DISTRICT AND GENERAL

An apple packer at Exeter was fined \$50 and costs for branding four barrels of inferior apples as high grade.

The price of newspaper paper has increased \$5 per ton, and all fine papers have also been increased in price.

The induction of Rev. E. J. Wolland, B.D., as pastor of New Glasgow and Rodney Presbyterian churches, was held on Thursday afternoon, Nov. 2, at the latter church.

Denizens of the Northern woods, long famed for their prophecies with regard to coming weather, are unanimous this fall that all signs point to an unusually mild winter.

Over 12,500 persons were killed and 300,000 injured in automobile accidents in the United States during the year 1921, and yet this appalling total seems likely to be exceeded in 1922.

W. W. Scott, of Highgate, sustained a serious loss when a car or truck ran into one of his best Shorthorn cows that happened to stray onto the road. In the morning it was found in a very crippled state, and had to be killed.

Mrs. Bessie Graham died at her home in Dutton a few days ago. Her husband, the late Duncan Graham, of Dunwich, predeceased her by about 30 years. Her parents were the late John and Flora Graham, pioneers of Dunwich.

C. A. McDonald, the young bank clerk at Petrolia, for whose arrest a warrant has been issued on a charge of issuing cheques when there were no funds to meet them, has so far escaped arrest. His whereabouts are unknown.

Knox Presbyterian church, Newbury, raised over \$2,500 for all purposes in connection with the church during the past year. There are about 100 members on the communion roll. A special offering at the anniversary services on Nov. 5 amounted to \$105.

A cow which had been taken seriously ill after spending some time in an orchard strewn with apples died in great agony while being examined by a veterinary surgeon. The latter, on opening the animal, found a tremendous number of apples, mostly whole, in the stomach.

At a meeting of the ratepayers of Rodney the matter of better fire protection was discussed at the request of the Canada Wood Products Co., who are unable to get insurance on account of the village not having proper protection. A committee was appointed to secure prices of mains and standpipes.

The death occurred in Blissfield of a former resident of Alvinston in the person of Thomas Hoag. Mr. Hoag died suddenly while sitting at his dinner table. The body was brought to Alvinston for interment on Friday, and the funeral was held from the home of his brother-in-law, P. A. McDiarmid, to Alvinston cemetery.

The death occurred on Wednesday morning, Nov. 1, at the hospital in St. Clair, Mich., of Charles Munroe, only son of John N. Munroe, of Santiago, Cal., formerly of Alvinston. The remains arrived at Walkers station on Thursday morning, and the funeral was held from the home of his uncle, J. D. McIntyre, to Alvinston cemetery.

By an amendment to the dance hall law girls under sixteen will not be allowed to frequent public dance halls. The new provision also stipulates that every girl over sixteen must be accompanied by an escort; dancing must cease at 11.45 o'clock, and anyone believed by the police to be of an immoral character is to be refused admission.

The funeral of the late Allan Wrightman, of Middlemiss, who died on Oct. 30, was conducted by Rev. John Pollock, of Dutton, assisted by Rev. Mr. Quinn, of Middlemiss. Mr. Wrightman was a member of the Orange Order and the funeral was conducted in part by its members. He leaves a widow and a family of five daughters and one son.

The school fairs of Ontario have become an important institution, with results of a most helpful character. Four hundred and eighty-nine school fairs were held this year, with 4,266 schools taking part. No less than 109,015 pupils last spring secured eggs or seeds in preparation for these fairs. The exhibits were better and contests keener than ever before. From the standpoint of encouragement to excel, these fairs are of greater value than the average fall fair.

JOHN McTAGGART DEAD

John A. McTaggart died at his residence, 198 Wharncliffe road, London, on Sunday after a week's illness of pneumonia.

Deceased was born in Ekfrid township 56 years ago and for 10 years was station master on the M. C. R. at Ekfrid and later conducted a hardware store at Appin and for several years served as municipal-treasurer for Ekfrid township. He had been a resident of London for the past four years.

Besides his widow he is survived by four brothers, Donald, William and Cyrus, of Ekfrid, and Angus, of Pittsburgh, Pa., and five sisters: Mrs. Campbell, of Chatham; Mrs. Gillis, of London; Mrs. Carswell, of Iona, and Mrs. Willey and Mrs. Stevenson, of Ekfrid.

Funeral services were conducted in the Baptist church in Ekfrid on Tuesday afternoon.

SEVEN IN OVERTURNED CAR

A few evenings ago while Chas. M. Macfie, of Appin, was driving his car home from Glencoe with a number of high school students, his car ran into the ditch and overturned a short distance east of Glencoe. The car was considerably damaged, but its occupants were not injured.

Mr. Macfie had asked one of the students to fasten the side curtain and in so doing he turned his head and the car started across the road. In turning the car back it swayed owing to the wet condition of the road, and broke a rear tire, causing the car to overturn. The other occupants of the car were Olive Black, Thelma Watterworth, Viola Payne, Lottie Black, Newton Macfie and Helen Macfie, all of whom escaped without a scratch.

CHEERIO NOTES

On Nov. 10th the Cheerio Club met at the home of Karl McLean. An enjoyable evening was spent, with the president, Agnes McEachren, in the chair. The minutes of the last meeting were read by Helen Gillies. The "Live Wire" was read by Susie Gardner. A debate, "Resolved that specialized farming is more profitable than mixed farming," was ably upheld on the affirmative by Martin Abbott and Marvin Watterworth, and on the negative by Percy McLean and William Reyecraft. The judges decided in favor of the negative. Several games were played, after which a dainty lunch was served by the hostess.

THEIR SILVER WEDDING

Wardsville, Nov. 11.—The members of the congregation of St. James' Anglican church were entertained informally in the basement of the church on Friday evening. The occasion was the passing of the 25th milestone in the happy married life of Rev. and Mrs. R. J. Murphy. The first part of the evening was spent socially, after which about 75 were served a bounteous supper by the young ladies of the church.

C. Minna, warden, spoke in glowing terms of the work Rev. Mr. Murphy and wife have done here. Several pieces of silver were presented to the "bride and groom" of 25 years by Miss Jean McRae, on behalf of the congregation, while Miss Ava Weir read the presentation address. Mr. and Mrs. Murphy both replied in suitable words.

Have your suits cleaned and pressed at the Aylmer Steam Laundry. We make the old ones look like new.—Roy Siddall, agent.

Traver's Store

CONFERENCE ON BOYS' WORK

District-wide preparations are under way for the Boys' Work Conference for the counties of Elgin and Middlesex, to be held in the Central Methodist church at St. Thomas from Friday, Nov. 17th, till the evening of Sunday, Nov. 19th. The conference will be of an inspirational and educational nature, and it is hoped that 250 to 400 boy delegates will be in attendance from the different churches, Sunday schools and societies of the two counties. On Friday evening a banquet is being held in Central Methodist church for leaders and older boys, while on Saturday evening a big Tuxis Boys' banquet is being arranged for, to be held in the Y. M. C. A., at which songs, stunts and toasts will be indulged in, and inspirational addresses will be delivered by two outstanding men.

Among the speakers at the conference will be Rev. Dr. J. C. Robertson, of Toronto, General Secretary Board of Sabbath Schools and Young People's Societies, Presbyterian Church; C. F. Piewman, Toronto, Secretary Ontario Boys' Work Board; Canon J. W. J. Andrews, St. Thomas, Rector Trinity Anglican Church; L. M. Houlding, London, Boys' Work Secretary; Rev. Waldemar Williams, Methodist Secretary Religious Education; Rev. Frank Langford, Dominion Sunday School Secretary of the Methodist Church, and Rev. H. E. Thornloe, Chairman of Local Conference Committee.

Odd Jobs With a Tractor.

By doing odd jobs when general work was slack, John Semon has made a tractor pay on a farm where the neighbors said it would be a bill of expense.

"My farm contains only seventy acres," Semon explained recently, "and if plowing and general field work was all a tractor could do, I could not afford to have one on the place. I realized this, and before I bought mine I began to devise odd jobs to keep it busy."

My first odd job was clearing a strip of timberland. After the trees were felled and sawed, I used the tractor in loading the logs, then again in hauling them to the mill. Afterward I began to pull stumps. With a little skill in handling, I found that the machine would make an even pull, and develop a great deal more power than a team. I cleared the piece in four days, thereby saving a week's time with team and man-power.

In fencing the land, I brought the tractor into action again. Hauling the posts, stretching wire, and drawing the wagon about. The same year I did road work, dragging stones, grading, ditching and rolling. I not only improved my own highway, but was able to take in some money besides.

When marketing time came around I rigged up a couple of wagons and hooked on the tractor. With this outfit I hauled my own grain and that of my neighbors. On my return trips I brought back fertilizer in the same manner.

I used the machine again in bringing in my winter's fuel, loading and hauling logs, etc. Then, with a neighbor's saw, I used the machine in cutting.

I have found the tractor O.K. in belt work. Many times other farmers and I work together at this. If he has a feed grinder, cutter, etc., we exchange labor and save money.

In neighborhood work such as this I often exchange tractor power for teams.

"These are but a few of the many jobs which my machine does," continued Mr. Semon. "I have rigged up a number of home-made devices at practically no expense, and every day I find something new to which the tractor can be put. For many of these jobs it replaces horses, doing the work cheaper in a great deal less time."

Get Out the Old Whitewash Brush.

Two years ago a certain poultryman threw up his hands in disgust. With vermin infesting his buildings and dampness hanging like a fog cloud in his brooder house, he could not make

a success of his business.

He advertised the place for sale at a bargain, and spent the best part of a year getting rid of it at a huge sacrifice.

He was frank in explaining the reason for selling to the young farmer who finally concluded to "try it a whirl."

"You can keep chickens in one place only so long," the disgruntled man said, "when the ground goes stale, lice fill up the buildings, and with the ground sour and not draining properly, the buildings soon become damp."

The young man said nothing, but he used the pessimism of the owner to pry off a few hundred from the price and took the place.

"The first thing I did," he says, "was to get a spraying outfit and go over all the buildings with a disinfectant whitewash. It took half the time that it used to take with the brushes. I found that the whitewash did just two things for me: It killed the vermin and it dried up the interior. The brightness of the interior, I am sure, goes a long way toward keeping it dry. Lime in the whitewash, you know, is noted for taking dampness out of bad places."

To clean up the soil he used lime, plowing such of it as could be plowed. Other yards and runs received a liberal application of gravel and sand and were then spaded. This guaranteed good drainage in the future. The runs were then seeded to alfalfa and clover, or oats, as the case might be, and the following spring all spaded up.

This young farmer is raising more chickens in the run-down farm than his predecessor did, and he is having the best of success, because he is taking preventive measures. He uses the disinfectant whitewash once each month on the interior of his buildings.

As fast as the green food is consumed in one of the runs, he turns the fowls into another and seeds it down.

"Yes," he said, "if the other fellow had only thought a little while about getting out of the hole, he would have used some whitewash and he would never have let his soil get infested. It is all foolishness to talk about moving to new land every so often with chickens. If you want to keep the land right you can do it, but you can't let things take their own way, if you would succeed."

He added that his father used to whitewash his barns and stables, and that by remembering that one fact, he had been enabled to reclaim this place and save thousands of dollars for himself.

It pays to dig out the old whitewash brush now and then—or better still, a good spraying outfit.

for school taxes, and then—well, the barn is crowded, badly crowded. That's what you are thinking. Confess. Say, friend, think again—and while you are thinking, look me in the eye. You know mighty well that old garbage man is so stingy he wouldn't stutter on account of the waste of breath, and will not feed himself enough, let alone a horse; you know he cusses like a pirate when he is mad, and he is always mad; you know he never used a blanket on the last horse he had, and the beast died early in the spring from exposure and malnutrition. That's why he wants another horse now.

What's that? The garbage man is not so bad as painted? Well, granting that he is not; granting for the moment that he is a near-angel with stub wings sticking out through the holes in his sweater, don't forget that your farm is the old horse's home, and that he loves his home just as much as you do, if not more. He grew to horsehood here and knows every corner and fence-post. If you sell him to any one you will break his heart. He depends on you, he has every confidence in you. He has given you twelve long years of his active life, and if he had kept books he could prove you owe him \$2,400 at least. Don't break his heart.

Personally, I don't think your barn is crowded. Why not slip those colts into that box stall and tie these two mares over in that double stall? Make room for the old fellow inside when the weather is bad, and give him the range of the pasture when the weather is fine. In two or three years that he has left to live you can pay him back a little of that \$2,400.

Make room for the old horse, friend. When you are his age—seventy in your case—the boys and girls will make it a corner for you and try to pay you back for the years that you labored for them without pay.

Present prices for farm products would be all right if other things would "deflate" accordingly.

Each of us adds an iota to the world's fund of knowledge but we can add more if we make more use of that which is already available.

Lowering the cost of production is a present-day economic need. It can best be done by getting more eggs per hen, more milk per cow, and more grain per acre, and caring for less chickens, cows and acres.

CO-OPERATIVE DAIRY MARKETING.

Executive committee of the million dollar co-operative company, launched by Hon. Manning Doherty for marketing dairy products. This company will do for dairymen what the Niagara Peninsula Growers are doing for marketing fruit. Front row, left to right, E. H. Stonehouse, Weston, secretary, and John Beatty, Mallorytown, president; back row, D. Z. Gibson, Caledonia; J. A. McPeckers, Toronto, and Wm. Newman, Lorneville, directors.

Winter Protection for the Strawberry Plants.

Under the most favorable seasonal conditions winter protection for strawberry plants is absolutely essential to a profitable crop of fruit; what, then, may be said when winter conditions are unfavorable? It is safe to say that strawberry plants that go through hard winters without protection will be of little value so far as profit is concerned, either for fruiting or for propagation. One needs only to try out the two systems (if a method of culture omitting the winter mulch may be properly termed a system), to verify this statement.

Snow is an ideal winter covering for strawberry plants in so far as it may be depended upon; but even where it remains fairly constant during the greater part of the winter, its greatest value is not as a substitute to other materials but as a supplemental protection. Even where snow comes early, falls deep, and remains late, there still remains a period of time when frost action may work more or less injury to strawberry plants. Strawberry plants that show a thrifty and green on the going of the deep snow covering soon part with this virgin vitality under the action of frost and sunshine. Dried up foliage quickly takes the place of the luxuriant greenness so essential to plant vigor and productivity.

Yes, the strawberry bed should have been given protection at the approach of winter, but if this work was neglected it will no doubt still be a profitable proposition. The season is sure to be unusually severe on all kinds of vegetation. In most situations a pretty heavy application of material will be necessary to carry the strawberry plants through unimpaired. Fortunately, our berry bed is favorably located as to windbreaks.—K. W.

The Tools I Find Useful.

I longed most of all for a vise and the day I purchased a cheap combination anvil, vise and drill I sure was sitting on the peak of the world. Had that been the only one of its kind in existence, Ford's billions could not have purchased more than one share. When I was a boy wood was cheap and the framework of most farm tools was made from this material so that in that day the farmer with a good outfit of woodworking tools was all set for most of the repair jobs. Today, however, steel has taken the place of wood to a great extent and the farmer who aspires to do his own repairing must be in a position to work in metal.

A good vise comes first on the list, with a hacksaw and strong postdrill, a set of stocks and dies for bolts and nuts, ranging from a quarter on up through the various sizes to the half-inch. A force and anvil will come in mighty handy every few days. While files, chisels, tinners' shears, soldering outfit and a cobbler's outfit will pay for themselves in a year.

For the woodworking job the farmer will need a good draw knife, a cut-off, rip and compass saws, hatchet, two or three level edge chisels. A large plane, a block plane, a square, a brace with a complete set of bits, an automatic screwdriver, a good nail hammer and a good level. While there are a great many other small tools that the farmer can use to advantage, he will find that the above, with the addition of bolts, nuts, screws and nails will with the exercising of a little ingenuity, meet the majority of everyday needs.—D. Riding.

It is human nature to require much from others but to lay light responsibilities upon our own shoulders.

Profitable Way of Marketing Farm Products

The marketing of farm products is one of the most important things in the farming business. It is at least as important as raising a good crop.

I think a weekly home market in every town and city where there is a railroad would benefit the farmer to a very large extent. The farmer would be able to take advantage of such a marketing system in many different ways. The main idea would be that the farmer could sell his own products himself, or hold them if the prices were not right.

It is quite different at the present. When the farmer ships some of his products to some large market commission house, he does not know what is done with his goods. When he gets the returns, he many times owes the commission house money for shipping charges. The goods often do not bring the cost of shipping, not speaking of the basket, the cost of raising the products, etc.

There are also a lot of farm products never shipped nor used, as small amounts are not profitable to ship. However, if there were a home market you could take down what you had, large or small, and it would not cost anything to get it sold, as you would do this yourself.

There would then be many farmers who could buy their needs from other farmers at the market place, while now it is often a problem to know where to buy some of them. The neighbors do not have what he wants and the farmer cannot spend his time looking for it all over the country. If it should happen that the goods wanted were not on the home market, one would at least be able to learn where to get it.

The weekly home market would also bring general merchandise to the market place. Many would put up booths and many bargains would be offered, and much money would be saved by farmers and town people and be much to the advantage of both.

The next thing is how to start a weekly home market. This can be done in a few days. You don't have to wait until next summer, there are many things which you can sell every week, even in the winter time. There are eggs, butter, vegetables, grains, pigs, chickens, etc., to start the market. A committee of farmers could be appointed to get together with the town official to buy a piece of ground to hold the market on. Make a few arrangements for the up-keep of the market, like renting certain places at the market ground to people who would like to put up booths, etc. Then have the market place divided into sections. At each section a certain kind of goods should be sold. Then a day should be set on which to hold the market. The market could be opened at 8:00 a.m. and last until noon or 2:00 p.m. Arrangements could be made to have the market place under cover for protection in bad weather. Also, it would be important to arrange that not any of the neighboring towns would have a market on the same day.

This system is in full swing in many countries of Europe, and there has proven a big advantage to farming.

"Personally, I always thought the 'Cattle Embargo' business was quite justified!" —Ridgway in London Opinion.

Parents as Educators

The Child Who Pouts—By Marion Brownfield.

The child who pouts is a problem, as the tendency to remain sullen and disagreeable may easily become a life time habit known as a "bad disposition."

There is the little fellow who pouts when he takes a notion that he does not want oatmeal for breakfast, and the young miss who purses up her lips when her mother decides it is not best for her to wear a certain frock she fancies. When one knows the direct cause of a pout, it is comparatively easy to deal with. But with children, the bad humor may really go farther back than what appears to be the whim of the moment. It is because children are made more sullen, bitter, or deceitful by unjust punishment that one must be careful to understand the real cause of a pout. With children there is such a difference in personalities, just as much as with grown-ups, that one must study this also, if one is to cure the pouting habit successfully. And some children have fancies and moods that are much more difficult to adjust than the safety-pin that caused baby's pout.

Some children, indeed, of changeable disposition, pout often at trivial things, plainly the displeasure of the immediate moment. While children of deep natures, sensitive at unsuspected spots, will be "down in the mouth" for some hurt or disappointment, quite unperceived by those who did not happen to be present when the stab came. Boys, especially, being slow to confide their little rebuffs to anyone through sheer masculine pride, will be out of humor at seemingly ridiculous or unreasonable things, when something underneath, that they are ashamed to confess, rankles.

Young children, too, of sensitive natures will pout in company out of pure diffidence. The writer knows a boy of three, who invariably pouts and hangs his little head in company until his older brothers and sisters have ceased to notice him, when he becomes less self-conscious and the pout disappears. Another boy, the most sensitive of three brothers, developed a pout through self defence. As he was less aggressive naturally than his two other brothers, they took advantage of it and gave him the worst of it at every opportunity. The consequence was that not being a fighter he developed a chronic pout that the family for a long period termed a "grouch." It kept everyone from teasing him. The sullen looks make them leave him alone. It was only when a discerning grandma visited the family that she suggested the real cause of the pouts to the family.

And sure enough when the other brothers were carefully prevented from annoying the child, he mellowed up. So to cure the pout effectually, one must consider the cause before applying a remedy. A boy of most any age can understand the appeal "to be a good sport" and "not to whimper, when you're a loser." It can be urged on almost any occasion to prevent pouts that come from disappointment, a thwarted appetite or failure to win in a game. Ignoring the pout is a tactful method with a certain type of child. The kind that has "temperament" loves to have his emotions noticed and catered to. So utterly ignoring these pouts is the best way to discourage the child from trying them again.

as they please, for they never go far from their master.

Little Pedro always goes with his father to the Company's warehouse where he loads the burros for the trip to the mines.

The burro "Juan" is Pedro's favorite, and Juan's affection for the little boy is something almost wonderful. One day when Pedro was a baby he rolled from a box on which his mother had left him for his nap. Juan was in the casa yard. As soon as he saw what had happened he crossed over to the box, carefully lifted Pedro by his vestido (clothes), put him back on the box, and gently rubbed him with his soft, velvety nose.

Feeding Pumpkins.

For feeding cows, 2.5 tons of pumpkins, with seeds in, are the equal of one ton of corn silage. Some folks say that pumpkin seeds will cause cows to go dry, or that they will work on animals' kidneys, and hence the pumpkin seeds should not be fed. There is no truth in such statements, as has been proved by feeding tests.

On the other hand, pumpkin seeds are beneficial. When fed to pigs, they free the pigs of worms and put the digestive apparatus in tip-top shape. An excess of seeds causes an upset of the digestive organs for a day or so, because the seeds are very rich. There is no danger, though, if fed in amounts in which they occur naturally. For feeding pigs, pumpkins are sometimes cooked, but this extra work is not warranted.

Squashes can be fed to cows, pigs, and horses the same as pumpkins. Some stockmen make a practice of fattening pigs exclusively on squashes, and get good returns per acre from the crop, but the pork has an objectionable yellow color. Horses will sometimes refuse to eat pumpkins or squashes.—A. C.

None of us will get very far if we rely alone on our own experience.

Adenoids Are Nothing New.

It is not an unusual thing to hear some parent, vastly troubled, talk about "this new disease, adenoids." It is just as well for us to know that adenoids are neither new nor a disease. Provided the adenoid tissue is normal as to its condition there is nothing to be disturbed about and it will help the child's health instead of harming it.

Right up in the back of the throat, well out of sight, every child has normally some adenoid tissue. It is there for the purpose of filtering impurities out of the air as the nose breathes it in. When this little cushion of tissue becomes diseased it grows abnormally large and obstructs proper nasal breathing. Then it is that we say the child "has adenoids" and if the obstruction is at all bad the chances are that a slight operation is necessary to clear away the growth.

The same condition that produces enlargement of adenoid tissue often works in the same way at the same time on the tonsils. So it is a very common thing for a child with "adenoids" to suffer also with enlarged tonsils.

When these conditions shut off nasal breathing the child becomes a "mouth breather." This is bad, because air breathed in by the mouth reaches the throat and lungs in a raw state. It is not warmed to proper temperature in cold weather; it has not had impurities sifted from it, and it has not been moistened. A child breathing after that fashion soon develops nasal catarrh, becomes pale, narrow-chested and puny, has a disagreeable voice, pinched facial expression, drooped jaw, protruding upper lip and teeth, defective hearing and becomes dull in school. These symptoms, fortunately, do not all appear in the same child and it depends upon the degree of obstruction as to how many of them will come, but the adenoid child will be sure to have some of them.

Adenoids may be suspected in a child who sleeps habitually with open mouth, snores, has much difficulty with throat and nose, is always taking cold or is afflicted with "sniffles."

I know of no medical treatment that will materially benefit a child with adenoids sufficiently enlarged to be an obstruction. If left alone they may eventually shrivel away, but meantime the child will suffer seriously in development and may become deaf. The operation for removal of adenoid tissue is very simple but should always be done with every precaution and by one having special skill. Under such conditions it is a very simple and safe operation.—Dr. C. H. Lerrigo.

Mixing Berries and Chicks.

This is how I overcame the difficulty in raising poultry and berries at the same time without injury to either:

Everyone who has had experience with chickens and berries knows that poultry are a detriment to fruit in the ripening season. To keep the chickens penned up throughout the picking season is also quite a loss.

In my black raspberry and blackberry patch I have set good white-oak posts about every two rods in the rows. On these posts I have staked a wire just high enough (about three feet) to tie the new canes to after they have been cut back and the old canes taken out. This process of thinning out must be done every season, anyway, in order to have good fruit. And I have found by experience that by tying the new canes to the wire I not only have better berries and easier to pick, but that the fruit is above the reach of the poultry, and by letting the chickens run at large through the picking season the increase in egg production more than pays for the time and expense involved.

I have left a space close to the house, and here, in the spring, we place the coops, and find that the loss of little chicks by hawks, crows, etc., is less than in former years.

Pruning vs. Fertilizing.

I have found spraying and fertilization to be the most important factors in fruit growing," says Robert Anderson, a successful orchardist. "Without spraying, you might as well give up, for no other practices will make up for spraying. After spraying comes fertilizers. You must feed the trees if you want big crops. A lot of orchards don't pay because they are half starved."

"How about pruning?" was a question put to Mr. Anderson. "Isn't that one of the most important factors?" was the answer, "but I feel that it is often overdone in the effort to make up for the omission of other practices. The success of pruning is not measured by the amount of wood you remove, but the amount you can properly leave. I can illustrate this by the fraction, six over two, in which six represents the trees and branches, and two the productive power of the soil. It's no use to have more wood than the soil will support to produce good fruit, so you take four away from the six by pruning, and have the fraction two over two. But another way is to add four to the two below by fertilizing, and then you have six over six—more fruit because you have the wood and the plant food to make the fruit. That's the system I practice."

Birds Versus Bugs.

A woodlot that is sufficiently protected to serve as a bird sanctuary is a beauty spot where wild flowers and wild fruits will flourish. Moreover, it would be growing valuable timber for future generations, and during the war we found our supplies of fuel of great importance. Strikes and industrial wars may make them more valuable in the future. Even in Western Ontario there is much land that would be better if planted to trees than going on as a weedy pasture. One might go on to a great length showing why what is left of our woodlots should be preserved, and, where the cattle have been allowed to run in them, why they should be fenced in and replanted with young trees to give them a proper start. But I do not think any better argument can be found for this reforestation than that it will provide farmers with innumerable helpers in the strenuous business of keeping down insect pests. Every once in a while the entomologists issue a warning that unless insects are kept in check, food production will rapidly become unprofitable, if not impossible. Some of the most eminent of them do not hesitate to assert that unless the insects are fought effectively and strenuously they will render the earth uninhabitable for human beings. We have already developed all kinds of sprays and poisons as the methods for this war, but I am inclined to think that the natural method is the best. Start a back-to-the-land movement for our native insectivorous birds by providing the necessary nesting places and hiding places for them, and protecting them from enemies. If it were possible to start the opposite of a sanctuary for house sparrows and cowbirds I wouldn't mind having one blazing in every township, but I hardly see how it could be managed. How would it do to start to work with a slogan: "Bird sanctuaries instead of bug sanctuaries?"—Peter McArthur.

Mother Prayer to the God of the Forest.

God of the sunlit spaces,
God of the silent wood,
I, who am weak, beseech Thee
Strength for my motherhood.

How shall he climb to manhood,
Son of my frailty,
Save as he grows in wisdom
Nurtured and taught by Thee?

Fashion his feeble body
After the forest plan,
Even as strong trees flourish
Make of my son a man.

Even as forest wind storms
Lull at Thy calm behest,
Curb Thou the young emotions
Surging within his breast.

Cradle his timid spirit;
Even as Thou hast planned
Nurture for seed and blossom—
So shall his youth expand.

This is the prayer I make Thee
Out of my mother-fear—
God of the sunlit spaces,
God of the wood, give ear!

—Helen Frazee-Bower.

How Fast the Blood Flows.

Koch estimates the speed of the flow of the blood by injecting a stain into one arm while the blood is dripping from a corresponding vein in the other arm. Every five seconds the escaping blood is examined for the first appearance of the stain. In sixty-eight healthy women and fifty-one healthy men the interval was 20.8 seconds in the former and 20.7 in the latter. In nineteen patients with circulatory disturbances the interval was nearly three times as long, the range being from 30 to 43 seconds. Of the seven patients with an interval over 50, six died within a few weeks. About one cubic centimeter of the stain is injected into a vein at the bend of the elbow. A delay in the appearance of the stain in the other arm is an early sign of incipient insufficiency of the circulation.

This stain test is simple and harmless, he says, and can be repeated at will. His tables show the findings in five diabetics, five pneumonia patients, thirteen convalescents, six with pernicious anemia, leukemia or pernicious anemia, nine with the high blood pressure of kidney disease, and other groups, to a total of 400 applications of the test.

Pat is a Linguist.

Pat and Norah were sitting in the theatre before the performance began, when the girl observed the word "Asbestos" on the fire curtain and inquired what it meant.

"Whisht!" said Pat, "and don't be displayin' your ignorance. Don't ye know that 'Asbestos' is the Latin word for 'welcome'?"

Unimaginative.

Mother was going through some "old things" in her writing desk when she came upon an old brooch.

"Clarence," she asked her young son, then at hand, "do you see the hair in this old brooch? It was your great-grandfather's."

"I say, mother," observed Clarence, "he didn't have much, did he?"

Mr. Everest, the highest mountain, towers 29,002 feet above sea level, while the deepest depression in the earth's surface is known as "Philippine Deep," which is east of the Philippine Islands. It is 32,089 feet below the surface of the sea. Think of it, more than six miles down!

THE AVERAGE WOMAN NEEDS MORE BLOOD

Poor Blood the Cause of Headaches and Run Down Feeling.

To the woman in the home—the woman closely confined to the house, either through household duties or the care of children, or both—Dr. Williams' Pink Pills are a positive blessing. The average woman has too little blood. Her nerves are easily irritated and she worries over little things; has severe headaches and backaches and generally feels worn out. With the woman who uses Dr. Williams' Pink Pills the condition is different. She is always well and the care of her children or household duties is a real pleasure. This is because Dr. Williams' Pink Pills enrich and purify the blood supply which brings vigorous health and strength. Mrs. H. Everett, Parry Harbor, Ont., has used these pills with benefit and says: "I cannot recommend Dr. Williams' Pink Pills too highly. I was run down and very weak, and after using the pills I felt like a different woman. They are wonderful strength builders. For nursing mothers they are a blessing, at least I have found them so."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or they will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Prospective Cook—"A wake is it? Share of cost to tell whether O'd loike yez in wan day?"

Surnames and Their Origin

PANCOAST

Variation—Pancoast.
Racial Origin—French and English.
Source—A given name.

Here is a family name which has nothing to do with either a pan or a coast, nor yet with the cost of anything.

It has for the most part developed in a thoroughly normal way, so far as the old records reveal, from a given name. Originally French, it is not possible, however, to state exactly at what time it came over into English (though apparently subsequent to the Norman invasion), nor whether it came over as a given name before the family name was formed, or as a family name already developed. The chances are there are instances of both, but that in the majority of cases it came over with the Huguenot refugees.

At one period in France it was customary for parents to name their children after feast days (and in Spain also where it is the custom to day) and in this instance the given name is simply

Why Do Onions Make Us Cry?

In a sense, we are always "crying," and onions only make our eyes weep more rapidly than usual. Our body is perpetually supplying tears to our eyes, and every time we blink these tears are smeared by the eyelid across the ball of the eye in order to clean it. Onions contain between their layers an acid oil. This oil is highly volatile, that is, on reaching the air it quickly turns into vapor and releases a sulphur compound which it contains. This sulphur makes the eyeball smart, and the eye nerves at once signal to the brain for an additional supply of tears, as an added protection against the sulphur. This extra supply is produced so rapidly that it cannot be carried away perceptibly down the nose in the usual way, but overflows and so we weep.

Sumac.

Slain by the silver swords of frost
The last bright blossom lies,
Stripped of their gold by robber winds
Ere houghs beneath the skies;
I heard the wild geese in the night
Go honking overhead,
Lost in gray clouds that o'er the moon
Like frightened phantoms fled.

But in the brown deserted fields
And lonely country lanes
Where but the withered memory
Of summer's green remains,
That ragged gypsy crone who goes
About foretelling snow,
November keeps the smoldering blaze
Of sumac fires aglow.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright, and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Improved Toothbrush.

At the end of the handle of a new toothbrush is a small bunch of bristles suitable curved to cleanse the inner surfaces of teeth.

Typewriter That Writes Words.

A typewriter that writes, at the touch of a finger, words as well as letters, has been put on the market by a British inventor.

First, he selected the twenty-one words that he found to be in most common use.

These are: "As, at, all, are, be, but, for, he, it, in, is, if, not, of, on, to, the, we, was, you," which, according to the inventor, constituted approximately 31.8 per cent. of the words in everyday use, the sentence he selects as an example being: "Now is the time for all good men to come to the aid of the party," in which nine of the sixteen words may be written on his typewriter, each by a single touch.

Mr. Benington uses a standard keyboard with extra keys for these words arranged on three sides of it. The machine itself has several other features, which, it is claimed, are improvements, including an escapement lock which makes it possible to write in any direction.

India raises about 5,000,000 tons of seeds from which various kinds of oil are made annually.

Avoid overwork. It weakens the body.

Miss Margaret Ross
An interesting discovery during Canadian Book Week was Miss Margaret Ross, who, at the age of seventy-seven, makes her first contribution to literature in the form of a biography of her brother, Sir George Ross, once premier of Ontario.

All the Colors.

When we understand all about colors, we shall be able to regulate our emotions and attain our ideals of perfect peace. Meanwhile, color experts continue to advance their theories, and the latest comes from a famous eye specialist, who has studied colors and their effects upon human passions. Here, briefly, is his list:

Yellow brings out bad qualities, inducing vulgarity, noisiness, jealousy, and revenge.

Red excites one, and produces violent effort—sometimes for good, but generally for bad. It is the color of crime.

Green promotes joy, if not of the most peaceful kind.

Blue is the peaceful color. It induces placid happiness, a desire not to be disturbed, and a dislike of argument or contest.

White brings out one's activity, and people who live among the snow and ice are the most active.

Black, appropriately, is the hue of sorrow and evil. Amid black surroundings, life degenerates. It is every bit as black as it is painted.

If these deductions are correct, why not paint the whole world blue and green, and make other colors illegal? The painter, and not the politician, is needed to put our old world right.

All Her Friends See A Great Change

When a medicine produces the desired results its praise is sure to be heard. That is why Mrs. Katrine Nielsen, Holmpatrick, Calgary, as well as thousands of other men and women throughout Alberta, has become such an ardent champion of Tanlac.

"Not in a long, long time," says Mrs. Nielsen, "have I enjoyed such good health or felt so well as I do since taking Tanlac. For several years past I have felt all run down and have been extremely nervous. I had no relish for any kind of food and what I did eat seemed to do me very little good. I felt tired all the time and my sleep was so unrefreshing that it did not rest me. I somehow managed to keep going, but it taxed me to the utmost to do my housework."

"So many people here in Calgary were taking Tanlac and praising it that I began taking it myself and the first bottle made a great difference in my feelings. It was only a few weeks until I was enjoying splendid health and since that time, which was about a year ago, I have taken a bottle of Tanlac now and then with the result that I feel strong and well all the time. Everyone speaks of how much better I look than I did before I started taking Tanlac."

Tanlac is sold by all good druggists.

A Poor Scholar.

The family gathered in the living room were talking of a certain professor of their acquaintance when Aunt Mary chanced to observe:

"The professor is such a learned man! I understand that he speaks no less than ten languages."

"And what does that amount to?" demanded the pride of the family, Harold, aged fourteen. "I saw him try to stop a car by whistling on his fingers, and do you know he couldn't do it? Talk about learning!"

INDIGESTION, GAS, UPSET STOMACH

Instantly! "Pape's Diapiesin" Corrects Stomach so Meals Digest

The moment you eat a tablet of "Pape's Diapiesin" your indigestion is gone. No more distress from a sour, even, upset stomach. No flatulence, heartburn, palpitation or misery-making gases. Correct your digestion for a few cents. Each package guaranteed by druggist to overcome stomach trouble.

One of Them.

"Now," said the school teacher during reading lessons, "glancing round the class, 'can any of you tell me what is the meaning of 'divers diseases'?"

"Please, sir," said Tommy, with superb confidence, "divers diseases is water on the brain."

Keep your Health!

MINARD'S "KING OF PAIN" LINIMENT

The Old Reliable. Try It!

Minard's Liniment Co., Ltd.
Yarmouth, N.S.

A Mystery of Space.

It is an established fact that the earth is drawn by the sun about a million miles through space every day.

In this connection it has been suggested that in the course of this nightly journey we encounter different patches of ether, some of which are not at all good for the inhabitants of this globe in that these patches are laden with dust containing germs of a harmful nature.

Hence the suggestion that these encounters are responsible for some of the terrible epidemics which from time to time devastate the ranks of humanity.

What, however, is more plausible is a theory that space contains masses of different kinds of star-making gaseous elements, and that it should thus be possible to tell from the star's spectrum the particular part of the universe from which the star has come.

It might also be possible to tell, for example, if the earth really belonged to the sun or was simply captured by it during the sun's tremendous journey through space.

Of course, we can at present only theorize on this matter, so far as the earth is concerned, because our globe would first have to be made as hot as the sun itself before a true test could be forthcoming.

Cause of Dew.

It was the terminal examination, and a budding philosopher concluded his essay on Mother Earth with this startling statement: "The earth revolves on its own axis 365 times in 24 hours. This rapid motion through space causes its sides to perspire; that is called dew."

ISSUE No. 46-22.

MOTHER!

Clean Child's Bowels with "California Fig Syrup"

Even a small child's bowels may be clogged with "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Constipation Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as Rother Seigel's Curative Syrup, for arresting and permanently relieving constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops three times daily. Get the Genuine. 50c and \$1.00 bottles.

"Cascarets" 10c

For Sluggish Liver or Constipated Bowels

When you feel sick, dizzy, upset, when your head is dull or aching, or your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. No griping—nicest laxative-cathartic on earth for grown-ups and children. 10c a box. Taste like candy.

NERVOUS AND RUN DOWN

Relieved by Taking Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario.—"For many years I have had troubles with my nerves and have been in a general run-down condition for some time. I could not do my work half the time because of trouble every month. I was told of Lydia E. Pinkham's Vegetable Compound by friends and advised to try it. It has done me good and I strongly recommend it. Since I have taken it I have been able to do all my own work and I also know friends who have found it good. You can use these facts as a testimonial."—MRS. ELLEN FLATERS, Box 761, Cobourg, Ontario.

Any woman in this condition should take the Vegetable Compound, for it has helped other women and so it should help you.

For nearly fifty years this good old-fashioned root and herb medicine, which contains no narcotics, nor harmful drugs, has been the standard medicine for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Mass.

BROUGHT FAME AND WEALTH

Whitney's Invention of the Cotton Gin
Came About Under Somewhat
Peculiar Circumstances.

In the fall of 1792, the year of his graduation from Yale college, Eli Whitney, inventor of the cotton gin, who was born in Westboro, Mass., in 1765, was engaged as a private tutor in a family in Georgia. On his way there he met Mrs. Greene, who was returning to Savannah from a visit North. On reaching Georgia he found that, despite his engagement, another tutor had been given his place, and he was stranded, practically penniless. Mrs. Greene invited the young man to her home until he could find something to do.

Shortly after Whitney's arrival a party of gentlemen from Augusta, in the upper country, who had been officers in the Revolution under General Greene, were visiting there. The conversation turned on the depressed state of agriculture in the South. Long-staple cotton had been introduced successfully in sea islands, but could not be grown inland. Short-staple cotton would grow inland, but was unprofitable, as there was no practical means of separating the cotton from the seed. The separation by hand of one pound of staple was a day's work for one woman.

During the conversation Mrs. Greene told the visitors that Mr. Whitney could invent their machine for them. This incident turned Whitney's attention to the subject. He went to Savannah, obtained a small parcel of raw cotton and set to work. With the resources the plantation afforded and such tools as he could contrive, within a few weeks he had developed the invention and produced his first model of the cotton gin.

You Never Can Tell.

A lady from a southern city, visiting New York, was asked by a friend if she would help her look after a party of children from the tenement districts she was taking on a day's outing, and agreed to do so.

The trip was to Bronx park and included the zoo. The day proved a wearisome one for the southern visitor, who was not young, and by the time they were all homeward bound on the subway train she was pretty well exhausted. But she felt compensated for her efforts when she reflected how she had been able to help give these poor shut-in children a glimpse of clear sky and green fields. With this agreeable thought she turned to a little girl sitting beside her and asked her if she had ever been to Bronx park before.

"Oh, yes!" the child answered. "I've been there lots of times. In an automobile. My brother's a chauffeur. And next Sunday I'm going to Coney Island."—Everybody's Magazine.

French Women as Judges.

Women as judges are undesirable, according to the Paris chamber of commerce, the Montreal Herald states. The experts of the chamber were asked to advise parliament regarding the proposal that women be declared eligible to all court positions now held by men, a bill to that effect in the chamber of deputies being introduced as the first important wedge to electoral equality. To the great surprise of the deputies, many of whom are noted as suffragists, the chamber of commerce committee says that such quality is undesirable just now, as apart from the peculiarities of the feminine temperament, women seldom are endowed with broad enough knowledge of juridical affairs to warrant their dealing with delicate questions of absolute justice.

Illusion.

They were dining tete-a-tete in the new hotel's restaurant—he striving to keep alive conversation grown strangely one-sided; she answering at random monosyllabically, when courtesy compelled response.

"I do so like this room," she suddenly declared enthusiastically, glancing with heightened color. "It's ever so much nicer than the big dining room." "It is bright and cozy," he gallantly agreed. "Everything's new and fresh. That's what you like about it?" "Yes," she hesitantly conceded, a flush flooding neck and throat. "But I like all those mirrors best. . . . You can find just such a lot of men in them and before they can really locate you, why—you're gone!"—Toronto Telegram.

No Taxi.

An East end mother was dressing her little daughter Mary Frances for school. She had been to that wonderful place only a few times. As the mother hurried to and fro in order that she might be there on time, the little girl spoke up: "Mother, do you pay money to send me to school?" The mother, re-stating, answered: "No, but we pay taxes." Her face showed signs of anger and with her head thrown back and signs of tears appearing, she said: "They never did come after me in a taxicab."—Indianapolis News.

Adding to Finland's Wealth.

The good results obtained in 1921 from flax cultivation have stimulated Finnish farmers to sow more seed this year. The only linen mill in Finland has constructed a flax dressing plant—near Tammerfors. Last year this linen factory bought from the farmers 1,875,000 kilos of air dried stalks, 90,000 kilos of soaked stalks and 100,000 kilos of swingle flax. This production represents the harvest of 8,400 hectares (one hectare equals 2.471 acres).

THE LONGED-FOR APPLE

Rosy Cheeked, Thick Skinned and
Well Flavored.

Fruit Eaters Will Welcome It — It May Be Growing To-day In Some Ontario Fence Row—Running an Egg Factory.

(Contributed by Ontario Department of Agriculture, Toronto.)

Somewhere on a farm in the apple growing districts of Ontario there are rosy red seedling apples. Seedling apples that may have characters that would make them valuable commercial sorts, if such could be introduced to the public. True, there are thousands of worthless seedlings, but some fence row or orchard area is now growing a tree or trees that produce a superior fruit.

Box Packing Apples at a Premium.

Ontario needs an apple suited to box packing, and it may be from an unnamed seedling that such want will be supplied. If those having really good seedling apples would bring them to light so that their qualities might be judged by those competent to do so, an apple worth while might be unearthed and introduced to the public. Western apples shipped in boxes have invaded the Ontario market because of their color and shipping quality. The bright red color attracts the buyer and the thick skin preserves the good appearance of the individual.

Thick Skins Most Desirable.

Thin skinned Ontario-varieties will not stand the shipping and long exposure in the retail stores to the same degree as the Western thick skinned apples. Western apples may go punky and become unfit for use, but still look well, as the exterior will stand alone. Ontario needs a good box pack apple, something rosy red, of good quality, and a good thick protective coat.

Where, Oh Where, Is It To-day?

Perhaps somewhere in a fence row such an apple may now be found. Who knows. What have you?—L. Stevenson, Sec., Dept. of Agriculture, Toronto.

RUNNING AN EGG FACTORY.

Valuable Hints as to How to Make the Best of the Hen.

Every flock of hens is an egg factory. Like any other factory the flock can be given the best materials in the world to work on and still fail to produce enough to pay for running the plant. Good feed in sufficient variety is necessary for egg production, but the ability to manufacture eggs from feed must be there first.

It pays to cull out the poor layers any time, to save the feed and labor they cost, but to make a profit on them it is best to cull in late summer or early fall, before the rush of spring chickens lowers the market price of old hens.

Shut up all the hens and pullets some evening. Count them and decide just how many can be readily kept during the coming year without crowding, for this is very likely to hurt egg production and increase the danger of disease. The next morning the flock is ready to be culled.

1. Poor layers and all old hens.
2. Cripples, and hens with broken-down abdomens or frozen teats.
3. The sick, quiet, inactive hens that spend much time on the roost.
4. All "crow heads" with long, slim heads and beaks.
5. The large, coarse-headed hens with sunken eyes.
6. All very short, stubby hens with feathers extremely heavy for their breed.
7. All late-hatched immature pullets and those that are early hatched but much undersized.
8. All hens that molt before August 1.
9. The persistent sitter.
10. All hens with solid, fat abdomens.
11. All hens having bad habits (cannibals, feather-pullers, egg-eaters).
12. All cockerels not needed for breeding purposes.

1. Strong, healthy, vigorous hens with short, neat heads and strong beaks.
2. The hens with long, deep, rectangular bodies and parallel top and bottom lines.
3. The hens with large, bright eyes, active appearance and short, well-worn toe nails.
4. The hens with dusty, worn feathers, especially worn tail feathers, but having a bright, healthy look.
5. The hens that molt late.
6. The noisy, happy, friendly hens.
7. The early risers and those late to roost.
8. The vigorous hens with the faded beaks and shanks.
9. The hens with the soft, pliable abdomens.
10. The hens with the thin pelvic bones spread wide apart.
11. The early-hatched, well-grown pullets.
12. Large, strong, active, quick maturing cockerels of desired variety type and high-producing mothers.

There are five major factors in profitable poultry production—breeding, culling, feeding, housing, and care. These are the essentials; combined they will put the poultry business on a practical business basis.

Onions once frozen should remain frozen until time to use them.

If you want stocky, healthy plants in your hotbeds or greenhouse, ventilate well. Too much water and heat make tall, spindling, weak plants.

Have you organized a farmers' club or a reading circle in your community? Lots of enjoyment, as well as profit, may be obtained from an organization of this sort.

BIBLE THOUGHT
—FOR TODAY—

Bible Thoughts memorized, will prove a precious heritage in after years.

WHAT DOES GOD REQUIRE?—And now, Israel, what does the Lord thy God require of thee but to fear the Lord thy God, to walk in all His ways, and to love Him, and to serve the Lord thy God with all thy heart and with all thy soul.—Deut. 10: 12.

Climb a little higher than the crowd and you will be the target for the knickers.

The death occurred a few days ago at his home in Inwood of James Deans, aged 81 years.

John Chivers, of Belmont, applied for \$420.50 for the new public library in that village. This amount was collected by the township with the taxes, at the request of the village, and turned over to Mr. Chivers.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Mortgage Sale

VALUABLE CREAMERY PLANT
AND PREMISES, AT GLENCOE,
COUNTY OF MIDDLESEX

Under and by virtue of the powers contained in a certain mortgage made by William Gordon, which will be produced at the time of sale, there will be offered for sale by public auction by L. L. McTaggart, Auctioneer, at the premises in the Town of Glencoe, on Wednesday, November 29th, 1922, at 2 o'clock in the afternoon, the following property, viz.:

Lot number three in Michael Dean's survey of part of the south half of lot number twenty-four in the first concession of the Township of Ekfrid, in the County of Middlesex and Province of Ontario, formerly and now in the Town of Glencoe in the said County of Middlesex; together with all the plant, engine, boiler, churn, pasteurizer, machinery, shafting, belting, utensils and effects in and about and used in connection with the creamery situated on said premises.

On the property there is a substantial brick building with cement floors and fully equipped for the manufacture of butter. It is centrally located in the town of Glencoe and surrounded by a good dairy country.

Terms and conditions of sale:—Ten per cent. of the purchase money to be paid at the time of sale and the balance within thirty days thereafter. For further particulars and conditions of sale apply to R. G. R. MACKENZIE, Petroler, Ont. Vendor's Solicitor.

Dated at Petroler, Ont., the 6th day of November, 1922.

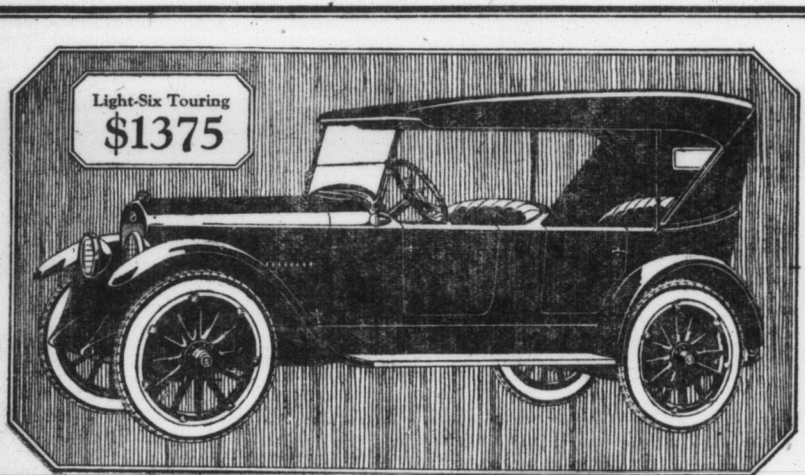

IN THE MATTER OF ROBERT A. EDDIE, VENDOR, AND THOMAS F. ROBINSON, PURCHASER, AND IN THE MATTER OF THE BULK SALES ACT, 1917.

Notice is hereby given that Robert A. Eddie, carrying on business as a Farmer in the Township of Mosa, in the County of Middlesex, made a sale of his farm stock, implements and farm produce to Thomas F. Robinson of the Village of Rodney, in the County of Elgin, Merchant, and that the said purchaser has delivered the promissory notes given by him favor of the said Vendor for the whole of the purchase money to Matthew H. Penhale of St. Thomas, as Trustee, for distribution pro rata, among the creditors of the said vendor, Robert A. Eddie, under The Bulk Sales Act, 1917.

And further take notice that all persons having any claims or demands against the said Robert A. Eddie are required to send by registered post, prepaid, or to deliver to the undersigned trustee, or his solicitor, their names and addresses and full particulars in writing of their claims, duly verified, and the nature of the securities, if any, held by them.

And further take notice that after the second day of December, 1922, next, the said trustee will proceed to distribute the proceeds of the said promissory notes, when paid, among the persons entitled thereto, having regard only to the claims of which he shall then have had notice, and that he will not be liable for the said proceeds, or any part thereof, to any person of whose claim he shall not then have received notice.

Dated at St. Thomas this 2nd day of November, A. D. 1922.
J. D. SHAW, 384 Talbot Street, St. Thomas, Solicitor for the said Trustee, Matthew H. Penhale.

Light-Six Touring
\$1375

"Built-in-Canada"
Studebaker

It is not necessary to buy a high-priced touring car to get maximum comfort. Comfort is a matter of correct design. Comfort is built into the Studebaker Light-Six.

The seats are placed at just the right angle for relaxation and are provided with big, fat cushions, upholstered in genuine leather. The semi-elliptic springs are long, strong and resilient.

Economy of operation is increased by valves inclined at a 20 degree angle and by the internal hot spot.

Vibration, which is so destructive to motor-cars, is practically eliminated by the perfect balance of the motor. This

is largely due to the fact that the crankshaft and connecting rods are machined on all surfaces, an exclusive Studebaker practice for cars at anywhere near the Light-Six price.

This handsome touring car is a quality car throughout. It is sold at \$1375 only because of complete manufacture, in large volume, in one of the most modern and complete motor car plants in the world.

Middlemen's profits are thus eliminated, and the savings are passed on to you.

The Light-Six Touring Car well upholds Studebaker's 70-year reputation for dependability and dollar-for-dollar value.

Cowl lights. Cowl ventilator. High-grade, nickel-plated combination robe and hand-rail across back of front seat. Thief-proof transmission lock. Large rectangular plate-glass in rear curtain. Nine-inch seat cushions of genuine leather. 40 H. P. motor with inclined valves and internal hot spot.

How Tire and Rubber sales are increased by Long Distance

Quotations from recent reports:

"We have increased our use of Long Distance 33-1/3% for the first six months of 1922."

"When travellers come in they leave a list of customers they will be unable to call on the following week, and these are called by Long Distance from the Branch Office."

"At each Branch we have one man who does nothing but sell over the telephone."

"One of our staff is allotted to take Long Distance orders at his home after business hours, so as to secure the reduced rate for night service."

"We often call up customers by Long Distance between salesmen's visits."

We can tell you how to apply Long Distance to almost any business

Born

DYMOCK—At West Lorne, on Friday, November 10, 1922, to Mr. and Mrs. Thos. Dymock, a son.

McKELLAR—At Aylmer on Tuesday, November 7, 1922, to Mr. and Mrs. J. A. McKellar, a daughter.

Card of Thanks

Mr. and Mrs. Arthur Ritchie and family wish to express their thanks to friends and neighbors, also the teacher and pupils of S. S. No. 12, Mosa, for the gifts presented to them on the occasion of their leaving to make their residence elsewhere.

Card of Thanks

Having sold my business in Glencoe to Bruce McAlpine I take this opportunity to thank my many customers for the liberal patronage extended to me during the past eleven years, and hope that they will continue to extend the same to my successor, Charles George.

TOWN AND VICINITY

The infant son of John Graham, Jr., is critically ill with pneumonia.

A song service will be given in the Methodist church on Sunday evening. Mosa township 611 wells produced 1,031 barrels of crude oil in September.

Dan Galbraith, of Walkers, had his wrist fractured a few days ago while cranking his car.

The Glencoe high school have set Friday, Dec. 8, for their annual commencement exercises.

The Glencoe creamery premises will be sold by auction on Nov. 29th to satisfy a mortgage.

The Presbyterian Sunday School Christmas entertainment will be held on Thursday evening, Dec. 21st.

Mrs. Ida Woods, of Bothwell, is in a critical condition in Victoria Hospital, London, with chronic neuritis.

Only a few short weeks until Christmas. Get your holiday announcements in now, to encourage early shopping.

Rev. D. G. Paton will address the Women's Missionary Society at Kintyre this evening on his recent trip to Europe.

Miss Ethel George and Miss Olive Black sang at a sacred concert given in the Star theatre at St. Thomas on Sunday evening.

Alex. Watterworth, of Wardsville, underwent an operation for appendicitis at St. Joseph's Hospital, London, on Thanksgiving Day.

The death occurred in the Deaconess Hospital, Glasgow, Montana, on Nov. 3rd, of John Ferguson Campbell, aged 65 years, son of the late Angus Campbell, of Appin.

Black squirrels are more numerous than for several years, and although they are protected by law they are being pursued by hunters and their number is being reduced.

Alex. McNeil has sold his residence on the south side to Moses Harrigan, who is moving into town from Ekfrid, and has bought Melvin Watterworth's residence on the Appin road.

Wm. Woods, a well-known and highly esteemed farmer of lot 5, con. 4, Metcalfe, died at the family residence on Tuesday evening. Mr. Woods was about 48 years of age, and was a member of the Metcalfe council and assessor of the township for a number of years.

At a meeting held in the Presbyterian church on Monday evening, a Trail Rangers' Camp was organized for the boys of the congregation, with the following officers:—Chief, Willie Anderson; sub-chief, Sherman McAlpine; tally, Gordon McDonald; cache, Fred McRae.

The annual meeting of the Glencoe branch of the Bible Society will be held in the lecture room of the Presbyterian church on Friday evening of this week at 8 o'clock. Rev. R. J. Bowen, F.R.G.S., District Secretary of the Canada Bible Society, will give one of his interesting lectures.

The St. Thomas Times-Journal says:—Mrs. Lydia Watterworth, 81 Scott street, received a message on Wednesday announcing the death of her mother, Mrs. Sarah Thomas, of Strathcona, Alberta. Mrs. Fannie M. Skih, of this city, is a sister of Mrs. Thomas, and is the only surviving member of a large family.

The Melbourne school board have arranged for the opening of their new \$20,000 continuation school on Nov. 17, in the school auditorium. An excellent program will be presented by the Maple Leaf Quartette, of Galt; Andrew McLaughlin, violinist; address by V. K. Greer, senior school inspector, of London, and school chorus.

The annual "At Home" of the Great War Veterans' Association was held at the town hall on Friday evening with a large attendance. Excellent music for dancing was furnished by Harold Pudney and his versatile orchestra, of London. The occasion was a most enjoyable one throughout, and highly creditable to the committee in charge.

Provincial Officer Thomas J. Stratton has been officially advised of his appointment as acting license inspector for London and Middlesex, temporarily succeeding to the position held by the late Inspector J. E. Keenleyside. The work of this office has been taken over by the provincial police and Mr. Stratton will act until an appointment is made.

An interesting program was presented by the Presbyterian Guild at the regular prayer meeting on Wednesday evening. Reports of the summer school held at Alma Ladies' College, St. Thomas, were given by Misses Evelyn McLachlan, Reta Christner and Betty and Mayne Grant. Musical numbers were rendered by the Young People's orchestra and a mixed quartette.

The anniversary of the W. M. S. was held in the Methodist church on Sunday, Nov. 12, when large congregations listened with interest to splendid addresses by Mrs. (Rev.) Godfrey, of Dutton. The morning service was conducted by Mrs. Yorke, and Mrs. Godfrey spoke on the W. M. S. work in China and Japan. In the evening Mrs. H. McCutcheon had charge of the service, and Mrs. Godfrey's address was on Canadian W. M. S. work. Special music was rendered by the choir at both services. A splendid offering was received and several new members were added to the roll.

It is provided by the Ontario Statutes that when Christmas Day falls on the last Monday in the year the municipal nomination meetings, usually held on that date, shall be held on the preceding Friday. Such is the case this year, and in consequence only five clear days are allowed for preparing and printing the annual financial statements. No change is made in polling day when it falls on New Year's Day. It is suggested that the municipal councils have their financial year end not later than Dec. 8th under these exceptional circumstances. Unless some such steps are taken the annual financial statements cannot possibly be in the hands of the ratepayers by nomination day.

A meeting of the Presbyterian Guild of more than usual interest was held on Monday evening when the high school literary society presented a bright and attractive program to a large audience. The subject, "Fear of punishment is greater than hope of reward," featured the evening and was well debated by four of the pupils—the affirmative by Gladys Bechill and Glen Payne, and the negative by Annabelle McRae and Alex. Munroe. The judges, Mrs. Paton, Mrs. Strachan and Evelyn McLachlan, gave their decision in favor of the negative. Vocal solos were rendered by Misses Ethel George and Olive Black, choruses by the society, and last but not least the reading of the "Oracle" by Catharine Lawrence. The president of the literary society, James McNabb, presided. Refreshments were served by the Guild.

The death occurred in Brooke on Friday of one of Alvinston's most highly esteemed residents, Margaret Ellis, widow of the late John Luke. The late Mrs. Luke was a pioneer resident of this community, having been born in Brooke township some 71 years ago.

The proposal to place a tax on every gallon of gasoline consumed by motorists for the purpose of raising funds to build new highways is gaining ground in the United States. Those who sponsor such a tax are doing so on the theory that those who derive the greatest benefit from good roads should bear the greater portion of the burden. It is argued that the man who travels only about 5,000 miles annually over the highways of the various States should not be forced to pay as much as the owner of a motor car or truck who probably travels as much as 15,000 or 20,000 miles or more, as the wear and tear in the latter case would naturally be greater than in the former.

PERSONAL AND SOCIAL

—James Beggs spent Sunday in London with his sister, Mrs. E. Lumley.

—Mrs. L. Suiter visited her sister, Mrs. Ackert, of Ingersoll, over the week-end.

—Capt. Dan McAlpine, Mr. and Mrs. Robert McAlpine and baby and Mrs. Hawley and baby, of Detroit, spent Sunday at D. R. McAlpine's.

—Dr. James Y. McLachlan, Glencoe, announces the engagement of his youngest daughter, Grace Elizabeth, to James Clayton Brown, son of Mr. and Mrs. James H. Brown, Tupperville, Ont. The marriage will take place the latter part of November.

—William Grayson, K. C., and Mrs. Grayson, Moose Jaw, Sask., announce the engagement of their daughter, Mary Vera Norah, to Lester McTaggart, only son of Mr. and Mrs. Lachlan McTaggart, of Appin, Ont. The marriage will take place the latter part of November.

STRATHBURN

W. J. Webster spent Sunday at his home in St. Thomas.

Alex. McRae, brother of D. H. McRae, has sold his house and lot in Glencoe to James Neve, G.T.R. section foreman, and has bought a residence at Niagara Falls, where he will spend the winter.

Russell Childs had the calf of his leg badly hurt while working with a scraper on the provincial highway east of Strathburn. The injury will lay him up for some time.

D. H. McRae, Jr., and his friend, John McGeorge, of Detroit, spent Sunday at the former's home here.

Mr. and Mrs. John Crawford and family, of Ridgeway, spent Sunday at David Allan's.

We are pleased to learn that Mrs. D. H. McRae, who has been in ill health for some days, is improving.

SPECIAL NOTICES

Signs lettered by Vincent Watterworth.

Young calf for sale. Apply to Alex. McAlpine.

Strayed—dark grey Pheasant hen. Notify Thos. Haggith.

Cook coat, as good as new, for sale cheap. Apply Transcript office.

For sale—30 choice Barred Rock cockerels, bred to lay strain.—Walter Hallstone.

Mill running daily. 11c per bag; large bags or sacks, 12c.—R. E. Laughton, Glencoe.

Call at Scott's shoe store and get quality shoes and rubbers at a moderate price for cash.

Don't fail to attend the opening of Melbourne continuation school on Friday evening, Nov. 17.

Family washing 12c a pound. It is cheaper than you can do it at home.—Roy Siddall, agent.

Orders taken for fresh Ciscoe herring, December delivery, at \$8 per cwt.—McAlpine's Grocery.

Wanted—loan of \$500 for one year at current rate. Ample security. Address X. Y. Z. Transcript.

New goods arriving each week. A complete range of sport and dress hats.—The Keith Cash Store.

Furniture repaired and upholstered, called for and delivered.—Vincent Watterworth, next door Smith's meat shop.

Party who borrowed pair of light horse collars belonging to Tomlinson's Livery, Glencoe, please return same at once.

Try Humphries for cooked ham, 1 lb., also corned beef, sausages and bologna. Order your thrashing roast here and get the best.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, first door north of Transcript office; phone 63.

Don't buy records. After Dec. 1st I will exchange with you for 20c each.—Vincent Watterworth, next door Smith's meat shop.

The Pollyanna Mission Circle of the Methodist church is holding a hot chicken supper and entertainment in the church on the evening of Friday, Nov. 24.

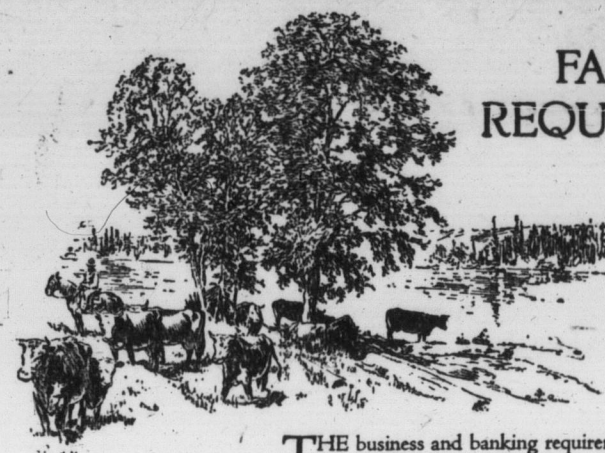

A glance through J. N. Currie & Co.'s store, with nice, clean, desirable merchandise of the better class, so moderately priced, explains why this store is still increasing its volume of business.

Leave your order for a chemical closet, a wheelbarrow, a ladder, a hayrack, or anything you want repaired or made. We can do it. Saws filed and set.—Vincent Watterworth, next door Smith's meat shop.

Jack Miner is coming to Glencoe on Monday, Nov. 27, and will give an entertaining talk on birds in the opera house afternoon and evening. The afternoon meeting will be for public school pupils; admission 20c. The evening meeting will be for all; adults 50c, school children 35c. Mr. Miner's lecture will be illustrated with 2,000 feet of moving picture films.

Glencoe, Ont., R. R. 1, November 2, 1922.—I, Charles Cameron, do hereby fully and unreservedly withdraw the libel uttered by me against the name and good character of Joshua Parke, shoemaker, Newbury, and sincerely apologize for causing such libel to be spread, knowing that there is no truth whatever in the statement which I made, and I do hereby cause this apology to be published in the Glencoe Transcript for a period of three weeks at my own expense.—Chas. M. Cameron.

Nell Ford's garage at Rodney was broken into Saturday night and his Ford touring car stolen. Four dollars in money was also taken.

FARMERS' REQUIREMENTS

THE business and banking requirements of farmers are many and various. This Bank, because of its close contact with farmers, has learned through practical experience how to serve them in a definite and satisfactory manner.

It has co-operated with them when they had to purchase land, seed, stock, and implements and has helped them to save and to maintain their finances in an orderly manner. Our branch manager will be pleased to have you consult with him.

The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Lunsford Book Co.)

CHAPTER XIV.—(Cont'd.)
After dinner they sat in the lounge, and Conward beguiled the time with stories of sudden wealth which had been practically forced upon men who were now regarded as the business framework of the country. As these worthies strolled through the richly furnished room leisurely smoking their after-dinner cigars Conward would make a swift summary of their rise from rags to riches, from clerk or laborer to their present affluence, occasionally appealing to Dave to corroborate his statements. It was particularly distasteful to Eiden to be obliged to add his word to Conward's in such matters, for although Conward carefully refrained from making any direct reference to Mrs. Hardy's purchase, the inference that great profits would accrue to her therefrom was very obvious.

A tall man passed by with a richly gowned woman on his arm. "Jim Farley," Conward explained. "Plasterer by trade. Began dabbling in real estate. Now rated as a millionaire." Conward paused to light another cigarette. "Interesting case, Farley's," he continued, after a pause. "You remember it, Eiden?" Dave nodded. "Farley blew in here from Scotland, or some such place, looking for work with his trowel. That was about the time of the beginning of things, as things are reckoned here. Some unscrupulous dealers learned that Farley had three hundred dollars—it goes to show what has happened even when the motive of the seller could hardly be endorsed as honest business. Well, this dealer learned that Farley had three hundred dollars, and by means of much connivance he induced him to invest that amount in a pair of lots on a cut-bank in the most outlandish place you can imagine. When Farley came to himself he was so sick over it he moved on to the Coast, and took up his trade of plastering."

"Well, in a couple of years things had happened. The principal thing, so far as Farley's fortunes were concerned, was the decision of a new transcontinental railway to build into this centre. Now it so happened that nature or geology or topography or whatever it is that controls such matters had decreed that the railway must cross Farley's lots. There was no other way in. It became the duty of Conward & Eiden to buy those lots. We ascertained his address and wired him an offer of two thousand dollars. There was no time to lose, and we felt that that offer would clinch it. But we had overlooked the fact that Farley was Scotch. Did he accept our offer? He did not. He reasoned like this: 'If I am worth two thousand dollars I can afford a little holiday.' So he threw up his job and in a couple of days he walked into our office. Would he listen to reason? He would not. He knew that an eagle would scarcely choose his property as a building site. He knew that whoever was going to buy those lots was going to buy them because he had to have them—because they were essential to some project. And he simply sat tight."

"To make the story short—how much do you think we paid for them? Ten thousand dollars. Ten thousand

which at times protruded a reckless frankness that lent a unique charm to her personality, but it was impossible to suppose that Conward had been captivated by those interesting qualities. To Conward the affair could be nothing more than an adventure, but it would give him a position of a sort of semi-paternal authority over both Irene and Eiden. Fortunately for his train of thought, which was floundering into more and more difficult travel, the prospect of having to appeal to Conward for the honor of Irene's hand in marriage touched Dave's sense of humor, and he suddenly burst into inappropriate laughter in the course of Mrs. Hardy's panegyric upon the life and morals of her late husband.

Mrs. Hardy contracted her eyebrows. "I beg your pardon," said Dave. "I have to confess I allowed my wits to go rambling, and they straggled upon a—upon a very amusing absurdity." Eiden's mind was engaged with Mrs. Hardy and Conward, and unintentionally he allowed his eyes to embrace of his surroundings. One more astute than Mrs. Hardy might have had a glimmer of the absurdity which had provoked Dave's untimely mirth, but she was a woman who took her self with much seriousness. If Conward guessed anything he concealed his intuition behind a mask of polite attention.

Mrs. Hardy addressed a severe gaze at Eiden. "You should keep your wits better in hand, young man. When you find them rambling it might be well to—ah—lasso them. Ha, ha, Mr. Conward. That's the word, is it not?" This unexpected with-lassement on Mrs. Hardy's part had the fortunate effect of restoring the lady's good humor, and Eiden found an easy way out of the situation by joining in the general laughter. "I fear a thought would be a some-

what elusive thing to get a rope on," he ventured.

"But if it could be done, Dave would do it," Irene interjected. "You remember?" said Mrs. Hardy, sharply. "You mean Mr. Eiden."

The color rose in the young woman's cheeks, but she stood by her guns. "He was Dave in those days," she said. "It would be impossible to think of a mischievous galloping about over the foothills; swinging his lariat, or smashing bottles with his six-shooter. Mister fits in with the conventions; with tidiness and perfume and evening dress, but it doesn't seem to have any place in the foothills."

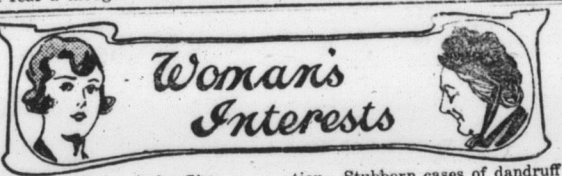

"You're right," Conward agreed. "Mister has no place on horseback. If you were to go out on the ranges and begin mistaking the cow punchers, like as not they'd lead you into camp at a rope-end. No man really makes much of a hit in this country until everybody calls him 'Dave by his first name.'"

"Well," Eiden seems to have made as you call it, with some of his quaintness," said Mrs. Hardy, with a touch of acidity. "I think, Irene, you would do well to re-range, and that Mr. Eiden no longer pursues his living with a lariat."

"It may be a point of view I have acquired in the West," Irene persisted. "But I think it a greater courtesy to address a man by his Christian name than by any artificial title. It is something like admitting a guest into the kitchen—a privilege not extended to the casual visitor. It seems like taking him into the family."

"Merciful Heaven!" exclaimed Mrs. Hardy. "Have we come to that?" Irene's cheeks, and even grew brighter still. "Oh, I didn't mean that," she protested. "I was—I was employing a figure of speech."

(To be continued.)

Woman's Interests

The Glory of the Girl.

Would you place a beautiful picture in an ugly frame? Then why should we not give our faces the same opportunity to appear in the same old frame? We give to a picture? A well-chosen frame and proper setting adds to the beauty of a lovely picture; so a girl's hair should form the artistic setting for her face.

Soft, lustrous hair, well arranged, seems to brighten the sparkle of the eye, add freshness to the complexion, and give a more attractive curve to features that might otherwise seem very plain and commonplace. There is, also, a certain feeling of confidence growing out of the knowledge of being well groomed, and this adds poise to one's bearing.

More than anything else, perhaps, the hair reflects the health and habits of the individual. To have beautiful hair, one must have good health. So first, shall we think about some of the things that make us healthy and happy—fresh air, wholesome recreation (which means just lots of fun and laughter), plenty of rest and plenty of good wholesome food, with emphasis on the proportion of milk, fruit and fresh green vegetables which our daily diet includes. Some very wise people tell us that a girl, in order to be the most attractive, and not be placed in the group which is called "undernourished," should weigh a certain number of pounds for her age and height.

Taking for granted that the hair is well nourished, we are ready to consider its care.

Oh, the weary hours spent in washing and drying long, heavy hair! But it is well worth every minute it requires and our "pay" is returned to us by our "crown of glory," lustrous and lovely.

Preliminary to shampoo, arrange conveniently a large bath towel, a small face towel or wash cloth, dissolve the required amount of a good grade of soap in hot water or place the liquid shampoo conveniently at hand, and heat gallons of water! You might also like a lemon rinse sometimes after the shampoo. The juice of one lemon and the rinse should stand covered with hot water in a cup, all ready to be poured into the last rinse water.

Brush the hair well before the shampoo, dip it into warm water and apply the liquid soap in sufficient quantity to make a good thick lather. Rub the lather well into the scalp and through the hair to the very ends. Ring in water as hot as is comfortable and then make a second thorough application of soap. Rinse at least two or three times, adding the lemon juice to the last rinse water. The advantages of the lemon rinse are that it removes any remaining soap and leaves the hair glossy and silky. The lemon fragrance, too, is delightful.

Wipe the hair with the bath towel, shake it out well and, if possible, dry in the sun. While the hair is drying, massage the scalp well with the finger tips, giving it a firm rotary motion to loosen the scalp and stimulate circulation. As the hair does not require one's undivided attention while drying, it is a beautiful opportunity to glance through a favorite magazine, read a chapter in an interesting book, or give the finger nails attention.

Dandruff difficulties are overcome by applying to the scalp the night before washing, a small amount of crude oil or olive oil and by thoroughly massaging the scalp for a few minutes every day to stimulate circulation.

Minard's Liniment for Colds, etc.

A Dollar can't stretch further

Not until now has a dollar bill been as big as a genuine Gillette Safety Razor.

No wonder it feels out of place in your pocket when, at any general store, hardware, drug or jewellery store, it can buy for you a lifetime's shaving service—comfort, speed and safety for the rest of your shaving days.

Gillette Brownie Safety Razor

and 3 genuine Gillette blades made and guaranteed by Gillette Safety Razor Co. of Canada, Limited—\$1.00.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificates being marked "Rupture." Why? Because the unfortunate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call it? At best, the truss is only a make-shift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—nourishment.

But science has found a way, and every truss sufferer in the land is invited to make a test right in the privacy of their own home. The PLAPAO method is unquestionably the most scientific, logical and successful self-treatment for rupture the world has ever known.

The PLAPAO PAD when adhering closely to the body cannot possibly slip or shift out of place, therefore cannot chafe or pinch. Soft as velvet—easy to apply— inexpensive. To be used whilst you work and whilst you sleep. No straps, buckles or springs attached.

Learn how to close the bermal opening as nature intended so the rupture CAN'T come down. Send your name and ten cents, coin or stamps, to-day, to PLAPAO CO., 765 Stuart Bldg., St. Louis, Mo., for trial Plapao and the information necessary.

Cats Scent While Asleep.

Cats have such a highly developed sense of smell that they can scent things while they are asleep.

DON'T LOSE ANOTHER HAIR

35c "Danderine" Saves Your Hair—Ends Dandruff! Delightful Tonic

Don't lose another hair! Don't tolerate destructive dandruff. A little Danderine now will save your hair; thicken and strengthen it; double its beauty.

Falling hair never stops by itself! Dandruff multiplies until it forms a crusty scale, destroying the hair, roots and all, resulting in baldness.

Your druggist will tell you that "Danderine" is the largest selling hair saver in the world because it corrects and cures all ills of hair of men and women every time. Use one bottle of Danderine, then if you find a single falling hair or a particle of dandruff, you can have your money back.

All druggists sell it

Linked by Phone.
England and Holland have been linked for the first time by a telephone cable planned more than eight years ago.

Born Talented.
"How you do stammer, my poor boy! Have you ever attended a stammering school?"
"N-n-no. I-d-d-d-d-do this naturally."

DYEING

THE postman or express man will bring Parker service right to your home. Suits, dresses, ulsters and all wearing apparel can be successfully dyed.

Curtains, draperies, carpets and all household articles can be dyed and restored to their original freshness.

We pay carriage one way on all orders.

Rheumatism! try Sloan's

It kills pain! by breaking up congestion

Most aches of rheumatism arise from congestion. Apply Sloan's. Don't rub. It penetrates to the sore spot, starting the blood circulating. This reduces painful congestion—the inflammation vanishes.

Try Sloan's on sprained, bruised muscles, on aching backs and neuritis. Try it on that "cold in the chest."

Made in Canada

Sloan's Liniment—kills pain!

New Motor Road Constructed Across Rockies

The Vermilion-Windermere section of the new motor highway from Calgary is now nearing completion. Engineers of the Canadian National Parks Branch announce that this road, which forms the last link in the through highway from Calgary to California, will be ready for traffic early next summer. As soon as it is open, a circle tour of 6,000 miles, touching three national parks in Canada and seven in the United States, will be completed. Motorists in both Canada and the United States are eagerly awaiting the opening of the road and work is being rushed to have everything in readiness for July.

A few years ago the province of Alberta built the section from Calgary to the eastern boundary of the Banff National Park and the Dominion Government carried on the road from that point through the national park to the Vermilion Summit of the Interprovincial divide. The province of British Columbia had agreed to construct the remaining section from the Vermilion Summit to a point in the Columbia valley where connection was made with the existing road from Golden, but owing to the outbreak of war and financial and labor difficulties, it found itself unable to carry on the work.

In 1919 the Dominion Government agreed to undertake this section and the date for completion was set for 1924. The road is therefore being opened a good year in advance of the date agreed upon. This has been made possible by the energy of the parks' engineers and the fact that operations were continued by order of the government throughout the entire year. Construction of the Vermilion-Windermere section presented many difficulties not only on account of the mountainous character of the country but owing to the long distances from railroad. From the crest of the Rockies, which the road crosses via the Vermilion Pass, the road drops down the abrupt western slope of the Rocky Mountain Range proper and then again ascends to cross the Sinclair range descending to the floor of Sinclair valley and through the thrilling Sinclair Canyon to the Columbia. Forty miles of the road had to be cut through virgin timber, fourteen bridges had to be constructed and the road finally carved through the huge walls of the Sinclair Canyon.

The railroads, Castle, Alberta, and Fairlands, B.C., were 75 miles apart. This meant that supplies for the construction had to be transported by truck or wagon, a distance of over 30 miles. The heavy snowfall in this district added considerably to the difficulty in the winter months. During the winter of 1920-21 the snow sometimes lay as deep as four or five feet on the passes and it often took days for the supply teams to reach the end of the road. About 60 miles of tote road were kept open during the past two winters.

Every mile of the new highway has been laid out so as to afford the motorist the finest view of the incomparable scenery as well as the easiest grades. The region is practically virgin country and those who have gone over it declare it embraces some of the most magnificent scenery in the Rockies. The route is one that has been followed in the past by none but a few intrepid explorers, chief of whom was Sir Jas. Hector, Geologist with the Palliser Expedition, who ascended the Vermilion on the famous journey which later resulted in his fortunate discovery of the Kicking Horse pass. The region is in fact so new that very few of the peaks bear names and fewer have as yet been ascended. A new world rich in virgin attraction is therefore opened both to the mountaineer and the motorist. The district abounds naturally in big game which is increasing rapidly and becoming very tame under the sanctuary conditions prevailing in the national park. Wild goat, elk, moose, deer and even bear will all come within sight of the passing motorist and a friendly sheep will often dispute the right of way.

Russia Interested in Bird Protection.

The protection of its migratory game birds is engaging the attention of the Russian Government and a request for assistance in drafting its laws has been received by the Canadian National Park Branch, which administers the Migratory Birds Convention Act in Canada from V. Gerasov, Superintendent of the Experimental Hunting Station, Agricultural Scientific Committee at Petrograd. The measures taken in Canada for the protection and propagation of wild life, states Mr. Gerasov, appear to be so desirable that in his report to the Russian Government he proposes to recommend the adoption of similar methods in his own country.

The protection in Russia of migratory game birds, especially the waterfowl, during the breeding season, will be of immense importance to the greater part of the countries in the eastern hemisphere. Birds from Europe, Asia, portions of Africa and as far south as Australia, migrate to the great northern breeding grounds in Russia and a treaty similar to that entered into between Canada and the United States would have a salutary effect on bird life in the old world.

OUTLAY ON ONTARIO HIGHWAYS IN 1922 TOTALS TEN MILLION DOLLARS

A despatch from Toronto says:—With the construction period for this year now over the Provincial Highways' Department made available on Thursday at the Parliament Buildings a statistical abstract of its season's accomplishments. It revealed the construction of some 300 miles of variously composed highways, the accomplishment of much preliminary grading and other work, and the expenditure of approximately \$10,000,000. As the Department's books for the year are not yet closed, this latter figure cannot be specified more definitely.

Of this \$10,000,000, of course, the province's share, by virtue of the Dominion and Provincial legislation under which it operates is only \$4,000,000, or 40 per cent. The Dominion Government also being obligated to pay 40 per cent. and the municipalities benefitting from the construction being obligated to pay the remaining 20 per cent.

The Highways' Department summarizes its year's work as follows: bituminous concrete pavement constructed, 44.9 miles; concrete pavement constructed, 43.25 miles; bituminous macadam constructed, 11.25 miles; waterbound macadam constructed, 107.4 miles; macadam base course constructed, 138 miles; grading finished, 487 miles; concrete culverts

erected, 1,200; bridges built, 23; railway crossing subways constructed, 2. This work, the Highways' Department states, has been accomplished as the result of a season which has been most propitious for furthering the province's good roads scheme. The weather, it is pointed out, has been most favorable, supplies of materials have been more regular, and labor has been most efficient.

The locations of the Department's principal work has been in the Niagara peninsula and up through Western Ontario. As a consequence of its activities in these regions, the Hamilton to Brantford and Hamilton to Queenston roads have been completed, with the result that a paved surface now exists from Hamilton to Niagara Falls. London and St. Thomas and Welland and Niagara Falls have been linked up, while work has also radiated from the cities of Chatham, Windsor, Ottawa, Peterboro and Toronto.

The Department in its report expresses its recognition of the advisability of abolishing level crossings and states that it is pursuing this policy as rapidly as practical considerations will permit. The cost, it is pointed out, is so great that reasonable regard must be had for the railway companies in the matter of the extent to which they are forced into this expenditure.

THE COMING STORM.

—From London Opinion.

THOUSAND PERISH IN CHILE BY EARTHQUAKE AND TIDAL WAVE

Many Thousands Homeless in Southern Republic—Tidal Wave 160 Feet in Height Which Followed Earthquake Destroyed Some of the Smaller Towns on the Coast.

Santiago, Chile, Nov. 12.—An earthquake of great magnitude and far-spread effect rocked Chile from end to end yesterday. It was accompanied by a tidal wave, and the combined force of the earth tremors and the sweep of the water did vast damage.

It is estimated that at least 1,000 are dead and many thousands are in distress, needing food and shelter.

The provinces of Antofagasta, Atacama and Coquimbo suffered most, the central points of the quake lying in the latter two provinces. Copiapo, in Atacama, has the largest casualty list, with about 100 killed and many seriously injured.

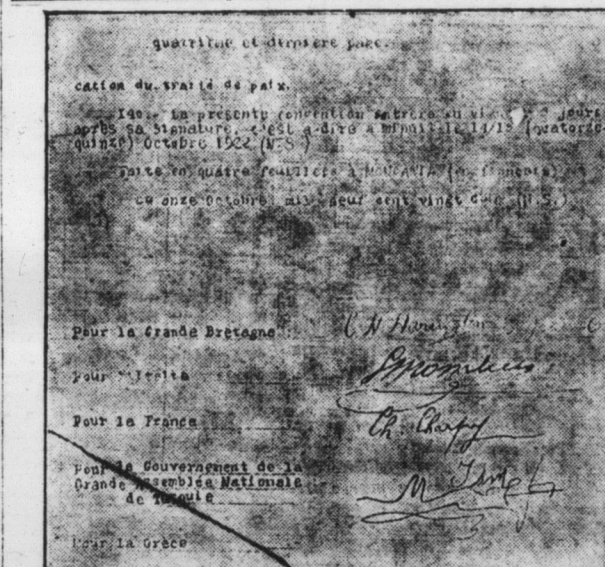

One hundred persons were drowned at Coquimbo, when a tidal wave, coming after the earthquake, swept in with a great roar. The inhabitants were panic-stricken and ran to the hills. The advance of the sea was accompanied by electrical discharges. Two steamers were left high and dry when the waters receded. The mole and railway depots were destroyed. Great quantities of merchandise were scattered through the streets and along the water front. Coincident with the shocks the sky was illuminated by electric discharges, and fires broke out. After the first shocks, the sea receded for a considerable distance, and then swept back in an immense wave, extending from Coquimbo to La Serena, seven miles to the northeast, flooding the town and the whole coast line and doing much damage. The tidal wave added to the terrors of the people, many of whom cried out for aid. Again the sea receded for a distance of 300 yards.

beyond the low-tide mark; then seemed to gather force and came back in an immense wave, estimated at 50 metres (164 feet) in height, which completely destroyed the Baquedano quarter. A number of big lighters were picked up like chips and carried beyond the railway bridge, which is five blocks from the low-tide mark. Upwards of 100 persons were killed and many seriously wounded by the earthquake, which overturned many buildings in Copiapo, capital of the province of Atacama.

It was for a time feared that the city of Antofagasta had suffered a great disaster, but most of the damage done at that place was due to a tidal wave, which drove the people out of their homes over a considerable area. No report of loss of life has yet come from there.

Chanaral, in Atacama, has virtually been abandoned by the inhabitants, as many buildings were wrecked by the immense seas sweeping in when the earth shocks had ceased. The greater part of this town was destroyed. Throughout the province of Coquimbo hundreds of houses were leveled, while the residents fled to the hills. From the southern part of Chile come reports of severe shocks, but little damage.

The biggest carload of apples ever shipped out of British Columbia went eastward last week to Magrath, Alta., the buyers being Messrs. Wurz and Whiffle, purchasing agents for the Merionite colony near that town. Fifteen hundred boxes of Jonathans and Wagners made up the shipment.

THE PAPER SIGNED AT MUDANIA ON BEHALF OF BRITAIN, FRANCE, TURKEY AND ITALY, WHICH HAS ALREADY BEEN VIOLATED BY MUSTAPHA KEMAL. Note that no one signed for Greece.

ROBERT FORKE SUCCEEDS HON. T. A. CRERAR AS LEADER OF PROGRESSIVES

Winnipeg, Nov. 12.—If the "Progressive" or "Farmer" members of the Federal Government can have their way, the Progressive organization in Canada is to "broaden out" and become a real political party taking in all classes.

The conference of the Progressive M.P.'s from five provinces passed a resolution on Saturday to the effect that the Progressive movement is big enough to include men from all walks of life and that steps be taken to give effect to the common ideals. The resolution was passed unanimously, the Alberta members, who have been the exponents of the "group or occupational" idea of government, apparently having been won over to the "broadening-out" policy. The Press Committee report states that the resolution was passed unanimously.

To carry out its purpose of becoming a national political organization, a committee that had been named to go into this matter and report to the conference recommended that the work of forming a national organization be proceeded with. Taking the ground that the driving power and the nature of such an organization

should emanate from and be formulated by the local constituency organizations instead of by the elected representatives, the Alberta members and Miss Agnes Macphail of the Ontario delegation put in written protests, with the result that the conference agreed to a modification, a rider being attached that the matter of a national organization should first be submitted to the local organizations.

The conference elected Robert Forke, M.P., for Brandon, Man., as Chairman of the Parliamentary Executive and House Leader, succeeding Hon. T. A. Crerar. Mr. Forke was elected over J. T. Shaw of West Calgary. The vote was not announced. R. A. Hoey of Springfield, Man., who had been mentioned for the leadership, declined to stand.

Mr. Forke is a former President of the Union of Manitoba Municipalities, and has had extensive municipal experience. He is a farmer and lives at Pipestone, Man. He is regarded as a safe and sane "moderate." Mr. Forke was born in Scotland and came to Canada in 1882. Mr. Shaw is a Calgary lawyer.

Previous Earthquakes in Chilean Republic

Chile has been shaken by earthquake three times before this—In 1822, 1855 and on August 16, 1906. The latter, in Valparaiso, destroyed the greater part of the business section of the city, with the loss of hundreds of lives. Two distinct shocks occurred without tremor or warning. Many buildings were toppled over into the streets, and fire completed the work of destruction. The seacoast near the city is unstable because of the frequency of upheavals.

Admiral Halsey. Canadians will remember Admiral Sir Lionel Halsey as one of the officers who attended the Prince of Wales on his tour of the Dominion. He has been retired at his own request to make room for younger officers.

Employments will be much better in Canada this winter than last, according to an opinion expressed by C. S. Ford, Superintendent of the Government Employment Service. Building and construction trades, lumbering and farm work, will be fairly active this winter and at the present time there is a considerable demand for men in those industries.

Nearly three hundred million dollars is paid out annually in wages to those employed manufacturing auto cars and trucks.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.20; No. 2, 75 to 85c.
Manitoba oats—Nominal.

Hogs, \$11.25.

ALLOW GERMANY TWO YEAR MORATORIUM

Experts Advise Granting Reprieve from Reparations Payments of Cash or in Kind.

A despatch from Berlin says:—The report of the experts who have been investigating economic conditions in Germany, Professors Keynes, Brand, Jenks and Cassel, advocates a two-years' moratorium from reparations payments of cash or in kind and stabilization of the mark on the basis of 3,000 to 3,500 marks to the dollar by utilizing the Reichsbank's gold reserve. The report contends that the financial problem cannot be solved unless the mark is stabilized, and that stabilization would be impossible without a moratorium. The experts suggest that half the Reichsbank's gold would suffice, and should be devoted to repurchase of paper marks, the repurchases to be restricted to German bank notes, especially those in foreign possession, but excluding exchequer bills.

The moratorium might need to be extended, and payments should not be resumed until Germany is able to discharge them from a real budget surplus, which the experts think may be attainable in two years. Thus stabilization would depend for success not on a foreign loan, but on development of the conditions of production and final settlement of the reparations problem.

They consider that their plans would be facilitated if in the meantime negotiations were started with a consortium of bankers to support stabilization by modest credits, and also that a foreign loan cannot be expected until the reparations problem is finally settled.

Regarding an unfavorable trade balance, the experts state that statistics at present available cannot form ground for adequate judgment and that Germany should have equal rights with other nations to impose customs duties on luxuries and the right to demand the most-favored-nation treatment as regards exports. The signatories believe that it is neither necessary or practicable to prohibit absolutely an increase in the floating debt, but that with the mark stabilized it would be possible to allow just enough further increase to tide over immediate difficulties.

VAST AREAS TO BE SURVEYED BY PLANE

Further Extension of Traffic Boundaries Planned by T. and N. O.

A despatch from Cochrane, Ont., says:—The almost limitless expanse of the territory stretching as far as the Province of Manitoba on the northwest and Hudson Bay on the south, will be made the subject of extensive investigations by airplane next summer, according to the present intentions of the T. and N. O. Commission. In an interview here on Thursday, in which he touched on the future policy of the T. and N. O. in its traffic boundaries, Chairman George Lee stated that completion of the extension of the railway to James Bay will only mark the opening of further exploitation of unknown lands for the Ontario Government. During the past summer several airplane parties had flown over considerable territory in the vicinity of the Albany River and arrangements have already been made with the Laurentide Air Company for employment of a small fleet of airplanes in that region next summer. At present, 70 miles of railway is under actual construction north of Cochrane, the steel stretching north from here for 25 miles in the direction of James Bay while the route of the extension has been located for 100 miles. Trail lines have been run to Moose Factory and the location of the actual line for the remainder of the way will be located this winter. "We hope to get construction far enough advanced to allow the contract for the remainder of the road to Moose Factory being let next year," is Mr. Lee's statement. "The present construction is aimed to develop all Ontario east to the Quebec boundary and certain portions of Northern Quebec, which will naturally drain its traffic into James Bay. The Western portion of Ontario, of course, will be exploited to the utmost and the possibilities of further traffic from this territory will be continually investigated."

Allies Settle Russia's Place in Conference

London, Nov. 12.—After protracted negotiations, the Allied powers have agreed that Russia and the Republics of Georgia and the Ukraine, are to be represented at the Lausanne conference only when the question of freedom of the Straits comes up. Moscow demanded that the Soviets, as well as the Allied Republics bordering on the Black Sea, be represented throughout the conference. The Allies, however, take the stand that making peace with Turkey has nothing to do with Russia, Ukraine or Georgia. They also say the Russians can include representatives of Georgia and the Ukraine in their own delegation. Moscow was informed to-day of this decision.

Mahogany trees do not reach their full height until they are 200 years old.

EIGHT-HOUR FIGHT IN COUNTY MAYO

Twelve Rebels Killed in Battle Between Irregulars and Nationals.

A despatch from London says:—An eight-hour battle between Free State troops and irregulars near Foxford, County Mayo, is reported in a Central News despatch from Ballina, ten miles from the scene of the fight. The irregulars are said to have been dislodged and to have suffered about 19 men killed and many wounded. Two men on the Free State side were wounded.

A despatch from Belfast says:—Erskine Childers, one of the chief lieutenants of Eamon de Valera in the Republican movement, was captured by the Free State forces at Wicklow early on Friday morning, it is officially announced. A brother of Seamus Robinson, prominent Tipperary Republican, was captured with Childers. The prisoners were taken to the Portobello Barracks in Dublin.

The arrest of Mr. Childers, though depriving the enemies of the Government of a valued counsellor, is not expected to interrupt seriously the activities of the irregular forces, which, in Dublin especially, are increasing.

It is reported that Mr. de Valera was also in the house where the captures were effected, but evaded arrest. The house where Childers and Robinson were taken was the residence of Robert Barton, Glendalough House, Barton, a signatory of the Anglo-Irish Treaty, who later joined forces with de Valera.

A despatch from Dublin says:—Armed Republicans, mingling with the laborers going to work in the port of Dublin to-day, surprised the guards of National troops at their posts in the port area, disarmed them and took away all their arms and several thousand rounds of ammunition.

The spoils of the raiders were loaded on a lorry which the raiding detachments drove away, cheering for the Irish Republic.

Heavy firing cracked in various parts of the city during the night. The irregulars renewed their attack upon Wellington military barracks and also fired upon the Portobello Barracks. The early morning hours were made hideous by the rattle of machine guns.

Two civilians were found dead on a suburban road, and two soldiers lay wounded this morning in the centre of the city.

Troops Raid De Valera Headquarters in Dublin

A despatch from Dublin says:—Troops raided the De Valera party's headquarters in Suffolk Street on Thursday evening and made a prolonged search of the premises.

No men were found in the building, but five women were arrested and a large quantity of documents were seized, including Republican election literature.

NEW RECORDS IN TIMBER RECEIPTS

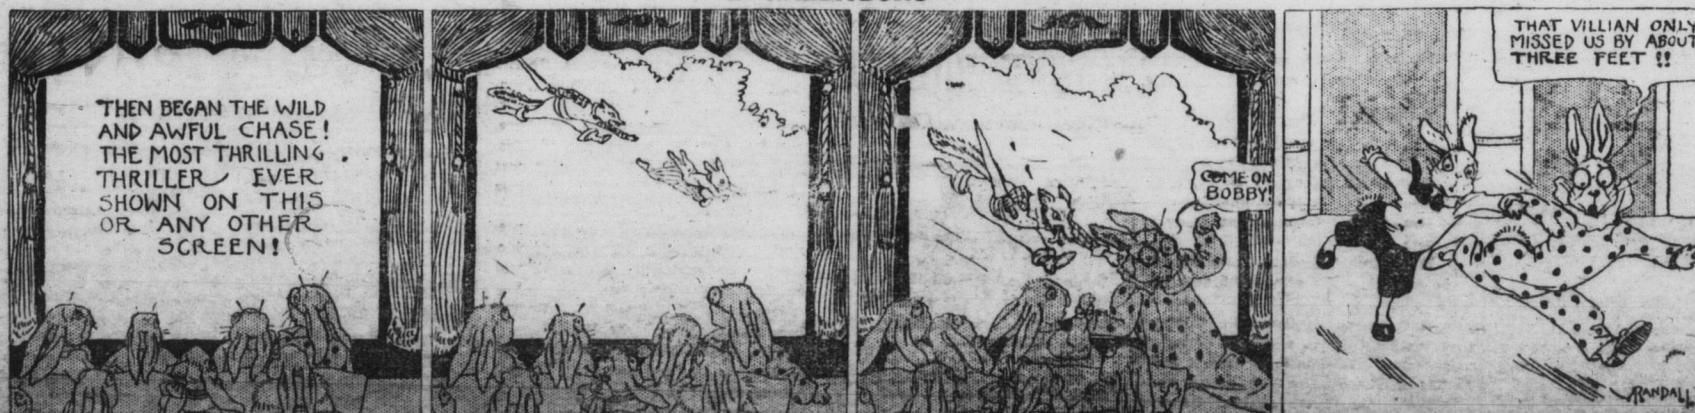

Lands and Forests Department Reports \$4,400,000 Revenue.

A despatch from Toronto says:—Ontario during its past fiscal year has realized the sum of \$4,400,000 from the sale of its timber and pulp limits and crown lands, according to the statement which was issued Friday afternoon at the Parliament Buildings from the office of the Minister of Lands and Forests. This figure constitutes a record, being substantially in excess of the previous high total of \$4,035,000, which was achieved in 1921.

The Lands and Forests Department considers that the year past has been one of the most successful for it. Habitually the greatest revenue producer for the province of any department, because of the timber limit sales which it transacts, it bids fair this year to maintain this position, its only possible rival being the succession duties department.

During the year forty-one timber and pulp-woods limits have been sold involving a total area of 600 square miles. Of these the largest single tract was the one of 81 square miles in Sherlock Township in the Sudbury District, which was sold on the last day of the fiscal year. Another large tract was one of 72 square miles in Mississauga Township, District of Algoma. The great bulk of sales, however, were of tracts that were under 15 square miles in area.

Canada raises more wheat per capita than any other country, according to the "American Miller," and sets the world a good example, for she also consumes more bread per capita than any other country.

Men Are Rushing Here For O'coats

Our Low Prices are the Talk of the Country

MELBOURNE

Melbourne, Nov. 10.—The pupils of the continuation school have organized a literary society, with Miss Jean Lockwood president, Edward Bate-man vice-president, Margaret Campbell secretary, Garnet Long treasurer. The society held the first meeting on Friday evening, with the vice-president in the chair. The feature of the program was a debate,—"Resolved that rural young people go to the city more for pleasure than for benefit," which was ably discussed. Miss Stella Long and Miss Margaret Murray upheld the affirmative, while Miss Avis McRoberts and Miss Margaret Campbell spoke in favor of the negative. The judges decided in favor of the affirmative. Recitations were given by Miss Marjorie Walker, a solo by Miss Margaret Stevenson and a piano duet by Miss Winnifred Wallace and Miss Doris Campbell. "The Bulletin" was read by the editor, Miss Hettie Cawthorpe. One of the objects these young people have in view is to buy and pay for a piano for the new school. They have raised sufficient money to make the first payment. The piano is here waiting to be moved into the school for the grand opening concert to be held on the 17th inst. It is expected that the school will be finished by that date and that the teachers and pupils will move into the building the following week.

For a number of weeks Melbourne has been thronged with men working on the hydro lines, many citizens constantly asking "When will we have hydro?" The question was answered by hydro being turned on Monday morning. Now the housewives are having electric washers installed, and business men are kept busy demonstrating electric goods. It is expected that the streets will be lighted in the near future, which will be a great convenience, not only to those living in the village but to the entire community.

Miss Dorothy Campbell, who has been ill for some weeks and has shown symptoms of infantile paralysis, has been taken to a Chicago hospital for treatment.

The Ladies' Aid of the Methodist church held an afternoon tea at the home of Mrs. Lewis. The gathering was well attended, the collection amounting to about \$7.

Miss Chisholm, of Kingsville, is the guest of Mrs. Gilbert McLean.

Henry Harvey and Mr. and Mrs. Gabler, of Detroit, spent a few days with Mr. and Mrs. Showers.

Misses Ella and Annie McGugan, of London, spent a few days at their home here.

Misses Mildred and Muriel Richards spent the week-end at their home here.

Melbourne, Nov. 13.—About 60 men are making their headquarters here while doing special work on the railroad. New steels have been laid on the main lines of the M.C.R., and the ones that were taken up were brought here and are being laid on the St. Clair branch, making it possible to run heavier engines over the road.

The members of the I.O.O.F. here held their regular meeting on Friday evening, a number of new members being taken into the lodge. Guests were present from Mount Brydges and Glencoe.

Mr. Wallace, of the Union Bank staff, has left for Essex, where he will relieve for a short time.

The Epworth League will hold a rally service on Sunday evening next. Rev. R. B. Cummings, of Muncey, will address the young people.

Rev. Dr. Brown preached anniversary sermons at Bethel on Sunday. Rev. Mr. O'Dell, of Strathroy, preached on evangelism and social reform.

Miss Sadie Switzer spent Thanksgiving at her home here.

John Tuffin, who underwent an operation for appendicitis in St. Joseph's Hospital, is doing nicely.

Mr. and Mrs. James Black spent Thanksgiving at A. D. Black's.

A. E. Beales and children spent Sunday at St. Thomas.

Mr. and Mrs. Andrew Goodall and daughter, of Thamesville, and Mr. and Mrs. Joe Winger and daughter and Mr. and Mrs. Clifford Tunks and baby, of Wardsville, spent Sunday at H. Winger's.

Mr. and Mrs. Hugh Black spent Thanksgiving with friends in London.

DAVISVILLE

Mr. and Mrs. Clarence Watterworth are visiting her parents, Mr. and Mrs. Thomas Durfee.

Mr. and Mrs. Wm. McRae and family, of Glencoe, spent Sunday at Mr. and Mrs. Joseph Armstrong's.

Joseph Armstrong, of Dawn, spent Sunday last with his mother.

Mrs. Dan McLean is improving in health.

Mrs. Ernest Armstrong is able to be around again, after an illness.

A Power of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Mr. and Mrs. Clarence Watterworth are visiting her parents, Mr. and Mrs. Thomas Durfee.

Mr. and Mrs. Wm. McRae and family, of Glencoe, spent Sunday at Mr. and Mrs. Joseph Armstrong's.

NORTH EKFRID

A number from here attended the fowl supper at Glen Oak Monday last. The table was groaning with good things and a good program was provided.

Miss Maggie McLean passed away very suddenly Friday, Nov. 10th, at the home of her brother, Neil McLean, Delaware.

Mr. and Mrs. Willard Kettwell, of Windsor, spent the week-end visiting friends in this vicinity.

Gordon Mills motored from London Saturday night and called on his father, Wm. Mills.

Mrs. Hiram Carman's sale was well attended and everything brought a fair price.

We are looking forward for next Sunday to hear and welcome our new minister, Rev. Mr. Stevenson.

Mrs. Carman has rented her farm to Raeburn Laughton for three years.

We are pleased to see Miss Lila Roemmele home again.

Mrs. George Laughton, of London, is here calling on old acquaintances.

Mr. and Mrs. Ben Patterson and family spent Sunday with Mr. and Mrs. Squire, Ekfrid.

Mr. and Mrs. David Howe spent Sunday with Mr. and Mrs. Henry Pettit.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

CASHMERE

Mrs. Dawson and Mrs. Young, of Cairo, spent Thursday with Mrs. Wed. Dark.

Born to Mr. and Mrs. Earle Linden, of Wardsville, a son.

Stanley Allen and Lloyd Saylor motored to Oakdale on Sunday.
