KENDALL'S SPAVIN CURE

The most successful Remedy ever used for Spavin, Ringbone, and all other ailments of the horse.

It is a simple and safe medicine, and does not blister. Also excellent for human flesh. Read proof below.

SAVED HIM 1,000 DOLLARS.

ANAS, N. Y., Jan. 30, 1882.

Dr. B. J. Kendall's Spavin Cure has done for me what no other medicine could do.

Two years ago I had a spavin on my horse, which was so bad that I was obliged to give up the horse.

When I was breaking him, he kicked over the cross bar and got fast and tore one of his hind legs in a terrible manner.

It is a splendid medicine for rheumatism. I have recommended it to a good many, and they all say it does the work.

Local and Other Matter.

The schr. Home, Brenton, from Boston for Port Royal, N. S., put into Booth Bay on the 27th ult., with loss of cargo...

Choice stock of Scotch Tweeds just opened at Morrison's, the Tailor, Middle street, latest patterns and lowest prices.

A young man named James E. Denton, belonging to Westport, Digby Co., was drowned in Lunenburg harbor on the 21st ult.

A girl in Tennessee who has fine gray eyes makes them appear blue and bright by wearing late styles with dark blue velvet and eating lumps of sugar on which has been dropped a little cologne.

The City of Cambridge and Plum Pond, for sale by R. Shipley.

EVERY BALANCED.—Two Annapolis ship captains, brothers, named Delap, weighed in a Water street store the other day, 274 lbs each.—St. John Globe.

Navy's Cannon Plums and Blueberries for sale by R. Shipley.

A Dominion civil official at Ottawa, named Robert Stalder, has been charged with falsifying his accounts to the tune of about \$25,000. He has been arrested. Fast living caused him to do this.

Navy's Cannon Corn and Squash, for sale by R. Shipley.

A proposition has been made to the Dominion Government by prominent men to abolish the duty on corn meal, and substitute a drawback on corn imported for grinding purposes.

The attention of the finance minister is being attracted by the fact that the Dominion Government has been doing a brisk business this season.

They expect to sell about three hundred pumps in all during the year, and report a rapidly increasing demand. Three teams are kept on the road receiving and delivering orders.

Everything in the Canned Goods line, for sale by R. Shipley.

While Mr. Andrew Goo, agent at Bridgewater of the Merchants' Bank of Halifax, was driving near that town, he was thrown from his horse, and severely injured, and has since been confined to his residence, the lower part of his body and his legs being paralyzed.

The enterprising firm of Bionchore & Sons are doing a large business in their ice factory at Ganning. They are shipping now some 100 tons per day, and employing 14 hands, and the demand for their manufactures is increasing.

PARADE.—Prof. Frank Britton, the well-known organist, is to give a concert at the Baptist Church, on Monday next.

Mr. J. W. Beck with his family, who has been absent for some time on a business trip along the South Shore, has returned and will be found at his usual place of business, over the 25th building.

Mr. B. Reed, Esq., our enterprising townsmen, will exhibit two superb portraits of furniture at the Dominion Exhibition. Owing to pressure of business, he was unfortunately not able to prepare an exhibit of his own making for the Provincial and Dominion Exhibitions.

Mr. M. Taylor, Esq., who had 3 head of cattle killed on the W. & A. Railway, about two weeks ago, received pay for the loss sustained from the Company on Monday last.

Services will be held in the Free Methodist Church of this town, on Sunday, during the morning and evening, at the usual hours. Dr. McFarlane is expected to officiate. During the week services will be held fortnightly.

Vendor, the weather prophet, sends the following forecast for October, to the Montreal Witness: "From a comparison and study of past weather records and present indications, I am led to anticipate a term of unusually warm October weather during the first portion of the month, and a very rainy term after the middle of the month, and snow showers over a large part of the continent. I think the snow fall in December will be scanty, and that the year will close with little or no snow. Frequent thaws will in all likelihood characterize January, 1884, and abundance of rain. A good deal of warmth is due 1883."

ACCIDENT AT DORR.—Last Sunday, while on his way to service, Rev. Mr. Ambrose, Rector of Trinity Church, Digby, was thrown out of his carriage, and his foot catching in some way, he was dragged for some distance by his horse. Being such a heavy man the accident has been attended with the most distressing results. Fortunately, however, no bones were broken, but he was badly bruised about the body, scratched in the face, and very severely shaken generally. The Rector's gentleman did not allow the accident to prevent his holding service, though it was with difficulty he could mount his horse. During the course of the service he returned thanks, with great emotion, for his deliverance from death.

THE FISHERY EXHIBITION.—The following journal from London appears in the Globe of today: "The awards of the Fisheries exhibition Judges are now under final consideration. From information from various quarters there are good grounds for believing that the final announcement will show that Canada has obtained the following positions:—First in stuffed fish, pickled fish, fish culture, refrigeration, fishing boat models and fishing tugs. There is a very close contest between Newfoundland and Canada for the first position in dried fish. The relative positions have not yet been decided. Canada is strongly to be recommended for the first fish breeding apparatus."

WEDDING BELLS.—One of our young townsmen, Mr. Arthur Palfrey and one of our fair ladies Miss M. B. Burns, were united in the bonds of wedlock in St. John N. B., on Wednesday last, and the ceremony was performed in the presence of a few invited friends, by Rev. Wm. Reed, of the Exmouth St. Church, at the residence of the clergyman. The bride was given away by her father, Mr. Walter Palfrey, of Annapolis, and the groom was accompanied by his brother-in-law, Mr. Wm. Reed, of the Exmouth St. Church, at the residence of the clergyman. The happy couple were seated on Monday last, and were received with warm congratulations by their friends, to whom however their marriage is somewhat of a surprise.

ACCIDENT.—We regret to announce that Mr. Enoch Dodge, who has been postmaster of this town for many years, was seriously injured last Wednesday morning by the falling of a derelict, which he was engaged in superintending some work on the well known derelict, which was formed by the union of three poles in the shape of a triangle, some accident struck it over, and in falling Mr. Dodge was struck on the forehead of the head by the full weight of the derelict—the part where the poles were joined striking him. He was borne nearly to the fall. On being removed to the hospital and the doctor summoned, it was found that he was unable to move his legs and arms, denoting a rupture of the spine. Since the accident, however, he can move his legs, and slightly move his arms, and hopes are entertained, which we hope may not be disappointed, that he is recovering if slowly.

The Disaster Near Berlin.

The railway disaster which has happened at Sigitz, a village near Berlin, was a remarkable one in character as it was appalling. It appears that the station Sigitz is furnished with handrails which are intended to be used by passengers going to Berlin to cross the rails in order to enter the train. Until the up train arrived, passengers were allowed to board the train on the down platform, by means of a movable barrier, such as is used at most crossings and behind the barrier, at 10 o'clock at night, an impatient crowd of pleasure seekers who had been celebrating the anniversary of Bismarck's birthday, were waiting for the train that was to take them to Berlin. The train arrived, and, eager to secure seats, the excursionists either ran, or jumped or pushed their way across the barrier, and began to cross the rails, like a flock of sheep. They did this in spite of the shouts, reprobations and hectoring wailing of the railway officials—of whom, however, it is said, there was an altogether insufficient number—who saw, to their loathing, the Cologne express train from Berlin was tearing along upon the station at the rate of a kilometer per hour.

There was one breasting and unmanageable crowd which allowed the train to pass, and the heavy engine dived in among the wedged and jammed masses of people. The engine, which was moving with the horrible momentum and dismembered bodies of 44 human beings. One woman lay on her back, her arms and legs outstretched, and she was completely dead. Another woman and a child had been found. A child had been found, and one body was entirely devoid of clothing. The stationmaster, Mr. Galt, and the driver of the express train had to be relieved, being unable to proceed after witnessing the scene of horror. The locomotive was covered with pieces of flesh, bones, rags and clotted with blood. The fragments of the dead were scattered together and laid out in the waiting room. The medical aid was procured, but a good many cases were beyond recovery. A committee of inquiry into the circumstances of the accident has been ordered.

The Approaching Comet.

Boston, Sept. 21.—In a communication to the Harvard Observatory the Rev. Geo. N. Searle, of New York, calls attention to the fact that the comet which is expected to be seen with the long expected comet of 1812. He finds the date of its perihelion passage to be about 22nd Sept. 1883. The comet of the same name last seen at the Harvard Observatory confirms Mr. Searle's hypothesis, and he finds the perihelion passage to be about 18th Sept. 1883. The comet of the same name last seen at the Harvard Observatory confirms Mr. Searle's hypothesis, and he finds the perihelion passage to be about 18th Sept. 1883.

The comet of the same name last seen at the Harvard Observatory confirms Mr. Searle's hypothesis, and he finds the perihelion passage to be about 18th Sept. 1883. The comet of the same name last seen at the Harvard Observatory confirms Mr. Searle's hypothesis, and he finds the perihelion passage to be about 18th Sept. 1883.
