MANHOOD A. J. DRYSDALE.

How Lost, How Restored

We have recently published new edition of Dr. Culver-well's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physicial Incapacity, Impediments to Mar-riage, etc., resulting from excesses.

Price, in a sealed envelope, only 4

cents, or two postage stamps.

The celebrated author in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the ingerous use of internal medicines or the use of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This lecture should be in the hands of every youth and every man in the land.

The Culverwell Medical Co., ORGANS! 41 Ann St., New York.

WORKING CLASSES ATTENTION prepared to furnish all classes with employ ment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Shipwreck at Hampton

[From our Correspondent.] Early Saturday morning, news reached Hampton that a vessel was ashore at St. Croix Cove. Officer Brooks immediately went to the scene of the disaster, and from him I learned the following:—The schooner Billow, Capt. Curry, of and for Parrsborro, with 400 bbls, of flour and meal, went ashore on Hall's point, at low water, about half past seven o'clock. The water, about half past seven o'clock. The large number of guests were present to crew jumped ashore and the vessel broke witness the nuptials, and the bride was up by the time they were fairly ashore.
The cook reached shore with only one boot imited to touch upon any but the most imited to touch upon any but the most prominent in the records.

JANUARY.

On the 4th, a collison between a local state of the propeller versus and a continuous state of the propeller versus, in Lake were fairly ashore. The cook reached shore with only one boot on and bareheaded, and had to walk a mile before reaching a house. The wind was blowing a gale and very cold, the vapor so blowing a gale and very cold, the vapor so served the happy couple left amid

Gold Separating Machine.—The Buenos Ayres Herald says the trial of the newly invented gold separating machine took place recently, and in two hours it extracted gold from two tools of broken quartz and dust. The machine is worked by steam and operates in a manner similat to a machine for cleansing maize, the refuse being separated by a powerful blover. No washing or amaignamating as necessary, the gold being separated by means of its greater specific gravity. In connection with this machine there is another for crushing the quartz in which gold is found. The mint authorities will make analysis for the purpose of ascertaining whether the gold is as completely extracted by the new machine as by the gold process.

gible back from it; the record made do more for the poor man than the by the little steel point upon a sheet of the finding press. No matter where he is, the poor man can hear all the great hear of the finding press. Send the Dominion on receipt of price. Send the Dominion on receip utes after it had been put through the books read to him by trained readers, ber of cartridge or shell. Address, phonograph. I myself doubted whether I ever should see a perfect phonograph, ready to record any kind of or- theatre, and all this is at a cost scarcedinary speech and give it out again in- ly worth mentioning. I remember telligibly. But I was perfectly sure that when the telephone was first anthat if we did not accomplish this the nounced it was said that now people in next generation would. And I dropped the phonograph and went to work assist nightly at the performances of the Paris Opera House; the wires from that favored spot might run to all parts something. For ten years the phono- of the world. Well, we have not yet got to that, although it is a scientific possibility for the future to perfect in detail. But the phonograph will make such a thing perfectly easy. The phonographic record of a performance at travelling, when worried about business a Paris Opera House can be duplicated affairs, I would think the phonograph by the thousand and mailed to all parts of the world. I don't know but that future experiments. Eight months the newspaper of the future will be in ago I began laboratory work upon it the shape of a phonogram and the again. It is a finished machine — sim-critic will give his readers specimens of FRESH ple cheap, effective, not liable to get the performance, and let them hear out of order, and it does everything just how the future Patti did her work PORK, that I ever hoped the perfected phono well, or otherwise. This sounds like the wildest absurdity, and yet, when you My phonograph will occupy about come to think of it, why not? Have I told you enough to make you believe I or at the side of the desk, as a type am joking? Well, lam no joker, and this

The reporter to whom Mr. Edison told all this in his usual earnest and quiet manner asked several expert scientists what they thought of it. Not one was found who was willing to say that there was anything impossible or even improbable in what Edison claims rolls it up for the mail. The recipient to have done. The points of detail mentioned as difficulties about which Edison had said little or nothing were, first the scarcity of a good small electric motor, perfectly regular and perfectly noiselesa. Secondly, the difficulty of making a recording sheet for the phonograph which would not wear out when passed through the instrument a great many times. This was one of the old troubles of the first phono. graph. E lison says he has made a per. fect motor and also a perfect material for his phonograms, but as yet he will not show either to outsiders.

As to the possibilities of such an instrument as Etison claims to have perfected, experts who have talked about the matter indulge in what seems to be far more extravagant speculation. the telephone. Of course, there are no disturbances in the phonographic tion along a telephone wire, and, as what the reader wanted to hear. If the MIDDLETON, - - N. S. the apparatus will repeat the letter phonograph gave out the whole newsover and over again, it is possible to paper from beginning to end, adverunderstand every syllable, even in a tisements and all, it might be too much W.M.FORSYTH noisy office. I was so overcome with of a good thing. In fact the advertiser the success of my first instrument, if it were possible to skip the advertisfinished about six weeks ago, that 1 doubted whether I could make another of it. Upon the other hand, the adverequally good, and I went to work at tiser might employ the phonograph to once to do so; my second instrument attract attention by stationing one at works as well as the first, and I have his door to whisper out to passers the forty workmen employed in making beauties and cheapness of his wares ; it Pictures and Framing in variety the tools for the manufacture of the might become almost as much of first lot of 500 phonographs. They will nuisance as the little electric figures which now keep up a constant rapping

on the window-pane from morning till people may do with the phonograph.

I am confident that it will be found in The amount of talking which can be the office of every busy man. I am recorded upon the phonographic sheet confident that the editor and the re- is so much larger than what can be porter of the future will never think of book or newspaper of the future need book or newspaper of the future need book or newspaper of the future need losing time by writing with pea or diction to a stenographor when the only thing that the perfected phonoprinter can set type better from the graph will not be able to do, will be 03r pd dictation of the phonograph than he can from copy. I have already perfectwill be more than the cost of mainwill be more than the cost of mained an apparatus which allows the phon taining two cells which run the little ographic message to be given out in electric motor - perhaps fifty cents a pieces of ten words each. The printer touches pedal with his foot and the will write 300 words on its sheet, and

A Sluggish Liver Causes the Stomach and Bowels to be-

come disordered, and the whole system to suffer from debility. In all such cases Ayer's Pills give prompt relief. After much suffering from Liver and cured by taking Ayer's Cathartic Pills. I always find them prompt and thorough in their action, and their occasional use keeps me in a perfectly healthy condi-tion.—Ralph Weeman, Annapolis, Md.

Twenty-five years ago I suffered from a torpid liver, which was restored to healthy action by taking Ayer's Pills. Since that time I have never been without them. They regulate the bowels, assist digestion, and increase the appearance. INVIGORATED.

I know of no remedy equal to Ayer's Pills for Stomach and Liver disorders. I suffered from a Torpid Liver, and Dyspepsia, for eighteen months. My skin was yellow, and my tongue coated. I had no appetite, suffered from Headache, was pale and emaciated. A few boxes of Ayer's Pills, taken in moderate doses, restored met to perfect health. doses, restored me to perfect health. — Waldo Miles, Oberlin, Ohio. Ayer's Pills are a superior family medicine. They strengthen and invigorate the digestive organs, create an appetite, and remove the horrible de-
