SCORES OF LIVES LOS IN THE Windsor HOTEL FIRE

The Dead, Known and Unknown, Number Sixteen, But Over Forty People Reported Missing Have Still to Be Accounted For.

It Was One of the Fiercest Hotel Conflagrations on Record, and the Heroism Displayed by Many Firemen Goes on Record as Simply Remarkable.

Many Thrilling Incidents Are Related Which Show Wonderful Courage on the Part of Women Who Had the Lives of Others in Their Keeping.

New York, March 19.—The destruction on Friday afternoon of the Windsor Hotel and the loss of perhaps sixty lives is still the all-absorbing topic here. There is consternation in the homes of many, and telegrams are coming from all parts as to the whereabouts of missing relatives. However, the full tale cannot be told till perhaps to-morrow night, when the work of clearing away the wreck will probably be well under way. Little in the way of searching for bodies could be done to-day.

THE DEAD. New York, March 19.—Following is the list of the victims: Connolly, John, employe of hotel; burns and internal injuries; died at Flower Hospital. Wilson, Mrs. Addie, 25 years old, Cincinnati, Ohio; shock; died at Murray Hill Hotel. Goodman, Eleanor Louise, 17 years old, daughter of Samuel Goodson of this city; fractured skull; died at Bellevue. Kennedy, Miss Laurence, of Elizabeth City, N.C.; here on shopping tour; burned to death at fire. Kirk, Nancy Ann, 72 years old, widow of James S. Kirk, soap manufacturer, of 355 Ridge-avenue, Chicago; died at Bellevue. Leiland, Mrs. Warren, wife of proprietor of hotel; burns on body; died at Flower Hospital. Miss Helen, daughter of proprietor of hotel; found dead at fire; body taken to East 51st-street station, and identified there.

Narrow Escape. Daniel Sweeney, the emergency wrecker of the Building Department and three men had a narrow escape from injury and possibly death about 5 o'clock. The four men were on top of the six-story wall, which was being demolished. A fire from the corner of the hotel, tearing it down, a stiff north wind blew up rather suddenly, and Sweeney felt the wall trembling beneath him. Sweeney cried warning, and the men hurried from their dangerous perch. They were just outside the danger zone when a great section of the wall 20 feet or more square, and including the portion where the men were working, fell down with a roar. A portion of it fell on the roof of the house back of the hotel, wrecking the roof. The house had been emptied by order of the Building Department, and nobody was injured.

THE SCENE ON SATURDAY. Two Hundred Men at Work Looking for the Bodies and the Valuables. New York, March 18.—Through the incessant rain to-day, their efforts hindered by a choking smoke that arose from the half-ruined ruins, more than 200 men from the Building, Police and Fire Departments sought and with only half-satisfactory results, the bodies of the persons believed to have perished in yesterday's terrible fire at the Windsor Hotel.

Could Not Work. Most of the time the smoke was so dense that the workmen could scarcely see their hands before their faces; the wind from the mass of debris, blowing in places, held the rescuers almost beyond their limits. Besides, the remains of the walls left standing were so shaky and threatening that it would have been dangerous to allow the firemen to go about the mass of riveted iron and brick. Efforts were consequently made to clear away the debris, removing weak walls, drilling the chimneys and other parts of the walls for blasting, and making the way safe for the men to dig in the ruins for the bodies.

Sad Figures. No more bodies were taken from the ruins to-day. The latest estimate of the death toll is 16 dead, 65 missing and 57 injured.

Flames Still Alive. It is believed that the fire was able to proceed with the greatest swiftness to-morrow with some assurance of satisfactory results. Several great flames, arising from the ruins, might light throwing heavy streams of water on to the ruins. Occasionally a burst of flame from the ruins, or a puff of steam from the pumps, or the sound of the engines, indicated the scene of devastation.

Love, cashier, Windsor Hotel; burns about face and hands; condition not serious; New York Hospital. Miss F. Misch; burned about face, hands

Workmen Still Handicapped. Four hundred workmen were to-day busily engaged in working in the debris for bodies and valuables. They comprised one of three shifts of 400 men each, who work eight hours each. Their work was retarded also owing to the difficult conditions of murky atmosphere and the heat of the debris. Smoke and steam still arise from the debris, now and then flames shoot up, even at this late hour after the fire. The workmen have only been able to do a little superficial work. When the dig down a little, way the debris is so dense that they are obliged to move to another locality.

Another Chimney Demolished. The fire-line is more tightly kept to-day than ever before, and all persons without a special permit are kept outside. The explosion was caused by packing in the place the six-story wall that is standing on the 47th-street side of the hotel. In order to make the search in the ruins safe. The second 85-foot chimney was dynamited shortly after 3 o'clock this afternoon. The explosion wrecked a number of plate-glass windows and doors in nearby residences.

Armed Articles Found. A large force of men were at work during the afternoon on what was the main entrance. The explosion wrecked a number of bodies would first be found there. A large amount of small articles, principally the personal property of guests, was found, such as silver back mirror, with the initials "J.H.P.," and a silver back hairbrush with the same initials. A number of small pieces of silver marked "A.J.D." were also found, and a lady's silver belt; a mystic shawl, the hotel ledger, a suit of evening clothes, cheque book, and quilts, rugs and clothing in large quantities were dug out of the ruins.

In the 140-foot level the drift will reach the Iron Mask line, where there is seven feet of ore. The ore shipped last week 2310 tons.

Always the Best at Dineen's. There is one thing that a man in quest of a new hat is always expected to look for at Dineen's. This is the best hat style and the best hat quality that the money will buy—whether it's a \$2 hat or one for \$2.50 or \$3, or a hat at any higher price. Dineen's prices are usually lower than most men expect to pay for fine hat qualities, and that is why most men buy their hats at Dineen's.

A BRILLIANT FUNCTION

Was the First Drawing-Room of the Governor-General and Lady Minto, MANY OUTSIDERS PRESENT

And the Storm King Relaxed His Fury Just at the Proper Time For the Affair.

The Red Chamber was brightened by the Brilliant Uniforms of the Staff and the Official Robes of Ministers and Judges and the Gowns of the Deafes Were More Gorgeous Than Usual—A Number of Toronto Ladies Present.

Ottawa, March 19.—(Special.)—The breezy, wet snowstorm which raged all yesterday in Ottawa, recommenced business after midnight, and has been hard at it all today, politically gay respect to the new representative of the Governor-General and Lady Minto, which was very convenient for the seven or eight hundred ladies and gentlemen who attended the first drawing room of our new Governor-General in the Senate chamber. The function was one of the most brilliant of its kind ever held in Ottawa, a very noticeable feature being the large number of visitors from places other than Ottawa, especially ladies, of whom there were nearly one hundred.

An Hour and Ten Minutes. The reception lasted exactly one hour and ten minutes, which is nearly a quarter of an hour longer than last year, when, contrary to the usual custom, the last drawing room held by a Governor-General was the largest of his term. This was a reversal of the general order of things, the first drawing room of a new Governor-General being usually the largest of his term. Last night the desire to pay respect to the new representative of Her Majesty seemed to be exceptionally strong, and the result was that the attendance was greater than any I can remember, with the exception of the first drawing room held by Her Royal Highness the Princess Louise just twenty years ago. A Brilliant Scene. The handsome chamber of the Senate looked uncommonly well, brightened by the brilliant uniforms of the Ministers, judges and other officials, and the magnificent gowns of the hundreds of ladies who adorned the galleries and the raised platform at the sides of the chamber with their youth and beauty, but most of all, the chamber was made very evident, and Mr. Tarte will have to see that it is correspondingly better than the first. The fact that the chamber is not sufficiently well lighted, and that the style of lighting is not very bright, but in comparison with the Commons since the new system has been introduced it looks dingy and more light and better fixture should be provided.

Stake Entries at Montreal.
The Montreal Club Stake, selling, \$1000, 1 1/4 miles, 3-year-olds, to be run at Fort Erie, De- troit, Windsor and Montreal this summer. Martimas, the Futurity winner of last season, is in the Canadian Derby, the banner event of the Northern Circuit, and if he returns the form in his 3-year-old performance that he displayed as a 2-year-old he should hold the stakes at his mercy. Other Fort Erie stakes have done fairly well, the handicaps drawing out a goodly number. A glance through the entries for the Mont- real, Windsor and Detroit meetings indi- cates that many of the owners and trainers who have campaigned on the Northern Cir- cuit during the last few years will again return to their old stamping-ground for laurels and purses. TWIN CITY BELLES PLAY HOCKEY
And Waterloo Beating Hocking in the Second Half.
Waterloo, March 18.—The hockey season here is by no means past when the boys are not on the ice the ladies take possession. This afternoon a large number of the Twin Cities elite witnessed a game of hockey between the rival teams of the Waterloo and Waterloo Ladies Hockey Clubs. The visiting belles scored 4 goals to Waterloo's 2 in the first half, and Waterloo nearly always pulls out winners in the last half, the Waterloo fair ones were equal to the task in the second half, Waterloo scoring 6 goals to their opponents' 2, thus adding another victory to Waterloo's long list.

Shamrock's Champs of All America.
New York, March 18.—The Shamrock Hockey Club of Montreal clinched their title to the championship of the world at the Victoria and the winners of the Brooklyn Skating Club team, the team that has not been defeated this season, are the Victoria and the winners of the Emerald wing-foot, which is the Shamrock emblem. The Brooklyn team succeeded in scoring four goals to the Shamrock's one in the first half, but the Shamrock's goal was scored in the second half.

Portage Best Brandons.
Winnipeg, March 18.—After a hot game for the intermediate championship, Portage and the Portage team beat Brandon, 4 to 1, in a hockey game last night. It was the best exhibition of hockey ever seen in the city and was witnessed by about 3000 people.

The Awful Crime.
The crime of which the Galician Gusek was found guilty this afternoon was one of the most cold-blooded on record. Another Galician named Bojczko had \$60 in cash and other valuables on him when he was arrested on Thursday evening of next week. It should be a fact and clever boot.

Jim Popp, Bob Johnson and Billy Breen left Saturday for Rochester, where the Toronto champion meets Tom to-night. This is the night that Jim Popp and Billy Breen will meet in a four round contest. They are to box 20 rounds at 133 pounds.

Collier and Johnston are billed for the Broadway Baseball Club's smoker in Occident Hall, Thursday, March 30, 10 rounds, for a decision.

George Dixon says that he is keeping himself in the ring, and that he expects to go to England some time in April, to either Ben Jordan or any other 122-pounder.

George McFadden of New York disposed of Jimmy Clark of Long Island City at the Buffalo Athletic Club on Saturday night, after a little less than one minute's fighting, by knocking him out with a right hand.

At St. Louis Saturday night Tommy Ryan of Syracuse and Bob Douglas of St. Louis were scheduled for a fight at the Buffalo Athletic Club, but the fight was postponed.

Spike Sullivan is authority for the statement that a match between himself and Joe Gans has been made in this city on April 7.

Casper Leon, the bantamweight, who has not put a glove on since Saturday night, is expected to meet Terry McGovern several weeks ago, but has been matched to box Dan Langworthy of the money was in one-dollar bills, and the other in the safe was not touched. The robbery was discovered this morning when Mr. Egan's safe was opened and found to be empty.

Mr. Egan is the only person who has a key of the store.

MEAN BUSINESS THIS.
The Port Hope Dog and Cat Poisoner is at Work Again.
Port Hope, March 18.—The dog and cat poisoner in the vicinity of South-street has been at his old work again. The first on the 20th embankment was a dog, a great pug with the hair of a Pomeranian, and a great pug with the hair of a Pomeranian. The dog was a young cocker spaniel that Mr. Egan had recently purchased as a playmate for his son; a dog that he would not have taken for such a price as he had taken in any country without a guardian.

Upon the request of Spike Sullivan, the weight for his contest with George Kerwin, the Chicago mystery, scheduled for the 14th under the auspices of the Greenwood Athletic Club of New York on April 14, has been changed from 135 pounds to 133 pounds. The change was made by the representative, has deposited a forfeit of \$500 for Kerwin's weight and appearance on the 14th.

Unless Jimmy Anthony, the Australian bantamweight, who is at San Francisco, arranges to meet himself and Harry Forbes to take place before one of the San Francisco clubs, he will undoubtedly be taken care of by other say at Terry McGovern, the Brooklyn featherweight, who stopped Harry in 14 rounds in a contest at New York last fall. The Lenox Athletic Club of New York has offered Forbes a guaranteed \$1000 for a fight with McGovern, making 50 per cent. of the gross gate receipts.

Terry McGovern, the crack Brooklyn bantamweight, may after all get an opportunity to display his form in England. Owing to the fact that Pellar Palmer is to meet Billy Litchford of Chicago in a fifteen-round bout before the National Sporting Club, London, on April 17, the famous English club is looking for an opponent to back against the winner of this contest and hold the same during Derby week. Mr. Orlan, the club's representative in this country, has suggested McGovern, and has notified his clubmates to this effect. Sammy Harris, for McGovern has promised to post a forfeit, and if the foreign club's reply is favorable he will agree to let McGovern fight in London.—Chicago Record.

SCORES OF LIVES LOST IN WINDSOR HOTEL FIRE

Continued from Page 1.

led. Broken and blackened windows, wrecked doors, smashed railings, dirt and general debris surrounded every house. Thousands of spectators pouring from every street and avenue, and from every line that passed near the scene of the great holocaust and from private carriages as well, day, pressing as close to the ruins as the restraining police lines would permit, and straining their eyes in the hope of catching sight of some ghastly part of the spectacle. One hundred policemen held back the crowd.

Can't Account for It.

Warren F. Leland, the proprietor of the Windsor, had someone recovered to-day, yet unable to account for the origin of the fire.

Was Well Insured.

It was learned to-day that Eldridge T. Gerry had the building and the furniture and even the annual rental, for which he indemnified himself with policies aggregating \$300,000. Mr. Gerry carried policies aggregating \$300,000 on the hotel building, the last insurance being for \$200,000 on the furniture. In addition to this, Mr. Leland had policies aggregating \$100,000 on his own furniture in the hotel.

Heavy Loss in Jewels.

No estimate can be made of the precious metals and gemstones which were in the wreckage of the great hotel. One family lost very heavily. One family lost \$100,000. How much has been picked up and carried away can never be known.

Only One Known to Be Safe.

Warren Leland, Jr., said early to-night that of all the persons supposed to be in the hotel, he had heard that only one, Miss Craig, was safe. He had not been notified of any other persons having been rescued, and he had given up Frederick Leland, the room clerk of the hotel, and his cousin.

Removing the Debris.

The work of removing the debris was begun late to-night, when a gang of about 200 experienced contractors recovered to-day, the rubble and bricks were so hot and the smoke still so thick that the work proceeded very slowly. Gasolene lamps and electric lights were placed in various places to illumine the scene. The men devoted most of their time to the Fifth-avenue and 46th-street moes. As they cleared away the debris, they found portions of the building proper, they found portions of the building proper, they found portions of the building proper, they found portions of the building proper, they found portions of the building proper.

Guarding Against Theft.

The men who are clearing the wreck away, will work with a corps of inspectors to guard against the possibility of making off with any valuable articles. Nearly every guest was saved, lost expensive jewelry or other valuables. It is believed that the value of many thousands. It will be the work of the police to prevent any of the wealth being appropriated by those who may find it.

Police Headquarters.

In front of the hotel a one-story frame house has been erected. This will be the office of the contractor and the police headquarters also. To all valuables will be taken. When the hour of the search is over, the police will be called into this place and searched for valuables.

Under Strict Surveillance.

No laborer will be permitted to leave his work and go out side the lines or communicate with a person in the street while at work. The men will be under strict surveillance.

A Will and Bonds Found.

The last will and testament of Benjamin E. Jones, executed May 17, 1894, was found this afternoon. It disposed of a quarter of a million dollars in property. Attached to it was a codicil which provided for the disposition of other property and lots of property. The will was found in a box in the drawing of the instrument. Near the same spot some railroad bonds were picked up. There were wet and badly burned. What bonds they were could not be determined, because of the condition of the numbers, however, were not destroyed.

Miss Gould Was at Home.

The home of Helen Gould was a point of interest to-day to sight-seers. Hundreds who managed to get inside the lines waited around in hope of catching a glimpse of the woman whose charitable acts yesterday and to-day were so spontaneous. The police threw a guard around the house. It had been slightly damaged by fire. Miss Gould and her brother, Frank, occupied the house during the night, although they had permitted to be turned into a hospital and morgue during the fire. To-day three workmen were slightly hurt while working about the walls. They were taken to the hospital, and waited there for the ambulances.

NOBLE NURSES.

Miss Troup Climbed Five Storeys Down the Fire Escape Carrying Her Patient.

The fire had its heroine who saved life. Her name is Miss Frances C. Troup, and in her courage, devotion and presence of mind Miss Frances Leland, the youngest daughter of the proprietor of the hotel, owes her life.

Miss Troup is a trained nurse, and so accustomed to think first of others, and so a victim of epilepsy. She is also lame. She was in her room in the hotel No. 523, on the fifth floor of the Fifth-avenue side, when the two young women heard the alarm. Miss Troup opened the door. Flame and smoke burst upon her. Miss Leland screamed and fell fainting. The nurse realized that she must act quickly. She tried to arouse Miss Leland, and succeeded partly. She placed a handkerchief about her charge's face to protect her from the smoke, and then started for a fire-escape.

A DARING RESCUE.

Was That of Fireman Ford, Who Passed the Woman From One High Window to Another.

This is the experience of Edward Ford, fireman of Extension Truck No. 20, Mercantile street, who was the last man to reach the hotel, bringing down the last person rescued alive.

THE WINDSOR HOTEL HOLOCAUST.

Commissioner of Buildings Brady Says There Are a Dozen of the Same Kind in New York City.

Thomson Brady, Commissioner of Buildings, said that not only was the Windsor Hotel unfit to be used for hotel purposes, but that it was a fire trap.

A. P. Demorest Thinks There Were Thieves in the Hotel During the Conflagration.

New York, March 19.—A. P. Demorest called the East Fifty-first-street Police Station to-day and reported that he had a small state table with a velvet top, valued at \$100, and a daughter and son occupied rooms on the third floor near Fifth-avenue and Forty-second street.

A FAMOUS RESORT.

At Night the Windsor Used to Be the Headquarters for the Great Financiers.

The Windsor Hotel, once the most famous in this city of famous hotels, was always crowded. It drew a class of patronage that was the envy of the fashionable section of the city.

A COOL MAN.

Was Edward P. Wells, Who Saved His Wife and Daughter and His Own Life.

One of the most remarkable incidents in the hour of thrilling experiences was that in which the cool courage displayed by Edward P. Wells, who with his wife and daughter, was in the hotel, was the means of saving all three.

RICHES OF SERNE RIVER.

Golden Star Producing Largely—It is a Second War Eagle.

A Second War Eagle.

The talk of the Golden Star being a second War Eagle, which was scooped at some three or four months ago, is now conceded, for less than twenty-eight days will cost \$15,000 in gold bricks and \$10,000 in concentrates. This is phenomenal and way beyond the expectations of everybody.

Work on the Randolph.

It is expected work will start on the Randolph next week. The Randolph, which is A. L. 115, was the property purchased last week by M. C. French and associates, among the number being W. H. Fanning, the wealthy merchant and associate of Marshall Field of Chicago; Joseph Holtwood, vice-president of the Duluth and Iron Range Railway, and one of the leading iron mining men of the country; Charles H. Sunderland, a wealthy estate owner and partner of President Ostrander of the Northwestern National Bank of this city, and several others equally prominent.

The Sunday Telegraph.

London, March 19.—The announcement in the Sunday Telegraph will issue a Sunday edition has called forth remonstrances from the manager of the Telegraph, said to-day that the objection to Sunday newspapers had no more valid basis than the objection formerly directed in the same way against the London Standard. As a matter of fact, it was now recognized as an entirely fit and proper source of pleasure for a Sunday afternoon, so high-class newspapers took their place in due course as a not less admirable agency of good.

DOCTOR HOWARD, Manager Orient's Mtg. Co., Carleton Place, Ont.

DEAR SIR.—I have been a great sufferer from Piles. The last attack was the most severe I have experienced. For ten days I could neither sit nor stand, and walking was out of the question, so great was my suffering. I could find no relief anywhere until your Pile Ointment was recommended to me. I got a box. I was relieved by the first application. In two days I was able to resume work and feel perfectly cured within a week. I volunteer this testimonial as I desire that people who suffer as I have done may know where to get such prompt relief as I found in the use of Orient's Pile Ointment. Woman's Word... Devoted Specialy to the Interests of our Women Readers.

"It would be a very great convenience if the street cars at the junctions would wait for each other when they are not more than half a block away."

Strew on her roses, roses, And never a word of yew, In quiet she reposes, Ah! would that I did too!

Her mirth the world required, She bathed it in smiles of glee; But her heart was broken, And now they let her be.

Her life was turning, turning, In mazes of heat and sound; But for peace, her soul was yearning, And now peace lags her round.

Her cabin'd, ample spirit, It suttered and fell for breath; To-night it doth inherit, The vasty hall of death.

A model of the first Methodist Church built in Canada, made from a board of the church, has been offered to Miss Fitzgibbon as an exhibit for the Ontario Historical Society's exhibit, which will be held in Victoria College in June next.

Simple, homely little buildings were these first churches in Ontario, but they that worshipped so wholeheartedly within the unpretending, plain wooden walls, were the pioneers, mighty heavers of wood and drawers of water, who tamed the wilderness and made it blossom like the rose.

Spokane Center in Ontario

Jim Hill of the Great Northern Now Trying to Kill C. P. R.'s Bound-ary Business.

Ontario Mining Status in 1898

Kamloops, McInney, Rathmullen—More Past Digging—Saturday's Mining Exchange.

It is stated that President Hill of the Great Northern Railway intends to make Spokane, Wash., a smelting center. He offers to furnish all transportation facilities required if Spokane people will erect the smelter. The idea is to prevent the smelting industry getting on a solid basis in Southern British Columbia, and incidentally to cut the C.P.R. out of business.

Mr. Hill will give the word. Spokane has made one of the chief smelting centers of the United States. He indicates a desire to do this. He realizes, of course, that if once there is a smelting plant, it will be smelted at Spokane, his Spokane & Northern branch would haul them from the mines to Spokane. His main line would carry the fuel to the smelter, and he would also have the long haul on the bullion from the smelter to the distant refinery.

Mr. Hill also comprehends the grave responsibility, if smelters are not established across the line. Already successful smelters are established in other in the Boundary Creek country. A large part of the ore of this country will not be shipped to the distant smelters of the United States, and it will go to the local smelters of Southern British Columbia, and the tonnage will pass over the C.P.R.

Mr. Blue on Ontario Mining. Mr. Archibald Blue, Director of the Bureau of Mines, has just returned from a tour of inspection of the mining industry in Ontario last year.

The copper and nickel mines of the Sudbury country gave employment last year to an average of 610 men, and the amount of wages paid for labor was \$315,000. All the ore raised at the mines was smelted and reduced to matte, in which form it was exported to the United States.

The production of gold bullion last year was 16,175 ounces. It is understood that this does not include the output of a mine on the Seine River, for which returns have not yet been received.

Mr. Blue refers to the Golden Star in 1897 the bullion product of the Province was 14,412 ounces, in 1898 11,854 ounces, and in 1899 3038 ounces, and it is expected that this year will show an increase, both positively and relatively, much exceeding the past four years.

The production of pig iron in the Province last year was 452,375 tons (tons of 2000 pounds), valued at the selling price at the works at \$530,787. The industry gave employment to an average of 244 men, and the total amount of wages paid for labor was \$61,476.

With the exception of the best smelter at Deseronto, there will undoubtedly be a great increase in the production of pig iron during the coming year.

Kamloop Mining Centre. The Kamloops (B.C.) Sentinel puts forward the assertion that Kamloops will soon become famous as the centre of a great copper mining district, and this journal goes on to give a detailed description of the best known mineral deposits of the neighborhood.

First taken up the Coal Hill copper district, situated to the south of the town, where a great deal of prospecting has been done, and preliminary mining in the way of open cuts, shafts and tunnels has been done, and where some properties have been sold to quite a forward stage.

A 30-foot shaft has been sunk on the Python, and it is understood that a large expenditure will be made in opening up this property this season. The Hecla, near by, is in a similar stage of development, and the Grin and Iron Mask groups are also looking up well.

The Iron Mask group yields 2 dwts. gold to the ton, and 12 to 15 per cent in copper. Other claims in the immediate vicinity which have been more or less developed are the Iron Cap, Carmichael and Norma, Con Verdant, Dawson and Brownie.

A couple of miles to the west of the Coal Hill region is located the Pot Hook group of claims. A large double shaft has been sunk to a depth of 225 feet on one of these claims. A large force of men is to be put on this property, and work is to be pushed. A very promising showing is made by the claims near Cherry Creek, 17 miles from Kamloops by wagon road, but only one-quarter of a mile from the C.P.R. The ore runs 30 to 45 per cent in copper, and sometimes carries as high as \$80 to the ton in gold.

Another large mineral zone is found on Jacko Lake, east of the Sugar Loaf district. This part of the country is distinguished by immense leads of quartz, showing fair values in gold and copper. A good many claims have been located here, and a number of test shafts have been sunk from 30 to 60 feet on a number of these. The district is well fitted as regards transportation facilities, water, timber and fuel, and when capital comes in this district may give a good account of itself.

He's a McKinney Pioneer. The World had a visit on Saturday from Mr. Joseph Sauter, one of the pioneers of Camp McKinney, B.C. He located Warton, a great believer in the district. In speaking of the Warton, in which he is largely interested, with Mr. D. Rand of Spokane, he stated that he believed it was one of the best claims on the coast. It lay between the Cariboo and Waterloo properties, and carried the same ore bodies. Where development work has been done on the Cariboo, immediately adjoining the Warton boundary line, the vein showed up over six feet wide, and the vein showed a similar width on the Waterloo, on the other boundary line of the Warton. Mr. Sauter says that the ore specimens on the Warton are rich in free gold, and that, although the veins have not yet been proven to any depth, as the Cariboo has, he believed it had a good future.

Good Rathmullen News. Messrs. Hall & Murray received Saturday morning a telegram in cipher as to Rathmullen, which stated that they have struck the ledge, and have a width of over 30 feet, but have only found one wall, and are still cross-cutting. This is most encouraging news to this firm, who had sufficient pluck to underwrite a very large block of the stock a couple of months ago, for the purpose of enabling the Rathmullen Company to do the work recommended by Mr. Jeffrey, a mining engineer, and which was producing such eminently satisfactory results. The stock is now very much in demand, and on Saturday quotations were unobtainable at any figure. Further particulars as to this strike are expected by wire.

To Develop Peat Deposits.

Peterboro, March 18.—A company known as the Trent Valley Peat Fuel Company has been incorporated, with sole authority to manufacture peat fuel in Peterboro, Ontario. The company is controlled by Messrs. Prince Edward and Durham Counties. The charter members are: Mayor Davis of Peterboro; Aaron Cox, director of the Central Canada Loan & Savings Company; W. G. Morrow, manager of the Toronto Savings & Loan Company; J. B. Stratton, M.L.A., for West Peterboro, and W. S. Sims, contractor for the Trent Valley Canal. As all those gentlemen are prominent business partners of Hon. G. A. Cox, it is surmised that the astute capitalist is behind the scheme. The company is installing three peat-compressing machines at their newly-established works at Kirkfield, and expect to market about 100,000 tons from that point. The output of other plants contracted for throughout the territory secured by the local company from the Canadian Peat Fuel Company of Toronto, will swell the tonnage largely. That operation is such an extensive character has been inaugurated by citizens of our town is matter for congratulation.

The favorable location of both properties is shown in the map below made from actual surveys of Henry Carr, Esq., United States deputy mineral surveyor. These properties have every prospect of a great future, being in direct line with the course of the REPUBLIC VEIN and adjoining the great REPUBLIC MINE, as shown by the following map:

THE DORA shaft has cut three feet of quartz averaging \$100 per ton, picked specimens assaying from \$640 to \$1077 per ton to gold. Note that Noble Three and Jumbo veins also pass through this property. THE SUMMIT tunnel has crosscut 15 feet of quartz at present writing without passing through the vein, the full width of which is therefore not yet determined.

IT MAY BE A STORMY MEETING. Two Civic Departments, It is Rumored, Will Come in for Some Pretty Hot Criticism.

THAT ENTRANCE TO HIGH PARK. Grand Trunk May Not Be a Party to the Plan of Lowering the Tracks Out West.

The prospects are for another stormy meeting of Council to-day and beyond a draughtily ventilation of the Solicitor's and Street Commissioner's Departments, the street centre promises to be somewhere about the High Park entrance scheme.

Does the G. T. R. Object? But a strong opposition to the scheme is being much further strengthened by the hope of track depression.

Flaming After Buildings, Too. In addition to his examination of the employment of further expert assistance in obtaining a more adequate valuation of building property.

Yachtmen and Workmen. The R. C. Yacht Club have also written spurring the Council to secure the running of cars over Toronto streets.

Entered Medical Students. The results of the March Matriculation Examinations in Trinity Medical School just issued.

MARTINO OVERSTEPED BOUNDS. And Now Sir Claude Macdonald Transacts Italy's Business.

Rome, March 18.—In the Senate to-day Admiral Canavaro, minister of Foreign Affairs, replying to questions upon the subject, stated that Signor Martino had told Italy that she was to be a protector of the Chinese Government.

SOCK MARKETS OF A WEEK. Variations in Prices of Securities in Seven Days

On the Canadian Exchange and on Wall-Street-Pacifies and Grangers Heavy-Sugar, Tobacco, and Some Other Specialties Very Prominent in the Trading-Notes and Gossip.

Saturday Evening, March 18. Canadian securities have been dull and a further set-back, and this, together with the fall in the price of sugar, has had the effect of driving out of the market the erstwhile buoyancy out of the market.

Canadian securities have been dull and a further set-back, and this, together with the fall in the price of sugar, has had the effect of driving out of the market the erstwhile buoyancy out of the market.

For the future, it may be said that the outlook is favorable. Any tendency towards strengthening the money market at present existing is looked upon as only temporary, and, as a matter of fact, another encouraging feature is found in the earnings of the railroads.

Trunk receipts for the second week in March showed an improvement of only \$25,700 over the first week, but, when C.P.R. receipts improved to the extent of only \$200,000, these gains are small compared with the loss of the first week.

When it is considered that it was at this time last year that the great war of the market for the railroads was closed, it is really surprising, therefore, that the earnings of the railroads have equaled those of the second week of March, 1898.

OPERATIONS UP TO DATE. It is Truly Marvellous What Surgeons Will Undertake and Accomplish These Days.

Bohneger Independent: Some few weeks ago, John Johnston of North Vernon, was sent to the Nichols Hospital, suffering from a case of strangulated hernia, which is a break in the inner lining of the abdomen, more or less, of the bowels protruding. It was hoped that he would recover, but after an operation by Dr. McCulloch, the protrusion was put back and a hernia was again gaining its work rapidly.

NOVA SCOTIA CROWN LANDS LEASED TO AMERICAN CAPITALISTS FOR THIS PURPOSE. SIX THOUSAND DOLLARS A YEAR TO BE PAID TO THE GOVERNMENT AND ALL MANUFACTURING TO BE DONE WITHIN THE PROVINCE.

Halifax, March 18.-Attorney-General Longley laid before the Nova Scotia Legislature to-day an agreement entered into on the first of last month, by which Her Majesty the Queen grants a lease for 30 years of two immense tracts of Crown lands in the counties of Inverness, County of Cape Breton, comprising altogether nearly 1000 square miles, to three American capitalists-Edward L. Sanborn and Robert B. Blodgett of Boston, and Daniel F. Emery, Jr. of Portland, Me. The lands are leased for the purpose of converting the timber thereon into pulp and paper, and the lessees must have two such mills in operation within the first year of the lease, and have expended at least \$10,000 in the operation of the business for which the lease is granted.

The lessees agree to pay the Government of Nova Scotia \$6000 per year and to do the same amount of work within the Province of Nova Scotia.

One provision of the agreement prohibits the transfer of the lease to any person or corporation except the North American Paper and Pulp Company, Limited, which is a subsidiary of the North American Paper and Pulp Company, Limited, and the Nova Scotia Government reserves the right to terminate the lease if the lessees do not comply with the conditions of the agreement.
