THIRTEENTH YEAR.

The Toronto World.

SATURDAY MORNING, MAY 27 1893—SIX PAGES.

AMERICA RECEIVES A REPLY

FROM SIR CHARLES RUSSELL THAT GIVES ITS COUNSEL A SURPRISE.

The Contentions Made that Britain's Jurisdiction Over the Newfoundland Fisheries Banks Sanctioned the U.S. Claim to Exclusive Sealing Rights in Behring Sea.

PARIS, May 26.—In his argument before the Behring Sea tribunal of arbitration to-day Sir Charles Russell disputed the American contention that the Newfoundland fishery right claimed under the treaty of 1783 sanctioned American claims to the sealing rights of seal catching in Behring Sea.

Sir Charles argued that the seizures of vessels in the open sea were unjustifiable for any reason except piracy and that the right of visitation and search of vessels upon the open sea was a general and universal right of all nations as a belligerent or as conqueror by treaty.

France and the United States had always staunchly denied the right of visitation or search agreement for the suppression of the slave trade and had never allowed the exercise of such power by others.

This right, which Sir Charles said, Great Britain had always denied, had been conceded by her France and Spain. And if Great Britain possessed this right she had never exercised it against other powers. It had not been exercised against the United States after the recognition of their independence and an attempt to do so had been specifically denounced by Lord Bathurst in 1812.

ACCUSED OF KUZNICK RIOT

By Ordering Down Union Jacks from Belfast Hotels.

BELFAST, May 26.—Orange newspapers reported that the police ordered the removal of Union Jacks from the hotels in Belfast yesterday, as they ravingly accuse Chief Justice Morris of having used his power of exercising their powers of removal of the like kind to incite riot and thus give the Government an opportunity to point out the disorder on the part of the Unionists.

FALL OF AN AERONAUT.

Her Parachute Collapsed Fifty Feet from the Ground.

DUBLIN, May 26.—Maud Brooks, a professional actress, an asset from a summer garden near this city to-day.

At an altitude of 900 feet the cord died away.

The balloon fell rapidly. Five hundred feet from the ground the woman opened the parachute and cleared the balloon.

About 500 feet from the ground the parachute collapsed. The woman struck the ground and her head, arms and legs and it is thought her spine was injured severely.

The attending physicians say she may recover.

ANOTHER AUSTRALIAN CRASH.

The Mercantile Trusts Co. of Melbourne goes to the Wall.

MELBOURNE, May 26.—The Mercantile Financial Trusts and Agency Company has suspended payment.

The nominal capital of the concern exceeds \$20,000,000 and the British deposits at the institution amount to \$1,500,000.

The Miners' Conference Closed.

BIRMINGHAM, May 26.—The miners' international conference session to-day Germany provided the authorities do not interfere to prevent it. Should the German authorities forbid a meeting in that country the conference will be held in England.

Queen Wilhelmina's Health.

Viscount Coburg, a despatch from the Queen says that Queen Wilhelmina is rapidly developing symptoms of consumption and that the Queen Regent who is now in the country with her and the royal physicians fear the worst. In case of her death the Nassau Orange dynasty would become extinct.

A \$5,000 STEAL.

Gullible People in Massachusetts Swindled by Endowment Orders.

BOSTON, May 26.—Insurance Commissioner Merrill, of the State of Massachusetts, and the entire insurance in force at the end of last year by all companies in the state was \$4,077,168,144, and the number of policies the commissioner says.

"With the passage of the act to wind up the affairs of the eight remaining Massachusetts life insurance orders the last official in this extraordinary case will be written. During this time the assets of 50 Massachusetts corporations of this class gathered a membership of 365,000 and collected from the certificate-holders over \$1,500,000."

"From this sum less than 9 per cent. of the membership received in payment of the earlier matured certificates over \$7,000,000 was \$2,000,000 was paid in claims for sick pay.

"Nearly \$4,000,000—one-half undividedly if not undisguisedly, a steal—went into the pockets of the promoters and officers as 'expenses,' losses and the like, amounting to \$2,500,000."

"The miners' conference did not concede.

TOODYNG to a Royal Visitor.

NEW YORK, May 26.—The Infants' Hospital will be open to the public to-morrow morning at 10 o'clock. The Infants' Hospital, located at 112 Bay-street, is to be open to the public to-morrow morning at 10 o'clock.

Toothache—When suffering from toothache try Gibbs' Toothache Gum.

The Punishment Fine the Crime.

BIRMINGHAM, Ala., May 26.—Robert Alexander, Louis and Howard Webb, negroes, were condemned at Juges, Ala., to-day for criminal assault. Mrs. Cox, a farmer's wife. This is the first legal hanging for this offence in the state.

Adam's Tutti Frutti Gum has been awarded the sole privilege of being sold at the World's Fair.

A STRIKE WILL RESULT.

15 Hours Pay for 54 Hours' Work.

LOUISVILLE, May 26.—At a meeting of the workmen in L. T. Thompson's Electric Works, held last night, it was resolved to demand 54 hours a week with 54 hours pay. If the demands are not conceded a general strike, involving 4000 men will probably be ordered.

TODAYING to a Royal Visitor.

NEW YORK, May 26.—The Infants' Hospital will be open to the public to-morrow morning at 10 o'clock.

Toothache—When suffering from toothache try Gibbs' Toothache Gum.

White Girl Marries an Indian.

SISTERSON, S.D., May 26.—Miss Cynthia Rockwell, a teacher, and Richard King, a full-blooded Indian, were married to-day.

Miss Rockwell came from Washington where it is said she once reigned as a belle. King is a widower, speaks tolerably good English, and is something of a ladies' man.

"Clean Havana Cigars."

La Cadenas" and "La Flora." In fact upon having these brands.

Microbe Killer is no experiment, it has always been proven it a cure.

North American Life.

LANSING, Mich., May 26.—The company's jury in the case of George Ferro of Oberon, who died last week, has rendered a verdict that deceased came to his death from arsenical poison administered by his mother, Mrs. Frank Ferre.

THE NICARAGUA REVOLUTION.

—President Sacasa to Reconcile in Favor of a Rebel Leader.

NEW YORK, May 26.—The Herald's special from San Juan del Sur says: "The battle of Managua a peace commission returned to Managua and announced that they had agreed upon a plan to be submitted. The terms have been kept secret, the most important points have been learned."

President Sacasa will resign in favor of some of the revolutionary leaders to be selected by the provisional government to be seated, who will immediately assume the office of president of the republic.

Notwithstanding the agreement of the revolutionaries, the war has been declared. There were another battle yesterday.

The insurgents, with 500 well-armed men, under Generals Alegria and Soto, took Jiboa by assault.

The Government forces sent 1500 men to repel the rebels, but they were repelled at the point of the bayonet and the victorious revolutionaries then rushed into the town. In this fight 200 rifles, 50 boxes of cartridges, and several prisoners were captured.

A provisional government has been formed by the revolutionaries, and they have an army.

After their defeat near Managua the Government forces retired to Tipitapa, where the remnant of the army gathered on the plaza.

Aluminum has been discovered.

Duluth has 20,000 trained nurses.
A London house is papered with postage stamps.

Men's corsets find lively sale in England.

Some bricks are made of plaster of paris and coke.

Music skin is the fabric in a Russian coat.

An ocean racer uses \$18,000 in coal each trip.

It costs 2¢ cents to put up a can of tortilla.

Queen Victoria's crown is worth \$1,200,000.

England's Attorney General gets \$35,000 a year.

Melbourne has built the first Australian locomotive.

The tail of the beaver gave the hint for the tail of the man.

In small towns in Germany only chimney sweeps wear plug hats.

There is a railroad in Peru that is 15,635 feet above the level of the sea.

The highest church steeple in the world is that of the Cathedral of Antwerp, 476 feet.

Sixteen ounces of gold are sufficient to guild a wire that would encircle the earth.

Twenty-five per cent. of all the champagne made is lost by the bursting of bottles.

It is said that the King of Italy, only takes one meal a day.

It is estimated that there were 19,573 paper publishers in the United States and Canada in 1892.

Texas permits high-toned convicts to hire themselves to work for them in the convict camps.

A dollar loaned for 100 years and compounded at 24 per cent. will amount in that time to \$1,000,000.

The Great Eastern was the largest ship ever built—630 feet long, 88 broad, 60 deep and 29,027 tons burden.

The largest tomb in the world is the Pyramid of Cheops—461 feet high and covering 13 acres of ground.

The care of the forests in Germany supports 200,000 families and involves 12,000,000 men.

In 1790 the first clocks were introduced, to be placed in churches, the hour glass having been previously used.

Gold can be beaten 1200 times thinner than ordinary printing paper; one ounce can be made to cover 1400 square feet.

The highest railroad in the United States is the Denver and Rio Grande, at Marshall Pass—10,855 feet above the sea.

The largest church in the world is St. Peter's in Rome ; the smallest a church 10 feet square, in the Isle of Man.

A newspaper may be sent from any part of the United States to Stanley Hall, 1000 miles beyond Stanley Hall, for 4 cents.

Geologists consider kerogen to be animal oil. Hence what we burn in lamps is the remains of long extinct monsters of the earth.

The largest Gothic church in the world is Cologne Cathedral. Its foundation stones were laid 1245 and the edifice was completed in 1880.

The most expensive funerary skin of the black fox of Siberia. These animals are scarce and hard to kill, and a single pelt sells for about \$1000.

The largest cut stones in the world are in the Temple of the Sun at Baalbek. Many are more than 60 feet long, 30 feet broad and of unknown depth.

San Francisco is second to every one to every 110 persons, and New Orleans one to every 121 persons.

The largest bell in the world is in the Kremlin, Moscow. Its height is 21 feet, 4 inches. Its circumference is 67 feet, 10 inches. Its weight is estimated at 440,723 pounds.

It will scarcely be believed that wheat is sold in the United Kingdom under nearly 2000 different systems of weight. There is almost as much diversity in regard to barley and oats.

It is said to cost less to send the product of an acre of wheat from the State of Dakota to England than it does to manufacture it in England, so that it can grow where it will.

According to its accredited representative, the Sole Leather Trust stands for not less than \$175,000,000 of capital, and controls every avenue through which tanners derive their profits.

The present year is the centennial of the cotton gin. Eli Whitney invented it in 1793. It is said to have done more toward the making of the South than any other one thing except the cotton.

The Duke of Bassano, who was Grand Chamberlain to Queen Victoria III., and followed the Empress into exile, is still living, aged nearly 90, and one of the most devoted followers of ex-Emperor Eugene.

Biennials, according to an interview, think that the anti-Semitic troubles will gradually be settled by the marriage of Jews and Gentiles. At the rate at which such inter-marriages occur this solution will be a gradual one.

The picture of the Panama Icarians is described as a pitiful one. Mr. George de Leesups spends much of his time sitting in a chair with his head buried in his hands. Mr. Blodget presents symptoms of insanity. Mr. Bullock seems to be rapidly becoming an old man.

Rober Dover, the famous Swiss sculptor, died suddenly in Berlin a few days ago. He had been in the German capital for treatment a short time, and had hoped to complete a white-haired old lady upon her beauty.

"Oh," said he, "I fear you flatter me. You call me pretty?" Why, I am an old woman, my hair is white, and, though I am not very high, I am not very low.

"A wrinkle?" he replied. "Never, madame; that is not a wrinkle, but a smile that has drifted from its moorings."

Elegant Donotus Vases.

The Queen's Hotel will raise its charges 50¢ per person after June 1st. The reasons for the increase are the rapid increase of visitors and the fact that both provisions and wages are very much higher at present than they have been for many seasons.

Inflammation of the Eyes Cure.

Mr. Jacob D. Miller, Newbury, writes: "I was troubled with inflammation of the eyes, so that I could not work. I took several bottles of Novartis Ointment & Vegetable Distiller, and it gives me great pleasure to inform you that it cured me of my affliction. It is an excellent medicine for Conjurors."

WAKEFULNESS AT NIGHT.
Natural Remedies are safe.

"Warmer Against 'Writhers'—Only
Natural Remedies are safe.
Take this little white powder; it will
give you a night's delightful sleep." It says
such a pensive friend, and you look
soothly and so longingly at the folded
paper. What? you will say, "it is
for possibility. It is so hard to lie
awake night after night, hearing the
clocks strike one, two, three, four, know
in full well that you will be perpetually
sleep when the long cold spell has its
teeth pealing through the house, and
realizing, too, that the next day's duties
will confront you as an armed battalion,
when you have neither courage nor
strength to face them.

But it is a mistake, believe me, to take
the sleeping powder, unless, indeed, you
are really, absolutely, and entirely
tired out. In this way a crutch, and the
use of a crutch is always the
acknowledgment of infirmity. Furthermore,
it is not good to give a crutch to a boy
to sit, or to prove troubous to him
if he is to be lost when most needed, and
only a cripple, never a strong man,

In this whole matter of insomnia the
wise way is to take the wakeful friend
by the hand, and gently lead him to bed.
The marchioness, however, likes his bed, and
however subtle is it in this way a crutch,
and the use of a crutch is always the
acknowledgment of infirmity. Furthermore,

Mr. Meredith's Opportunity.

Good generalship will displace Sir Oliver Mowat from the supremacy he has so long enjoyed in provincial politics. The weapons by which his defeat may be accomplished are already fashioned. What we want is a fighter to use them. We want a bold, intrepid general to lead the forces, a general with fire in his eye and determination in his countenance. Let him gird on his armor, let him use the weapons at his command and victory is his.

The Conservatives are in a majority in the Province of Ontario, and the administration of provincial affairs ought naturally to pass into their hands. This is the first point that strikes one when looking at the situation. Mr. Meredith must adopt a policy that will appeal to Conservatives in provincial politics as forcibly as that of Sir John Macdonald appealed to them in Dominion politics. Such a policy he can announce to-morrow if he chooses, for such a policy exists-to-day.

The Government ought to be defeated because their administration of our affairs is inefficient, expensive and corrupt. The methods pursued by the Government in terrorizing and intimidating those engaged in the liquor traffic in Ontario are scandalous. Such tyranny is exercised over liquor-dealers in regard to political matters that they dare not call their souls their own. The machinery of the License Department is used as a means for keeping the Grits in power. This ought to prove an effective weapon in the hands of a good fighter.

The Education Department is thoroughly inefficient. Great dissatisfaction has been expressed by the teaching profession at the way things are managed, or rather mismanaged, in this branch of the service. The department is loaded up with fossils whose methods might have passed muster twenty years ago, but to-day the fossils are away behind in the procession.

The Mowat Government is by no means the cleanly thing they would have the people imagine. Sir Oliver has traded too long on the purity of his administration. His administration has been characterized by cold-blooded jobbery as one sees in connection with politics anywhere. How many instances of the Noxon kind have we witnessed? Investigation has now disclosed the fact that the appointment of Mr. Noxon was not made to improve the public service, but to give Mr. Noxon a job. Sir Oliver first tried to hoist him into the shriveling of Oxford, but, failing in this scheme, he dropped him down into the Central Prison, and once having landed him there the Premier's henchmen invent all sorts of excuses for his presence in the institution. The Noxon trick is one that the public is quite familiar with. Existing offices not being sufficient to satisfy the demands of the heelers, new ones have to be created. Hence the double shafact, the double registrar trick, the double county attorney business and so on.

Instead of using their position to develop the material resources of the province Sir Oliver and his lieutenants have bent all their energies in working the Governmental machinery of the province to entrench themselves in office. Powers that should remain with the municipalities have been absorbed by the Government to strengthen their position. As mentioned above, the License Department has been converted into a powerful lever for controlling votes and returning Grit partisans. Sir Oliver's ploy is a mere trick. He knows very well no practical result will follow the taking of this vote, no matter what the vote may be. Sir Oliver says he has not the power to enforce prohibition, although he is in favor of it. But he has the power to reduce the number of licensed taverns. In shops 50 to 75 per cent. Such a reduction would have been quite radical enough for the present prohibition sentiment of the country. But did Sir Oliver attempt to do what was practical in this matter? Oh, no, he shirks that, and begins making quixotic efforts to effect the impossible and impracticable.

So much for Sir Oliver's administrative record. And as to his constructive policy very little can be said in its praise. What little he has done to encourage agriculture has been forced upon him. As to our mining resources, he has failed to inaugurate any workable policy for their development. Sir Oliver is a genuine Tory of the old school. He originates nothing and adopts nothing unless under constant pressure from without. He is timid and ungressive. He has not caught on to the modern idea that the duty of a Government is as much to develop business and to encourage a country's agricultural, mining and manufacturing industries as it is to administer the affairs of its public buildings and to look after its schools and taverns.

As The World pointed out yesterday, Sir Oliver Mowat has made a big mistake in refusing encouragement to the iron industry in Ontario. His excuse that there were no responsible parties in the field to go into the business of iron smelting, even if a bounty of so much per ton was offered, was a mere subterfuge to shirk responsibility. If no one went into the business under the conditions suggested, then the Government would have no bounty to pay. In offering a bounty it would have committed itself to no expenditure unless pig iron was actually produced from Ontario ore. If there is no responsible company in the field to start the industry, which is not admitted, then we ask Sir Oliver Mowat what is the most likely method of inducing responsible parties to come forward. We should say it

would be the placing of a standing offer in our local statutes of so much bounty on every ton of iron produced. There is a great difference between possible legislation and the actual intentions of the Government as expressed in its statutes. Who can say what effect a standing offer of a bounty on iron smelting would have on American and English capitalists? If we intend offering inducements to get the industry started, the best way to proceed is to offer the inducements. The fact of the matter is, Sir Oliver Mowat cannot offer a bounty on iron production without admitting the principles of the National Policy. This the Grit leaders will not permit him to do, especially in view of the coming Ottawa convention.

Mr. Meredith, however, can consistently inaugurate a bold mining policy. Such a policy will give him the support of many Conservatives who have hitherto been indifferent in provincial politics. Such a policy will enable him to make the years 1893-94 as memorable in Ontario politics as 1875 was in Dominion struggles.

Here then, Mr. Meredith, is your opportunity. Cease to further compromise with the Mowat Government. Take a determined stand, and once you land in the enemy's country burn your boats. Get to work and organize the Province. Make a personal appeal to the electors of Ontario. Visit them in their ridings, and let them see what kind of a man you are. Too long have you delayed in this matter. Buckle on your armor, set your lieutenants to work, get your candidates in the field, and set an example to them, the enthusiasm of which will spread to the humblest follower in your ranks. Take a bold stand, especially in regard to the development of Ontario's mines. This is a rich province, which can well afford to spend half a million a year in booming smelting works and rolling mills, and such industries which are the life of a nation. The people will support you in such a course. The more fight you show the more heart you put into your followers, and the more you go out among the people and tell them your story, which is all honest one, the sooner will you be hailed as a victor.

Potatoes and Barley. The New York Price Current, May 24, reports the importation into New York, during three days, of the following quantities of potatoes from Great Britain: From Dundee, 13,292 sacks; from Glasgow, 3776 sacks; from Liverpool, 1484 sacks; from London, 3813 sacks.

The same newspaper reports total imports of potatoes into the United States from July 1 to April 1 this season, 2,921,504 bushels, as compared with 88,303 bushels in same months last season. Import barley into United States, July 1 to April 1 this season, 1,801,694 bushels; export from Grand Trunk to U.S., 21,433 bushels.

As the exports of barley exceed the imports from Canada, this does not look as if there is the unlimited market for Canadian barley in the United States, which the advocates of unrestricted reciprocity claim. A large proportion of the exports of barley from the United States consists of malting barley from California, which finds a better market in Great Britain than in the Eastern States.

South Carolina's Radical Liquor Law. The liquor law passed at the last session of the South Carolina Legislature will go into effect on July 1 next. Local option is one of the features of this radical measure. Counties must vote to secure dispensaries. When established they will be run on strict principles. Applicants must file requests for liquor in writing, may apply only once a day, must sign or make a mark and must be on hand before 6 o'clock p.m., when all the dispensaries will be closed. There will be an official price list and official corps of detectives. The cheapest whisky will cost the voter \$3 a gallon, and the highest expect to make a profit of \$500,000 a year. The experiment of this kind of legislation will be interesting. It is more than certain, however, the experiment will fail. Those who want liquor will get it in spite of any legal enactments. This "drug store" legislation will tend to increase drinking at clubs and in the home. Men who only want an occasional drink will resort to the dispensary and take home enough for a drunk. The very fact that men are subject to so much red tape and espionage on the part of those who profess to be their moral superiors will have a tendency to make them wantonly defy the law and to drink more than they otherwise would.

The proposal of a correspondent to make more use of the main building in the Experimental Grounds, and of the grounds themselves, is worthy of more public attention. The grounds are accessible from all parts of the city, and no better place could be selected for practical experiments, dog shows, fairs, and meetings of other kinds of entertainments. The buildings are idle nearly the whole of the year, and a scheme to utilize them ought to be favorably entertained.

President Cleveland has decided on four points in his message to Congress which indicate the policy of his administration. They are: 1-An income tax. 2-Repeal of the ten cent tax on state bonds. 3-Repudiation of the Silver Act. 4-Modification of the Tariff Act. Mr. Cleveland recognizes that the report of the Sherman Act can only be bought by concessions, and the repudiation of the state bank tax is one of the concessions he offers to the Southerners. But what about silver advocates of the west?

Industrial Schools Association. The Board of Management of the Industrial School Association yesterday accepted the resignation of Mr. A. T. Lewis, and invited to the opening of the new dining hall of the Victoria Industrial Home on June 10.

How to Cure Headache.—Some people suffer untold misery day after day with Headache. There is real relief only by night until the morning comes. The following simple remedy is the best: Take two FEMALE FELVES.—They are nothing new, having been used for centuries. Price one dollar. Boil them in water, add a few drops of Hamm's Circulars free. Letters answered from various parts of the world assure me that this is the best remedy. Address H. Andrews, 207 Shaw Street, 4 minutes' walk from Queen-street West, Toronto, Ontario.

THE SUNDAY PARADE.

Imposing Appearance of the Men.

'Just Like My Father.'

Who seeing our citizen soldiers would not feel proud of Canada of ours? A country that can show such a body of men ready and willing to do and to die for glorious land need not fear that the fire of patriotism is burning low. How nobly they carried themselves, conscious that all eyes were upon them! Here indeed was the giant桂冠 (Globe) that brought peace to our country. Here came the no less able-bodied Queen's Own, moving with the precision and regularity of the French Guards. The march music, the soul-stirring strains of the bands, the refreshing refrain of the bugles and the exhilarating tones of the bugles all combined to infuse intense pride in the boys who came to see the armament. An irresistible desire to be soldiers, too. Without signs for berths or to sleep in, and with midnight effort to keep step, the boys wanted to be "just like my father."

That is it, boys, be like your fathers, good men and true, faithful to home and country. You are the strength of a long line, or stand the fathers a long time. But in one thing you are like your fathers as they marched through Toronto streets. They all wore a pair of guineas around their necks, and were wearing them manufacturing a line of goods for boys and youths that are called "The Little Soldier, just like their fathers." Send your sons, then, to guineas brothers, two fourteen young-boys, and tell him to ask for a pair of "Soldier Boots."

THE NEW UNION STATION.

Local Superintendents Wrangle States That Construction Will Be Under Way By the Middle of July.

Superintendent Wrangle, of the G.T.R., said yesterday that the tenders for the new train shed at the southern end of the site to be occupied by the new Union Station will be opened in a few days. The matter has been delayed in the transfer of the land from the city to the G.T.R. The Railway Company had not received tenders from any Manitoba firm, said yesterday, that he intended to sign it at once.

Mr. Wrangle also states that as soon as another piece of land on the northern portion of the site is secured, the tenders will be submitted, with the addition of a few more stations itself. The drawings for use of contractors are now under way, Mr. Wrangle having assisted in the preparation of the various plans. The G.T.R. hopes that everything will be under way by the middle of July.

THE SCHOOL REPAIRS.

Tenders for Painting and Carpenter Work Awarded Yesterday.

At the meeting of the Property Committee of the Public School Board yesterday, contracts for repairs to the schools were awarded as follows:

Carpenter work, R. Dennis & Son, Bathurst-street school \$155; John Bain, Brook-street school \$108; Thomas Phillips, Clinton-street school \$153, and Crawford-street school \$47; W. F. Sexton, Cottontown school \$26; John Baigerville, Dawson-street school \$34; M. Hatchinson, Dufferin-street school \$207, and Duke-street school \$121.

Painting—John Burgess, Bathurst-street school \$30; Elizabeth Street school \$20; Rose-street \$20; Louis-street school \$54; Charles E. Clock, Brant-street school \$90; A. Cobson, Brant-street school \$73; Stevens-street \$60; Palmerston-street \$20; James H. Smith, Crawford-street school \$61; G. S. Vabour, Dawson-street school \$23; Grace-street \$175; Hill & O'Brien, Duke-street school \$145; Dufferin-street \$75; Hartland-street \$77; Jesse Ketchum \$115; Belliss, 100 Queen-street \$100; Winchester-street school \$98; W. J. Moore, York-street \$75; Charles Davis, Niagara-street \$32.

The tender of James Taylor to put up liquid skating blackboards at 18¢ per square yard was accepted.

Supplies for schools.

The Supply Committee of the Public School Board yesterday postponed the opening of tenders for coal and wood until the next meeting. The tender of William Shabell, 100 Elliott-street, of repairing clocks, etc., for \$30, was left for the consideration of the second committee yesterday. The tender of A. G. McLaren, 400 Queen-street, who, for tinsmith's work, was accepted, being the lowest. The tender was: Cleaning steaming stovepipes 70¢, furnace pipes 45¢, cleaning stoves 10¢, new elbows 12¢, new zinc per square foot, 4¢, new rods 10¢, zinc per sheet, 7¢.

A USEFUL FORMULA.

For Ascertaining the Cubic Contents of Cylindrical Vessels.

A correspondent has sent us a very useful formula which is thought to be quite new. In finding the contents of cylindrical vessels the ordinary rules call for the use of decreasing decimal or fractions. This need little trouble, however, as the answer is given in the form of a simple rule. Let the diameter of any cylindrical tank be given in feet; then take five times the square of the diameter; take off 2 per cent. and the result is gallons per foot high. This is simplicity itself. Both the simplicity of the rule and the near approach of its results to the accurate amounts will appear from an example or two.

Let the tank be 10 feet diameter (inside of course).

10x10=100

5

Take off 2 per cent.... = 10.

500

2 per cent..... = 12.

605

592.9 gallons

per foot deep, which is within one gallon of the accurate measurement (490.87 gallons).

Take an 11 foot tank:

11x11=121

5

Take off 2 per cent.... = 10.

500

2 per cent..... = 12.

605

592.9 gallons

per foot deep, which is only one gallon away from the accurate contents (593.96). A rule so simple and so useful almost deserves a place in the common school texts. A note to the teacher draws attention to the fact that the 2 per cent. to be subtracted is always just one-tenth of the first term written down—10 for 100 and 12 for 12 and so on.

Local Legal.

In the action of the Toronto Street Railways Company against the city of Toronto to recover the cost of the streetcar line, which was made in chambers yesterday, a trial date was fixed for June 20.

The court gave Mrs. Margaret Pollock judgment for \$10,775 on the claim made by C. C. Greenfield, who was the referee appointed by the court. The claim was for cement and for increased pay in rock cutting, which, it is said, were not shown on the bill of costs, and was recovered with the Rosedale valley sewer, the original contract price of which was \$88,000.

Lawyers Abbott & Smyth had judgment signed for Edwin Newman against the Toronto Asphalt Company. The action was one for damages, for injuries which Newman, who is a street car conductor, was beaten by being struck by one of the defendant's no-thoroughfare boards some months ago. He sued for \$1,000, and received a verdict for \$200 at the last assize.

Dr. Johnston's Life and Death.

William Henry Johnston, who 20 years ago was one of the most prominent Varsity athletes, and who graduated with high honors, carrying off the gold medal, died the other day in Lindsay jail, where he had been committed as a vagrant since the first of the month. He was only 40 years of age, and practised his profession at Manila, Ont., until five years ago. He came to Canada recently from Marquette, but lost his fortune of \$100,000 speculating in Chicago.

For Europe.

Franklin McLeay, the young Canadian character actor, has been engaged by Wilton's for a tour of the United States early in October. McLeay will go to his home in Watford, Ont., for the summer months and will probably put in some of the time in Toronto.

Harriet ticks to Frank McLeay.

Franklin McLeay, the young Canadian character actor, has been engaged by Wilton's for a tour of the United States early in October. McLeay will go to his home in Watford, Ont., for the summer months and will probably put in some of the time in Toronto.

AN OPIUM SMUGGLER.

Arrested in Detroit Thought to Be an Escaped Manitoba Convict.

OTTAWA, May 26.—The John Departmental investigation has disclosed from Detroit that a man giving the name of Henry Hayes has been arrested, there on a charge of smuggling opium into the city from the city to the G.T.R. The Railway Company had not received word of the man from Manitoba. Hayes had yesterday taken a party to Detroit to identify Hayes. Proceedings were taken some time ago to have him brought back to Canada.

Mr. Wrangle also states that as soon as another piece of land on the northern portion of the site is secured, the tenders will be submitted, with the addition of a few more stations itself. The drawings for use of contractors are now under way, Mr. Wrangle having assisted in the preparation of the various plans. The G.T.R. hopes that everything will be under way by the middle of July.
