would be shown, the students not positively assured that they be given academic 'standing. all other important encou tern arena of the war, the claims of the opponents disagree as to the strategical importance of the Ger-man advance into East Prussia. The Germans are hailing it as a great vic-

tory, and Berlin is decorated with lags in celebration of the occurrence while Petrograd declares that they are

deliberately re-aligning their forces on their own territory, supported by their own forts, and that the decisive con-

flict is yet to come. Fighting in the Snow.

The battling in the Carpathians is going on in the snow, but the informa-tion from this field 'of activities is most scant, and the indications reaching London are that it is still a seenw affair, with both sides sustaining enormous losses. Further to the south the Austrians contend that they are nuing their advance into Bukowina. Military experts in London are of the opinion that the Carpathian of the opinion that the Carpathian front still remains an area of prime importance in the east, where a deci-sive vacory by either side would force the abandonment by the other of ter-ritory in East Prussia er Poland. The fact that a British air raid in much force as was evidenced in the aerial expedition of yesterday has been carried out aucgessfully over the German positions in Belgium is taken in London to indi-cate that such aerial activity against

in Beigium is taken in London to indi-cate that such aerial activity against German submarine bases promised at the time when the German polley of blockade was announced, is to be con-tinued Great Britain has many new aeroplanes under construction and many pilots in training, and it is now predicted that yesterday's raid was only a forerunner of more extensive visitations.

Prizes Offered. Several British shipowners are of-fering prizes of £1000 (\$5000) to any merchant ship which rams and sinks a German submarine. Emperor William is still on the East Duration for the parent

Prussian front, according to the latest Avices reaching London, but Emperor Nicholas has just made a visit to Se-bastopol, where he inspected the Rus-man warships in port and made an eddress to the assembled sailors.

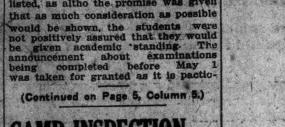

PARIS CANNOT SECURE PROPER FUEL SUPPLY

Plenty of English Coal is Receiv-ed, But Men to Break it Are Scarce

PARIS, Feb. 13-Faris is still feel-the lack of fuel. There is said to plenty of English coal, but it comes steat blocks and there is not enough

Probably the best example of winter construction ever in Toronto is that now being carried on at the Excelsion Life building, corner of Adelaide and Toronto streets. Size! was all put up in the coldest days in January; also the fire-proof flooring put in position, as well as the granite wall work on the street fronts of the first two storeys; and since that the brick and terra-corta in the upper storeys rushed along. All kinds of ma-terial were delivered on the coldest days, orgress at any point. The same thing was observed in con-nection with the Nordhelmer building at works has already been renewed on the new Bowles structure at the corner of Bay and Queen streets. If Chicago can do all winter work so ought Toronto. It is certainly easier to get men. to break it up at Bouen, the coal to break it up at Bouen, the coal t of Paris, so as to make it avail-t for the retail trade. To remedy the minister of commerce

is situation the minister of commerce roposes to recruit miners to increase the output of French mines that are of in the hands of the Germans.

INJURED BOY DOING FINE.

PARIS, Feb. 13.—5.35 p.m.—Great activity of French and German aircraft is reported from the Sundgau region of Upper Alsace, according to a despatch from Basel, Switzerland, to The Paris Temps. The mach-ines are flying at great height, and generally avoid projectiles. A Zeppelin dirigible balloon coming from the direction of the Black forest flew over Mulhausen towards the French fortress of Belfort and entered into an engagement with French airmen but with what result, the message says is not known. Many trains containing wounded men from Guebweiler and Kolmar, the correspondent adds, passed thru Mul-hausen today for towns in the Black forest.

Dovercourt Company Quickly Learn That Public Will Take to Their Plan

MANY WANT TO BR

"LITTLE FARMERS"

In an endeavor to feel out the public demand for small price, small size gar-den plots, and also to keep its organiz-ation active, the Dovercourt Land Co, is placing for sale one of its properties on Yonge street above the city limits. The price is being kept down to the absolute minimum, just enough being added to the original purchase price to cover selling expenditures. How low the selling price has been fixed may be determined by the fact that it works out to \$2.50 a frontage foot, and the property adjoining was sold off at \$20 a foot for part of it. As an extra in-ducement to "little farmers from the citretion of Professor H. L. Hutt. The Dovercourt Company got some idea of the success of their plan Satur-day morning. Before the morning papers carrying the first announce-ment were completely distributed forty enquiries were made, and by 10 a.m. fourteen plots were sold.

THREE CHINAMEN DEAD; VANCOUVER TONG WAR

New Year's Celebration Ended in Pistol Battle and Death List

May Be Five

Canadian Press Despatch. Canadian Press Despatch. VANCOUVER. B.C., Feb. 12.—Three Chinese are dead and three are in the hospital wounded as a result of a Ton, war which broke out early this mornin in the midst of the celebration of the Chi-nese New Year. According to early stori-toid to the police, two Chinese were kill-ed in a pistel battle in Chinatown, while the Chinaman who was there com-, third Chinaman, who was there, itted suicide. Two of the three wou ed now in a hospital may die. There is no clear idea of what caused the row, but it is apparently a result of recent fighting in San Francisco and Portland, when several men were killed.

sion was thus made by Mr. Pugsley: It is stated by many people and believed by many people on the Pacific coast that this company was not paid either \$1,050,000 or \$1,150,000 for these submarines. My information is that two cheques were passed, one of which for the sum of \$900,000 was issued to the company which oull the boats. The other cheque may have been issued bras fide to a proper party, but the feeling in the public mind—among many people in Sritish Columbia, at all events marines. I do not know whether of not that is so, and I make no charge in that reaspect, but I do say that having Figard to the fact that these sujected by the

He larmer

\$25 DOWN \$10 MONTHLY

Five Years to Pay

With a view to meeting the needs of the time and encouraging production-thereby reducing the high cost of living-the Company has decided to offer 100 acres on Yonge Street, a little north of the city limits, in half-acre farms. To assist the buyers, not only to settle on the land, but also to asssist them by demonstration and expert advice as to how and what to grow. To as-

sure the success of this venture, the Company is offering the property at only a slight advance of the original cost, in fact a surplus only sufficient to provide for selling expenses, practically eliminating profits.

As proof of this statement an adjoining property has already been sold as building lots for an average price of \$20.00 per foot- The little farms on this Estate are 165 feet by 132 feet deep, equal in size to 7 city lots. The price is only \$2.50 per foot.

The Homestead Estate is passed by Metropolitan cars, and is only about 40 minutes' ride from down-town. There will be no rent-day for these little farmers, and no big prices to pay for potatoes, cabbage, cauliflower, corn, peas, strawberries, raspberries ; a few hens will provide a family with eggs at practically no cost. Why pay rent and big prices any more?

Ploughed and Harrowed Ready for Seeding

A Demonstration Farm

The Company intends using one of these half-acres as a demonstration farm, upon which a house will be built in the Spring and the whole place will be laid out and planted to show the possibilities of production on a little farm well

Clip out and mail the coupon for a bulletin containing illustrated suggestions as to how a half acre should be laid out to the best advantage, and giving particulars regarding the preparation and fertilization of the land, selection and securing of the best varieties of fruits, flowers and vegetables, and their cultivation and man-

rowed and made ready for planting. Prof. H. L. Hutt, for 21 years in charge of the Horticultural Department of the Ontario Agricultural College, is now in charge of our Horticultural Department, and will gladly give the public expert advice regarding the methods which should be used to develop scientifically and make the most possible of a suburban home and little farm of this kind.

is disregarded by the taxation of raw material. Putting raw cotton, for ex-ample, on the dusiable list is clearly a case of tariff for revenue only. The tax upon wool, hides, iron ore and some other commodities which must largely be purchased from abroad by the Canadian manufacturers has only the semblance of protection. The war and business conditions have already

TIRST AND PARAMORNIE ABROUTE SECURITY D POLICYHOLDERS

High Cost of Living

Low Cost of Insurance

Midst all the increasing cost of living there's one thing that hasn't advanced,—that's the cost of Imperial Life policies. In fact, an Imperial policy to-day requires no greater annual investment than a similar policy taken at a corresponding age a dozen years ago.

And the fact that the dividends to policyholders in The Imperial Life have shown a gradual increase every year since the Company's inception makes this invest-ment more attractive now than ever before.

Would you care to know the profit returns being made this year to holders of Imperial policies? Our booklet "The Voice of Experience" gives the information.

than they had to.

Say that having figard to the fact that these submarines were re-jected by the naval expert of the sovernment for which they were built; that the builders had no market for them, except Sir Rich-ard McBride on cenail of the Bri-tish Columbia Government; that the boats were reported to be ob-solets and not according to the specifications, and that the naval expert of the Chilean Government reported adversely upon them, it is an extraordinary thing that the price paid for them was equal to the price at which two of the most modern and up-to-date subma-rines could be purchased. every article on the dutiable list is a short cut to tariff revision, which might be invoked hereafter by those in favor of a revision downward. Fin-ance Minister White seeking to avoid a "rich man's budget" and a "poor man's budget" and a "poor man's budget" alike has involved what if may lead to some strange anomalies. Ad valorem duties are as a rule ob-fectionable in a country like this where freight rates produce startling inequal-ity in prices. The stamp duties and other special to the tariff increases, contribute any-thing to the war chest, which must be entirely replenished by leans from the mates? in the same sense as the recent

A significant thing about the de-bate was the personal and party feel-ing quite frankly displayed. Indeed, it is quite apparent that the Liberals, if they press their scandal charges, will be taunted with friendship for Ger-many. Hon. J. D. Hazen went so far as to say that Mr. Pugsley should have refrained from making has charges, even if they were true, be-caused his speech would be halled with satisfaction by the German societies of the United States. The prime min-ister rather warmed up, an unusual thing for him to do, and snapped de-fance at the opposition. He said:

He said: In any observations I make on these questions I shall be govern-ed very largely by the attitude of hon, gentiemen on the other side of the house, and I want them to understand that if there is going understand that if there is going to be a fight and recriminations on these questions it will not be a one-sided fight. We are perfectly prepared to conduct this session on the lines laid down by my hon. friend from Red Deer the other day, but if there is going to be at-tack upon us from the other side of the house, we are quite ready and prepared to carry the war into the enemy's camp. understand that if there is going

and prepared to carry the war into the enemy's camp. To which Mr. Pugsley retorted: I suppose I ought to be very thankful to my right hon.friend the prime minister for letting us, on this side of the house, know that if we have the audacity to attack the government, we must look out for ourselves. In other words, if we have reason to believe that some persons, not members words, if we have reason to believe that some persons, not members of the government, not members of this house, have made secret rake-offs in connection with the purchase of war vessels or of am-munition, and we dare to breathe it in this house, our action will be resented by hon, gentlemen oppo-site. They will take it as showing that we are influenced by partisan spirit and they will endeavor to make the country believe that in some way or other we are ob-structing them in doing their part in connection with this war. They will not terrify me and I do not

think they will terrify any other member on this side of the house. Fitzpatrick and subsequently re-

introduced by so eminent an authority as Sir Alan Aylesworth. Mr. R. L. Borden, then the vigilant leader of

d think they will terrify any other s member on this side of the house. Many people are unable to under-stand why Mr. W. F. Maclean was not allowed to go ahead with his bill to allowed to go ahead with his bill to prevent Germany obtaining from Can-ada thru the United States nickel for her battleships, guns, cannons and builets. There is something sardonic in the idea of our sending soldiers to builets of our sending soldiers to this country would like to see Can-ada keep her nickel at home until the war is over and many members of the house will tell you privately that leg-islation ought to be passed in that direction, but when an M. P. endeav-ors to promote a great public reform he finds his path strewn with techni-calities and legal obstacles of every kind. It is guite the revorse when some great corporation desires to wa-ter, its stock, cut a meion or obtain millions from the public treasury. Mr. Maclean's bill was discharged from the order paper because it was held to be a bill affecting trade, and therefore requiring that the principle should be endorsed by the committee

from the order paper because it was held to be a bill affecting trade, and therefore requiring that the principle should be endorsed by the committee of the whole house. To get such an endorsation would be impossible with-out active aid from the government. Even if it were granted as a matter of form the bill founded there-on would be too far down on the order paper to be reached, because there are only three days in the entire session when private members with public bills have a chonce to be heard. It is different with bills in which bills have the right-of-way three days out of five during the entire session. It is quite doubtful, by the way, if Mr. Maclean's bill required a resolu-tion. A similar measure to regulate the export of electrical current and natural gas was introduced witheut preliminary resolution by Sir Charles

Business Men Can't Make Money Faster than by supplying their needs in Adams' Office Furniture Clearance

We started out a couple of weeks ago to reduce our stock of Office Furniture 50 per cent. because the need of more space for our regular home furnishing lines could only be met by a sacrifice of some considerable portion of the stocks—the office furniture section was the victim. This decision could only be met successfully by a radical reduction of prices and that we have done it is proven by the way we've been selling Desks, Chairs, Tilters, Tables and other office needs—also seen in the few examples shown below and the fact that

Compared With Dangerous Chinese Ways

No one who has ever been shown through one of Toronto's Canadian laundries can have failed to notice what an important part pure water plays in the process of washing. It requires from ten to fourteen waters to thoroughly cleanse the clothing, especially the white goods, which are entirely separated from colored mater-ials, and form an exclusive department in themselves.

G First, the clothes are given a preliminary rinsing, which loosens the soil in the material. Then they are boiled in water that is brought to a temperature of two hundred and twelve degrees, eliminating every possibility of the existence of germ-life, thoroughly sterilizing every article, which is then given a rinsing in each of several pure waters after the boiling process has removed every particle of dirt.

¶ Rubbing, which is not an efficient method of cleansing, and wears clothes out very quickly, has been replaced in the modern laundry by the re-volving washing machine, an appliance that allows the water to circulate con-tinuously through the materials, carrying away all impurities—the same method of running water that in a mountain stream washes every particle of dirt from the pebbles in its path.

I WATER-tons of it-thousands of gallons a day-is one of the most important adjuncts to the modern white man's laundry-water that comes through big two-inch mains in its purest condition, and is used without stint.

Now compare these hygienic methods with those of Chinese Laundries, where the most your articles get is a rubbing in one tub and a rinsing in another; where the sanitary import-taps. Could you possibly expect to get proper sanitary, SAFE attention to the purity of such items as your personal clothing, bed linen, or table linen in these miniature institutions, where space is at a premium, and WATER, the great cleanser, has no more significance than that it will make suds, with which to enable the Chinaman to rub some of the dirt out of your property with his mediocre board in his mediocre tub.

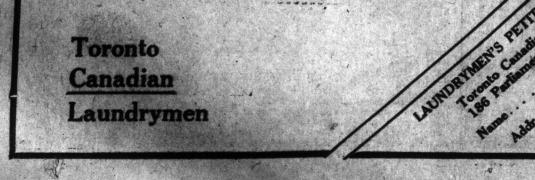

¶ What causes the yellowness of Chinese-laundered clothes? Is it not because they are not properly washed? Where does that greasy, "human" odor come from? Compare this with the fresh, sweet, WASHED smell of Canadian-laundered goods. Are you satisfied with the mysterious work of mysterious yellow people?

I Our object is to gain for Toronto's white inhabitants the right to see for themselves the inside of Chinese laundries.

If There will be a clean-up or close-up of h undreds of these places when the public can see what they should have been able to see years ago.

Sign the coupon—your name will be placed on the petition to be placed before the Muni-cipal Government of Toronto, asking that a by-law be enacted compelling every Chin-ese laundrymen to do by law what the Canadian laundrymen have done with-out coercion—give the public the right of free access to the entire area where their property is laundered. COUPON

I in a subsequent article we will tell you something about the "spray-ing" method—a most disgusting practice that is in general use among Chinese laundrymen.

DOMINION LINE. The White Star-Dominion Line an-nounce that in future the ss. Zeeland will be known as the Northiand. This steamer and the ss. Vaderland will hereafter carry only cabin and third-class passengers instead of first, sec-ond and third as heretofore. The rooms formarily used for first-class will in future be occupied by cabin passen-gers at rates of \$55 and up, and quite a number of rooms which have been used for the second-class will now be used for third-class passengers. The Northland and Vaderland are British ships, built by Harland and Wolff, at Belfast, and fly the British flag. They were formerly in the service between New York and Antwerp, but since the closing of the latter port the steam-ers have been transferred to the White Star-Dominion service between Port-land Hallfax and Liverpool, and should prove specially attractive to the tra-veling public. They are twin screw steamers, 12,000 tons, and exceptional-ly steady. <u>LINEN SHOWER.</u>

veling public. They are twin screw steamers, 12,000 tons, and exceptional-ly steady.
LINEN SHOWER.
A most enjoyable evening was spent at the home of the Misses Smedley, 7 Murray street, on Tuesday of last week, when the members of the "Nick-ed In" Club held a linen shower in honor of Miss Ella Cunningham, who is to be married this month, and who was the recipient of many beautiful and useful pleces of linen.
Marray Street, on Tuesday was spent of the Shower in honor of Miss Ella Cunningham, who is to be married this month, and who was the recipient of many beautiful and useful pleces of linen.
Marray Street, who and I was regarded to the scional street in the members of the "Nick-weak, when the members of the "Nick-d In" Club held a linen shower in honor of Miss Ella Cunningham, who is to be married this month, and who was the recipient of many beautiful and useful pleces of linen.

CHILDREN'S DANCING

the ear for music, artistic sense and taste generally. Children should be allowed to take dancing lessons for a time each year, so that physical growth may not cre-ate angularity. Dancing lessons will serve as a wholesome relief to the ac-tivities of the brain when the child is studying with that intensity neces-sary to acquire a modern education. Parents should regard dancing as a necessary part of their children's education, as the effort to move grace-fully produces a desire also to be gra-cious in manner, and this is one of the best influences of a properly conducted dancing school.-Extract from Prof. S. T. Smith's booklet on dancing. Academy, Geyrard and Pape.

Write to Edward J. Woods, 5485, Station E. New York, N.Y., mentioning this advertise-ment, and my book will be sent you in plain wrapper, postpaid. It tells of my own career and the wonderful method, and gives valuable-information. Not a temperance lec-ture, but a satisfying means of conquering drink habit. No other book like it. Cor-respondence confidential, plain envelops.

by the first of May. 6. The faculty of applied science will hold their examinations practically at the regular times in April. 7. The faculty of medicine have yet to determine whether their examina-tions will take place in April. 8. Students who are candidates for the degree of LL.B. will, since some of their examonations are set in the fac-uity of arts, write at the same time as the arts students. 9. The following resolution was also adopted at Friday night's meeting: "That the senate, having no means of investigating the incident referred to in Mr. Hagarty's motion, does not desire to express an opinion upon it; but the senate hereby records its ap-preciation of the collegiate institutes and other schools of the province, who, in clear and unmistakable language have placed before their pupils the righteousness of Great Bfitain and the infamy of Germany in regard to the origin and conduct of the war." TERPSICHORE REMEMBERS THE VICTORY IN 3 DAYS

TERPSICHORE REMEMBERS THE KIDDIES.

St. Augustine's Church keeps its twelfth anniversary today and specia musical services have been prepared The music at the choral celebration in the morning will be from Gound's Easter Mass, the preacher being the Rev. Dr. Boyle of Trinity College. A the close of the evening service ther will be a recital of sacred music by the choir and orchestra of the church. In this day when their parents and even grandparents are foxtrotting and hesitating, the children are not to be tongotten. Thursday, Feb. 25, Mrs. Mosher will commence her junior class. The miniature men and women Mothers, Wives, Sisters

create considerable fun for the dancers. Pavlowa Academy is the best place in the Dominion for the popular pas-time, Many people that dance there have noticed the vast difference in comparison with other places on ac-provide of the superior ventilation of Pavlowa. Dancing there certainly is good exercise, as the high arched root arrows allows a large volume of Treat it. Ventilation is one of the big fea-tures at Pavlowa Acamedy. Many are also speaking of the Fav-foxa Orchestra, some people even so of far as to express the opinion that this orchestra is the best in Toronto-All the latest hits are produced here; the latest hits are produced here; This new patriotic song is liked as well, if not better, than any music patriote at Pavlowa Academy. To those wishing to learn the new dances, the Pavlowa School of Danc-DRUGGIST

Customers Are Satisfied, and Surprised That There Was No Misrepresentation

AT THE SAMPLE STORE

rgt. Drummer, Harry D. Sum ville, 4th Battalion, 1st Brig Canadian Overseas Conting

Misrepresentation "Our methods are certainly peculi-ar," said Mr. Winn, in answer to our question as to "Why the Sample Shoe Shop was selling more shoes than could be reasonably expected during these times of trade depression?" "We de not admit," he continued. "that there is any such thing as failure so long as the day contains 24 hours and the head a certain amount of gray matter. We have not sold shoes at low prices for the sake of getting a "turn over.' We would not work for anyone élse for nothing, and it na-turally follows that we would not be in businesss for ourselves if there were no money to be made. Tho we have been been satisfied with com-paratively small profits, we have also had three square meals a day, and the money for the rent. In fact, our busi-ness has been so successful that we are selling out our \$30,000 stock and moving to more convenient premises at 26% Yonge street; meanwhile our address will still be \$10 Yonge street, until our new store is fitted out. It would surprise you to know how meany address will still be \$10 Yonge street, until our new store is fitted out. It would surprise you to know how many people have taken advantage of this moving sale. We buy so far ahead that it is to our interest to sell every shoe in this store, and to have our new purchases delivered to our new store

store. WEST END DEFEATED

Oakwood C.L..... 3 Pickering Coll. . Wilson Office..... 7 Wilson Factory.

The inevitable had happened, for the omtinual fusiliade of the Blue and White an was sure to tell. Smythe passed to Sheldon after two indices more of play, and the latter ored another goal and made the score: arsity 2, St. Andrews 0. This came as a result of Varsity boring in the St. Andrews defence. Smythe d the heavy work and handed the puck or to Sheldon to notch the counter. St. Andrews were still held to the de-nsive mainly. Saunders, Smythe and ration, but good work on the part of s St. Andrews goaler prevented several one. Watson tried a long shot from note, which naturally availed nothing atom weakened just before the end of the period, and Gouinlock went off with m to even matters up. The period end-a few seconds later, without further ly, with the score still : Varsity 2, Andrews 0. Intercoilegiate. McGill......5 Queens Toronto Hockey League. Imperial Bank.....4 McCrimmon

HAVANA RESULTS

HAVANA, Feb. 18 .- The races here today resulted as follows :

West End seniors journeyed to Erant-ford to play off their schedulod same, and succeeded in putting over a 47 to 29 vic-tory on the home team. For Brantford, Berry was the shining light, specializing on foul shots and scoring 17 of Brantford's 29 points. Simpson was again the big scorer for the West Enders with six baskets, while Branston and Hamm fol-lowed closely with five each. On points scored the Toronto team have a big lead on the other teams, but Hamilton Y. lead the league with no losses; West End second with one loss and three wins. Fol-lowing is the score: West End (47)-Branston (capl.), 10; Hamm, 10; Simpson, 12; Tait, 9; Thomp-son, 6; Cook, 0. Brantford (29)-Hearns (capt.), 3; Campbell, 0; Berry, 17; McKay, 0; Wood-iey, 4. The game at West End next Saturday night will probably be an exhibition with Hamilton East End Y sendors. FIRST RACE-Two furlongs. lds, purse \$500 : 1. Tabher, 115 (Taplin), 4 to 5 and out.

2. Little Gink, 110 (Nolan), 5 to 1, 8 to 5 and 3 to 5. 3. Nellie B., 115 (Peake), 4 to 5, 1 to 3

Stration got his first penalty in the statinings of his first penalty in the second period. Indies got in some effective work Wat-in had a chance to score with the goal but, but he was not quick enough to its advantage of it. Ramsay took the satuston broke up Wallace's rush by ef-intation broke up Wallace's rush bet in front and them behind 3t. The solut no score resuited. Thine 1.142.5 Minda, King fizdford, handled them. Watson was knock-that up ys a hard collision with Ramesy. A Greene also ran.

IMPERIAL BANK WIN IN TRADE SECTION

By defeating McCrimmon & Co. at Riv-By defeating McCrimmon & Co. at Riv-endale Rink yosterday afternoon by a 4 to 1 score, Imperial Bank cinch the hon-ors in the trades section of the Toron-to Hockey League. Eaton's have de-faulted the balance of their games. McCrimmons spolled their chance of a win to the up the league by ineffective back checking in the first period, when the bankers scored three to the brokers' mone. They came back in the last period, however, when each team scored one. McCrimmons have one more chance at the bank team.

WEST END MEN DEFEAT THE EAST. In the match, West v. East, held on

the 11th, the West End players, again OFFICE TEAM WON. came off victorious, by the score of 45 East. Hooey (capt.). 1 2 Jennings 1 2 Beacock 2 Boasi

A game of hockey between the office staff and the factory of the Andrew Wil-son Company, Ltd., on Saturday after-noon resulted in favor of the office play-ers by a score of 7 to 3. The game was played at Bayside Park. Ed Humphrey and MacIntyre starred for the winners, the former scoring two and the latter five goals. goals.

OAKWOOD C.I. BEAT PICKERING COL.

In a closely-contested game, Oakwood defeated Pickering College on the for-mer's ice by the score of 3 to 2. Line-up for the winners: Goal, Baird, defence, Crang and Hindes: rover, Little; wings, Mirchell, Bishop, Rochester. M.Y.M.A. BASKETBALL.

Jones Pennington Restall

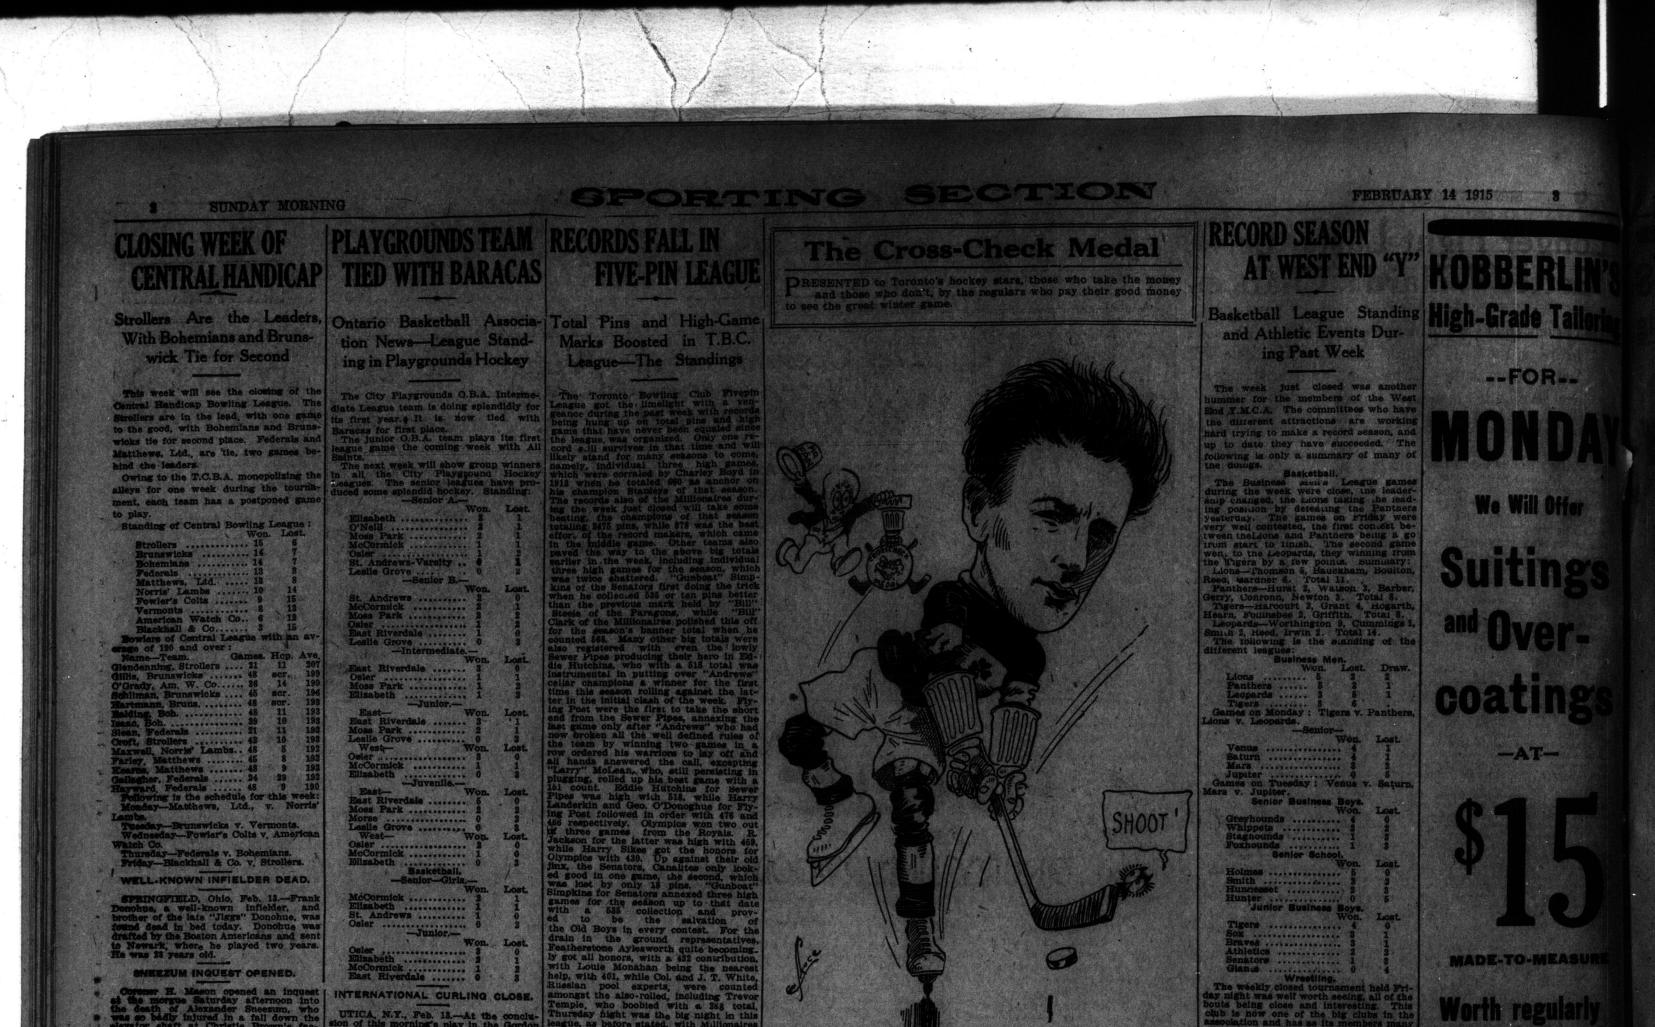

hockey all season in his very ed, he made good in his very game and has been improving with every performance. He is especially good on the offensive and would mak a rattling good forward. He has a rattling good forward. He has a rattling good forward. He has

1 learned many of Dissette's tricks and teams up well with the good Jimmy. It is not known at the time of writing whether the Saints will use Glad Mur-phy as Dissette's partner and move the should happen. Murphy can be relied upon to put up a rattling good argument. The only thing that the Vics, have on the Saints here is two men who have played together for some time and ard probably a little stronger on the offensive. Rankin is the Peer. Move up to rover. St. Michaels have the ever dangerous Rankin and Vic-torias Stephenson. This position must be conceded to the Saints. Rankin, to our way of thinking, is the most dangerous man in hockey. He is ever ready to break out with a rush and a shot that has broken up "nore games than anybody on record. He can shoot from any angle and breaks like a finsh. Stephenson is hardly as fast as Rankin, but the stronger man of the two on his feet. Stephenson is a hard checker, and will do more effective body work than Rankin, but he jacks the quickness to break as fast and is hardly as guick with the shot in a ticklish position. The Saints again have the edge here. Saints again have the edge The

here. At centre the hardest job is I for Mr. Dopester. Gordon Meek Dr. Jerry Laflamme are oppo one another, and nobody yet h one another, and nobody yet able to agree on who is the be players have a style all their both styles are effective. Le poke check and his habit of a puck ahead and following in is simply marvelous. and it will be one of the greatest battles in hockey history for the centre honors. It looks very-even at this po-

Nonors. It boks very even at this po-sition. Harry Meeking is Best. Over at right wing if Richardson plays for St. Michael's, you will have to give it to Victorias. Richardson is a ready little battler and a feal veter-an but he is slowing up and Harry Meeking, for Victorias, is only a young-ster, and a mighty good one at that. Harry can check with the best of them, is a good skater and a grand puck carrier. It may make a lot of difference if Merrick is moved up into this position. Not knowing the exact line-up the right wing position favores Victorias.

Victorias. Hughie Aird is the new man for the Vics, and at left wing he has scored more goals than any other man on the team. His shots are hard but mostly from outside the defensive, and he will hardly get as many past the good Saint goalers as he did in his group

if anyone will take out just what Job

it goes thru, I would also to move it can be done. It looks like rough and raw w and if Richard Klegin is Bradts visor, as report has it, he is the to blame for the attempt to cross unsuspecting Cubans. Klegin in all about McKettrick's close con all about three fighters nomin

Just then the mare stumbled and fell Bright to remark: "Yes, and she's going down another mouthful of it now." hang on to the ce the last four subly can by practicing patience and stotcism. The boxing fans here and everywhere would think more of the champion if he would consent to take on some of his many challengers over a route to a decision. ten years younger, at the word dissi-A N ACTOR, whose first name Dave, but whose last name not warfield, has been maue to order for the ways of his craft for generation. They let up on him mos means, so far as practicing it of its many forms goes. There-the battle does simmer down estion of which man can re-his feet for two hours and a route to a decision. There are several men entitled to matches with Welsh who are not being given a tumble at all---not even a crack at a no-decision match. They are Johnny Dundse, who tried to get the job as Charley White's substitute the night the latter was taken ill, and Jack Britton, who would be willing to concede almost everything in the way of gate receipts to step in the ring with the component the odds will be in favor omething of a tryout for the thing, Willard can hit and d, too. I think he can deliver harder punch than Johnson f course, having a punch and how to land it are two differ-night that s, and that is where Johnson concede a bim became included. Hence he has of its accomplishment. Hence he has become something of a tryout for the junior comedians who have merely to trade a vanity that is superb and an exclusion that is superb and an imagination that is unique Dave is one of the class has an ace buried. If you were to re-fer to a 100 yard running record he would tell you that he covered the distance in ten seconds when he was 16 years old. Nobody ever caught a but if Willard fights on the for a dozen or more rounds, chances to get in effective bit gate rectapts to stop in the terms the champion. But Freddy is patient and a stok, and can bide his time, even if the fans can't. He is in no hurry to meet Dundee or Britton. Maybe he figures, like a great many others, that the re-sult of a bout with alther would set him back some. However, Welsh has agreed to box Willie Ritchie ten rounds at the Gard-en next month; and confidently counts on outpointing Willie over a short course as he did for twenty rounds in London. But Freddy may be down in the cards for the surprise of his life-time. Personally, I believe Ritchie will oeat him beyond all question of dis-pute, unless the champion shows wonderful improvament over his form in recent matches. allops will be growing slimmer and immer as the fight grows older. Many believe Johnson will fall be-re the first real good man who meets m. But few regard Willard as a good man." If Jack were to battle im Langford, I believe that the Bos-n tar baby would be the favorite the betting. And when we recollect at Frank Moran stayed the limit of tenty rounds with the champion last 16 years old. Nobody ever caught a larger fish or squeezed out of a smaller hole. He has been everywhere, seen everything, and can pick fanciful facts out of the air as a coin juggler fills his hand with fail dollars. Having sketchod Dave briefly, we will proceed with a typical narrative and without pausing to comment on the capacity for villainy possessed by the other actors concerned. They were all of the old New York Casino regime—Dan Daly, Dick Carle, Lee Harrism, and Billy Gould. It was in summer, and they were not working-altho Dave was. The idlers were ac-customed to kill part of their evenings nds with the champion last will not be surprising if an the Pittsburger, sticks the forty-weight the doesn't do any more, Willard Has No Medais. Taking the records of the two men ad comparing them, what do we get? ed to kill part of their evenings

vana, had matched Sam Langtorn and Sam McVey to box twenty rounds as the opening of his new club. Last week we were told that the colored nen would not meet, and that Young Ahearn and Willie Lewis, the veteran, would box instead on Feb. 18.

I don't know Mr. Bradt, but if he trying in good faith to develop t sport in Cuba, then someone is puttin something across on him. You

Curley thinks Willard will win. He honestly does. The subject has become a nightmare to him—the talk that Willard has no chance. If you want to listen to a sound reason why a championship can be won. you should let Curley buzz in your ear by the hour as he has done to the Gotham scribes. By 1goe. N EW YORK, Feb. 13.-What with Lil Anthuh John-Arts Express ten high men in A League: Hdp. Aver scr. 19 son afraid to poke his nose on Mexican soil in the vicinity of Juarez, and the goody-goodies rearing up on their hind legs in El Paso for Brunswicks and, Athen...... Athenacums buzz in your ear by the hour as he has done to the Gotham scribes. Now he is flooding the country with more reasons why Willard will win. Perhaps the most unique one is that no heavyweight ever won the world's title going into the ring much better than 4-1 on the short end. He cites Corbett against Sullivan. Corbett against Fitzsimmons. Fitzsimmons against Joffrees and Jeff against Johnson. And the funny part about it is— Curley is right. If Willard is kept from worry— if there is nothing that will prey on his mind, as the threatened interference will certainly do, then he has a royal chance. He has never had a knockdown punch landed on him, he has faced all the hard hitters, and tho a novice he has toyed with them, his nose has never been bloodly in a fight, he never had a black eye, and he never expects to have one. All in all, the big fellow is worth a bet. Where he will shine against Johnson will be his infernally long reach, his hard fast punching, and his ability to take his time up to the point of exasperation on the part of handlers and audience. the purpose of delivering a conidens scientious squawk against the mixed crowd that a world's heavy-...... He is in bad, and very bad with the United States Federal authorities, and Villa's enemies are as anxious to snail Jack as his Chicago foes are. Jack Curley, who knows more about staging "big time". ath-letic acts than any man in the world is prepared for a dozen different jumps if the weather gets MICHIE'S

part of handlers and audience. There never was a man who could kid along like this big novice. It is difficult to make him fight back hard. The only time he does it is when the crowd begins to ride him when his opponent lands a particularly effective blow on him. Then Jess can certainly tear. The pity about this fellow is that he has been horribly mis-mahaged. Had he fought at least once every two weeks since he entered the ring he would be an even money charge with Johnson right now. DR. SOPER DR. WHITE even money chance with Johnson right now. These fights would have in-oreased his natural speed, he would be hitting faster and cleaner, and no man alive could hope to job him off with left hand pokes. Jess has the longest arm of any man fighting today, by six or seven inches. That is a tremendous ad-vanage if applied, and constant boxing would have developed this and all of Willard's natural advan-tages. He has a chance, mind you sunschooled or not. Mr. Johnson is going to be a mighty tired fighter before he is half way thru that 45-round affair, and if to ever does get tired-well it tooks like a change neightor. Now, the only thing that worries is is—will it come off? Opposi-arizes and says, "No." Curiey and his merry cohorts, likewise aris-1 211 12 SPECIALISTS Dyspepsia Epilepsy Rhoumotis

ATARRH

OF THE BLADDER

Belleved In

4 Hours

By JAMES P. HAVERSON.

SEVEN A.M. is technically part of the morning, but in all its essentials it belongs to the night. At this hour only the shivering shop girl, the sleepy shipping clerk moneyed magnates of uneasy conscience are astir. Roused by the voice of the alarm clock, the boarding-house lark, there crawl forth from all sections of the city, the driven slaves of the time-card. Those whom necessity drives out into the chill dawn, pour into the streets at seven a.m.and only these.

This is the time when mother or the maid patters down stairs, and, gingerly opening the front door, rescues the morning paper from the snowdrift on the mat. Soon the fumes of sizsling bacon mingle with the second clatter of the household enemy, the alarm clock, and youth arises hastily to slam shut the open window-what was hygiene at night is held at seven a.m. Gingerly, Our John rescues his underwear from the floor, where he had cast it upon retiring. Bitterly does he regret the hasty careless which allowed him to forget to spread his garments over the comforting heat of the radiator.

With sleep in his eyes and collar and tie in his hand, the stumbles downstairs in the semi-darkness to scald his ips with steaming coffee, before scurrying into the street. With hands in pocket and chin burrowed into his collar, he fares forth into the street to join the procession of sllow slaves, making first footprints in the virgin snow. Shiveringly, he and they trudge to their accustomed street car stop. From a neighboring doorstep issues a salamander (chicken is passe, and almost obsolete). Last night, or even later today, he would not think of passing her without a smile, but to smile at seven a.m. requircs a high order of courage. Napoleon, or was it Wellington, valued lighty in his fighting men what he called "2 a.m. courage," seven a.m. courage is good enough for me. He who a smile at 7 a.m. might be a hero even in the "Princess

Down thru snow filled tracks, comes the street car. All its rush and clatter, even the voice of the strident gong, is stilled to somnolent sound-almost a snore. Across its face, fall in desultory procession, a rew scattered and sleepy snowflakes. Its headlights, often lit at seven a.m., glare sullenly and sulkily thru the murk.

Still, and even usually, cars travel rapidly enough at this unearthly hour to leave folk stranded at the stops, arrived just soon enough to anathematize the vanishing back platforms. When one boards a car, the wonder is that seats are not aplenty, but every car is filled with the pale and miserable hosts of the Army of the Employed. Here and there a man attempts the conjurer's feat of unfolding his newspaper. Even should he succeed, it is doubtful if his sleepy eyes will be able to discern the hazy letters

Early birds, but missing-the car.

on the shivering page. Arrived at the city's various cen-tres of employment, one is horrified to see great droves of folk filing into the doors by which employes enter, and on certain days, not long behind the shivering shop-girl, comes the bargain-hunter, who is perhaps the only willing riser known to seven a.m.

But why go on? When The Editor asked for a story about 7 a.m. I told him then, and still believe, that there is no such hour-none at any rate in the common life of man. I remember once getting up at that time to catch a train-I missed it and have never tried the experiment again.

The stenographer who typed this story wanted to have nothing to do with it when she learned that it concerned a thing so unseemly as seven o'clock in the morning. She seemed to think it hardly respectable even to write of such an hour. She said it made her feel almost like a shopgirl, which opens the way for the suspicion that there are unfortunate ones forced to have to do with 7 a.m. I complained to The Editor of the matter, setting out the complained to the Editor of the matter, setting out the objections mentioned above, but he assured me that the suggestion for this story had come from Captain Tom Wallace, M.P., a man I know and trust. More than once, have I caught him telling the truth. The Editor said that. Captain Tem had said that, back in the early days at Woodbridge, he had frequently risen at 7 a.m., but I suspect this was in the summer time. However, a fair man will try

anything—once. In order that I might be able to say that I had at least given the story an honest trial, I secured an alarm clock, which the clock-seller assured me to be honest and efficient. At midnight I wound up all the winders, set the hands and indicator for seven o'clock and went to bed. Mind you, I am answerable for nothing that followed, save, in as far as responsibility attaches to these tinkerings with the clock. I went to bed and sNot.

I do not know when it was. It seemed not more than a moment since I had closed my eyes, when I was awak-ened by a hideous uproar. Visions of a burning house. earthquakes and attacks by German hordes, flashed thru my sleepy mind. I leaped from the bed to find that fiendish alarm clock dancing from leg to leg, while the clattering clapper struck fire from the gongs on its top.

Seizing it by these shrieking bells I dragged it to the dim light of the window and glared into its face. And then, for the first time, I saw sneering at me from its rotund Teutonic countenance, the insulting legend-"Made in Germany." Hurling it out of the window, I went back to bed, lulled by its last ineffectual grumblings in a

neighboring snowbank. All editors are inexorable and this story had to be written. Further, there had to be pictures, therefore they were made. The picture you see of the street car ad vancing thru the snow was made on Avenue road. It was made at noon, and we had to wait a considerable time to Continued On Page 2.

A Pause in the Preparation of Dinner in a Gypsy Camp.

ed in the great wastes He, John Bickersteth, was

her husband—who, like Sir Humphrey Gilbert, had said that it mattered little where men did their duty, since God was always near to take or leave as it was His will. When Bickersteth went, it was as the one they had known all their lives had passed; and the woman knew also that a new thought had been sown in her daughter's mind, a new door opened in her heart

And he had returned. He was now looking down into the valley where the village lay. Far, far over, two days' march away, he could see the cluster of houses, and the glow of the sum on the tin spire of the little Mission Church where he had heard the girl and her mother sing, till the hearts of all were swept and her mother sing, till the hearts of all were swept by feeling and ravished by the desire for "the peace of the Holy Grail." The village was in truth, but a day's march away from him, but he was not alone, and the journey could not be hastened. Beside him, his eyes also upon the sunset and the village, was a man in a costume half-trapper, half-Indian- with bushy grey beard and massive frame, and a distant, sorrowful look, like that of one whose soul was tuned to past suffering. As he sat, his head sunk on his breast, his elbow resting on a stump of pine — the token of a progressive civilization--his chin upon his hand, he looked like the figure of Moses made immortal by Michael Angelo. But his strength was not like that of the man beside him, who was thirty years younger. When he walked, it was as ono not like that of the man beside him, who was thirty years younger. When he walked, it was as one who had no destination, who had no haven toward which to travel, who journeyed as one to whom the world is a wilderness, and one tent or one hut is the same as another, and none is home.

Ever and ever thru long months the everiasting white glitter of the snow and ics, ever and ever the cold stars, the cloudless sky, the moon at full, or swung like a white sickle in the sky, to warn bim that his Like two ships meeting hull to hull on the wide seas, where a few miles of water will hide them from seas, where a few miles of water will hide them from each other, whose ports are thousands of miles apart, whose courses are not the same, they two had met, the elder man, sick and worn, and near to death, in the poor hospitality of an Indian's tepes. John Bickersteth had nursed the old man back to strength, and had brought him southward with him — a silent commention who spoke in measurable but a back life must be mown like grass. At night to sleep in a bag of fur and wool, by day the steely wind, or the air shaking with a filmy powder of frost; while the illimitably distant sun made the tiny flakes sparkle like silver-a poudre day, when the face and hands are most like to be frozen, and all so still and white companion, who spoke in monosyllables, who had no conversation at all of the past, and little of the and passionless, yet aching with energy. Hundreds upon hundreds of miles that endless trail went windpresent; but who was a woodsman and an Arctic traveler of the most expert kind, who knew by instinct where the best places for shelter and for sleeping might be found, who never complained, and was wonderful with the dogs. Close as their associ-ation was, Bickersteth had felt concerning the other that his real self was in some other sphere or place towards which his mind was always turning, as tho to bring it back. Again and again had Bickersteth tried to get the old man to speak about the past, but he had been met by a dumb sort of look, a straining to understand. Once or twice the old man had taken his hands in both of his own, and gazed with painful eagerness into his face, as the trying to remember or to com-prehend something that cluded him. Upon these occasions the old man's eyes dropped tears in an apathetic quiet, which fortured Bickersteth beyond bearing. Just such a look he had seen in the eyes of a favorite dog when he had performed an operation on it to save its life-a reproachful, non-comprehending. Bickersteth understood a little of the Chinook language, which is familiar to most Indian tribes, and he had learned that the Indians knew nothing exact concerning the old man; but rumors had passed from tribe to tribe that this white man had lived for ever in the farthest north among the Arctic tribes. and that he passed from people to people, disappear-ing into the untenanted wilderness, but reappearing again among stranger tribes, never resting, and as one always seeking what he could not find. One thing had helped this old man in all his travels and sojourning. He had, as it seemed to the native people, a gift of the hands; for when they were sick, a few moments' manipulation of his huge, quiet fingers vanquished pain. A few herbs he gave in tincture, and these also were praised; but it was a legend that when he was persuaded to lay on his hands and close his eyes and with his fingers to "search for the pain and find it, and kill it." he always pre-, vailed. They believed that the his body was on earth his soul was with Manitou, and that it was his soul which came into him again, and gave the Great Spirit's healing to the fingers. This had been the man's safety thru how many years-or how many generations-they did not know; for legends re-garding the pilgrim had grown and were fostered by the medicine men who, by giving him great age and supernatural power, could, with more self-respect. apologize for their own incapacity. So the years-how many it was impossible to tell. since he did not know or would not say-had gone on; and now, after ceaseless wandering, his face was turned towards that civilization out of which he had come so long ago-or was it so long ago-one generation, or two, or ten? It seemed to Bickersteth at times as the it were ten, so strange, so unworldly was his companion. * At first he thought that the man remembered more than he would appear to acknowledge, but he found that after a day or two everything that happened as they journeyed was also forgotten. It was only visible things, or sounds, that appeared to open the doors of memory of the most recent happenings. These happenings, if not varied, were of critical moment, since, passing down from the land of unchanging ice and snow, they had come into March and April storms, and the perils of the rapids and the swollen floods of May. Now, in June, two years and a month since Bickersteth had some into the wilds, they looked down upon the goal of one at least -of the younger man who had triumphed in his quest up in these wilds abandoned centuries ago. With the joyous thought in his heart, that he had discovered anew one of the greatest gold-fields of the world, that a journey unparalleled had been accom-plished, he turned toward his ancient companion, and a feeling of pity and human leve enlarged within him.

SWATTOWS

HOMEWARD FIN

Where this man had gone none other had been of white men from the western lands, the from across the wide Pacific, from the eastern world, adventurers and exiles had once visited what is now known as the Yukon Valley. So this man, browsing in the library of his grandfather, an eastern scholar, had come to know; and for love and adventure, and because of the tale of a valley of gold and treasure to be had, and because he had been ruined by bad investments, ho had made a journey like none ever essayed before. And on his way up to those regions, where the yell before the face of God is very thin and fine, and men's hearts glow within them, where was no vasis save the unguessed deposit of a great human dream that his soul could feel, the face of a girl had haunted him. Her voice-so sweet a voice that it rang like muffled silver in his ears. till, in the everlasting theatre of the Pole, the stars seemed to repeat it thru millions of echoing hills. growing softer and softer as the frost hushed it to his ears bad said to him late and early, "You must come back with the swallows." Then she had sung a song which had been like a fire in his heart, not alone because of the words of it, but because of the soul in her voice, and it had lain like a coveriet on his heart to keep it warm-

"Adieu! The sun goes awearly down, The mist creeps up o'er the sleepy town. The white sail bends to the shuddering mere, And the reapers have reaped and the night is here.

"Adieu! And the years are a broken song, The right grows weak in the strife with wrong, The lilies of love have a crimson stain. And the old days never will come again.

"Adicul Where the mountains afar are dim Neath the tremulous tread of the scraphim, Shall not our querulous hearts prevail, That have prayed for the peace of the Holy Grall?

"Adicu! Sometime shall the veil between The things that are and that might have been Be folded back for our eyes to see, And the meaning of all shall be clear to me."

It had been but an acquaintance of five days while he fitted out for his expedition, but in this brief time it had sunk deep into his mind that life was now a thing to cherish, and that he must indeed come back; the had left England caring little if, in the peril and danger of his quest, he ever returned. He had been indifferent to his fate till he came to the valley of the Saskatchewan, to the town lying at the foot of the maple hill beside the great northern stream, and saw the girl whose life was knit with the far north,

It is—h -dh, love o' God, un r John Franklin, and all the un-here! You remember the ship—the An-here! You remember the ship—the An-here! You remember franklin?" old man say you remember Franklin?" The thing had seized him. Conviction was upon old man say you remember franklin?" The thing had seized him. Conviction was upon in and he watched the other's anguished face with and he watched the other's anguished face with and he watched the other's anguished face with the long hands, the long hands, have a anguish and excitement in his own. But-but it might be, it might be her father-the eyes, the fore-head are like hers: the hands, the long hands, the pointed fingers. "Deer old man, did you have a wife and child, and were they both called Alice-do you remember? Franklin-Alice! Do you remember?" The old man got slowly to his feet, his arms out-stretched, the look in his face changing, understand-ing struggling for its place, memory fighting for its own, the soul contending for its mastery. "Franklin-Alice-the snow," he said confusedly, and sank down.

"Franklin-Ance-the Shows and sank down. "God have mercy!" cried Bickersteth, as he caught the swaying body and laid it upon the ground. "He may there-almost."

"God have mercy!" cried Bickersteth, as he caught the swaying body and laid it upon the ground. "He was there-almost." He settled the old man against the great pine stump and chafed his hands. "Man, dear man, M you belong to her-if you do, can't you see what it will mean to me? She can't say, no to me then. But if it's true, you'll belong to England and to all the world, too, and you'll have fame everlasting. If have gold for her and for you, and for your Alloc, too, dear old man. Wake up now and remember if you are Dyke Allingham who went with Franklin to the silent seas of the Pole. If it's you really you, what wonder you lost your memory! You saw them all the white world round them. If you were there, what a travel you have had what strange things you have seen! Where the world is loneliest, God lives most. If you get close to the heart of things it's uo marvel you forgot what yoy were, or where you came and gone, that make up the soul of things, that make the pulses of the universe beat. That's it, dear old man. The universe would die if it werent' for the souls that leave this world and fill it with life. Wake up! Wake up, Allingham, and tell us where you've because if didn't matter; you knew that you were, only ome of thousands of millions who have come and gone, that make up the soul of things, that make the pulses of the universe beat. That's it, dear old man. The universe would die, if it werent' for the souls that leave this world and fill it with life. Wake up! Wake up, Allingham, and tell us where you've because and what you've seen." He did not labor in vain. Slowly consciousness that be holor. In the face was much the same as it had been before. The struggle had been too great, the fight for the other lost self had exhausted him, mind and body, and only a deep obliquity and a great weariness filled the countenance. He had come back

HERE was the sound of a man spitting, followed by bad language. Out of the darkness ten yards away there came: "Hullo,

what's up?" "I was just going to curl up here; thought it was a pile of straw; but it's the corner of a pigsty or a manure heap — (sniff). I don't know which, I'

"You're too particular. This Isn't a bed of violets exactly, but it's straw anyway, fairly

room for two. Come across here." A scuffling noise over the cobblestones as of a man walking in solution for two. Mind your head-and my rifle! That's it, to the

th a rustle and clatter some one sat down and

"That's better."

He fumbled in his haversack and pulled out a pipe hich he filled. Putting it between his lips ne acked at it-unlit-solemnly. It was foul and

sacked at it-unlit-solemniy. It was four and wheezed at every pull. "Match?" said the other. "I've still got a few, but Pve got no baccy. I'll swop a light for a fill." "Right-o! Give us your hand." No pouch was passed—the man were strangers—but a load of to-bacco was pressed into the outstretched palm. There

Was a pause. "Ready?" "Ay." The match was struck with cars and shielded be-tween a pair of hollowed hands. One after the other the pipe-bowls were inserted and the fiame was drawn down on to the glowing tobacco in a long tongue. Released between each draw it blazed up momentarily ing on and cast enough light to show two soldiers sit a heap of straw under a lean-to roof which was in a corner of a yard against a barn-like building. Round the enclosure was a low wall, and in the other corners were some vague heaps and rough sheds. Barely had the light of the match flared up finally after the pipes were alight than a hoarse voice was heard from the wall on the right: "Here, hold hard, don't chuck it away," and two more soldiers, almost falling over the wall into the circle of light, scrambled up over the damp cobblestones just in time to make use of the last flicker. With a word of thanks they again

Besides showing up the two men on the straw, the match had lasted long enough to show that one of them was wearing only one boot the other foot was beedered. This man had noticed that the number on the other's shoulder-strap was not that of any regiment in his brigade. Hullo! What are you doing here? Lost yourself?" The reply was given slowly and in jerks between puts of smoke. "Tes; mounted man; sent back with message resterday; tried to rejoin my regiment; horse shot; couldn't get a remount; ordered to join nearest force —this brigade. I struck your regiment; here I am "Where's your own lot?" "Miles away on the flank." "Been with us all day?" "Yes, since last night." "Then you've helped to attack this place?" "Many down your side" "Ah! I wonder how long we shall have here?" "All night, I suppose, unless they attack us-at's why we've been doing all this work fortifying place since we got in. What's your fob been?" The other did not speak. He gently slapped the blade of a small shovel which was dangling by his side. The speaker continued; "I haven't got one. I've been making loopholes with my bayonet-had nothing else. I carried out ders: but please God some one knows what the icopholes fire on-I don't. It was dark when we started work; but it strikes me that if we use them we shall be shooting our own men in the back." "Dessay: things are bound to be in a bit of a mess hen you get a place at night. Why did you come in here. What put you on to this straw? The yard don't smell too nice." "To get out of the wind; and I guessed there might at home that are worrying us, nothing else." be some straw that wasn't sopping under the lee of this barn-place." said the mounted man. "I tried the barn first; but, once I got inside, the ok of the roof against the sky was enough. Our suns must have got on to it pretty often. - The whole show may tumble in any moment. I expect it is full of their dead. too." "But there's quite a crowd of our fellows in there

C BS COL. E. D. SWINTON. D.S.O. R.E. OFFICIAL "EYEWITNESS" OF THE BRITISH ARTY

orroding us. They"—he waved his hand vaguely oward the front of the village—"haven't got these houghts to worry them. They feel they have ustice for all. We may have been fools not to have een thru it before, but we've got to stick it out ow!"

issuice for all. We may have been fools not to have seen thru it before, but we've got to silck it out on.".
"Yes, we have been fools, but we've learnt a loh, and some of us are pretty near the limit."
The system of us are pretty near the limit.
To more was said. The two men lay still Dawn was approaching. The sky was growing lighter, and the various objects round assumed vague shapes. There was a creaking noise up in the roof of the barn.
I increased to a sound of snapping. "
"Mind yourself—the root." shouted the lame folder and jumped up. As the other sprang off the straw the roof of the barn fell in with a crash. The thrust of the rafters pushed out large masses of any the wall, and the lean-to shelter, just vacated drumps the air was filled by a choking cloud of dust and dry mortar from the interior of the masonry.
"Get a light from the hospital—that house over his he tried to force the door of the barn, which, opening inward, was jammed with debris. He muttered "the was the chorus of cries that rose from the mass of masonry and timber inside the building as ushowed at the door.
The stray of the sky had now assumed a greenish of dropping fire segan, and. finally the ratter spread out stray the nother, the another, he inset of mass of masonry and timber from a gun nearby brought as fille out a finally the ratter spread out the stray of the sky had now assumed a greenish of dropping fire segan, and. finally the ratter stray the soft of orgetting even his brother, the lame man dodged to forgetting even his brother, the lame man dodged to be down a fresh cascade of bricks. Torgetting his foot forgetting even his brother, the vall into the yard. down a fresh cascade of bricks. Forgetting his foot forgetting even his brother, the lame man dodged the shower and ran for his rifle. The other, now running up with a lantern, fell over the wall into the yard. Quickly scrambling up, he vanished over the an-closure in order to test practically the direction of his loopholes. But the smashed lantern lay where it had failen, a rivulet of flame sneaking quickly and silently between the cobblestones toward the heap of straw. A thread of dense smoke crawled softly up the wall of the building, and then the barn itself, the yard, and the immediate neighborhood were lit up in a flerce orange glare. The "slaves" were actually making an attempt to

to side, or rock to and fro muttering. No one tails and the only near sound to break the monotonou walling overhead is the smack of stray bullets int the sides of the hollow and the ratile and clank or rife or danging shovel as men move. Even the light it is not a pleasant sight. They are not pleasant men—these soldiers at their lasp gasp. Tattered unshaven, and tanned, the congested blood of wound scarcely shows. Fifthy they are too, not with the homest grime of a day's toll, but with the repulsive accumulation of a much longer period, and the sho of the ratine is tainted with the reek of an unwashed growd

But ng of exasperation has at last crept into their and is demornizing them. They feel that ave been made scapegoats. They have been ools, and again Fools.

fools, fools, and again Fools. Soon when ammunition and supports arrive, they will move on again toward their objective. Now they are resting and thinking. These pauses are welcome to tired nature; not so the thoughts which so insistently come with them. The man without the boot has arrived safe so far, and is sitting at the bottom of the hollow. He has not seen his chance bedfellow and month.

who is now connected by telepicies with anxiously inquires as to supports. Those who are not too self-absorbed listen for the guns behind, which will cover the adva inforcements. It does not begin. Rein are not easy to find in this army even wh

required. A gentle rain begins to fall and the air grown The man with the bare foot continues to The he is becoming chilled and stiff, he do notice the rain; his foot feels cool, and he content rewraps it in the now wet rag. These round is digging out little hollows in the ground to ear rain-water, and are sucking the wet pebble does not notice. The little hollows slowly to shallow pools, and the strange spectacie is on a herd of men on all-fours lapping from the with sucking noises. He does not notice. She is brought to actualities. A feeling of grips him: he feels unaccountably ill, forlow manned: his body sways. Is he going to fails and puts it into something quits coid. He down: he is seated in a trickle of muddy wat is noth

"I know. It's warm inside, and dry; and some "em are so fed up they don't care a damn what

happens." There was no more conversation for some time The glow of the pipes, however, and the rustle of the straw as the men fidgeted, showed that they were not sleeping. They ought to have fallen asleep t once, for they were tired out, having marched far and fought hard during the two previous days. They were taking part in a large attack-successful as far as they were concerned, in that they had gained sion of the village for which they had been fighting all day. After the enemy had been finally driven out of the place there had still been much to do in strengthening it against any possible effort at apture. The otherwise unimportant. It was a pping-stone for the merrow's advance. The rearied men had been digging, knocking holes in walls, driving in stakes, and struggling in the dark with obstinate and savage barbed wire until the night is far advanced. They had then been allowed to ad and rest wherever they could find shelter near sir position. Not many besides the wounded were buildings, for the firing line was on the outer fringe of the village, some way from the houses. It was in tod-sheds, yards, barns, cow-houses, and sties that he lucky ones got shelter. The rest were out in the The the temperature was not really low. a hight seemed cold to the sweat-soaked soldiers the had been fighting and crawling all day in the Moreover, they were wet; for it was under of a rainstorm that they had at last succeeded

thru the

"Hullo! Where? Ah-Oh, I must 'a' dozed off. I was dreaming about my brother."

could have so much spirit. Why, they fight like the devil-at any rate quite as well as us. And from the prisoners and wounded that I have seen, they don't em very downtrodden, neither. They don't appear to have much of a grievance!"

"No, why should they?". Why, they're forced to fight whether they like it or not, aren't they?"

"That's just it. They're all in the same boat and they're all doing their best."

"You mean they aren't worried by thinking of the -well-who are we all thinking of?" "That's what I mean. It's our thoughts of those

"I believe you. We are beginning or, I should say, have begun to regret we ever came. Is it the danger, the wounds, the hardships? No! Is it the filth? No! Why, I am lousy-lousy, man, and I don't much care! Then, what is it?"-he was overwrought and sleepless, and his voice rose to a husky shout-"I ask you."

"We all know," said the other somewhat wearily: he had heard all this several times, and the it was true, repetition was vain. "But it's not much good going over it again. Those that know it best and feel it most perhaps say least."

"You're right," was the reply; "what's the good of

"I say." "Yes." "Up to talking?"

"Up to talking?" "Oh, yes—may as well." "There's one or two things I want to know — perhaps you can tell me. I'm a thinking man, mind you, tho I've not had your advantages in position and education. I work for my living at home—" "So do L tho possibly in a different way. Out

with it." "Ought not the people attacking to have the ad-vantage in numbers, about three or four to one, or something of that?" "Yes, that's the idea."

"Yes, that's the ides." "We're attacking. Have we got it? It don't look so to me. As far as I've seen they've always had the pull over us so far." "So they have. They've got far more men than we have."

we have." "Then what I say is, why don't we let them attack us? Let them do a bit of the advancing in the open while we do a bit of shooting from the trenches. That sounds right, don't it?" "It sounds all right: unluckily we can't afford to wait. We must try and finish them off soon — to wait would be to play their game. As they can re-inforce three or four to our one—and better trained men, too—every hour goes against us. That's why we are shoving on so hard now. We have marched quick and concentrated here suddenly in order to neutralize this disadvantage, and I suppose we have

HE third frock, for school wear, is of pale yellow linen, cut in one piece, with smocking below the shoulder line front and back, and around the wrists of the long tight sleeves. It opens in front so that it can be slipped on over the head. The closing is effected by means of small black buttons and loops of black braid. A wide belt of the linen, fastened with a gun-metal buckle, is worn below the hips.

roadway will be manufactured, laid finished on the grounds. The largest and most complete assortment of roadbuilding machinery ever assembled in one place will be on display, and in

actual operation. One of the unique features will be . Made-in-Canada plant fully-equipped in every detail and design to show the calibre of roadways that Canada is destined to have in the future. May Build Highway

Around University

A suggestion that the different concerns represented unite in building sections of roadway all about the university park, has been advanced. In this way a permanent highway would be presented gratis to the university; each section being built by different individuals, and laid down with a uniformity of pattern. The end of practical education would be served, and this portion of Queen's Park would benefit in great measure.

The convention comes this year to Toronto under the happiest auspices, for Ontario, seems destined to lead Canada into the broader conception of a good road policy. The report of the Whitney government highway commision has now been in the bands of the administration for several months, and Premier Hearst and his colleagues have been considering the expenditure The Legislature opened this week is likely to see the first legislative step

)air a

rary

of the thirty millions authorized. towards the actual construction, and wary Ontario riding is eagerly awaiting the announcement. Another happy augury is that W. A. Kelean, Ontario's highway engineer. president of the big convention. Mr.

MoLean is recognized as one of the most capable exponents of highclass Mghways on the continent, and has been honored with the presidency of the leading American and Canadian Stanizations. His will be the guiding hand in the expenditure of Ontario's ppropriation to the new enterprise. Io Formulate Data

Apart from its size and the intermal nature of its appeal the conention will be distinctive in another regard. It being recognized that the whole country is clamoring for im-proved highways, and that their ne-cessity is obvious, all efforts will be furned to formulating in concise man-ber all available cost data and facts of a practical nature.

Financing. traffic consideration, lo Callon, standard foundations, wearing Surfaces, maintenance and bridges vill all be demonstrated by men who we built them, and estimates of cost a each case will be given.

Panaceas for all road ills will be prewilding profession will be assembled n this occasion. Ontario, with her rese project on hand, stands to benefit Particular. The steady demand for

ce accommodation already spells an tendance that will vie with the matest assembly that Toronto has rtained within her borders in re-Years.

:-: AIR SCOUTS AVERT DISASTER TO ENGLISH TRANSPORT :-:

This picture, sketched by John Olisleager, The Sunday World's aviator-artist in Belgium, as described to him by one of the participants in the incident, shows how monoplanes This picture, sketched by John Olisleager, The Sunday world's strated acts in beightin, as described to him by one of the participants in the incident, shows now monoplanes discerned a German submarine creeping beneath the surface upon a transport conveying English troops from Dover to, France. The British monoplane, part of the escort of destroyers discerned a German submarine creeping beneath the surface upon a transport conveying English troops from Dover to, France. The British monoplane, part of the escort of destroyers and aircraft, sighted the submarine below the surface, signalled the Belgian monoplane in the curface long around to be surface long around to be surface long around to be surface. and aircrait, signted the submarine below the surface, signalled the beight incorport in the forepart, which, equipped with whether is the transport, which steered in circles so that the submarine could not aim its torpedo. Done out of its prey, the submarine came to the surface long enough to rig its quick firer and attempt to take vengeance on the aircraft and the transport, the latter replying from a six-inch gun. The destroyers, hastening up, drove the submarine away. All that happened was over in fifteen minutes.

soldiers now on French soil are, to Frenchmen, strange exotic creatures, the study of which is full of delightful surprises. Recently a French journalist traveled to the trenches, in-terviewed several specimens of the genus Tommy Atkins, and published the results in a Paris newspaper.

One Tommy was "of the species crane," with thin legs and arms like telegraph wires, by no means as tacl-turn as the Frenchman had believed. Englishmen to be He told the French-man some tall yarns

"In one fight our battalion lost 500 men," he vouchsafed. 'One bullet, which just scratched my nose, killed my pal heside me."

Another Tommy dwelt on the awful fact that he had been "twenty-two days on water without any tea in it." He, too, had been in the thick of the fray and had killed several of the enemy with his own hand, which, recounts the Frenchman, filled him with

"a gentle joy." "Are the inhabitants of this part of France hospitable?" the journalist inquired of another Englishman. "Awfully nice!" replied the soldier.

These words the correspondent, after giving them in English to show how giving them in English to show how strange they look, translates: "Terri-blement aimable"—a combination which must appear perfectly incom-prehensible to Frenchmen, who do not see how a ching can be "awful" and "nice" at the same time.

At a village in Northern France the newspaper man found some English soldiers instructing a lot of village oys in the rudaments of football.

When the French team scored a point." he writes, "I said to one of the Englishmen: 'But aren't you ashamed to let them beat you at your own game?" To which the Briton replied: 'Ah, but we want to encourage the people of France to take up sports!'"

Football was being played wherever there were Englishmen. Often the games were between teams of English and French soldiers. Where a ball was not to be had the players were quite content to kick about a bundle of elothes.

When not thus engaged, the English soldier finds time to enter the lists of Cupid. The French writer tells of one Tommy whom he saw "promenading roudly before the awe-struck glance of the villagers with three girls on his

"The English? Oh, they're good fellows." remarked a villager in whose house a number of the allies of France were quartered. "They're in bed snoring every night at 8. They get to-gother in my kitchen while I make their tea and sing sentimental sings. They're all musical" - The journalist adds, in corroboration of this statement, that he himself heard Tommies "singing discordantly to the accom-paniment of the cannon."

Also, he found that Tommy had a sense of humor. On one occasion, he learned, a German officer came charg-ing at the head of his men into an English trench. Leaping over the edge of it, he fell head-long into a sea of black mud, from which he picked him-self up, black and dripping, and exclaimed:

"What a confounded nuisance this old war is, isn't it?"

Whereupon a Tommy, about to run his bayonet thru the intruder, burst into roars of laughter and made him a 'And the Tommies are philosophers.

too, writes the Frenchman. "I heard one of them say solemnly to a com-'If you have any money, spend rade: it all today. You may be dead

00000000000

000000000

Thus equipped with the sinews of war he devoted his energies to making models of the craft he had outlined in his mind, and simultaneously set to work to master the host of sciences which are involved in the study of aeronautics-from electricity to pressures, from the laws of grav the surprises of chemistry. It was an expensive quest, as his friends learned to their cost, but he went ahead quite unperturbed until he ran full tilt against that inevitable rock—lack of fur her funds. When the Count turned to his friends mer he for further assistance he received little comfort. One financier cold_heartedly expressed the opinion that "gas-works run on the earth generally made more money than those placed in the clouds, while another, equally unsympathetic, while another, equally unsympathetia, ventured the candid opinion that "Zeppelin would never get his airships to float this side of Doomsday." Such checks would have induced an ordinary inventor to abandon his quest and to reflect for evermore upon the heartless treatment brain-power receives in this unenlightened world-But not so Count Zeppelin. He scraped together enough money to build an airship, which came to grief. It was promising in certain details, and more cash was grudgingly advanced. Airship No. 2 went the way of his predecessor, the it remained aloft for a quarter-of-an-hour. The fount of financial assistance once more dried up. Then came the turning point in Count Zeppelin's career. When Kaiser Warmed Up A foreign power had followed his experiments. Aware of his financial plight it approached the inventor and would buy the product of his brans. But the overtures met with a rude re-ception. Count Zeppelin's airship was for Germany and for no other nation. The Emperor got wind of this ment and, altho hitherto he had maintained an attitude of cold indifferen to the idea. suddenly his manner changed. A foreign power acquire a German invention! Perish the thought Why, the kaiser would take the patrice under his wing. The government of Wurtemburg also shook off its lethargy. A lottery was raised to enable its loyal subject to build another ship. Not to be outdone, the Prussian government did likewise. Money was plentiful. Zeppelin built further ships and encountered further disasters. But the catastrophies were nothing; Count Zeppelin now, was ward of Potsdam. Matters were now maturing rapidly. The Prussian government, under the direct instigation of the kaiser, made a momentous offer If Count Zeppelin could remain aloft for twenty-four hours and cover 450 miles without a descent, the government would reim-burse the whole of the money he had expended upon his idea, pay all his debts, and defray the cost of future work. The Count went ahead. The new air ship was built. In the summer of 1908 the crucial test was made, and the vessel was within sight of home after her twenty-four hours' official trial. when-she vanished in smoke flame. The disaster roused the nation. out of 380 homes a 180 remain. At Tremeloo two-thirds of the village are overthrown. At Bueken out of a hundred houses twenty are standing. At Sr) affen 189 houses out of 200 are destroyed; eleven still stand. At Louvain the third part of the buildings are down; 1,074 dwellings have disappeared. On the town land and in the su-burbs, 1.623 houses have been burned." In his own diocese he states that he nows 13 priests who were put to death, and hundreds of innocent men schot, and the fellow citieus at Aerschat, and the fellow citizens compelschat, and the fellow citizens compel-led to dig their graves, and "in the Louvain group of communes, 176 per-osns, men and women, old men and sucklings, rich and poor, in health and sickness, were shot or burned." But with the vision of a prophet, he

exclaims: "God wil save Belgium, my brethren, you cannot doubt it. Nay, rather, he is saving her. Across the of configgration, across the stream of blood, have you not glimpsed, do you not perceive, signs of this love for us?"

In another part of his pastoral, this noble exhortation is made to the Bel-

gian clergy: "I exhort you to persevere in this ministry of peace, which is for you the sanest form of patriotism; to accept with all your hearts the privations you have to endure; to simplify still you have further, if it is possible, your way of

"Multiply the efforts of your chari ty, corporeal and spiritual. Like the great Aspostle, do you endure daily the cares of your Church, so that no man shall suffer loss, and you not suffer loss, and no man fall and you not burn with zeal for him. Make fall and you

yourselves the champions of all those virtues enjoined upon you by civic honor as well as by the gospel of Christ '

Cardinal Mercier, whose anti-German propaganda, has been upheld by the Pope. The cardinal, as a Catholic Belgian was duty bound to strive towards the independence of Belgium. The kaiser has denied that the cardinal was placed under arrest for his remarks.

ing them and orders "eggs over" and butter cakes. He nods to the couple.

Presently they arise, he pays the cash-ler, the cashier rings up 60 cents, while she scrambles into her wrap. As she approaches the arises and speaks.

The Newcomer-How do you do? So you began dancing again to-night. Do you feel quite recovered from your week's illness?

She—I feel a bit wobbly, as one does after having been in bed a week, but I shall be all right. Isn't it a beastly night? I feel so sorry for the poor horses on a night like this. Are you ready, Vernon? Good night. (They go out and hail a passing

taxi). The Newcomer (to waiter)—Do you know who those two were? Waiter-Oh, yes. That was Mr. and Mrs. Castle. The Newcomer-Strange they

should come here when they have just finished dancing at Castles in the Air, where Pierre and Louis of the Ritz

e where Pierre and Louis of the Ritz are the caterers. One would think they would have eaten there, particu-larly since they are said to get \$2.000 for dancing there. Then they get an-other \$2,000 a week for dancing in "Watch Your Step." Waiter (proudly)-Oh, I don't know. Maybe they get tired of fancy food and come here to give their stomachs a rest. You'd be surprised at some of the people who eat here every day-bankers, millionaires, newspaper men. bankers, millionaires, newspaper men. (The slim young man, who had arisen to go, reaches in his pocket for another nickel, hands the walter two nickels, pays his check, hugs his first edition close to him under his arm, and goes out into the night).

nails, which are driven flush with the wood and filed up to the correct shape. The model is then put into one side of a special lathe, and a rough block of wood into the other. These are slowly rotated, the model against a smooth wheel and the rough block against a circular cutter revolving at a very high speed. The wheel and the cutter work speed. The wheel and the cutter wor in conjunction, and as the wheel pass-es over every part of the pattern from the heel to the toe, the cutter shapes wood block to correspond. The lathe is so wonderfully constructed that from one model it will turn all sizes and fittings in perfect oropor-tion as well as lefts and rights.

Plate Clinches Nails When the last comes from the sathe considerable finishing work is neces-sary, because the machine leaves the sary, because the internet reaves the toe and the heel in the rough. This finishing is usually done by hand. If the last is to be used for the British army boot, a steel plate has to be fix-ed with nails and screws to the bottom so as to clench the rivets, while for the French boot, which is welted, a steel plate at the heel only is necessary for clenching the nails.

After the plate is affixed, a fitting block has to be cut out with a hand saw. Every last must have one of these blocks to allow it to be drawn from the completed shoe. A few minor operations are necessary such as drill-ing holes to put steel sockets in, and

operations are necessary such as drill-ing holes to put steel sockets in, and putting leather tops on to protect the last while on its trips around the fac-tory. The last is next finished off in a sandpaper wheel, for the cutter of the lather leaves ridges, and the last must be quite smooth. After it has been thoroly tested to see that it is up to measure a wax polish makes it ready to receive the first piece of leather.

as the blackness shows signs of wear-ing off. Many make the mistake of discon-tinuing treatments as soon as the wart is reduced to the level of the surface skin. This leaves the roots to flourish, and soon the wart will reappear. The caustic must be applied below the out-er skin until the roots have also been

estroyed. Another remedy is nitrate of silver, and it is used in the same manner as

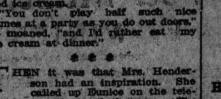

off. The second remedy contains: One grain of paradorm mixed with nine parts of flexible collo-dion. Use this on the warts three times a day. After three or four days the epider-mis will peel off and the wart will come with it. Never allow a wart to grow large, for it will spread until it covers quite a large surface. Constant cutting will discourage its growth, but it 'is far better to remove it entirely.

te, then add the cream an of eggs slightly beaten, stin

FEBRUARY 14 1915 Secrets of Health and Happiness Sulphur Still Considered

Very Best Cure for Boils By DR. LEONARD KEENE HIRSHBERG

A.B., M.A., M.D. (Johns Hopkins). Copyright, 1814, Newspaper Feature Service.)

HEN a godly man becomes pestered with a boll on his neck he leans wondrously to discontent. His comfortable temper forsakes him, and he is put Boils are the outcome of a con much out of countenance. Boils are the outcome of a com-bination of events. There is first to be considered the ever-present microbes and other atmospheric as well as fieshy bacteria. Next is a scratch, an abrasion or an opening into the bodily defence, thru which the serum enter into the less resistant fabrics. Finally the serum. lymph and blood corpuscies must either be defective, weak or saturat-ed with noxious agencies, hefore the boil or "furuncle" mi-probes can gain a foothold. True enough, there are numerous other contributory factors which give and comfort, as well as abet, the enemy in its onslaught upon the health. But the three essential causes are within the tissues, an unseen abrasion and the gerins themselves. Two of the three are_necessary, but is before boils begin to make the skin their abiding place.

DR. HIRSHI but in different dear

naintained that a "spring tonic" should always be site of a cteriological peared in the ky dead of midwinter. Then came the period of bacteriological thronement, 15 years or so ago. At that time internal "purifiers" were, like of physic, cast to the dogs, and the lance and scalpel knife was insisted upor displace the dirty, soggy, flaxseed poultice. In all of these fashionable periods, sulphur as a remedy never lost its upon the thoughtful. Indeed, today, it more than holds its own with the in est of discovered Galenicels. Nay, even for the ubiquitous and lewiy pimi really the great American malady-sulphur, either combined with the lim in calcium sulphide pill or as a powder or acid has been highly appreciate Sulphur in the guise of sulphuric acid or sulphurous acid can be take an internal medicament only under the sys of a medical man; as either fuid, may seriously injure the linings of the digestive machinery.

Dangers in Sweets

Dr. Skillern has had much recent experience with sulphurous acid in these conditions. Some 80 or more victims of this distressing ailment were treated with the sulphurous acid, and in all instances the cause of the bolls was either stopped at once or so conspicuously abbreviated as to be called noteworthy. Moreover, the curious relapses and returns of bolls, so common in this malady. has been marked by its absence. A teaspoonful of the less dangerous sulphurous acid or vitrol—a caustic of soison—was administered in a tumbler of water three times a day, immediately ifter meals. Dr. Skillern advises that the mouth be well rinsed after each lose. For this purpose, milk of magnesia or lime water may be used several immediates.

Since the fumes from sulphurous acid or somewhat irritating to the respiratory canal, it is desirable to hold the breath and the nose unght is swallowed. Al the there can be little doubt but what sul d thus taken greatly contributes to the defeat of boils and pimples d thus taken greatly contributes to the defeat of boils and pimples the prediction of the second prediction of the second pimples of the second p we with antiseptic properties must not be omitted. Tincture of lodine and inage of the boil are often helpful. Furthermore, all gugar, sweet starchy and hot food must be tabood. There is uestion but that pastries, candies, bread, crackers, potatoes, sugar, cakes other dainties are "attracted" by the bacteria, which instigate these in-

General Motor Trade News

<text><text><text><text><text><text><text><text>

with headquarters in Indianapolis.
J. Walter Drake, president of the Hupp Motor Car Company, has been appointed a member of the legislative committee of the National Automobile Chamber of Commerce by President Charles Clifton. The other members of the committee are H. H. Rice, Waverly, chairman, and J. I. Parley, Auburn.
It is estimated that 36,000 cars will be made in Canada during 1915. Many De-troit companies are either manufactur-ing or assembling cars at Canadian plants, including Ford, Studebaker and Hupp. The Reo and the Buick compan-ies also have Canadian plants. During 1914 there were made 18,000 Fords, 1,600 Studebakers, 550 Hupps, 1,200 Buicks and 2,000 Reos.

According to statements made by the motor truck representative familiar with Australian conditions, the motor trucks withdrawn from Australia by early war contingents have accounted in value to one half million dollars and future dr-peditions will take away trucks to an equal value, leaving Australia almost de-nuded of its truck transportation facili-ties and also short of horses owing to the war. This is then the opportunity, ac-cording to the expert, for manufacturers to push trade in the Antipodes.

to push trade in the Antipodes. Confirmation of the prosperity which has returned to the automobile manufac-turers as a result of the successful au.o-mobile shows in the national field at New York and Chicago, is best illustrated by the statements of the representatives of large manufacturers of parts and ac-dessories. David Graham, of the Bower Roller Bearing Company Detroit says his company has booked more orders within the last six weeks than for a year pre-ording and the representatives of another large company manufacturing axless and roller bearings reports the receipt of a sufficient number of orders to make the hext two months the busiest ever known with his firm. Other parts and access-ories manufacturers have received in-creases of specifications to an extent that is surprising even in view of the splendid reports covering the business at New York and Chicago.

Much interest is being displayed by the engineers of this country in the produsts developed by the Brush Engineering As-sociation of Detroit. An 8-cylinder motor designed by this association, and manu-trouted by the Ferro Machine and Foun-dry Company, and a metal body of ex-treme strength, manufactured by the Hals and Kilburn Company, of Philadel-phia, were shown for the first time dur-ing the Chicago automobile show in a room at the Blackstone Hotel and at-tracted universal comment from the en-signe and passed favorably upon them.

Except of Ways and means. Except cars will be manufactured by the Harris Brothers Company, pur-chasers of the basets of the company at the recent sale. Morris Rothchild of Harris Brothers Company, and Don McCo.d, Detroit manager of the com-pany, said on Saturday that active

No Sand Too Deep."

JACKSON

THE "48"---SIX---A COMFORTABLE **ROOMY, SIX-CYLINDER**

ull Elliptic Springs Front and Rear, 125-inch Wheel Base

We have drawn on every resource of our thirteen years of pmobile building experience to produce in the "48"-Six, a which will combine power and speed with comfort, safety

car which will combine power and speed with comfort, safety and economy of operation. Strength and durability have not been sacrificed to secure extreme lightness, for we know that in the last analysis the car which wins the approval of the motoring public must have not only speed, but endurance. It must be a car that will stand hard driving over indifferent roads; it must do as good work after two or three years of use as when new—and it must be able to take rought roads at a good speed without discomfort to the passengers. to the passengers

to the passengers. It is such a car as this that we have in the Jackson "48-Six. Four full elliptic springs guarantee tire economy, and, with the luxurious upholstery assure the owner of perfect riding comfort.

The Olympic Forty-Six With More Power-Simplified Construction and a Lower Price.

Simplicity is the keynote of 1915 design, and the Olympic "46," from its stream-line body to the last detail of chassis construction, has been refined and improved.

Construction, has been refined and improved. The motor, of the same sileht type which has so long been a feature of Jackson design, has been made slightly larger, and the five horsepower which we have added provides a reserve for the hardest road conditions. "No Hill Too Steep, No Sand Too Deep" has for many years been the Jackson slogan, and the surplus power of the Olympic "46" enables it to make good under any circumstances under any circumstances.

The Jackson engineers have made many experiments with various types of springs, with a view to securing the great-est possible riding comfort and reducing tire wear to the lowest point. They have proved beyond a doubt that the full elliptic spring has from \$3 1-3 to 100 per cent. more flexibility than other types, and that this flexibility relieves the tires from

The six-cylinder motor, of the same silent type which has helped to build the Jackson reputation, has full forty-five horsepower, with the perfect balance which makes it run smoothly and evenly at high speeds. It can be throttled down to a slow walking speed on the high gear, and can be acceler-ated to fifty miles an hour within a few hundred feet. It is of latest European design, which combines speed and flexibility with the greatest fuel economy.

Both the "48"-Siz and the Olympic "46" are driven from the left, and the control levers are in the centre. The driver may enter the car from either side—both doors can be opened and both running boards are clear.

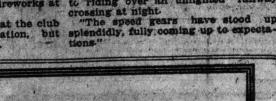

With its mechanical excellence backed by our thirteen years of experience, we can recommend this new six as a car, which will satisfy the most critical driver.

many shocks which they would otherwise sustain. Further endorsement of this construction comes constantly from Jack-son owners, who tell us of having exceeded by from 50 to 75 per cent, the mileage guaranteed by the tire manufacturers. It is conceded by all who have used Jackson cars that their extreme case of riding permits them to be driven faster over rought roads thon other cars with less flexible sprngs. The effective speed of the Olympic "46"—the speed at which passengers can ride with comfort—is far above the average. The improved type of carburetor used on the Olympic "46" has reduced the gasoline consumption, so that this model will travel further to the gallon than many smaller, but less efficient cars.

efficient cars. The Olympic "46" will run reliably and economically, its motor is silent, and the car throughout, with reasonable care, will run just as reliably and silently the third and fourth years as the first.

Demonstration of Either "48"-Six or Olympic Models, as. Well as the Olympic Roadster, on Request. **JACKSON CAR COMPANY OF ONTARIO LIMITED** LUMSDEN BUILDING. Main 566. GARAGE, 338 HIGH PARK AVE. Junction 264

her death, insured her famous collec-tion of jewels for \$600,000. Among the many noted musicians who are forced to play in cafes on ac-count of war conditions is Anton Hek-king, the cellist, who is playing in the Princess Cafe in Berlin. He is ac-companied in his solos by the orchestra of the cafe, and when he plays no one speaks, it is said, nor do the waiters move from their places. Ernest Seitz, the brilliant young Canadian planist, and Rudolf Larsen, the gifted Danish violinist, are booked to play in Berlin on Monday night. An immense audience is already assured, as not only have all the leading people of Berlin signined their intention of being present, but scores is coming from Waterloo, Hespeler, Elmira and Preston. Mr. Seitz will play the Chopin Impromptu, Nocturne in 'G minor, three etudes and the A flat polonaise; Gavotte by Glazounoff, Rubinstein etude, the Blue Danube Waitz. Mr. Larsen will play the Ave Maria of Schubert; Liebesfrieud, Kreisler. Polonaise Brilliante, Wienie+ wasti, the two artists joining in the handel E major sonata. A fine program of songs and arias by representative British composers has been chosen by Dalton Baker for or this recital in the music hall of the list recital in the music hall of the torong conservatory of Music on Tuesday evening, the 23rd inst. Mr. Baker, who has recently joined the vocal faculty of the Toronto Conserva-tory of Music, comes to Canade, with a most enviable reputation as a concert and oratorio singer. Between the years 1900 and 1913 he was principle baritone at the great festivals of Birmingham, Gloucester, Sheffield, Bristol, Hereford, etc. besides singing frequently at Royal Albert Hall, Royal Choral Society, Promenade, Chappell Ballad, London Choral Society, Bach Choir and other concerts. His pro-gram for the 23rd embraces songs and arias by Purceil, Handel, Parry, Elgar, Stanford, Coleridge-Taylor, Sullivar, Mallison, Healey Willan, Frederick Austin and others. Healy Willan, i' R.C.O., will essist at the piano. ACADEMY QUARTET

Fine Composition by Von Kunitz

Audience.

given to Gounod. Ruth Kemper, the young violin pupil of Luigi von Kunits, is playing in Convention Hall. Buffalo today. It is quite probable that this clever young lady will be heard here in recital be-fore the seasons closes. The s A quartet by Luigi von Kunits, leader of the Academy String Quartet, was the novelity at the fourth concert of the series given by this excellent chamber music organization. Need-less to say, the composition reveals the work of the perfectly trained musician. The slow movement impresses the lis-tener more convincingly, perhaps, then the other. It is a notable example of sustained melodic invention of won-derful charm. The last movement is beautifully played, but it was in the interpretation of the great Beethoven that the players scored their greatest triumph. It is no exaggeration to say that no better ensemble juaying has ever been heard in Toronto. The con-tinual advancement in their art made by the quartet is one of the most noticeable features of a comparatively barren musical season. At their next concert on March Srd, two great works by Smetana and Hugo Wolff will be given and also a classic by Haydn.

A pleasing feature of the Military

A pleasing feature of the Military Concert on Tuesday night at Massey Hall, when the Mendelssohn Choir sang to nearly four thousand khaki-elad soldiers, was the violin solos of Frank E. Blachford, of the Toronto Con-servatory of Music. Among his num-bers were the "Meditation." Massenet; Perpetual Motion. Ries; 'Memory," Gena Branscombe; and Mazurka, Wieniewaski. Mme. Schumann-Heink is rapidly regaining her health at her home in San Diego, tho there is no immediate prospect of her return to the concert stage.

Perpetual Motion. Ries; 'Memory," Gena Branscombe; and Mazurka, Wieniewaski. The orchestra of the Metropolitan Opera House, New York, with Tos-canini as conductor is about to under-take a transcontingntal tour. About the personnel. studio, Swansea. William Folger.--(1), While the num-ber of scenes to the reel is entirely de-pendent upon the length of the individual scenes, 35 for.-two reels seems to me a very fair average. (2), The usual price paid by the very good companies for scenario, perfectly constructed, may find even higher remuneration. (3), If you, scenario is interestingly written, and may the necessary action and other qualifica-tions, this company would be only too pleased to purchase it. (4), The safety J. your manuscript depends entirely upon the honesty, of the individual compan, to which you send it for correction. A dis-manuscript as there are such persons everywhere. If is hard to be sure of per-fect safety in a matter of this kind. (5). You might wait a couple of weeks longor before demanding the return of your manuscript. The fact that they are hold ing it, may be proof of their desire to the bone difference and full considera-tions.

You show o. Your age would the a receiving an opportunity. Alma Smith.—(1), Regarding an en-gagement, see answer to Mrs. Amy ritton above. (2), I am afraid that the rrit ng of a scenario around any individu-ality is an impossibility, as such special or see an any obtained when neces-is problematical.

Or, the en the spot in the for which closer p hera man to "cut," are unrolled (the e a fe the film are unrolled (the blank space signifying later to the assemblers the a closer view is here to be inserted), the action taken close up is skipped f the time being, and the photography continued where it is again to be show in the middle or far distance, as the case may be. I Then, after this part of the scene has been finished, the camera is mov-to a place close to where the action takes place, and those scenes which hav been skipped are photographed, the movements commencing and ending to about the place where the "long-distance" photography has left off.

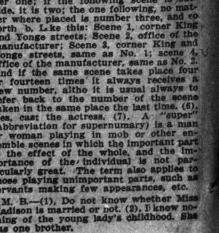

The Double Exposure

Recently there was exhibited in this city a remarkable photoplay called Shadowed." in which that popular and clever actor. King Baggott, played welve distinct and separate parts, which necessitated his appearing on the creen, apparently simultaneously, two and sometimes three times. This whole thing was a mass of intricate and difficult trickwork, requiring the most elicate action and photography, for in this remarkable photoplay, Baggott

action application simultaneously, two and sometimes three times. The whole thing was a mass of intricate and difficult trickwork, requiring the most delicate action and photography, for in this remarkable photoplay, Baggot on occasion, went so far as to shake hands with himself.
In a play of this kind, certain lines are drawn for the character playing the two or more parts, beyond which the actors must not cross. That is, in one scene he is limited to a certain space, and in another scene to the other space, so that the aution may not conflict. The photography itself is a technical process too difficult to explain in writing.
These, then, are the small details of the motion-picture industry which contribute to the finished picture, tremendously important, and without doubt adding greatly to the artistry of the finished product, while helping to lift the photoplay to a very great level of perfection. And now we can take up assembling. But no-we can't. My limited space is used up, and instead of "Entrance Positively Forbidden" is the no less stern limitation of space. So I must is use that the sign won't hold for us. in view of the patience we have displayed in waiting to learn its secrets.

- ADVENTURES OF THE TWINS AND GOOD, KIND, DEAR DOG MUTT --JOHN GIVES A VALENTINE AND WHAT HAPPENS.

The day before St. Valentine's, John said to Tom, "You know That awful valentine 1 drew, As ugly as a crow?

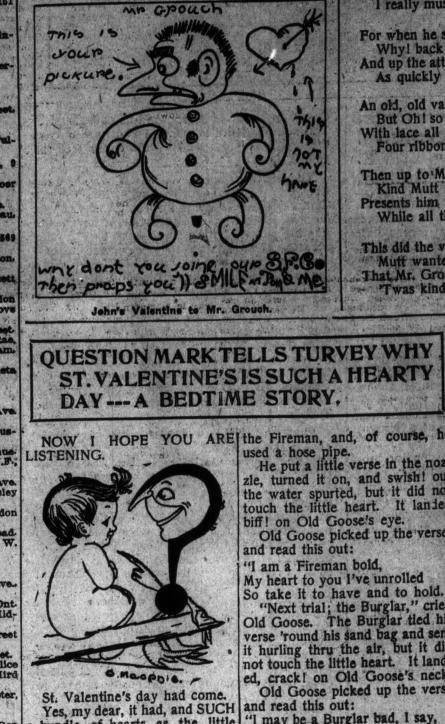

"Now look at it, dear Tommy, doj It's frightful as can be; I'll ring at Mr. Grouche's door And leave it there, you'll see."

Well! Out next day, young Johnny went, With valentine in hand; You never saw an uglier one, I'm sure, in all the land

And then at Mr. Grouche's door. He rang the bell, my dear, And stepped behind the door—Just think! To hear what he could hear.

Well! down the stairs came Mr. Grouch, The valentine he spied, But when he looked AND SAW IT CLOSE, With rage he could have cried.

"Ha! Who's done this? WHO? WHO," he yelled, Then out the door—Oh! Oh!— He jumped and grabbed young Johnny; say! 'Twas quick, but it was so.

Slap! "Who's having all the fun?"

Poor Pa comes running out the door, Pulls off his shoe and cries: "Kind Mr. Grouche, don't spank my child, I'm here before your eyes."

Well Mutt, good dog, was there, of course, And great was his distress; He showed more brains than Pa or all, I really must confess.

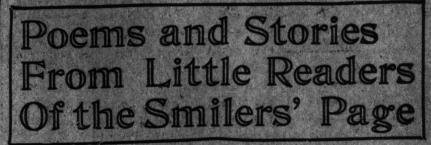

For when he saw John's punished plight; Whyl back he ran you see, And up the attic steps he glumped, As quickly as could be.

An old, old valentine was there, But Ohl so pretty, too; With lace all 'round, and on the edge Four ribbon knots of blue.

Then up to Mr. Grouch once more, Kind Mutt runs; yes, my dear, Presents him with this valentine While all the people cheer.

This did the very thing, my dears, Mutt wanted, for you know That Mr. Grouche sir 1 ped spanking John,

Twas kind, but it was so.

I have been reading about yo SMILING FACE club every Sunds and would like to join your club. I have a little sister also, who interested in the Smiling Face Clu and she would like to join also. PS.: We will be looking for o buttons every minute now. Here ons every minute now. Here is rse we are sending you:

Keep a cheerful heart on. Whatever may betide: Look always on the sunny side. If you have a toothache, Things are not so bad; Some people have no testh— That's far more sad. So keep a cheerful heart on Whatever may betide— Look always on the sunny side.

If you have a headache, Things are not so sad; Some people have no brains, That's far more sad. So keep a cheenful heart on Whatever may betide— Look always on the suany side Yours truly, G. H. Tarling and Evelyn Tarling 120 Pendrith street, ch

ould like a button very much please send me one, as I an to SMILID all the time, and no As I am writing this plece to by your columns I thought yo your column like this : his this : his ole, and Ma ests mutton. Blease, kind sir, send me a button. Fireddy Hodgson, Fireddy Hodgson, Prince George Hotel, Collingwood, Ont.

Dear SMILLERS: I there often thought I would like to join your club, so at last I have decided to write. I read your comic section every week, and love to read the SMILLERS' page. I would like to join your club very much. I go to school every day, and am in the junior fourth class, but please don't forget to send me a S.F.C. button, Well, I will close this letter with a little verse. Will look to see my name in the paper next week.

A Song of Ross-oses in my garden border Roses round my window ed and white in sweet dis

P.S.: Don't forget to send me the F. C. button. Tens M. Charpentier,

I SMILE when I am happy, I SMULE when I am sad; I am the little SMILER That people like to have

Just Smile-You'd be supprised I'm sure to know, How far a little SMILE can so: How many miles it runs away, Up hill and down a single day; How many hearts it wakes;

Sutton West, Ont.

"The Miser" There was once a miser who had a lump of gold which he hid in the earth Every night he would go down to see if it was safe. One day two men were digging in the earth, when suddenly they saw something shining. They took out the gold and went home. When the old miser went down to look for the gold it was gone. After that he was very sad. One day his neigh-bors asked his trouble, he told them then his neighbors said it served him right for being a miser. Sent in by David Sher, age 11. 165 Robert street.

Nobert street. I would like to see this story in the Sunday World. Please, sir, would you kindly send me a Smiling Face Button as I would like one? You will see my name at the and of the story. Once there was a little girl and her brother. They were very nice shild-ren. One day the little girl saw a dog, and she said to her brother "Let" throw stones at it;" he said "It was wicked." and he told his mother what his sister did. After that she never threw any more; so you never want to harm any animal. Ida Norman. 155 Claremont St., Toronto, Can.

The See-Saw. Up and down on the see-saw we go First we're high and then we're low. Sister holds on good and tight. For she's a girl, but that's all right. That I am not afraid at all. 'Cause a boy doesn't mind one bit a fall. Sent in by Ellen Slute. 15 Stephanie street. Age 11. My sister and I would like to join

My sister and I would like to join the Smiling Face Club. Will you put this poetry in the Sunday World next week?

week? The Difference. Frowns are little clouds that meet in a little sky: SMILES are like the sunshine sweet, causing them to fly. Sent in by Irene Irvine, 465 Clen-dennan svenue, West Toronto, and Dorothy Irvine, 465 Clendennan svenue. West Toronto.

What goes round the house and only

What makes more noise than one pig under a fence? Two pigs. As I was going over London Bridge I met a cart full of fingers and thumbs

Gloves. Sent in by Madiyn Coughlin. Anten Mills, Ont.

I and my brother would like to join he Smiling Face Club and get a but-on like all the boys and girls do that write letters and get buttons. We each now a nice little verse. They go like

MILE awhile and when you mile, MILES come back to greet you but if you frown all the time,

owns forever meet you. From Eric Simpson. Delore, On

Age 6 years. If I know that a word of mine. A word not kind and true. Might leave its trace, on a loyed one's

face, I'd never speak harshly, would you? If I knew that the light of a SMILE Might linger the whole day thru, And brightened some heart with a heavier part, I wouldn't withhold fi would you? From Godfrey Simpson Deloro, Ont-Age 10 years.

THEIR FIRST AND ONLY SURRENDER

On December 17, the suzerainty of **Egypt Within The Empire** The super end of the United Kingdom, becoming to all in-tents and purposes a part of the British Empire. This, it is to be hoped will bring the dawn of a better day to that ancient country which has so held the imagination of man-

kind. Its history dates away back to 5000 B.C., and for centuries it has been unfolding the wonderful story of its past. It lost its Independence first to the Persians, it formed part of the Empire rained by Alexander the Great, and passed in 51 B. C. under the guardianship of Rome. After centuries of trouble it accepted the rule of the Persians and then of the Arabs. Later Egypt was ruled by various dynasties, and was seized in 1798 by Napoleon. On the ejection of the French its independence was restored. In 1875 the dual control of France and England was established, but since 1882 it has been virtually administered by England alone thru the agents general notably Lords Cromer and Kitchener. The osition of Egypt is now simplified and the capitulations which impered the governments will now be abolished.

Now that the blighting influence of Turkey has been removed, Egypt's future should be assured. Nothing has been more brilliant in the long story of

The Regeneration of Egypt

Britain's rule over subject people's than the regeneration of the land of the Pharaohs. The peasantry long. oppressed to the point of starvation, are now free to labor on the most fertile soil in the world. They are filled with a new hope, are under a firm but kindly government, and the harnessing of the Nile has removed the shadow of dearth that now and again came when the river supply failed. Among the benefits of this war is the knowledge that has come to the natives of the power of Britain. As a native judge is reported to have remarked—"When your garrison was small the nationalists were troublesome and the press disloyal the people thought you were afraid. Now they know it was the indifference of indulgent strength." Since the war opened the Byptians have witnessed the greatest exhibition of British power ever seen in the near East, and power is the one argument the Oriental never questions.

Imperial Forces at Cairo

Camped or in barracks in and around Cairo, under the shadow of the pyramids and the Sphinx, and at Heliopolis, the city of the sun, are thousands on thou-

sands of our brothers from Australia and Zealand ready for Empire defence. With these men of splen did physique are a whole division of territorials from Lancasfire and sturdy English Yeomanry, described as rapidly approaching in military efficiency the high standard of the regular cavalry. Along the canal are the Indian troops, picturesque warriors, whose presence has greatly helped, says a Cairo correspondent of The London Chronicle, to dispel the vague fear of a Turkish attack that a few weeks ago was disquieting the native mind. In attempting to stir up revolt Germany has been, as usual, malevolently active. German native agents have been particularly busy, and one of their methods for spreading lies and creating panic is singularly ingenious. They work thru the "dealers in magic and spells," female adepts and other impostors whose dens have always been centres of Egyptian. intrigue, scandal and, as in the present instance, of political mischief.

Crown from one of hereditary title to legislative. This act, while not actually first of its kind, was the first to be sustained by the consent of the people, and remains in force now.

The late Professor A. W. Verrall, who held the King Edward VII. Chair of English Literature in Cambridge University, in his lectures on the poet Dryden, has an interesting passage dealing with English politics during the reigns of the later Stuarts. He points out that before the restora-tion "hereditary title was apparently essential to the maintenance of monetary and the second

By Albert Ernest Stafford HEN ONE READS in the papers that the German losses in the war are officially put at 250,000; that the British losses, up iii the 4th inst. approximate 104,000; nd that the Russian, the Austrian, ish and the Belgian losses probably more than double these res, it must set us wondering a to use Lower Chapel as well as such slaughtered. Fortunately Egypt is easily defended from attack by a power that is supreme at sea.' The only approach from the East is over a hundred and fifty miles of desert-hot, suffocating desert-filled

13.

Egypt Easily Defended

with the softest, loosest, driest sand imaginable, while the wells are few and far apart. If a caravan with a dozen camels has reached one of them and slaked its thirst, writes another correspondent of the same paper, then that which follows will have to wait the greater part of a day till the same amount of water oozes again out of the arid soil. Water, in the desert, is the first, the great problem. If a small caravan thinks of water above everything-what of an army? This horde of Turks that are attempting the invasion of Egypt must get water or it will perish miserably. Even if it reaches the canal it will still want water, and to get water it must force a passage, for the only water is on the western side and barring the way are the Empire's forces guarding Egypt. That is the problem the German leaders have to face, and the disastrous attack recently made will be for them a lesson and a warning.

. . .

India's Loyal Service

Three great Indian races are represented in the Imperial army in Egypt. There is the Sikh, that born warrior. With him is the Ghurka from the north-east frontier

of India, a hillman who is already at home on the plain. Then comes the Punjabi to whom Egypt brings a reminder of his own river made homeland. Along with these troops of the regular Indian army are the Imperial Service Corps, fine soldiers of many native ruled states of India, sent by the loyal Rajahs to battle for the King-Emperor. All the British' forces in Egypt are as magnificently equipped as is the army in Western Europe. "For example," writes Mr. Renwick, a special correspondent, "out in the desert this morning I stumbled into a picket which had dug itself cunningly into the sands. The men were cooking rice-and there sounded the familiar ring of a telephone bell. Beede a little heap of stones was the instrument. A soldier put the receiver to his ear and talked to some one still further out in the desert." Egypt, the latest addition to the Empire, is having a commanding demonstration of its might, power and unity.

Probably by this time Germany has begun to realize that she is not strong enough to crush the Allies. But it does not follow by any means that the Germans are conscious of being already in the shadow of defeat. They still believe they and even retain the parts of Belgium and North ern France they now occupy. All their acts in-dicate this intention and determination, and they will hold on with desperate tenacity. If, as the Allies firmly believe, the Huns are turned out of Western Burope, they lose the first fruits of their attack on the liberties of that continent, and the whole fabric of their dream will tumble about their ears. If they are forced to evacuate Bel-gium, they leave the power of Britain unshaken and cannot hope to have a naval base within striking distance of her shores.

Britain and the German

Peril

Their boasts have been made too soon and too brutally. For they have made it plain from what an appalling peril the United Kingdom and the British Empire escaped when the Imperial government was faced with the grave question of peace or war-of neutrality or active alli-ance against a nation infatuated with the notion of world dominion. Any vacillation in policy, even a few days' delay in taking the plunge would certainly have meant irreparable disaster. Had Mr. Asquith and Sir Edward Grey stood shivering on the brink and feared to launch away the whole aspect of the war would have changed. Had Britain stood aloof the heroic resistance of the Belgians would not have availed. The German rush on Paris would not have been hurled back just when it reached its goal.

All the future course of world history hung in the balance during the critical days that came after Germany's declaration of war on Russia. Had Britain been tempted by German bribes to remain neutral Italy, too, might have aided Ger-man ambition, Belgium might have preferred to lose her soul rather than have her fairest treasures, her busy cities and her fertile lands destroyed and devastated. What would then have happened? Belgium would have become a vassal state of Germany; France would have been crushed, and lost more of her territory, including the rich mineral district of Lorraine, and her harbors on the North Sea and the Straits. Britain, had she been fooled into neutrality, would long ago but vainly have repented in sackcloth and ashes.

Parliamentary Title to the Crown

In his speech on the debate on the address in reply to the speech from the throne, Mr. W. F. Maclean, M. P., for South York, made an interesting reference to the rise of parliamentary government the distinctive feature of the British constitutional system. He pointed out the re-vulsion, the backward movement that occurred after the restoration. This period, covering the reigns of Charles II. and James II., was of considerable importance in its influence on the development of parliamentary power, because it was the sentiment created among the people of England that made it possible to pass the Act of Succession which changed the tenure of the

the maintenance of monarchy, for a pa ary title was insecure and invited meddling; and the hereditary title did in fact—and this is a vital point—satisfy public sentiment." He goes on to say that the earlier history of the country sup-plied decisive experiments. The Lancastrians, for instance, had a parliamentary title to the throne, but the Wars of the Roses showed the weakness of their position; and an hereditary title was the foundation of the stability of the Tudors.

"Later again," he continues, "the prevalence of a natural hereditary title over all legal ar-rangements was illustrated in the case of the family of Henry VII. After the succession, in ramity of Henry VII. After the succession, in due hereditary order of Henry the Eighth's three children, Edward, Mary and Elizabeth, in spite of the will of Henry VIII., made after parlia-mentary sanction, the succession passed without any difficulty to the natural heir, James VI., of Scotland. In view, therefore, of past experi-ence. Professor Verrall concludes, attachment to hereditary succession was not necessarily a to hereditary succession was not necessarily a to hereditary succession was not necessarily a mere supposition. What changed the temper of the English people was their objection to a Ro-man Catholic King and government. James, Duke of York, afterwards James II., was known to be a French Catholic and a man of obstinate and violent character. In 1679 a bill was passed in the House of Commons, proposing to exclude him from the succession to the Crown. It was rejected by the Lords, but the principle it em-bodied re-appeared in the Act of Succession fol-lowing on the second revolution and the final fall of the Stuart house.

German Methods and Intelligence

Altho the Germans pretend to be vastly Altho the Germans pretend to be vasily superior in intelligence to all other peoples, their conduct of war operations scarcely justifies the boast. A man of marked intelligence is usually ready to learn from experience and capable of adapting himself to the nature of his environ-ment, and the circumstances he has to meet. But the Germans show no or very little intelligence when one after another their attacks fail. All accounts agree, that in the tremendous accounts agree that in the tremendous campaigns in Eastern Europe, the kaiser's generals still send their men forward in mass nothwith-standing the terrible losses that ensue.

The only possible explanation of this persist-ence in attacks that are seldom successful and whether or not are invariably costly, is that the intelligence of the German rank and file may be all that is claimed but strictly limited in its operation. The kaiser is said to have remarked some years before the war in reply to a query from an English visitor at the annual manoeuvres, that German soldiers need to be in touch all the time. and therefore must attack in mass. In other words, they are without individuality or initiative of their own and are mere cogs in the war machine.

and and a series container ware a

they over condescended to read Grusts and Crumbs, which is only intended for plain, everyday, common since pro-ple who take things as they find them. leads up to the other conception by association. "In the days when we

used to speak under our breath of a great war of the nations," says this article, "hoping against hope that Ger-many would be provented from bring-ing about the horror which she plainy seemed to be plotting, we could not resee what our new standards of emoforesee what our new standards of emo-tion, physical endurance, economic capacity, and moral fortitude might be if such a war came about. We had no guidance from any human experi-ence in affairs of such dimensions. And even now that the horror is upon us we are unable to grasp all its signil-cance. It is very true that—in Brown-ing's worde—a man's reach armsede cance. It is very true that—in Brown-ing's words—a man's reach exceeds of his grasp. In reaching towards some goal men involve themselves—culpa-bdy, as the Germans have done, or in-nocently, as mere incompetents have sometimes done—in heartrending problems which they cannot solve or control. Their reach has exceeded in their grasp. We read appalling casu-alty lists, and hear of the destruction

by Eton," says The Spectator, "are not less notable than those taking place in the conduct and discipline and attend-

vances, Always the shadow in front, al-ways the reach'd hand bring-ing up the laggards.
