Special Committee Reports To Legislature Results of Accommodation Investigation.

CONSOLIDATE LAWS

Recommend License Fee of Fifty Cents Per Room Be Imposed.

Toronto, Feb. 13 .- The committee of the Legislature, which toured Ontario and a portion of New York State during the last summer in search of ideas for the improvement of the hotel accommodation in this province, laid the result of their labors before the Legislature yesterday afternoon, in the form of a report, recommending chiefly the appointment of a permanent commission, made up of hotelkeepers, com mercial travelers and Ontario Motor League members, to tender advice and generally look to the improve

ment of the hotel business. Separation Necessary.

The report states that the first thing that seems to be necessary is an entire separation of the business of enforcing liquor laws and the in Farrar-Tellegen Divorce business of regulating and develop-

hotel and innkeepers act should be drafted, the clauses of which should contain such matter governing hotels as is scattered through the statutes at present, and such other provisions as are found advisable to insert for the protection of the hotel-keeper and the benefit of the public.

ministration of hotels, entirely separate from the enforcement of the Ontario temperance act. This might be carried out as now directly under the attorney-general's department, and the reorganization of the Ontario License Bcard; by changing its name to that of the "Ontario Hotels Com-

The activities of a hotel commison, properly organized and properly administered, should result in very great benefit to the hotel business. The license fee imposed upon hotels that would defray at least the major part of the expenses of the commis It would seem reasonable that a license fee of 50 cents per room available for guests should be imposed, and this is recommended. This would provide annually a sum approximateing \$13,000.

Would Be Unfair.

Regarding the suggestion that the hotels be granted the exclusive rights to sell 21/2 per cent beer, the view is expressed that to limit such a sal to a standard hotel would be unfair to the manufacturers; it would create unnecessary annoyance to the public who wish such drinks; lit would be of very little benefit to the hotels. It is considered, however, might be well to give the municipalities the power to grant the within their boundaries the exclusive right to sell 21/2 per cent beer. announced yesterday. Chief Moore Denies He Was Intoxicated As Alleged.

Special to The Advertiser. Woodstock, Feb. 13.-Following an investigation, which lasted all day,

the Woodstock police commission re-

served judgment on the charges made against the chief of police by John Miller of this city in connection with he execution of a search warrant at his home on March 4 of last year. The charges were that on this occasion the search warrant was not bona fide, and was not shown, that the chief of police was under the influence of liquor and that there was

an ulterior motive behind the search. W. R. Brewster of Brantford, counsel for the complainant, objected to Magistrate Ball sitting on the commission during the investigation, on the ground that he had made out the warrant, the legality of which was questioned, and was prejudiced, and because he had written a letter to Mr. Brewster stating that he did not believe the charges made by Mr.

### Not Quite in Line.

During his speech to London Conservatives Hon. Howard Ferguson was reported, in part, as follows by his journalistic admirer in London:

The epidemic of commissions, Mr. Ferguson declared, had had origin in a spirit of hostility to the principle of public ownership which found its birth in the days of Sir James Whitney. Very well. But it would be excel-

All three have borne the brunt of the onslaught of time; all three are

say "all three." but the three-the tenement and the two old men-are inseparable in a sense. In the garret of the tenement lived one old man; in the basement of the same tenement lives the other. The death of the attic dweller Sunday brought the whole story to light, so remarkable were the circumstances surrounding

And it all happened and is happenng in London, Ontario.

The tenement is known as 140 Queen's avenue. David Williamson. aged recluse, who died in his illventilated, dingy attic bedroom, of privation and senility, while \$900 which he had deposited in the bank and which might have brought him the many little comforts he needed, lay untouched, is the one man. Jack Cable, 72, and globe-trotter, who recently moved from the attic to the basement of this queer building to save rent, is the other.

#### A Rolling Stone for 49 Years.

When autumn winds began to strip the trees last year, Jack Cable and his faithful old horse were existing in Chatham. For 49 years old Jack had been a rolling stone. From New York to Lower California, from Manitoba to Mexico had been his stamping ground. And now that winter threatened and the future in Chatham did not seem bright, the aged wanderer decided to "hit the road" again,

Packing his few personal belongings, including a home-made stove and a chest of tools, on a rickety rig, he hitched up his horse and started for London.

Time mattered not to him. As long as he arrived in London before snow fell he would be satisfied. And so he followed a meandering course to London, laughing and joking with passersby, carefree despite the

paucity of his cash. In London his thread of life became

His neighbor was leading the life of a recluse. Soon they became known to each gang of fellows approached me and other as "Dave" and "Jack." But still neither confided his most personal affairs nor revealed his past to the other.

### Screws Begin to Tighten.

Cable began to feel the screws tighten. He was unable to buy the necessities of life. His horse had suffered from exposure in a November storm, and had been placed in a stable. After five days, Cable received a bill for \$5 for the keep of his horse. He decided to sell the animal.

This is the tale of a tenement and found Cable. To get to his place of abode was as much a task as to grope to Williamson's room.

At the head of the stairs leading to the basement, cut in a partition, was a small window one foot square. Through it light shone. Above the window was a switch. The Advertiser turned it, and the light beyond the window went out.

After entering the front door it

"Turn on that switch," came the feeble but sharp command from the darkness beyond the partition. The Advertiser obeyed.

Then, fumbling about, a door which lay at the bottom of the stairs in the pitch blackness was found. The door opened as the reporter reached the bottom of the stairs. An old man of very slight build and drawn features appeared

The Advertiser entered the basement room and was invited to sit on a box by the stove. Old clothes, boxes and odds and ends were strewn

himself or his people. And I never said much to him along that line concerning myself." Then Cable became reminiscent.

"I've been through the mill." he mused. "I've had my ups and downs. My mother and father lived south of Brantford and I was born there. I used to be wild, when I was young. Finally things got so hot that I go out I used to act up even when I was at school, you know.

# ADMIRALSALL

Much of the romance of England centres about her admirals. The admirals of the last decade are no less interesting than those who went before, while the problems they had to solve and the crises they had to meet were immeasurably greater.

Winston Churchill, as First Lord of the Admiralty, came in intimate contact with all of them. Not the least interesting part of his book, "The World Crisis," is that which gives his estimate of various admirals' abilities and policies, and tells of his relations with them.

Here, as elsewhere in the book, dramatic incidents abound. There was the Admiral, for example, who went to sea with sealed orders before the war was declared, who found when he opened his orders that he had been made Commander of the Fleet. There was also the Admiral whose place he took. And there was the case of the German-blooded Admiral whom Churchill praises for doing his duty, but who lost his job. And there was another Admiral whom Churchill fired, but who later would serve under no other chief than Churchill.

# STRATFORD AND REDMEN MAKE SURE OF MEETING

Former Trimmed Sarnia 3--1 Though Hampered On Small Surface.

WIARTON'S EASY WIN

Beat Listowel 14--5, Winning Round by Sixteen-Goal Margin.

Special to The Advertiser. Sarnia, Feb. 12.—Sarnia intermediates met their first defeat on home ice in rears tonight, when the speedy Stratford aggregation turned them back 3-1 in the fastest hockey game played in these parts in years. Tonight's win gives Indians the round 13—3. Stratford had a good margin over the locals in speed, though the small fee surface of the local arena had them plainly worried, and Berger and Ketterbourne were not going the speed they do on their larger home rink. At the shooting game Sarnia had nothing to compare to the hard-driving visiting squad. The Blue and White had scores of chances to score, but the forward line lacked a punch. The work of McAllister in the nets for Sarnia was again the feature. Norfolk did good work for Stratford, but he was not called on to do the stuff the Sarnia guardian was. Clark, Perry and O'Brien were the best for Sarnia, with Morenz, Ketterbourne and Carson the pick for the winners. Stratford found the cramped ice surface none to their liking, the fast-travelling visitors being run off into the corner of their own accord as a rule during first period. Weak shooting or an entire lack of it when inside the Stratford defence cost Sarnia a couple of goals. Stratford tried to get its forward line. gives Indians the round 18-3. Strattire lack of it when inside the Stratford defence cost Sarnia a couple of goals. Stratford tried to get its forward line working, but they bunched too much to be effective. Both goalies had plenty to do, but only about four threats of goals were made during the first period, which ended scoreless. O'Brien drew the only penalty of the period for spilling Morenz. Stratford opened up with some vigorous shooting in the second period. Their combination was working better. Howle Morenz opened the scoring on a bullet-like drive from close in that gave McAllister no chance to save. Four minutes later Carson close in that gave McAllister no chance to save. Four minutes later Carson went down and drew the defence, passing to Morenz for No. 2. Clark came within an inch of scoring, and Finch and O'Brien gave Norfolk some exercise. Ketterbourne, Clark, Berger and Morenz drew penalties for hooking and kicking the puck. Stratford's forward line commenced to fathom the Sarnia ice, and McAllister was called on to do a lot of work. Some heavy body checka lot of work. Some heavy body check-ing was tried, due largely to the ice getting sticky. Carson and Jackson etting sticky. Carson and Jackson vere chased early for tripping, and then McAllister put on his show. Menz drew a minute for tripping O'Bri Carson relieved Finch of the puck Carson relieved Finch of the puck at center ice and went through the defence to score. Sarnia rushed and gave another demonstration of weak shooting. O'Brien and Finch went down together for Sarnia's lone counter. Play grew rougher as the game closed.

## Lorne Ave. Wins In Sudden Death

With 7-0 Defeat of Simcoc, Winners Go Into Finals.

Sincoe Street school seven in a sudd death semi-final yesterday afternoon Thames Park by a score of 7—0, qualifi Thames Park by a score of 7—0, qualified to meet Boyle Memorial crew in the finals which will be staged at Westminster rink Wednesday and Friday afternoons of this week. The Wednesday game starts at 4:15.

While Lorne Avenue always had the edge yesterday, the Simcoe Street agregation kept battling away to the final gong, and it was a well-played game. Haidane and Ross each scored one in the first neriod and then the one in the first period, and then the east enders began a runaway in the second with five counters of which Ross second with five counters of which Ross got three, Haldane one, and Black one. Only one penalty was handed out, and that was for a gentle body check, Both teams crowded the puck too much in-stead of playing their positions. The imcoe team were much smaller than he winners, and deserved great credit for their gameness. The line-ups:

# St. Valentine's Day To Bring

Romantic Maidens Looking Forward To the Day-Penny Comics Will Be Sent by Well-Meaning Persons To Friends.

Valentine Day was not invented by St. Valentine, the third century monk. Neither was it invented by Rodolph Valentino, though no doubt he got rafts of missives before he was married. It was the conception of a romantic Roman way back "before the war," who drew pictures of his inamorates with the aid of a pick-axe and a hunk of granite. This sentimental soul has since become the patron saint of local book and postcard dealers. But for him wives of valentine vendors would have to do without vacuum

At school the teacher lets the prettiest girl in the room do the i ributng. Some get 22; others only a couple. Usually one kid in the room named 'Pug" doesn't get any. Then some generous girl or the teacher will give nim one of hers. But it doesn't assuage the sting. All the boys ask him: 'Hey, Pug, how many'd you get?" And Pug would stand the insults just so long and then he'd sail in and beat up the gang. Girls would take their valentines home and give them away next year. If teacher got a comic everyone would snicker, and she'd either read them the riot act or give

Big sister receives an innumerable array of bleeding hearts, representing her multitudinous conquests, and places them prominently on the top of the piano so all can see. Little sister gets two, which she cherishes all by themselves on the mantel piece. Mother tells her that big sister only got one when she was that age, whereat little sister, by a process of mathematics, concludes she will be twice as popular as her elder sister when she

Bert, the star boarder, wakes up expecting several from girls he made hit with last summer. When he impatiently tears open the envelope of a long letter and discovers only a penny comic his day is ruined.

The thought conveyed on every valentine manufactured is:

It was some well-known authority on horseshoeing who discovered years ago the seat of the emotions was the heart. Consequently, that organ is the symbol of love on all valentines. In Russia the kidney and in China the lung. But in all civilized countries it's the heart. However, over in the land

# "My Husband Says"—

What "my husband" says always interests someone-even if it is only the man himself. But what the famous husband of a woman has to say to his better half interests everybody.

In a recently published interview Mary Pickford's own "Doug" told her

"Woman's place is in the Home!"

In another, George Creel gave interesting information to Blanche Bates, his stage-favorite wife.

What does MR. say to MRS?

These are the things that can be learned best by reading in The Advertiser each Saturday the series by famous women under the title:

# ATTITUDE OF BRITAIN CREATES IMPRESSION

Has Adhered To Traditional Policy in Debt-Funding Agreement.

Special to The Advertiser. New York, Feb. 12.—Within the past week statements have been issued by prominent men who are originally conservative in their utterances, but who have been moved to comment on a prosperity now at hand because it is altogether too obvious to be ignored. Judge Gary, head of the Steel Corporation; Georgo M. Reynolds, foremost among Chicago bankers; Secretary of the Treasury Mellon; Charles M. Schwab, head of the Bethlehem Steel Corporation, and others, all unite in declaring that the outlook is excellent, and that for the time being at least we are not dependent upon a foreign outlet for our manufactures. This does not mean that we are to ignore foreign trade possibilities, but, on the contrade possibilities New York, Feb. 12.-Within the past during which we can make ample preparations. while the textile mills report greatly increased activity.

As a result, the labor situation is becoming, or has become, an important factor. In a bulletin just issued by the United States employment service at Washington it is stated that manufacturing industries, almost without exception, are showing shortages of both skilled and common labor. Many mining industries have made similar reports, while the lumber industries are similarly handicapped, both in the woods and in the mills. Only the agricultural, food and some of the seasonal industries report surplusses, and in none of these is the condition serious. To remedy this situation, industrial leaders have been begging Congress to increase the number of immigrants to be permitted to enter this country, but the house committee on immigration, which has a bill in preparation, has preferred to give ear to the labor leaders, and is about to report a bill which will further restrict immigration. This is an unfortunate situation, because shortage of labor will force wages to a point where preduction costs will

which has a bill in preparation, has preferred to give ear to the labor leaders, and is about to report a bill which will further restrict immigration. This is an unfortunate situation, because shortage of labor will force wages to a point where production costs will encreach upon profits, and force a reduction in output. It is a time when an enlightened policy should prevail, but which seems out of the question at present.

Provincial financing during the month was not so heavy as during both December and January of last year. This was, of course, more or less due to the European troubles affecting the New York bond market, where the majority of the provinces do their borrowing.

The following is a comparison of bond sales during January and December:

Toronto, Feb. 12.—New York has become a very heavy buyer of all kinds of paper in the Canadian market. They have been especially active in trying to get assignments of Canadian kraft and all varieties of writing papers.

The demand is an abnormal one, and is said to be due to the general lockout which has been in progress in all the principal pulp and paper mills in Scandinaria and the Arctic regions. As a result of the lockout, shipments to New York have been cut off entirely.

WALL STREET

New York, Feb. 13.—Noon: The forenoon market was a curious mixture of
fresh buying in some directions and
profit-taking in others, but the main
trend was distinctly upward. Sales during the first hour totalled more than
400,000 shares, with industrial issues
making the best response to improved
trade conditions. Buying of the sugar
issues continued in aggressive fashion
following the jump of 100 points in the
quotation for raw sugar futures. Impressive strength also was shown by
several other groups, notably the tobaccos, equipments, public utilities,
chemicals and merchandising shares.
Acute weakness of New Haven, which
lost about 3 points, was attributed to
treports that the road was to be reorganized, but this was later officially
denied. New York Air Brake was pushed 4½ points, and American Sumatra
Tobacco 3, while numerous other shares
sold 2 to 2½ points above Saturday's
closing levels. Cafi money opened at

ARE OVERTAKING RAND

Timmins, Feb. 12.—The output of gold for 1923 in Northern Ontario will probably exceed that of 1922 by at least \$6,000,000, while the outlook for 1924 its that the increased millions will be even greater. Increased millions will be paid for materials and supplies, added millions will be paid in wages to additional thousands of men, and the shareholders of mining companies will receive many more millions in dividends.

The status of the gold mining fields in Northern Ontario shows the gold mining industry of this country to be moving at the rate of an increased output on an average of half a million dollars a month toward equality with the African Rand, which has heretofore held the record.

the long peace. All were fitted and fastened—it seemed securely—into an immense cantilever. The two mighty European systems faced each other with glittering and clanking in their ponaply, but with a tranquil gaze, A polite, discreet, pacific, and on the whole sincere diplomacy spread its web of connexions over both. A sentence in a despatch, an observation by an ambassador, a cryptic phrase in a parliament seemed sufficient to adjust from day to day the balance of the prodigious structure. Words counted and even whispers. A nod could be made to tell. Were we after all to achieve world security and universal peace by a marvelous system of combinations in equipoise and of armaments in equation, of checks and counter-checks on violent action ever more complex and more delicate? Would Europe thus marshaled, thus divided, thus related. unite into one universal and glorious organism capable of receiving, and enjoying in undreamed of abundance the bounty which nature and science stood hand in hand to give? The old world in its sunset was fair to see. In the summer of 1913, when I was revolving the next year's admiralty policy in the light of the coming es-

timates, I had sent the following minute to the first sea lord: We have now had manocuvres in the North Sea on the largest scale for two years running, and we have obtained a great deal of valuable data which requires to be studied. It does not therefore seem necessary to supplement the ordinary tactical exercises of the year 1914-15 by grand manoeuvres. A saving of nearly £200,000 would apparently be effected in coal and oil consumption, and a certain measure of relief would be accorded to the estimates in the exceptionally heavy year.

### Preferred Mobilization.

In these circumstances I am drawn the conclusion that it would be better to have no grand manoeuvres in 1914-15, but to substitute instead mobilization of the third fleet. whole of the royal fleet reserve I the whole of the reserve officers er for a week or ten days. THE CRISIS.

The carlier chapters of Mr. Churchill's first vowame carry the story of home and foreign politics from the naval estimates of 1909, which first moved him to a close study of Bragillah and to germany and the study of Bragillah and the same of the admiralty by Mr. Agaptith in October, 1912, to the summer of 1914.

If another forty-eight hours had gone before the word was spoken—i.e., by Friday morning—a certain number of vessels would have gone into dock for refit, repairs, or laying up. Thus on this Saturday morning we had the fleet in hand for at least four days.

THE BRAIN OF THE BRITISH NAVY WHEN THE GREAT WAR BROKE OUT.

Here is the board of admiralty as it was comprised in August, 1914.

Admiral Sir F. C. D. Sturdee, chief of the staff; Winston Churchill, first lord of the admiralty; Prince Louis of Battenberg, first sea lord; Rt. Hon. T. J. McNamara, secretary to the admiralty. Bottom row, left to right: Capt. Ce cil Foley Lambert, fourth sea lord; Rt. Hon. F. J. S. Hopwood (now Lord Southborough), civil lord of the admiralty; Rt. Hon. ## Shows 1922 To Have Been a Year of **Exceptional Progress and Solid Building**

The Twenty-Seventh Annual Meeting of the Shareholders and Policyholders of the Northern Life Assurance Company was held at the Home Office of the Company, London, Canada, on February 12, 1923. The chair was occupied by the President, Mr. T. H. Purdom, K.C., and a large number of Shareholders and Policyholders were present. The following Report and Financial Statement was submitted:

TO THE SHAREHOLDERS AND POLICYHOLDERS:-

The Directors beg leave to submit their report for the year ending December 31, 1922, together with the Financial Statement of the affairs of the Company.

In our last year's report we stated that "notwithstanding adverse business conditions, the results of the year's work are the most satisfactory since the Company was organized." Despite even worse business conditions during 1922, we are pleased to report still better progress during the past year.

The insurance in force amounts to the sum of \$30,463,796.50, and the Assets amount to the sum of \$4,495,263,49.

The following notable results have been accomplished during the past year:

1. The field methods instituted January 1, 1921, have resulted in still further increase in efficiency during the past year. The condition of the organization is now such that constructive expansion will be possible in the future with less expense than heretofore.

2 The Insurance in force has been increased by the sum of \$4,071,906.50.

The Reserve Fund now amounts to \$3,648,861.31, being an increase of \$231,667.39.

4. The amount of business written and reviewed was \$9,793,238.00, being an increa of \$1,161,587.00, which is 13.5%.

5. The excess of Assets over Liabilities, \$151,906.35, added to the paid-up Capital \$490,377.50 and the amount set aside for participating policyholders of \$28,145.26, amount the sum of \$670,429 11, which is the Surplus Fund over and above the Reserve on the ernment basis and is additional protection for policyholders.

6. The Surplus was increased by \$144,314.38.

7. The Premium Income almost reached the million dollar mark, being \$913,437.

the total Business Income was \$1,185,803.15. 8. The total amount paid and credited to policyholders and beneficiaries during the

was \$827,986.81. 9. The average rate of interest earned on the net Ledger Assets was 6.91%.

10. The mortality experienced was 44.5% of that expected.

11. Substantial increases have been made which compare favorably with those of the leading Canadian Companies.

The Field Force of the Northern Life is a new organization operating upon high ideals. of service, which it is maintaining with constantly increasing efficiency. It is the purpose of the management to create an agency organization which will be second to none in Canada.

The Directors appreciate the loyal and untiring efforts of the Field Force which have made these results possible. They also call attention to the fact that the Home Office service has been greatly improved in every department, and at a lower general expense than the previous year.

DELIVERIES 9, 11 a.m., 2, 4 p.m.

Men's Forum at Y. M. C. A. Passes Verdict on Inter-

esting Debate.

Our present day life is all wrong. vas the verdict brought out at the Men's Forum on Sunday afternoon at the Y. M. C. A. The topic for discussion, "Are the Principles lesus Applicable to Present Day ife?" was very ably directed by E. J. Jenkins, general secretary of the Y. M. C. A. It was the unanimous feeling of the meeting that the prin ciples of living set down by Jesus had already proved to be workable in every day life, and that unless mankind adopted the attitude of service and the principles of the golden rule and carried them out unselfishly, our civilization was doomed to fail Service to mankind is instinct tive, and selfishness and self-interes

are shallow motives which prompt men, to live for themselves alone. This meeting was the fourth ses sion of the "Forum" to be held in the Y. M. C. A., and it has met a much felt need in the community, drawing in men who are not definitely linked up with Sunday school or church Topics of vital interest to men are iscussed, and an opportunity is given

for the men to express their views on the subjects. Next Sunday there will be a spe cial session of the "Forum" in the Y. M. C. A., at 3:30 p.m., under the suspices of the Junior Businessmen's Class of the "Y." Members of this ive class will conduct the meeting by assisting with music from the class quartet and other features. The subject for discussion, "What stake has the public in the coal controversy?" will be led by Mr. Jenkins, and

### very interesting and helpful session is assured to all who attend.

and all times, and also slash the revenue of local laundries.

To achieve such fame, the office

It has been discovered that the mysterious, night-riding coal wagon that went east on King street last Tuesday night contained nothing more or less than a legitimate consignment of fuel, and not four cases of "something" which an onlooker o the little drama declared he saw cached in the vehicle. It has been said by some wise man of this generation that Paul Revere became famous because his horse ran away with him, but in the case in hand, the driver of the coal wagon

# SAGE TEA TURNS GRAY HAIR DARK

It's Grandmother's Recipe to Bring Back Color and Lustre to Hair.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application of two of Sage and Sulphur enhances its appearance a hundredfold.

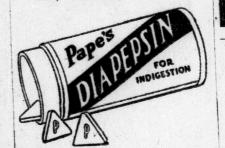

Don't bother to prepare the mixture: you can get this famous old recipe improved by the addition of other ingredients at a small cost, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural

Compound. This can always be pended upon to bring back the natural color and lustre of your hair.

Everybody uses "Wyeth's" Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.—Advt.

#### DON'T SPOIL YOUR HAIR BY WASHING IT

When you wash your hair, be care Jul what you use. Do not use pre-pared shampoos or anything else that contains too much free alkali, for this is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is Mulsified cocoanut oil shampoo, for this is pure and entirely greaseless. It is very cheap and beats anything else all to

# LORNA DOONE PROVES

Filming of Old English Romance Ranks With Magnificent Productions.

ROLES WELL TAKEN

Picturesque Beauty Is Combined With Brilliant Acting and Thrills.

The screen this year is strong for ostume plays. The majority of these super-efforts are a mere thread of plot, woven patently as a support who do the gurgling. for much display of gorgeous set-

A romance of almost three cen-turies could not be told effectively without the trappings of the time of King James, but in "Lorna Doone," now at the Allen, the rugged smock of the yeoman and the exquisite pomp of the royal palace are but incidental in the unfolding of the childish idyll of Devon and the strangely romantic adventures which followed it.

Admirably Directed "Lorna Doone" has been admirably Nothing of unnecessary detail is introduced and the story unfolds with the smoothness of a great olt of shining silk, rolling out unde the hand of the craftsman. The scenery, with its contrast between The the great ragged rocks which shut about the valley of the Doones and the smooth roundness of the Devon slopes where John herded his sheep, are perfect settings for the strange tale, through which is dominant the contrast between the strong and gentle in John, his strong hatred for the Doones and his gentle love for Lorna.

Told With Exquisite Art. The awakening and the ripening of the love of Lorna and John is truly romance, never old, yet never new. rold with the exquisite art of which the screen at times is capable, its warm beauty is caught and held, and yet the hatred of John Ridd for the wild, lawless Doones and the blazing fire of his ardor for Lorna form the basis of a powerfully dramatic pic-ture. In "Lorna Doone" are combined the picturesque beauty upon which rests the only hope of the average costume play, sufficient fine acting and thrilling action to redeem a score of less lovely films.

Touch of Magnificent.

And yet the picture is not without its touch of the magnificent. The brief and satisfying glimpse of the court of the king at the christening of the royal infant is as pretentious as anything seen in the much-heralded "When Knighthood Was in Flower"

John Bowers and Madge Bellamy are in the leading roles. The recent glimpse of John Bowers in "Quincy Adams Sawyer" affords a contrast with the sturdy, simple lover of Lorna which is an indication of the young star's cleverness. His role of John is a triumph of characteriza-tion. And Madge Bellamy in the role of Lorna completes the picture.

Practically all the minor roles are admirably done. As a final touch of perfection, "Lorna Doone" includes one of the most realistic rough-andtumble fights seen in years.

The battle to the death between
John and Carver Doone is a guaranteed thriller. And you'll more than
like the ending!

It was stated that the engineer in charge of the mail train got no warn ing whatever. When nearing a point directly under the new C. P. R. bridge west of the station he was amazed to see, a short distance ahead, a freight standing still. He was unable to bring his train to a standstill in time to avoid a collision. The caboose was broken up into matchwood, and the wheels were forced under the body of the car in front of it. One of the freight cars was so badly jammed that it was standing upon one end as the steel truck had been torn away. A wrecking train was called from Brockville to assist in clearing the wreckage, while the passengers were transferred to Kingston outer sta tion in automobiles.

Silk Manufacturers Declare World News Dominating Factor in Fashions.

### WHEN TURK FIGHTS

Madame Dons Turban; Egyptian Excavations Responsible For Cleopatra Revival.

By J. C. ROYLE. Copyright.

New York, Feb. 12.-The news of the world is the dominating factor in the establishment of styles for women. That was the conclusion announced today by representatives of some of the most important silk manufacturers in the United States for the silk show. It is becoming increasingly evident, they declared, that France cannot longer control with undisputed sway the settling of fashion. The United States is beginning to develop its own fashion, and

more noticeable in the future.

RED STAR NEWS CO. SIMPLE WAY TO GET RID OF BLACKHEADS

Valentines

There is one simple, safe, and sure way that never fails to get rid of blackheads, that is to dissolve them. To do this, get two ounces of peroxine powder from any drug store—sprinkle a little on a hot, wet cloth—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads, little blackheads, no matter where they are, simply dissolve and blackheads, little blackheads, no matter where they are, simply dissolve and disappear. Blackheads are simply a mixture of dust and dirt and secretions that form in the pores of the skin. The peroxine powder and the water dissolve the blackheads so they wash right out, leaving the pores free and clean and in their natural condition.—Advt.

Every American man shows in his actions that he believes himself to machinery that is at work manufacturing a nation: that at least is the impression they give me. The subconscious mind of the American man tells him imperiously at a certain store were all in bright that he must not tarry. He has no time for leisure. The nation must be built, and if his own little wheel stops it may check the advance of the whole machine, and so the American man is the hardest worker in the world. A pioneer and a slave to civilization in the making, he condemns

himself to a premature old age. Although I have seen a few American businessmen who look young at 65 or 70, they are exceptions. The average man here is old at 50 because he is always at work, even when he is at play. He carries his business with him to the golf links and is thinking out problems, meeting worries over his hurried lunch.

#### THE VALUE OF CHARCOAL

Few People Know How Useful it is in Preserving Health and Beauty. Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when properly prepared and taken into the human system for the same cleansing purpose. Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in gases and impurities always present in the stomach and intestines and carries the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, and after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels: it

Now, Peter doesn't like to be puzzled. He doesn't like being unable to understand things. So he once more sat down, this time to try to study out what could have given him that sudden, sharp pain. He thought fineness, then compressed in tablet. fineness, then compressed in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being sweetened to be smooth and that sudden, sharp pain. "My God," exclaimed one of the players, "where is that ball going?" The drive cleared the field, a race rack, and then the fence. Interest in its length was greater than in the game itself. For the rest of the game that was all we talked about. To be sure of its length a party

of newspapermen and players went out and measured the distance accurately. That ball had traveled 587 feet. Mind you, that is just thirteen feet short of 200 yards! Can you imagine such a drive? That hit by Ruth would have cleared the bleachers and the centerfield fence in the Polo Grounds. It

# TO ENTER RUHR AREA

German Cabinet Ministers Decide To Challenge French Authority.

FIGHT TO

Reichstag Members Claim the

Edict Unfair and Unjustifiable. Py FERDINAND JAHN. Special Cable to The Advertiser.

Berlin, Feb. 13.-Members of the abinet of Chancellor Cuno intend o go into the Ruhr in defiance of orders issued by the French, whenever the spirit moves them. This decision was reached by the

Walter C. Teagle, president, and Government could pass into the occupied area of Germany.

The French reached their decision after Chancellor Cuno visited the Ruhr to boost the morale of the inhabitants and to urge them to conlength the decree of Premier Poin-

habitants and to urge them to con-tinue their resistance of the Franco-Belgian occupation. The French order was declared by the cabinet to be an unjustifiable attack on German sovereignty unupported by any clauses of the Ver-

The new emergency bill now giving the government dictating powers in the Ruhr was referred to the national committee of the Reichstag. The legislation, it is anticipated, would be

the week.

Minister Becker urges its passage os the best proof to France and to the world that Germany is united, and intends to fight to the finish the

Ruhr occupation.

While the law is devoted mainly to restrictions on eating, drinking and dancing, a passage in the bill au-thorizes the government to take dethorizes the government to take de-sired measures in the Ruhr without consulting the Reichstag.

Deputy Solmann, Socialist leader, declared that his party was back of the government's Ruhr policy, but he warned the nationalists not to glorify themselves and laud Cuno for "ven-turing" into the Ruhr.
