CHIROPRACTIC!

(DEFINITION.)
Chiropactic is a philosophy, science and art of things nat-
ural; a system of adjusting the articulations of the spinal
column, by hand only, for the correction of the cause of disease.
(This definition is inclusive and any and all other methods
are hereby declared not to be Chiropactic.)
ALL ELSE BELONGS TO OTHER METHODS.
Chiropactors, who know Chiropactic as defined, confine
their thoughts, actions and office work to it. By doing more
than the above, they openly confess that they are ignorant of
Chiropactic or are manifestly for money irrespective of the
good they can do the sick.

Lloyd George Says Co-operation With Poincare Impossible

Dr. Banting Will Disclose Secrets of Insulin Treatment—The King's Yacht Ashore—Gloucester's Contender in Fisherman's Race in Collision

LLOYD GEORGE ATTACKS M. POINCARÉ.

BRISTOL, Eng., July 25. Former Premier Lloyd George made a fierce attack on M. Poincaré, French Premier, in a speech here today. He objected to M. Poincaré's habit of making speeches on Sunday and he pointed out that the day dedicated to good will, and hardly a day to "unscrew the cylinder of distillated hatred and spread war among nations." Alluding to negotiations Mr. Lloyd George said he did not fall out with M. Poincaré but it was very difficult and Mr. Poincaré also found it quite impossible to deal with him. The former Premier accused M. Poincaré of "wickedly distorting" his speeches and expressed the hope that British efforts toward peace would not be converted into "more fuel for further devastating and scorching flames, which burn up peace, prosperity, progress and happiness of mankind."

CONSERVATIVES ARE PREDICTING VICTORY.

Women will vote for the first time in a Provincial contest. Prince County, which returned two Conservatives and eight Liberals in 1919, has five Progressives in the field all in Liberal districts, and there is a probability that splitting the Government vote will help the Conservatives. The same is true in one of the districts of Queens. Leading Liberals, while confident of the return of the Government, admit that the majority, which was eighteen in a house of thirty in 1919, will be decreased, while the Conservatives declare that their leader, J. D. Stewart, will have a safe working majority.

COLUMBIA COLLIDES WITH FRENCH TRAWLER.

GLOUCESTER, July 25. The fishing schooner Columbia, contender for the honors in the Annual International Fishermen's Race this year, collided with the trawler La Champlain of Sable I., and had to be towed into St. Pierre, Miquelon. The Columbia was on her second fishing trip since built last Fall. Her accident may prevent competition in the races off Halifax in October.

SENTENCE OF TWO YEARS REVOKED AND NEW TRIAL ORDERED.

HALIFAX, July 25. In the Supreme Court here this morning, Frank Taylor and John Young, who were recently convicted of assault, and causing grievous bodily harm to Temperance Inspector Thibault at North Sydney, several months ago, were granted a new trial.

THE KING'S YACHT BRITANNIA ASHORE.

WOTHEN ON SEA, Eng., July 25. King George's yacht Britannia ran aground on Shoebury Sands near the mouth of the Thames at the completion of the first round of the race today. She lies high and dry and her condition is serious. The King was not on board at the time of the stranding.

P. E. I. ELECTION FORECASTS.

CHARLOTTETOWN, July 25. On the eve of the Prince Edward Island Provincial elections, which take place Thursday, both Liberals

AND CONSERVATIVES ARE PREDICTING VICTORY.

Women will vote for the first time in a Provincial contest. Prince County, which returned two Conservatives and eight Liberals in 1919, has five Progressives in the field all in Liberal districts, and there is a probability that splitting the Government vote will help the Conservatives. The same is true in one of the districts of Queens. Leading Liberals, while confident of the return of the Government, admit that the majority, which was eighteen in a house of thirty in 1919, will be decreased, while the Conservatives declare that their leader, J. D. Stewart, will have a safe working majority.

SENTENCE OF TWO YEARS REVOKED AND NEW TRIAL ORDERED.

HALIFAX, July 25. In the Supreme Court here this morning, Frank Taylor and John Young, who were recently convicted of assault, and causing grievous bodily harm to Temperance Inspector Thibault at North Sydney, several months ago, were granted a new trial.

trial. They had been sentenced previously to two years in the penitentiary and their case has been reserved. Their Lordships Justices Chisholm, Mellish and Rodgers, gave a decision after hearing the argument of D. V. White, Counsel for the accused, who claimed the criminal code did not provide for the offence found by the jury of assault and causing grievous bodily harm.

LLOYD GEORGE TO VISIT CANADA

QUEBEC, July 25. A committee in Canada is arranging for a tour of this country by former Premier Lloyd George, according to information contained in a letter received yesterday by Mayor Samson, Chairman of the Lloyd George Committee. The present plans are that he sails from Liverpool on the Empress of Briton on October 3rd, landing at Quebec. The ex-Premier plans also to spend several days in the United States, but is urged that both arrival and departure should be in Canada.

EXPEDITION TO HUNT PRE-HISTORIC MONSTER.

ALLIANCE, Nebraska, July 25. A pre-historic monster one hundred feet long with head and tail like a giraffe, and which hisses like a steam engine is an object of the expedition by members of the Alliance Anglers Club that plans to invade the lonely Alkali Lake territory where from time to time authentic reports are circulated of hunters and fishermen seeing this weird monster which is described as being like nothing else on earth. Harpoons and whaling guns are being taken by the expedition that hopes to run the monster to earth.

GREAT POSSIBILITIES IN MEDICAL DISCOVERY.

LONDON, July 25. New and wonderful possibilities in medical science which up to now have been kept secret, will be revealed to-day by Dr. F. C. Banting, the Canadian who discovered insulin treatment for diabetes. The Daily Express says Dr. Banting is expected to take up his audience of five hundred doctors along new avenues of research that may lead to discoveries more important than insulin.

AGED MAN LOSES LIFE IN QUEBEC FOREST FIRES.

QUEBEC, July 25. Forest fires caused by the burning of slash by settlers, resulted in the death of Louis Beaupre, sixty-eight, who perished in the flames on Monday and the destruction of ten houses and three camps at St. Valerien, Rimouski County. A serious outbreak of fire from slash burning last Friday destroyed ten houses in Langis Township in the South Shore. A fire in Rimouski Saturday destroyed three large camps.

EMPIRE FORESTRY CONFERENCE AT OTTAWA.

OTTAWA, July 25. The British Empire Forestry Conference attended by representatives of the United Kingdom, India and the Irish Free State, as well as other Dominions and Colonies was opened here to-day by Premier King.

MINERS RETURN TO WORK.

SYDNEY, July 25. Princess local of the U.M.W.A. at Sydney mines accepted the Lewis-Barrett order to return to work under the leadership of Provisional President Barrett. Practically all the miners of the north side will resume work before the end of the week. His Excellency Lord Byng and Lady Byng were given a royal welcome on arrival here to-day and a full programme has been arranged for the reception of the distinguished visitors.

Chance of a Lifetime.

The occupants of the parlor car of the Limited were startled by the abrupt entrance of two masked bandits. "Throw up yer hands," commanded the bigger of the two. "We're gonna rob all the cents and kiss all the gals." "No, pardner," remonstrated the smaller one gallantly. "We'll rob the gents, but we'll leave the ladies alone." "Mind your own business, young fellow," snapped a female passenger of uncertain age. "The big man is robbing this train."—Exchange.

Bring Ottawa to Sense of Justice.

FURTHER PLANS BY G. T. B. SHAREHOLDERS IN LONDON. LONDON, July 18.—(Can. Press)—Another meeting of shareholders of the former Canadian Grand Trunk Railway Company was held yesterday in Winchester House, London, to consider means of pressing their claim against the Canadian Government.

W. G. Ormsby-Gore, who is Under-Secretary for the Colonies, presided. He said the meeting had been called to find means of bringing the Canadian Government to a sense of justice, reason and propriety in the matter of the dispossessed shareholders of the Grand Trunk. Paying compensation to the holders of the junior shares was not a matter of compassion but one of uncontrovertible right. A majority of the board of arbitration who had adjudicated the subject were Canadians, therefore it could not be regarded as impartial.

R. C. Hawkin urged those present to appoint a committee to bring pressure to bear on the Government at Westminster to investigate the matter. A resolution moved by E. Rodocanachi proposing the boycotting of Canadian issues was submitted but owing to opposition was withdrawn. Another resolution urging wide dissemination of the facts in London, Canada and New York, was carried unanimously.

Many protests were made by shareholders from the body of the hall against "the dishonest action of the Canadian Government." Ultimately a committee was appointed to see what could be done and to call further meetings. The Committee consists of Seymour Fitzroy Ormsby-Gore, Dr. Nelke, F. B. Lacey, R. C. Hawkin, Sanderson Wells, E. Rodocanachi and Col. Rosenbaum.

Gambling Raid.

NEW JERSEY RESORTS SWOOPED UPON—\$20,000 NETTED. Long Branch, N.J., July 23.—Fashionable New Jersey resorts, which received a shock yesterday when raids netting \$20,000 worth of liquor were made in Lakewood and Point Pleasant, got another jolt to-day when detectives swooped down on five alleged gambling casinos in Pleasure Bay, West End, Allenhurst and Wanamassa.

Gambling paraphernalia valued at \$20,000 was confiscated and the proprietors of the five resorts were arrested, but their names withheld. Guests were not molested.

Bosses Were Wise.

The heads of a big manufacturing plant had this notice posted at the beginning of the summer season: NEW RULE FOR OUR EMPLOYEES. All requests for leave of absence on account of toothache, severe colds, and minor physical ailments, and on account of church picnics, weddings and funerals and the like, must be handed to the foreman in charge of your department before 10 a.m. on the morning of the game.—Houston.

World's Longest Suspension Bridge to Span the Hudson.

Work in the construction of America's greatest suspension bridge, the center span of which will be the longest in the world, was begun recently on both sides of the Hudson River, three miles from Peekskill, N.Y. The new bridge, which will be completed about April, 1926, is to be known as the Bear Mountain-Hudson River Bridge, taking its name from the Bear Mountain reservation, a section of the Palisades Interstate Park system which will be its westerly terminus.

Need for a bridge linking the highways on the east and west banks of the Hudson long has been felt. The site of the bridge now under construction was selected because it is the narrowest part of the river. In addition, it is within easy distance of New York and other cities that supply heavy motor traffic for the State highways. The rock formations at the site are suitable for the support of the tremendous weight of the structure and of advantageous elevations for the support of the approaching spans.

The new structure will have a total length of 2252 feet, including approaches. The center span will be 1832 feet long—32 feet longer than that of the Williamsburg Bridge across the East River in New York City, which now is the longest in the world. The clear height above the river will be 155 feet, about 20 feet higher than any of the bridges connecting Manhattan with Brooklyn. The 350-foot steel towers, likewise will rise high above those of the great East River bridges.

On the east side of the river will be constructed an approach road of concrete to connect the bridge with the nearest highway. The west approach highway will be on the axis of the bridge and will connect with State Highway Route No. 3 at a point about 1000 feet from the bridge.

More than 7000 wires will make up the 17-inch cables on which the roadway will be supported and 12,652 tons of steel will be used in construction. There will be a 58-foot roadway in the center, with sidewalks five feet in width at each side. The location of the bridge is about 45 miles from Times Square, New York City.

String Pot Handles Prevent Burns.

To prevent burnt fingers and eliminate the use of bothersome pot holders, try this on some of the pots in your kitchen: Obtain some thick string about three feet long, and also about 8 inches of strong twine. Loop the twine handle, then commence wrapping the thick string around the handle and twine. When the wrapping is complete, push the loose end of the thick string through the loop of the twine. Now pull the unlooped ends of the twine. This will pull the loose ends of the string under the wrapping and hold them securely.

There will be less burnt fingers and no need of pot holders when kitchen equipment has been treated in this manner.

Dyes Tint Living Trees.

Coloring the wood of growing trees with aniline dyes is one of the recent achievements of science in producing tinted lumber. Nearly any color can be used. A slanting hole is bored through the foot of the tree trunk. After the lower end of the aperture is plugged up, the dye solution is poured in, filling the hole to the brim. Soon the entire tree absorbs the coloring.

Then She Rang Off.

LONDON, NEW YORK & PARIS ASSOCIATION OF FASHION

THE EVENING TELEGRAM

THE EVENING TELEGRAM, LIMITED, PROPRIETORS. All communications should be addressed to The Evening Telegram, Ltd., and not to individuals.

St. John's, Newfoundland, Thursday, July 26, 1923.

A Neglected Source of Wealth.

PROTECT IT-DEVELOP IT.

Since the coming of the Rotary Club into our midst it has been the means of calling attention to many matters of public moment, and of these not by any means the least important was the subject upon which the Hon. Sir Edgar Bowring gave such an interesting address at their last meeting—Newfoundland as a Tourist Resort.

To summarise the attractions that we have to offer to the tourist is not our purpose. They have often been described, but even our most brilliant writers have failed to do them full justice. Nature has been prodigal with her gifts, and it is but for us to reap the benefits.

The first essential if this asset is to be turned to account is adequate protection. The Game Laws require revision, and more effective measures must be taken to patrol our rivers and our hunting grounds. To induce sportsmen of the right type to come to the country, they must first of all be assured that the game laws are rigidly enforced. This can only be done by considerably increasing the numbers of wardens, offering sufficient inducement to secure capable men, and employing supervisors, each in charge of a definite area, to see that the laws are being upheld.

The true sportsman is not seeking a happy hunting ground only. He has an eye to the artistic. He finds pleasure, unexpressed perhaps in the wide spaces, in the deep silence of the forests, in the roar of the thundering waterfalls, and in the solemnity of the everlasting hills. But our natural beauty is stripped of its splendour with the destruction of our plant life, and hand in hand with the precautions taken to protect our game must go every possible provision to reduce fire risks.

Adequate hotel accommodation will doubtless follow when the stream of tourist traffic is no longer an uncertainty. That can greatly be augmented by the circulation of literature both in England and America, and by advertising our attractions—not as the "Norway of the New World"—but as a Sportsman's Paradise peculiar to Newfoundland.

The Political Situation.

Since the announcement on Tuesday by the Hon. W. R. Warren that he had been requested by his Excellency the Governor to form an Administration, and that he had undertaken the responsibility, there has been no further development in the political situation. In view of the difficulties with which the new Leader is faced, he is assured of the sympathy of the public generally, who trust that as a result of his deliberations a party will be formed which will be deserving of their confidence.

New Machinery At Silver Cliff.

Last week over twelve tons of machinery arrived at Argentia for Silver Cliff mine consisting of a 100 H.P. Metz fuel oil engine, 14x24 roll crusher, and 10x7 jaw crusher. This apparatus will be capable of handling 120 tons in 24 hours. The run of mines produces one ton of concentrates from five tons. The concentrates being made run seventy-seven per cent lead, twenty-five oz. silver, and seven to ten pennyweights of gold.

There are no objectionable elements such as Cobalt Nickel, arsenic, antimony, Bismuth or Zinc. The latter being present in the raw ore, but is swept clean from the lead concentrates. With the installation of a sintering plant sulphur content of the concentrates would be eliminated sufficient to bring the lead contents up to 33 per cent, which would be a world's record. The operations of the Silver Cliff Mining Co. have demonstrated there are enormous possibilities for the mining section of Placentia Bay as the lead bearing strata extends from the South East Arm to La-Manche over thirty miles, and were operations existent producing twenty tons of concentrates per day it would warrant the installation of a lead smelter and refining works, which would permit operation of mines with very small capital as the operators would have a home market for their product.

Juvenile Outing August 6th.

At a recent meeting of the Guardians in connection with the T. A. & B. Juvenile Outing were finalized. The affair will be held at Donovans on August 6th, the party going out by train at 10.30 a.m. At night a dance for the guardians and their lady friends will be held, a special train going out at 8.30 p.m.

Express Passengers.

The following first class passengers arrived at Port aux Basques on the S.S. Kyle yesterday morning and are on the incoming express due about 4 o'clock this afternoon:—Mrs. H. Kelloway, Mrs. A. Ivany, Miss E. Smith, Mrs. R. Fifield, Mrs. G. Stares, P. and Mrs. Yestman, J. Burke, A. Roberts, A. R. and Mrs. McLean, S. Evans, Mrs. A. Pelley, T. and Mrs. Garion, R. Norman, Miss Hartley, Miss E. Delaney, N. Gillis, Mrs. T. Hutchings, Mrs. C. M. Stickland, T. R. Hayes and daughter, F. and Mrs. Winsor and daughter, Mrs. S. Wheeler, Miss K. Taylor, Mrs. A. Parsons, Mrs. W. Way, A. T. Payne, G. Carpentier, W. R. Turnbull and two sons, Mrs. G. Stickland, Miss S. Morgan, Miss Beak, Miss J. Quinn, Miss G. Grandah, and two children, Miss M. Stickland, Mrs. W. F. White, G. Spracklin, H. and Mrs. Cook, A. T. O'Leary.

Obituary.

JOHN SPARROW. On Monday, July 16th a sad gloom was cast over the little settlement of Ship Harbour, when the news flashed over the wires of the death of a worthy and much respected young man of that place in the person of John Sparrow, who was drowned at St. John, New Brunswick, while swimming on Sunday, July 15th. The deceased was only in his twenty-first year and left home in May, bidding adieu to his relatives and friends. He leaves a mother, one brother and five sisters, who deeply mourn the loss of a kind son and loving brother. To the bereaved ones the writer and many friends of the deceased extend heart-felt sympathy in this sad time.—A FRIEND.

BELGIUM GLASSWARE.—The first shipment of Belgium Tumblers, etc., received by S. Richd. Steele, is now selling at remarkably low prices. Call in or phone 1476—the shop with the CUP & SGB. SIGN—opp. Court House.

In Passing.

It is quite possible that Hon. W. R. Warren will be in a position to announce the personnel of his Ministry before Saturday. Everywhere yesterday self-opinioned politicians were issuing forecasts of the possible lineup of the new Government. Not a few strengthened their predictions with the usual assertion that were speaking with the sanction of various leaders whose confidence they claim to enjoy.

Notwithstanding all claims of self-elected authority, we are amazed that up to time of writing nothing of a definite character has transpired and the situation remains practically the same as on Tuesday after the Assembly adjourned.

It is true that a series of small meetings and conferences have been held by the leaders of the distinct factions in the House to consider and discuss the question of a new executive, but no details of what transpired are revealed; accordingly all the statements and rumors circulated must not be accepted as facts until an official announcement is made by those on whom the responsibility rests.

A most amusing incident transpired at the garden party yesterday when a member of the House of Assembly and a prominent ex-member challenged each other to write a forecast, the one jotting down the nearest to the official announcement would be enriched by a substantial sum. Both hastily applied their minds and pencils to the task and in less than a minute each submitted their list to a third party, who on reading them found that the two great minds were of the same thought. The two forecasts were the same and the orphans received the benefit to the extent of twenty dollars.

The Mail in its report of Tuesday's proceedings in the Legislature yesterday is of the opinion that Hon. Mr. Warren's statement predicts complete coalition of the two political parties now in the Assembly. Coalition Government had its disadvantages and to-day may enjoy many advantages depending solely upon the policy of such and the progressiveness of its membership.

The public expenditure in connection with the Agriculture and Mines Department and pit-props account for February and March is but a repetition of the months previous up to July 1922. An item worthy of passing notice is that of cab hire which list was very lengthy for these two particular months.

One cabman in particular received \$120.00 for car engagements. Although the cabman received various amounts for March month. Another item that should be explained is the sum of \$200.00 to H. J. Duder for extra services.

Annual Picnic.

St. Thomas's Sunday School held enjoyable outing. The annual Sunday School picnic of St. Thomas's Parish, took place at Woodley's Farm, Quidi Vidi Road, yesterday afternoon, under ideal weather conditions. The teachers and scholars, numbering some two hundred and fifty, assembled at Canon Wood Hall at 12.30 p.m. from whence they proceeded to the grounds. Various games were indulged in during the afternoon. A feature of the programme was the football match played between the C. E. Orphanage and the Dandfield Boys' Bible Class, the former winning out after an exceedingly good game, by 3 goals to 1. The team which consisted of a plentiful supply of the many good things was served on the green, and done full justice to by all. The outing was one of the best yet held. The boys and girls of the C. E. Orphanage, who were present during the afternoon, as invited guests, and Supt. Hodder, on behalf of the orphans, feel very grateful to Mr. Mott, the Sunday School Superintendent, and teaching staff for the many kindnesses shown.

Western

Fishery Outlook.

The fishery with traps and trawls is practically a failure from Ferryland to Caplin Bay according to a report sent to the Board of Trade by Sub-Collector M. J. White. Todate with sixteen dories, forty-nine boats and fifty traps in the water only 3,000 qts. of fish have been secured. From Cape Race to St. John's the fishery is somewhat better, although the prospects are not very good. Todate 50 schooners and 29 dories and skiffs have landed 4,940 qts. There are 35 traps in the water in this section. From Northern Head to Cape Medie todate 5,500 qts. have been landed. There are 65 traps in the water and 130 dories and skiffs operating.

Personal.

Major Jennings, of the Armstrong-Whitworth Co., left by train yesterday to spend a few days up-country.

Mount Cashel

Garden Party.

The citizens of St. John's turned out in their thousands yesterday afternoon to attend what has always been predicted to be, the Premier Day, Mount Cashel Garden Party. It is estimated that fully eight thousand were present, which constitutes a record. The day was all that could be desired. The weather conditions, which did not look very promising during the forenoon, turned out to be ideal, while the gathering present clearly demonstrated their appreciation of the good work done by the Christian Brothers of the Orphanage. The scene at the grounds was a most picturesque one, flags and bunting fluttered here and there in the breeze of the refreshing westerly wind, while the tents, stalls, tables, etc., added greatly to the beauty. Amongst those present were His Excellency the Governor, Lady Allardice, Miss Allardice, Major Wilberforce-Bell, Vice Admiral Seymour and officers of H.M.S. Calcutta. The Vice-Regal Party arrived at the grounds at 3.30, and upon being welcomed at the entrance by Bra. Ennis, were escorted through the grounds and buildings, after which they moved to the space allotted for the field sports, where they remained a considerable time reviewing our local athletes either kicking football or running races. A notable feature during the sports programme, was when Ron O'Toole, the winner of the three mile race was introduced to His Excellency, who expressed his pleasure in witnessing the young athlete's performance, and congratulated him on his splendid showing. The usual side shows, as other years were in evidence. There was plenty of amusement to be found in the throwing of rings, shooting, the arrow hitting the target on the head for a big fat cigar, and the throwing of a dime to try your luck on the wheel of fortune. The wheels were perhaps the most patronized, and it was interesting to watch how eagerly each spin was followed. Then again, energetic young ladies were on the lookout for everybody to purchase a ticket on something, whether it was a handbag, box of cigars, a dainty cake, and many other things which would readily attract a customer. The swimming boats, which were pitched in conspicuous part of the grounds, were kept busily engaged all afternoon and evening, to the general enjoyment of the many who had a fondness for this invigorating pastime. The dancing of the Orphans in the various Irish Jigs, one step, etc., was indeed a revelation to the thousands who had the pleasure of watching them. They were warmly applauded and responded to encores on several occasions. At 5 o'clock, when time came around for tea, the various tables were quickly filled. The ladies in waiting who had made every preparation for this occasion, were fully rewarded for their efforts. The tea tables were overflowing with many delicacies, and the appetites of all were appeased. In this department the table holders had big receipts, which helped considerably in the success of the affair. During the afternoon, lively musical airs were rendered in a masterly manner by the bands of the C.L.B., C.C.C., and the talented little bandsmen of the Orphanage. The traffic regulations were all that could be desired, and not a single accident was recorded. The motor cars, buses, cabs, etc., were busily engaged moving to and fro from the city to the grounds, and they certainly did a rushing business. The police, under Sergt. Stapleton, at the entrance, directed the traffic very satisfactorily, while the mounted police in and about the grounds rendered yeoman service. When the final event of the day, (the pony race) had been brought to a close, the presentation of prizes to the winners of the various sporting events followed. Bro. J. E. Ryan, on behalf of Mount Cashel, presented the trophies in his usual graceful manner, after which three hearty cheers were given with a will by the gathering for the Brothers and Mount Cashel.

Successful Dance. As a fitting wind-up to the successful days proceedings a dance was held in one of the spacious buildings. Upwards of 400 people were present. The dance hall was specially decorated for the occasion. The music was furnished by the Mount Cashel Band, under the leadership of Mr. Arthur Bulley; the music being of such a high standard, that repeated encore had to be responded to, which were given with a will. The dance was a decided success, the receipts doubled that of last year. The affair did not conclude until 2 o'clock this morning. The gathering before they left joined in the singing of the National Anthem and cheers for Mount Cashel.

Shipping.

S.S. Canadian Sapper arrived in port this morning with a full general cargo from Montreal and Charlottetown.

Schr. Hasbet has sailed from Burnt Island for Oporto, taking 2,373 qts. codfish and 93 qts. haddock from the Burnt Labrador Report Co.

Cameras for the Regatta

Actual Cost Price

An actual Cost Price Sale of Cameras is now on at the Kodak Store. From to-day until Regatta Day, Aug. 1st, every Camera in our store will be sold at COST PRICE. There is no "fake" in this wonderful sale, the genuine listed cost price of every camera will be its selling price.

Such an offer has never been made in the city before, and as Sales like this don't happen every day it's up to YOU to get your Camera NOW, in good time to snap "all the fun of the Races."

The Slaughter of the Brownies

100 Brownie Cameras--the ideal Camera for children and beginners--are offered at the ridiculously low figure of \$3.00 each. Who'd be without one at that price? Think of the fun you can have anytime with a Camera and a roll-o'-film, and have a little Brownie in your home right away.

100 \$3.00 Brownies \$3.00

In Memoriam.

THOMAS MURPHY (PAINTER.)

There passed to his eternal reward on Thursday, July 12th, fortified by the sacraments of Holy Catholic Church, Thomas J. Murphy, in the 41st year of his age. Deceased was the foremost signwriter and interior decorative artist in the country. His lettering was always an attractive feature in our business centers and many of our outport churches have been enriched by his brush, with the reproductions of some of the most famous pictures that portray the story of the New Testament. He was the trusted foreman and confidant of the painting firm of McGrath Bros., in whose employ he had entered as an apprentice 25 years ago, and to whom his passing is an irreparable loss. He was a man blessed with keen insight of the workings of life about him, and by his candor and straightforwardness won the admiration of a host of admirers who looked to him when bitterness and prejudice bagged the debate, for clear and unbiased opinion. He spent a few seasons in New York and Boston in his business, where he made many influential friends and at these times the Newfoundland visiting those cities would find no more congenial guide and companion than Thomas Murphy. He leaves to mourn their sad loss a loving mother, wife and one brother and the number of his friends was evidenced by the largely attended funeral that followed all that was mortal of him to the church and his resting place in Belvidere.

Coastal Boats.

Argyle left Lamaline at 1.40 p.m. yesterday, inward. Clyde arrived at Lewisporte at 11.25 p.m. yesterday. Glencoe leaving Argentia to-day. Home, no report leaving Humbermouth. Kyle left Port aux Basques at 11.35 p.m. yesterday. Meigle at St. John's. Segona left Raggad Islands at 7.30 p.m. yesterday, coming South. Malakoff arrived at Port Union at 7.15 p.m. yesterday. Fortia left King's Cove at 9 a.m., going North.

Susu Sails.

S.S. Susu, Capt. Roberts, sailed for the Fogo Mail Service route at 10 o'clock this morning, taking a full freight and the following passengers:—Misses M. White, Irene Kelloway, N. Buckler, Hunt; Messrs. R. Burt, Capt. Canning, S.A., Lieut. Pearce, S.A. and Rev. S. Rowe.

Senef Reports.

FISHERY LOOKS MORE PROMISING. Capt. George Barbour of the S.S. Senef, now at Holton, forwarded a message to the Department of Shipping this morning which reads as follows:—Ship went as far North as Hopedale, now West Turnavick awaiting arrival S.S. Segona. From Indian Hr. to Hopedale, no ice in sight. Floe extends further North, but cannot say how much. Weather is exceptionally good, with fair sign of fish as far North as Hopedale. Passed three schooners North Turnavick, all well.

Shipping.

S.S. Canadian Sapper arrived in port this morning with a full general cargo from Montreal and Charlottetown.

What You Should Know.

You often hear a person say "The people want something more than Chiropractic Adjustments." I have been asked why I do not use... Electricity, Baths, etc. As a Chiropractic practitioner, I know that the people want Health and I also know, that if Chiropractic fails, that amount of Electricity, Baths, Massage, etc., will do any good. There is no denying the fact that the people being steeped in old methods are prone to leave the old ways for new ones. Chiropractors having the welfare of these patients at heart, use no petting and pampering methods. Not being Dollar chasers, we give them the one thing that we have been taught and know how to use. We give them the thing that we know. Gets them well—Chiropractic. For your Health consult WM. H. MACPHERSON, D.C., 11 Atlantic Ave. Chiropractor, July 25, 1923.

McMurdo's Store News.

OUR WEEKLY MESSAGE. This week we are adding to our Special Weekly Offers the following useful toilet and general articles:—Tooth Paste 40c. With Decorator Brush \$1.50 Palm Soap 10c. Six for 50c. Nyla's Face Cream 90c. With Tube Cold Cream 50c. Johnson's Baby Talcum 50c. With Cake Castile Soap 50c. Bath Soap 15c. Six for 70c. Also a new lot of our fresh delicious chocolates, some of which are:—Chocolate Creams 35c. Chocolate Chips 45c. Butter Scotch Lumps 40c. Roasted's Mixture 50c. Chilled Sugar Peanuts 45c. Peppermint Tooth Paste may now be had in small size tubes at 40c.

Silvia in Port.

SHIP HAS 80 ROUND TRIPPERS. S.S. Silvia arrived in port at 6 a.m., bringing the following passengers from New York:—Miss E. March, Mrs. R. Hart, Mrs. Jas. Powell, Mrs. L. Leach, Miss M. Leach, Miss K. Sutton, Miss A. Cassidy, N. Goff, Miss M. Calvert, Miss E. Kemp, 80 round trippers and 13 in second class. From Halifax—Rev. L. Walsh, W. M. Lashlan, Mrs. Olsen, N. L. Mews, J. B. Madcan, M. M. and Mrs. Urquhart, Masters Gordon, Carlton and George Urquhart. Misses Ethel and Eva Urquhart, W. S. Curtis, Wm. Olgive, R. Rothwell, G. S. Wiseman, C. Brant, R. Rottinger, Mrs. Rottinger, Mrs. T. Penney, A. Jacobs, Rev. J. A. McLashlan, P. J. Hagen, T. S. McRae, Miss A. Wilson, Mr. Welpley and 7 second class.

LABRADORITE

BRACELETS. PENDANTS. RINGS. BROOCHES.
EAR RINGS. MASONIC EMBLEMS. CUFF LINKS. CHARMS.

This beautiful Native Stone, famous for its different play of colours, is found on Newfoundland Labrador.

A VALUABLE SOUVENIR OF NEWFOUNDLAND.

R. H. TRAPNELL, Ltd.
Jewellers and Opticians, 197 Water Street.

Add a dozen small onions and a little water to a pot-rost of veal, simmer until thoroughly done, remove the meat and make a white sauce with the gravy.

To test far rubbers stretch them and place on a rubber that has not been stretched. If they break or will

not go back to their original size they are poor rubbers.

Equal parts of cold cooked ham and cold cooked tongue put through the chopper and well seasoned make a hearty picnic sandwich filling for the men of the party.

TO-DAY'S MESSAGES.

UNEMPLOYMENT SITUATION IN BRITAIN GRAVE.

LONDON, July 26.

A grave view of the condition of British trade and industry is taken by a large industrial group of the Commons which last night sent a letter to Premier Baldwin outlining the plans of the group to meet the situation, observing that the prospects of a settlement of reparations and similar difficulties are too remote to appreciably affect the situation "which is due to political uncertainty, lack of confidence, war wastage of wealth and loss of purchasing power among our customers." The letter says it appears inevitable that unless very drastic measures are taken immediately a fourth winter of unemployment with not less than a million and half unemployed must occur and must disastrously affect the morale and efficiency of British workers. The letter adds that alarming indications of industrial unrest everywhere are apparent. The destructive force of unemployment on the Trades Unions which are the safeguard of industrial peace cannot be viewed with apprehension, and in the opinion of the Unions executive if the present rate of unemployment is maintained, it will involve within twelve months the disposal of the funds and members of the Unions. The group suggests a number of railway and an electrification project to absorb the unemployed these to include railway extensions, and development of canals, docks, and other works. The proposals of the group would involve an expenditure of fifty million pounds but the group considers that even if the Government should pay interest on this capital for several years it would be a very small sum in comparison with the present unemployment doles and similar relief payments.

BRITISH EMPIRE CONTAINS ONE THIRD OF WORLD'S FORESTS.

OTTAWA, July 26.

That one third of the forest of the world were in the British Empire was the statement made by Lord Lovat, Chairman of the British Empire Forestry Association, at its second convention here yesterday. The party of delegates leave to-morrow for its trip through Quebec and Maritime Provinces. The party will return to Ottawa on August 4, when business will be held during the week ending August 11. The party will leave on August 12 for an extensive tour of Ontario, the Western Provinces and British Columbia. Closing meetings will be held at Victoria on September 7. Addresses were given yesterday by representatives from nearly every British possession in the world.

KING'S YACHT RELOADED.

SOUTHEND-ON-SEA, July 26.

King George's yacht, Britannia, which ran aground on the shore of Surraby Sands, near the mouth of the Thames to-day, was floated to-night. The vessel was believed to be undamaged.

FRENCH AND BELGIANS IN AGREEMENT REGARDING BRITISH NOTE.

PARIS, July 26.

It was announced to-day that the French and Belgian Governments have reached entire agreement on all essential points respecting the British note. It was not made known whether there will be joint or separate reply.

ANCIENT DOCUMENTS ARRIVE IN NEW YORK.

NEW YORK, July 26.

It was announced yesterday that forty thousand volumes written by hand on parchment, some of them dating back to the year six hundred and forty A.D., have arrived from

abroad and are being unpacked in the library of the Jewish Theologic Seminary. The collection, presented by Dr. A. S. W. Rosenthal, was gathered up all over the world by Elkan Rathar Adler, famous globe trotter.

ANTHRACITE MINERS DEMANDS REJECTED.

ATLANTIC CITY, N.J. July 26.

The anthracite miners demand for complete recognition of their union and forestall a threatened strike on September 1. The rejection was not considered final, however, nor did it indicate that the wage negotiations would fail.

SYDNEY MINES RETURNING TO NORMAL CONDITION.

SYDNEY, July 26.

Men are being steadily hired for working the coal fields and there are few complaints of discrimination against strikers. Friday the whole district is expected to be producing again. Two thousand men were working at the steel plant and others were on the waiting list of employment.

ARMY LEAVE CANCELLED.

LONDON, July 26.

Despatches from Madrid quote Spanish newspapers as saying that all leave in Spanish army and all members now on leave are ordered to return at once. It is believed some action against Moorish tribesmen is contemplated.

Speedsters Beware?

Attention is again drawn to the reckless drivers of motor cars, who make it a practice of speeding their cars over Robinson's Hill and that vicinity. Pedestrians living in the locality, and others who feel inclined to go out that way for a walk have time and again had narrow escapes from these on-rushing machines. They have no regard whatever for the pedestrian who has an equal right to the road. The authorities are again asked to take steps in this matter and run the guilty law-breakers to earth. Cars are said to have travelled between 50 and 60 miles an hour over this section of the road. Where are the mounted police?

Bowring Park.

Despite the many other attractions a large number of citizens spent the afternoon yesterday at Bowring Park. The swimming pools were well patronized and on the whole excellent order prevailed. The shrubs and flowers now in full bloom add considerably to the attractions of the place, and many of the visitors were loud in their praise of the profusion of blooms due, no doubt, to the care of Superintendent Canning and his assistants. Unfortunately the request "citizens protect your property" is not being heeded in every instance. It was noticeable yesterday that three rose bushes in a newly planted bed had branches torn off; other flowering shrubs were also damaged and in one instance a child was observed sweeping the walk with a branch which it had secured—whilst its parents watched unmoved!

PAID OFFICIAL VISIT.

French Consul Beauregard paid an official visit to H.M.S. Calcutta at 10.30 a.m. to-day. On leaving for the shore he was given a salute of seven guns in honor of the occasion.

Police Seek Heirs.

Recently the police had a communication from the authorities in New York enquiring for the relatives of Harry Major, a native of St. John's who died in the Marine Hospital, Chelsea, in November, 1921. Major before he died, stated that he had a sister living here. The authorities in New York hold a sum of money belonging to the deceased and are anxious to find the heirs. Sergt. Symonds is looking after the matter here.

Petty Robberies.

TWO GROCERY STORES ENTERED.

On Monday night last some thieves entered Whitway's store on Charlton Street and rifled the till of some loose change besides taking several small articles from the shelves. The thief had little difficulty in effecting an entrance as the proprietor had left the store door on the latch.

A few nights ago the store of Mr. D. Furlong on New Gower Street was entered. The till was broken open and \$3.50 in change extracted. The thief also helped himself to a quantity of cigarettes and tobacco. Entrance was made by getting down the cellar shaft.

Shipping.

S.S. G. W. Lady's has entered at Bunyan's Cove to load pulp wood cut on Government account.

S.S. Bjornefjord and Olga, which are loading pit props at Bunyan's Cove, will finish to-day.

S.S. Merjam has sailed for Cardiff, from Woods' Island, taking 2,000 cords pit props.

Schr. Gordon Tibbo has entered at Grand Bank to load fish for Oporto.

S.S. Kriton has arrived at Port Union with a cargo of salt from Cadiz.

Will Your Brakes Stand This Test?

The following results were recently obtained in a series of trials to test the reliability of brakes on a motor car:—

Speed per hour	Dead stop
10 miles	7.5 ft.
20 "	30. "
30 "	67.5 ft.
40 "	120. "
50 "	187.5 ft.

More than 14,000 persons were killed in auto accidents in the United States last year. The number injured is estimated at 250,000. Insurance statistics show that the automobile was responsible for 67 per cent of all deaths by vehicles, more than four times the number caused by railroad trains and seven times the number caused by street cars.

And the blame for the majority of these deaths and injuries is laid to ineffective brakes. In fact, the menace of faulty brakes has become so serious that a number of the larger American cities have directed campaigns against them. Of 806 brakes tested during a recent "brake test week" at Trenton, N.J., 262 were found to be defective. The state registrar of Massachusetts announced he will revoke the licenses of motorists who drive with bad brakes. And in New York City, drivers are being fined every day because their brakes are not in condition.

Foot-Fashions

IN

Three EEE's Footwear.

So smart that they look like exclusive customs-made Shoes. So comfortable that they make the feet feel rested all the time they're being worn. So durable that they outlast other brands by many a long day. So reasonable in price that they're easily within reach of the most modest purse.

These are only 4 of the many out-standing features that make Three E-E-E's Footwear so eagerly sought by the lover of a really good shoe at a really reasonable figure.

You'll need a stylish shoe for the Regatta. You'll find it among the Three E-E-E's Summer Models.

Made by Archibald Bros., Harbor Grace.

Sounded Difficult.

Down in Texas the short cotton crop forced a large number of country negroes to the cities. One of them applied for a job at one of the large employment agencies.

"There's a job at the Eagle Laundry," said the man behind the desk. "Want it?"

The applicant shifted uneasily from one foot to the other.

"Tell you how it is, boss," he said finally. "I sure does want a job mighty bad, but de fact is, I ain't never washed a eagle."—The Open Road.

Speed Maniac.—"Water," said the tomer after waiting fifteen minutes for the soap.

"No, sir."

"Well you ought to go. You enjoy seeing the turtles whizz past?"

Its Mission.—"What's this Uncle?"

"That's a Zebra."

"What does it do?"

"Well, er—it's principally used to illustrate the letter Z."—The London Mail.

By EDGAR A. GURST.

THE SPEECH OF BOYHOOD.

Oh, I don't know how to say it, but the heart of me is glad
Whenever I can wander with a happy little lad,
And can listen to his chatter
Of the things which really matter;
The birds that nest above us and the clover scented breeze,
And the white clouds drifting by
On a perfect sea of sky,
And the difference in people and the difference in trees.

Oh, I know that I grow weary of the talk of busy men,
Of the fame and fortune waiting in the books which they shall pen,
Of the strife for conquests sordid
And the money to be hoarded,
Of the failures they have suffered and the victories they've won;
But I like to see the gladden
Of young eyes that while I listen
To the speech of glad amazement at the wonders God has done.

Man must work and dream and suffer, and must bend his back to care,
And a grown-up's speech is freighted with the burdens he must bear,
But a child, uncalled by duty,
Sees the glory and the beauty
Which are shining all round us, overhead and at our feet;
For a boy can still discover
In the mystery of clover
Something Age has lost forever in the tumult of the street.

Oh, I don't know how to say it, but it's good for me to hear
The eager conversation of a glad boy walking near,
For I learn in spite of sorrow
There are smiles for each tomorrow,
There are eyes to which the wonders of the world are ever new;
And by his rich voice I'm taken
Back to splendours I've forsaken,
To the things which really matter and the lasting joys and true.

Plans Prepared to Defend Free Trade.

BRITISH POLITICIANS TO FIGHT IMPERIAL PREFERENCE.

LONDON.—(Canadian Press Cable).—At a meeting yesterday of well known Liberal and Labor members of the House of Commons and a number of Peers held in the House of Commons, a decision was reached to form a parliamentary committee in defence of free trade.

Sir Alfred Mond said it was obvious that the position of free trade was likely to be challenged in the near future more seriously than in any years past.

Former Premier Asquith contended that genuine Imperial preference still would involve the taxation of food and if the fiscal issue was again put fairly and squarely before the electors they would return the same verdict as in 1906.

W. M. R. Fringis (Liberal) said there was a tendency at work again to raise further protectionist ends under the guise of Imperial Preference.

LONDON.—(Canadian Press Cable).—Sir John Brunner, ex-M.P., addressing a Liberal gathering at Southampton said he saw a danger in the forthcoming Imperial Conference as the protectionist party was working hard to introduce protection. The standard of living in the Dominions was higher than in Great Britain, he said, and it was no part of the duty of the British people to benefit the people of the Dominions at the expense of themselves.

Sir John expressed the fear that the government would endeavor to impose duties merely in order to benefit the Dominions.

Clamp Device Holds Fish Tail for Scaling.

For fishermen who balk at the chore of scaling the big beauties after they land them, Denis E. Bows, of Waseca, Minn., has invented a wire clamp device that holds the fish head and tail firmly while the scales are being removed.

The fish is placed on a long, wire frame, to which is attached a spring clamp that holds the tail. The head is imprisoned in two upward-curving pieces of metal.

Since the tail clamp is moved on a swivel-jointed link, the fish can be flopped over from one side to the other without giving it a chance to do the flopping itself.

Political Upset in Philippines.

MANILA, P.I.—Resignation of the Philippine cabinet was believed by political observers to mean the end of hope for independence of the island in the immediate future.

Whether non-co-operation hinted by those resigning would spread beyond Government circles was an interesting question.

The political upheaval is the greatest since American occupation of the islands and was due, according to the resigning cabinet members, to General Wood's alleged interference with civic matters.

In accepting the resignation of the eight Philippine ministers, Wood said he considered their action as a challenge of his authority as governor and hinted martial law may follow.

Apply daily after the bath.

One Race of Atlantic Salmon.

(Canadian Fisherman.)

As a result of the clearing away of the forest and the cultivating of land and consequent changes in water levels, and the volume, temperature and oxygenation of the rivers and more extensive fishing with nets by commercial fishermen in the tidal waters, the early run of salmon that ascend most of the rivers of the Atlantic Coast of the Canadian Maritime Provinces has greatly increased in numbers, as compared with the early days of the fisheries. By following intensive fish culture practices, the angling in the streams that have not become too greatly changed through the above mentioned agencies and the commercial fishing generally along the whole coast, is showing decided improvement from year to year. The falling off in the early spring run in some of the streams in comparison with the later run, which ascends with the rising water and falling temperature of the autumn, gave rise to the impression in some places that the early and late salmon were two distinct races.

Up to December 31, 1922, the recapitulation of salmon out of a total of five hundred and eighty-seven thousand five hundred and ninety-one that were tagged at all the ponds from 1923 to 1921 inclusive, when they were stripped and liberated, was reported to the Department.

These recaptures, while limited in number indicate that the spring and autumn fish do not comprise two races of salmon and that heredity is not the predominant influence in regard to the season or month at which salmon ascend our eastern rivers, but, on the contrary, autumn salmon, of any year are likely to be a spring or early summer fish when they again return to fresh water.

For the purpose of obtaining some definite information in this respect, as well as with regard to the life history of the salmon, a certain proportion of those that are retained in the hatchery ponds as brood stock, from which the supply of eggs is annually secured for the hatcheries, have been marked after they were stripped and before they were liberated each season from 1913 up to the present. The mark adopted is a numbered silver tag, which is attached with silver wires to the second and third ray of the dorsal fin. The tag lies closely against the fin, so that it offers as little opportunity for friction as possible when the fish is passing through the water. At the same time care must be taken that the wires are not so

tight as to cut into the skin and flesh of the fish and cause the tag to drop out.

Body of Whale

BUT EXTREMITIES OF A TURTLE.

A strange sea monster was cast upon the Chilean coast by the recent tidal waves, which appears to be a cross between a whale and a turtle. Fishermen at Lourin, 25 miles from Lima, reported a huge cutaneous scoudering in the shallow waters of the bay. Then they sent out word it was an unknown monster of the sea, and that they had killed it.

The director of the Natural History Museum of the University of San Marcos and the official taxidermist made a trip to Lourin for the purpose of studying and classifying the strange visitor. They found an animal with the body of a whale, but with a head and extremities resembling those of a turtle.

After examination they came to the conclusion that it belonged to the family of "Balaenidae," cetaceans, inhabiting the South Pacific waters. It is supposed that it was carried along by the Humboldt and thrown up on the beach by the tremendous surfs following the tidal waves of the Chilean earthquakes.

The specimen was brought to Lima for mounting, and will be preserved in the University museum.

China Awakening to Military Call.

STATISTICS SHOW \$80,000,000 SPENT ON ARMIES SINCE 1912.

LONDON, July 19.—(Star Special Cable by Staff Correspondent).—A notable illustration of the awakening of China as regards militarism is shown in the publication of a 100-page booklet in English by Lieut. General Chang Ying Fang, which has just reached London from Peking, in which he demands the erection of a control board and control of military expenditures taken out of the hands of military officers and removing the incentive to expand the forces in order to extend the opportunities for grafting.

He says: "The first step towards reducing the Chinese armies under the Republic must be a correct census of the numbers, second, the disarmament of the weaklings and the retention of the physically strong men thereby lessening the burden of taxation of the civilian population."
The booklet shows that the Chinese Republic spent over \$80,000,000 on its army since 1912.

"Why Announce Your Marriage?"

DELIGHTFUL ENTERTAINMENT AT NICKEL-TWO-NIGHT.

One of the most interesting photographs you could possibly witness is the film entitled "Why Announce Your Marriage?" featuring Elaine Hammerstein, which is the main attraction at the Nickel commencing tonight. The following is the story:

Arline Mayfair, a successful illustrator, is in love with Jimmy Winthrop, but does not wish to marry him as she wishes to establish a reputation as Arline Mayfair and not as Jimmy Winthrop's wife. While aiding another young couple to elope, Arline and Jimmy decide to be married secretly. Complications soon begin to ensue, arising from a visit to Arline's studio where Jimmy's hat, cigars and shoes are discovered. This starts gossip and the friends of the young couple decide to visit Jimmy and advise him of the situation. They find him at home much embarrassed. Arline decides to go away to the country. Finally Jimmy follows her to her cottage. A burglar scare at the nearby hotel results in the burglar taking refuge in Arline's house, where the crowd find Arline and Jim on deshabille. Finally everything is explained satisfactorily when the gentleman drunk, who has chased the burglar, discovers the marriage license.

THE UPKEEP OF LUXURIES.

I am appalled at the upkeep of luxuries. Not only do things cost more these days, but it costs more to keep them in the state of up-to-dateness which we have gradually become accustomed to regard as necessary.

Suppose your mother had a real seal coat. She probably paid anywhere from \$200 to \$500 for it and wore it at least ten years without alteration, and was regarded as excellently well dressed. When she did finally have it fixed, it cost her only a few dollars.

But what happens to-day? A friend of mine had a Hudson seal coat given her three years ago. It had been worn only a couple of years before it came to her and she was delighted with the gift. The first year, however, it developed a few rips and she had to have these fixed and the lining partly renovated. That cost her about \$38. This year there are some worn places in the fur and it will have to be relined. She went to the furrier and found that it would cost her \$125. She is a woman of very moderate means and it looks as if the upkeep of her gift would be too much for her.

Not Only Children and Automobiles. Luxuries call for luxuries. They do more than that. They beg for them. Inevitably, they demand them. And once you get involved, you will find yourself slaving away your life to answer their demands, or fretting it away because of your inability to do so.

I know of no greater service any wife can do her husband than to try to keep free from the enslavement of imperious luxuries. Two thousand years ago a very wise philosopher found need to warn a people who lived a comparatively simple existence, that a man's life does not consist of the number of things he possesses. What would he have thought if he could have seen our modern life with its madness for things and yet more and costlier things.

World's Largest Electric Shovel.

Twelve tons of earth with one bite! No, it is not a weird prehistoric monster that has suddenly come to life again. It is a mechanical monster of human make. The world's largest electric shovel, weighing 365 tons, has just gone into action in the iron ore lands of Pennsylvania. It excavates at one scoop as much earth as would fill three five-ton trucks—eight cubic yards. It could carry the entire winter's coal supply of most American families, and in seven bites it could fill the average living room from floor to ceiling. But gigantic as it is, it is absolutely under the control of one man.

Four men could stand abreast in the mouth of its teeth-edged dipper, which is seven feet high. As it eats its way through an embankment, it leaves a vast ditch with sloping sides, 206 feet across the top, 1120 feet across the bottom and 65 feet high—big enough to reach to the fifth floor of the ordinary modern office building. Yet notwithstanding its giant-like power, the huge shovel takes only from 40 to 45 seconds to complete one excavation.

With one hand the operator throws a lever that hoists the boom; with the other he operates a lever that drives the dipper into the bank; and with his feet he works the pedals which swing the boom in one direction or the other.

The utmost in Taxi Service Phone 2016. June 21, 1923.

only the first cost you have to consider, it's the upkeep."

Was It A Bargain?

I have some friends who bought an expensive house at a bargain. At least, they thought it was a bargain. I am afraid it was not. They are about to make a few alterations on it, including an extra bathroom. When the bids come in for the contractors they were much larger than they had hoped and the bathroom may have to be given up.

They were showing me the specifications and I saw that the price for the bathroom fixtures were tremendous. "But I know you can get good looking things cheaper than that," I said. "Oh yes, I suppose you could, but you know this is a beautifully built house and I wouldn't want to put anything but the 'best' in," she said.

These people have a large family. They really would get an enormous amount of comfort out of that bath even if they did not have the most expensive pedestal bowl and the finest sunken porcelain tub. But they are pledged by the expensiveness of the house to put nothing but expensive things into it. So they will go without a comfort because they cannot have a luxury. That's another example of the cost of upkeep of a luxury.

You Become Their Slave.

Luxuries call for luxuries. They do more than that. They beg for them. Inevitably, they demand them. And once you get involved, you will find yourself slaving away your life to answer their demands, or fretting it away because of your inability to do so.

I know of no greater service any wife can do her husband than to try to keep free from the enslavement of imperious luxuries. Two thousand years ago a very wise philosopher found need to warn a people who lived a comparatively simple existence, that a man's life does not consist of the number of things he possesses. What would he have thought if he could have seen our modern life with its madness for things and yet more and costlier things.

YES! SUCH IS SUCH.

Some one makes a blunder And the manager get the blame. The manager calls the department head

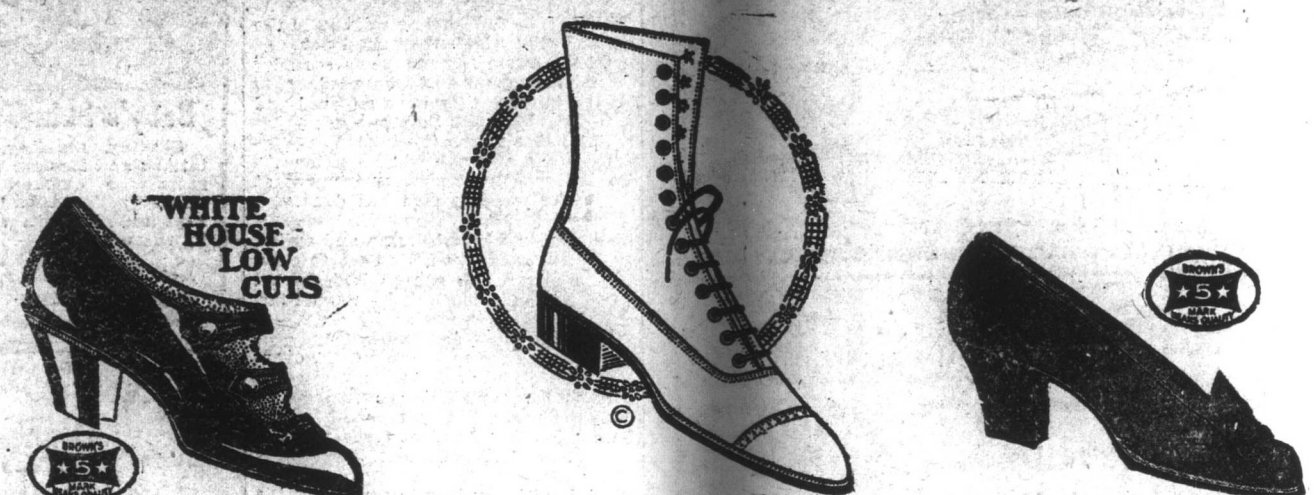

Who gives his assistant Cain? The assistant blows the clerk up. And the clerk, as is his way, Goes down and blames the office boy And the kid, he blames the day. Here we go round a mulberry bush O life is hard and long! The salesman landed the order. So nobody could have been wrong.

The manager went to the banker To get himself a loan. He wanted to buy a motor car, And had to mortgage his home. His wife smashed up the lizzy And nearly broke her back; The manager went to the office And gave a girl the sack. Yo-ho my lady and lassies A merry time have we! We know that such things happen. To folks like you and me.—Goblin.

Odd Superstitions of Card Players.

"Most card players," says A. E. Manning Foster, in "The Light Side of Auction Bridge," "are superstitious, although some pretend they are not. I have often watched with amusement the behavior of hard-headed, common-sense men who pride themselves on their freedom from any trace of superstition, and have frequently caught them out.

"One, who is particularly contemptuous of other people's fancies, invariably moves, if he has the chance, into the 'winning seats.' He will not admit that this is a superstitious practice. 'I follow the run of the cards,' he says. And yet that very belief is itself a superstition, since it is based upon no ascertained or proven fact. Of course there are 'runs' of the cards in certain seats sometimes but the wins occur just as often intermitently. But to argue that it is not superstition is ridiculous.

"I prefer the people who are frank about the matter. Even the most absurd superstitions add color and interest to life. A certain man entertains the idea that it is unlucky to accept anything from an adversary. He will not take a cigarette, match, or a drink from an opponent, although he is quite ready to do so from his partner.

"I know I shan't win this afternoon, said a player quite seriously. 'I have on my unlucky suit. I never win in it.' And sure enough he didn't.

How to Save Woodwork FROM SCORCHING BEHIND STOVE

Woodwork behind a stove or range can be saved from scorching by painting the wood with liquid asbestos paint, which can be mixed at home this way:
Three parts gumlac, four parts lum borate, seven parts powdered asbestos, 20 parts water. Heat water, add the gumlac and borate when all have been dissolved and the asbestos.

Piles Drive Themselves by Water Pressure.

A circular piece of cheesecloth with a narrow elastic run through the hem makes an excellent dry cover for the bowl of the cream separator.

Compelled to drive 384 huge concrete piles through nearly 60 feet of muck and mud, engineers constructing a 500 foot bridge over the Ohio canal connecting Akron, O., with Kenmare, a suburb, succeeded in forcing the piles to drive themselves hydraulically through the mud.

The piles, were made octagonal in shape with a hollow core of sheet steel. A three inch pipe was cast through the bulkhead of the pile into the core, and at the lower end of this pipe, in the tapering nose of the pile was placed a nozzle.

A portable crane swings the piles into position to be sunk. When the point of the pile was in place hydraulic pressure of 100 pounds was forced through the core, issuing through the nozzle. This pressure combined with the weight of the pile was sufficient to sink it.

Nothing tastes better to the hungry camper or picnicer than a fried egg and bacon sandwich. The bacon can be fried first, and the egg cooked in the fat. Either toast or plain bread can be used.

Why Flowers Have Petals.

The following charming account of why the flowers wear Petal Dresses by Dorothy Arno Baldwin, we run in the American Forestry Magazine (Washington). It is poetic, imaginative, and also solves the long-standing problem of the petals, which we all have wondered about in our early childhood.

"Something must be done or the flower people will die!"

It was Rose who spoke. All the flower people were gathered around her, looking very sad. You never would have guessed that who they were for not one of them had a petal dress and, what is more, they never had any. Even the Rose wasn't dressed more than a stem and a few leaves, and at the top of the stem a pair of stamens to hold her pollen, and a pistil with tiny rooms inside in which to make seeds.

There was a long silence after the Rose had spoken, and just as it began to seem as if nobody would ever speak again, Mother Nature happened along. She had a way of appearing at just the right moment. Little Flower People were all looking at her. Then she stopped. "Dear me! What can make you all look so sad this fine summer morning?"

"We have no pollen to make you sad," said Rose. "For scarcely one of us has any pollen left. The few that did sprout were weak and the new plants aren't doing well at all. If things keep on this way, there won't be any flower people pretty soon."

"That can be the matter," said

Mother Nature. "Haven't you all had plenty of nice fresh pollen, and hasn't it been placed so it will fall in just the right spot to reach down into the seed chambers and help make your seeds?"

"Yes, we've always had plenty of pollen, and it always falls in the right place, but lately a good deal has been lazy and doesn't reach down far enough to find the seedroom. Maybe that's where the trouble is."

"Let's see now!" said Mother Nature, briskly, to the Rose. "Just shake a little pollen down onto your stigma. Why, you haven't any pollen left!"

"I've used it all up," said the Rose. "And not a single grain has gone to work. My sister still has a little, though. Perhaps she'll lend me some."

"I'm sure she will," said Mother Nature, and taking a few grains of pollen from the stamens of the sister Rose, she sprinkled it on the stigma of the other.

"There! That's good pollen, and I don't see any reason why it shouldn't make seeds for you. Now you just sit quiet here for a while and see if anything happens while I set the winds to work."

While Mother Nature was calling the winds and giving them her orders for the day, the little Flower People made a ring around the Rose and waited to see if anything would happen. They could scarcely breathe, they were so excited. The Rose was excited, too, but pretty soon she began to smile, oh, ever so faintly! Then her smile grew a little brighter and a little brighter, and she said: "I think"—then she stopped.

"Oh, what!" cried the Flower People all together. "Is the pollen beginning to work for you?"

"Yes! Yes! It is!" cried the Rose.

"It's stretching out tiny fingers and reaching down, down toward my seed-room! It has found the door! Now it's pushing its way in!"

"Oh, Mother Nature! Mother Nature! The pollen has begun to work for me!"

Mother Nature sent the winds scurrying and hurried back to her little Flower People, who were all on tiptoe with excitement.

"Splendid!" said Mother Nature. Then she wrinkled her forehead and thought hard.

"Yes, it must be," she said, after a moment. "That has been the trouble with all of you. I'm sure. You all need pollen from each other. If your own pollen won't work for you, somebody else's pollen will."

Then Mother Nature wrinkled her forehead again.

"How am I ever going to find time to carry pollen back and forth for all of you? I simply can't do it. Why, there are millions of you everywhere!"

"Couldn't the Bees and the Butterflies and maybe the Humming-birds and some of the little Creeping Things help?" suggested the Rose. "There are millions of them, too."

"That's so," said Mother Nature. "They shall help. But you're all such tiny little things that they'll never be able to see you. I'll have to make some bright-colored dresses for you, so they will know where to find you."

Mother Nature hurried to her store-room, and came back with her arms full of petal cloth, softer than silk. Some of it was red and some was blue, some was yellow and some was purple, and there were pink, and orange, and all sorts of other shades besides. With her scissors, Mother Nature cut out millions of petal dresses and fitted them to the flowers.

When the Flower People were all dressed, Mother Nature took the honey jar out of her pantry and put a drop of sweet-smelling honey in the center of almost every flower.

"That's to be a reward for the Insect People," said Mother Nature. "They like sweet things."

No sooner was the last drop of honey placed in the last blossom than there was a tremendous busting, and the air was filled with Bees and Butterflies and Humming-birds, and quantities of little Creeping Things came crawling from every direction to see what all these bright, sweet-scented things were.

Such excitement as there was! Each one of the Flying and Creeping Things chose the flower he liked best or thought the prettiest, and when they found that delicious honey hidden away inside, they worked with a will, carrying pollen from flower to flower. The next thing a whole army of seeds sprouted and grew into fine, strong plants, and ever since then the Flower People have worn gay petal dresses, so that the Flying and Creeping Things won't forget to visit them.

Five or seven passenger Taxi. Phone 2016.

For a very tasty conserve use one-half pound of peach pulp, the same weight of diced cantaloupe, three-quarters of a pound of sugar, the juice and grated rind of a lemon, and one-half cupful of chopped nut meats.

New Binocular Magnifying Glass Fits Head.

A binocular magnifying glass, which attaches to a bandeau fastened around the head, has been invented by Dr. J. Molins, of France, to take the place of the reflectors with holes in the centres now used by physicians.

The instrument leaves both hands of the user free. It is equipped with a reflector that throws a beam of light on the surface under observation while the glass magnifies it from six to 10 times, according to the distance from the object.

Two eye-pieces at the rear can be adjusted to the eyes of the observer. A single telescopic tube in front receives rays from the object being examined. These rays are split by prisms so that each eye views the same image. Screws at the end of the box are used to adjust lenses and prisms, after which the hands are left free.

Sailboats to Race Across Atlantic.

Two 40-foot boats, identical as to hull and of the same sail area, but rigged respectively as an American schooner and a British ketch, will sail soon from New York for Cowes, Isle of Wight, in what is probably the most interesting international race ever arranged. The object of this trans-Atlantic contest is to test for the first time the relative merits of typically American and typically British rigs for pleasure craft.

The contesting skippers will be William Washburn Nutting, of New York, ex-Commodore of the Cruising Club of America, and the Duke of Leinster, noted British sportsman. Mr. Nutting will be remembered for his feat of sailing his 45-foot, ketch-rigged yacht, Typhoon, from Nova Scotia to Cowes, England, and back to New York via Spain and the Azores in 1920.

The challenge for the race was issued by Mr. Nutting last summer. Each boat will be 40 feet overall, and have 32 feet, 6 inches, waterline length, 11 feet, 6 inches beam and a draft of 7 feet. The American schooner is to have a jib-headed or leg o' mutton mainsail, while both the mainsail and mizzen of the Duke of Leinster's ketch are to be of this type; that is, without the gaff in the head of the sail.

Each boat will have an auxiliary motor, to be used during calm weather. The American boat has a 15 horsepower motor and the British motor is rated at 20 horsepower.

Largest "Upside Down" Telescope.

The perfect operation of the largest "upside down" telescope in the world was reported recently by Dr. Frank Schlesinger, director of Yale University Observatory, New Haven, Conn. The telescope is employed to determine the light-curves of faint, variable stars.

Advantages of the novel mechanism are convenience in operation and greatly reduced cost as compared with the telescope mounted in the usual way. In addition, it keeps the image stationary both in position and in orientation.

The telescope being used at Yale is described by Doctor Schlesinger as a "Loomis 'codest' telescope" because of its ability to keep the image stationary. It consists of a 15-inch photographic objective and ten inch visual objective lens both of 50 feet focal length mounted in the same tube which is pointed downward. Images are "fed" into the telescope by means of a plane mirror thirty inches in diameter at the lower end of the tube. This mirror is rotated by clockwork at a rate of 280 degrees every 24 hours and objects are kept stationary on the plate by rotating the latter at the same rate.

Images from the lenses are formed in an observation room at the top of a massive tower 60 feet high. Electrical connections permit the observer to manipulate the telescope from the observing room.

What Do You Think of a Fluid

- That will draw roaches and ants out of every hole, crack, or crevice before killing them and not poison food?
- That will kill bugs instantly and not leave an unpleasant odor?
- That will knock flies off the wall and not harm paint or paper?
- That will keep the bedroom, kitchen, or verandah clear of flies, mosquitoes, etc., for several hours after a few sprays?
- That will take fleas off a dog and not harm the dog?
- That will destroy chicken lice without any injury to your stock?
- That applied in small quantities to the exposed parts of the body will insure you from Mosquito bites?
- That as a general disinfectant is stronger than the ordinary carbolic solution.

THAT FLUID IS SAN-O-SPRAY.

No insect can live where San-O-Spray is used. Yet San-O-Spray is non-poisonous to human beings and can be used with perfect safety in pantry, kitchen, dining room, and cellars, moreover San-O-Spray has an agreeable and delightful odor, removing all fetid or unpleasant odors. In addition San-O-Spray is a disinfectant and germicide. Keeps the home sanitary and free from infectious diseases.

Ellis & Co., Limited.

June 4, 1928

Household Notes.

- To clean bed springs easily, place them in the sun on a hot day, wash thoroughly with the hose, move to a dry place in the sun, and allow to dry.
- Tomato and apple jelly is quite nice. Use 1 cupful of apple juice to 1 of strained tomato juice, the juice of 4 lemons and 2-3 as much sugar as juice.
- Many delicious ingredients can be used in plum conserve, such as the juice and grated rind of lemons or oranges, seeded raisins and chopped nut meats.
- Bread for sandwiches can be sliced more evenly and thinly if all the crust of the loaf is first cut off in slices. Dry these crusts in the oven for crispness.
- For a cooling chocolate milk shake use two tablespoons crushed ice, two of chocolate sirup, and two-thirds cup of milk. Stir and top with whipped cream.

A Midsummer Luxury.

One of the grandest luxuries imaginable, is close association with the scent of flowers. There is a peculiar, fascinating appeal in a good perfume, which instantly creates delight.

It is not always possible to be closely associated with real flowers, but the odor of Richard Hudnut's THREE FLOWERS PERFUME is as fragrant and beautiful as the natural flowers—for this perfume is made from real choice flowers gathered in the world's finest and most select gardens.

THREE FLOWERS PERFUME is present to a pleasing degree in the Face Powder, Talcum and Vanishing Cream bearing this name, and all are delightful toilet aids that any lady will find great pleasure in using.

We are now well stocked with THREE FLOWERS toilet goods of all descriptions, and will be pleased to serve you.

Wallace Silverwear.

Is your Table Silver as good to-day as when you bought it?

Have you noticed that at the parts most exposed to wear, the plate has become worn?

Do you think this condition of your Silver is in keeping with your idea of a well appointed table?

Then why not, when you decide on replacing your old ware, give place to it with the "Wallace" Brand, the Silver that refuses to wear and is guaranteed without time limit.

Start with the Tea Spoons and gradually complete your Set with the one pattern—there are several for you to choose from and the price is very moderate.

Tea Spoons cost \$3.00 for a Dozen.
