Dante once prepared to paint a picture," I quoted. "Yes. I inspired that notion—but never mind.

Are you willing to play Dante to my Virgil? I can't guarantee a nine circle inferno, any more than you can turn out a cantoed epic, but there's absolutely no risk, and-it will run to three columns at least." "But what sort of Hell do you own?" I said. "I fancied your operations were mostly above ground-You have no jurisdiction over the dead."

"Sainted Leopardi!" rapped the Devil, resuming natural size. "Is that all you know? I'm proprietor of one of the largest hells in existence—the Limbo of Lost Endeavor, where the souls of all the characters

"Characters? What characters?"

"All the characters that are drawn in books, painted in novels, sketched in magazine articles, thumbnailed in feuilletons or in any way created by anybody and everybody who has had the fortune or misfortune to put his or her writings into print."

"That sounds like a quotation from a prospectus. What do you herd characters for? Aren't there enough souls in the universe?"

"Who possess souls and who do not? For aught you can prove, man may be soulless and the creatures he writes about immortal. . Anyhow, about a hundred years after printing became an established ice the loose characters used to interplanetary space in legions which interfered with traffic. So they were collected and their charge became mine by right. Would you care to see them? Your own are there."

"That decides me. But is it hotter than northern India?"

"On my Devildom, no. Put your arms around my neck and sit tight. I'm going to dive!"

He plunged from the bed headfirst into the floor. a smell of jail durrie and damp earth; and then fell the black darkness of night.

"But you said there was no danger!" I cried in an extremity of terror.

"No more there is," said the Devil. "That's only the furnace of the first edition. Will you go on? No other human being has set foot here in the flesh. Let me bring the door to your notice. Pretty design, isn't it? A joke of the master's."

I shuddered, for the door was nothing more than a coffin, the backboard knocked out, set on end in the thickness of the wall. As I hesitated, the silence of space was cut by a sharp, shrill whistle like that of

ok refuge under the broad vans of the Devil's wings. The whistle rose to an ear-splitting shriek and a naked soul flashed past me.

"Always the same," said the Devil quietly. "These little writers are so anxious to reach their reward. H'm, I don't think he likes his'n, tho." A yell of despair reached my ears and I shuddered afresh. "Who was he?" I asked. "Hack writer for a pornographic firm in Belgium, exporting to London, you'll understand presently—and now we'll so the "card the graphic firm in Belgium, exporting to London, you'll understand presently—and now we'll go in," said the Devil. "I must apologize for that creature's rudeness. He should have stopped at the distance signal for line clear. You can hear the souls whistling

"Are they souls of men?" I whispered "Yes—writer men. That's why they are so shrill and querulous. Welcome to the Limbo of Lost En-

They passed into a domed hall, more vast than visions could embrace, crowded to its limit by men, women and children. Round the eye of the dome ran a flickering fire, that terrible quotation from Job: that mine enemy had written a book!"

"Neat, isn't it?" said the Devil, following my glance. "Another joke of the Master's. Man of Us, y' know. In the old days we used to put the characters into a disused circle of Dante's Inferno, but disused circle of Dance's Interno, but they grew overcrowded. So Balzac and Theophile Gautier were commissioned to write up this building It took them three years to complete, and is one of the finest under earth. Don't attempt to describe it the finest under earth. Don't attempt to describe it unless you are quite sure you are equal to Balzac and Gautier in collaboration. Look at the crowds and tell me what you think of them."

I looked long and carnestly and saw that many of the multitude were cripples. They walked on their heels or their toes, or with a list to the right or eft. A few of then, possessed odd eyes and ticolored hair; more threw themselves into absurd and impossible attitudes; and every fourth woman

seemed to be weeping.
"Who are these?" I said. "Who are these?" I said.

"Mainly the population of three volume novels that never reach the six shilling stage. See that beautiful girl with one gray eye and one brown, and the black and yellow hair? Let her be an awful warning to you how you correct your proofs. She was created by a careless writer a month ago, and he changed all colors in the second volume. So she came here as you see her. There will be troubled. came here as you see her. There will be trouble when she meets her author. He can't alter her now and she says she'll accept no apology."

and she says she'll accept no apology."

"Not in my department. Do you notice a general air of expectancy among all the characters? They are waiting for their authors. Look! That explains the system better than I can."

A lovely maiden, at whose feet I would willingly nave fallen and worshipped, detached herself from the crowd and hastened to the door thru which I had

enviously as they departed arm in arm to the other side of the hall.

"That man," said the Devil, "wrote one magazine story of twenty-four pages, ten years ago when he was desperately in love with a flesh and blood woman. He put all his heart into the work and created the girl you have just seen. The flesh and man. He put all his heart into the work and created the girl you have just seen. The flesh and blood woman married some one else and died—it's a way they have—but the man has this girl for his very own and she will everlastingly grow sweeter."

"Then the characters are independent."

"Slightly! Have you never known one of your characters—even yours—get beyond control as soon as they are made?"

"That's true. Where are those two happy

as they are made?"

"That's true. Where are those two happy creatures going?"

"To the levels. You've heard of authors finding their levels? We keep all the levels here. As each writer enters he picks up his characters, or they pick him up, as the case may be, and to the levels he goes."

"So you shall, when you come thru that door a second time—whistling. I can't take you there now."
"Do you keep only the characters of living scrublers in this hall?"

'We should be crowded out if we didn't draft them

"We should be crowded out if we didn't draft them off somehow. Step this way and I'll take you to the master. One moment, tho. There's John Ridd with Lorna' Doone and there are Mr. Maliphant and the Bormalacks—clannish folk, those Besant characters—don't let the twins talk to you about Literature and Art. Come along. What's here?"

The white face of Mr. John Oakhurst, gambler-broke thru the press. "I wish to explain," said he in a level voice, "that had I been consulted I should never have blown out my brains with the Duches and all that poker flat lot. I wish to add that the only woman I ever loved was the wife of Brown of Calaveras." He pressed his hand behind him suggestively. "All right, Mr. Oakhurst," I said hastily: "I believe you." "Kin you set it right?" he asked. "I believe you." "Kin you set it right?" he asked, dropping into the Doric of the gulches. I caught a trigger's cloth muffled click. "Just heavens!" I groaned. "Must I be shot for the sake of another groaned. "Must I be shot for the sake of another man's characters?" Oakhurst levelled his revolver at my head, but the weapon was struck up by the hand of Yuba Bill. "You durned fool!" said the stage driver. "Hevn't I told you no one but a blamed idiot shoots at sight now? Let the galoot go. You kin see by his eyes he's no party to your matrimonial arrangements." Oakhurst retired with an irreproachable bow, but in my haste to escape I fell over Caliban, his head in a melon and his tame ord under his arm. He spat like a wildcat.

"Manners none, customs beastly," said the Devil. "We'll take the Bishop with us. They all respect the Bishop." And the great Bishop Blougram joined us, calm and smilling, with the news for my private ear, that Mr. Gigadibs despised him no longer.

We were arrested by a knot of semi-nude Bacchantes kissing a clergyman. The bishop's eyes twinkled and I turned to the Devil for explanation. "That's Robert Elsmere—what's left of him," said the Devil. "Those are French feuilleton women and scourings of the Opera Comique. He has been lecturing 'em and they don't like it, "He lectured me!" said the Bishop with a bland smile. "He has been a nuisance ever since he came here. said the Devil, "Listen! Marie Pigeonnier is
swearing deathless leve to him. On my word, we
ought to segregate the French characters entirely By the way, your regiment came in very handy for Zola's importations."

Zola's importations."

"My regiment?" I said. "How do you mean?"

"You wrote something about the Tyneside Tail
Twisters, just enough to give the outline of the regiment, and of course it came down here—one thousand and eighty strong. I told it off in hollow squares to pen up the Rougon-Macquart series. There they are." I looked and saw the Tyneside Tail Twisters ringing an inferno of struggling, shouting, blaspheming men and women in the control of th ing men and women in the costumes of the Second Empire. Now and again the shadowy ranks brought down their butts on the toes of the crowd inside the square and shrieks of pain followed. "You should have indicated your men more clearly; they are hardly up to their work," said the Devil. "If the Zola tribe increase, I'm afraid I shall have to use up your two companies of the Black Tyrone and two of the Old Regiment" your two companies the Old Regiment."

"I am proud—" I began.
"Go slow," said the Devil. "You won't be half so proud in a little while, and I don't thing much of your regiments anyway. But they are good enough to fight the French. Can you hear Coupeau raving in the left angle of the square? He used to run about the hall seeing pink spaces till the shidsen. about the hall seeing pink snakes till the children's story book characters protested. Come along!"

story book characters protested. Come and Never since Caxton pulled his first proof are need most terrible god the world a new and most terrible god of labor d mortal man such an experience as mine when I followed the Devil of Discontent thru the shifting crowds below the motto of the dome. A few-a crowds below the motto of the dome. A few—a very few—of the faces were of old friends, but there were thousands whom I did not recognize. Men in every conceivable attire and of every possible nationality, deformed by intention or the impotence of creation that could not exceed the impotence of creations. ation that could not create-blind, unclean, heroice mad, sinking under the weight of remorse or with eyes made splendidly by the light of love and fixed endeavor; women fashioned in ignorance and mourning the errors of their creator, life and thought a variance with body and soul; perfect women such as walk rarely upon this earth, and horrors that were women only because they had not sufficient self-control to be flends; little children, fair as the morning, who put their hands into mine and made most innocent confidences; loathsome, lank haired infant saints, curious as to the welfare of my soul, and delightfully mischievous boys generalled by the irrepressible Tom Sawyer, who played amonf murderharlots, professional beauties, nuns, Italian ban-

dits and politicians of state.

The ordered peace of Arthur's court was broke up by the incursions of John Wellington Wells, and Dagonet, the jester, found that his antics drew no Dagoner, the Jester, found that his antics drew no attention so long as the "dealer in magic and spells," taking Tristram's harp, sang patter songs to the Round Table; while a Zulu Impi, headed by Allar Quatermain, wheeled and shouted in sham fight for Quatermain, wheeled and shouted in snam light for the pleasure of Little Lord Fauntleroy. Every century and every type was jumbled in the confusion of one colossal fancy ball where all the characters

were living their parts.

"Aye, look long," said the Devil. "You will never be able to describe it, and the next time you come you won't have the chance. Look long, and look at" Good's passing with a maiden of the Zu-Vendi must have suggested the idea—"look at their legs." I looked and for the second time noticed the lameness that seemed to be almost universal in the Limbo of Lost Endeavor. Brave men and stalwart to all appearance had one leg shorter than the other: some paced a few inches above the floor, never touching it, and others found the greatest difficulty in preserving their feet at all. The stiffness and labored gait of these thousands was pitiful to witness. I was sorry for them. I told the Devil as much.

"H'm," said he reflectively, "that's the world's work. Rather cockeve, ain't it? They do everything but stand on their feet. You could improve the could be could improve the could be them. I suppose?" There was an unpleasant sneer in his tone and I hastened to change the subject.
"I'm tired of walking." I said. "I want to see them, I suppose?" "I'm tired of walking," I said. "I want to see some of my own characters, and go on to the master,

whoever he may be, afterward."

"Reflect," said the Devil. "Are you certain—do you know how many they be?"

"No—but I want to see them. That's what I

Very well. Don't abuse me if you don't like the view. There are one and fifty of your make up to date and—it's rather an appalling thing to be confronted with fifty-one children. However, here's a special favorite of yours. Go and shake hands with

A limp-jointed, staring-eyed doll was hirpling towards me with a strained smile of recognition. I felt that I knew her only too well—if indeed she were felt that I knew her only too well—if indeed she were she. "Keep her off, Devil!" I cried, stepping back. "I never made that!" "She began to weep and she began to cry, Lord ha' mercy on me, this is none of I!" You're very rude to Mrs. Hauksbee, and she wants to speak to yeu." said the Devil. My face must have betrayed my dismay, for the Devil went on soothingly: "That's as she is, remember. I knew you wouldn't like it. Now what will you give if I PAGE SIX

make her as she ought to be? No, I don't want your so'ul, thanks. I have it already, and many others of better quality. Will you, when you write your story, own that I am the best and greatest of all the devils?" The doll was creeping nearer. "Yes," I said hurriedly. "Anything you like. Only I can't stand her in that state."

"You'll have to Than You come not come."

stand her in that state."

"You'll have to when you come next again.
Look! No connection with Jekyll and Hyde!" The
Devil pointed a lean and inky finger toward the doll
and lo! radiant, bewitching, with a smile of dainty
malice, her high heels clicking on the floor like
castanets, advanced Mrs. Hauksbee as I had imagined
her in the beginning.

"Ah!" she said. "You are here so soon? Not

"Ah!" she said. "You are here so soon? Not dead yet? That will come. Meantime a thousand congratulations. And now, what do you think of me?" She put her hands on her hips, revealed a glimpse of the smallest foot in Simla and hummed: "Just look at that * * * just look at this! And then you'll say I'm not amiss."

"She'll use exactly the same words when you meet her next time," sail the Devil warningly. "You dowered her with any amount of vanity, if you left out— Excuse me a minute! I'll setch up the rest of your menageric.", But I was looking at Mrs. Hauksbee.

cut— Excuse me a minute! I'll fetch up the rest of your menageric." But I was looking at Mrs. Hauksbee.

"Well?" she said. "Am I what you expected?" I forgot the Devil and all his works. forgot that this was not the woman I had made, and could only murmur rapturously: "By fove! You are a beauty." Then, incautiously: "And you stand on your feet." "Good heavens!" said Mrs. Hauksbee. "Would you, at my time of life, have me stand on my head?" She folded her arms and looked me up and down. I was grinning imbecilely—the woman was so alive. "Talk." I said absently: "I want to hear you talk." "I am not used to being spoken to like a coolie," she replied. "Never mind," I said. "that may be for outsiders, but I made you and I've a right—"

"You have a right? You made me? My dear sir, if I didn't know that we should bore each other so inextinguishably hereafter I should read you an hour's lecture this instant. You made me! I suppose you will have the audacity to pretend that you understand me—that you ever understood me—Ol, man, man—foolish man! If you only knew!"

"Is that the person who thinks he understands us. Loo?" drawled a voice at her elbow. The Devil had returned with a cloud of witnesses and it was Mrs. Mallowe who was speaking.

"What insolence!" said Mrs. Hauksbee between her teeth. "This isu't a Peteroff drawing room. I haven't the slightest intention of being leveed by this person. Polly, come here and we'll watch the animals go by." She and Mrs. Mallowe stood at my side. I turned crimson with shame, for it is an awful thing to see one's characters in the solid.

I turned to the company and saw that they were men and women, standing upon their feet as folks should stand. Again I forgot the Devil, who stood apart and sneered. From the distant door of entry I could hear the whistle of arriving souls, from the semi-darkness at the end of the hall came the thunderous roar of the furnace of first editions and everywhere the restless crowd of characters muttered and wently like windblower.

derous roar of the furnace of first editions and every-where the restless crowd of characters muttered and rustled like windblows: autumn leaves. But I looked upon my own people and was perfectly content as man could be.

"I have seen you study a new dress with just such an expression of idiotic beatitude," whispered Mrs. Mallowe to Mrs. Hauksbee. "Hush!" said the latter. "He thinks he understands." Then to me: latter. "He thinks he understands." Then to me: "Please trot them out. Eternity is long enough in all conscience, but that is no reason for wasting it. Pro-ceed, or shall I cal! them up? Mrs. Vansuyther. Mr. Boult. Mrs. Boult, Capt. Kurrell and the Major!" The European population in Kashima in the Dosehri hills, the actors in the Wayside Comedy, moved toward me; and I saw with delight that they were human. "So you wrote about us?" said Mrs. Boult. "About my confession to my husband and my hatred of that Vansuythen woman? Did you think that you understood? Are all men such fools?" "That woman is bad form," said Mrs. Hauksbee. "but she speaks the truth. I wonder what these soldiers speaks the truth. I wonder what these soldiers have to say." Gunner Barnabas and Private Shack-

lock stopped, saluted and hoped I would take no offence if they gave it as their opinion that I had not "got them down quite right." I gasped,

A spurred hussar succeeded, his wife on his armit was Capt, Gadsby and Minnie and close behind them swaggered Jack Mafflin, the Brigadier-General in his arms. "Had the cheek to try to describe our life, had you?" said Gadsby carelessly. "Ha-hmm! S'pose he understood, Minnie? Mrs. Gadsby raised her face to her husband and murmured: "I'm sure he didn't, Pip," while Poor Dear Mamma, still in her riding habit, hissed: "I'm sure he didn't understand me." And these also went their way.

One after another they filed by—Trewinnard, the pet of his department; Otis Yeere, lean and lanthorn jawed; Crook O'Neil and Bobby Wick arm in arm; Janki Meah, with blind miner in the Jamahari coal fields; Afzul Kabn, the policeman; the murderous Pathan horsedealer, Durga Dass; the bunnia. Boh Da Thone; the dacoit Dana Da, weaver of false magic; the Leander of the Barhwi ford; Peg Barney drunk as a coot; Mrs. Delville, the dowd; Dinah Shadd, large, red checked and resolute. Simmons, Slane and Losson; Georgie Porgie and his Burmeschelpmate; a shadow in a high collar, who was all that I had ever indicated of the Hawley Boy—the nameless men and women who had trod the Hill of Ilusion and lived in the Tents of Kedar, and last, his Majesty the King.

Each one in passing told me the same tale, and the burden thereof was: "You did not understand." My heart turned sick within me. "Wnere's Wee Willie Winkie?" I shouted. "Little children don't lie."

"'Out of the mouths of babes and sucklings,'" whispered the Devil, who had drawn nearer. "You know the rest of the proverb. Don't look as if you were going to be shot in the morning! Here are the last of your gang."

I turned despairingly to the Three Musketeers, dearest of all my children to me—to Private Mulvaney, Ortheris and Learoyd. Surely the Three would not turn against me as the others had done! I shook hands with Mulvaney. "Terence, how goen? Are you going to make fun of me, too? "'Tis not for me to make fun av you, sorr," said the Irishman, "knowin' as I do know fwat good friends we've been for the matter av three years."

"Savin' your presence, sorr, an' it's more than onwillin' I am to be hurtin' you; you did not ondersthand. On my sowi an' honour, sorr, you did not ondersthand. Come along, you two."

But Ortheris stayed for a moment to whisper:

Ere I could seek an explanation he had joined his companions.

companions.

"For a private soldier, a singularly shrewd man," said Mrs. Hauksbee, and she repeated Ortherls' words. The last drop filled my cup and I are ashamed to say that I bade her be quiet in a wholly unjustifiable tone. I was rewarded by what would have been a notable lecture on propriety, had I not said to the Devil: "Change that woman to a d—d doll again! Change 'em all back as they were—as they are. I'm sick of them."

"Poor wretch!" said the Devil of Discontant years.

"Poor wretch!" said the Devil of Discontent very quietly. "They are changed."

The reproof died on Mrs. Hauksbee's lips and she moved away marionette fashion, Mrs. Mallowe trail-

Ing after her. I hastened after the remainder of the characters and they were changed indeed—even as the Devil had said, who kept at my side.

They limped and stuttered and staggered and mouthed and staggered round me, till I could endure

So I am the macter of this idiotic puppet sh "So I am the master of this idiotic puppet show, am I?" I said bitterly, watching Mulvaney trying to come to attention by spasms.

"In saecula saeculorum," said the Devil, bowing his head; "and you reedn't kick, my dear fellow, because they will concern no one but yourself by the time you whistle up to the door. Stop reviling me and uncover. Here's the master!"

Uncover! I would have dropped on my knees had not the Devil prevented me, at sight of the portly form of Maitre Francois Rabelais, some time Cure of Meudon. He were a smoke stained approp of the

form of Maitre Francois Rabelais, some time Cure of Meudon. He wore a smoke stained apron of the colors of Gargantua. I made a sign which was duly returned. "An Entered Apprentice in difficulties with his rough ashlar, Worshipful Sir," explained the Devil. I was too angry to speak.

Said the master, rubbing his chin: "Are those things yours?" "Even so, Worshipful Sir," I muttered, praying inwardly that the characters would at least keep quiet while the master was near. He touched one or two thoughtfully, put his hand upon my shoulder and started: "By the Great Bells of Notre Dame, you are in the flesh—the warm flesh!—the flesh I quitted so long—ah, so long! And you fret and behave unseemly because of these shadows. Listen now! I, even I, would give my Three Panurge, Gargantua and Pantagruel, for one little hour of the life that is in you. And I am the master!

But the words gave me no comfort. I could hear But the words gave me no comfort. I could hear Mrs. Mallowe's joints cracking—or it might have been

mrs. Mallowe's joints cracking—or it might have been merely her stays.

"Worshipful Sir, he will not believe that." said the Devil. "Who live by shadows lust for shadows. Tell him something more to his need."

The master grunted contemptuously: "And he is flesh and blood! Know this, then. The First Law is to make, them stand upon their feet, and the Second is to make them stand upon their feet, and the Third is to make them stand upon their feet, and the Third is to make them stand upon their feet. But, for all that, Traian is a fisher of frogs." He passed on, and I could hear him say to himself: "One hour—one minute—of life in the flesh and I would sell the Great Perhaps thrice over!"

"Well." said the Devil, "you've made the master angry, seen about all there is to be seen, except the Furnace of First Edition, and, as the master is in charge of that, I should avoid it. Now you'd better go. You know what you ought to do?"

"I don't need all Hell.—"

"Pardon me. Better men than you have called this Paradise."

"All Hell, I said, and the master to tell me what "All Heil, I said, and the master to tell me what I knew before. What I want to know is how?" "Go and find out." said the Devil. We turned to the door, and I was aware that my characters had grouped themselves at the exit. "They are going to give you an ovation. Think o' that, now!" said the Devil. I shuddered and dropped my eyes white one and fifty voices broke into a wailing song, whereof the words, so far as I recollect ran:

But we brought forth and reared in hours Of change, alarm, surprise. What shelter to grow ripe is ours— What leisure to grow wise?

I ran the gauntlet, narrowly missed collision with an impetuous soul (I hoped he liked his characters when he met them), and flung free into the night, where I should have knocked my head against the stars. But the Devil caught me.

"I really do not know what you mean," the woman replied, coldly; "but if you will come inside I will talk to you in the drawing-room." Quest, as the stumbling agains the front door, had it now wide open, and in the moment the hall seemed full. The woman shrieked. The butler suddenly sprang upon the last man to enter and sent him

sprang upon the last man to enter and sent his spinning down the steps. Almost at that instant there was a scream from upstairs. Quest took a running jump and went up the stairs four at a time. The butler, who so far had defied arrest, suddenly snatched the revolver from Hardaway's hand and fired blindly in front of him, missing Quest only by an inch or two.

"Don't be a fool, Karl!" the woman called out.
"The game's up. Take it quietly." 3.

Once more the shriek rang thru the house. Quest rushed to the door of the room from whence it came, tried the handle and found it locked. He ran back a little way and charged it. From inside he could hear a turmoil of voices. White with age and passion, he pushed and kicked madly. There was the sound of a shot from inside, a bullet came thru the door within an inch of his head, then the crash of broken crockery and a man's groan. With a final effort Quest dashed the door in and staggered into the room. Lenora was standing in the far corner the front of her dress torn and blood upon her lips. She held a revolver in her hand and was covering a man whose head and hands were bleeding. Around Once more the shriek rang thru the house. Quest man whose head and hands were bleeding. Around him were the debris of a broken jug.

"Mr. Quest!" she screamed. "Don't go near him "I've got him covered. I'm all right."

Quest drew a long breath. The man who stood glaring at him was well dressed and still young. He was unarmed, however, and Quest secured him in a

"The girl's mad!" he said, sullenly. "No on; anted to do her any harm."

Hardaway and his men came trooping up the airs. Quest relinquished his prisoner and went over to Lenora.

"I've been so frightened," she sobbed. "They got me in here—they told me that this was the street in which my aunt lived—and they wouldn't let me go.
The woman was horrible. And this afternoon this
man came. The brute!"
"He hasn't hurt you?" Quest demanded, fiercely, he passed his arm around her.

She shook her head.

"He would never have done that," she murmured
"I had my hatpin in my gown and I should have
killed myself first."

Quest turned to Hardaway. "I'll take the young lady away." he said. "You know where to find us." Hardaway nodded and Quest supported Lenora down the stairs and into the taxicab, which was still waiting. She leaned back and he passed his arm

around her. "Are you faint?" he asked, anxiously, as they drove toward the hotel. "A little," she admitted, "not very. But, oh! I so thankful—so thankful!" He leaned a little nearer towards her. She looked him wonderingly. Suddenly the cotor flushed into her cheeks.

"I couldn't have done without you, Lenora," he whispered, as he kissed her. whispered, as he kissed her.

Lenora had almost recovered when they reached the hotel. Walking up and down they found the professor. His face, as he came towards them, was almost pitiful. He scarcely noticed Lenora's deshabille, which was in a measure concealed by the cloak which Quest had thrown around her.

"My friend!" he exclaimed—"Mr. Quest! It is the devil incarnate against whom we fight!"

"What do you me:n?" Quest demanded

"What do you meen?" Quest demanded. The professor wrung his hands. "I put him in our James II. prison," he declared.
"Why should I think of the secret passage? No

Quest's arm tightened for a moment in Lenora's. It was curious how he seemed to have lost at that moment all sense of proportion. Lenora was safe

* * the relief of that one thought overshadowed everything else in the world. "The fellow can't get far," he muttered.

"Who knows?" the professor replied, dolefully.
"The passage—I'll show it to you some day and you'll see how wonderful his escape has been—leads on to the first floor of the house. He must have got into my dressing room, for his old clothes are there and he went away in a suit of mine. No one has seen him or knows anything about him. All that the local police can find out is that a man answering something like his description caught the morning train for Southampton from Hamblin roads."

They had been standing together in a little re-cess of the hall. Suddenly Lenora, whose face was turned toward the entrance doors, gave a little cry. She took a quick step forward.
"Laura!" she exclaimed, wonderingly. "Why, it's Laura!'

They all turned around. A young woman had just entered the hotel, followed by a porter carrying some luggage. Her arm was in a sling and there was a bandage around her forehead. She walked, too, with the help of a stick. She recognized them at once and waved it gaily. "Hullo, you people!" she cried. "Soon run you to

They were for a moment dumfounded. Lenora was the first to find words. "But when did you start, Laura?" she asked. "I thought you were too ill to move for weeks."

The girl smiled contemptuously.

"I left three days after you, on the Frederic," she replied. "There was some trouble at Plymouth, and we came into Southampton early this morning, and here I am. Say, before we go any further, tell me about Craig." "We've had him," Quest confessed, "and lost him again. He escaped last night."
"Where from?" Laura asked.

"Hamblin house." "Say, is that anywhere near the south coast?" the girl demanded excitedly. 'It's not far away," Quest replied, quickly. "Why

"I'll tell you why," Laura explained. "I was as sure of it as anyone could be. Craig passed me in Southampton water this morning, being rowed out to a steamer. Not only that, but he recognized me. saw him draw back and hide his face, but somehow I couldn't believe that it was really he. I was just coming down the gangway and I nearly fell into the sea, I was so surprised." Quest was already turning over the pages of a

"What was the steamer?" he demanded.
"I found out," Laura told him. "I tell you, I was so sure of it's being Craig that I made no end of inquiries. It was the Barton, bound for India, first stop Port Said." When does she sail?" Quest asked.

"Tonight-somewhere about seven," Laura replied. Quest glanced at the clock and threw down the He turned toward the door. They all "I'm for Southampton," he announced. "I'm going

"Tm for Southampton," he announced. "I'm going to try to get on board that steamer before she sails. Lenora, you'd better go upstairs and lie down. They'll give you a room here. Don't you stir out till I come back. Professor, what about you?"

"I shall accompany you." the professor declared. "The discomforts of traveling without luggage are nothing compared with the importance of discovering this human fiend."

"Tuggage_nshaw!" Laure explained to the sail of "Luggage—pshaw!" Laura exclaimed, cares about that?" "Who

"And nothing," Lenora declared, firmly, as she caught at Quest's arm, "would keep me away."

"I'll telephone to Scotland Yard, in case they care to send a man down," Quest decided. "We must remember, tho," he reminded them, "that it will very likely be a wild-goose chase,"

"It won't be the first," Laura observed grimly, "but Craig's on board that ship all right."

They caught a train to Southampton, where they were joined by a man from Scotland Yard. The little party drove as quickly as possible to the docks.
"Where does the Barton start from?" asked the piermaster.

The man pointed out a little way down the

"She's not in dock sir," he said. "She's lying out yonder. You'll barely catch her, I'm afraid," he added, glancing at the clock. They hurried to the edge of the quay.

"Look here," Quest cried, raising his voice, "I'll give a ten-pound not to anyone who gets me out to the Barton before she sails."

The little party were almost thrown into a tug, and in a few research.

The little party were almost thrown into a tug, and in a few minutes they were skimming across the smooth water. Just as they reached the steamer, however, she began to move.

"Run up alongside," Quest ordered.

"She won't stop, sir," the captain of the tug replied, doubtfully. "She is an hour late, as it is."

"Do as I tell you," Quest insisted.

They raced along by the side of the great steamer. An officer came to the rail and shouted down to them:

"What do you want?"
"The captain," Quest replied. captain came down from the bridge, where he had been conferring with the pilot. "Keep away from the side there," he shouted. "Who are you?

We are in search of a desperate criminal whom we believe to be on board your steamer," Quest ex-plained. "Please take us on board." The captain shook his head.
"Are you from Scotland Yard?" he asked. "Have you got your warrant?"

are from America," Quest answered, "but we've got a Scotland Yard man with us and a war-rant, right enough."

"Any extradition papers?"

"No time to get them yet," Quest replied, "but the man's wanted for murder."

"Are you from the New York police?" Quest shook his head.
"I am a private detective," he announced. "I am

working in conjunction with the New York police. The captain shook his head. "I am over an hour late," he said, "and it's costing me fifty pounds a minute. If I take you on board, you'll have to come right along with me, un less you find the fellow before we've left your behind."

Quest turned around.

"Will you risk it?" he asked.

"Yes!" they all replied.

"We're coming, captain," Quest decided.

A rope ladder was let down. The steamer began "Can you girls manage it?" Quest asked, doubt-

"I should say so," she replied. "I can go up that with only one arm. You watch me!"

They cheered her on board the steamer as she hobbled up. The others followed. The tug, the crew of which had been already well paid, raced along by the side. The captain spoke once more to the pilot and came down from the bridge.

"I'm forced to go full speed ahead to cross the bar," he told Quest. "I'm sorry, but the tide's just on the turn."

They looked at one another a little blankly. The professor, however, beamed upon them all.
"I have always understood," he said, "that Pert Said is a most interesting place."

Refore I left England I was keeping company with a young man seven years older than myself. I had been going out with him for seven months, I told him of my going abroad, and he said he would keep up his correspondence with me. So I wrote a letter the first week here, and I know he got it, as a friend told me so. But he did not send a re-

know he got it, as a friend told me so. But he did not send a reply back, until lately.

I got a letter on the 30th of December, saying he was sorry for his long silence, and asking me to write frequently, as he often thought of the good times we had. He asked me if I ever thought of returning to him. As I have still the same love for him, would you advise me what to do, write or keep quiet? I don't think I could settle down with any other young man.

WHY DON'T you write to him, now and them "Blue Eyes?"
And too, why not make friends right here at the same time—
it's such a good thing to have friends near at hand, and yet we can be faithful to the old ones too. to the old ones too.

Annie Lauire.

DEAR ANNIE LAURIE: I am only sixteen, but while at my summer home last year I met my summer home last year I met a very interesting young man. We were great friends all summer, but he was many years my senior, while I was only a child. He was very fond of me, and sometimes patted my hair—well at last he went away, and told me to write to him. I did, and he answered. He told me to write again, and I did, but I never got an answer. What could have happened? He was so friendly the last time.

Oh! Annie Laurie, please advise me. I have many boy friends, but none I ever cared for, only him Priscilla M.

Y DEAR Priscilla M., altho it scemed a terrible tragedy to you when you wrote to me, even now it may not seem so full of sorrow to you—life changes as quickly as that, my dear. You are very young and I wouldn't think so much about and I wouldn't think so much about the boys for years and years to come, if I were you. Write him just one more letter, if you wish, and if he doesn't answer it then you will know that he has really changed. some day.

Annie Laurie.

DEAR ANNIE LAURIE: I am a girl of 26 years, and I am deeply in love with a married man, and he says he dearly loves me too. I have met several nice young fellows, but they don't seem pay any attention to me. How is it that it is always a married man that seems to like me best? Do you think I ought to give him up, and try and get a single man? He tells mehe does not like his wife and that I am the only girl he loves. Do you think he really loves me? Annie Laurie,

DEAR ANNIE LAURIE: I am about twenty years old. and ann deeply in love with a young man about the same age I have been keeping company with him now for about a year. He has always been very good to me until lately. During the last two weeks he has disappointed me several times by breaking his promise to call on me on certain evenings. He says he has to work, but I think that he must have another girl, and that he is breaking these engagements with me to see if I will get angry with him and will not let him call on me any more. However, I have never given him any hint regarding this matter. He is very polite, and a real gentleman. Dear Annie Laurie, advise me what to do. Shall I tell him my little

DEAR ANNIE LAURIE:
I am a girl of eighteen Is am engaged to a man who seems to think a lot of me, and gives me very beautiful presents. I also think a lot of him. There is one thing that is worrying me, and that is altho we are engaged to be married he has never told me that he loves me. But still he is very good and dear to me

i have asked him if he really loves me, but always seems to put me off when I mention it to him. What would you advise me to do? He is very jealous of me, and does not wish me to talk to any other fellows. He wants me to ignore them. I have been asked many times to go out, by other boys, but I do not know what to do: Do you think it would be improper for me to do so?

THE TORONTO SUNDAY WORLD

DEAR ANNIE LAURIE:

NE WHO Wishes to Be a True Friend," you have done your part, and I hope you will always, all thru life. The really True Friend often has heartache as the only recompense for self sacrifice and self forgetting, but, oh, how much better than the regrets of the selfish ones of this world. You'll find friends who will be true to you, too, I know.

DEAR ANNIE LAURIE: I am nineteen years of age, and am deeply in love with a young

man of twenty-two, who has asked me to marry him.

My friends all like my lover, but I have decided to keep my engagement a secret for some time. Now, do you think I am doing right by my friends, especially by my mother—whom I love dearly, and whom I have never kept any secrets from before? Also, is it right that I should visit at my lover's home, as he is very anxious for me to do so?

Valentine.

Valentine.

ALENTINE, you're quite right
about not keeping and right about not keeping anything a secret from your mother—tell her all about it and she'll help you not to tell any one else for a while Annie Laurie.

DEAR ANNIE LAURIE: I am in my first year in medi-cine. It is the wish of my relatives, who are helping with the finances, that I obtain a degree

and use it.

Lately I have been asked by a young man in a different profession, whom I have known for a long white, to marry him. I cannot ask him to wait six or seven years, and I love him dearly. What shall I do?

"Hen. Med." TEN. MED," can the young man support you independently of your family? If he cannot, you might better get a profession of your own. Perhaps, if you talked it all over wish your parents they would think it best for you to marry, and give up the profession—any way, their advice would be full of,love and helpfulness, don't you think so? OODNESS me, my dear Alf, what a terrible predicament you must be in and how hard must be your plight if you are filled with such great sadness and "agony!" At eighteen it isn't necessary to choose one's life partner, it is even a bit foolish to tie one's self down to just one girl, don't you really think so? Why can't all you boys and girls have good happy times all together without thoughts of love intruding themselves upon you?

Annie Laurie.

DEAR ANNIE LAURIE:

I am eighteen years of age and sorry to say, I am not burdened with fatal beauty. I went with a girl last summer, thirteen years of age, and had a very good time, but thought she was too young and I stopped. I am going with a girl about my own age of whom I think a great deal. The former girl has written me many times and I have not answered. Should I be true to the one I prefer and inform the other one that the tide of my affections has changed?

Raymond.

Raymond.

Why is it necessary, my dear Raymond, to take and write only of love to the girls who are your friends? You are only eighteen years of age and your friend of last summer but thirteen—don't you realize that she is too young to be troubled with thoughts of love and that you, yourself, are too young to worry about such serious problems for many years to come? Why can't you have both for very good friends and leave the problems of love for the days that are to come?

Annie Laurie.

DEAR ANNIE LAURIE:

I am a young bachelor and am at present keeping company with a very pretty young girl. I know I love her, but every Sunday she wants to take me to church with her and also on certain evenings during the week. This I do not like as I do not belong to her church and it is the only thing that we disagree on. I think she loves me but I know that she corresponds with another boy. I have been disappointed in boye twice, like this, so I wish you would advise me which is best to do—go to war or ask her to marry me. A Boy in Khaki—just say to your boy friend, "We'll give each other 'a fair field and no favor," and may the best man win." But, perhaps it would be better for you both to wait until after you come back from the war before you speak of love to the girl you are to leave the hind you. If your

DON'T think church would do you any harm, my dear boy—who wants to know whether to go to war or to propose to the girl whom he claims to love. Why should you object if she corresponds with another boy? You are not engaged to her and, therefore, you have no right to object. If you love her with all your heart why don't you ask her to marry you? Your problem will be solved quickly enough then, never fear.

Annie Laurie. We are two soldier boys down here at Exhibition camp, and not could make friends with any young ladies. We have no friends in this city, so it makes it very miserable for us without any friends. So, dear Annie Laurie, do your best to help us.

Corporais.

DEAR ANNIE LAURIE: I am a young man of twenty-two and I am engaged to a girl of twenty-six. She wants me to marry her, but I want to know if she really and truly loves me, she really and truly loves me, because sometimes when we are out together she seems to talk about other fellows with whom she has been. Do you think that a girl who has been out with so many fellows can fall in love? We have been engaged only six weeks but we have been going together about one year. How can I find out whether she loves me as she says she does?

Anxious.

P. S.:—Do you think that her age would make any difference? Do you think that she is too old for me?

F you really and truly love each other the four years difference in your ages may mean nothing at all in your happiness—but you must be very sure that you really and truly love her with all your heart before you marry. How am I to tell you whether she loves you on not when you have given me no data by which to judge? The fact that she has known so many other men may simply have made her like you all the more. But comething in your letter more. But, something in your letter tells me that you had better wait and make sure whether you really do love her before you speak of marriage to

Gooseberry.

Gooseberry, you certainly have chosen a very appropriate name in "Goose" anyway—don't you think you are just a wee bit of a goose to permit any man, whether he is a soldier or net, to treat you as he does? metaphorically—but I want to get the woman's point of view on a question.

Consider yourself engaged to a man who, by force of circumstances is living a thousand miles or so away, in a city where he is a comparative stranger. He is of mature age and supposedly of sound Judgment, and so are you. As is proper, you love him and have the usual reason for believing that he loves you. In writing he has told you of several occasions on which he took a girl to the rink or a dance, and merely mentioned the fact that she was a nice girl. Of course he also mentioned the fact that he would rather it had been you he had taken. Now, under these circumstances would you, from the feminine point of view, consider that you had the right to be just the least bit jealous? In other words, is it proper for a man to take another girl out just for company, when he is unable to take the girl he loves and is engaged to?

Puzzled.

VERY LIKELY, my dear Puzzled, she will think, as I do, that she has the right to be just a little bit jealous—still her common sense will tell her that it is just your honesty which makes you write her of this girl—you know, you might be coing it just the same the you never wrote and told her. Therefore, she is likely to take the common sense view of it and hug that to her heart, feeling grateful that you are honest—aithe she cannot conquer or hide the jealousy which is only natural in the heart of the woman who loves.

Annie Laurie.

DEAR ANNIE LAURIE : I am a boy of seventeen years. For a year I have been going with a young lady younger than myself. My parents object, first, because they do not consider the young lady's family at all our equal, and second, they do not consider me old enough to have serious intentions, and think I should not go so long with any should not go so long with any one. My parents are good Christian people and well to do, and I have always found it easy to obey, except in this matter.

T IS very hard, isn't it, my dear Obedient to obey in this matter in which your heart is so wrapt up? Why don't you have a good long talk with your mether and father and tell them that you are willing to wait many years until you really are old enough to get married, but in the meantime you would like to see the gir! you love once in a while? Very probably they will be glad to give their consent to your seeing her once in a while because you have agreed not to do anything silly or rash until you really are old enough to guide your life and make your future for yourself.

Athens, Ont. DEAR ANNIE LAURIE : I am a young man, nineteen years of age, fairly good looking, and have black hair and blue eyes. For some time past I have been trying to get a girl, one in partilar, as there are several whom I know would receive me favor-ably, while the other girl, when I speak to her about going driv-ing or to any entertainment, al-ways laughs und tells me to take some one else as she is not going -while any of the other garls al-ways go and seem to be glad of

the chance-New, dear Annie Laurie, how am I going to win her favor? Garfield.

THE ONLY way to win the favor of any girl, my dear Garfield, is to be just as kindly, good natured and thoughtful of her wishes as you possibly can be. Don't pursue her so relentlessly—give her a chance to miss you, and wish that she could see you once in a while—then she will want to see you, and will welcome you gladly the very next time you ask her to go anywhere. In other words, tease her just the way other words, teasing you.

Annie Laurie-

DEAR ANNIE LAURIE: I am 24 years of age and in love with a young lady of 23. Altho I pay her all possible attention and bestow upon her all courtesies, she seems to elight me on every occasion. We have grown up together, and as far back as I can remember I have always loved her.

I have seriously considered the matter, and as cooly as possible under the circumstances. My conclusion is that I shall never be able to love another as I love her. I do not possess good looks which most of her admirers have, nor am I considered a good mixer. Knowing her, therefore, I have about given up hope of ever winning her affection. What is your advice?

An Intended V. S.

WHICH one do you love the best?
Have you spoken of marriage to the girl who wants to marry you today? For the sake of the girl out west I am inclined to advise you to marry the one nearest home. Don't you feel that you owe something to your flancee? Why down deep in your heart what do you think of it all, yourself?

Just sit down all alone in your own room where you will not be disturbed for one whole hour—bring yourself and your love for these two girls before the bar of your own judgment and solve your problem for yourself.

Annie Laurie.

"Amore."

WELL, "Amore." I would not let her slight me—perhaps it's because you enough that she respect you enough that she respect you. I'd have a plain talk with her, and let her see that I was not only courteous and generous, but brave as well, and I'd have her understand that she'd either got to be my friend or my foe—that I would not stand any nonsense about that If she cares for you, really, she will say so then, and it will be like a thunder shower—the atmosphere will be cleared.

Directed By C. A. Macphie --- ADVENTURES OF THE TWINS AND GOOD, KIND, DEAR DOG MUTT ---IOHN GOES TO THE PARK AND WHAT HAPPENS.

> One day young Johnny said to Tom: "I'm going to the park,
> To sail my boat and perhaps to fish;
> "Twill be a dandy lark."

"Well!" Tommy said, "now John, look out! Don't pick a flower there; For if you do I'll tell you true, You'd better just beware."

And Johnny answered: "Bosh! SHUT UP! I never said I would." Then off he walked, with shoulders back, As any GOOD boy should.

He reached the park and sailed his boat,
Then as he looked around—
Just back of him a flower tall, Was planted in the ground.

"It's full of blossoms, yes it is; If one I pulled just so And took it home to my dear Ma, They'd never miss it, No."

And that is just what Johnny did; He pulled that flower, my! To think of what might happen next Would make you scream and cry.

Then dearie me! Look! Look! Oh! Oh! A big police man, say!

Just at that moment spied young John Before he got away.

Then puff! Puff! Gallop! Run! Run! Run! He races after John, Ah! Nearer, nearer, NEARER still; You'd say THIS time he's gone.

Poor Pa comes running in the gates, He waves his arms and cries: "He only came to sail his boat, My sakes, where are your eyes?"

Well! Mutt, good dog, was there of course, And great was his distress; He showed more brains than Pa or all, I really must confess.

For when he saw John's jail-ward flight, He first looked 'round, my dear, Then spied a newsboy standing by And galloped over there.

He grabbed a paper, yes he did,
Such head lines big and bright!
In letters red it told about: "A MOST TERRIFIC FIGHT."

With this he galloped—Me! Oh! My!
As fast as he could run, Right at that big policeman, yes, "Ho! Ho!" you'd yell. "What fun!"

He waves that paper to and fro, With head lines big and red, Policeman looks from it to John, Then STOPS to scratch his head.

THAT was enough, he saw the lines: "A MOST TERRIFIC FIGHT."-He grabs that paper, DOWN HE SITS, He can't believe his sight.

Well! That is all, poor John was saved; But this, I'll have you know. NEXT TIME HE LEFT THOSE FLOWERS THERE: 'Twas odd but it was so:

Dear Smilers:

I am writing for a Smiling Face button again, as I simply can't do without one. I have hunted the house over for mine and cannot find it. Seems as if I don't SMILE so much as if I had a little button to look at, with a happy, Smiling Face on it. I am roing to send in a story when I have racked my brain for something to write about. I am 12 years old, and enjoy the Smiling Face Club Page so much. I read it every Sunday, and like the verses about John and Mutt very much. I do not see any drawings any more. They used to interest me a lot. I wish some boy or girl with a love for drawing would draw for the Page. I like to draw, myself, but goodness such absolutely awful drawings do I make. Well, never mind I like to see drawings just the same. I intend to SMILE a great deal more if you send me that button. Hoping to receive it. I must close.

Want "Respectable" Position Finds it Easier Now to Get Work.

FACTORY GIRLS IN BIG DEMAND

BY D. K. BILLINGS. AOPHESIES that the winter of 1915 would be the hardest ever PROPHESIES that the winter of 1915 would be the hardest ever experienced in Canada seemed last fall to be well founded. Labor leaders were rampant over the prospects of a workless season with thousands of starving laborers and mechanics on their hands. The sudden abandonment of building operations that before the war were showing signs of being revived, to a considerable extent, meant that many hundreds of men were standing around idle. Office staffs were cut down in every direction, hundreds of railroad men were thrown out of employment, even the Toronto Railway Company announced a falling off in its receipts, and expressed a desire to make a cut in its service. Whitewear and millinery factories literally threw their girl employees out on the street, while the big stores put hundreds of little blue slips into the envelopes of their shop girls and salesmen. In short, there was a general upheaval in the labor market and for several months it looked as if the glut of superfluous labor would remain.

Looking back upon the rest winter.

the glut of superfluous labor would remain.

Looking back upon the past winter, however, we find a very different picture from what might have been expected. True, quite true, building operations were at a standstill. Public works were not pushed to any great extent and yet the mass of unemployed, as reported by the civic employment bureau and various charitable organizations, was not nearly as large as the previous winter. Enlisted men most certainly acounted for part of this decrease, but not all.

With spring still another condition arrived. The ranks of the unemployed began to melt. Bricklayers, carpenters, plasterers, plumbers, excavators, were nearly all working, but where? There seemed to be no increase in building. The "want ad" columns carried many advertisements asking for operators in every line of whitewar and millineary and several

large manufacturers said that they could not get girls of any kind to all their spring orders, which came in with a rush after the depletion of the stocks caused by the curtailment of autumn expense cutting in all big businesses, of course, was maintained, for in many instances, there has been much cutting in prices in order to keep up the volume of business, but this has not brought the output up to last

Few "Respectable" Jobs As the war has shown itself capable of changing nations it is equally adept at changing carpenters, and plumbers and bricklayers, and whitewear operators; and also accountants and shop clerks and other members of the white collar brigade. A certain young fellow in Toronto, spent seven weary months after the war broke out, try-ing to get a "respectable" job. His previous situation in a broker's office came defunct at the outbreak of hos-tilities, and Johnny set out to obtain regular employment. He wore out one pair, then two pairs of shoes, in his efforts to obtain the privilege of arriv-ing at any office at nine a, m. and sit-ting in a white collar and with his hair brushed, in front of a nice, big, red lined book until five p.m. At length he gave up in despair and, driven frantic by the verbose threats of his landlady, he decided at length to take drastic steps. Four hours later came defunct at the outbreak of hosto take drastic steps. Four hours later he had his sleeves rolled up and was with all haste destroying the white softness of his dainty fingers heaving boxes as shipper for a big food concern. His salary was equal to that which he received at the broker's office but it was with a nervous glance fice but it was with a nervous glance that he recognized his friends in his new role. He had been changed, perhaps permanently changed, and the war had done it. He was but one of many hundred members of same Arrow brand that had gone thru the remodelling after many months of stubborn and painful resistance. The white collar brigade has been victoriously diminished

A visit to a large foundry and ma-chine shop that in normal times em-ployed some 300 men, was rather interesting for hardly within the doors I met a carpenter friend who had for months been more or less on the borders of unemployment. He was weighing shrapnel with a dexterity that suggested a veteran, while anr well known member of same union was keeping his family by operating a finishing lathe.

Have Ye Mothered a Man?

This is strong poetry, and it's appeal to the brave hearted women of England is known to be great. It equally grips strong men, for many copies are to be found in officers' quarters on the fring line. This copy was sent to his father in Toronto by one of the lieutenants in the Second Battalion But Man Who Doesn't with the comment that the women of Canada might like to read it.

CAN hear the beat of a million feet
In England's sea girt isle,
And the rhymthic tread makes my blood run red
In spite of our foeman's guile.
A million men from hill and glen,
From city, forge and farma,
Are mustering fast to the bugle's blast
And they shout, "To Arms! To Arms!"
Proudly they come without tuck of drum,
Steadily and stern and strong.
Lords of the soil and stout sons of toil
To right a nation's wrong.
They come to fight in the cause of right;
To fight, and if need be die,

To fight, and if need be die, To keep our name from the taint of shame And blazon it on the sky. Oh, women who love them bow your heads, Thank God for the gift he gave.

Your breasts have suckled a lion's brood. The bravest of the brave. No hireling host with braggart boast Of mastery of the world,
True sons of peace when war shall cease
And their battle flag is furled. Terrible now, they have sworn a vow To avenge their murdered kin; The world shall know wherever they go They will fight to the death or win. They have heard the cry that rose on high,
When gallant Belgium fell,
And the German flood in a sea of blood
Made women's life a hell. With knitted brows they left their ploughs,

They swarmed from our factories then They marched to the fight with bayonets bright, To avenge or die like men.

The sword of France, or the English lance,
Flashed bright in the summer's sun.

And side by side in their matchless pride, They will fight till this war is won.

Oh, women of England, rich or poor, Hold high your heads with pride, For your sons are the manifest men among men, To be found in the whole world wide.

For honor they fight and the cause of right, Not for fame or paltry pay. They're a nation's best, not a man was pressed, In all that great array. They bared the steel that the foe might feel A free born people's wrath. Like the Vikings bold of the days of old They rose and sallied forth. Thru the blistering days of summer blaze, Thru nights of frost and snow, They have fought like men and will again Where'er they are bidden to go. They will never rest till the steel is pressed Oh, Mothers of England, have ye none

Lads of the good old breed, this is our hour of need, Your country calls you now. Upon your feet and say, "England, I'm yours today!" Swear it and keep the vow.

Think of the brutal host, think of our own East Coast

Who will aid them in the fray?

No gallant who will join the ranks To help them win the day?

Where women's blood ran red! Lads, must I ask again? Lads, shall I ask in vain? Will you avenge our dead? Think of that bitter hour when German lust of power

Wrought murder grim and great. Out of the sea they came, bent on a deed of shame, Silent and sure as fate. Skulking in craven fear lest our brave tars be near

They wrought their evil will. They dared not face our men, but they will come again To ravish and to kill. Think of each baby face in its cold resting place,

Hard by the whispering sea. Children by England bred now sleeping with the dead, Butchered while playing at each mother's knee. Lads, must I ask again? Lads, must I ask in vain, Will you avenge our dead?

Women of England, mothers and wives, I know how your hearts will ache; You have worn the crown, you must tear the cross, Tho some of your hearts will break. Mothers and wives, ye have worn the crown Greater than men can wear.

Oh, women, the will of the Gods be bard. Heavy as death is the cross to bear, You must give your sons to the moloch of war Tho your hearts forever will ache. The ripened fruit of the cradle days You must send to the front for your honor's sake.

Some will go down in the bitter strife, Some will return no more. Oh, women, the will of the Gods be hard. 'Tis the aftermath of war.

But your sons must fight lest ye be shamed By the women defiling foe. Your honor is dearer to them than liee. Mothers, you must let your strong sons go; They will fight for you, ye will pray for them, As ye prayed in the cradle days. The Gods have given this cross to bear,

Ye cannot fathom their ways. Kiss them, fondle them, send them forth To stand in the battle's van. Then lift your eyes to the star lit skies, And thank God you have mothered a man.

busy and they have, notwithstanding their claims of destroyed foreign markets, managed to keep almost normal complements of men working union time.

Demand for Factory Girls

Girls come next, as a little change they are given second place. Why does an "Ad" for an operator, do-mestic or drespreters by mestic or dressmaker not meet with success, except to bring to the adver-tiser a hopeless asortment of unsuit-able young girls or women? Let us look to the war again. A short visit to any of the large tailoring concerns

Promises for a whopper crop in turned loose were snatched up and Ontario as well as the west has kept put to work, while whitewear firms the implement and iron men fairly that allowed their stocks to run down are now advertising for girls to fill spring and summer orders. Hund dreds of domestic servants in Toronto have also taken work in factories as inexperienced help, desiring the greater liberties of a factory girl. A thousand and one things, both directly and indirectly connected with the war, are being made in Canada, while the special "Made In Canada campaign has considerably decreased the paign has considerably decreased the importation of many lines of goods from across the border.

The whole surface of the employers' activities have been changed and the builder and job carpenter who practically lost his business when war to any of the large tailoring concerns in either Toronto or Montreal will be sufficient answer for most. As fast as khaki cloth and khaki twill can be turned out by the ills, thousands of operators are busy, in some factories day and night, turning it into uniforms and shirts. As soon as the mean meagre menus and said to plaster with Canadian firms in addition to those already given by our own government, the operators that had been general phase of the labor question has been altered during the past winter as never before. Men have been and the past winter as never before. Men have been forced to abandon their life trade for another almost totally different. Big firms, demoralized by the condition of trade, have branched into new lines which has meant that the employes have been compelled to follow. It will be interesting to note how these thousands will view a return to their old vocations when an absence of war gives the high sign.

BILLY SUNDAY GETS LOTS OF CHANCES TO SELL HIS NAME

Receives Innumerable Offers for Use of His "Mug" on Soap and His "O.K." on Clothes and Real Estate.

200 LETTERS DAILY THROWN INTO BASKET

FROM becoming the head of organizations to found new towns; to financing the wedding trousseau of brides-to-be; from buying ranches for poor, but honest, western cowboys; to providing equally large orange farms in California for ladies who wish "to worship God while the birds are singing merrily,"—these are the requests which pour in on Evangelist Billy Sunday every strenuous day of the baseball preacher's life.

Added to that are countless requests for his endorsement on new brands of soap, requests that he accept suits of clothes (with merely the payment of a signed note telling of their excellence), and prayers that he put his O. K. stamp on the stories with which budding literary lights would extract hard coin from magazine publishers.

But Billy Sunday, altho he gives away 10 per cent. of his enormous income, is not easily taken in. Not one of a thousand requests are considered further and his secretary, D. B. Ackley, tosses them into the overflowing waste paper basket. And a request, to be granted, has to meet with the approval of Mrs. Sunday. Billy gives "Ma" Sunday all the credit.

"'Ma's' by balance wheel," he said proudly. "She's my business manager. I won't sign anything, agree to anything, take anything for granted or give verbal countenance to anything unless 'Ma' has vised it and recommended action."

One man, who wanted a little matter of \$6000 to finance a real estate deal, said he and 'tis family would pray that the Paterson effort meet with failure if the money was not forthcoming. But even this direful threat didn't move the evangelist.

"Just say 'not'ling doing' to this mutt." he said tossing the letter to B.

The correspondent informed the cyangelist that she was about to get married, and that unless he came to her assistance she would have to take her place beneath the orange blossoms not outte as exquisitely gowned as not quite as exquisitely gowned as some who had gone that road before.

"And you can readily understand, Mr. Sunday, how humiliating this would prove to one who has been so delicately reared as myself," she wrote. Indeed, I don't see how I would ever recover from the shock. I think about \$1000 would pay the expenses, and I am sending you my note to be paid in six months from date. It is an honorable transaction and I am sure my hysband will pay it. You see I can't ask him to advance the money now, but after the ceremony it will be so different."

"Tell her to get a house dress," said Billy, turning with a merry laugh to his secretary. 'So she wants to put this thing over without letting the fellow the is going to marry know anything about it. I have a good mind to let him know the kind of a wife he is getting, but pshaw! perhaps she's better than he at that"

We Must Not Flinch

Those Who Remain at Home Must, Like the Surviving Combatants, Grapple With the Present and Face Undaunted Whatever Lies in the Future—We Must Not Feel Downcast, or Give up the Distractions of Entertainment.

By TOM KING.

RE we down 'earted? A We are quite naturally oppressed and depressed by the casualties at the front. Neuve Chapelle, Langemarck and St. Julien will long be jewels in Canada's diadem of glory. But they spell for the time shocks, sorrows and bereavements. Our cheers for the living

mingle with our tears for the dead. The band returning from a soldier's funeral plays music that is cheerful and even gay. The surviving combatants have work to do which will have to be done with dash and spirit. They will mourn for the missing when the war is over, but while the fight is on they must keep their eyes on the foe and they must keep themselves in the best ble condition, physically and mentally.

Much the same duty rests upon those who remain at home. They must go on with their business as usual and they must redouble their energies they must grapple with the present and face undaunted whatever lies in the future. They must not stop to pine or lament or allow themselves to become downcast and despondent.

THE news from Langemarck and other fields of glcry plunged many a household into mourning, and all of us felt the shock and depression. A week ago business was not suspended in Toronto, but it was neglected. It was hard for the business man to concentrate his attention upon what he was called upon to do or consider. He was thinking and talking about the casualties. London, England, went thru much the same experience last September, but the people there buckled up and refused to become either depressed or downhearted. Today the capital of the Empire is bearing the shock soberly. There is no hysteria, no ecstacy of woe. The theatres are running to crowded houses, for the people realize that they must have some distraction and that they must keep themselves fit, physically and mentally.

We should have the true British outlook in Toronto. Everyone must do all that is in him for the great cause. It may be argued that

We should have the true British outlook in Toronto. Everyone must do all that is in him for the great cause. It may be argued that we must respect the feelings of those whose relatives have perished at the front; that it will jar upon them to see people going upon excursions, attending theatres and apparently enjoying themselves in a light-hearted way. But it may be doubted if we really do them a service by making the city silent and gloomy. When the late King Edward died many shops and theatres in London decided to close down until after the funeral, but within a day or two they re-opened at the request of the royal family, whose depression was intensified by the universal air of gloom.

IT has been suggested that during the war all social festivities should be tabooed and the money thus saved devoted to providing comforts and relief for the starving people of Belgium. Some such feeling animated New York City for a time when society leaders, instead of giwing balls and receptions donated the money thus saved to the Belgian Relief Fund. But it could be pointed out that these wealthy people were really giving nothing. The money they saved in this way was really taken from caterers, florists, dressmakers and servants. Those society people reasoned like those who decry the building of fine churches while Christians are starving. The poor must be looked after, but we need not therefore do without churches. We should keep the Belgians from starving, but not by creating unemployment in Canada.

Those who mourn most sincerely for the patriotic dead do so without ostentation. One can suffer without donning the habilments of woe. We must bear our loss as the soldier bears his wounds, patiently and without flinching. The people of Toronto will best serve the

and without finching. The people of Toronto will best serve the soldiers living and dead by keeping themselves in the best condition, by going about their work and play as usual and by doing nothing which will cause unemployment. We must avenge the men and the cause for which they die, but we must do so undaunted. . . .

INALLY it must be remembered that the bereavement of relatives of those who are lost in battle is assuaged to some extent by the glory of the sacrifice. The mother who has given a son to the Empire deserves condolence, but she is also entitled to receive the gratitude of the nation. Her grief is crowned with glory. In this tude of the nation. Her grief is crowned with glory. In this connection it may be interesting to reproduce the letter sent by President Lincoln to a mother whose five sons had been killed during the Civil War. Under date of November 21, 1864, the President wrote to Mrs. Bixby as follows:

"I have been shown on the files of the War Department of the Adjutant-General of Massachusetts that you are the mother of five sons who have died gloriously on the field of battle. I feel how weak and fruitless must be any words of mine which should attempt to beguile you from the grief of a loss so overwhelming. But I cannot refrain from tendering to you the consolation that may be found in the thanks of the Republic they died to save. I pray that our Heavenly Father may assuage the anguish of your bereavement and leave you only the cherished memory of the loved and lost, and the solemn pride that must be yours to have laid so costly a sacrifice on the altar of freedom."

PATRIOTISM IN MARRYING FOR COUNTRY

War Will Bring Encouragement for Those Desirable People Who Marry Chivalrously.

SOLVING PROBLEM BEFORE ENGLAND

DROF. J. Arthur Thomson, of Aberdeen University devoted a recent lecture to the problems of euthe subject of patriotic marriages are of general interest in war times.

"What Darwin said of even ancient

"What Darwin said of even ancient times is true today: The bravest men, who were always willing to come to the front in war, and who freely risk their lives for others, would on an average perish in larger numbers than other men."

"In the making of our armies there is a process of discriminate selection which works in the wrong way from the eugenic point of view. The call of their country attracts a larger proportion of the more chivalrous, the more virile, the more courageous. In the patriotic response not only in this country, but thruout the empire, we are proud to recognize a multitude of men of a character that is precious. We have to face the fact, of which we are socially proud, that Britain is sending to the best of her sons, whose early death would mean an impoverishment of the race. They will not all come home. Already one knows of many irreparable losses in fine families.

Almost Every Second Man Between 18 and 45

When many brave unmarried soldiers are killed, we are justified in raying that the natural inheritance of the country is the poorer thru the loss of many who should have enriched the next generation by more than their example. But this might mean relatively little to the stock if the proportion of combatants to noncombatants was small. It is far otherwise in the present instance, it is said that there are in Britain about \$250,000 men between 18 and 45, 13,3 of the total population; if we have, as may be necessary, an army of three millions, that would mean almost every second man between 18 and 45. Even if it were every second man by lot, the thinning might mean only a terrible mortality, but if the fitter join the army in large numbers and are thinned in large proportions, war must be regarded as a dysgenic eliminator.

must be regarded as a dysgenic eliminator.

"If the war is sifting out from the possible parent-stock of the future a larger proportion of those who are relatively more fit from an evolutionary or eggenic point of view, what is possible in the way of counteraction?

"Among the re-valuations after the war may we not expect some change of public sentiment in regard to eugenic ideals, some more marked disapproval of selfish forms of cell-bacy, some more cordial encouragement of those desirable people who marry chivalrously while it is still springtime with them, without waiting till the bridegroom has secured twice the income his father had? There is patriotism in dying for our country; there is a conceivable patriotism in marryng for her and in bearing children for her.

How to Beat the Germans

Nightly the Huns Are Massacred and the Down Town Hostelries Run Red With Imaginary Gore.

BY A. I. MACKENZIE.

DMIRAL COCHRANE, hero of a A DMIRAL COCHRANE, hero of a century ago, had a pet theory of annihilation for England's enemies. It was safe and certain, for the doughty admiral offered to perform on the forts at Kronstad with his pedal extremities resting on a couple of silk cushions. In twenty minutes live Russians in the Kronstad forts would be about as scarce as night cars at ten minutes to twelve; so read the admiral's contention.

Locked up in some vault of the British admiralty Cochrane's secret still remains. It is too inhuman to be used, we are told. But the strategist of the down-town bar has no scruples of any kind, and nightly the Germans are annihilated, only eleven Germans are annihilated, only eleven o'clock puts an end to the slaughter. It's a poor bar that can't kill 50,000 Germans in a night—most do better. A cold on the chest took us into a neighboring hostelry the other evening. We were advised to "take something for that cold." Sometimes people give really sensible advice.

"Lemme tell y' them Rumenians "Lemme tell y them Rumenians II settle this here war when they get in," the gentieman on our right remarked to a companion with force "They'll march down to them Dardanelles, and then Russia'll be able to bring ten million men out to land in Belgium. The "Eye-talians" Are Needed

Italy rules the roost in the next harbor. Viva Gabribaldi! If we had harbor. Viva Gabribaldi! If we had Italy in the game only our shouting and the squeals of the foemen would remain. As we idly toyed with our McLaughlin's Extra Dry, and listened to the bunch in the far corner, where the swinging door hangs, the situation looked hopeful. Always did like the Itahans. Shouldn't call 'em Dagoes. "Here, girl, here's a dime, and tell the organ grinder to play the "Marcelaise."

"Them Eye-talians has an army of five millyuns. They got better guns 'an anybody, and 'f they got in they'd trim them Ostrians to a finish. That'd stop the war. If Ostria got licked an' quit, the Germans'd quit, too." This sounded like logic to us. "Gi"

"Naw, beat it, think got money to waste on Dago organ grinders?"

"If the Ynited States got into this there wouldn't be no Germany in a week," declared a gentleman from across the border.

"Aw, you fellers make me sick Yain't got only ten thousand soldiers, an' y'ain't got no navy an' y'ain't got no guns. I seen where Teddy Ruesvelt said so. What good'd you fellahs be?' heatedly demanded a companion.

A Friendly Neutral Lost

"Well, we licked you in 1776, an' we licked you in '1812, an' "—the punch limded just a trifle to the right of the ear, and the bouncers cleared the decks from action. As we emerged we know that Canada had lost a friendity neutral.

"What we need is conscription," we heard as we entered. "If we had conscription," we wouldn't a had any war. Wed' a had an army of fifteen millions, and the Germans never would a started anything. If we got conscription now wed have fifteen millions, and the Germans never would a started anything. Potato Pie

RE are two ways of cooking pro-tatoes which will be found as appetizing as nutritious;

I has, of potatoes 1 onion
I stalk of celery 1 oz. of tapioca
Pepper and salt A little milk
Short crust to cover the pie.
Fry the onion in the butter. Slice the
octatoes and celery very thin. Put
them in a pie dish, sprinkling in the
apioca and seasoning. Fill up the dish
with milk, cover with short paste, and
bake in a good oven for one hour or a
little more.

Before sending the pie to the table, cut a little hole at the top of the crust and pour in a couple of tablespoonfuls of warm milk. Then let the pie stand few minutes in a warm place, so that he milk may have a chance to soak nto the ingredients and soften

Cut up the crusts into neat pieces
the size of two fingers. Soak them in

Take the potatoes when they are hot, mash them, and work in with them enough flour to bind them into a paste. Roll the paste out fairly thin, and cut the past sources.

Squeeze the bread dry. Flavor each little bit of bread as nicely as you can. Put cach on a square of potato, close the petato round it, and shape the whole into a ball or roll. Brush them over with beaten egg to make them nice and shiny outside. Bake them about 20 minutes in an oven which is brisk enough to brown them well. Serve hot. You should get a good deal of flavoring on to the bread, or the stuffing of the rolls may seem rather insipid when you eat them.

Bread Cutlets

Should you chance to want a meat-less dinner, yet have something sub-stantial, here is a recipe that can be recommended. The cutlets can be made equally well with brown or white bread, whichever you like best. The requirements are:

Chopped parsley
Chopped herbs
Chop'd lemond rind
Egg and bread-Pepper, salt
Oil or fat for frying
Cut the slices of bread into squares

Coat the pleces of bread lightly with egg, cover them with the flavored crumbs, and fry them at once in an open pan. Serve very hot

Lemon Buns

Use one-half pound of self-raising flour, 5 ounces of butter, 3 ounces of sugar, rind of half a lemon, 2 eggs.

Rub the butter into the flour, add the sugar and lemon rind. Mix all together with the well-beaten eggs. Form into rocky heaps on a buttered tin. Dust each with crystallized sugar and bake in a quick oven for 10 minutes.

Rice Buns

Use one-quarter pound of butter, one-quarter pound of sugar, one-quarter pound of self-raising flour, 2 ounces of ground rice, 2 eggs, vanilla flavor-

Cream the butter and sugar together Cream the butter and sugar together by beating these until the sugar is quite dissolved and the mixture resembles thick cream. Add the beaten eggs, and stir in the flour and ground rice, and also a few drops of vanilla flavoring. Form the mixture into small rounds, press these flat into some crystallized sugar, and bake on a buttered baking sheet for 10 minutes in a quick oven.

Soda Cake

Use one-half pound of self-raising flour, 3 ounces of lard, 2 tablespoonfuls of sugar, 2 ounces of currants, 1 egg. 1 teacupful of milk.

Place the flour in a bowl, add the lard, and rub it into the flour with the cips of the fingers. Add the currants and sugar. Mix to a dough with the egg well beaten and the milk. Place in a well greased dripping tin, and bake for half an hour in a moderate oven. Cut into blocks when required.

A tablespoonful of vinegar added makes the cake light.

The belief that the firing of heavy guns brings down rain was entirely disproved by the Battle of the Aisne. During 16 consecutive days of that long fight no rain fell, despite the fact that more big guns were being fired there than in any similar period of the world's history.

DR. CASSELL'S TABLETS

Those here in Canada suffering from Digestive or Nerve Troubles who read this true story cannot fail to get new hope from its perusal. Mrs. Rogers of 243 Whitehall road, Bristol, England, had suffered from soute dyspepsia for eleven years, ordinary treatment had failed to do her any good, yet Dr. Cassell's Tablets cured her completely. Could more convincing proof of the value of this great British medicine be offered? Mrs. Rogers says: "Dr. Cassell's Tablets have cured me of dyspepsia that nothing I tried could even relieve, and I feel so pleased and grateful that I want to tell every sufferer about this wonderful medicine.

The value of Dr. Cassell's Tablets to all was have to earn a living is well seen in the following true story. The teller of this story, Mr. Mendham, of 21 Princess road, Old Fletton, Peterboro, England, had long been too ill to work, but now he is in steady employment, made well and strong by Dr. Cassell's Tablets. He says:

"I am glad to be able to testify to the wonderful curative power of Dr. Cassell's Tablets. They cured me when nothing

I could do nothing while these attacks were on, and they were so frequent that I was as much away from work as at it. I was always more or less ill, always had severe pain after food, with volumes of wind, and a dizzy sensation that I could not shake off. Headaches, too, were frequent and severe, and sometimes I had shivering turns like ague. I tried all sorts of things and had endless medicine, but it was only when I got Dr. Cassell's Tablets that I got any real benefit. It was really wonderful how they cured me. I got sleep at nights, could eat without suffering, and now I am in splendid health."

Who Cannot "Take a Joke"

Pity the Solemn Person

THE National Association of Plumbers in convention assembled has instructed the invested officers to take vigorous measure to abolish the practice of making jokes on plumbing and plumbers.

The Irish societies protested against the Pat and Bridget joke long ago.

The Jews are writing letters to the theatres asking managers not to allow anyone to make fun of anything Jewish. Yon Yonson has risen up and protested against the Ole Oleson pleasantry. Can't somebody get up a convention of mothers in law and have the delegates sign a round robin of indignation about the mother-in-law story?

or indignation about the mother-in-law story?

Miss Polly and her "Pais" ought to be "aroused" to Pa's wrongs, and the brides of the country should organize to defeat the Machiavellian sophistry of the humorous writer who dares to make fun of their biscuits.

Let's all hold conventions, every-soul on earth ever dares to smile

Laughter a Character Test.

What rubbish it all is, as if it ever hurt any one who was worth hurting to be laughed at in friendly fashion once in a while.

If we'd follow out this strange idea that there is something wicked in a joke, what on earth would have become of the world?

We should have had no books and no plays at all.

If Uncle Josh Whitcomb wasn't a joke, then I've never seen one, and yet New England seemed to bear up under it—somehow.

Col. Cah'tah of Cah'tahsville—what would you call him, a sermon or a doxology? And yet, it seems to me that Old Virginia has managed to peg along pretty well under the strain of the Col. Cah'tah smile.

If the Brtish government should suddenly decide to selze every ship and destroy every mail car carrying a funny picture of John Bull anywhere in any sort of publication—what would wo do?

Think more highly of England because she could not bear a good natured laugh or look at each other in incredulous disappointment.

What was Uncle Sam when he started but a joke?

What if the United States government should—suddenly boycott every newspaper that dared to print a cartoon of Uncle Sam—would our neighbors be any bigger or any finer or any more powerful?

What's the matter with a good hearty laugh once in a while—even when the joke is on us? It is a sure test of character—the laughing test.

'Discourage' Laughter with Laughter.

Beware of the man who can never take a joke on himself or his neighbor or his family or his accent or his favorite fads.

He'll play a sorry joke on you some day—as sure as the world.

What do you love to remember about your mother—sometimes?

The way she hunted for her spectacles when she was wearing them on the top of her head—her odd little habit of thinking that she could make a foreigner understand English if she only talked loud enough?

Her trick of forgetting to do things that she didn't want to do, and always remembering to remind you of the things you wanted to forget?

You've laughed at mother about these things a hundred times, and she pretended to be a little cross, but laughed with you, after all, and you loved her all the better for being f inny and unreasonable and impractical once in a while—just because it made her human.

What did the Master Plumbers think they were going to accomplish by "discouraging" the joke about the plumber's rates and the plumber's assistant?

There has never been anything particularly funny to me in a plumber's bill. I think I should pay it quite as cheerfully if I could manage to laugh over it—a little.

POLYGAMY MUST COME AFTER WAR TO SAVE THE RACE

T is generally admitted that in consequence of the war women, from the standpoint of matrimony, are in for a very terrible time. A woman writer, Frances Burke-Hart, of London, England, would, if she had her way, solve the problem in a very novel fashion. Her solution, put briefly, is polygamy. This is what she says:

"To my way of thinking there is but "To my way of thinking there is but one solution, unless, of course, nature steps in and male children predominate; and even then the problem would have to be shelved until matters leveled themselves up as a matter of time. I would suggest that a law be passed by whih a man may be permitted to possess one, two or three legal wives, as the case may be, provided he can guarantee to the authorities he is in a position to support them decently and properly and in keeping with his position.

"A few years ago I was permitted the privilege of being a guest in an Eastern harem, and during my stay, in which I talked and associated with a fair number of women, I formed several opinions which have firmly convined me that in spite of our boasted progress the solution to a worldwide problem was at any rate in part expressed (1976)

faces I ever saw in my life were in the harem, and among women possessing many qualities we Western women would do well to emulate.

"Nature invented or evolved woman for a definite and special purpose; but for a definite and special purpose; but civilization steps in and decrees otherwise. Nature's object is, therefore, frustrated. The consequence of the present day muddle as regards the sex question is a vast army of women who, with a stately air of decorum and discontent, fill the pensions in overpowering numbers, who live lives without aim or object, who cuddle and kiss dogs instead of babies, who hoard up much of the wealth of this country, whose mental and physical energies die for want of proper expression, whose bitterness of soul is a disgrace to womanhood and a poor compliment to an manhood and a poor compliment to an almighty power who sent them into the world with a definite and sacred mission to carry out.

"All this will have to be changed.

Woman will have to be changed into a new order of things. No longer will it be necessary for her to stand in the market place and shout her grievances while she turns an anxious face toward the world. toward the world.
"After this war is over woman

coming into her own. And the vote is not going to do it. That idea is dead long since. No woman is going to be the means of her own salvation, aided and supported by her proper and natural partner—man!
"Under the new dispensation all will be different. Nature will be paramount"

in everything. Civilization will look after itself. There is no doubt that we are overcivilized. As the Irishman said: 'We must go back a bit; but that'll mean we're going forward.'"

"I do wish you would take Wincarnis, dear."

"VOU have been looking so worried and run-down L lately, I am sure WINCARNIS would do you good. See how it picked up my strength and brought back my health after that serious illness, last year."

Many an anxious wife has pleaded with her husband in some such terms as these-and no wife could give better advice.

There are thousands of men (and women, too) who are tired out and run down, and while not in an actual state of collapse, are dan-gerously near the border line.

What they need is a food, a tonic, a vitalizer—something to give them life and energy—to bring back their lost health and to restore a normal healthy activity of mind and body.

And this is what WINCARNIS is designed to do. Not a drug, but a liquid food,—this famous English tonic contains strength - building, nerve-feeding forces such as the system demands.

It is especially valuable in cases of nervous exhaustion-overwork or overstudy-brain-fag-and general physical weakness from whatever cause. It does not merely "patch you up"-it gives you new life. Over 10,000 physicians have re-commended it heartily.

Be persuaded to give WINCARNIS a trial, and take a new lease of life. You will feel better and be better after the first few wineglassfuls. Let WINCARNIS benefit you as it has thousands of others.

If you cannot obtain Winearnis from your dealer, write to our Canadian Agent, Mr. F. S. BALL, 67 Portland St., Toronto.

ECONOMY IN THE USE OF MEAT PIES

NE excellent method of stemming the tide in the high cost of living is to get the pie habit. Not the fruit pie or vegetable pie exactly, tho they are all right in their place, but the meat pie, which may be made of fresh meat or of the cooked leftovers, and is really a culinary delight

when properly made.

To live wisely and well one must understand the art of marketing, and also just how to care for the food when it comes home; how to keep it in the best condition; how to serve it most attractively after it is cooked; and, best of all, how to use up the left-overs so that nothing may be lost or wasted.
To line a deep pudding dish with

good pastry, prepare the filing, put on the top crust and place it into the oven, for baking takes only little time, and it is a dish well worth a place of and it is a dish well worth a place of honor on the daily menu. French meat or cooked meat or game with the bones left in take a half hour or so longer to bake, so have to be started that much earlier. The left-over dinner meat may be worked into a pie for the next day's luncheon most satisfactorily. With a bit of salad, a sweet, and tea or cocoa, the luncheon will not only have a festive appearant. will not only have a festive appearance, but be surprisingly good and

The "Weal and Hammer"

The game pie and the "weal and hammer" of Sam Weller fame is stifl popular in England, and figures at many outdoor luncheons where the sporting element congregate. And here in Canada it appears at military

here in Canada it appears at military manoeuvres, automobile spreads, racing events, ball games and places where the outdoor lunch is in evidence. Even leftover boiled or baked fish may be made into fish pies, using the sauce that was served with them, and adding seasoning to make them more tasty. So there is scarcely anything that cannot be converted into pie filling if the housewife is clever and of inventive turn of mind. In all cases the crust should be of the good homethe crust should be of the good home-made variety, not too short and rich, but rather plain and crisp for the best

but rather plain and crisp for the best results.

The pie is said to be a wholly masculine dish, and perhaps that is true of the heavy crusted English pie, but the American adaptation is a much daintier affair, and finds favor with the women, judging by the way it) is ordered at public hotel tables.

For the beef pie there are several ways of varying it. First, the meat, cut in small pieces, may have alternate layers of mushrooms; then seasoning, and a thin brown gravy added for filling. Or, if one prefers, thinly sliced onions may replace the mushrooms, or sliced carrots and potatoes are often used, which gives the cook several ways to choose for variety.

Cold mutton pies are made with the addition of sweet herbs as flavoring, with sliced potatoes and diced carrots, in the layers between the slices of meat. Enough fat always should be left on the meat to enrich the pie.

Mouth-Watering Combination

Mouth-Watering Combination The famous "weal and hammer" is more elaborate in the making. The veal cutlets and boiled ham, of which it is made, are augmented by a seasoning of herbs, hard-boiled eggs

in years gone by?
Chicken or fowl ples made in the same way have the meat boiled until it leaves the large bones, which may

then be removed easily; the small ones are concealed in the pie. The tough ends of th steak, if sirloin or round, or the end of the porterhouse may be stewed in the brown sauce until tender and then used up in a pie.
Fish or oyster pies are fine Friday dishes. Or, better still, you may use up the Friday fish left over on Saturday. Baked or boiled fish flaked, pepper and salt, juice of one onion, juice of half a lemon. Half-cup of bread crumbs, quarter-cup of grated

cheese, a cup of milk and plenty of butter makes a "dream' of a pie.

Oysters, lobster, crab meat or soft clams that have been left over from the steamed clams of the night before may all be treated in the same way, and will be found most delicious.

Sweetbreads and mushrooms are an excellent pie combination made with bread crumbs and cream, while venison, rabbit, partridge, quail, carefully seasoned, are well worth trying for the meat pie delicacy. Reed birds, apt to be dry eating cooked in the usual way are fine for pie use.

way are fine for pie use.

The succulent pork pie is distinctly an English standby, and is in favor by all classes of society, being a special favorite for the luncheon hampet. The paste for the oyster pies should be mere of the puff variety, while that used for the others may be just good, home-made crust.

The Best Way to Clean Basket Work

F it is white basket-work, mix some whiting in a pail of warm water to which some soap powder has been added. Brush the basket-work with the above with a fairly stiff brush, taking care to go in the crevices. Then throw clean cold water over it until the whiting is all off. If it is brown cane, add ammonia instead of whiting.

A Neasy way of cleaning basketwork is to get some soft soap and place it in a saucer. Have ready a bowl of water (not too hot). Then take a nail-brush, dip the brush into the water and then into the soap.

A GOOD plan to clean white or light-colored basket-work is to put two or three handfuls of salt to haif a pailful of cold or hot water, then scrub well all over the basket-work, sprinkling a little fine

THAT DeLESSEPS, OF SUEZ CANAL FAME, HAD THE GENIUS OF PATERNITY.

C AID Authority to me: "Who is the greatest genius I sat down with emphasis and stared helplessly. "Ah, there are several, perhaps? Well, name them.

People like to read about geniuses. Good-by." And Authority took his hat and withdrew, and now memory is rushing back thru past years trying to lasso a genius here and there, while between catches I keep asking: "What is genius, anyhow?"

Some one has defined it thus:

MARA MORRIS Some one has defined it thus:

"Talent does what it can; genius does what it must."

Others hold that that genius is a natural endowment for some especial pursuit. Others, again, say that genius means "high mental endowment." That does not go. Many of what genius means "high mental endowment." That does not go. Many of some thing laid by! Then after accumulating a little bit, have some since genius is creative, my personal opinion is that it is a divine gift, but those whom I shall name were geniuses by the world's dictum, not by heaven's

No one can question the witch-ridden genius of Gustave Dore. My very letter of introduction gave me a creepy feeling. He was swarthy, dark—and bitter—oh, but his mightiness in black and white, and his weird imaginings fascinated his world. His silent, cruel response to little Vinnie Ream's laughing question: "What is your idea of love?" was a hasty sketch on a torn bit of paper—of a delicious Cupid, all diniples and winged, topped horribly with a leering, grinning death's head. Poor, famous Dore!

Ferdinand de Lesseps ("accent on the 'sep,' please," as he used to say), by chance come part.

Lawyer, author, financier. I suppose it was an engineer that he was held to be a genius. Anyway, I know that he had a genius for paternity. Not alone because of his numerical fatherhood—reaching into the teens—but because he was so completely en rapport with all the duties of mother and trusted nurse. This fact was proven by the presence in his masculine retinue of a small skirted thing who, silently adoring, tagged her so famous papa nearly, if not quite, around the world. Otherwise the would, according to madeal sevents have silently and relative the sevents. medical savants, have silently and unobtrusively died of sleepless, hungry

Without loss of dignity this suave elderly gentleman whose ante rooms were crowded with the greatest, performed all the duties of the toilet of la petite, buttoning small shoes, snapping small garters, tying tapes, brushing and tying dark locks, making bows stand out perkily, hearing little prayers, and patting little shoulders until the sandman relieved him from duty.

As she was rapturously kissing the damp nose of my toy dog, he exclaimed with a quiver in his foice, "Mais comme elle est belle, madame."

Yet he had "steen" more back home.

Oh, Ferdinand de Lesseps had the genius of paternity all right.

"His employer maybe thanks him, and in his heart is glad he's hired a reliable young man who is on to his jub. The money stays in the treasury most unseemly. Are you not aware should the woman who manages the business of the house be allowed to pocket the difference between what she really needs for her household, and what she can get from her husband?" "Hit the nail on the head, old man," exclaimed Bob. "Household savings belong to the firm. They don't belong individually to the husband to do as he pleases with; nor to the wife to do as she pleases with regardless. Because, in my opinion, the family helps save money by being satisfied with cheaper food and mended clothing, just as much as the wife helps by supplying her family in this economical fashion. Why One Really Keen Eye May Be Better Than Two

By DR. LEONARD KEENE HIRSHBERG

A.B., M.A., M.D. (Johns Hopkins).

E blind lead the blind in this world. This is actually as well as figuratively true. There is none so blind as they that will not see, and those who can-

Job says that God is eyes to the blind and feet t the lame. Since everybody is—as I shall shortly prove blind in both eyes at an important spot, the prophet's words are as true today as they were thousands of years

The positive proof that each and every person is blind rests upon the firmly grounded fact that there is an oval area in your retina which is entirely without the power or sense of sight. Curiously enough this place in the back of the eye-ground is at the most important spot of the retina—exactly where the optic nerve spreads out like a fan as it enters the eyeball and becomes the retina.

eyeball and becomes the retina.

In this neighborhood, at the very field you might expect vision to be most perfect, you are as blind as a stone. The French physicist, Marcotte, was the first to prove it so. Before this it was unthinkable that the human eye was blind anywhere. Now physiologists and experimental psychologists know it.

An Interesting Experiment

If you will close or bandage one of your eyes and with the other gaze continuously at a spot on a wall about seven feet distant you can hake the face of a friend or any one disappear if he seats himself directly in front of the wall, upon the side of the unclosed eye. He must place himself in such a position that his forehead is on a level with the spot stared at. His nearer cheek must be 20 inches away from it.

If your stare is steady his face will vanish as if covered by the invisible cloak of Jack, the Giant Killer. At the same time the wall will extend continuously away from you on the left. Nay, a veritable war map of the extent of the blind area in your eyes can be made if you spread a sheet of white paper on the wall and record the points at which a colored crayon, as it is moved about, disappears and reappears.

The fact that you do not see your friend, altho you know he sits seven feet away from you, as well as the fact that you see an unbroken surface of wall in its blue, yellow or other color, shows that your vision makes you "see things." Thus, gullible persons, who believe in black magic, and "materializing mediums" are given encouragement to maintain nonsensical conclusions from things unseen or untruly seen.

Blind Area Tricks.

The optic nerve enters the back part of the eyeball toward the nasal side of the eye. When you use both eyes automatically at the same time, the blind area of the one eye corresponds to a visual area in the other, and few things escape the sharp, co-ordinated sight of the two eyes acting as one.

If, however, as is often the case, a little irritation, blindness swelling, soreness, sickness, fatigue or, what not, interferes with the simultaneous harmony and rhythm of the two eyes, much that goes on round about will be unseen, and many scenes will be testified to as empty of events or persons which are in reality present.

The tricks of normal vision, then, of perfectly sane persons will prove Hamlet's solloquy that there are more things in heaven and earth than was ever dreamt of in the philosophy of Horatio or any one else. Indeed, when both eyes act independently of each other, twice as many things may escape being seen as when one eye is covered up.

Chartered Men Have Become an Important Force, Especially in System and Economy in Business World Today.

TORONTO MEN TELL PROFESSION'S GROWTH

BY IRENE B. WRENSHALL. THE work of the chartered actor, the assignee is the undersker." This was the terse character ization given to the two most commo branches of his profession recently by the head of one of the most im portant firms of the city. A chartered accountant might also be very aptly referred to as the "unraveller of aptly referred to as the "unraveller of tangles," so, often is this work his mission. "I have a case just now," said the head of the firm, "which might be called 'acting the doctor." The man is just ready to assign, I am examining his books at the present time. If I can show a good statement there is a man ready to advance sufficient money to carry on the business. If I cannot do it he will have to assign.

"Luckily all our work isn't helping the 'sick in business.' The majority of big firms now have all their auditing done by an outside auditor, as regular intervals as possible.

as regular intervals as possible."

It has come to be looked upon as a much needed and valued profession. Some of the men who stand highest in their profession, and, from that most important point to a chartered accountant—have had years of experience—have seen the change come during their years in the profession, from the time when jobs were scarce, and, luckily for those who in the profession, accountants were few, to the present when there are thirty accountants to one in the old days, and when, by law, in the chartered banks and all by law, in the chartered banks and all joint stock companies, the services of an outside auditor must be called in.

"The idea of an outside, independent unbiased opinion on business

"You must have a certuly amount of experience before you can even try the examinations," he said. "When you put in your application to the Council of the Enstitute, the first thing they want is your experience, and if you haven't 'done your years' you will get turned down. We have to pass as many examinations as a lawyer, and we have to learn a lot of law, municipal and corporation law especially. It is like law too, in that when you start out in practice, your success is depending the fact of the first two years it was a strangnection. For instance, if you report on some matter to an important satisfactory, you may be recommendthey may happen to be directors or members. Our work is mostly inside. If a man builds a house, you can see the house after it is built, but in our work you but a few figures on paper, and no one can tell how many hours you have spent. It's like an incompany doesn't provide its own safeguards in its internal system. If advise that the system be changed." "There is a lot of special work to be done," he continued, "which really cannot be classed under either auditing, or assignee work.

is really a special line. We get a lot of 'examination work,' as they call it. Sometimes it is for private individuals who wish to find out if the people who want them to put money into an enterprise are solid or not. Then again, it is for companies who are joining in a merger. We do a good deal of trustee and executor's work also, and must keep in close touch with the lawyers. We have our with the lawyers. in practice, your success is dependent to work up a clientele. I was a strangdant to a great extent on your coner in Toronto. Fortunately I knew er in Toronto. Fortunately I knew one of the oldest accountants who gave me work, and gradually I worked up my own practice. I have been in it now for seven years, and am making much more than I ever made in a salaried position. It's a much better pos-ition for myself, for now, the older I grow the more experienced I become, and therefore the more valuable, I got my experience while working for others. In my first year, as a cost accountant I went thru the year's work three times. The second year I only went over it twice, and after that only once. I learned then to get business systemized. My chief work is auditing, but I often take charge of the inancial end of a new business, or spection, and any shortages can one which requires nursing up. But most of my work has been out of town to audit special sets of books. I have gone as far as St. John, N.B., and as far north as Cobalt. Another well known chartered accountant started business life as a bookkeeper in a wholesale house, and twenty years ago took up public ac-counting, deciding that if he did not branch out he would remain always a bookkeeper. The man who specializes in assignment work can, as a rule, make big money, but the work is harder and more disagreeable than the other branches. It is interesting to study out the growth of this work, and realize how recent is its importance in Canada. Not only the enemies of our bene-factors but even the Turks, betrayed unforgivable ignorance of the true zeal and the noble spirit of the very religion which they profess, in sounding the clarion call for a jihad. Did they think that we, the real Moslems of Africa and the Greater Asia, were subservient tools to be used by shameless atheist who never was in-side a jaamy until the unscrupulous enemies of our just rulers hatched the lot and suggested the fiendish scheme to him?

It appears to me that these handful of conspirators were totally ig-norant of the trend of mind of the 90,000,000 Moslems thruout the British Empire. "The Country Boy"

"The Country Boy," with Marshall Neilan, is the headline attraction at the Madison Theatre the first half of the Madison Theatre the first half of this week. It is a strong story screened in a most forceful manner with heart interest, rich humor and pathos. Tom Wilson, who has grown up in a small town under the watchful care of his widowed mother, falls in love with Jane, the daughter of Judge Belknap, but the judge refuses his consent until such time as Tom shall be able to support a wife in comfort. Tom, who has a very good idea of his own ability, thinks that he can win his fortune more quickly in the city than in the country and goes to New York, accepting a position at \$15 per week, which has been offered him by one of his father's friends.

At his boarding house in New York,

one of his father's friends.

At his boarding house in New York, Tom makes the acquaintance of a chorus girl by the name of Amy, who immediately sets about fascinating him, partly for amusement and partly to make her lover jealous. The rest of the story concerns the manner in which Tom meets his downfall, the way in which he is saved from taking his own life as the result of shame and remorse, and the means thru which he returns to the country town and regains his self-respect. Tom finally wins the approval of Judge Belknap and the romance of Tom and Jane comes to a happy conclusion.

Fritzi Scheff, in the great comedy success, "Pretty Mrs. Smith," which Kitty Gordon made so popular here last season, will be the offering for the last half of the week.

Serial Motion Pictures

NE of the many astounding developments of the new art of motion pictures has been the serial picture—that is, the picture which, under one title and with a more or less connected and consecutive story, has been issued by the producers in serial form, one or two reels being released each week. In almost every way this was a daring innovation, a startling departure in the dramatic

The novel which appeared in serial form in a periodical is quite an old thing. The great novelists of the latter half of the nineteenth century especially released their most notable works this way, and it is well-known that the daily instalments of some of the works of Zola, when they appeared in the limited issue of the newspaper publishing his powerful stories, became almost priceless.

Serial Plays Follow Serial Stories

The time for such things is past, but in its place, within the last two years, has come a development of the same spirit which made people anxious to read instalments of the stories of the great novelists. The habit has not entirely died out, for the best and most popular (and the two are by no means synonymous) writers of stories today have their writings appear in serial form, most frequently in the popular weekly and monthly magazines. In this way the publishers assure themselves some steadiness of circulation even among that large class who are not subscribers, but make their purchases at the newsstand.

In the same way, the motion picture producers a little time ago had the idea that they could ensure steadiness of patronage to the theatres using their serial pictures. The principle is a very excellent one, for while in a certain neighborhood, there may be a couple of thousand motion picture "fans" dividing their patronage between three theatres, a serial picture of the most approved type will probably ensure a steadiness of patronage at least on those nights on which it is displayed. At least, this holds true if the picture is a fairly excellent one.

to have been an ally! The Turk was in a Bosworth, Inc., photo-play, "The Rug Maker's Daughter," and was one of the best things Standing has done for the screen. He caught a bad cold and was in bed for several days, he also smoked a hubble-bubble pipe, and it did not improve things for himtoo much nicotine, he says.

IN THE OPENING SCENE OF "Scandal," the big feature photo-play, being put on by the Smalleys at the Universal, Phillips Smalley and Lois Weber were covered with mud thrown by their company, symbolical and dirty! As Lois Weber entered the studio with her pretty frock, all soiled, she met Carl Laemmie. "Ah,"

Colossal Advertising Campaigns.

Another reason tending to great popularity for these serial pictures is the tremendous advertising campaigns into which the producers enter. The reason why this is possible is easy to see. It is not a matter of a single one, two or three reel picture, getting revenue from each of a number of houses once a week but a picture of this kind gets its revenue from each house twenty-five different plays. The overhead charge is smaller; the same people are used to a great extent; and many settings are employed again and again. Consequently the expenditures that may be gone into for the whole thing are on a comparatively vast scale, and there need be no stinting in any particular.

Therefore the amounts expended in advertising for some of these plays excanything spent, not alone in this field, but in any branch of industry during a similar period. One of the greatest values of advertising of this kind is the cumulative quantity of the whole; the weight of the entire mass of a nation-wide campaign thrown at the public with such insistence and such lavishness that no one could possibly escape knowing of it.

Running the Story of the Plays in Newspapers

In further association with the producers have been the great newspaper syndicates, which, on a number of occasions, have carried novelizations of the photoplays, running simultaneously, week by week, with the most recent releases. The combined appeal of advertising, novelization and play are well nigh irresistible, and when it is considered that in one of these fields, at least, the story must come to the attention of every wide-awake, or even half-awake person, it is not to be wondered at that the serial photoplay has enjoyed such unusual success.

unusual success.

All of the inducements previously cited have been topped by the greatest one of all—the offering of money prizes in conjunction with the pictures, which prizes, however, were only possible to those who had followed the complete serial, week by week. It is easy to see why people have gone to go much trouble to see each instalment of these plays, no matter what the difficulties.

Usually there has been some mystery attached to the story, some unsolvable element which maintained the quality of suspense in the picture, thus sustaining the interest in the surest way.

able element which maintained the quality of suspense in the picture, thus sustaining the interest in the surest way.

Again, in those instances where a money prize was offered for the proper solution of the mystery, there was an even stronger bait. Who could resist the tempting prize of \$10,000 offered to him or her who solved a detective story in the most ingenious way? Mighty few. So it is not surprising that these pictures set a new mark for popularity of theatres during the time they were run. The prize, a substantial sum, was the surest means of assuring great and unfluctuating audiences. And when a theatre owner is assured these, he is willing to spend quite a bit more than usual on the pictures which ensures this patronage. Some of the Great Serials.

You want the names of some of these? Well, if I remember rightly, "The Adventures of Kathlyn," and "The Perlls of Fauline," sensationally successful, were the first ones. Others, since then, have been, "The Million Dollar systery," "Master Key," "Black Box," "Runaway June," "Diamond in the Sky." "Zudora." "Exploits of Elaine," "The Beloved Adventurer," and "Road of Strife." There

I don't even want to express my opinion as to which of the above are good and which are bad, because that, after all, is only an opinion, no matter how firmly I believe in it. But the field for a well-established company, which can associate itself with a popular newspaper syndicate, which is willing to spend money intelligently and in the right direction, and which can get hold of that evanescent thing, a continuously powerful story, unpadded and with unflagging interest, is open for the making of several fortunes, and not small ones either.

There was some delightful music during the afternoon, which was much appreciated by those present, there being nearly a hundred an easy manner to overcome little things like that. The real trouble comes with the managers. American opers managers, not a thousand miles away from New York, not to men-tion any names, are absolutely in the hands of foreigners. A very successful violin recital was that given by Erland Misener in the Conservatory of Music Hall a week ago. The program was varied in character and included a Gade Trionin F Major, in which valuable assistance was given by Olive Cowper and Leo Smith; part of the Mendelssohn Concerto and several lighter numbers by Severn, Cui, Schubert and Musin. Mr. Misener displayed an exceptional talent for tone production and won probably his greatest successes in the Severn and Mendelssohn numbers. For several days, beginning March 16, 1916, Mr. Hofmann will be the soloist on the transcontinental tour of the New York orchestra. The contract calls for one concerto with orchestra in each town of the itinerary, and none of the many concertos which the "eminent Russian virtuoso will play lasts over thirty minutes. For each concerto Mr. Hofmann will receive \$800, and his contract calls for one appearance at each concert on the tour, which extends from the Atlantic to the Pacific and back. Thus, for 35 hours of pianistic effort in seventy cities the Symphony Society of New York will pay Mr. Hofmann \$56,000. This is the highest price ever paid any pianist. True, Ignace Paderewski has been paid a higher sum per contract, but the Polish pianist had to give a program of at least two hours' duration without encores to gain his fee. Mr. Hofmann's concert fee is said to be even higher than that of the great Polish virtuoso, but on account of his long friendship with Walter Damrosch, the dean of American conductors, he has consented to make this notable contract with the Symphony Society of New York. The program opened with the Schumann quartet for piano and strings, played by Mrs. Drechsler Adamson, Lina Adamson, Leo Smith and Paul Wells. The performance was graceful and pleasing, having a beauty of expression and unity of ensemble that placed it quite above the ordinary. Leo Smith followed with his own fantasie on lizet's "Carmen," adding emphasis to lizet's "Carmen," adding emphasis to his reputation as a composer and a 'cellist of exceptional ability. Arthur George was in excellent voice, and sang four songs with musical conception and telling effect. The playing of Paul Wells, planist, as always was an outstanding feature of the program. Pupils of Atherton Furlong's college of vocal art will appear in recitals at Masey Hall on Monday, May 10, and two following evenings. The first program will comprise scenes from "Faust" and "Carmen," also short operatic selections including the quartet from "Rigoletto." The cast will be as follows: Agnes Adie, Marguerite: Mrs. Maude Parsons, Martha; G. V. Gaynor, Mephisto; Leslie Hughes, Faust; Alice Rowe, Carmen; Muriel Sanderson, Mercedes, and Phyllis Clarke, Fasquita. On Tuesday evening a scene from "Madame Butterfly" will form the chief feature. RUSSIAN SYMPHONY AT MASSEY HALL

Echoes of the opening of the grande saison in Paris by the Russian Symphony Orchestra can be heard by traveled Canadians in the appearance of the great body of Russians in Massey Hall, May 12. Owing to the war Modest Altschuler's organization is in America, and Montreal and Toronto have the saison Russe instead. For the past six years the Russians have New York. Not since the days when Theodore Thomas and Anton Rubinstein made their famous tour across the continent has a world-famous plaints been soloist on a trans-continental orchestral tour. It will be recalled that Josef Hofmann is the only living pupil of Rubinstein, and that his home in Petrograd was the residence of the saison Russe instead. For the past six years the Russians have heralded spring in Paris. One of the symphonies played by this organization in Toronto will be the "Scheher-azade" of Rimsky-Korsokof. the idea that suffrage is the one issue that will make the female life worth living, and in this way it is more same and normal than the story which preceded it. It is simply told, humorous and witty, and the light in style has a vein of real seriousness running thru it. One young man, at least, got his education in earned how strength is stronger for being sweet—just by seeing and understanding the moral beauty of ene woman's life.

AMES LANE ALLEN, the prose rest that have disturbed the world politically and socially with the vioence of an earthquake, have conited to the release of expressions of the utmost intensity, which has, in measure, choked the channels poetid and artistic expression, and has obscured the achievement of en-during and vital art. Despite this tendency in the literature of the world, Mr. Allen's stories are looked sained a strong foothold in the hearts of those who desire clean, wholesome thought and skilful workmanship. The Civil War casts its shadows ever this novel, and its chief interest centres in a horse father and four brothers had been called to the colors. Angela's Business

This new story by Henry S. Harrison, unlike his "V. Ys. Eyes," barely touches suffrage, nevertheless the "woman question," is involved fundamentally. When a young man declares that he understands women. dughters of Lord Glazebrook, who cares that he understands women and undertakes to tabulate the contents of the female mind, disaster is sure to follow in his wake. This particular young man, self-confident and self-willed, very soon comes to grief, and discovers that a woman may have a broad mind, may be courageous and brave under all circumstances, and still possess those qualities of love, self-sacrifice and devotion which has ever been characteristic of the highest types of the first types of the first that a woman for the mother who has given her life and her love for him to give him up, perchance never to return. No wonder women love peace; war demands of them its heaviest toll.

At the annual meeting of the Women's Canadian Club of Berlin, a resolution which has ever been characteristic of the highest types of the first two daughters of Lord Glazebrook, who comes to work most of his native village of Gorsley, and another girl by the name of Sybil. Who comes nearer to his own station in life, whom he is destined to see much of. Given these for a background the writer weaves and interweaves her web of romance among them, and it is not surprising that she develops a novel not only interesting to artists and habitues of art studios, but one that has a charm for the mother who has given her life and her love for him to give him up, perchance never to return. No wonder women love peace; war demands of them its heaviest toll.

At the annual meeting of the Women's Canadian Club of Berlin, a resolution was passed whereby the meeting joined with the Women's Council in petitioning that a bill be passed for giving pensions to mothers dependent with children.

The Riverdale Settlement at their last open meeting gave a very en-loyable presentation of the sketch "Young Doctor Devine," which was put on by the Sunbeam and Patriotic Clubs, assisted by the Women's Musical Club of Toronto. The entertainment was held in Roden school which now by permission of the trustees, is among the centres who are doing advanced work along social and settlement lines.

The sheet shower which was so skilfully engineered by Mrs. Alexander McPhedran for the University Base Hospital, resulted in a collection of 2933 from the city and \$147 in cash. One benefactor, a member of St. Paul's Church was the generous contributor of 1000 sheets. Out of town sympathizers were also very kind, but the aggregate from outside sources is not yet known. Mrs. McPhedran wishes to thank all who assisted in any way. * * * Mrs. Ambrose Small was invited to speak at St. Joseph's Convent, London, Ont., where she delivered her address on "What Constitutes An Ed-

After the game a dainty tea was served, the ladies assisting the hostess being Mrs. Arthur Eaton, Mrs. W. A. Patterson, Mrs. W. Abraham, Mrs. J. J. Holmes and Mrs. C. W. Robinson.

Under the convenership of Mrs. Lipsett-Skinner a band of thirty-six women was organized to address the children of the schools in Winnipegeon May 3, to impress upon them the needs and reasons for a "Clean-Up Day."
This was getting at the foundation of things for there is nothing so effective as getting the children interest-ed in affairs of this kind, for it is they who are to be the future citizens of the country.

At a meeting of the Montreal Housewives' League, at which the president, Mrs. George A. Kohl was in the chair, several new features were discussed. One of these is the nationalization of the various housewives' leagues now existing in Canada. These can be united under one general organization similar to the local council, each league keeping its own name

in so many ways are doing so much that one hesitates to even hint that there yet remains much to be done and that it is they who must do it. What has been done by the various departments of the Women's Patriotic League, the Secour National, the Bed Cross, Belgian Relief and a score of other activities makes an aggregate far beyond count, but for all this calls come to us from every direction asking that more may yet be accomplished.

It is natural that human nature

should tire, yet we are warned that he who puts his hand to the plough must not turn back if he hope for reward. So at the present time it would almost seem that to tire or falter would be to prove traitor to the cause in which one had sown the virgin seed of the truest kind of patriotism. Still there remains the human side and the human frailty of wearying in well-doing and against this, or, rather, for this, there should be provision.

yet to be done and which they might do.

There are country districts, we have been informed, where not only the women but the men are impervious to the duty of the Mour and to the obligation resting upon each and all to bear a share of the burden. We cannot believe that this is due to any special hard-hartedness or lack of patriotism, but rather to the fact that even now after the horrors of war have been brought so closely to our door, that the isolation caused by the distance of a score or two from the centres of the world's throbbing activities, is often sufficient to preserve men and women in the imperturbable calm of utter indifference to anything outside of themselves.

To rouse such, both in the city and

by the discipline of strict military rule, that workers are not kept always at the post of work. Reliefs are appointed, and guard is maintained by the same individuals only for a scheduled number of hours. With us, however, the same "guard" has been on duty almost without relief since the declaration of war in August last. The spirit of the fine women who first came into the breach is as high as ever, but it requires neither medicine, man nor mathemati-

Even war, with all its ravages, was no obstacle to the appearance of this little paper, which is a monthly, printed in fine readable type with magazine make-up, and is apparently under a most representative board of management. One of the names on the executive is that of Mrs. Meynell, one of England's leading essayists and poets, and familiar in a particular way to Toronto thru the very charming lecture delivered some time ago by Prof. Kylie, of Toronto University, who was privileged to the belief that no movement but ours would have had the courage to do it. the league for supplies for the University Hospital, but asks that every member of the committee should now urge the great need for supplies to be sent to the Red Cross undesignated to any particular hospital. A letter from Col. Ryerson tells of the heavy calls on the Red Cross, and of the number of small hospitals, quite unknown outside, but doing a very important work, that are absolutely dependent on the Red Cross for their supplies. It is so necessary that the Red Cross have a supply to be distributed where necessary by those who know the need at the front. The need for all Red Cross supplies is most acute, especially for hospital night shirts and bandages.

In Mrs. Warren's doll-manufacturing department they are so very short of pieces for doll-dressing that some of the young girls have been laid off. Perhaps it is not realized how small a piece of silk, muslin or lace can be used. If dressmakers and manufacurers and all friends of the league would send their pieces the committee would be deeply grateful.

Heated Argument Along Broadway About the Ethics of the Cut-Rate Ticket.

WARM WEATHER IS CLOSING MANY SHOWS

BY BRETT PAGE.

EW YORK, May 8.-All this season-which is now swiftly drawing to a close-Broadway and its theatrical environs has been eagerly and heatedly arguing about the ethics and the financial advisability of the cut-rate ticket. The arguments pro and con may be summed up in two short statements.

The theatrical managers who are in favor of the bargain counter sales, have this to say: "Why should we be compelled to sacrifice a near-success and the hope of building it into a real success, discharge our actors and house employes and pocket a loss on a play that might—by being given a bare living profit—forge ahead in public favor and come into the full-price list at least?"

Those against the cut-rate plan em-matically declare: "The cut-rate ticket a ruining the theatrical business." Many people would rather get a seat at a near-success for half-price than see a real success at full price. The scheme tends to ruin really worth while shows by drawing patronage away from all but the most emphatic hits, and brings upon the business of the theatre the stigma of unfairness and doubtful unrest."

The big producing managers recent-

scheme by which the cut-rate evil could be settled once for all, but, as yet, there has come no statement from hem that a uniform plan has been

The general concensus of opinion seems to be that there is no valid reason why a producing manager should not be permitted to try every scheme he can to make his show a success. save his investment and keep his em-ployes working. Why should he not be permitted to sell his show at a cut-rate, if the manufacturer of soap, shirts and breakfast food may sell his product at a cut-price to the great delight of his patrons? The question of ethics enters into but one phase of the problem. If a man who knows about the cut-rate coupon which reads, "With this coupon you can purchase a \$2 seat for \$1," is permitted to purchase his seat for a dollar and the man next in line, who knows nothing about the free cut-rate coupon, is compelled to pay \$2 for a seat right next to him, is it fair and honest?

That many really notable plays of this season owe their lives to the cut-rate coupon there is no doubt, and there is equally no doubt that many young playwrights, many actors and actresses and some producers have been given employment and profits who would have had a hard time without the cut-rate ticket plan.

At present it contains 299 seats, and the new plans call for a seating capacity of 1000. Several lots adjoining are to be purchased and an addition to the theatre built. The relinquishment of the Sullivan-

It is interesting to note, in this connection, that the bad season of vaude-ville in the west marks the first full season of the Marcus Loew manage-ment of the Sullivan and Considine Circuit. Certainly it would be strange if this bad year, the only one in many years, and likely to be the only bad year for many years to come, should result in the turning back to Considine and his affiliated interests of a circuit that is exceedingly profitable under normal conditions. In other words, can it be possible that Considine is to have the luck to escape the isolated bad season? He is the chief holder of stock in the Wynne Mathison. The title character, played by Edith Wynne Mathison, is that of the faithful wife of a man who is ambitious, but poor; who attains wealth by a sudden turn of fortune, and seeking to take full advantage of altered conditions, imagines his wife to be out of place among the new surroundings of wealth and power. When the husband asks for a divorce, intending to marry a woman whom he believes to be more of his own mettle, the wife refuses to take a step which she believes will mean ruin for three lives. Finally, the husband becomes governor and, finding the honor at last an empty one, eventually

"Sweethearts" Princess

JOYOUS in spirit, bright with gowns, and pretty girls, rich with melodies that swing into the mind ready to repeat themselves after once hearing, much merriment, and with a splendid cast, that sparkling operetta "Sweethearts," headed by the winsome Christie MacDonald, is to open at the Princess Theatre tomorrow evening, the return engagement being positively limited to one week. In providing a musical score of equal excellence adapted from a saucy old. Flemish tale, Victor Herbert, foremost of American composers, has set the work apart from the usual "musical comedy." The Herbert score is replete with fresh, songful melody that is beguiling on the instant and is never tinkling jingle. He has turned sordil sentiments into warm sensuous feeling, and over-trimmed the work with dreamy love plaints, lilting waltz themes and crashing, swinging marches, and the feet may dance with it, and fancy keep tune to it blithely. Around the mischievous tale of a little princess left by a conspiring prime minister in the tulip garden of a busy laundress to grow up among foster sisters, is a score of musical values. In addition to the principal waltz number "Sweethearts" are many others which have won fame-among these numbers of charm are "Every A little chilly around the knees, I cannot help think how much easier things are breaking how much easier things are breaking the desired from the case in the case in the fameta of the case in the fameta of the f melodies, the droll "Monk's Quartet,"

who have already created considerable comment hecause of the artistic manner in which they presented "The Servant in the House," one of the heaviest of dramatic productions, will be seen in the famous farcical comedy "Over Night" at the Grand Opera this week. This is the play that was written by Philip H. Bartholomae, and produced by William A. Brady, and scored the biggest success of any modern American comedy. Unlike several farces taken from the French "Over Night" is free from anything offensive. It is founded on the adventures of two young married couples on their honeymoon trip, and is constructed on such novel lines that one amusing situation follows the other so quickly that the audience is kept laughing from the opening to the close of the performance. The dialog is sparkling with wit, and is considered by many writers to be the brightest of any modern production. That "Over Night" will be given a finished production is assured, because the complete scenic equipment is on hand, and the majority of the members of the cast have already played with the road company wnen it was being presented at the high priced theatres. At the opening neau, a Parisian journalist, who on performance or Monday evening Miss rent events complete an unusually account of a political intrigue was, forced to flee from France. It is the fortunes of war that has driven Miss White into vaudeville, and the public -the vaudeville-going public-are the gainers. Miss White has sung abroad with the most important operatic organizations, and she has become internationally famous reaching that dig-nified stage where she is now recognized as one of the very finest so-pranos in the musical world. Her voice after, takes his leave. Lazare enters beggars description, but musical critics declare, however, that it is unusually rich in quality, of a rare timre, unusual range and wonderfully expressive. Paige Beauty Is Distinctive Beauty

No matter where you see a Paige car—on the road or parked among many other cars—you will recognize it instantly. Paige design and Paige lines are distinctive.

These cars are not "conspicuous" or "freakish," but there is that well-bred, refined tone to the Paige which makes it unforgetable.

If, for instance, you have seen a Paige "Six" pass down the street, you know precisely what we mean. This car stands out from other motor cars with an individuality all its own.

Quite unconsciously, you find yourself saying, "There goes a Paige Six." And—don't deny it—you utter these words either with the Pride or Desire of Ownership.

The "year ahead car"—that is what they are calling this new "Six." In it, you will find a new design, new lines, and an entirely new idea of value in popular priced Sixes.

> Fairfield Model SIX-"46"

In the Paige Star you will Jind a combination of high grade features nnot be secured with any other light Six-regardless of Price.

No matter how much money you may be prepared to pay, you cannot buy more exquisite lines than you will find in the body of the Paige "Six." It is an adaptation of the very latest European stream lines—the only body of its kind now offered on the American market at any price.

The Paige "Six" is long and graceful— 124 inches of wheel base and the 'deep chested" hood conveys an instant suggestion of unlimited power and speed.

Then, there is a modish one-man top, perfectly fitted Jiffy curtains, genuine leather upholstery throughout and a roomy, luxurious tonneau with two extra seats.

This is truly a seven-passenger car De Luxe a car of good taste, dignity and ultra refinement.

Beauty is an important consideration. You want a car that you can feel proud of—a car that will reflect your own good taste and judgment. But, with beauty you want to look for many other qualities before you purchase your car.

You can only appreciate this record-breaking "Six" by a careful inspection of the "detail" which spells the difference between "good enough" and real superiority. Note, for instance, that this car is equipped with the Gray & Davis starting and lighting system, Bosch Magneto, a Cork insert Multiple disc clutch, Cantilever springs. Then you will voluntarily declare that in the Paige Six there is a combination of high grade features which cannot be secured in any other Six—regardless of price. So, go to the Paige dealer today. Let him tell you the complete story of the Paige. Then, let him prove his case in a demonstration.

In the Jackson this real economy is combined with low first cost. With the Jackson factory organization and our thirteen years of development in manufacturing efficiency we are able to offer the three Jackson models for 1915 at a cost actually lower than competing cars of equal value.

Jackson cars have always been strong and sturdy. Thousands of Jacksons six, seven and eight years old are still giving faithful service. That tells-more than pages of argument and high-sounding phrases—of the sound engineering principles and the honesty of workmanship that are built into Jackson cars.

The perfect balance of the mechanical parts, the distribution of weight, the unsurpassed full elliptic spring suspension in front and rear, the smooth-running motor, all contribute to the tire economy of the Jackson. Jackson owners. over and over again, have told us of exceeding by 50 per cent. to 75 per cent. the mileage guaranteed by the tire manufacturers.

But Jackson care are more than simply economical. The full ellipti cspring suspension gives riding ease that is not exceeded in the highest priced cars, and the roomy bodies and seats with their deep, soft cushions give luxurious comfort. They are smooth running and silent. You can hear the motor, but you have to listen. The bodies are pure streamline, without an angle from front to rear, and with a deep, lasting, lustrous finish.

Girl Motorcycle Teurist.

"I have always wanted to visit Callfornia." said Miss Effie Hotchkiss of Brooklyn, N.Y. And now a motorcycle is helping her to make her dream come true. Mounted on a powerful two-wheeler, with her mother comfortably stowed away in the sidecar, this plucky girl rider has started for the Pacific Coast.

Miss Hotchkiss does not anticipate breaking any cross-country records, but she does expect to demonstrate that a girl can take a long distance motorcycle ride as well as a man and with as little difficulty. Miss Hotchkiss is an expert rider and is thoroly familiar with the mechanism of her mount, so that she is able to make repairs if necessary.

And Mrs. Hotchkiss is almost as conthusiastic about the tour as is her daughter. "I am looking forward to a very enjoyable trip." says the mother. "We intend to camp out as much as possible and only stop at hotels when compelled to do so. Time is no object with us. We expect to take plenty of time to enjoy the trip."

H. C. Bradfield of Indianapolis, has migrated to the world's greatest automobile manufacturing centre. He is now associated with the King Motor Car Company of this city, manufacturers of eight and four-cylinder automobiles. Bradfield, who is better known as "Brad of the Cole," has lately been associated with the Premier Motor Manufacturing Company.

For four years Bradfield was associated with J. J. Cole, manufacturer of the Standardized Cole; for three years he travelled continuously the United States and Canada; was known as Cole's globe trotter, and given universal credit for putting Cole on the map. He was connected with sales and advertising—chiefly in co-operating with dealers in the field.

Directly or indirectly, he has been connected with the important movement in Hoosier automobile circles for the past four years. During his association with Frank E. Smith, of the Premier Motor Manufacturing Co., this organization has been developing a wonderful business.

The King Motor Car Co. are determined upon the building of a permanent concrete selling force. They fully realize that merchandising is the big problem of the automobile industry today, and have foresight to know that the best place to devote their efforts for a big success is with the retail automobile dealer. French and British . Patriotism

In an interesting review of Mr. Coulson Kernahan's "Experiences of a Recruiting Officer," Sidney Dark, literary editor of The London, Eng. Daily Express, remarks that there is a good deal of sentimentalism in the ancedotes he tells, and they do not seem to

give any clear idea of the spirit of the British people, or of the reasons that have induced men to give up good salaries for the shilling a day, earned by private soldiers. It is evident, Mr. Dark comments, that "there is nothing in Britain to compare with the clear, conscious patriotism of the French. France, to the Frenchman, represents a definite idea, something that means so much to him, something that is so essential to his life that he is prepared to make any sacrifices so that France shall remain herself." Germany, he adds, is much the same thing to the German, but here the love of country is connected with dreams of world dominion and the duty of the patriot is to sacrifice himself—not to preserve his country, but to extend its boundaries and its influence. Russian patriotism is equally conscious, but is racial

Coming to the Englishman, who lacks not love of country, Mr. Dark thinks he has no precise idea of why he loves his country. This, he ascribes, to the fact that England has so rarely been in real danger of invasion and conquest. This long immunity has made the

British Adventure

Englishman slow to realize that Britain's greatness is certainly doomed unless the Allies contrive to smash the Prussian war machine. That thing is most valued which is threatened with destruction, but Britaiu has, hitherto, seemed to generations of Britons, so absolutely and eternally safe, that its existence is taken for granted. But if these millions men, who have flocked to Kitchener's armies, have not been moved by the ardent patriotism that compels the Frenchman, or the German, to sacrifice his all that his country may live or extend its dominion, what is it that has made them respond to the call of duty? Mr. Dark finds the reason in the love of adventure, which is the most fundamental of all British characteristics, and which the French, and even some Englishmen (among whom Mr. Dark admits he is one) find it so difficult to The men of Bideford, he writes, joined Drake on his mad voyages because they found life in Devonshire a little dull, and yearned

In the Spirit of the Sportsman

There is a good deal of truth in Mr. Dark's estimate of the impelling motive that has led Kitchener's soldiers to join the colors. It is of a kind with "the football spirit, the sportsman's spirit, the spirit of the adventurer." In much the same spirit,

the thousands of Canadians, of Australians, and of New Zealanders, have flung themselves into the fray, and endured the stiff training necessary to fit them for the hard conditions of this unprecedented war. Love of adventure is in the British blood. That it is which has carried them, year after year, and generation after generation, to the ends of the earth, and urged them to travel constantly towards the beyond. It is a spirit unknown to the average Frenchman and German, who either remain at home or seek the comforts of a settled civilization, when they do roam abroad. But Mr. Dark thinks that this British spirit is the spirit that makes victory absolutely certain, just as the spirit of Germany makes victory impossible. In all the combats of this war, it has been shown that the Britons, from home and overseas, are each and all full of individuality, initiative, and self-reliance. They do not need to be herded together to sustain their confidence. If their officers fall the leader can always be found, and this is the spirit that gains the

When Mr. Hall was at Aldershot, the first class had been five months in training, and as one general put it, were "just at the right fighting edge." "How good they are," Mr. Hall wrote, "can be best shown by the fact that the regulars are almost jealous of them. They are not machines; they are men, and if they went into action and had every officer killed, they would still know what to do, and how And they have as much confidence in themselves as the officers have in them. . They set out to show their officers what they could do and for five months they have trained for the joy of training, till even the most prejudiced professional soldier, has to admit that they have accomplished the impossible and are 'ready.' In five months they have done what all the authorities, who had written on military matters, contended would take at least two years." Their conduct in the field has amply confirmed his estimate. In the words of Sir John Flrench: "They have acquitted themselves with the utmost

The New Road

It is semi-officially announced that the government will run passenger trains over the National Transcontinental between Moncton and Winnipeg. We assume that for the present there will be no thru trains but only local train service. If there is to be anything like thru passenger service Mr. Cochrane should organize it on lines that are progressive and up-to-date.

In the first place Toronto should be accommodated. The N. T. R. does not go near Montreal and therefore the greater portion of thru travel from eastern Canada to the west must come from the City of Toronto and adjoining districts. There will have to be a sleeping and dinning-car service without change of cars from Toronto to Winnipeg and the old discarded sleepers of the I. C. R. will not answer the purpose.

Nor must the service stop at Winnipeg. The N. T. R. sleepers should go thru to Edmonton and Prince Rupert.

The service between Levis and Moncton will have to be more or less local in character for some time to come. The N. T. R. has really no eastern terminus. Moncton is an inland city of about 12,000 many miles from tide water. The only thru travel of much importance along the new transcontinental will originate in the Ontario Peninsula and go via Cochrane to the west. Would it not be well for the government to take over the Grand Trunk contract for running rights over the provincial road between Cochrane and North Bay?

Until recently, little was known regarding the operations in the Baltic Sea. From time to time, isolated statements appeared in the bulletins of the Russian and German Governments. but no connected account appeared until, about a fortnight ago, the Russian admiralty issued a review of the operations. If the review is to be taken as authentic it shows that the much vaunted German navy has had an even more inglorious record than it achieved in the North Sea. The Russians say that the foe usually ran away at the approach of their ships.

But one exception to this is recorded and it was accompanied by a very curious incident. Seeing what apparently was only a hostile torpedo flotilla the Germans decided to engage it and destroyed eight of the craft. Not till then did they make the startling discovery that they had been pumping shells onto their own ships which the report says, the enemy, in the dark mistook for Russian vessels. Towards the middle of August, the German ships ventured into the Russian mine fields, but only succeeded in losing the cruiser Magdeburg which ran aground in a

fog and was destroyed. About the middle of October the Germans started a series of submarine attacks which, according to the review, must have proved a bitter disappointment to them. Out of 19 attacks on Russian warships, only one succeeded in the sinking of the cruiser Pallada. In nine cases, the attacks were repulsed and in other nine, the submarines failed to discharge their torpedoes. In these operations the Germans lost five submarines. Reliance can be placed on the Russian official reports and it is clear that the German admiralty was exceedingly afraid of suffering naval losses. Russia has performed a valuable strategic service in compelling the retention of considerable German naval forces in the

CRUSTS AND CRUMBS

Wagner really had the sar as gifts of the gods, and these gifts are not as gifts to children, but as examples to men. Scriabine might have done much more than he has, but at least he has sown the seed, he has suggested the type, he has pointed the direction. Others must benefit by what he has done. Those who strive get more from their striving than they do who watch them, Our modern world is too apt to think of the achievement as everything. S CRIABINE, in developing the conception of color-music brought down an idea upon earth which, while not yet extinct needed revival. What will be done with it the ordinary musical critic is not competent to say, for he has probably studied the science and art of sound alone. Nor can the artist be relied upon for a judgment whose training and experience have centred upon the manipulation of the brush, the perfection of form, and the reproduction of existing things. In the elemental world of which Scriabine's tone-color poems afford a suggestion, form does of which Scriabine's tone-color poems afford a suggestion, form does not exist in our sense, nor do the harmonies which appeal to our ears offer any clue to what harmony may mean in a world where ears do not exist. This, of course, is the difficulty of the materialist whether he be and the convey impressions of color, of sound of form to appropriate and vehicles of consecutive and the convey impressions of color, of sound of form to appropriate and vehicles of consecutive and the convey impressions of color, of sound of form to appropriate and vehicles of consecutive and the convey impressions of color, of sound of form to appropriate and vehicles of consecutive and the convey impressions of color, of sound of form to appropriate and vehicles of consecutive and the convey impressions of color, of sound of the color of the col in a world where ears do not exist. This, of course, is the difficulty of the materialist whether he be scientific, philosophic, or religious. He judges everything from his present standpoint, and is unable to translate himself or his consciousness into the new terms which are nocessary in different conditions of being. But there is a clue to the maze, the golden thread of analogy, and we know, as far as we have been able to penetrate the mysteries of nature that what we call vibration seems to be repeated or paralleled on the various planes of existence, and in the various states of substance into which seems to describe the mysteries of substance into which seems to describe the mysteries of substance into which seems of out of which all other tones may be paralleled on the various planes of existence, and in the various states of substance into which force or energy, guided by consciousness resolves itself. One of the curious mistakes into which Dr. Richard Maurice Bucke fell in his great book, "Cosmic Consciousness," was the statement that the sense of color or music was seldom or, hardly ever present in dreams. He made this assertion, T believe, on imadequate evidence, but it fell into line with his views of evolution. I am quite satisfied that what we call evolution is not evolution at all. When a small store expands its business and enlarges itself, and in the course of time becomes a departmental store, covering a block or two, people call it evolution, but it is not and never will be evolution. Very scientific people fall into similar errors about life, or what Bernard Shaw would call the lifeforce. In life exist all the potentialities, Life clothes itself in all kinds of forms or vehicles, and puts forth all manner of manifestations. That we came to see some things that we had not previously seen does not constitute evolution either for the things we perceive or for our ourselves, altho I am quite willing, for convenience sake, to call it evolution. or anything else that may be agreed upon. If we get rid of the convenparalleled on the various planes of existence, and in the various states or anything else that may be agreed upon. If we get rid of the convenupon. If we get rid of the conventional evolutionary idea we shall save ourselves the trouble of seeking non-existing and quite truly missing links. The bearing of all this on Scriabine's music and color scheme is merely to suggest that his design merely reproduces on, or adapts to our plane, and the senses we avail ourselves of here, the phenomena which, relatively noumenal to us, are the normal methods of expression, artistic, or as substitutes for our speech, on inner places of existence

NUMBER underlies every form, is the teaching of the Secret Doctrine, and number guides the manifested universe; numbers are harmonious, proportions guide the first differentiations of homogeneous substance into heterogeneous elements; and number and numbers set limits to the formative hand of Nature. The same potential powers as exist in the creative forces in Nature are present in Man, but to use them are present in Man, but to use them or to evoke these powers a perfect knowledge of the correspondences between colors, sounds and numbers is essential. Perhaps this is why Scriabine was cut short in the work he had but imperfectly outlined, but it adds none the less to the interest attaching to the specimens that remain to us of his translations from the next plane of consciousness. the next plane of consciousness. There are other workers striving after results in the same direction and there are many who have developed the faculties latent in all, and are able directly to cognize the phenomena of inner states and planes. To represent these things in terms of our present world is perhaps a natural desire, when we are reducing everything to a mechanical basis everything to a mechanical basis,

red in the limited circle in Toone of Scriabine's compositions is to be produced in Massey Hall on the 13th, with the color-harmony effects which he designed as complementary to his tone-harmonies, and additionally illustrative or interpretative of his musical ideas. The piece to be given is Scriabine's "Poem of Fire." The Russian Symphony Orchestra has a fine reputation, and the introduction of this decided novelty in a concert program of the usual character should not disturb those of the old school to whom such, innovations savour of desecration. Wagner caused much heart-burning in his day, and so, no doubt may Scriabine and his followers. Scriabine himself has passed away, just as this third performance on this continent of his color music was announced. He seems to have died rather suddenly, and his passing adds another to the long list of similar apparently premature conclusion to carcers from which much might have been expected for humanity. I regard the work of such men as gifts of the gods, and these gifts are not as gifts to children, but as examples to men. Scriabine might have been expected for humanity. I regard the work of such men as gifts of the gods, and these gifts are not as gifts to children, but as examples to men. Scriabine might have been expected for humanity. It is unquestionable to those who have developed the finer faculties necessary to observe such phenomena, that thought of all kinds, passion, desire sentiment, intellectual research, specu-lation or argument, philosophic enout of which all other tones may be drawn. In the occult correspondences the relation of red, yellow and blue to the relation of red, yellow and blue to C. E and G on the ordinary plano scale are usually regarded as established, but without going into this complex question it may be remarked that Scriabine adopted a different set of correspondences which may be noted: C (middle) 256 vibrations per second, red; C sharp, 277, violet; D, 288 velicw: D, sharp, 219, steel: E, 241. second, red; C sharp, 277, violet; D, 298, yellow; D sharp, 319, steel; E, 341, pearl white; F, 362, deep red; F sharp, 383, blue; G, 405, orange; G sharp, 426, purple; A, 447, green; A sharp, 469, steel; B, 490, p. blue; C, 512, invisible to the eye." Scriabine employed a scale of his own in his "Prometheus," and the effect on the ear is perhaps not stranger than some of the older scales that have now been abandoned. Our present scale, is, of course, a compromise, and so no exception can be taken to the choice of a musician who promise, and so no exception can taken to the choice of a musician who prefers something different. Scriabine's scale is C, D, E, F sharp, A. B flat. The chord which is the harmonic foundation of "Prometheus" may revoit the conventional musician. It is (left hand) C, F sharp, B flat (right hand), E, A, D. Once one gets accus-tomed to the unwonted combination a new sensation of accord will rise out of it. To say that we do not like may mean anything or nothing. There is nothing which is not liked by some forms of consciousness and disliked by others. We may be sure that any new manifestation of being must be distasteful to the greater part of already existing forms, and organs of sense trained to certain normal experiences rarely find pleasure in abnormal experiences until they become accustom-
