"One ought to be glad whenone's friends "One ought to be glad whenone's friends are happy," was the unsteady answer. "If he loves her, of course he must want to marry her. Crystal says she is very handsome and looks so nice. You must write a very pretty letter to him, mother, and say all sorts of kind things. And it is for us to be glad that he has got his wish, for I think he has not looked quite happy us to be glad that he has got his wish, for I think he has not looked quite happy lately." And Fern folded up her work in her old business-like manner, and then went about the room putting little touches here and there; and if she were a little bale, the dusk soon hid it. Mrs. Trafford had no fault to find with her daughter that evening; nevertheless she did not feel easy; she thought girlish pride was bidding her conceal the wound, and that in reality her child was unhappy.

If any one had asked Fern what were her feelings when she saw that letter in her mother's hands she would have answered most truly that she did not know. She uncressed slowly, with long pauses, during which she tried to find out what had hapwhich she tried to find out what had hap pened to her; but no real consciousnes came until she laid her head on the pillow and tried to sleep, and then found her thoughts active. And the darkness seemed to take her into its black arms, and there seemed no rest anywhere. They were all over-those beautiful dreams that had glorified her life. No bright-faced young prince would ride out of the mist and carry her away; there would be no more kind looks full of deep wonderful meanings for her to remember over her work; in the morning heart beat more quickly; that springy tread would never sound on the stairs again. He was gone out of her life, this friend of hers, with his merry laugh, and his boyish ways, and that pleasant sympathy that was always ready for heart.

always ready for her. Fern had never imagined that such sad possibilities could wather up the sweet bloom of youthful promise; she had never felt really miserable except when her father died, and then she had been only a child. She wondered in a dreary, incredulous way if this was all life meant to bring her—every day a little teaching, a little work, every day a little reaction of quiet evenings with her mother, long streets that seem to lead nowhere; no meadows; no flowers; no pretty things except in the shop windows; would she except in the shop windows; would she wanting to be kissed and forgiven.

But here she broke down, and clasped her mother's neck "I am glad-I will be glad that he is happy; but oh, mother, I want him so.—I want him so." And then Mrs.

Had Sir Hugh's indifference made him blind? for he completely ignored the idea of any change in her. She was pale and thim—very thin, they told him. Hugh said he supposed it was only natural, and when they spoke of her broken rest and failing appetite, he said that was natural too.

They must take better care of her, and not let her do so much. That was his sole all kinds of dainties; she was only so lazy, and why she wasted these lovely summer mornings indoors instead of running races with him and Pierre.

Scarcely more than a child in years, yet Fay bore her martyrdom nobly. Unloved, unhelped, she girded on her heavy cross and carried it from day to day with a resignation and courage that was truly womanly; and hiding all her wrongs and her sorrows from him, only strove with her meek young ways to win

Hour after hour the desolate young oreature looked death in the face and found him terrible, and called out in her agony that she was afraid to die unless Hugh would hold her hand: and for many a long day after that Fay did not see her baby boy, for the least excitement would kill her, the doctor said, and her only chance was perfect quiet.

And the urgent letters that were sent

did not reach Sir Hugh for a long time, for he was wandering about Switzerland. He had carelessly altered his route, and had forgotten to tell

his route, and had forgotten to tell
Fay so.

But on his homeward route, which was not until the six weeks were past, he found a budget awaiting him at Interlachen.

Hugh was deeply shocked when he heard of his wife's danger, and blamed himself for his selfashness in leaving her.

The trip had refreshed him, but the idea of returning home was still irksome to him. He had enjoyed his freedom from domestic restraint; and he planned a longer route that should end in the Pyramids, when Fay was strong and well again. It would not matter then; but he was a brute, he confessed, to have left her just at that time. Then he added in self-extenuation that he was not quite himself.

And one locally again.

Then he added in self-extenuation that he was not quite himself.

And one lovely summer morning, when Fay lay like a broken lily on her pillow, and looked languidly out upon the world and life, they brought her baby to her and laid it in her weak arms; and Fay gazed wonderingly into a dimpled tiny face and blue-gree yees that seemed to her the counterpart of Hugh's eyes; and then, as she felt the soft breathing of the warm pestling thing against her shoulder, and lives easy she has never seen a finer baby nestling thing against her shoulder, and saw the crumpled hand on her breast, a new, strange flood of happiness came into her starved heart.

"Hugh's little boy," she whispered, and Mrs. Heron says he is a thorough Redmond

boy for his size. He is small now, but he will grow; he has such long feet and hands that she assures me, he will be a tall man.

and he has your forehead, dear, and your eyes. Oh, he will be just like his father, the darling!". "Will he?" returned Hugh, dubiously. As long as they would let her, she lay cradling her boy in her feeble arms and whispering to him about his father; and when night came she would lie awake happily trying to hear baby's soft breath. had never noticed a baby closely before, and he was not much impressed with his son's appearance; there was such a redness, he thought, and no features to be called features, and he had such a ridiculous button of a mouth. "Do you really call him a fine baby, Fay?"

"Fine! I should think so; the smallness ng in the bassinet beside her, and if he woke and cried, she would ask the nurse to lay-nim beside her.

mother," she would say, with maternal pride. "He is always so good with me; indeed, I never knew such a good baby," pride. "He is always so good with me; indeed, I never knew such a good baby," which was not wonderful, considering her experience had been confined to Catharine's oaby at the lodge. And if the nurse hum-ored her, Fay would cover the little downy lead with noiseless kisses, and tell him not to cry, for father was coming me to love them and take care of then

You will love me now; yes, I know yo "You will love me now; yes, I know you will, Hugh," she would murmur softly when the baby was slumbering peacefully in his blankets again, and nurse had begged Lady Redmond not to think any more about Master Baby, but to go to sleep. And as she obediently closed her eyes, the happy tears would steal through her eyelids.

Poor innocent child! when she had first espair had nearly cost her her life; but no coner was her baby brought to her than ope revived, for from the depths of her anguine heart she believed that by her oy's help she should win his love; not nowing in her ignorance that Hugh might ossibly care nothing for the son though he esired the heir, and that baby charms that had been so potent with he possess no magic for him.

CHAPTER XXX " IT IS ALL OVER, BABY."

It was on a hot thundery July afternoon that Sir Hugh entered Redmond Hall, weary and heated and dusty, and thoroughly

There are some men who hate to be reminded of their own shortcomings—who are too proud and impatient to endure self-humiliation, and who would rather go through fire and water than own themselve in the wrong. Sir Hugh was one of these.
Despite his moral weakness, he was a Redmond all over, and had a spice of the arrogance that had belonged to them in old games that had beinged to their in a feudal days, when they had ruled their vassals most tyrannically. And especially did he hate to be reminded by word or deed that his conduct had not been faultless; his conscience made him uncomfortable enough, for he was really kind-hearted in spite of his selfishness; so it did not improve matters when Mrs. Heron met him in the nall, and, quite forgetting her usual stately nanners, suddenly burst out, while her tearful eyes gave emphasis to her

Oh, Sir Hugh, I amgrateful and thankful to see you again, for we thought my lady would have died in her trouble; for, bless her dear heart, she fretted herself cruelly when you left her, and more's the

pity!"
The housekeeper had meant no reproach to her master, but Sir Hugh's uneasy conscience took alarm.
"Thank you, Mrs. Heron," with icy politeness, "I am deeply indebted to you for reminding me of my shortcomings. Ellerton, be good enough to tell Lady Redmond's nurse that I am here, and that wish to see my wife at once;" and he passed on in a very bad humor indeed, leaving Mrs. Heron thoroughly crest leaving Mrs. Heron thoroughly crest-fallen by her master's unexpected

Ellerton was an old servant, and he Will you not get rid of a little of the dust of your journey, Sir Hugh, and have some refreshment before you go up to my lady?"

Fay lay on a couch in her bedroom look ing very lovely, in her white tea-gown, trimmed with lace, with her brown hair trimmed with lace, with her brown har hanging in long plaits, and a little rose-leaf color tinting her cheeks. She was listening with a beating heart for the well-known footsteps; as they sounded at last in the corridor and she heard his voice speaking to Ellerton, she sat up, flushed and trembling, and under the soft shawl something that lay hidden stirred uneasily as she moved.

But when a few more days had tender rose flush deepened in her cheeks as she stretched out her hand to him with her oboks and words were given her out of sheer.

It is well for us to know that the emotions cause more unhappiness and crime than any other function of the brain. Human beings are governed by their emotions, and it is well that they should be, though it is the emotions that wear away the brain, and not honest intellectual work. Very few people suffer from intellectual work, and if my memory serves me I do not recollect ever having a mathematician for a patient. It is not intellectual work that causes nervous dyspepsia, but the emotions, such as anxiety, fear, sorrow and love. I consider that eight nours are sufficient for a man to use his brain, because if he exceeds that time he becomes nervous and fretful, and an exhausted brain is an irritable brain. EYES LOST IN CAVERNS. Animal Life Underground Marked by the

Fading Away of Visual Organs.

There is a manifest tendency of all gayly olored forms to lose their hues in sence of sunshine, and on it no conclusions can be based. The changes of the structural parts are of more importance; these, as might be expected, relate mainly to the organs of sense. The eyes show an evident tendency in all the groups to fade away. In the characteristic cavern-fishes they have entirely disappeared the whole they have entirely disappeared, the whole structure which serves for vision being no longer | roduced. In the crayfishes we may observe a certain gradation. Some species which abound in caverns are provided with eyes; others have them present, but so imperfect that they cannot serve as visual organs; yet others want them altogether. One species of pseudoscorpion, as shown by Prof. Hagan, has in the outer world four eyes while in the scorpion, as shown by Prof. Hagan, has in the outer world four eyes, while in the caves it has been found with two eyes and others in an entirely eyeless condition. Some cavern-beetles have the males with eyes, while the females are quite without them. As a whole, the cavern-forms exhibit a singular tendency of the visual organs, not only to lose their functions, but also to disappear as body-parts. At the same time there is an equal or even more same time there is an equal, or even more general, development of the antenæ and other organs of touch; these parts become considerably lengthened and apparently of greater sensitiveness, a change which is of manifest advantage to the individual.—

Blunt's Trial-Important League Conver

A Dublin cable says: The trial of Si Wilfrid Blunt, at Woodford, was resumed yesterday. Mr. Harrington, counsel for the defence, applied to the Court for a summons to compel the attendance of Mr. Balfour, Chief Secretary, as a witness, in order to show whether any information had been sworn to as stated in the proclamation that the proposed meeting at Woodford last Sunday would lead to a breach of the peace. Mr. Renans, counsel for the prosecution, denied the right of the defence to ask what had happened in Council at Dublin. The Magistrate said Mr. Harrington's application was founded on the assumption that the statements in the proclamation were false, and the Court was not competent to decide the question. The hearing of the en sworn to as stated in the proclamatic decide the question. The hearing of the evidence was then resumed. The sentiment of more than half the Senate is opposed to Mr. Chamberlain's position upon the Irish question, and the others are general belief of Mr. Balfour and his colleagues. The suppression of the Woodwhere. Dublin Castle at one moment was actually in charge of a clerk in the Under colleagues. The suppression of the Wood-ford meeting shows how far they are ready to go. The Irish leaders meant this meeting as a challenge. They doubted whether the Government would venture to prevent an assemblage of the English Home Rule League addressed exclusively by English-men. They doubt no longer. They see e policy of repression and suppression is to be tried in grim earnest. Nor need either side regret that this question should be brought to a square issue. A London cable says: In reference to the statement of Commissioner Monro of the detective department, at the inquest over the body of Cohen, the alleged dynamiter, yesterday, that Gen. Millen, the head of yesterday, that Gen. Millen, the head of the Clan-Na-Gael Society, was in London during the Jubilee, the police state that Millen has never set foot in England. They say he resided at Boulogne and Paris. A detective called on him at Boulogne spectore the Jubilee celebration and warned him that he knew of the plot against the Queen. Millen then fled to Paris. From there he went to Brussels, then to Rotterdam and from that city to Amsterdam. At the went to Brussels, then to Rotterdam and from that city to Amsterdam. At the latter place he took passage, with his wife and daughter, on the 22nd of this month, on steamer Edam for New York. With regard to Melville, the London agent of the society, the police say that when he arrived in London he took lodgings in a mean quarter in Gladstone street, and was in, impecunious circumstances. Melville had visited Joseph Nolan, Irish member of Parliament, in company with Michael Hawkins. Both Melville and Hawkins had been seen in Cohen's company. Melville went to Cohen's company. Melville went to Paris and saw Dennehey and Maloney, who sailed for America on ring. 17th. Dennehey is a member of the Clan-Na-Gael Society and resides in Brooklyn. Melville returned to London in a more prosperous condition. He lived at the Metropole Hotel and spent money freely. He was constantly in the company of a Miss. Kennedy, with whom he travelled through Ireland and then to Paris. They lived in grand style. In Paris he called on General Millen at the Hotel du Palais. Melville finally sailed from Havre on Sept. 17th for New York. Miss Kennedy ecompanied him. On reaching New York liss Kennedy was arrested for smuggling. Surchall's address in Philadelphia is 2,521 North Sixth street. The police claim to ave proof against him and Hawkins, but

A DIABOLICAL PLOT. Brooklyn Lady Fatally Injured by the

A New York despatch says: About 10 o'clock on Friday night a young man, aged about 21 years, dressed in the garb of an American District Telegraph messenger, presented hinself at the residence of Mr. Joseph Weischler, of the dry goods firm of Weischler & Abrahams, of Brooklyn, at 329 Washington avenue, in that city. To the servant who opened the door he handed a small package addressed to Mr. Weischler. That gentleman not being home, the package was carried to Mrs. Weischler. On opening it she found two small boxes, ore of which was made of paper and the other of wood. The latter had a sliding top and she attempted to open it. She had only pulled the top a little when there was a sudden explosion, and she sprang to her feet screaming with pain, while her boy joined her with his cries. The servants rushed into the room and found Mrs. Weischler in a terrible condition. Herface and hand were badly lacerated and she was almost blinded. The boy, too, was rolling about the floor in agony from the pain caused by lacerations of his face and hands. An examination showed that the faces of Mrs. Weischler and her son were filled with small pices of metal which had small package addressed to Mr. Weischler filled with small pices of metal which had been driven into them by force of the ex-plosion. The boy, while painfully hurt, is not considered to be in any danger, but in the case of Mrs. Weischler it is feared that lockjaw may set in and that her death is actain. The most careful and minute ex-unination failed to disclose any trace of the explosion, and the police are unable to say or even to guess what it was. There was no sign of any machinery to have worked an explosion, and none of the little bits of metal about similar to those which were driven into the face of Mrs. Weischler were driven into the face of Mrs. Weischler and her son. Where the explosives and the pieces of metal were kept is a thorough puzzle. The only reasonable explanation offered was that some new kind of chemical compound had been used, which, occupying a small space, has tremendous force and is a small space, has tremendous force and is exploded by a slight friction. The boxes will be thoroughly and carefully examined by experts, and it is possible that something may yet be found which will lead to the discovery of just what the explosive

He desired Burtch to proceed to Thorold and cash the draft drawn upon the bank there, and deposit the proceeds, together with the draft drawn upon the bank there, and deposit the proceeds, together with the draft upon the Bank of Tronto, to his account at the Imperial Bank. Burch went to Thorold as direct d and secured the \$3,800 and then proceeded to the Bank of Toronto and endeavored to cash the other draft. Mr. Leitch, the pay clerk, offered to cash the draft in notes of small denomination, but these Burtch refused to accept, and left.
