Winnipeg, Jan. 26.—(Special.) -- The first step in the government's teie-phone program was revealed to-day by a notice of motion by Hon. Coin Campbell, attorney-general, that he will, on Monday night, move to refer the whole matter to a select committee, composed of members from both sides of the house. It is believed the government will make known the general lines of their policy then. The house is being flooded with petitions asking for government ownership of the telephone systems of the province. It is thought that the ministry will introduce a measure to buy out the Bell Telephone people, and will pro-lyvide for expropriation, if they do not consent.

A bill will also be introduced to

Neighboring Property and Peterboro Construction Blamed.

Peterboro, Jan. 26.—This morning at an early hour a disastrous break occurred in the embankment of the Trent Canal, above the lift lock, and before it could be stopped 25,000 tons of water had poured over the land lying below the canal. Considerable damage was done. This break was due, according to the official statement of the superintendent, to the defective construction of the bank and not to the high water, which has been maintained at normal height in the reach.

Next to the government, the heaviest losers will be Curtis Bros., brick manufacturers, whose yards are immediately to the east of the bank of the canal.

"It is alleged you made payments, and these books would show it." In these words did Judge Winchester impress upon Frank M. Purdy, a representative of the plumbing firm of Purdy & Mansell, the importance of the cash book and ledger for 1896 and 1897 being produced in court.

By what might be a curious coincidence, these books, like those required of Bennett & Wright, were not discoverable, Also there had been books destroyed but in this case there was no flooding of the vault.

Two cheques, one for \$700 and the other for \$1500, were produced as exhibits, and Mr. Drayton appeared by his questionings to attach a good deal of importance to them. They were drawn by the firm in October, 1896, the year the city hall contracts were let.

Frank M. Purdy, who is a book-keeper for the firm, was the only withness examined. He was asked if he had the books for the years 1896 and 1897, and replied "No."

"Where are they?" asked Mr. Drayton.

Makes 'Em Feel Better.

All along the line the people seem to feel better since a little bit of frost is in the air, and the effect is noticeable in business. At Dineen's, Yonge and Temperance-streets, the big reduction in prices of all kind of furs is receiving the attention it merits, and many purchasers are being pleased. The stock is varied and very extensive, and carries with it the Dineen guarantee of quality. New ideas in men's hats from London and New York are arriving daily at Dineen's, and will interest the business man and good dresser.

Hamilton. Jan. 26.—(Special.)—The aldermen, regardless of politics, were called together this evening by M.tyor Hisgar to discuss the work for the year. They decided to make temporary repairs to roadways in the annex for the manufacturers, who will be asked how much they are willing to contribute to permanent roadways. Hon, J. M. Gibson will be invited to explain what the Hamilton Art School Board wants. It was agreed that the civic industrial committee was to be made up of Mayo. Biggar, Ald. Main and two other aldermen, to be named from time to time, and three representatives of the board of trade. A bylaw will be introduced, making it necessary for all salary increases to be reported to council, and fixed by bylaw. This is aimed partly at the ward foremen, who were granted an increase last Tuesday by the board of works.

would approve of his action in stopping the sale of stock.

From beginning to end of his address. President Simpson denounced A. E. Henderson in scathing terms. He affirmed the remarks of Mr. Marter and declared the company in a bad condition. He accused the Hendersons of wholesale misrepresentation. He had been drawn into the company by the fairy tales of R. I. Henderson, and the statements of Hon. A. G. Blair. Hon. Mr. Blair had been paid \$15,000 for doing nothing, in order that his name might be used in connection with the company. The Canadian Pacific Rallway and the Toronto Rallway Company had tested the bearing manufactured by the company, and had thrown it out as an absolute failure and dangerous to life, besides it was a waste as it took more power than the old bearings.

A. E. Henderson refuted the charges of the opposing faction in toto. He produced the affidavits of Messrs. S. Knechtel of Southampton and S. Ritter Ickes, electrical contractor, of Brantford, who declared the bearing to be the greatest invention since electric motors. From beginning to end of his address resident Simpson denounced A. E.

Talking about underhand work, he would like to tell the shareholders one item transacted by Mr. Marter. On Sept. 20 last Mr. Marter issued a writ against the company for \$1704—\$1500. a note for stock in the company, and \$204 on insurance policy: a bill of which had never been presented to the company. On Oct. 11, cause was shown, and an order for judgment for \$204 was granted. Shortly after Mr. Marter's election as vice-president, a cheque for \$1624. as vice-president, a cheque for \$1624, the amount of the note, interest and the cost of legal proceedings, was given him without ever acquainting the board of the transaction. The suit for judgment was still pending.

4. They are free from alcohol.
5. They are better for flavoring lees and caudy because they do not contain the disintegrating properties of alcohol, consequently an ice will remain firm.
6 Because the spice Flavors being pure white do not discolor the fruits when used for preserving or pickling purposes. They also do away with the gritty taste which occurs in using ground spices.

Above all other things the manufacturers mail train a high standard of quality.

with George W. Beardmore in the chair.
It was decided to change the dates which
had been arranged, May 2, 3. 4 and 5, to
April 24, 25, 26 and 27, so that his royal
highness, Prince Arthur of Connaught, who
will be in Canada at that time will be able
to attend. The prince has accepted the
committee's invitation by cable from Aden,
but asked that the show should be held a

Such was in thought the framing of a resolution moved by Mr. McNeel and seconded by Mr. Wright, which was seconded by Mr. Wright, which was passed at a meeting of the Varsity-Literary Society last night. The principal objectors were the theological students of Knox College, who claimed the Jocular and personal references in connection with the Torrey and Alexander meetings, the Glory song being mentioned in several places, were not in keeping with the dignity of a university paper.

The editor, Frank Barber, in reply, stated that "The Varsity" was only a

haustive and sympathetic analysis of the life and work of Thomas Carlyle, Edward Howard Griggs, speaking in the Y.W.C.G. Hall last night, referred to the great Scotsman as influenced by the two main European movements of the eighteenth century. The French revolution and the German transcendental philosophy. In this connection ne briefly indicated the main features of uel Kant's Critiques of the Pure and Practical Reason. By the latter the great thinker had restored what the former had taken away, and in the basic conception of human duty had provided the means for the reconstruction of human life, Carlyle the ethical poet of the French revo-lution, and the chief interpreter of German thought to the English-speak-

That of 1841-2 Was the Mildest, With Average of 30.5 Degrees for Four Months.

R. F. Stupart, director of the Dome interesting facts regarding In the past 73 years there have been fourteen winters of a decidedly mild

type. Of these that of 1841-2 was the st with an average temperature March and those of 1881-2 and 1889-90 were not much colder with a mean temperature in each instance of 29.9 degrees. It is of interest to note that in eight of the fourteen years the mild weather of December and January continued during February, while in three of the other years the temperature was very slightly below average, and in three it was considerably below. In only two of the fourteen years was March much below average, while in ten cases it was above average, and in six of these decidedly above.

While these facts are suggestive of the probable character of the next two months, the meteorologist would poquite unjustified in making a seasonal forecast, as he is as yet ignorant of the causes which lead to such vast differences as occur in the character of corresponding seasons in different years! He believes, however, that a wide departure from average weather conditions over any particular portion of the globe is caused, not by local conditions, but by variations in the atmospheric circulation over the whole earth, and these variations are probably due to a varying output of solar energy.

T CANADIAN NORTH-WEST!

Is attracting the attention of all Europe and drawing the most astute of United States farmers to its fertile plains. What an opportunity is now offering to investors to provide for themselves and their future generations, a settlement that must of necessity grow into wealth. Canadians are neglecting the fortunes that Dame Fortune has placed at their doors in failing to seize the opportunities that can last for only a few · years at the most.

Is possessed of 35,000 acres of the very pick of the Canadian West. The lands were selected many years since by an Ontario agricultural expert on account of the almost unexampled fertility, which has been verified beyond a doubt by practical tests during the past 5 years.

SOIL .- The top soil is a black gritty loam, averaging 1 to 3 feet, with a uniform friable marly clay subsoil, totally without alkali, and has been pronounced some of the best wheat land in the world.

WATER .-- Good well water is easily obtained in any section of the location at from 10 to 25 feet. Natural creeks of beautiful spring water traverse the lands as feeders of the celebrated Assiniboine River. which runs on the east side of the property.

GRASS and HAY .-- A luxuriant growth of grass occurs thruout the whole block, and in parts the pea vine abounds in almost incredible profusion.

TIMBER.--This great essential to the settlement of the western country is freely available from the

banks of the Assiniboine and its tributaries. district in the North-West is more favorably situated in this particular than this Company's lands.

CLIMATE .-- The lands, being north of the 51st parallel, are almost free from the strong penetrating winds which prevail farther south and by their peculiar situation receive the benefit of the Chinook winds.

THE SURFACE CONTOUR is one open expanse of slightly rolling prairie, varied with scattered bluffs of poplar and thoroly pleasing to the eye.

Railroad facilities are available from the Canadian Northern, which runs parallel and in close proximity to the south of the property thruout its entire length.

ners of this valuable stretch of Northwestern territory have decided to sub-divide the property, and are so convinced of its present intrinsic worth, and its ultimate growth and value, as to take small payments on allotments.

—"Reflects the utmost credit upon your house and upon Canadian skill and enterprise."—A. S. Vogt. Conductor of the Mendelssohn Choir.

Bare and empty statement of the merits of a piano can be made by the most insignificant manufacturer. It is open to anyone to declaim. But it is a very different thing to have artists like those whose own words we have quoted, and otherssuch as Calve, Nordica, Gadski, Plancon, Jonas, who have used this great Heintzman & Co. A plane that costs more than any other, but excels all others in real worth.

FISH HUNTING COON.

Editor World: I have been reading the adventures of Chris Stong, the Editor of the Wild and others with regard to coons and winter blackbirds. It is a common occurrence for coons to come out in soft spells during even our severe winters, and as for a man to go up a tree to take them out of their bed and kill them, this could done if the thermometer was at 40 below zero. Here is a real genuine weather bulletin coon story, and if any person wants the coon let him communicate with Wm. Sharpe of Norval, captured a fine raccoon on Jan. 23. It was hunting for fish and frogs long a spring creek that runs a short listance from his barn. It was nearly alf a mile from any bush.

BIG MINING MERGER IS ON

Over Ten Millions of Dollars Represented in Deal Being Consummated in Montreal.

Montreal, Jan. 26.—Arrangements completed this morning for the important mining consolidation that has ever taken place in the history of Canada's mineral development, including all the old Gooderham-British Columbia interests (acquired by the C.P.R.), the C.P.R. Trail Smelter properties and other mining interests in British Columbia.

perties and other mining interests in British Columbia.

The capital stock of the new concern, which will be known as the Canadian Consolidated Mines, Limited, is \$5,500,000, divided into one hundred dollar shares. It is expected that all details of the new consolidation will be completed within three weeks.

Among the properties included in the venture are the St. Eugene, the Centre Star mine, the Trail smelter, and the C.P.R. Trail concentration plant. The C.P.R. is naturally strongly interested in the new corporation, and for several weeks past Mr. Aldridge, the manager of the C.P.R. Trail smelter, has been here conferring with Sir Thomas Shaughnessy, perfecting the arrangements.

ngements. me time ago the C.P.R. purchased the extensive Gooderham mining in-terests in British Columbia, and these are being pooled in the new venture, together with the influential group of Montreal capitalists, headed by Charles

Summer.

The properties represent an actual investment of ten million, now capitalized at a trifle over five millions. The idea of the thing is to consolidate the concentrating plants on a stable scale and with the economy of production and smelting, etc., to be received.

Nearly everybody knows that charcoal is the safest and most efficient distanfactant and purifier in nature, but few sealize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onloss and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the leeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catargh.

All druggists sell charcoal in one form or another, but probably the best, harcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered willow charcoal, and other harmless matiseptics in tablet form or rather in the form of large, pleasant-tasting lozanges, the charcoal being mixed with loney.

I have much pleasure, gentlemen, in moving the adoption of the report.

Doctor Dow: I am sure that the report presented by our Chairman to-day is a very gratifying one. It shows a satisfactory increase in every department of the Company, and outlines investments that have been made by your Board of Directors in securities that we believe to be of a very high class. The bonds purchased may not anticipate so high a rate of interest as other investments of a questionable and speculative character, which we could have secured by taking outside risks, but we believe an absolute security earning an interest of 4 per cent., payable half yearly, one which will give our Shareholders no trouble, no thought or anxiety, will be more satisfactory for the years to come. Another thing that I am pleased with about this report, is the fact that our death rate has been very low from our inception, and I believe our Medical Director is entitled to considerable praise for his care and exercise in the selection of risks.

Our Chairman has already outlined to you the intention of the Board during the present year to consider the establishing of our Company in the Western Provinces. I believe this movement will have a very desirable effect, and will materially assist us in securing a large amount of high-class business, from which we hope to be able to present to you a very satisfactory report at our next annual meeting.

Gentlemen, it affords me a great deal of pleasure to second the adoption of this report.

Resolution for the adoption of the report was carried unanimously.

MEDICAL DEPARTMENT

Dr. Groves: I am pleased with the result of the year's business. As Medical Director, I consider the risks taker by the Central Life to be of a very satisfactory class. In the examination of the applications, very often it becomes a question whether the risk should be accepted or rejected. In such cases I have taken a safe course, and, after connuncication with the Local Examiners, have given the Company the benefit of the doubt. I am sure that this course is a correct one, from the fact that the death rate during that this course is a correct one, from the fact that the death rate of the amendment, and also for the interest of the Company from the time of our inception to the close of the last' year has only been 3.00 per thousand and the total death rate of the amendment, and also for the interest of the company from the time of our inception to the close of the last' year has been 3.70 per thousand, bears testimony to the care exercised by our staff of Medical Examiners in making their reports on the applications to be presented to the Company. I may here classify the causes of deaths in our Company, as follows:

"About a year ago I was ill with blood poisoning." writes Miss Eveline Louis, of 80 Walter Street. Buffalo, N. Y. "I had what seemed to be a small cold sore on my lip. It became very angry in appearance and began to spread until it nearly covered my face. I was a frightful sight and could not go outside the house because of my appearance. I used a blood medicine which did not give fine any relief. Then I began to take your Golden Medical Discovery. I was greatly benefited with the first bottle and after taking the second bottle was completely cured. The crysipelatous cruption disappeared and my blood was cleansed. My complexion is clear and fresh and I have felt better this year than I did for some time before. Dr. Pierce's Golden Medical Discovery is cortainly a most-remarkable medicine."

Don't accept a substitute for a medicine which performs such cures and which has a uniformly successful record of nearly forty years to its credit. It's an insult to your intelligence for a dealer to try by over-persuasion to palm off upon you in its stead some inferior article with no record to back it up. You know what you want; it is his business to meet that want.

An Old Settler Who Has Prospered, Talks of the Saskatchewan Jerritory.

Unusual interest is being shown in the lands offering by the Vermillon Assinibolne and Saskatchewan Land Co. The fact that the property is only thirty miles from the old settled district of Yorkton shows Low closely in touch with settlement these farm lands are and but for absence of railred accommodation the property would long since have been solidly taken up. This, the only drawback, has now been removed by the opening up of the Canadian Northern Railread, which runs immediately and parallel to the south of the block of 35,000 acres now offered by this company. At the company's head office, the Temple Butdang, yesterd ty, the managing director stated that the replies to the company's offer far surpassed the expectations and were conclusive evidence of the wide interest thirty miles from the old settled dispassed the expectations and were conclusive evidence of the wide interest now being taken in the Canadian west. George A. Bull of Yorkton, Sask.t-chewan, is in the city on a short visit to his brother, Robert J. Bull of Weston, late Deputy Reeve of York Township and County Councillor for York County. Mr. Bull settled in the Yorkton district affects years ago when the ton district fifteen years ago when the C.P.R. first built its line into Yorkton-His brother, Frank Bull, settled in

Yorkton twenty-two years ago, and another brother. Edward, settled there in 1881, and his brother John in 1883, all before there was any railroad in the district. Issi and his brother John in 1882, all before there was any railroad in the district.

Mr. Buil, in speaking to The World yesterday, stated that in all that time there had not been a crop failure in that district from any eguse whatever.

The land is nothwest of Winnipes and is in a rolling sheltered district. The World was amazed in discussing with Mr. Buil the shands that are being offered for sale in that locality by the Vermilion Assimboline and Sasketcheway Land Co. at their office in the Compele Building, foronto, to find that these lands are all choice lands and convenient to the railroad, with first class, transportation, and shipping facilities, and that these are the cheapest lands offered in the west, considering the advantages.

Unimproved school lands sold in November last in Yorkton district as high as \$27 per acre. Mr. Buil stated further that there had been more grain marketed up to the end of 1905, at Yorkton than at any other point between Fort William and Vancouver.

Mr. George Buil will be at the Vermilion Assimboline and Sasketchewan Land Co. 's office in the Temple Building for the next few days and he is perfectly familiar, with all the districts in the west, having traveled ox tensively shere. His money, however, was made in the Yorkton district where these lands are offered for sale, and where he had \$50 acres of cropiast year. Many of his friends have settled near Yorkton during the past twenty years, all of whom have madamoney easily and rapidly.

If you are losing in strength of youth and can see evidence, from day to day, that your physical system is going to decay, you should, in common justice to your future happiness, take step- to check this.

Don't make the mistake of thinking that this can't be done; it can and has been done in thousands of cases.

Don't deceive yourself into believing that it is natural for any person to thus exhaust their power. thus exhaust their power.

Nature is appealing to you every moment to save yourself. The slight pains that you feel: the momentary spells of weakness; the periodical loss of memory, duliness of brain, drowsiness—all point to the necessity of curing yourself now. I have a positive cure for you in my

CUBA---THE LAND OF SUNSHINE

CANADA-CUBA LAND & FRUIT CO., Limited

Numerous people have just returned from our property and we shall publish their letters in Wednesday's papers of next week. They claim our lands are exactly as were present them. The best lands for Oranges, Lemons, Figs, Grapes, Pine Apples and other fruits and vegetables.

THESE LANDS are a sandy loam soil. Just what is required for the growing of the above fruit trees. The land is easily cleared; in fact one acre can comfortably be cleared in one day. Land that is easy to cultivate and that will not bake with the sun. Responsible men who have just returned assure us that new potatoes and vegetables of the finest specimens are now growing on our Estate; also that orange; fig and other trees are looking fine and healthy, and assure us that they are perfectly satisfied that these lands are the very best they have seen in Cuba for the cultivation of citrus fruits and vegetables. They have bought several hundred acres of land from us and are going to make their homes there and cultivate the same.

OUR DEEDS are perfectly satisfactory and deeds are now in our lawyer's hands in Havana and are being prepared for each one and all of our purchasers, and will be handed to them as early as possible.

THE NUMEROUS CABLES which have been published from time to time from those who have gone to see our Estate, and asking for locations, should be sufficient to convince the most skeptical that these lands are exactly as represented. We have already sold about forty-six square miles of these fruit lands in small blocks, which should convince you of their merits.

EVERY ACRE will be increased within a very few days to \$40.00 per acre, so buy now at \$20.00 per acre and save money.

OTHER COLONIES started years ago, sold their lands at first starting, like we have done, at Ten Dollars per acre, and are now selling their unimproved lands from \$75.00 to \$100.00 per acre. We have direct transportation by boat, and the railway is now being built to within a short distance from our property.

Remember every promise made will be carried out. The desire of our board of directors is to make this the banner colony of Cuba.

THE COMPANY are now working extensive plantations, which have been established for many years, and have the reputation of marketing the finest tobacco grown in the world.

The distance from Toronto to our Estate is just about the same as from Toronto to Winnipeg. A perfectly healthy climate; no snow or frost and no extreme heat.

A WOMAN'S LIFE

There are three periods of a woman's life when she is in need of the heart strength-ening, nerve toning, blood anriching action of

MILBURN'S HEART AND NERVE PILLS

The first of these is when the young girl is entering the portals of womanhood. At this time she is very often pale, weak and nervous, and unless her health is built up and her system strengthened she may tall a prey to consumption or be a weak woman

The second period is motherhood. The drain on the system is great and the exhausted nerve force and depleted blood require replenishing. Milburn's Heart and Nerve Pills supply the elements needed to do this

The third period is "change of life" and this is the period when she is most liable to hearf and herve troubles.

PIANOS

Montreal Star, January 17, 1906.-Musical Montreal was charmed and delighted with the magnificent playing of the great French pianist, Ragul Pugno, at Windsor Hall last night, and the unanimous opinion expressed was that it was the finest recital given here in years. Mons. Pugno honored Canada by selecting for his concert the Premier Grand Plano made by Gerhard Heintzman, Limited, of Toronto, A great many old fogey musicians were looking for an American piano to be-used, but Pugno is up-to-date, and when he found a piano made in Canada equal to any in the world he requested it for his recual here, and it filled every demand and at once established the fact that Gerhard Heintzman Planos have no peer for home or concert use. Mons. Pugno, when questioned by some of our skeptical musicians, gave the Gerhard Heintzman Piano the greatest praise, both the Grand he used at his concert and the Gerhard Heintzman Grand he played on at his visit to the McGill Conservatorium yesterday afternoon. NO BIBLE IN COURT.

New York Judge Says Witnesse

New York, Jan. 26.-Justice Tierney of a municipal court in the Bronx has abolished the use of the Bible in his court. Explaining his action, he said:
"I have removed the Bible from use "I have removed the Bible from use in my court. It was a desecration to use it there. The lying words from the mouths of witnesses made its use a mockery, a travesty. I was brought up to regard it with veneration and re ence as the word of God. It is shocking to find men calling upon the deity to witness the truth of what they say: "So help me God," with a lie in their 'So help me God,' with a lie in their hearts and upon the lips by which they profaned the good book.

"I now swear or affirm a witness with uplifted hand, but it really has no significance to my mind. I would prefer to let every person tell his or her story without either oath or affirmation, and then do the best I can toward ascertaining the truth."

Where will the rooster get the axe? Well, we can guess!

This picture is an allegory. The girl with the axe represents Dineen's - the axe is Dineen's price axe - the ginger snap is what the hat buyer gets - the axe is what the rooster gets-and the rooster's name is PRICES.

Largely Attended Meeting at Agincourt Appoints Committee to Wait on C.P.R. Officials.

Agincourt, Jan. 26.-(Special.)-The

ion of a Canadian Pacific Railway burban service from North Tcront r even to Locust Hill, seventeen miles vas discussed at a public meeting i Agincourt this afternoon held immediately after the Milk Producers' Association had held their meeting in the Temperance Hall. There was a large attendance. James Chester presided. W. F. Maclean referred to the need there was for such a service. It would improve the value of all the property especially if the company would give an early morning and late evening service. The farmers would get their garden and dairy products of the city more rapidly. People will settle all along the line if they had such a service. The stops from North Toront eastward suggested were: Summerbill avenue, a distance of one-half mile Leaside, one mile: Donlands, three miles; Wexford, five miles; Ellesmere seven miles; Agincourt, nine miles gincourt this afternoon, held immed Leaside. one mile: Donlands, three miles; Wexford, five miles; Ellesmere. seven miles; Agincourt, nine miles; Brown's Corners, eleven miles; Locust Hill, seventeen miles. A canvass of the meeting showed that over 100 cans of milk were now teamed to the city over bad roads from this territory. It was also pointed out that people would come from Markham to catch the train at Locust Hill or Brown's Corners. Dr. Sisley also spoke warmly in commendation of the service. He was sure it would be to the advantage of Agincourt to have an early and late train connection with the city. It would be a good thing for the women of the district, as it would enable them to go more frequently to town. Mr. Elliott also commended the proposition. The meeting unanimously adopted the following resolution: "Moved by Dr.S. sley, seconded by Mr. Elliott, that this meeting of milk producers and of residents of Agincourt hereby request the management of the C.P.R. to establish a suburban service from North Toronto to Agincourt, or farther; and that the mover and seconder and W. F. Maclean, M.P., be a committee to lay the matter before the railway officials." Details as to the nature of the service were left to the conference.

the crown attorney, and thought it was stretching his jurisdiction.

"But, never mind," he said, "we will win the case in the long run, any-way."

In the afternoon, Judge Winch ster, in the county court, remanded him for a week, without ball.

A big pile of the goods which Detective Sockett so cleverly recovered from the back-country hiding piaces was displayed in court.

It is likely that Sockett's work in this case will be favorably considered by the police commissioners on Tuesday, when a permanent appointment to the staff will be the probable reward. At present Sockett has acting rank. For several years he has done valuable plain-clothes duty, and his promotion will be generally popular.

County Council.

Yesterday's meeting of the York County Council was largely given up to what the members regard as the righting of abuses. If there is one matter more than another upon which the members of the council are a unit it is in the desire to regulate, and if possible, eliminate. What they was adopted granting to county constables \$25 for information leading to the conviction of those violating the speed prescribed with respect to automobiles. The legislature subsequently declared that the bylaw was unconstitutional. Councillor Evans yesterday introduced and carried thru a measure favoring a petition to the legislature granting the necessary power to county councils, which was unanimously adopted. Embodied in the petition is a request that parliament detained in custody, appeared in two courts yesterday.
