J. M. MIGHT, General Manager.

INTRODUCTION.

To our Patrons and the Business Public generally. We take pleasure in drawing your attention to the issue of our Gazetteer for the Provinces of Ontario, Manitoba, North-West Territories, British Columbia and City of Montreal. This is our Fifth Biennial issue of the Ontario Gazetteer, and the Second of the other Provinces. We feel that we have done our work faithfully, and as well as it is possible to have a work of this kind done in the time in which it is necessary to issue. We employ only reliable men who understand the business, and we feel satisfied that more information about the business of the Dominion, that is required by business men, can be found in our publications than can be procured from any other source for 100 times the price of our Books, and it only requires a thorough look through them to convince business men. As an Advertising Medium there is nothing can equal it for the amounts we charge.

Yours respectfully,

MIGHT'S DIRECTORY CO.

J. M. MIGHT, *General Manager.*

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North American Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41, (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law. this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia at the time being.

The period of service is three years.

The strength of the Active Militia (including a Permanent Force. limited by the present Militia Act to 1,000 men) was, in October, 1891:—Cavalry. 2,000; Field Artillery, 1,440; Garrison Artillery, 2,252; Engineers, 179; Infantry, 31,733; total, 37,710.

DESCRIPTIVE OF CANADA.

The Dominion of Canada is by far the largest of all the British possessions, and has an area nearly equal to that of Europe, or in other words, it comprises about one-sixteenth of the land surface of the globe. It occupies the whole northern part of North America, with the exception of the British colony of Newfoundland; the territory of Alaska, which belongs to the United States; and Greenland, which belongs to Denmark. The name Canada was first applied to the country by Jacques Cartier, and is supposed to be derived from an Indian word "Kannatha," meaning a village, or collection of huts. The Dominion of Canada is a confederation of the colonies of British North America, constituted in 1867 by the British North America Act of that year (30 Vic., chap. 3). The first to unite under the provisions of that statute were Upper and Lower Canada (now Ontario and Quebec), Nova Scotia, and New Brunswick; and to these have been added Manitoba and the N. W. Territories in 1870, British Columbia in 1871, and Prince Edward Island in 1873. Part of the N.W. Territories was subsequently divided into provisional districts as follows:—In 1876, Keewatin; in 1882, Assiniboia, Saskatchewan, and Athabasca.

GEOGRAPHY AND PHYSICAL FEATURES.

Canada is bounded on the North by the Arctic Ocean; on the South by the United States, and the great lakes Superior, Huron, Erie, and Ontario; on the East, by Newfoundland and the Atlantic Ocean; and on the West, by the Pacific Ocean and Alaska. Area, 3,470,257 square miles, in addition to which there is a water area of lakes and rivers calculated at 140,000 square miles. The whole country is characterized by vast lakes, rivers and plains, but, with the exception of British Columbia, it is nowhere of a strictly mountainous character. The Laurentide Range, chiefly in the basin of the River St. Lawrence, runs SW to NE, and has a total length of about 3,500 miles, and an average elevation of 1,600 feet.

CLIMATE OF CANADA.

The climate of Canada is dry, healthy and invigorating, and, owing to the great area of the country, extending over 20 degrees o latitude, or from the latitude of Constantinople to the North Pole, has a wide range of temperature. The extreme dryness of the atmosphere, however, makes both cold and heat less acutely felt than the readings of the thermometer would lead people to expect. In the Maritime Provinces the climate somewhat resembles that of the British Isles; in Ontario, Quebec and Manitoba the summers are warm and the winters cold, but the cold is pleasant and bracing, and the snow that generally covers the ground during the winter is of the greatest benefit alike to the farmer, the lumberman and the merchant. In the North-West Territories cattle graze at large all through the winter months; and on the Pacific slope, west of the Rocky Mountains, the climate is milder than in any other part of the Dominion.

POPULATION OF CANADA.

According to the census returns the population of Canada was as follows:

1861	3,174,442
1871	3,635,024
1881	4,324,810
1891	4,829,411

No person can hold more than one pre-emption claim at a time. Prior record or pre-emption of one claim, and all rights under it, are forfeited by subsequent record of pre-emption of another claim.

Land recorded or pre empted cannot be transferred or conveyed till after a Crown grant has been issued.

Such land, until the Crown grant is issued, is held by occupation. Such occupation must be a bona fide personal residence of the settler or homestead settler, or his family or agent. Indians or Chinese cannot be agents.

The settler must enter into occupation of the land within thirty days after recording, and must continue to occupy it.

Continuous absence for a longer period than two months consecutively, of the settler or homestead settler, and his agent or family, is deemed cessation of occupation; but leave of absence may be granted not exceeding four months in any one year, inclusive of the two months' absence.

Land is considered abandoned if unoccupied for more than four months in the aggregate in one year, or for more than two months consecutively.

If so abandoned, the land becomes waste land of the Crown, without any cancellation of the record.

The fee on recording is two dollars.

The settler may either have the land surveyed at his own instance, (subject to rectification or bounaries), or wait till the Chief Commissioner causes it to be surveyed.

After survey has been made, upon proof, by declaration in writing to himself and two other persons, of occupation from date of pre-emption, and of having made permanent improvements on the land to the value of two dollars and fifty cents per acre, the settler, on producing the pre emption certificate, obtains a certificate of improvement.

After obtaining the certificate of improvement and paying for the land, the settler is entitled to a Crown grant in fee simple. He pays five dollars therefor.

PAYMENT FOR LAND AND CROWN GRANTS.

The price of Crown lands pre-empted, is *one dollar* per acre, which may be paid in *four equal instalments*, as follows—First instalment, two years from date of record or pre-emption, and each other instalment yearly thereafter, uutil the full amount is paid. But the last instalment is not payable till after the survey.

The Crown grant excludes gold and silver ore, and reserves to the Crown a royalty of five cents per ton on every ton of merchantable coal raised or gotten from the land, not including dross or fine slack. It also reserves to the Crown, since April 7, 1887, all timber on the land, except for domestic purposes. A pre-emptor, however, can obtain a license to cut the timber of his pre-emption on payment of dues at the rate of twenty-five cents per 1,000 feet board measurement.

No Crown grant can be issued to an alien who may have recorded or pre-empted by virtue of his declaring his intention to become a British subject, unless he has become naturalized.

The heirs or devisees of the homestead settler are, if resident in the province, entitled to the Crown grant, on his decease.

If they are absent from the province at the time of his death, the Chief Commissioner may dispose of the pre-emption, and make such provision for the person entitled thereto, as he may deem just.

PRE-EMPTION FOR PARTNERSHIP PURPOSES.

Partners, not exceeding four, may pre-empt as a firm 160 acres each west of the Cascades, to each partner, and 320 acres east of the Cascades, to each partner.

Each partner must represent his interest in the firm by actual residence on the land, of himself or agent. But each partner, or his agent, need not reside on his particular pre-emption.

The partners, or their agents, may reside together on one homestead, if the homestead be situated on any part of the partnership pre emption.

For obtaining a certificate of improvement, it is sufficient to show that improvements have been made on some portion of the claim, amounting in the aggregate to two dollars and fifty cents per acre on the whole land.

MINING LAWS.

FREE MINERS.

"Free Miners" only can have right or interest in mining claims or ditches. A "free miner" must be over sixteen years of age. His certificate may be for one year ($5), or three years ($15), and is not transferable. He may enter and mine Crown lands, or, on making compensation, lands occupied for other than mining purposes. To recover wages, must have free miner's certificate.

MINERAL CLAIMS.

"Mineral claims"—that is, claims containing, or supposed to contain minerals, precious or base (other than coal), in lodes or veins, or rock in place—shall be 1,500 feet long and 600 feet wide, and, as nearly as possible, in rectangular form. Must have three posts (or tree posts) at equal distances along the centre line, with a notice on each. Only one claim on the same lode or vein can be held, except by purchase. Quartz claims are deemed to be mineral claims.

To lawfully hold a Crown grant for a mineral claim, it must be surveyed by a surveyor approved by the Land Office; notice of application for the grant must be posted conspicuously on the land, and on the Government office of the district, also inserted for sixty days in the Government Gazette and a newspaper, if any, circulating in the district, and proof must be given to the satisfaction of the Government offices that $1,000 have been bona fide expended in money or labor upon the claim. Or a Crown grant may be got by paying $25 per acre to the Government, in lieu of representation and expenditure on the claim.

General provisions for ordinary mining claims apply to mineral claims as far as may be.

The proper representation of a "mineral" claim requires that the sum of one hundred dollars, in money, labor or improvements shall be expended in the first six months of every year upon the claim, to the satisfaction of a Gold Commissioner, and that the owner shall have obtained a certificate from the Gold Commissioner to that effect, within six months from the location of the claim, and thereafter within the first six months in every year, and shall have recorded the certificate immediately after its issue.

An annual tax of $1 per acre, or fraction part of an acre, of every mineral claim, is payable on the 31st December.

Leases of mining ground, ditch privileges, etc., may be issued, but will not in general be granted for a longer term than ten years, or for a quantity of ground greater than—

In creek claims, on abandoned creeks, one mile and a half in length.

The regulations as to flumes, ditches, and drainage need not be detailed, but it may be stated that the water taken into a ditch or sluice has to be measured at the ditch or sluice head. No water should be taken into a ditch or sluice except in a trough placed horizontally at the place at which the water enters it. One inch of water means half the quantity that will pass through an orifice two inches high by one inch wide, with a constant head of seven inches above the upper side of the orifice.

Meshes of nets used for capturing salmon shall be at least six inches extension measure, and nothing shall be done to practically diminish their size.

Drifting with salmon nets shall be confined to tidal waters, and no salmon net of any kind shall be used for salmon in fresh waters.

Fishing for salmon shall be discontinued from six o'clock a.m. on Saturdays, to six o'clock a.m. of the following Monday, and during such closed time no nets or other fishing apparatus shall be set or used so as to impede the free course of the fish, and all nets or other fishing apparatus set or used otherwise shall be deemed to be illegally set and shall be liable to be seized and forfeited, and the owner or owners or persons using the same shall be liable to the penalties and costs imposed by the Fisheries Act.

Before any salmon net, fishing boat, or other fishing apparatus shall be used, the owner or persons interested in such net, fishing boat or fishing apparatus shall cause a memorandum in writing, setting forth the name of the owner or persons interested, the length of the net boat, or other fishing apparatus and its intended location, to be filed with the Inspector of Fisheries, who, if no valid objections exist, may, in accordance with instructions from the Minister of Marine and Fisheries, issue a Fishery license for the same, and any net, fishing boat, or fishing apparatus used before such license has been obtained, and any net, fishing boat or fishing apparatus used in excess or evasion of the description contained in such license, shall be deemed to be illegal and liable to forfeiture, together with the fish caught therein, and the owner or person using the same shall be also subject to fine and cost under the Fisheries Act.

All salmon nets and fishing boats shall have the name of the owner or owners legibly marked on two pieces of wood or metal attached to the same, and such mark shall be preserved on such nets or fishing boats during the fishing season, in such manner as to be visible without taking up the net or nets; and any net or fishing boat used without such mark shall be liable to forfeiture.

The Minister of Marine and Fisheries shall, from time to time, determine the number of boats, seines or nets, or other fishing apparatus to be used in any of the waters of British Columbia.

TROUT FISHERY.

No one shall fish for, catch or kill trout from the 15th October to the 15th March, both days inclusive in each year.

Provided always that Indians may, at any time, catch or kill trout for their own use only, but not for the purposes of sale or traffic.

NANAIMO. A prosperous incorporated city on the east coast of Vancouver Island, and on the E & NR, about 73 miles from Victoria. Nanaimo is the commercial centre for the towns of North, South and East Wellington, Northfield and Departure Bay, and contains beyond doubt the most comfortable and pretty residences that exists in any mining centre on the continent. Has daily railway communication with the capital. It takes its name from the local Indian tribe, and, as a general thing, the same name is applied to the surrounding region for many miles, including the districts (containing about 100 square miles), known on the Government map as Mountain, Cedar, Cranberry, Douglas, Dunsmuir, Newcastle and Wellington. The city has a background covered with a heavy forest of cedar and fir, while hidden beneath are untold treasures of bituminous coal of various strata and depth, which forms the staple of Nanaimo and its neighbourhood. Approached from the harbor the city appears to nestle at the foot of Mount Benson, a hill of considerable elevation, which is nevertheless several miles distant. This year a carriage drive has been built up to the summit, from which the Gulf of Georgia appears in panoramic view for upwards of 100 miles. The building of the city and the laying out of the streets were necessarily affected by the irregular conformation of the coast line, the various indentations of the harbor having caused many deflections in the streets, noticeable to a stranger landing for the first time.

Nanaimo possesses every modern improvement usually found in cities of similar size; telephonic and telegraphic communication, gas works, literary societies, libraries and well conducted newspapers.

The main source of wealth of Nanaimo is the valuable coal deposits. In addition to this, excellent timber and building stone of the finest quality including marbles of finest texture, gold, silver, iron and copper veins are to be found in inexhaustible quantities. Nanaimo is a solid city with never-failing resources.

Nanaimo was not built with the prospect of becoming a commercial emporium or business centre, as is commonly the case with new cities on the Pacific Coast, but was originally intended to be simply a mining village and trading post by its founders—the Hudson Bay Company. This port is the largest export town in B.C., the bulk of shipping entering there more than doubles the *rest* of the *ports* of B.C. in tonnage. The harbor is safe and commodious, affording secure anchorage for shipping and excellent facilities for quays and wharfs near the shore, where deeply-laden vessels may lie with safety. A dry dock of the largest capacity is projected for construction at a site offering superior natural advantages near the shipping wharves. It is indeed a pretty sight to see upon a summer evening the numerous boating and yachting parties which take their recreation upon the placid waters of the harbor or thread their course amid the islands situated from one to three miles from the city.

The climate differs little from that of Victoria, and the prevalence of high winds from the sea is not as frequent as in the neighborhood of the capital. The dry weather in summer often continues without interruption for weeks together. As a whole the climate is pleasant.

Amongst the most prominent incorporated institutions are the Vancouver Coal Mining Co., Nanaimo Electric Light Co., Nanaimo Water Co. and Gas Co., B.C. Tannery and Shoe Factory end the Bank of British Columbia. The public schools are well conducted and afford excellent educational facilities. The Sisters of St Ann have a large and flourishing educational establishment for girls, conducted with their well-known ability and care. The agricultural capabilities of the district surrounding Nanaimo are but limited, although in the valley of the Nanaimo and Millstream rivers, chiefly on

NELSON. An important mining town in the Yale-Kooteney district on Lake Kooteney, about 190 miles south-east of Revelstoke on the C P R. It is also the terminus of the Columbia and Kooteney Railway. It has steamboat communications with several points in Idaho, U.S., and also with Ainsworth and all points on Lake Kooteney. The C P R have established telegraph communications with this town, and it is expected that it will not be long before the C P R build a line directly through the district passing through the Crow's Nest Pass in the Rockies and on to Fort Macleod and Lethbridge, thus opening up what promises to be the richest mineral district in the province. It contains several churches and schools and is settling very fast with enterprising people. Mail triweekly. Population, 1,500. James A Gilker, postmaster

NEW CALEDONIA. A district containing a number of settlements and posts of the Hudson Bay Co in the far north. These posts are principally along the Peace and Parsnip rivers and their tributaries, and are peopled largely by Indians with whom a fur trade is done, and a few miners. The only means of communication is by the Hudson Bay Co's pack trains, which go periodically from post to post.

NEW WELLINGTON. (See North field).

NEW WESTMINSTER. (Commonly called Westminster) was founded by Col. Moody, of the Royal Engineers, in 1858. It is situated on the north bank of Fraser River, 16 miles from its entrance into the Gulf of Georgia, and the situation was chosen both on account of its importance from a military point of view and because of natural advantages as the site for a commercial centre. The Fraser is the most important river of British Columbia. It is the great waterway which reaches from the Rocky Mountains in the interior, and, in its course to the ocean, flows through some of the richest gold mines and most fertile agricultural lands on the continent. The river is navigable as far as Westminster, and some miles above, for vessels drawing 21 feet or more. The site on which the Royal city now stands, not many years since was covered with a forest, the growth of which was of such a nature that the clearing of the land was a somewhat expensive operation. Now that it has been done, an unrivalled view of the surrounding country can be obtained from almost any part of the city's hillsides.

New Westminster has made rapid progressive strides within the last four or five years. This progression has been noticeable since the Canadian Pacific Railway entered it, making that city its fresh water terminus on the Pacific Coast. The business passing over this line already is a large one, and constantly on the increase. The Great Northern also has its north-western terminus at New Westminster, by means of which railway the city has connection with the entire system of transcontinental and Pacific Coast railways of the United States. A new epoch appears to have reached the city, as in all its industrial, manufacturing and commercial lines the evidences of increased activity and prosperity are apparent. The established manufacturers are extending and increasing their capacity, whilst new ones are in process of construction. Entirely new industries in the province are centering themselves either within the corporation or in close proximity thereto.

The Fraser River salmon fisheries are amongst the leading industries. The great yearly yield under this head is simply astonishing. Next to the salmon fisheries comes the lumber. This to the Royal City is likely hereafter to prove a most important one. It is not a fluctuating industry like the salmon and cannery trade. Already there are three very extensive mills within the city limits, those of the Royal City Planing Company, the Brunette Mills, and the McLaren-Ross Saw Mill Company. This mill is about two miles above the city, on the right bank of the Fraser River. Besides these there are two or three smaller mills, which cut principally for the local market, and also two ship yards, which turn out all manner of small craft and do a large and constantly increasing business.

In other lines of manufactures the city is well represented. Here is situated the only woollen mill in the Province, or, west of Ontario, in Canada. Extensive machine shops, foundries, carriage works, wholesale jobbing houses, retail emporiums and extensive warehouses, in which are to be obtained all classes of goods, merchandise and manufactures, are to be found in New Westminster. In brief, it is a better commercial mart, on a somewhat lesser scale, than is its patronymical namesake, on the bank of the English Thames.

New Westminster's position is such that its future prosperity is assured. It is in the very heart of the best agricultural section of the Province. With such unrivalled agricultural municipalities contributing to the city's prosperity as are the Delta, part of Richmond, Surrey, Langlea, Matsqui, Sumas, Chilliwack and Maple Ridge, the city must continue to flourish. That great natural highway—the noble Fraser River—traverses like unto a hugh canal a country, the superior of which is nowhere to be found in point of fertility, and pours the traffic it carries on its bosom into the lap of New Westminster.

A tri-weekly line of steamers plys between this city and Victoria, as well as a daily line to down river points; whilst a daily line (Sundays excepted) plys between the city and points up as far as Chilliwack, and occasionally to Hope, some 80 miles above the city. The Canadian Pacific Railway gives it excellent connection with all points along its extensive system from ocean to ocean by rail, and, as intimated above, the city has unbroken railway connection with all points south, by way of the New Westminster Southern extension of the Great Northern Railroad. It will be seen that the shipping facilities and means of transportation enjoyed by New West-

minster are not excelled by those of any other city on the coast.

New Westminster is situated 12 miles distant from Vancouver, with which city it is connected by a branch of the Canadian Pacific Railway, and by an electric tramway service. The cities are connected by telephone and telegraph. It is on the *tapis* to construct two more tramway lines. The traffic between these twin cities is large, and daily on the increase.

All the secret, benevolent, and charitable societies and institutions are represented in the city. Its sacred edifices are numerous, whilst its educational facilities are the very best. Here are erected the official buildings for the District of New Westminster, such as the Provincial Jail, the Supreme and County Court and Registry buildings. The Provincial Exhibition building, capable of holding 5,000 people; the Provincial Asylum for the Insane and the Provincial Penitentiary; and private as well as public hospitals.

The City has an excellent system of waterworks, (costing $400,000). The water flows by gravitation from a mountain lake 8 miles distant, it also has an efficient fire brigade fully equipped. Amongst its citizens are some of the most energetic and enterprising people to be met with in the country. Here there is also concentrated much wealth, and those possessed thereof, as a rule, live a life of ease and enjoyment. As a place wherein to reside few places possess greater facilities for enjoyment and recreation and other social advantages than does New Westminster. Hence it is that its citizens are proud of the Royal City, and they have a just right to be so, for it is in every respect a most desirable place, either as a commercial, manufacturing, shipping, educational or social centre wherein to reside.

The municipalities whose trade legitimately belongs to New Westminster are: first in importance Chilliwack, with a population estimated at 4,500; the Delta with 2,500; Langley 2,500; Maple Ridge and Surrey, each with 2,000, and Richmond with about 1,000 inhabitants. These are daily increasing in population, wealth and importance. Other municipalities are also being formed in the District.

Everything indicates that New Westminster is destined to become one of the great centres of trade and commerce; a city of metropolitan dimensions, whose trade and commerce will be as wide and as famous as that of any other centre on the coast.

Its chief wealth is derived from its lumber and salmon industries. The farmers of the Fraser Valley (which is by far the best settled district in British Columbia) here dispose of the bulk of their produce, and purchase implements and household requisites for their ranches. Population 10,500. Telegraph, GNW and CPR. Express, Dominion. Telephone communication. John C Brown, postmaster.

VALDES ISLAND. A large Island off the east coast of Vancouver Island, about 17 miles north of Nanaimo, and 5 miles from Gabriola Island, the nearest post office.

VANCOUVER, B C. The City of Vancouver is situated on Burrard Inlet, at the western terminus of the CPR, and the eastern terminus of the steamship lines plying between Asia and Canada.

No City in America is more beautifully or healthfully situated. Few harbors in the world equal the harbor of this City and none surpass it for convenience, beauty, safety, and accommodation.

Burrard Inlet could bosom the entire British commercial and naval fleets.

The beauties of nature are varied and manifold. Every lot in the City is a site for a house of comfort, commanding scenery of a very high order.

Everywhere are the signs of life and enterprise. Business men are full of hope and vigor. Factories are building up rapidly. Railroads are making this their objective and terminal point.

Large monetary institutions of well developed national importance are looking here for a permanent centre.

The more enterprising and progressive are laying plans for a splendid museum, library, zoological and botanical gardens. Colleges are already on the move, and in a short time, Vancouver will have everything of comfort and beauty, of educational, social, scientific, political and religious worth, to be found in any of the Cities on the Continent.

HEALTH.

Drainage.—The City has a most comprehensive system of sewerage under course of construction, as the needs of the growing population call for it. This is constructed on the principle of the Waring separate system, 7½ miles of which are in successful operation, and 12 miles more are to be constructed during this summer. All the latest improved sanitary devices for ventilating and flushing this system automatically have been introduced, and when completed will form one of the most perfect systems of house drainage on the Continent, connection therewith is made compulsory.

Mortuary Statistics.—For the four years preceding the 31st day of December, 1891, the annual death rate has never exceeded 9 to the 1,000 of population, and has fallen as low as 7, thus making an average for the 4 years of 8 in the 1,000, a showing unequalled in the Dominion.

Zymotic diseases are not very prevalent and when found are usually of a very mild type, only

There are two shipbuilding yards. This is the beginning of an important and extensive industry. No City in the world has better natural advantages for shipbuilding.

There is a fine electric tramway service in the City, and the two Cities of Vancouver and New Westminster are connected by a splendid tram way. A car leaves each City every hour, and makes the trip of 12 miles in about 45 minutes. The service is from 8 a m to 11 p m. The Lulu Island tramway is under construction and will connect Vancouver with a magnificent farming country.

In addition to the C P R which has been running into the City since its founding, the Great Northern, and Northern Pacific, are both expected to be built within a few months, thus connecting the terminal City with two very important railway systems.

Board of Trade.—The Board has had an actual existence ever since its organization, and has done much for the good of the City. Reports and statistical information prepared by the Board have been extensively extracted from, and favorably commented on.

Special features at present are full standing committees and trade sections representing almost every line operated in the City.

The first annual banquet was held in Hotel Vancouver, being a thoroughly representative gathering, the local Legislature having adjourned for purpose of attending.

The last banquet took place in April, 1891, on this occasion Hon Edward Blake delivered his first address in British Columbia, and an able one it was. In a rising City like Vancouver it is pleasing to know that business and other interests are carefully looked after by an intelligent and active Board of Trade.

Information on the City and Province is at all times cheerfully supplied by the officials of the Board.

Vancouver Board of Trade was incorporated on 24th November, 1887, with 31 charter members. The following is a list of its officers since organization:—

1887, 1888, 1889.—David Oppenheimer, president; Thomas Dunn, vice-president; John Devine, to April, 1888, secretary; A H B MacGowan, from April, 1888, secretary.

Present membership, 140.

Schools.—One of the first things the intelligent visitor or emigrant looks at in arriving in a City (particularly a new one), is its school and educational system.

In Vancouver the examination will bring satisfaction, the schools are in good shape, and the system is doing grand work, the progress made being remarkable.

The system is carried on under a Provincial Statute, being altogether free and taken advantage of by the citizens generally.

The City of Vancouver was created a School District in 1887, the first Board being composed of William Brown, John Devine, G I Wilson, G F Baldwin, Dr McGuigan, A G Johnson One teacher in the old East End school was shortly followed by a second. In 1888 schools were opened in West End and Mount Pleasant. In 1889 Central school was opened with two teachers. December 1889 witnessed the advent of a High school.

The first of 1892 there were:—Teachers—High school, 2; Central school, 8; East End school 8; West End school, 5; Mount Pleasant school, 4, with provisions made in estimates for 1892-93 for the following additional teachers:—High school, 1; West End school, 3; Mount Pleasant school, 2; Fairview school, 1; where most needed, 3, or a total for the City of 37 teachers which will no doubt be required before the end of the fiscal year.

The buildings consist of:—High school, wood; Central school, 8 rooms, brick; East End school, 8 rooms, brick; West End school, 5 rooms, wood; Mount Pleasant school, 4 rooms, wood, It is intended during 1892, to erect:—High school, 8 rooms, brick; West End school, 8 rooms, brick; Mount Pleasant school, 8 rooms, brick; Fairview

VICTORIA. The capital of British Columbia, is situated on the southern extremity of Vancouver Island, facing the straits of Juan de Fuca, 38 miles from Port Townsend Wash, 72 from Nanaimo, 73 from New Westminster, and 750 from San Francisco, of which it is the first available seaport going north. It is, without doubt, the prettiest town in the whole of the province. It has a population which is made up of Europeans, Indians and Chinese. The chief wholesale business houses in the province are established here, as it was the centre of trade and the basis from which supplies were forwarded, not only for the coast, but also for the entire trade of the interior, previous to the construction of the Canadian Pacific Railway. This has caused it to become one of the wealthiest towns for its size on the Pacific coast. Nearly all the old pioneers of British Columbia, when they retire, make it their home, having no further desire than to spend their few remaining days in this lovely spot. It resembles greatly a town in the south of England on account of the well-laid out gardens and the great similarity of climate. Here rose trees attain great perfection, the soil being particularly adapted to their culture. It is the headquarters for the salmon and fur trade, and is also the terminus of the Esquimault and Nanaimo Railway. Another line is projected, called the Victoria and Saanich Railway, which is to be connected to the mainland by a steam ferry. Not far from this town is Esquimault, which is the Pacific Naval Station, where the dry dock is situated. There are numerous churches and schools, together with substantial structures and handsome residences, impress one with evidences of wealth, health and culture. There are three daily papers, the Colonist, the Times and the News, each publishing a weekly edition. The harbor is landlocked and accommodates all vessels drawing 18 feet of water. The city was incorporated in 1862, and has electric street railways, electric lights, telephone system, and all modern improvements. Assessed valuation of real and personal property, $17,700,000; bonded indebtedness, $2,500.00; rate of taxation, 15 mills. The city owns the waterworks, of which there is a plentiful supply of pure water, together with an efficient fire brigade. Population, 23,153. Telegraph, CPR. Express Dominion. Mail daily. Noah Shakespeare, postmaster.

HOMESTEAD REGULATIONS.

All even numbered sections excepting 8 and 26 are open for homestead entry (160 acres) by any person, sole head of a family, or any male over age of eighteen years.

Entry may be made personally at the local land office in which the land to be taken is situated, or if the homesteader desires he may, on application to the Minister of the Interior, Ottawa, or the Commissioner of Dominion Lands, Winnipeg, receive authority for some one near the local office to make the entry for him. A fee of $10.00 is charged.

Under the present law homestead duties may be performed in three ways, to be decided on making entry :

1. Three years cultivation and residence, during which period the settler may not be absent for more than six months in any one year without forfeiting the entry.

2. Residence for three years within two miles of the homestead and afterwards actual residence for three months in a habitable house erected upon it prior to application for the patent. Ten acres must be broken the first year after entry, fifteen acres additional in the second and fifteen in the third year ; ten acres to be in crop the second year and twenty-five acres the third year.

3. A settler may reside anywhere for the first two years, in the first year breaking five, in the second cropping said five and breaking additional ten, also building a habitable house. The entry is forfeited if residence is not commenced at the expiration of two years from date of entry. Thereafter the settler must reside upon and cultivate his homestead for at least six months in each year for three years.

Application for patent may be made before the local agent, any homestead inspector or the intelligence officer at Medicine Hat or Qu'Appelle station.

Six months' notice must be given in writing to the Commissioner of Dominion Lands, by a settler of his intention prior to making application for patent.

Intelligence offices are situated at Winnipeg, Qu'Appelle Station and Medicine Hat. Newly arrived immigrants will receive at any of these offices information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing lands to suit them.

Pre-emptions are by law abolished, and may not be entered for after 1st January, 1890.

A second homestead may be taken by anyone who has performed the duties to entitle him to a certificate of recommendation for the first homestead prior to the second day of June, 1887.

All communications having reference to lands under control of the Dominion Government, lying between the eastern boundary of Manitoba and the Pacific Coast should be addressed to H H Smith, Commissioner of Dominion Lands, Winnipeg.

WINNIPEG. The largest and most prosperous city, as well as the commercial metropolis of the Province of Manitoba, is situated at the confluence of the Assiniboine and Red rivers (both of which are navigable for a considerable distance), 1,860 miles by rail north-west of Montreal, and 40 miles south of Lake Winnipeg. The city has sprung up since 1870, prior to which time it was only a trading station of the Hudson's Bay Company. It was incorporated in 1873, and is the seat of the Provincial Government, and of the Supreme Courts. Among its educational establishments are the University of Manitoba, St John's College, Manitoba College, Manitoba Medical College, Manitoba Deaf and Dumb Institute, Wesley College, St Boniface College, etc. It also contains numerous churches, schools, and other educational establishments. Being the centre of a fine fertile district, where large quantities of wheat are grown, there is a large carrying trade, for which great facilities are afforded by the railroad lines, and by the navigable rivers, with their well equipped steamers. The city is also gradually rising in manufacturing importance. The rivers are spanned by several substantial bridges, and the city is rapidly extending in every direction. The city is well represented by newspapers, there being two daily, the *Free Press* and *Tribune*, one semi-weekly, eight weekly, one semi-monthly, and seven monthly, all being in a flourishing condition, and a credit to any commercial centre. Among the banking and financial institutions in the city will be found the Bank of Montreal, Bank of Ottawa, Bank of British North America, Commercial Bank of Manitoba, Imperial Bank of Canada, Merchants Bank of Canada, Union Band of Canada, Molson's Bank, Banque d'Hochelaga, Alloway & Champion, Osler, Hammond & Nanton and Allan, Brydges & Co.

The history of Winnipeg with its wonderful growth and marvellous progress reads like a chapter from some work of romance. It seems almost miraculous that in the short space of a few years there has arisen the city of to-day. Fifteen years ago no city, no railroad, no street, no church, no school house, no home, nothing but a small post of the Hudson Bay Company, where the native Indians gathered to dispose of their furs. To-day, the thirty thousand people, the twenty millions of business massive mercantile blocks, railways connecting with the Atlantic and Pacific, and stretching to the great cities of the United States; churches, school houses, mansions, residences, electric light and street railway, provide the comforts and refinements of the highest type of civilized life. It is indeed one of the marvels of the age, a growth unprecedented, a progress unsurpassed in the history of the world. Nowhere on either hemisphere has there been a parallel case. It is the commercial, educational and great railroad centre of the West. Winnipeg stands alone in her onward march of development. Yet after all, when all the facts are considered, there is nothing strange in the circumstance that to-day, where but a few years ago the savage pitched his wigwam or chased the herds of countless buffalo, there has been built a city of metropolitan proportions. Explorers in this western land, wiser than others of their own generation, foresaw the brilliant result, and with wonderful intution predicted that upon this spot, at the junction of the Red and Assiniboine rivers, there must of a certainty arise a city into whose lap would be poured the wealth and products of the vast and fertile country stretching to the far western confines of the prairie region. Col. Butler, in "The Great Lone Land," wrote: "It is impossible that the wave of life which rolls unceasingly into America can leave unoccupied this great fertile tract. The plain through which the Red River flows is fertile beyond description."

Crotty & Cross, real estate brokers, one of the first agencies established in Manitoba; they have a good knowledge of values before, during and after the *great real estate boom*; their record of sales during the boom was extraordinary. The firm is well-known throughout Ontario and the old country. Chambre, Grundy & Co, real estate, insurance and financial agents. This firm consists of H W Alan Chambre and Wm R Grundy. Each have been in the real estate business in this city for the past 11 years; on December 1, 1888, they combined their business, when the present partnership was formed. Both gentlemen have had an extended experience and are regarded as a reliable authority on present and prospective values, and those intrusting interests to their charge will derive superior advantages from the connection. Their facilities for transacting business are of an unusually complete character, enabling them to offer special advantages to customers and to cover every department in the most prompt and satisfactory manner. They have an excellently arranged office for the speedy transaction of business, while the location is extremely favorable. They possess every facility for the negotiation of loans on mortgages upon the most favorable terms, and have developed a wide connection with capitalists and property owners. Mr. Chambre came originally from the old country, and Mr Grundy from Toronto, and during their 11 years' residence in this city they have won the highest encomiums for their sterling principles and equitable dealings, and their signal success is but the well merited reward of energy, enterprise and perseverence. They have been most successful in building up a large business.

Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by the said Judge, and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

COURTS OF REVISION.—The County Judges hold annually Courts of Final Revision of the Assessment Rolls of each municipality, being in the light of Courts of Appeal from the first Court of Revision held by the municipality; and also Courts for the Revision of the Voters' Lists for Provincial Elections. The Voters' Lists for Dominion Elections are now settled by Revising Barristers under the Act af 1885.

INSOLVENT DEBTORS' COURTS.—These Courts, which had reference to traders only, were regulated by the Act known as the "Insolvent Act of 1875," which consolidated and assimilated the practice of Bankruptcy and Insolvency in the several Provinces of the Dominion, The County Judges in the several Counties presided, and official assignees were nominated by the Governor in Council, and were officers of the Court, having jurisdiction in the County or District for which they were appointed, and appeals lay to the court of Appeal of Ontario. This Statute has now been repealed, and the Courts and Assignee, are only continuing to wind up pending cases.

SURROGATE COURTS.—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts. *Chief Surrogate Clerk at Toronto*—Sir J L Robinson, Bart; Fred A Robinson, clerk.

DIVISION COURTS.—For the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200, when the amount is ascertained by the signature of the defendant, subject to an appeal to the Court of Appeal, and to $100 in other cases; but the sums of the account to be gone into can not exceed $400; injuries or torts to personal chattels amounting to $60, and personal actions to that amount, if not excepted from their jurisdiction: but not to actions for gambling debts, liquors drunk in a tavern, or notes of hand given therefor, ejectment, title to land, etc., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim con, seduction or breach of promise, or actions against a J P for anything done by him in the execution of his office, if he objects to it. Counties, United Counties, Judicial Districts are divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions were heretofore established by the Courts of General Sessions, and in certain cases by the Judges. Now the County Judge, the Sheriff, the Warden of the County and the Division Court Inspector appoint and from time to time alter the number, limits and extent of the Divisions.
