Municipality of Ekfrid, County of Middlesex

Notice is hereby given that I have compiled with section 10 of the Voters' Lists Act and that I have posted up at my office at Melbourne on the 16th day of April, 1923, the list of all persons entitled to vote in the said Municipality for Members of Parliament and that such list remains there for inspection.  
And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.  
Dated at Ekfrid this 16th day of April, 1923.  
A. P. McDougald,  
Clerk of Ekfrid.

**Get the Most for Your Work and Money**  
I know you've a big investment tied up in your fields of corn and your beef and dairy cattle. I want to see you get full returns for this money.  
That's why I recommend one of my "Toronto" Wooden Silos. It's built to retain all the tasty food value of the corn—and cattle feed on this kind of silage will give more milk and make better beef.  
"Toronto" Silos are durably built of selected spruce, double tongued and grooved to exclude the air, treated with creosote to lengthen their life. The Silo is thus protected against dry or wet weather, freezing, thawing or any action of the silage. The special Hip Roof, too, gives 15% extra capacity.  
Get full value for your investment. Let's talk it over or get some of my free literature.

**New Superior Chevrolet**  
Compare Chevrolet with any other car manufactured. Compare it from every possible angle. Let the comparison be searching—exhaustive. What do you find?

**Price**—Chevrolet is the world's lowest-priced, fully-equipped, quality car.  
**Upkeep**—The cost of operating Chevrolet is lower than that of any other car built.  
**Performance**—Chevrolet is sturdily built to do anything and go anywhere possible with any car, and it will go where many others cannot. The valve-in-head motor is powerful, flexible and quick in the "pick-up."

**Appearance**—Chevrolet is designed with beautiful streamline bodies. The finish is of the highest grade and extremely durable. Chevrolet closed cars have Fisher bodies—the highest quality body procurable and one with quality written in every line.

**Value**—Chevrolet gives you the best transportation per dollar invested that you can buy. Economy in first price and the lowest operating cost provide a value that stands first in comparison with any other car.

Make a personal comparison of these Chevrolet features before you buy any car. It will give you a new measure by which to judge motor cars.

We have engaged Mr. Tommy Bissett to take charge of our Mechanical Department, with Mr. Chas. Willis as Assistant.

**We carry a full line of Chevrolet and Ford Parts**

**DISTRICT AND GENERAL**  
Hon. E. C. Drury, Premier of Ontario, announces the provincial elections will take place the last week in June.

There are 1,256 patients in the Ontario Hospital for the Insane at London and 400 returned soldiers at the Westminster Hospital.

The two-year-old child of William Smith, of Bloomfield, choked to death as a result of a piece of hickory nut meat lodging in its throat.

Onderberg township has for eight years not had one dollar arrears of taxes, nor is there a dollar of debenture indebtedness against the township.

Thomas Dredge, formerly manager of the Woodstock branch of the Merchants Bank, has been transferred as manager from a London branch of the bank to Alvinston.

These are evidently not days for launching newspapers. The Brockville Free Press, after 16 issues as a weekly, has ceased publication through lack of financial support.

The McCall Flax Company purpose rebuilding their mill at Alvinston which was recently destroyed by fire. Their manager, Arthur Pierce, is now securing acreage for flax and will require 200 acres.

Watford village council has passed a by-law taking advantage of the recent change in the Municipal Act, allowing municipalities to hold the annual election of councillors the first week in December.

John Patterson, aged 35 years, recently out from Ireland, was accidentally killed at Croton, near Thamesville, on Friday, when a cement wall under which was an excavation tumbled upon him.

Bothwell town council has passed a by-law giving a fixed assessment on a \$4,000 building to be erected by Chas. McDonald on the site of his hotel, the Brunswick House, which was destroyed by fire last November.

Five deaths are reported of former residents of Watford and residents of nearby places whose combined ages total 420 years, an average of 84 years, the youngest being 73 years and the oldest 104 years and 13 days.

Chas. Hacker, of Council Bluffs, Iowa, who sued a railroad for \$4,150, following a collision between his automobile truck and a locomotive, was ordered by the court to pay the railroad company \$1 for damage to the engine.

Duncan McDougall, B.A., of Winnipeg, a well-known Canadian boy, formerly principal of the Collegiate Institute at Brantford, was elected president of the Manitoba Education Association at its annual convention in Winnipeg.

The special house committee on agricultural conditions at Ottawa sent for one of the apples retained in the parliamentary cafeteria at five cents each, weighed it, and worked out the selling price on that basis at \$27 a barrel.

The time table for the annual departmental examinations has been issued. The entrance examination begins on June 27th, the lower school examination on June 12th, the upper school on June 14th and the middle school on June 18th.

Rural Ontario will be exempted from all provisions of the Adolescent School Act. The section requiring attendance of young people aged 16 to 18 years will not be brought into effect September 1st of this year as previously planned by the Drury Government.

Damage estimated at over \$100,000 was done when 16 cars of a west-bound Canadian National Railway freight train of route from London to Windsor, were derailed two miles and a half east of Chatham early on Thursday morning, and 11 were piled up in the ditch.

There is much discussion about the ten feet of land that the highway officials are taking off the highway on both sides of the road in Plympton township. The general opinion is that it is causing too much expense. Some of the owners have refused to give up the land, and trouble is expected.

The regulations under the Immigration Act passed on June 9, 1919, which placed a ban as to nationality upon Germans, Austrians, Bulgarians, Hungarians and Turks, have been cancelled, and in future these former enemy aliens will be permitted to Canada as settlers upon the same basis as the citizens of other countries.

In keeping with the rapid progress of the radio movement, it will soon be possible to "listen in" from rooms of a large hotel at Minneapolis, which has contracted for the connecting of each of several hundred rooms with radio plugs. The guest will not have to invest in a receiving set, as headphones may be rented for a small fee from the clerk's office.

Returning home Saturday afternoon, John Fletcher, well-known truck and delivery agent, of Windsor, surprised a burglar in his bedroom. A debate, "Resolved that autos do more good than harm," was ably upheld on the affirmative by Martin Abbott and Miss Florence McEachren, and on the negative by William Reynolds and Miss Lillian Henderson. The judges came to a decision in favor of the affirmative. The "Cheerio Live Wire," prepared and read by Marvin Watterworth, was enjoyed by all. Games were then taken part in. A very appetizing lunch was served by the hostess. The next meeting will be held at the home of Thos. Gardiner.

**ARRESTED FOR THEFT**  
Three youths, 17 to 19 years of age, were arrested by Town Constable John Henry at the North Glencoe C. P. R. station on Friday for alleged theft. They were brought before Police Magistrate Morrison, who remanded them to the county jail and will give them a hearing on Friday.

The accused are alleged to have entered the house of Mr. Thorne on the townline south of Glencoe during the owner's absence and taken his watch and several other articles. John Gilbert, who lives on the opposite side of the road, noticed the trio prowling about the place and suspecting that they were up to some mischief went to investigate. They made off and took a circuitous route to the C. P. R. station where they were nabbed by Constable Henry, who in the meantime had been notified. Numerous articles, including a gentleman's gold watch, a lady's wrist watch, jewelry, etc., were found in their possession, indicating that they had been doing a series of house robberies. Two of the youths claimed to have their homes in Preston and the other in Guelph, and that they were on their way to Windsor.

**SOME MORE VOTERS**  
Last week the Transcript completed the printing of part 3 of the Voters' Lists for the local municipalities, and they are now posted up for inspection.

By giving the franchise to the ladies, part 3 is now much larger than formerly. In Glencoe there are now 145 names in this section of the list. Ekfrid has 691, Newbury 63 and Mosa 436. This is certainly a force to be recognized in the coming elections.

**LIBRARY NOTES**  
The following are some extracts from the librarian's report for the past month—March 12-April 7:

In the last month there have been seven new country memberships. The proceeds from these membership tickets was \$7.25. There was also \$2.11 collected from fines. The total receipts for the month amounted to \$9.36.

The total circulation of books for the four weeks was 1,254, or an average of 313 a week.

All magazines ordered for the library are coming regularly, and the patronage of the reading-room is increasing.

Have you spent an evening with "The National Geographic" or "Good Housekeeping"? It would be a pleasant evening.

**METHODIST W.M.S.**  
The Easter meeting of the W.M.S. of the Methodist church was held on April 14th at the home of Mrs. Peter Moore. The following officers were elected for the coming year:—President, Mrs. B. F. Clarke; vice-president, Mrs. Hugh McCutcheon; secretary, Mrs. Alfred Squire; corresponding secretary, Mrs. Peter Moore; treasurer, Mrs. W. W. Stuart; superintendent of Christian stewardship, Mrs. C. G. York; superintendents of mite boxes Mrs. Joseph Gilbert and Mrs. Dan Treastin; strangers' secretaries, Mrs. John Hayter and Mrs. R. Hicks; pianist, Mrs. J. N. Currie; delegate to annual convention to be held at First Methodist church, London, May 21, 22 and 23, Mrs. Alfred Squire; alternative, Mrs. (Rev.) Whitehall.

**LEAVING FOR PORTO RICO**  
Murray Standing, who has been accountant at the Royal Bank here for upwards of a year, has accepted a similar position with the bank at their Porto Rico branch. On Saturday a number of his younger men friends gave him a farewell evening at his rooms and presented him with a splendid camera. Mr. Standing will spend a couple of weeks at his home in Aylmer before leaving for Porto Rico.

On Monday evening the Trail Rangers of the Presbyterian church, of which Mr. Standing was mentor, presented him with a tie pin at the home of Godfrey McMurchy.

Mr. Standing was held in the highest esteem by the citizens of the village and his departure will be regretted by all who knew him. His position here is to be filled by Ted. Arnold, of St. Thomas.

**CHEERIO NOTES**  
On Wednesday evening, April 4th, the Cheerio Club assembled at the home of D. G. McEachren at the Miss Agnes McEachren, president, occupied the chair. The meeting opened with the usual club song. Miss Mildred Clark rendered an instrumental solo, Miss Gladys Bechill and Marvin Watterworth gave a vocal duet and Marvin Watterworth played a few selections on the Hawaiian guitar. A debate, "Resolved that autos do more good than harm," was ably upheld on the affirmative by Martin Abbott and Miss Florence McEachren, and on the negative by William Reynolds and Miss Lillian Henderson. The judges came to a decision in favor of the affirmative. The "Cheerio Live Wire," prepared and read by Marvin Watterworth, was enjoyed by all. Games were then taken part in. A very appetizing lunch was served by the hostess. The next meeting will be held at the home of Thos. Gardiner.

**DEATH OF MRS. THOS. STRACHAN**  
Mrs. Strachan, widow of the late Thomas Strachan, died at her home about a mile east of Glencoe yesterday morning, after a illness of upwards of a year. The late Mrs. Strachan, formerly Miss McNabb, was born near Campbellton, Argyleshire, Scotland, in 1847. She came to Canada with her parents in 1854 and settled in Ekfrid township north of Glencoe, and later moved to a farm on the Longwoods Road. She married the late Thomas Strachan in 1871 and with him settled on his farm near Glencoe. Mr. Strachan died in 1901. She leaves a family of four sons—John, Andrew and Thomas, of Ekfrid, and Campbell, minister of the Presbyterian church at Burgoyne, Ont.

The funeral will be held from her late residence on Friday afternoon at 3:30 o'clock.

**CHRISTY GREAT AT CHECKERS**  
In a letter from Daniel H. McRae, who spent two years at Saranac Lake, N. Y., and while there was a daily companion of Christy Mathewson, and played many a game of checkers with "Big Six," Mr. McRae says: "I don't believe there is a person living who loves to play checkers any better than Christy Mathewson, and in the hundreds of games I have played with him I never saw him weary of play and at all times found him willing and anxious for a battle across the board. When on a fishing trip one day last summer to Franklin Falls, N. Y., in the Adirondack Mountains, we took along a checker board and after spending an hour fishing we set the lines, and then sitting down on the river bank and having rearranged the board on a large flat rock, making a suitable table, we spent the next few hours absorbed in a checker battle, that might be roaming the wilds of the Adirondack forests.

"If every ball player who has played against Christy Mathewson has had the experience of finding him possessed with the same tenacity and persistence of spirit to win on the diamond as I have found him in checker playing, he certainly has had to keep his eyes, ears and every other vital organ functioning to top notch to hold him in check; and I believe that had he started to learn checkers scientifically in youth he would be today in the checker world in the same class as he is in the baseball world—the greatest of them all. We put up with him in checkers around Saranac Lake, and Matty's presence at that resort proved a great drawing card for summer visitors. He is a clean-cut, citizen, and true steel in principle, and in the past two years I have spent roaming the wilds of the Adirondacks with him and battling "Across the Dams" I shall count as the most pleasant moments of my life."

**DEATH OF JOB YOUNG**  
The death occurred at his residence in Glencoe Tuesday evening after a short illness of pleuro-pneumonia of Job D. Young, section-foreman on the Grand Trunk.

Mr. Young was born in Michigan 54 years ago and came to Wyoming, Ont., at 14 years of age, where he lived until 14 years ago when he moved to Glencoe. He was employed by the Grand Trunk Railway for 29 years, and was a member of the C. O. C. A., I. B. M. W. E., and a Presbyterian in religion. His wife was formerly Miss Ida Fisher, of Oil Springs, who survives him with a family of eight—two boys, Ernest, of West Lorne, and Albert, at home, and six girls, Mrs. W. G. Squire, jr., of Ekfrid; Mrs. James Moore, of Mosa; Sadie and Janet, of Sarnia, and Margaret and Kathleen, at home.

The funeral will be held from the family residence on Friday afternoon at 2 o'clock.

**METCALFE COUNCIL**  
Meeting of Metcalfe council held April 9th. Members present—C. C. Henry, G. Bennett, C. Moyle and J. Blain. Minutes read, approved and signed.

Orders paid: D. W. Munro, \$60. S. S. No. 17; E. Moore, \$200. S. S. No. 14; D. Galbraith, \$160. S. S. No. 1; Roy Lewis, \$5, scraping road 1, div. 1; A. Lyons, \$4.50; ditching, sidewalk 2, div. 2; Geo. Moore, \$1, repairing culvert, road 3, div. 5; H. Klemm, \$2, repairing Sifton bridge, road 8, div. 4.

Moved by Moyle and Blain that the clerk advertise for tenders for Kettlewell-Laughton drains.  
Council adjourned to May 7th at 1 o'clock p.m.  
Harry Thompson, Clerk.

**COUNTER CHECK BOOKS**  
The Transcript is agent for the Appleford line—a better grade book and at the lowest price. Before you give your order to any travelling agent, phone 15. There is a tendency among some of the check book firms toward higher prices in the near future; however, we have been instructed to accept orders at present prices for delivery any time in the next three months. Look up your supply and if you will require more in the next six months, give your local agent the order.

Watch the ad. columns.

# Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

## SEEDING NEW MEADOWS.

One of the interesting and successful features of the Illustration Station work is the comparison between heavy and light seeding of timothy and clover. When making surveys of many farms in each county where Illustration Stations are located it was found that most farmers were not sowing sufficient seed to give the best results. To illustrate the advantage of heavier seeding, particularly with clover, on each station a small portion of the field is sown to the usual amount used in the neighborhood, which is from two to four pounds of clover and eight to ten pounds of timothy, and the larger portion of the field sown with a mixture of clover and timothy amounting to twenty pounds per acre. Every illustration showed the heavier seeding to give the heaviest crops of hay. The difference in growth is so noticeable that farmers passing can see the line between the two lots to a foot. On several stations the clovers on the light seeded portions were winter killed, while the heavy growth formed a protection to the roots and usually withstood the severest frosts of the spring frosts. Several operators report one-quarter to one-third more hay on the heavier seeding and have a much better chance for a second crop of hay or seed the same season.

When seeding sandy or clay loams sow eight pounds of common Red clover; two pounds of alsike and ten pounds of timothy per acre. In some cases it is advisable to sow two pounds of alsike in addition. On heavy clay that is liable to be damp or on light, acid sand sow eight pounds of alsike; two of Red clover and ten of timothy per acre. On black muck or peaty soil sow eight pounds of alsike; two pounds of Red clover; eight pounds of timothy and two pounds of Red Top per acre. For a nurse crop on peaty soil, always sow barley.

## SHEEP ON THE GENERAL FARM.

Sheep have one thing in common with poultry: a farmer is more likely to be successful with few than with many. In the beginning it is a very good plan to get only a few breeding ewes, and grow into the business as experience shows the way. One of the cheapest ways of starting a flock is to secure young western ewes and breed them to a purebred sire of the mutton breeds.

A purebred ram is relatively cheap, and without one a flock soon degenerates. The early lambs are the most profitable, but the production of such lambs requires considerable experience and better equipment. It would probably be better for the beginning farmer to breed his ewes for late lambing.

Sheep are the natural prey of parasites, which flourish chiefly during the hot, dry months of summer. For this reason sheep should not be allowed to drink water from old stagnant pools, but should at all times be supplied with pure, fresh water. Another summer precaution is to insure plenty of green feed. Pasture areas are likely to get scant in July and August, but the forehanded farmer will have a field of rape ready for them about that time. In the fall, rape which had been seeded in the corn field

at the time of last cultivation, will also supply pasturage at a time when the grasses are short. The winter care of the flock is the most critical, however. Proper shelter is highly essential, but expensive buildings are not needed. Sheep want to be dry under foot, and they do not stand drafts. They are amply protected against cold weather, provided the rain, snow, and wind is kept out of their sheds.

Proper winter feeding of sheep is quite an art, as too heavy, as well as too light feeding is harmful. It is essential that the flock go into winter quarters in a good, thrifty condition. Clover or alfalfa hay of good quality, together with an occasional addition of corn fodder, is all the ewes will need until about a month before lambing, if the lambs are to be dropped before the ewes get into pasture. No grain ration has given more satisfactory results in many experiments, than a mixture of whole oats and bran. Both are easily available on the average farm. Either half and half or two parts of oats to one of bran is satisfactory, and each ewe should receive about half a pound of this mixture a day. When other roughages are substituted for the alfalfa or clover, it is best to feed grain all winter long. Do not winter a flock by giving them the run of the straw stack.

To keep the digestive tract in good condition root crops or corn silage should be fed, in amounts not to exceed two to two and one-half pounds per day. This succulent feed, combined with plenty of exercise, is the best tonic in the world. In dry weather it is advisable to feed the roughage some distance from the barns or sheds, so that the ewes will be forced to walk around considerable.

The closest attention must be paid to the flock at lambing time. Many lambs and an occasional ewe can be saved if the shepherd remains on the job. Then, when the lambs are about a week or two old, some bright day the ram lambs should be castrated. A week or two later all the lambs should be docked.

Lambs should be weaned when they are about three or four months of age. Unless this is done they will nurse until late in the fall, and cause the ewes to go into winter quarters in poor flesh.

Sheep should be sheared as soon as the weather gets warm enough so that there will be no further danger of catching cold. About a week after shearing, the whole flock should be dipped, as the presence of lice and ticks keep the flock thin.

The following are excellent rules for the guidance of beginners in sheep husbandry:

1. Use good purebred rams.
2. Select young ewes. Yearlings, two-year-olds, or perhaps three-year-olds, are far more desirable for starting a flock than older ones.
3. Discard broken-mouthed ewes and ewes with bad udders.
4. Choose ewes having good size, desirable forms, and dense fleeces.
5. Feed the lambs especially well throughout the first year because a sheep makes his greatest growth during this period.
6. Give the flock good care throughout the entire year.

## Why Farm Gardens Fail

BY F. F. ROCKWELL.

I used to wonder why so many good farmers who have well-kept farms never have gardens that amount to a row of pinks. Some of these fellows I have in mind always plant food-sized vegetable gardens, but they don't get enough out of them to keep a pet rabbit from starving. Others don't know anything about gardening, and are too timid to give it a trial, or perhaps they aren't interested. Another sort of chap is the one who has tried having a farm vegetable garden, made a fiver of it, and then quit in disgust and has never tried again. This latter class is much larger than you might suppose.

Probably some of these fellows never figured out their garden problem from the money standpoint. To grow your own vegetables pays. It pays in dollars and cents which will show on the right side of your ledger at the end of the year just as surely as though you had received it for corn or hogs. The Department of Agriculture has made thousands of careful investigations in all parts of the country which have revealed that farm incomes depend to a very large extent on what farmers produce for their own use. When you stop to think a minute, you can see why this should be so. All the articles of food you buy you pay for at retail prices. All the articles of food you sell you part with at wholesale prices. So it only takes ordinary common sense to figure out that all the articles of food you can grow, which will cut your buying just that much, will pay just as well and just as really as though you got retail prices for them. But the cash return is not the only advantage there is in growing all your vegetables the farm family can use.

The health experts say that much of the ill health found on farms—despite the fact that the farmer gets plenty of exercise and spends most of his time in the open air—is really due to lack of green vegetables in the average farm diet. Here again it seems to me that ordinary horse sense should have told us this long before the food experts found it out for us.

REASONS FOR FAILURE. Sometimes the reason for garden failures is too little knowledge; but far more often it is the result of attempting too elaborate a garden, and as a result giving it up on the grounds that it was more bother than it was worth.

But no reason or excuse justifies any intelligent farmer from going ahead and having a successful garden. Any intelligent farmer can succeed the first season if he will give half the thought and study to it that he gives to his crops or animals. It would be foolish to plant a garden on one farm that would produce just the thing for the farm next door; and so, if you are going to have a garden, the very first step is to determine what type of garden will best fit the actual conditions which you have to face.

In trying to determine this, the first factor to consider is how much hand-work can be put into your garden. Another thing to be given careful consideration is whether or not there is any local market for surplus vegetables. The farm garden may pay a very handsome cash profit in addition to supplying the home table. In recent years the roadside automobile stands have made it possible to market many

## A Barnyard Idyll

April sun is shining, south winds blowing soft. Pigeons a-billing and cooing, up in the old barn loft. Lambs playing tag round the feed racks, life is a merry joke. Meadow lark's song from the meadow, down by the old lone oak.

Hens all a-cackling and singing, pigs by the straw-stack's sides. Taking a morning sun-bath, warm on their fat black hides; Indovers, the stanchions cackle, drowsy and fast asleep. Dreaming of soft green grasses, and brooklets cool and deep.

Cat on the window all drowsing, keeping a wary eye On the swallows a-sweeping by her, screaming their battle cry. Calf looking out of the doorway, with foolish baby eyes, Wondering just what life is, doomed to a sad surprise.

Colts a-running and kicking, outside the barnyard wall. Free from halter and blanket and prisioning gloomy stall; Spon flock and herd will be drifting to pastures green and lush. For winter's snows are vanished, and spring is in the flush.

—Raymond C. Rodger.

Nova Scotia's Prettiest Girl.

The Bluenose province recently set about to select from its young womanhood its prettiest specimen. The choice fell upon Miss Lillian Corbin, of Weymouth, in the Land of Evangeline. The Halifax Herald is arranging to have her portrait painted and forwarded to the Prince of Wales.

kind of surplus vegetables profitably, because the time does not have to be taken to make a long trip to town, and of course much higher prices will be obtained than could be had from the local retail merchants.

To repeat, the garden should be laid out in such a way that most of the cultivating can be done with a horse. For this purpose the "hoe harrow," or harrow-tooth cultivator, is very convenient. With it you can do finer work, closer to the plants, than with the ordinary horse cultivator. This implement is good not only for garden use, but equally as valuable for early cultivation of potatoes and other field crops.

## PLANT FEW VARIETIES.

Another great danger to avoid in the planning of the practical farm garden is that of planting too many varieties. It is always a great temptation, when you are making out your seed order, to try this, that, and the other thing which is lauded to the skies. Don't do it. You may be tempted to get a lot of early, medium early, mid-season, main crop, and late varieties of each of a number of vegetables. But they all result in multiplying your work unnecessarily; and then, especially if you happen to have hot dry weather, you will find them all maturing at once.

For the practical farm garden I would say not over two varieties of bush beans, a green and perhaps a yellow; one of beets; an early and a late cabbage; one kind of chard; an early and a late sweet corn; one variety of cucumber; kohlrabi, which is very easy to grow and develops early in the spring; one loose-head and one butter-head lettuce; two or three kinds of muskmelon, if you have plenty of room; one kind of early white onion for summer use, and one yellow for fall and winter; a little parsley; plenty of parsnips for an early spring sowing, and again in June for winter; plenty of peas, not over two or three varieties, dwarf or bush, according to how easily brush may be obtained to support the latter; pepper plants; a few radishes (usually altogether too many are planted); plenty of rutabaga for fall and winter use; plenty of spinach, which may be easily canned for winter; both summer and winter squash; tomatoes, early, and a main crop variety; turnips, extra early for spring, and a good winter variety for planting in July or early August; and maybe one or two kinds of water-melons.

In getting most of these things, order enough seed for two or three plantings. This, of course, does not apply to things like squash, muskmelon, onions, pumpkins, and water-melon; but of most of the others, two or more plantings should be made in order to give a continuous supply throughout the summer, and a large extra late planting of all the things which can be easily kept for winter.

## Spruceleigh BABY CHICKS—HATCHING EGGS

Every egg incubated and sent shipped will be from specially selected birds representing our very best stock in every particular. We are using the White Leghorns and Golden Bantams on our own farm and recommend them to our customers as the best and safest brooder and market. We have made arrangements so that we can supply all sizes at very reasonable prices. Our incubator stock is from the celebrated "Wright" strain, this is known to be the best breeders of B.C. White Leghorns in America. For size, strength, size and laying qualities they are unsurpassed. We expect to raise between 2,500 and 4,000 chicks every year. We have no facilities for handling baby chicks would do well to get our prices on pullets. Send your orders to Spruceleigh Poultry Farm, telephone 117-117.

BRANTFORD POULTRY LIMITED, BOX 24-25, BRANTFORD, CANADA

such as beets, carrots, cabbage, parsnips, rutabagas, and turnips. If you will follow this plan it will save you money in buying seed and much work in planting. Don't be tempted to try too many novelties. Stick rather to the standard varieties which have made good. If you do not know which the standard varieties are, you can easily get a pretty good idea by comparing the descriptions in three or four different catalogues. Those which you find recommended in all you can usually depend on.

## PLAN YOUR GARDEN.

And one last, but by no means least, thing to do in getting ready for a worthwhile but thoroughly practical farm garden is to plan your garden in advance.

This is the hardest thing of all to get the average man to do. He will buy a lot of seed without having calculated, in even the roughest kind of way, how much of each thing he needs or should grow, and when planting time comes stick them in. Two or three hours spent some evening, with a pencil and a piece of paper, making a rough plan of the garden, space it is to occupy, what is to be planted in it, how many rows of each thing will be wanted, etc., will save ten times that number of hours in useless planting, weeding, and cultivating all summer long.

Making a plan of the garden is really the first thing to do. I have purposely saved this until the last because I want you to be sure to remember it.

## Plan to Plant Trees.

One of the finest contributions to the community in which we live is the proper ornamentation of our premises with trees. A tree invariably impresses itself as the supreme tribute. The humblest cottage surrounded by stately trees gives out to the passing world the beneficent influence of a pure home life. Every member of the family should be interested and plan to take part in tree-planting this year.

The best time to fertilize fruit trees is just before the buds show pink.

Spring tonic for mother: a nice new hat.

Twenty-six letters are the foundation of a great language. Less than twenty-six fundamentals are necessary for big successes.

## Irrigated Farms in Southern Alberta

In the Famous Foxhall District Now River Irrigation Project An especially good location in Alberta for farming and dairying. Splendid opportunity for young men now living in districts where good land cannot be bought at reasonable prices. THIS IS NOT FIONORING, the first 10,000 acres are fully settled and the remainder is being rapidly developed. Settlement: maximum distance from railroads, schools and good roads. Telephone and schools. Easy payments, extending over 15 years. This is the Best Land Buy in Alberta. Write for further information to CANADA LAND AND SETTLEMENT COMPANY, LIMITED Medicine Hat, Alberta

## Back to Work

Kendall's Spavin Treatment will get that lame horse back on the job again. For more than forty years Kendall's Spavin Cure has been removing spavins, splints, ringbone, thoroughpins and all kinds of bony growths. Get all your druggists today, also the free book "Treatment of the Horse and his Diseases", or write direct to DR. E. J. KENDALL COMPANY, Eneburg Falls, Vt., U.S.A.

## Kendall's Spavin Treatment

R. C. White Leghorns have behind them over 40 years of direct breeding and improvement. Every egg incubated and sent shipped will be from specially selected birds representing our very best stock in every particular. ## Soap that soaks clothes clean

different from anything you have ever used before

Rinso is an entirely new kind of soap, every granule made of pure materials perfectly combined.

Just by soaking, in its big lasting suds, the most ground-in dirt is gently loosened and dissolved. Only the very dirtiest places need to be rubbed at all.

Rinso is made by the largest soap makers in the world.

## THE WILLIAMS & SONS CO. R.S. WILLIAMS LIMITED

DEPARTMENT W. 145 Yonge Street, Toronto, Ontario ESTABLISHED 1849

## TILE DRAINAGE IMPORTANT

The question of how close or how far apart lateral drains should be placed is largely a matter of the character and lay of the land. If the land is somewhat rolling, with fairly good drainage to the lower levels, with the subsoil somewhat porous, the lateral drain can follow the low ground with very good results. But if the surface is rather flat and of a texture which we commonly call "juggy," then it will be necessary to run laterals on to the higher ground and from three to four rods apart.

Not only is it of vast importance to have ground well drained in order to get on to it in early spring with the plow, and get the seeds in early; but there is a more important and far-reaching effect to be obtained by tile drainage. And that is the condition it puts the soil in for the reception of seed and the growth of plants. It is an old established fact that water and air will not occupy the same place at the same time. Many farmers have the idea that because they can not see water standing on the surface of their land that it is not wet enough to hurt it, but at the same time the water level may be two inches below the surface, thereby excluding all the air and becoming, as we say, "waterlogged," and remaining in that condition from the time the fall rains come until late in the spring. With the result that the ground becomes hard and clammy and the bacterial life, which is so necessary to plant growth, is almost obliterated as a consequence of being covered with water for so long a period. But on the other hand, if the water level can be lowered to a depth of about thirty inches the pores of the ground which were formerly filled with water become filled with air as the water recedes, thereby bringing more warmth to the ground and encouraging and developing bacterial life. And the soil when plowed, will break up loose and mellow, easy to prepare the seedbed, and will be in far better condition to receive seed and produce a more healthy plant growth than can possibly be obtained on undrained land.

Another fact stands out prominent as we lower the water level in our soil, and that is that our field plants will send their roots down deeper into the earth and thereby take up plant food that would not be available on undrained land because plant roots will not penetrate water-soaked ground to any extent, but will spread out near the surface of the soil, then when dry weather comes and the surface dries out they are in a poor condition to withstand the drought.

Tiled drainage will often pay for itself in one or two seasons.—E. G. Storm.

## Potatoes for Pigs.

In all cases potatoes fed to pigs should be cooked. If fed raw they are very hard to digest and of comparatively small feeding value. The water in which they are boiled should be poured off says the Dominion Department of Agriculture's bulletin "Swine Husbandry in Canada" as it is bitter tasting especially if the potatoes are unsound. The feeding value of potatoes consists almost wholly in the large amount of starch that they contain and are consequently better suited for the fattening hog. Potatoes are an extremely one-sided food, and should be supplemented with some food-stuff rich in muscle formers. For this purpose nothing is better than pea meal; if pea meal is too costly feed a mixture of peas and barley. The water in which they are boiled should be poured off says the Dominion Department of Agriculture's bulletin "Swine Husbandry in Canada" as it is bitter tasting especially if the potatoes are unsound. The feeding value of potatoes consists almost wholly in the large amount of starch that they contain and are consequently better suited for the fattening hog. **When the Sap Flows.**  
Of the many upward movements in the sap, few are so mysterious and so little comprehended as that of the sap, forcing its way through the tiny rootlets to the top of the tallest trees. Why does it rise with an known power compelling it against the well known natural powers of gravity, the resistance of friction and so on? A master mind must answer this question, but meanwhile we may offer a few suggestions.

"Capillary attraction" is the physical term most commonly employed to account for this natural phenomenon, but it does not answer several questions which might occur to an inquiring and intelligent mind. The original impulse undoubtedly comes from the rootlets of the trees through whose trunks and branches the sap ascends. The rootlets absorb from the earth moisture, much as blotting paper absorbs ink. The extremities of the branches give off their fluids by evaporation and the sap, relieved of this pressure, flows upward into them. With the sap in the branches are introduced small bubbles. Thus is made what the physicist knows as a "Jamin" effect of bubbles and water. When the air currents move the trees, the little tubes, bearing the water and air, are flattened, and their contents are driven out—upward and downward. As the tree regains its upward position, the tubes fill from below, and the upward flow of the sap is resumed.

For reasons which may occur to everybody, this may seem a lame explanation, though it appears to be a valid one, as far as it goes; and it lends an added significance to the incessant movement of the trees, which, perhaps, is thus serving a definite purpose.—Review of Reviews.

**Great Fortress at Mercy of Elements.**

The Rocky Island, Hellgöland, which as a fortress kept vigil over the western entrance to the Kiel Canal and played an important role as a submarine and flying base during the World War, is disintegrating rapidly under the constant explosions of dynamite, which for three years have been demolishing the great fortifications the Germans had founded in the cliffs.

German scientists assert that the great crag of red and white sandstone is being so badly damaged by the concussion that its complete annihilation by the rough waters and strong winds of the North Sea may come within a few years if protective measures are not taken. The island rises a hundred feet above the sea, but is less than a mile wide and scarcely a quarter of a mile long at its broadest part. Great sections of the cliffs already have slipped into the sea since the demolition of the fortifications began under the direction of the British and French.

The Germans built numerous sea forts and spent much money in protecting the island against the ravages of the sea when it was a fortress; but under the Versailles Treaty terms cannot again be fortified, the shattered island, which has a population of 3,000 fishermen, probably will be left to the mercy of the elements.

**A Quick-Thinking Preacher.**  
What a valuable gift is a ready wit! It so often makes the difference between humiliation and triumph. An interesting example of its usefulness in a tight place is given by a contributor to the Atlantic Monthly. She writes:

One day an Indian native preacher whom I delight to think of was trying to preach to a crowd of Mohammedan villagers. An old hostile man stepped up and said:

"If you think you are able to instruct us, tell me this: God made the world, didn't he? Well, what did He do with the pieces that were left? You know there must have been some scraps."

Without hesitating, the preacher stretched out his arm, pointing directly in front of him. The crowd turned to look.

"There are the pieces," he cried dramatically, indicating the horizon of the Himalayas, which shone in their snows dazzlingly after a winter rain.

The crowd looked and fell silent.

"That's so!" conceded the awe-struck man. And they heard him reverently to the end, no longer doubting his wisdom.

**Slow Moving, but He Budgeted at Last.**

A Youngstown, Ohio, man, says the Telegram of that city, recently applied for settlement of a claim for fire insurance and in response to the agent's queries explained that it was a door that was burned, and that the damages amounted as near as he could estimate to about five dollars.

"When did the fire happen?" asked the agent, and after a moment's hesitation the answer came:

"About thirty years ago."

"What? Thirty years ago, and you have waited all these years to report it?"

"Yes, sir," said the Youngstown man, "the women-folks at my house have never given me a moment's peace since that darn door was burned, and I just couldn't stand it any longer."

**In Memoriam.**  
First Bachelor—"Why weren't you at your own wedding this morning?"  
Second Bachelor—"I prefer to remember him as he was in life."

The birth-rate for England and Wales for the year 1922 was the lowest on record, save for the war years, 1915 to 1919.

**Surnames and Their Origin**

**ARUNDEL**  
Racial Origin—English.  
Source—A locality.

It is a matter of fact that the number of English family names in the classification of those which have been derived from the names of places is limited only by the number of place names which existed in England through the period of family name formation.

The name of virtually every city, town and hamlet at this period was likely to be taken not by one but by many individuals who moved away from it to some other place. Or rather, it was likely to have been conferred upon them by their new neighbors, for family names were more often a natural growth than the result of deliberate adoption, and a family's neighbors had more to say about the most

convenient designation than the members of the family itself.

**HARTWELL**  
Racial Origin—English.  
Source—A place name.

Hartwell is one of those family names which have been taken from place names. Family names, of course, were seldom formed by arbitrary adoption. They were the result of growth of descriptive surnames conferred upon an individual in an age when populations had become so large that there were not enough names to go around, and it was necessary to distinguish between two men of the same name. A most natural method was to refer to the place from which a man had come.

Hartwell was a village in Buckinghamshire. Its name meant "the well of the deer."

**CORNS**  
Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

**Dobson's New Life Remedy**

Is a positive Remedy for Acute, Chronic and Muscular Rheumatism in all its various forms.

COUNTLESS GRATEFUL TESTIMONIALS and Repeat Orders received during past 25 years.

DOBSON'S NEW LIFE REMEDY is not an experiment but the product of a quarter century of study and research. Pleasant to take. Does not upset the stomach. No harmful drugs.

**DO NOT BE PREJUDICED.** Dobson's New Life Remedy will give you a new lease on life by freeing you of pain. Thousands of enthusiastic customers have written us stating that after years of failure with other medicines, electric belts, etc., they were cured by Dobson's New Life Remedy.

One bottle for One Dollar. Six bottles for Five Dollars.

**Dobson's New Life Remedy Company**  
70 West Adelaide St., Toronto, Canada

She—"How long ought it to take you to teach me to skate?"  
He—"I should say about all winter, but I can teach a homely girl in half an hour."

**France's Sherlock Holmes.**  
The best-known detective in France at the present time is Edmond Bayle, a chemist whose laboratory is in the Palais de Justice in Paris.

He is chief of the technical bureau of the Paris police department, and he has met with such success that more medalets criminals look upon him as a dabbler in magic.

Dr. Bayle does not work on the British Sherlock Holmes lines. He pays no attention to the personality or psychology of the criminal, but confines himself to material things.

His workshop is equipped in accordance with this, and the numerous pieces of apparatus are designed for special purposes, such as examining forged money, the detection of blood-stains, and, in fact, the analysis of anything and everything that is picked up by those on the trail of a criminal.

In his records are registered the names of over eight million persons who have ever been involved in crime of any sort, and full particulars of any one of them can be produced at a moment's notice.

This extraordinary man has a theory that there is no crime that cannot be detected, and that every criminal, however clever, leaves traces behind him.

**A GOOD MEDICINE FOR THE SPRINGTIME**

**Do Not Use Harsh Purgatives—A Tonic is All You Need.**  
Not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite flake, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as many do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood and build up the nervous system. Dr. Williams' Pink Pills do this speedily and surely. Every dose of this medicine helps to enrich the blood, which clears the skin, strengthens the appetite and makes tired, depressed men, women and children active and strong. Miss S. L. McClellan, Nairn, N.B., says:—"I have been the habit of taking Dr. Williams' Pink Pills in the spring and they keep me in the best of health. I think it is entirely due to the use of these pills that I always have such good health."

Sold by all medicine dealers or by mail at 50¢ box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Bread 2,500 Years Old.**  
It seems impossible that bread could survive for nearly 2,500 years, and yet that is the age of a loaf dug up not long ago.

The discovery was made by a French explorer in Syria, and he estimated that the loaf was baked in the year 500 B.C. In the shape of a bun, it was in excellent condition and was wrapped in a cloth in a tightly-sealed tomb.

Other ancient loaves have been found at Pompeii, in Italy. Unearthed in a well-preserved oven, they were slightly charred, but the baker's name was read quite easily.

Not so old as these, but still getting on in years, is a loaf which is preserved at Amboston, in Derbyshire. It is over 700 years old, and was originally given to the Soar family with a grant of land made to them by King John.

**MONEY ORDERS.**  
Send a Dominion Express Money Order. Five Dollars costs three cents.

**Economy.**  
Wife—"John, since you say we must economize, I have decided not to get Josephine a new hat this winter, but to let her have mine."

**Achievement.**

Two travelers halted on a mountain trail. Blocked by great pyramidal crags of snow. "Beyond this point," said one, "no man can go!" He who would climb those jutting towers must fall!

He would be flogged and frozen by the gale; Lightning would scorch him, polar winds would blow; And he would fall to icy caves below, Bleeding beneath the cliffs he could not scale!"

But while one wanderer thus invoked despair, The other dug his spikes deep in the soil. And inch on inch, by steady, straining toil, He mounted that precarious, rock-strewn stair. Heard the fellow wail, "You are not worth it!"

He stood, triumphant, on a starry peak! Stanton A. Coblenz.

**CHILDHOOD INDIGESTION**

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Population of Palestine.**

Palestine has a total population of 757,182, according to the figures of the census of three months ago. Ten per cent. of the people in Palestine are given as Christian, 11 per cent. as Jews and 79 per cent. as Mohammedans. The figures for Christians and Jews are regarded as about correct, but there was such strong opposition to the census on the part of the Mohammedans that their number probably is considerably under-estimated.

In two cities only is there a preponderant Jewish population, Jerusalem and Tiberias. In former, out of a total of 62,000, 34,000 are descended from Abraham and the balance are about equally divided between the followers of Jesus and the prophet of Mecca. It is interesting to note that Bethlehem is the only town in the land in which Christians predominate. Here there are 5,838 of this faith, 313 Mohammedans and two Jews. Nazareth has a population of 7,424 of which roughly two-thirds are Christian, one-third Moslem, and only 53 Jews. The principal seaport, Jaffa, has about 47,000 people, of whom there are 20,000 each of Jews and Mohammedans, and about 7,000 Christians. The other large centres of population are very largely Mohammedan.

The Palestine Weekly, a Zionist organ, claims that according to Roman figures the country has supported a population of 7,000,000, but when one considers that the area of Palestine is about equal to that of Vermont and that it has about an equal amount of arable land, one questions seriously whether, with the highest development possible for the country ever to support a greatly augmented population. Vermont, in 1920, counted 352,428 people within the state.

Britain can speak by telephone to France, Belgium, Switzerland, and Holland. In America the range of the long-distance phone is over 4,000 miles.

**Sloans**

**Stops Backaches at once—so comforting**

A tiring day on your feet. Stopping, lifting, running up and downstairs—does your back feel tied in painful knots? Apply Sloan's to those sore, tired muscles. That warm, penetrating glow brings immediate comfort. Almost before you realize it the pain and stiffness are gone.

Wherever congestion causes pain—use Sloan's. Sloan's is protection against pain. All druggists carry it.

**Sloans' Liniment—kills pain!**

**Veteran Real Estate Broker of Toronto Tells of Remarkable Restoration by Tanlac.**

James Burns, 20 St. Albans Street, is still another man of prominence in Toronto to speak out in behalf of Tanlac. Mr. Burns is now seventy-three years of age, but says:

"No one takes me for seventy-three now, and I feel every bit as active as I did forty years ago.

"Before taking Tanlac my weight fell off from one hundred and sixty to one hundred and thirty pounds, and I had begun to feel the hand of 'Old Father Time' laying heavily on me. I seldom ate more than one meal a day and that caused me hours of misery. Nights I would pace the floor too nervous to sleep, and many days I felt too worn-out to dress and go out anywhere.

"I don't believe I could have ever pulled up to where I am now if it hadn't been for Tanlac. It has restored my health completely and built me up to one hundred and sixty-five pounds. Tanlac is the best investment I ever made."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

British boys will be sent across to Australia at the rate of 500 a month if a scheme of emigration, recently launched by the Australian Government proves successful.

Minard's Liniment used by Physicians.

The New Testament was divided into verses by Robert Stevens, a printer, in 1651.

**Enliven Your Eyes**

through the daily use of **MURINE** for your EYES

The alluring sparkle of youth quickly returns to eyes which have become dull and lifeless. Used safely for many years. Sold by druggists everywhere.

**For the Kidneys**

Kidney troubles are frequently caused by badly digested food which overtaxes these organs to eliminate their irritant acids. Help your stomach to properly digest the food by taking 15 to 30 drops of Extract of Roots, sold as Nether Seigel's Curative Syrup, and your kidney disorder will promptly disappear. Get the genuine, 50c. and \$1.00 bottles.

**HEADACHE?**

Bathe the forehead with Minard's and inhale freely. It gives quick relief for every ache.

**MINARD'S LINIMENT**

"KING OF PAIN"

**THEY TELL THEIR NEIGHBORS**

Women Tell Each Other How They Were Helped by Lydia E. Pinkham's Vegetable Compound

Woodbridge, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for female troubles. I would have headaches, backaches, pains between my shoulders and under my shoulder-blades and dragging down feelings on each side. I was sometimes unable to do my work and felt very badly. My mother-in-law told me about the Vegetable Compound and I got some right away. It has done me more good than any other medicine I ever took and I recommend it to my neighbors. You are quite welcome to use this letter as a testimonial if you think it will help some poor sufferer."—Mrs. EDGAR SIMMONS, R. R. 2, Woodbridge, Ont.

In nearly every neighborhood in every town and city in this country there are women who have been helped by Lydia E. Pinkham's Vegetable Compound in the treatment of ailments peculiar to their sex, and they take pleasure in passing the good word along to other women. Therefore, if you are troubled in this way, why not give Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

**ASPIRIN**

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds    Headache    Rheumatism  
Toothache    Neuralgia    Neuritis  
Earache    Lumbago    Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetyl-ester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to guard the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

### Canada's Standard Four

McLaughlin Buick "Master Four" Touring 23-35 Special

IN beauty of appearance, dependability and economy of operation, this "Master Four" Touring has established an entirely new standard for four-cylinder cars. Sturdy, dependable, always ready to go, it is perfectly suited to the needs of the average family.

The seats are deep and low, with plenty of leg-room in both compartments. The steering column is in exactly the right position for driving comfort and the gear shift lever is high enough to prevent bending and reaching. Some of the many unusual refinements on a car of this class are transmission lock, windshield adjustable from the inside, nickelled bumper, walnut dash, rear vision mirror, combination tail and stop light, drum type head and parking lamps, crown fenders and scuff plates.

Built in Canada by Canadians for service under Canadian highway and climatic conditions. No "Four" on the market is so well suited for rugged use at so low a cost, both initial and upkeep, as the McLaughlin-Buick Master Four edition of "Canada's Standard Car."

## Mrs. W. A. Currie

Main St. - Glencoe

Two things that aid in living a virtuous life are a pure heart and a bald head.

The way to improve a lettuce sandwich is to take out the lettuce and insert ham.

An optimist is a woman who has taken off the extra blankets and folded them away in the closet.

Lots of men who claim to have come from fine families appear to be a long way from home.

It takes a woman's intuition to grasp the great difference between \$2.99 and \$1.98.

Cause of Asthma. No one can say with certainty exactly what causes the stabilizing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

### The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application. Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc. A. E. Sutherland, Publisher.

Doesn't it seem queer that in a time of financial depression, when everybody complains about the scarcity of money, there still seems plenty to be gathered in by dubious financial promoters and not even dubious "wildcat" schemes. The lure of getting something for nothing seems to be more than human nature can resist.

A good many merchants throughout the province are announcing "the cash system." Chain stores and others have proven that it can be done, and moreover the cash stores are getting the cream of the trade and are able to undersell their competitors. It stands to reason that merchants cannot pay for goods within thirty days, as they have to do these times, and then give their customers unlimited credit without charging a longer price than would be necessary if they were buying and selling on the same basis.

#### DRURY ANSWERS MORRISON

The announcement of Hon. E. C. Drury at Milton on Saturday afternoon that he will not be bound by the desires of those who seek to control U.F.O. politics from Toronto was to be expected.

The Farmers Sun, the organ of J. J. Morrison, put the question straight to Mr. Drury and he answered in a way that leaves no doubt in the matter.

It means this: Mr. Drury seeks the support of all who believe as he believes; he will try to win; if returned he will co-operate with any other forces that will work with him to carry on the functions of a government. To go back to a somewhat overworked phrase, he will stay with his broadening-out policy. Such is Mr. Drury's position.

He cannot hope for the support of Mr. Morrison on this plan. He has not had the support of Mr. Morrison before, and he is not going to get it now. "J. J." wants a U.F.O. group at Toronto; he wants it not strong enough to have the responsibility of government thrust upon it, but just strong enough to secure its ends by throwing its voting power with the government as the price of the legislation it desires.

Mr. Drury's plan is more reasonable and more commendable than that of Mr. J. J. Morrison.—London Advertiser.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to gummy have thus made themselves immune to attack.

# The Ford Has Passed Them All

IN ten years the Ford Car has passed the street car, the horse and buggy and the locomotive as a means of transportation.

The Ford has given the public transportation which combines all the advantages which other methods offer with none of their disadvantages.

It is giving the railroads real competition in fast cross-country transportation.

It has ousted the street car in ready convenience and low mileage costs.

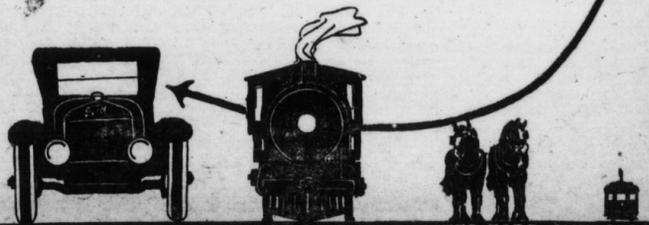

It has pushed the horse and buggy completely into the discard in low-first cost and low maintenance costs.

The number of people who buy Ford cars will set the price of Ford cars.

**How Bakery and Candy sales are increased**

by Long Distance

Some quotations from recent reports:

"We secure 80% of the bakery orders from general stores that we go after by Long Distance."

"Although we have travellers, fully 75% of our tobacco and confectionery orders come in over the telephone."

"We accept Long Distance charges on customers' orders," writes a large Montreal baker.

"Long Distance more satisfactory than writing or telephoning," writes a Toronto biscuit manufacturer.

"Use Long Distance extensively to keep in touch with our travellers," writes a large Ontario biscuit manufacturer.

May we tell you how Long Distance is being used to increase sales in your business?

THE BELL TELEPHONE CO OF CANADA.

Every Bell Telephone a Long Distance Station

Peter McArthur tells of meeting a farmer whose cure for everything was work, old-fashioned work. That is a course of treatment that would do Canada more good than Convium. —Peterborough Examiner.

Weekes and B. Grant and Messrs. McAlpine and Paton. The McAlpine-Sutherland orchestra added great inspiration to the singing of the hymns. The next meeting will be in charge of the social committee.

The regular monthly meeting of the Ross Young Women's Auxiliary was held in the lecture room of the Presbyterian church on Tuesday evening, when the Pollyanna Mission Circle of the Methodist church presented an interesting and instructive missionary program. Mrs. Forke, president, presided. At the close of the meeting a social hour was spent in games, and refreshments were served.

It is stated that the Canadian National Railways will improve their passenger service between Montreal and Chicago by putting an entire steel vestibule fast train in commission early in June. The route of the new train will be via Detroit and it will be one of the fastest trains on the continent. The distance from Montreal to Chicago via Detroit is 890 miles, or 52 miles farther than by the old Port Huron route.

The Transcript is in receipt of a copy of the Ontario Motor League 1923 road map. Thoroughly revised this map shows an accurate red outline line the Provincial Highway System of Ontario and the best roads in Western Quebec New York State and Eastern Michigan, and gives the location of all the cities and principal towns and villages, lakes, rivers and summer resorts in this area of over 200,000 square miles. Price 50c.

Thoughtlessly in many cases, differently in others, many people who have chickens allow them to run at large at this season of the year, because they have no flowers like tulips, narcissi, crocuses, hyacinths, peonies, etc., coming through the ground for the hens to scratch out or break off. Reverse your position and have the flowers, and have a visit from your neighbor's chickens for an hour or two—can you imagine your feelings? Also the other fellow's! It's time to close in your chickens. "Do unto others, etc."

The death occurred at the family residence, lot 12, concession 2, Metcalfe, on Wednesday, April 4, of Thos. R. Stevenson, in his 64th year. He was born in London township, where he resided until 25 years ago, when he moved to Etobicoke, and thence to Metcalfe. Besides his widow he leaves four sons and five daughters: W. H. Stevenson, of Calgary, Sam, of Appin, Mrs. L. Brann, of Metcalfe; Mrs. Wm. Atchison, of Warwick; James, Clarence and Mrs. George Buttery, of Adelaide, and Misses Margaret and Blanche, at home.

**SPECIAL NOTICES**

27c trade and 25c cash for eggs, at Mayhew's.

Quantity of seed peas for sale.—James Metcalfe, Route 3, Glencoe.

The Battle Hill Farmers' Club will meet on Friday evening of this week.

**AUCTION SALES**

Consignment Sale—The Melbourne and District Farmers' Club will dispose of the following listed live stock by public auction at Melbourne on Saturday, April 28, at 1 o'clock: Horses—Gray gelding, 7 years old, 1,600 lbs.; general purpose mare 7 years old. Cattle—Durham cow 4 years old, due time of sale; 2 young Durham cows, in calf; Durham cow 7 years old, due May 15; 4 springers; 3 heifers 3 years old, in calf; 10 farrow cows; 8 steers 3 years old; 35 steers 2 years old; 5 heifers 2 years old, real fat; 10 yearling steers and heifers; 9 shoats, about 50 lbs. each. Terms—Six months' credit on furnishing joint notes. A discount of 6 per cent. per annum will be allowed for cash.—Donald McGugan, secretary; Ed. Galbraith, president; M. A. McAlpine, auctioneer.

**PERSONAL AND SOCIAL**

—Mrs. Charles, of London, is visiting her daughter, Mrs. (Dr.) McIntyre.

—D. H. McEae, Strathburn, visited W. W. Gordon, Port Huron, last week, who is quite ill.

—Mrs. D. G. Paton is spending the week with her parents, Mr. and Mrs. Smith, of St. Catharines.

—Mrs. W. E. Mertons and son Gordon, of Toronto, are visiting her nieces, Misses Sadie and Joan Coulthard.

—Miss Mary Hurley, of Glencoe, and Miss Archer, of Wardsville, returned home on Saturday after spending a few days at the home of their sister, Mrs. D. G. McPherson, Kilmartin.

—Mrs. John McCracken left for Winnipeg on Saturday evening, having received word that her mother, Mrs. Stirling, was seriously ill at the residence of her daughter, Mrs. Hugh S. Gunn, whom she was visiting.

**APPIN**

All the ladies are looking forward with great interest to the short course in domestic science that is going to be put on by Miss Gray, of the department at Toronto, under the auspices of the Women's Institute here. The course will be conducted in the town hall, Appin, every day for two weeks, commencing next Monday.

Nell Galbraith has returned from a visit to his brothers in Lansing and Montrose, Mich.

T. C. Boon spent the week-end at his home in Bothwell.

The second of a series of debates which are being held in connection with the Leagues of the Strathroy Methodist district took place here last Friday night. The subject for discussion was "Resolved that in the progress of the world the Church has played and will continue to play a more prominent part than the Schools." The affirmative side was taken by Miss Gertrude Lotan and Miss Minnie McDonald, of Appin, and the negative by Miss Burdon and Miss Adams, of Cairngorm. The judges were Rev. Mr. C. P. Appin; Mr. Yorke, of Glencoe, and Mr. Warrall, who decided in favor of the affirmative. The debate makes Appin victors of four Leagues. The question is: "Where do we go from here?"

**KILMARTIN**

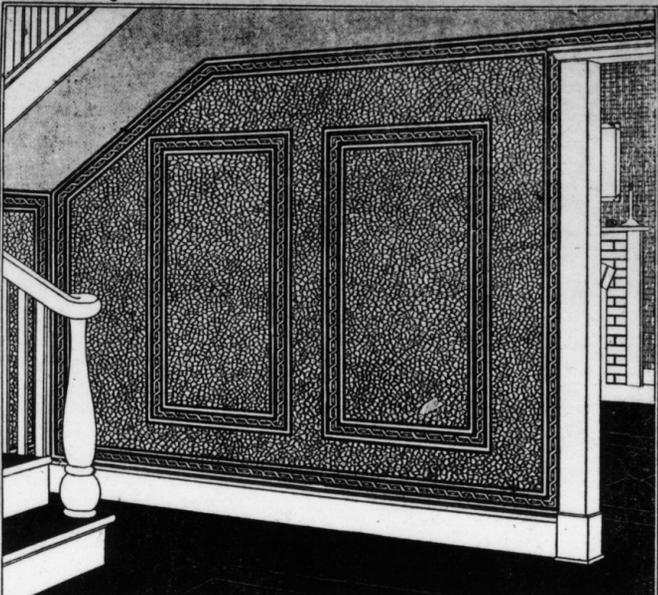

About eighty of the friends and neighbors of Mrs. D. McGregor and her son John gathered at their home on Thursday evening last to bid them goodbye, as they leave shortly to make their home in Detroit. D. N. Munroe read an address of farewell, while Mrs. Alex. Dewar presented Mrs. McGregor with a well-filled purse and Duncan McKellar made a similar presentation to John. It is about eighty years since the McGregors settled on the farm here, and this generation of the family will be greatly missed in the neighborhood.

Mrs. R. E. McAlpine is spending some time with friends in London.

Miss Gray, of Toronto, spent the week-end with her sister, Mrs. D. N. Munroe.

Burns' church, Mosa, was well represented at Presbytery in London on Tuesday in connection with the call from Bridgeton to Rev. Mr. Robertson. He has decided not to accept the call and will remain at Burns' church.

A clearing auction sale of farm stock and household effects was held by Mrs. J. D. McGregor on Friday last. Everything was sold and fairly good prices were realized, the sale amounting to about \$1,300.

**WALL PAPER**

Solves every decorating problem

NEUTRAL-TONED papers in rich color effects, lend themselves to panelling—a treatment now favored by the best authorities on home decoration.

We are showing a fine assortment of the BOXER line—in colorings that afford plenty of scope for your individual taste.

These Papers are 2½ inches wider than the old type of wall paper, affording three important advantages: Better Appearance, because of fewer seams; Economy, due to greater covering surface; and Designs More Beautiful than ever were possible in the narrower papers.

# The Gift Of The Gods

BY PEARL FOLEY.  
(Copyright.)

CHAPTER II.—(Cont'd.)  
"You like be friends with foreign-ers?" questioned Lun.  
Tu Hee did not answer at once. When she spoke her voice was hesitating. "They sort of fascinate me, Lun. They show their teeth so often—smile I mean, and look so friendly and beaming at you. Then again they appall me by their shamelessness. Just think of it, not a vestige of paint to cover their naked faces!"

"Ah see, is it not wonderful?" Tu Hee pointed in delight at the beauty they were in the midst of. The busy streets had been left behind, and they were now being borne swiftly up a narrow path on the hillside. Gurgling streams tumbled over moss and stone, and then ran on, disappearing in the cool mysterious shadows; flowers, the colors of which would have rivalled a rainbow, were everywhere; in golden embrace, like a mother guarding her children into youth and happiness. The path grew wider, and finally merged into a road which stretched broad and fairly smooth into the horizon on the other side.

The rickshaw came to a sudden halt. The women inside gave the incident not even a passing thought. Did it not occur whenever the carriers shifted the weight of the equipment to another shoulder? But when sufficient time for the process had elapsed, they and their vehicle still remained stationary. Tu Hee became impatient.

"Lazy boys, what keeps you?" she called, putting her head out of the enclosure.  
Cautious whisperings came to her: "What is it, Tu? Why the delay?"  
Tu Hee replied glancing at the other carriers and then at the man and then at the other. When the circuit was completed their gaze shifted up the road. Tu Hee's eyes took the same direction and she saw that a large automobile, a touring car, was blocking the way.

"Ah, a breakdown. Some foreigners have had trouble with their car. A little pleasure trip gave the engine voice again and her eyes glowed with the sparkle of adventure. Then, her glance returning to the carriers, she demanded a little impatiently, "Why stand there, foolish ones? Why not offer your assistance? It will be likely to be of some use."

Mingled outrage and bewilderment kept Tu Hee silent. What did it all mean? What would Uncle Weng say if she were forced to go with the foreign devils?  
"My uncle, the mandarin, will kill you."

It sounded childish and weak to her ears, and her excitement had caused her to use broken English. She saw the men exchange amused smiles, and her fury increased.  
But here Lun came on the scene. Scarcely she ignored the foreign devils. Scathingly she lashed the willow-backed carriers with hot words and ordered them to return down the hill. The servants sunk to their places, but an immediate halt was called by the officials. A revolver covered the three of them instantly, while a voice ordered Tu Hee to come on.

The servants hesitated, glancing apprehensively at their mistress, but the light in her eyes and the erect self-confidence of her bearing decided them. Even Lun gasped at her darling's sudden step into womanhood. Ignoring the threatening weapon, the carriers turned, leaving the rickshaw in the road, and tore down the hill with lightning speed.

The man who had had them covered pocketed the revolver, shrugged his shoulders, muttering: "Excellent bluff. We shall see, young lady, if you are a real Chinese mandarin's niece. If you are you're the first one I've seen with blue eyes."

Lun gulped with rage. Her hands fumbled against each other nervously. Fear also clutched at her heart, and she peered searchingly and with consternation into the man's face. Had the spirit of evil fallen on them after all these happy years?

The hood of the car was down and Tu Hee leaned far back. The thought of escape did not enter her head. Fatalism had been her constant companion through childhood and youth, and she accepted her present position as ordained. She was thankful that Lun on one side and her hated persecutor on the other prevented any one obtaining a glimpse of her. A dry sob settled in her throat. What had she done that the gods permitted such an outrage?

The carriers sped toward home at a rapid gait. Their lithe, slim bodies, made agile through daily practice, would have rivalled the Roman champions of amphitheatre days. The perspiration stood out like glass beads on their copper faces and throats. The muscles of which were taut. They worshipped their young mistress, and the calamity that had overtaken her filled them with dark, superstitious fear. Why had the foreign devils kidnapped the Gift of the Gods? Rumor

had whispered that the mandarin's niece had strange blood in her veins, but nevertheless everyone strongly asserted she was a daughter of China, a divine gift. But now the gods had permitted the foreign devils to take her. What did it mean?  
Breathless they sought Weng Toy's apartment, but were told by his boy that he was out, and would not return for an hour. A telephone search began, but he might have been on the other side of the world for all the success they had in locating him. They must sit with folded hands for an hour, and in that time what might not happen to their young mistress?

As the news spread through the house that the Gift of the Gods had been seized by foreigners, consternation ran tumultuous and mountains high. When an hour had passed and still the mandarin did not return, the other servants took the initiative and organized a rescue party. Weng Toy's fervent back the Gift of the Gods. The last of the purposeful column were leaving the outer gates when Weng Toy's chair appeared in view. He surveyed the long line in amazement. What in the name of all the powers did it mean—his servants deserting his house en masse!

The boy accompanying him was sent after the eager marchers to the peremptory order to halt. Charged, the leaders knew their only course was to obey, and in explaining some many precious minutes. Simultaneously relief and eager hope appeared on some of the faces. Their master would be strong like thunder and lightning. Nothing could stop

the great Weng Toy. He would override the hated foreigners as only a Chinese noble could. So they watched him closely as the news was given to him.  
But Weng Toy did not rage. It was as if a cyclone had wrenched every ounce of energy from his body and mind. Horror and despair took hold of him. In dead tones he bade them disperse.

Slowly and reluctantly they turned back through the gates, and for the first time Weng Toy was surrounded by sullen, unwilling servants.  
After ordering the car to be brought around he shut himself in his apartment. Nervously he paced back and forth. His brain refused to function rationally. Fear, hatred, clutched and froze his heart—not for himself, no. Weng Toy was no coward, but fear for the girl he worshipped as his own child. It caused his face to blanch and his shoulders to droop like an old man's. He dared not answer the question even mentally that nagged his brain. His nervous pacing halted in front of a tapestry, a dainty, water color affair, that Tu Hee had contrived herself. The colorings were delicate, all pinks, gold, and mauves, but the subject was sinister, grim, with the reality of the East. The central figure was that of a young girl turning away from the ancient rites of the old world to the new, the western world, glimmering on the horizon. A great longing and despair shone from her eyes, but a chain of gold, almost invisible, encircled one ankle, pulling her on. The climax of the pictured story was a phial of opium half way to her lips.  
(To be continued.)

sense of food combinations, and are very good judges of the fitness of the dish.

## MOTHERS.

Mother's are the queerest things! "Member when John went away, All but mother cried and cried. When they said good-bye that day, She just talked and seemed to be Not the slightest bit upset— Was the only one who smiled, Others' eyes were streaming wet. But when John came back again On a furlough, safe and sound, With a medal for his deeds, And without a single wound, While the rest of us hurrahed, Laughed and joked and danced about, Mother kissed him—then she cried, Cried and cried like all git out!"  
—Edwin L. Sabin.

The price of radium has dropped from \$120,000 per gram to \$70,000 per gram. Large deposits of radium ore have been discovered in Luivishi and Kolsolo, Africa. The State of New York and the City of Philadelphia each own two grams of radium, bought for the use of their citizens.

## Pride in Your Day's Work

Pride in our day's work gives us a feeling of satisfaction which nothing else can give. To feel when you retire at night that you have made a superb success of your day's labor, that you have completed a good piece of work, the best that you are capable of doing, a piece of work to which you are proud to put your name, and of which you can say, "There, I am satisfied. I will stand for that; I have stamped my character upon it, my manhood," will give to your night's rest greater repose and will cause you to arise in the morning with renewed enthusiasm to meet that day's demands.—O. S. Marden.

### A Piece of Piping.

Imprisoned for six hours in a chamber where the temperature is twenty two degrees below freezing is no fun, especially if you are dressed for warm weather. That was the trying experience of Mr. E. J. Smith, a meat inspector of Capetown, South Africa. Writing in the Wide World Magazine, he tells how he and a companion happened to be shut into the chamber.

It was Saturday afternoon, he says, and he had stayed inside longer than usual. When my companion, Jonas, who was a negro, tried to get out he discovered that we were locked in! The first thought to flash through my mind was, "How can it have happened?" Then I knocked on the heavy door with a small pair of pliers that I was using, but I knew that it would be impossible for anyone outside to hear the sound unless he were close to the door. The best thing to do apparently was to find some means of getting out by our own efforts; to wait idly for rescue would only hasten our death. But escape appeared remote, for the door was approximately nine inches thick, and the insulation was perhaps seven inches thick; moreover, on the outside of the door were three large hinges with bars that extended well across it. Fortunately we found a piece of iron piping an inch and a half in diameter and two and a half feet long, and with that tool we attacked the door. To splinter the wood on the inside required almost two hours; then we reached the packing. Tolling away together, we persevered until we could see the outer planking, and eventually we made a hole in it. Renewing our efforts, we enlarged the hole so that Jonas could get through to the outer passage. As I am much bigger than Jonas, the gap had to be considerably widened before I could squeeze through.

I was extremely glad to find myself outside that deadly chamber, for both of us were almost exhausted, and a little while longer in the awful cold would have been fatal. As it was, I could breathe only with difficulty; my lungs pained me at every breath.

In the passage the temperature was somewhat higher, though it still was below freezing. We were not yet out of difficulty. The chamber that we had escaped from was underground, and with several others led out of the passage that we were in; and the passage itself was blocked by a door like that which we had just come through. After walking up and down to warm ourselves we attacked the second door.

We took turns in trying to break down the woodwork, but soon decided that there was little hope of getting through it. While Jonas was banging away I saw him suddenly stop and listen. Then he said there was some one on the opposite side. I heard nothing and finally concluded that he was mistaken.

"Bose, here's some one," he said again presently, and then the door opened.

It was one of the engineers. He told us that he had been taking thermometer readings in the next passage and, thinking that he heard tapping, decided to investigate.

Upstairs I saw lights in the offices; luckily the force were working late that night. One of the clerks stared at me as if I were a ghost. And no wonder after six hours in a freezing chamber! Poor Jonas! All the pity he got was to be told that he had become a white man.

The manager was much concerned at our narrow escape. It seems that the colored man on duty had locked all the doors of the chamber and had not troubled to see whether anyone was inside.

I did not sleep well for months afterwards and had to be propped up in bed at night while I gasped for breath. The doctor said that the blood in the capillaries of my lungs had frozen. Jonas felt no ill effects. But if we had not found that piece of piping, we should undoubtedly have frozen to death.

The Banff National park in Alberta is the oldest, second largest, and best known of the Canadian National parks. The first reservation was made in 1885 following the discovery by railway engineers of the valuable Hot Springs at Banff.

According to a list of the world's forty-seven air transport services issued by the Air Ministry, France controls nineteen, Germany eleven, and Great Britain only six. French air routes have a total mileage of 6,420 while the mileage of British air lines in Europe is 1,110. In addition there are the 600 miles of the fortnightly R.A.F. service from Cairo to Bagdad and two lines in Australia.

## Woman's Interests

### HELPFUL HOUSECLEANING HINTS.

Housecleaning-time! Speak those two words to husband and see how quickly he has some pressing duty to do out by the barn. When the general cleaning begins, the regularity and routine of the house is so very much disturbed that it is a task for each member of the family to keep calm and composed in the midst of the disorder. But there is a great feeling of satisfaction to all when we sit down of an evening, knowing that the house is clean from cellar to garret.

Nothing is better than gasoline to clean badly spotted hardwood floors. Wet a piece of soft cloth with gasoline and rub the surface of the floor vigorously, changing the cloth as soon as it becomes much soiled.

To remove wall paper use a heaping tablespoon of saltpeter to one gallon of hot water and apply to the paper with a brush. The water should be kept hot and applied several times. The paper will loosen and can easily be pulled from the wall.

When you are ready to clean floors take a piece of board large enough to hold pail and bore holes near the corners and insert casters, set your pail on this and it will save a lot of lifting.

To clean gilt frames apply the white of an egg with a soft brush. When dry rub gently with a soft cloth.

A little turpentine poured into corners of wardrobes, trunks and chiffoniers will keep moths away.

Try using a solution of alum on your rugs and carpets. You will be surprised how it will brighten them up.

To remove marks made by scratching matches on a painted surface rub with a cut lemon.

To clean rugs or carpets beat on a set of bed springs or sprinkle a spot of grass or large rug, then turn rug upside down and beat. Move to another dampened spot and beat on the right side.

To remove ink spots from varnished surface use equal parts of vinegar and linseed oil, well mixed, and apply with soft cloth.

Try this good furniture polish: Two parts paraffin oil, one part gasoline, mix well and add a tablespoon of turpentine to each quart of liquid.

To dust wicker furniture and iron-work, dip old shaving brush in oil. It reaches in places difficult to reach with a cloth.

To repair a chair seat when cane gives out, cut a piece of inlaid linoleum two inches larger than opening in chair, paint a leather brown on top and edges, let dry for two days, put on with upholstering tacks.

To size rugs: Take one gallon hot water and one quart of powdered dry glue; keep on stove until glue is dissolved. Stretch the rug or carpet and tack wrong side up on the floor. With a whitewash brush go over it with the hot solution, being careful to wet it evenly, especially the edges.

Paper should be put under the edges of the rug to protect the floor. Leave rug tacked until dry.

An old ingrain or Brussels carpet can be made new by a few packages of dye. Dissolve the dye in a gallon of hot water to one package, and while hot put on the carpet with a brush.

ought else to sully the napkin with the grease of the knife.  
Table manners have ever been the cachet of one's social position, and dainty eating the sign of gentle rearing. A noted French diplomat remarked, after dining with some foreigners, in London, "They behave in a strange and indecorous manner, and their table manners are most distasteful to refined people."  
Sixty years ago in France the use of the knife at dinner was taboo, and the guest was expected to divide the food with a fork. Long habit has made this nation very clever with the uses of the fork and other dainty table appointments.

The wise mother to-day will insist on correct deportment at the table. It is also wise to allow the family to invite special friends to dinner, without formal notice to the housewife, allowing them to take pot luck as it is called. This not only prevents the housewife from becoming careless and getting into a rut, but it is also well to keep the family on the qui vive.

The happy busy housewife seldom has time for nerves and spells of inertia, and is busy gathering about her the chums and friends of her family, as well as a few choice ones of her own, and takes pride and real pleasure in planning a dinner party with perhaps music or cards, a supper dance, or just an old-time gathering of a few friends for an evening. When there are lads and lassies in the family, train them to helping, and even invite them to lending a lending hand, for you know men have a keen

## Free—A Short Story of Absorbing Interest

HAVE you read "A Financial Courtship"? It's the fascinating romance of two charming women and their legal adviser. The sisters through the death of their father, found themselves face to face with an acute financial problem without knowing anything about the ways of investments.

Through it all there runs a romantic interest, and one finds himself (or herself) actually "living the story" as they read.

It's the kind of story you and your family will enjoy reading on a winter's evening—particularly if you are ever faced with the problem of investing an inheritance.

If you would like a copy of "A Financial Courtship," send us your name and address and we will forward one to you free of charge. Please mention the name of this paper as a matter of record.

Before you invest, consult us.

## Try these Bakers' Raisin Pies—save baking at home

THERE are luscious raisin pies just around the corner, at your grocer's or a bake shop.

Baked to a turn—a flaky crust filled with tender, tempting raisins, the rich juice forming a delicious sauce.

Once try these pies that master bakers bake fresh daily in your city and you'll never take the trouble afterwards to make raisin pies at home. Get a pie now and let your men folks taste it. Made with tender, thin-skinned, meaty, seeded Sun-Maid Raisins.

Raisins furnish 1500 calories of energizing nutriment per pound in practically predigested form.

Also a fine content of food-iron—good food for the blood.

Use raisins frequently, therefore, which are both good and good for you, in puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes. Learn what you can do with luscious raisins.

## SUN-MAID RAISINS

The Supreme Pie Raisin

Sun-Maid Raisins are grown and packed in California by Sun-Maid Raisin Growers, a co-operative organization comprising 14,000 grower members.

## CUT THIS OUT AND SEND IT

Minard's Liniment for Coughs & Colds

## BRITISH CHANCELLOR ANNOUNCES REDUCTION IN HEAVY TAX BURDEN

All of Britain's Foreign Debts With Exception of That of United States Have Been Paid Off—Surplus of Over £36,000,000.

London, April 16.—Stanley Baldwin, Chancellor of the Exchequer, who, according to much political gossip stands an excellent chance for the Premiership if Mr. Bonar Law retires, delivered his first budget speech to-day to a crowded and intensely interested House, which included four former Chancellors of the Exchequer, H. H. Asquith, Austen Chamberlain, Mr. Lloyd George and Sir Robert S. Horne, with a crowd of distinguished personages in the galleries.

On the whole, it was a sanguine, almost optimistic diagnosis of the nation's financial and commercial health delivered in a vigorous concise style and eliciting congratulations from J. Ramsay MacDonald, leader of the Opposition, for its manner, but not entirely for its substance. The Chancellor was able to tell of steady improvement in trade and industry, and of hope for the future. He believed that the country still was experiencing a series of transition years, but had passed the peak of depression. At the same time he added a warning that its hopes might yet be frustrated by untoward events on the continent or at home.

In contrast with former times, when budget plans were kept a strict secret until the speech was delivered,

Mr. Baldwin's leading proposals had become public property. The removal of six pence off the income tax, reduction of the corporation tax one-half, and reduction of the beer tax of one penny per pint, come very near the forecasts, but the surplus is only £36,000,000, whereas a surplus of £50,000,000 had been estimated.

The estimates for the fiscal year 1923-24, while not likely to be called popular, the budget will probably be welcomed by the country as promising a progressive decrease in the high taxation.

Six pence comes off the income tax, which is reduced to four shillings six pence on the pound sterling; the corporation tax is cut in half, and the beer duty lowered so as to provide a reduction of a penny a pint in the retail price.

## ALBERTA COAL FOR ONTARIO CONSUMERS

Paying Tonnage for Canadian National Railways When Delivered for \$16 Per Ton.

A despatch from Ottawa says:—"You would need several adding machines to estimate the amount of anthracite in the hard coal areas of Alberta," Joseph Errington, discoverer of the Alberta fields, told the Commons Committee on Canada's Fuel Supply Thursday afternoon. The Hoppe field, he estimated, extended about 35 miles north and south and 30 miles east and west. Replying to E. J. Garland (New River), he agreed that the coal might run 100,000,000 tons, but it would be foolish, in his opinion, to attempt to estimate the amount.

Coal in the Alberta hard coal area was equal to any mined anywhere in the world. There was also a great deal of coal which might be used for coking. Transportation, however, was the great problem.

He estimated that coal from the anthracite areas could be placed in Toronto at about \$16 or \$17 a ton. There would be additional charges for re-tailing. The cost was superior to Pennsylvania anthracite now being delivered to Canadian ports.

Mining conditions in the Alberta field were superior to those in the Pennsylvania field, and the coal itself was clean and did not deteriorate. The public would not need further education in using Alberta coal. If the field was developed it would also provide a profitable tonnage for the Canadian National Railways.

## NICKEL MINES TO BE REOPENED IN NORTH

New Financing by British-American Company Good News for Sudbury.

Ottawa, April 16.—As a result of successful financial negotiations, which will provide \$1,500,000 new capital for the British American Nickel Company, the plants of this company, at Sudbury, Ont., and Deschambault, Que., near Ottawa, which have been closed for two years, will be opened immediately.

Although less than 100 are on the staff now, it will not be long before 1,000 will be employed. Several long-term contracts with large United States corporations, including the Bethlehem Steel Co., Central Steel Co., Donner Steel Co., and the Interstate Steel Co., have been made, according to Hon. E. N. Rhodes, President of the British American Nickel Company, and a market opened for nickel, copper, platinum and other precious metals.

Heads R.C.M.P. Commissioner Courlandt Starnes, the newly appointed Commissioner of the Royal Canadian Mounted Police.

Would Demilitarize Rhine. M. Louchet, the French Minister of Finance, who has been censured by Bonar Law and Lloyd George for a plan for demilitarizing the Rhine district and placing it under the control of the League of Nations.

## REQUEST CESSATION OF IRISH HOSTILITIES

Document Found on Arrested Man Not Yet Signed by Irregular Executive.

Dublin, April 15.—Eamonn de Valera, Dan Breen and P. J. Rutledge are still at large. Austin Stack, when captured by the Free State authorities, according to official information to-day, was trying to make his way through the Free State lines. He was well dressed but looked ill and haggard, and had a many days' growth of beard.

A document found on Stack requested the President of the republic to order an immediate cessation of hostilities. It was in Stack's own handwriting and ready for signature by all members of the Irregular Executive Committee.

Had the document been completed it would have put Eamonn de Valera in the position of having to call off hostilities, and the fact that Stack, when arrested, had not secured the signatures to the document may defer for the present the complete cessation of fighting. The end, however, is now believed, in Free State circles, to be only a question of time.

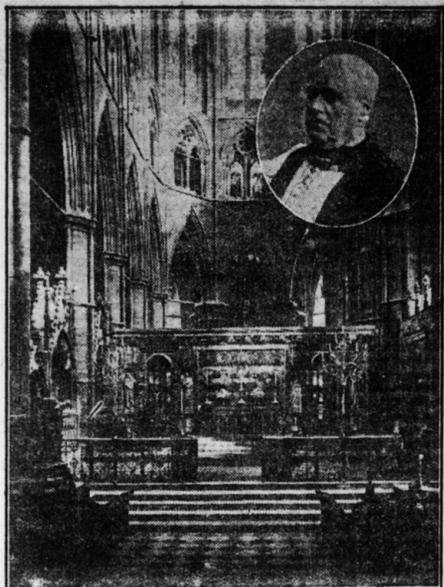

## Leaves 70 Grandchildren and 107 Great-grandchildren

Windsor, April 15.—Mrs. Adelaide Garret, 85 years old, and resident of Windsor for 58 years, died Sunday at the home of her son, Frank Garret, 315 Moy avenue. Her husband, Francis Garret, died four months ago. They had been married for 60 years. Both were natives of Quebec Province. Nine children survive. There are also 70 grandchildren, 107 great-grandchildren and one great-great-grandchild.

## French Seize Wine Valued at 100,000,000 Marks

Cologne, April 15.—More than 100,000,000 marks (\$235) worth of wine has been seized by the French at Düsseldorf because the Germans had not paid the wine tax, according to an announcement in German quarters.

"It's good to be vigilant, but wrong to be suspicious."

WHERE THE ROYAL WEDDING WILL BE CELEBRATED. The High Altar and Apse of Westminster Abbey where the marriage of Prince Albert, Duke of York, to Lady Elizabeth Bowes-Lyon, will be celebrated. It will be the third royal wedding of recent years to take place in the ancient abbey, the first being that of Princess Pat and the second that of Princess Mary to Viscount Lascelles. Inset is the Archbishop of Canterbury, who will officiate.

## Weekly Market Report

TORONTO.

Manitoba wheat—No. 1 Northern, \$1.32.  
Manitoba oats—Nominal.  
Manitoba barley—Nominal.  
Am. corn—No. 3 yellow, \$1. No. 2, 98 1/2¢.

All the above track, Bay ports.  
Barley—Maltling, 59 to 61c, according to freights outside.  
Buckwheat—No. 2, 76 to 78c.  
Rye—No. 2, 79 to 81c.  
Peas—No. 2, \$1.45 to \$1.50.  
Millfeed—Del., Montreal freights, bags included: Bran, per ton, \$32; shorts, per ton, \$34; middlings, \$35; good feed flour, \$2.15 to \$2.25.

Ontario wheat—No. 2 white, \$1.18 to \$1.20, according to freights outside.  
Ontario No. 2 white oats—49 to 51c.  
Ontario corn—Nominal.  
Ontario flour—Ninetyper cent pat, in jute bags, Montreal, prompt shipment, \$5.10 to \$5.20; Toronto basis, \$5.05 to \$5.15; bulk seaboard, \$4.95 to \$5.  
Manitoba flour—1st pats, in cotton sacks, \$7.10 per barrel; 2nd pats, \$6.60.

Hay—Extra No. 2, per ton, track, Toronto, \$14; mixed, \$11; clover, \$8.  
Straw—Car lots, per ton, track, Toronto, \$9.  
Cheese—New, large, 26c; twins, 24 1/2c; triplets, 22c; Stiltons, 23c Old, large, 31 to 32c; twins, 33 to 34c; Stiltons, 35c.

Butter—Finest creamery prints, 50 to 61c; ordinary creamery prints, 47 to 49c; dairy, 30 to 33c; cooking, 24c.  
Eggs—New laid, loose, 33 to 34c; new laid, in cartons, 37 to 38c.  
Live poultry—Chickens, milk-fed, over 5 lbs., 25c; do, 4 to 5 lbs., 25c; do, over 2 lbs., 24c; do, 4 to 5 lbs., 21 to 24c; do, 2 to 4 lbs., 18 to 21c; hens, over 5 lbs., 28c; do, 4 to 5 lbs., 26c; do, 3 to 4 lbs., 22c; roosters, 17c; ducklings, over 5 lbs., 30c; do, 4 to 5 lbs., 28c; turkeys, young, 10 lbs. and up, 30c.  
Dressed Poultry—Chickens, milk-fed, over 5 lbs., 35c; do, 4 to 5 lbs., 32c; do, over 2 lbs., 30c; do, 4 to 5 lbs., 28c; do, 2 to 4 lbs., 25c; hens, over 5 lbs., 30c; do, 4 to 5 lbs., 28c; do, 3 to 4 lbs., 24c; roosters, 24c; ducklings, over 5 lbs., 30c; do, 4 to 5 lbs., 28c; turkeys, young, 10 lbs. and up, 40c.  
Beans—Can., hand-picked, lb., 7c; primes, 6 1/2c.  
Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.  
Maple sugar, lb., 23 to 25c.  
Honey—60-lb. tins, 1 1/4 to 1 1/2 per lb.; 5-lb. tins, 12 1/2 to 13 1/2 per lb.  
Ontario comb honey, per dozen, \$3.75 to \$4.50.  
Potatoes, Ontario—No. 1, \$1.10 to \$1.15; No. 2, \$1 to \$1.10.  
Smoked meats—Hams, med., 25 to 27c; cooked hams, 35 to 40c; smoked rolls, 26 to 28c; cottage rolls, 32 to 35c; breakfast bacon, 30 to 33c; special brand breakfast bacon, 35 to 38c; backs, boneless, 34 to 40c.  
Cured meats—Long clear bacon, 50 to 70 lbs., \$18.50; 70 to 90 lbs., \$18; 90 lbs. and up, \$17; lightweight rolls, in barrels, \$38; heavyweight rolls, \$35.  
Lard—Pure tierces, 16 to 16 1/2c; tubs, 16 1/2 to 17c; pails, 17 to 17 1/2c; prints, 18 1/2c. Shortening tierces, 14 1/2 to 15 1/2c; tubs, 15 1/2 to 15 3/4c; pails, 15 1/2 to 16 1/2c; prints, 17 1/2 to 18 1/2c.  
Heavy steers, choice, \$7.50 to \$7.90; butcher steers, choice, \$6.75 to \$7.25; do, good, \$6 to \$6.50; do, med., \$5.25 to \$6; do, com., \$4.50 to \$5; butcher heifers, choice, \$6.75 to \$7.25; do, med., \$6 to \$6.50; do, com., \$4.50 to \$5; butcher cows, choice, \$4 to \$5; do, med., \$3 to \$4; canners and cutters, \$1.50 to \$2; feeding bulls, good, \$4 to \$5; do, com., \$3 to \$4; feeding steers, good, \$5.75 to \$6.25; do, fair, \$5.50 to \$6; stockers, good, \$5 to \$5.50; do, fair, \$4 to \$5; calves, choice, \$9 to \$11; do, med., \$7 to \$8; do, com., \$4 to \$5; milk cows, choice, \$70 to \$90; springers, choice, \$60 to \$100; lambs, \$14 to \$16; do, spring, \$15 to \$18; sheep, choice, \$8 to \$9; do, culls, \$4 to \$5; hogs, fed and watered, \$11 to \$11.25; do, f.o.b., \$10.25 to \$10.50; do, country points, \$10 to \$10.25.

MONTREAL.

Corn, Am. No. 2 yellow, \$1.01; Oats, Can. west, No. 2, 68 to 69c; do, No. 2, 63 to 64c; extra No. 1 feed, 61 1/2 to 62c; No. 2 local white, 60 1/2 to 61c. Flour—Man. spring wheat pats, 1st, \$7.30; do, 2nds, \$6.80; strong bakers', \$6.60; winter pats, choice, \$6 to \$6.25. Rolled oats—bag of 90 lbs., \$3.10 to \$3.20; bran—\$23. Shorts—\$30; middlings, \$35. Hay—No. 2, per ton, car lots, \$13 to \$14.  
Cheese, finest Easterns, 18 to 19c. Butter, choicest creamery, 34 1/2 to 35c. Eggs, selected, 26c. Potatoes, per bag, car lots, \$1.20 to \$1.25.  
Heavy dairy bulls in fair flesh, \$4; com. cows, \$3 to \$4; med. to fairly good calves, \$5 to \$5.50; good veals, \$6; com. thin calves, \$4 up; hogs, selects and good quality butchers, \$11.50 to \$11.75.

## Seeding Becoming General Around Edmonton

Edmonton, Alta., April 16.—Seeding began in the Edmonton district to-day. It is expected that it will be general this week.

If you are doing good work, don't worry; somebody will find it out.

## PREMIER DRURY ANNOUNCES MAY DISSOLUTION AND JUNE ELECTIONS

A despatch from Toronto says:—The fifteenth Legislature of Ontario is to be dissolved on or about May 4, and the Provincial general election will follow in the last week of June. This announcement was made by Premier Drury to the Legislature when the House met on Thursday afternoon. It followed a busy morning of conferences with the Ministers and a meeting of the Cabinet in Council. The sensational episode of the overnight sitting had left the atmosphere at Queen's Park tense with expectancy, and many rumors of "developments" were afloat.

It was evident from the moment when Ministers and members started to arrive at the Building that all Premier Drury to the Legislature when the House met on Thursday afternoon. It followed a busy morning of conferences with the Ministers and a meeting of the Cabinet in Council. The sensational episode of the overnight sitting had left the atmosphere at Queen's Park tense with expectancy, and many rumors of "developments" were afloat.

Guide Chief in Canada. Lady Olive Baden-Powell, wife of the founder of the Boy Scout and Girl Guide movements, who is in Canada with her husband, and is being greeted by the Guides in all parts of the country.

## GERMANS DESTROY RAILWAYS IN RUHR

Use High Explosives to Blow Steel Rockers from Under End of Buer Bridge.

A despatch from Buer, Germany, says:—The ire of the Germans is counteracting French progress in seizing coke in the Ruhr, by destroying waterways and railways through which coke might be moved into France.

A charge of high explosive blew the steel rockers from under one end of a railway bridge here Wednesday morning and shattered the concrete supports sufficiently to let the bridge down about two feet. It was only because part of the charge failed to explode that the concrete supports were not further destroyed and the bridge completely unseated.

French engineers were able to jack

people. Pre-election preparations got under way openly. Group conferences took place at various party headquarters. A full attendance of members and crowded, curious galleries greeted Mr. Speaker when he took the chair at the formal opening of the House.

The Premier did not leave any doubt as to the procedure upon which the Government had determined. Immediately following his announcement of pending dissolution he introduced in blank three electoral bill—redistribution, proportional representation and the single transferable vote system in single-member ridings. Those bills are to be first dealt with by a committee consisting of 11 Government members, 5 Liberals, 5 Conservatives and 1 Independent, with the Speaker as Chairman.

it up into line with the rails within a day and to replace the shattered concrete with timber supports.

Although such acts of sabotage are officially disavowed on the German side, there is unofficial exultation when they are announced, and it is becoming more and more obvious that there is an official sabotage organization plentifully supplied with high explosives and directed by a staff of German engineers in selecting strategic points for destruction.

## SILK SMUGGLERS MEET WITH SETBACK

Illicit Traffic Along Niagara Border Stopped by Canadian Officials.

A despatch from Bridgeburg says:—Collector of Customs and Excise Frank T. Pattison believes that the backbone of the silk-smuggling industry has now been broken. With additional preventive measures that have been taken, it is his belief and the belief of other officials that silk smuggling has been practically stamped out along the Niagara border—a far different condition from that which existed two years, or even a year ago at this time.

Officers stationed at this frontier port have been active and on the job 24 hours a day for some weeks in efforts to secure the upper hand of the smuggling combine.

Cigarettes are about the only problem left with which border Customs officials have to cope. This later traffic is likewise being cut down to a minimum although it is difficult entirely to stamp it out. The frontier port of Bridgeburg has come through, with honors, a difficult task in stopping the activities of the silk smugglers, and it is now predicted that the textile trade, struck several bad blows through successful coups by the rivermen who were handling the smuggling, will now revive considerably. It will be impossible totally to check silk smuggling, but at the same time it is believed it is now as closely confined as it is possible to keep it.

## Canada from Coast to Coast

St. John's, Nfld.—To date 42,000 seals have been killed by the Newfoundland sealing fleet, according to wireless reports received here. The seven vessels sealing on the banks reported their individual catches as: Thetis 8,500; Eagle 7,000; Ranger 6,000; Seal 6,500; Sagona 5,500; Teranova 4,500; Neptune 4,000.

Halifax, N.S.—Thirty boys between the ages of 14 and 18, have arrived in Halifax from Liverpool. These thirty boys, who will shortly be followed by 170 others, are going to work on farms in Nova Scotia under arrangements made by the Salvation Army; the other 170 will go to farms in the Maritime Provinces and other parts of Canada.

Fredericton, N.B.—A meeting of live stock men of the province was held here recently, when the matter of importing purebred sheep and horses for breeding purposes was discussed. It was also decided to form a sheep club in connection with the co-operative marketing of wool.

Montreal, Que.—Removal of the embargo against Canadian cattle has created a big demand for shipping space on the part of British buyers, according to reliable information from the Shipping Federation offices here. Last year there were only two or three cattle boats a week sailing from Montreal. With the latest stimulation of the trade, shipping officials look for an increase of at least 100 per cent in the number of steamers sailing from this port weekly.

Toronto, Ont.—According to the latest legal directory, this city harbors 597 law firms, as against 515 a year ago. The local army of individual barristers and solicitors is said to be 1,200 strong. It is estimated that there are 2,428 lawyers in Ontario, so that Toronto has about one-half of that distinguished contingent.

Winnipeg, Man.—There was an increase of 51 per cent in the immigration into Canada for February just passed, over the corresponding month of last year. The total immigration for the month was 9,290, as compared with 2,139 for February, 1922. From Britain there came 1,356 compared with 509 a year ago; from the United States 722, compared with 1,078 a year ago; and from "other countries" 1,212, as compared with 566 a year ago.

## FREE STATE TROOPS SEARCH FOR VALERA

Scouring Tipperary Mountains for Republican Leader and Adherents.

A despatch from Dublin says:—Six columns of Free State troops under General Prout are scouring the mountains in Tipperary for Eamonn de Valera, Dan Breen and other Republican adherents who escaped the National troops when Liam Lynch was fatally wounded and captured. This operation is the best organized effort yet made to capture de Valera.

The area in which the troops are operating is very mountainous, and little information regarding their movements is trickling through.

Thomas Keating, one of the Southern irregular leaders, died on Thursday from his wounds in the Dungan Hospital. Keating, with a party of irregulars, was surprised by troops operating at Coolnasmear, near Dungan, County Waterford. The irregulars refused to surrender and were fired upon, Keating receiving a mortal wound. He was one of the most active of the Southern irregulars.

Considerable discussion took place in Dail Eireann Thursday over the position of the Free State army, the contention having been raised in some quarters that the military branch is not sufficiently under civil control.

President Cosgrave arose and declared that General Mulcahy, Minister of Defence, had his entire confidence and that there was no intention of disturbing him in his direction of military affairs.

## INSULIN LAUDED AS CURE FOR DIABETES

Serum Discovered by Dr. Banting of Toronto Receives High Praise in New York.

New York, April 15.—The use of insulin in the treatment of diabetes has met with complete success at Montefiore Hospital, where 80 patients, five of whom were already in the last stages of the disease, have been injected with the recently discovered serum. This was made known to-day by Dr. A. I. Ringer, attending physician at the hospital, following the annual meeting in the auditorium.

Dr. Simon Flexner, Director of the Rockefeller Institute for Medical Research, who was the chief speaker at the meeting, devoted a portion of his address to the new discovery, asserting that "the world is enormously richer to-day that it has ever been before," because of the discovery of the serum by Dr. F. G. Banting of Toronto.

An angry man opens his mouth and shuts his eyes.

## REPUBLICAN PAPERS SEIZED IN LONDON

Scotland Yard Raids Many Homes and Finds Plots Favoring Irish Rebels.

A despatch from London says:—Another secret raid upon persons suspected of plotting in behalf of the Irish Republican cause was made in London Saturday morning, according to the Daily Express. The paper mentions Greenwich, Woolwich and Bermondsey as the districts where the police operated.

Scotland Yard detectives went in automobiles to the various districts houses. The occupants were taken completely by surprise; many of them were absent. Important documents referring to the activities of the workers for the Irish rebels are said to have been discovered in the search, which occupied some hours, but the Express does not state whether there were any arrests.

Since the round-up of March 10-11, the paper adds, it has become known that a considerable number of men, women and girls, belonging to the Irish revolutionary party, were continuing active propaganda work in London. This led to exhaustive inquiries and Saturday's raids.

## Lloyd George May Open National Exhibition

London, April 14.—Former Premier Lloyd George will visit the United States and Canada in September. During a short tour he will speak in New York, Washington, Chicago, Toronto and Montreal. He also intends to visit the Canadian National Exhibition, Toronto.

The authority for these statements is the News of the World, owned by Lord Riddell, a close friend of the former Premier. The prominence given the reports indicates it was inserted by Lord Riddell and authorized by Mr. Lloyd George.

## Message from Their Majesties to Children of Empire

A despatch from Ottawa says:—Their Majesties the King and Queen are to address messages to the children in the elementary schools of the Empire on May 24, and have arranged to have these recorded for gramophone reproduction, so that the children may hear the messages in their Majesties' own voices.

A man should never be allowed to own that he has been in the wrong; it is but saying in other words that he is wiser to-day than he was yesterday.—William Penn.
