KRUGER'S GOVERNMENT DEMANDS AN ULTIMATUM TO ENGLAND!

The Boers Make Four Demands on Great Britain—They Expect a Reply by Five o'Clock This Afternoon or it Will Be Taken as a Declaration of War.

Transvaal Troops Are Said to Be Out of Control and Delay Till the Arrival of More British Troops Would Mean Less Chance of Success—What the Burghers Claim—Forts Constructed by Boers at Laing's Nek—Hot News Expected To-Day.

London, Oct. 10.—The Cabinet has been summoned to meet at the Foreign Office on Friday next.

The ultimatum of the Transvaal Government is naturally the absorbing topic of conversation at the clubs and in political circles to-night. There was no apparent excitement, however, but a general feeling was expressed that the Boers had made a mistake, as their forcing matters would tend to alienate the sympathy which might have been extended to them had they thrown the stigma of declaring war on Great Britain.

Boers Beyond Control.

The only wonder is why, if President Kruger is resolved upon fighting, he has waited so long. The explanation seems to be that his hand has been forced by the fact that the Boers have got out of control, or that, if he awaited the arrival of the British army corps, the chances of military success for him would be of the slimmest possible character.

Refugees as Volunteers.

The expiration of the time limit of the ultimatum to-morrow evening does not leave Great Britain much time to strengthen the present military position, although there are still a few troops at Durban, Natal, available for despatch to the front, and the Government will doubtless now adopt the suggestion to form the refugees from the Rand into volunteer regiments, thus, while relieving their distress, utilizing excellent martial material.

Forts Command Laing's Nek.

Outside the momentous news of the ultimatum nothing of moment has been received from the scene except the announcement that the Boers have constructed forts commanding Laing's Nek, and that guns have been mounted on Mount Pogwane and Mount Prospect.

The Ultimatum Arrives.

The text of the Boer ultimatum, as arriving this morning, was sent with all speed to Lord Salisbury, who came to town this afternoon, and a despatch box was sent to the Prince of Wales, which is only done in cases of special urgency.

War It Must Be Now.

In ordinary circumstances, as Great Britain is the government making the demand, she would be the despatcher of the ultimatum, and the fact that the Boers have taken the initiative is regarded as rendering the situation more serious, and increasing the hopelessness of avoiding war. It cannot be doubted that England's reply will be a flat rejection of President Kruger's demands, and that a quarter after 3 o'clock this afternoon, English time, an actual state of war will exist.

Friday's Cabinet Council will have to deal with the military situation and Parliament will have little else to do than to sanction the necessary credits.

Transporters for Delagoa Bay.

The Portuguese Minister to Great Britain, Senhor Severim, called at the Foreign Office this afternoon and had an interview with Lord Salisbury, and his visit is naturally connected in the public mind with the alleged purchase by Great Britain of Delagoa Bay. A despatch tending to confirm the truth of this public report comes from Cape Town, Oct. 10.—A despatch from Pretoria to a Cape Town newspaper says that Commandant Gen. Joubert has issued a notice to the troops in the different laagers to hold themselves in readiness for an immediate advance. The Transvaal, the despatch also says, hopes to arrange to send the European mails by the way of Delagoa Bay.

Highlanders for Ladysmith.

London, Oct. 10.—A despatch from Durban, dated yesterday, says: "The Gordon Highlanders and all the troops that arrived from India to-day have been ordered to Ladysmith."

The coal that was seized by the Orange Free State authorities has been released, the officials explaining that it was seized because they thought the mineral was likely to close.

Will Keep the Boers Out.

London, Oct. 10.—The action of the British third-class cruiser Phionel in intercepting the British steamer Genolph, from Southampton, supposed to be carrying ammunition to the Boers, and the fact that the Phionel sailed to-day to intercept the German liner Kanster, with ammunition, between Great Britain and Boers, they say the police have been withdrawn, and the vessels of the borders of this Republic are at the mercy of the Kansters, who are collecting at King's Kraal.

HOW THE TRANSVAAL PUTS IT.

Text of the Cablegram Sent by Sir Alfred Milner to Mr. Chamberlain Yesterday Morning.

London, Oct. 10.—Late this afternoon the Colonial Office gave out the text of the following telegram from the South African Republic, transmitted by Sir Alfred Milner, British High Commissioner in South Africa, to the Secretary of State for the Colonies, Mr. Joseph Chamberlain, and received at 6.45 a.m. to-day:

"Sir.—The Government of the South African Republic feels itself compelled to refer the Government of Her Majesty the Queen of Great Britain and Ireland to the

THE BOER ULTIMATUM.

Pretoria, S.A.R., Oct. 10.—The Transvaal Government has just handed the following ultimatum to Mr. Conyngham Greene, the Diplomatic Agent here:

"Her Majesty's unlawful intervention in the internal affairs of this Republic in conflict with the London convention of 1884, by the extraordinary strengthening of her troops in the neighborhood of the borders of this Republic, has caused an intolerable condition of things to arise, to which this Government feels itself obliged, in the interest not only of this Republic but also of all South Africa, to make an end as soon as possible; and this Government feels itself called and obliged to press earnestly and with emphasis for an immediate termination of this state of things, and to request Her Majesty's Government to give assurances upon the following four demands:

"First, that all points of mutual difference be regulated by friendly recourse to arbitration or by whatever amicable way may be agreed upon by this Government and Her Majesty's Government.

"Second, that all troops on the borders of this Republic shall be instantly withdrawn.

"Third, that all reinforcements of troops which have arrived in South Africa since June 1, 1899, shall be removed from South Africa within a reasonable time, to be agreed upon with this Government and with the mutual assurance and guarantee on the part of this Government that no attack upon our hostilities will be made by the British Government during the further negotiations within a period of time to be subsequently agreed upon between the Government and this Government, and that, in the event of any further movement of troops occurring within the above-mentioned time in a nearer direction to our borders, this Government will be compelled to regard this also as a formal declaration of war."

"I have the honor to be, respectfully yours,

"F. W. REITZ,"

"State Secretary."

more to the convention of London, 1884, concluded between this Republic and the United Kingdom and which, in article xiv, secures certain specified rights to the population of this Republic, namely, that all persons other than those conforming themselves to the laws of the South African Republic:

(a) Will have full liberty, with their families, to enter, travel or reside in any part of the South African Republic.

(b) They will be entitled to hire or possess houses, manufacturing, warehouses, shops and other premises.

(c) They may carry on their commerce, either in person or by any agreement or agents whom they may think fit to employ.

(d) They shall not be subject in respect of their commerce or industry, to any taxes other than those which are, or may be, imposed upon the citizens of the said Republic.

This Government wishes further to observe that the above are the only rights which Her Majesty's Government has reserved in the above convention with regard to the Outlander population of this Republic and that a violation only of these rights could give that Government a right to diplomatic representation or intervention; while, moreover, the regulation of all other questions affecting the position of the rights of the Outlander population, under the above mentioned convention is handed over to the people in indisputable representation of the people of the South African Republic.

Standing on Dignity.

"Among the questions the regulation of which fall exclusively within the competence of the Government and of the Volksraad are included those of franchise and the representation of the people in this Republic, and it is the exclusive right of this Government and of the Volksraad to regulate the franchise and to discuss, in friendly fashion, the franchise and representation of the people in this Republic. It is not the business of Her Majesty's Government, without, however, consulting any right thereto on the part of Her Majesty's Government, to formulate the franchise law.

A Little History.

"This Government has also, by the formulation of the now existing franchise law

and by a resolution with regard to the representation, constantly held these friendly discussions before its eyes. On the part of Her Majesty's Government, however, the friendly nature of these discussions has assumed more and more a threatening tone; and the whole of South Africa have been excited and a condition of extreme tension has been created, owing to the fact that Her Majesty's Government could not agree to the legislation respecting the franchise and the resolution respecting representation in this Republic, and finally by your note of Sept. 25, 1899, which broke off all friendly correspondence on the subject and intimated that Her Majesty's Government must now proceed to formulate their own proposals for the final settlement.

Claims a New Violation.

"This Government can only see in the above intimation from Her Majesty's Government a new violation of the convention of London, 1884, which does not reserve to Her Majesty's Government the right to a unilateral settlement of a question which is exclusively a domestic one for this Government, and which is already being regulated by this Government. On account of the strained situation and the consequent serious loss in and interruption of trade in general, which the correspondence respecting franchise and the representation of the people of this Republic has carried in its train, Her Majesty's Government have recently proposed for an early settlement and finally pressed, by your intervention for an answer within 48 hours, a demand subsequently somewhat modified, to your note of Sept. 15, and to your note of Sept. 25, 1899; and thereafter further friendly negotiations were broken off, this Government receiving an intimation that a proposal for a final settlement would shortly be made.

The Troops the Trouble.

"Although this promise was once more repeated, the troops, up to now, has not reached this Government, and while friendly correspondence was still going on, the Government of the South African Republic, introduced by Her Majesty's Government, the troops being stationed in the neighborhood of the borders of this Republic."

"Having regard to occurrences in the

MR. TARTE IS FRENCH FIRST

Minister of Public Works is Determined to Keep His Name Before the Public Somehow.

MINISTER IN A BRITISH CABINET,

Yet Would Give It Up if He Could Not Be a Frenchman at the Same Time.

Montreal, Oct. 10.—(Special.)—The attention of Lord Minto is drawn to the utterances of one of his Ministers, for after reading the words of this Canadian Minister over, we will understand why troops are not sent to help England in the Transvaal. As a matter of fact Mr. Tarte's language was so shamefully disloyal that his own paper, La Patrie, did not publish the most of it. The following is Hon. J. Israel Tarte's profession of faith at the Herby banquet in the Windsor Hotel:

"I declare here that a public man in the arena of federal politics, who has not the energy and courage to say that he is French and Catholic, when he belongs to that faith and race, it would be better for him to remain at home. I return from France, where I received the care that French science can give, and I return to Canada more French than ever. I am a Minister in a British Government, and I have the right to say that I am French. But I am not a Frenchman, and I am not a British subject. I would prefer to be a Frenchman, and I would prefer to be a British subject, than to be a Frenchman and a British subject at the same time. We are happy and free under British institutions, but France is always my dear country."

CENSORSHIP ABOLISHED.

Ottawa Now Allows the Truth to be Sent from Manila, but It Must Be Truth.

Washington, Oct. 10.—Adjutant-General Corbin announced to-day that the censorship at Manila had not existed for a month. General Otis having abolished it on Sept. 3. There has never been any occasion for imposing the censorship since the American question arose as to the restrictions that might prevent full reports about the several campaigns reaching American newspapers. It is then developed that there is no censorship of news from Manila, and that a reputable correspondent to a reputable newspaper, although under the new regulations information of value to the enemy or untruthful reports will destroy the sender's future usefulness.

CRAZED FOR WANT OF SLEEP

"You Will Find My Body in the Ottawa River" Was the Message Left by Henry Thorne.

HE HAD SUFFERED FROM ABSCESS.

And Because of Slow Progress Became Despondent and Drowned Himself.

Ottawa, Oct. 10.—"I am crazed for the want of sleep. I cannot bear my suffering any longer. Good-bye, all. You will find my body in the Ottawa River, near the railway tracks, where they turn on the bridge."

This was the message Mrs. Elizabeth Thorne found on the work bench in her son's shop at the rear of her residence, 128 Elm-street, this morning. The man who had left the message was Henry Thorne, 46 years old, her son, who had lived in the house with his father and mother. The man had been suffering from an abscess in his leg, from which he had been suffering for some time. He had the abscess lanced, and two weeks after returned to his home. Here he lingered until he was told by Dr. Small, his medical adviser, that he should go back to the hospital again, as the wound was not improving. When he received this advice, Thorne became discouraged, and went to the hospital again, but in very poor spirits. The remains were found where the note indicated.

LIBERAL MACHINE

GOT A BLACK EYE

Scouts Were Sent Out in Winnipeg Monday Night to Pack the Meeting.

A GENERAL ROUND-UP MADE

Of All the Government Officers, Federal and Provincial, in Order to Swell the Crowd.

LEADING MEN DEFY THE MACHINE.

Mr. E. D. Martin Made a Hit—Sifted Running the Liberal Party Into the Ground.

Winnipeg, Oct. 10.—(Special.)—The talk of the city to-day among all classes of citizens is the Liberal Association meeting last night. The Tribune, Liberal, gives what is admitted to be a very independent account of the proceedings, and it says, in introducing a six-column report: "For several days past it has been a matter of current report, founded on the evidence of absolutely trustworthy citizens, that the 'Machine' element in the Liberal party had prepared a ticket for election at Monday night's meeting."

Meeting Supporters.

In addition to Liberal Organizer Smith's note, sent to those whom they considered would obey without question, interested individuals have been busy begging supporters to turn out and give the "Machine" a sound, and in certain instances holding out promises of patronage and other favors, which the "Machine" claims to have at its disposal. Fearing that men who thus pledged to support the "Machine" would be insufficient, the offices of the Provincial and Dominion Governments were scoured, and scores of clerks and officers in all grades of the public service were given marching orders to the Odd Fellows' hall, and one unacquainted with the nature of the business might well be imagining that the assemblage was a civil service conference.

The Meeting Was Packed.

In brief, the meeting was packed. It was packed for a purpose, and the evidence of eliminating from the Executive of the Liberal party the "Machine" element of an honest, independent spirit.

During the election of officers many members of the association were seen consulting slips of paper sent out by the "Machine," on which were written the names of those whom it was desired should be elected to the Executive, in a few instances, for appearance sake, the names of a few Liberal Independents, though, were left on the "tickets." But it is needless to say that the "Machine" minority, and in several instances declined re-election. In the case of ex-Ald. Black, who retired north and had been elected to the front of the platform, faced the crowd and left the Liberal party. The names of the Executive. He was elected, Liberals like J. A. McKeen, D. J. Macdonald, H. C. Stovel, J. D. Jones and others were not apparently wanted on the Executive, though they have given excellent service during the past year.

Martin Was Well Listened To.

Mr. E. D. Martin received a careful hearing during his valedictory, and his address was punctuated with applause. He spoke forcefully and with great earnestness. The meeting lasted from shortly after 8 p.m. until about 1 a.m. It was characterized by the fearless and outspoken manner of one hand, and the smooth work of the "machine" on the other. One of the results seems to be a better understanding of the distinction between those who are for above-board, fair and square dealing, and on the other hand, those who favor ready-made tickets and general machine politics, for appearance sake, the names of a few Liberal Independents, though, were left on the "tickets." But it is needless to say that the "Machine" minority, and in several instances declined re-election. In the case of ex-Ald. Black, who retired north and had been elected to the front of the platform, faced the crowd and left the Liberal party. The names of the Executive. He was elected, Liberals like J. A. McKeen, D. J. Macdonald, H. C. Stovel, J. D. Jones and others were not apparently wanted on the Executive, though they have given excellent service during the past year.

Fighting Joe's Arrival.

Joseph Martin's arrival in the city this evening. He remains here a couple of days before proceeding east. He predicts the fall of the Liberal Government on the assembling of the House.

The Ticket Agents.

The Ticket Agents' Association elected the following officers to-day: President, J. W. Churchill, Collingwood; 1st vice-president, W. Jackson, Clinton; 2nd vice-president, M. McNamara, Walkerton; 3rd vice-president, W. H. McKay, St. John, N.B.; secretary, J. H. Brown, St. John, N.B.; treasurer, J. H. Brown, St. John, N.B.; and the fourth year member. The next place of meeting is Hamilton.

Here is a Snag.

J. B. Hunter, B.A., '90, of Woodstock, has been appointed private secretary to Hon. James Richardson, the newly-made Minister without portfolio. What a snag!

Warmer and Showery.

Meteorological Association, Toronto, Oct. 10.—(8 p.m.)—The trough of low pressure mentioned last night is moving slowly eastward across the lake region, accompanied by showery weather, and an important high area, accompanied by colder weather and local snowfalls, is developing in the Northwest Territories. From Lake Huron eastward to the Maritime provinces the weather is fine and moderately warm.

Minimum and maximum temperatures: 22-29; Prince Albert, 26-34; Qu'Appelle, 24-35; Winnipeg, 36-44; Port Arthur, 40-48; Harry Soudan, 42-50; Regina, 40-49; Ottawa, 40-62; Montreal, 48-60; Quebec, 44-56; Halifax, 48-60.

Lower Lakes and Georgian Bay—Southeasterly and southerly winds, warm weather, becoming showery.

Upper St. Lawrence and Ottawa Valley—Southeasterly to southerly winds, fair and moderately warm.

Maritime—Light to moderate winds; fair and moderately warm.

Lake Superior—West to north winds; showery.

Manitoba—Northwest winds; weather turning colder; light local sleet or snow.

THE MOLSONS BANK

Annual Meeting of the Shareholders Held Yesterday.

SATISFACTORY REPORT.

Shareholders Pleased With Year's Business—Capital Stock to be Increased—Directors Re-elected.

The forty-fourth annual general meeting of the shareholders of the Molsons Bank was held in the Board Room of that institution, at 3 o'clock Monday.

The president, Mr. W. M. Macpherson, Quebec, occupied the chair, and among those present were: Messrs. S. H. Ewing, Vice-President; Henry Archibald, J. P. Cleghorn, W. M. Ramsay, Samuel Finlay, H. Markland Molsos, directors; John Crawford, George Dunford, Dr. G. W. Lovelock, C. E. Sprague, J. Try-Davies, John W. Molsos, A. F. Gault, Henry Hogan, R. W. Shephard, Daniel Crawford, James Wilson, Daniel Wilson, E. H. Copland, J. N. Parrott, E. J. Barbeau, Mrs. Nora Evans, and others.

The president, having called the meeting to order, requested Mr. James Elliot to act as secretary, and after that gentleman had read the advertisement which accompanied the meeting, the president named Messrs. J. Try-Davies, R. W. Shephard to act as scrutineers.

Report of the Directors. The secretary then read the annual report of the directors, as follows: Montreal, 9th October, 1898. Gentlemen:

The directors beg to submit to the shareholders the forty-fourth annual report of the Molsons Bank for the year ending 30th September last. The net earnings for the year, after making full provision for the depreciation of debts amounting to \$283,888.62, from this two semi-annual dividends at the rate of 5 per cent. per annum, and a bonus of 1 per cent. equal to \$180,000, have been paid, leaving \$100,888.62, which, added to the amount carried over from last year, \$81,020.95, makes a sum of \$180,000.47, appropriated as follows: Transferred to Reserve Account, \$125,000.00; Written off Bank Premises, \$50,000.00; Carried over at credit of the Reserve and Loss Account, \$15,000.47.

To avail ourselves of the increased prosperity in the country, and to judge the results of the business, the directors, since our last annual meeting, have opened new branches at the following places: Avira, the residence of Mr. J. P. Cleghorn, Hensall, Kingsville, Knowlton, Fort Arthur, Valleyfield, Victoria, and so forth, as we can judge the results of the business to be satisfactory.

The business of the bank has been increasing and profitable, and your directors are pleased to announce that the continued faithfulness and seal of the officers as a body.

You will see by the addition to bank premises account, an appropriation of \$50,000 for the same, that the directors have been acquiring other buildings, and wherever it could be profitably done. In order to establish the bank in British Columbia, a fine building has been erected in Vancouver, which affords a safe and handsome quarters, and brings in a fair revenue.

At our last annual meeting reference was made to the robbery of \$62,000 from the treasury of our Winnipeg branch. We are pleased to be able to say that the bulk of the money has been recovered, and that a former junior clerk of the bank, who had been guilty of the robbery, has been brought to justice, and is now in the penitentiary.

W. MOLSOS MACPHERSON, President.

Leaving at credit of Profit and Loss Account, 30th September, 1899, \$15,000.47. THE MOLSONS BANK, Head Office, Montreal, 2nd October, 1899.

The President said: "I think the report is a very full one. It speaks for itself. The business of the bank during the past year has been most prosperous, and there is every indication of a continuance of it. The increase of capital, concerning which we shall submit to you a by-law to vote upon, has recommended itself to us as necessary to postpone the vote on the by-law until the meeting of the directors' report was read unanimously, after which Mr. A. F. Gault moved, as follows: That the following by-law of the bank be adopted: 'By-law (a). It is expedient

THE AXLE OF ONE OF THE CARS GAVE WAY, BUT NO ONE WAS HURT.

Every train that pulled into the Union Station yesterday had among its passengers a number of people who were conspicuous because of a purple and white badge which adorned each breast. They were delegates to the seventh Ontario convention of the International Order of the King's Sons and Daughters, which opens this morning at 10 o'clock in the Y. W. C. Hall, McGill-street.

Scarboro's Big Fair to-morrow. The annual exhibition of the Scarborough Agricultural Society will be held at Scarborough Junction to-morrow. Buses will be sent to the fair from the city at 10 o'clock.

Toronto Junction, Oct. 10. (Special.)—A freight train, running between Stratford and Toronto, and which departed this morning at a short distance north of the bicycle factory, through the axle of one of the cars in the centre of the train giving way, which is said to have been caused by a hot box. Five cars were completely wrecked, and no one was hurt. The cars were loaded with apples, wood and iron, and several hours were lost in unloading the wreckage.

It is probable that the city cars will be sent to the corner of Keele and Dundas-streets in about ten days. The agreements are now being engrossed, and when signed will be ready for the city council to pass. The Citizens' Band purpose holding a smoking concert on Friday evening, and for the purpose of raising money for the purchase of a new band.

JAW POWER OF ANIMALS. Some Instances. The power which carnivorous animals have in their jaws is astonishing.

Archibald T. Montgomery, an English trader and scientist, has noticed cases of the tiger usually seizing an Indian native by the shoulder, and with one jaw on one side and the other jaw on the opposite side, tearing clean through the chest and back, penetrating the lungs.

When a lion attacks the bite penetrates to the lungs. This kind of a wound is characteristic of the attacks of many of the cat family. The tiger usually seizes its prey from a cat's bite for the same reason. The canine teeth are almost driven through the lung, under the ribs.

The leopard, when seizing smaller animals, such as dogs, catches them by the throat, and aims at biting through the lungs. The teeth, even of the largest animals, are merely the "spearsheads," but it seems as if for the moment the animal threw all its bodily energy into the contraction of muscular action which we call a "bite."

THE SOUTH AFRICAN ULTIMATUM. Ajax defining the lighting is not a patch on the debt that Oom Paul has issued to the British Empire. History will be searched in vain for a parallel to this Dutchman's presumptuous challenge. But he has already had his reply. No sooner had Kruger's ultimatum reached London than the stock market took a decided turn for the better. South African stocks, especially, scored a considerable advance. Unless some unforeseen circumstance arises Great Britain will be in possession of the whole of South Africa within six months. The gold fields of the Transvaal will then be developed under British laws and their output will be enormous. It was the knowledge of this fact and a belief in the ultimate success of the British arms that caused the Kafir stocks to appreciate rather than decline on the publication of the ultimatum yesterday.

It is difficult for to realize how rapidly the world is being united and brought into conformity with the canons of a common civilization. The decadent and medieval nations are being made to toe the line one after another. The world is passing no tribe or people can escape. The ethics of modern civilization, as exemplified in the history of the great powers, must be accepted by minor states under the penalty of annihilation. The pressure to unify the world is enormous, and it is increasing in the most rapid manner. The world was recently turned on Spain. She objected, of course, but finally she accepted the decree of civilization. Now it is the medieval Dutchmen of South Africa who have to be brought into harmony with the new civilization. Personal and political freedom is not contented by territorial boundaries, but is world-wide. No nation can escape the obligations it owes to humanity. Oom Paul is defying civilization, but he and his people will soon be forced to accept its inevitable decrees.

A PUBLIC MEETING IN ORDER. The event in London yesterday was the departure of the New South Wales Lancers for South Africa. As the colonial troops marched through the Imperial capital the enthusiasm of the people was unbounded. While Australia is thus to the front in proving in a practical way her loyalty to the Empire, the Government of Canada is halting and debating as to what it should do. The Government is clearly thwarting the wishes of the people of Canada in regard to the sending of troops to South Africa. Public opinion in this part of the country is rising to fever heat, especially in view of the indifference of the Government. Many citizens called at this office yesterday and suggested the holding of a public meeting to protest against the Government's lukewarmness towards the proposal that Canada should send a contingent to South Africa. War has now been declared, and a raid by the Boers into Natal is being expected at any moment. Tomorrow's papers may contain the details of the first encounter. The time for debating what we should do has passed. Canada should willingly and at once accept her responsibility in the present crisis. That responsibility does not consist in lip loyalty, but in practical assistance. We are sorry that the Government has failed to appreciate the sentiments of the people on this question. We are sorry that it is necessary to call public meetings to urge the Government to do its duty. But such meetings are necessary, and we have no doubt steps will be taken at once to hold one in Toronto.

REDUCTION IN THE COST OF SMELTING ORES. The reduced smelting charges now in force in the Boer area are much more advantageous than the most beneficial effect on the mining industry of that locality. The Northport smelter is quoting a rate of \$4.50 a ton, which includes freight and treatment. Not only has the cost of freight and treatment been greatly reduced, but the smelter returns for the ore are much more advantageous to the mine-owner. The Rosland smelter compares the cost of smelting in Rosland three years ago, when Mr. Helzre operated the smelter at Trull, with the cost to-day. The old Helzre rate was \$11 per ton, freight and treatment, with \$1 per unit paid for copper. The Northport smelter is now paying on the liberal basis of \$2.50 per unit for copper and 95 per cent. of the gold and silver values. If the ore carries \$20 in gold, one ounce in silver and 3.3 per cent. in copper, the treatment cost is known for years. The ridges shown below. In each case 1.3 per cent. copper is deducted by the smelter, so that copper assaying 3.3 per cent. is actually paid for as running 2 per cent.

Here are the figures: Gold, 95 per cent. of \$20. \$19.00 Silver, 95 per cent. of 3c. 2.85 Copper, 2 per cent. of 2c. 2.00 Total values paid for \$23.85 Less freight and treatment 2.00 Net returns \$21.85

DOOR-TO-DOOR MAIL REGISTRATION. The United States is away ahead of this country in the scope of efficiency of its postal service. The next improvement that will be made to the service is the inauguration of a system of carrier or door-to-door registration of mail matter which, it is anticipated, will largely increase the value of this branch of the postal service to the Government and to the public. The new plan will be tried in all grades of postoffices throughout the country, and strenuous efforts will be made to insure its successful operation in the larger cities, which furnish the bulk of the business of the division of registration. The new system will add but little to the duties of letter carriers. A simple acknowledgment will be given to the sender of a letter for registration, and if the missive be defective in any way the carrier will have only

to hand the sender a prepared card of instructions and call for the letter on his next delivery. The placing of registered letters in the proper hands will require more time and the exercise of due judgment, but no trouble on this score is apprehended by the department officials.

PEAT FUEL FOR SMELTING

May Be Used for Reduction of Frotenac Ore. The directors of the New Equitable Mining and Developing Company have decided to take up only common stock in the corporation, and the purchasers of the eight per cent. guaranteed stock, which has just been placed on the market, will of course have their dividends secured before the dividend on the common stock, which is to be held by the directors, are paid. A movement is on foot to utilize the deposits of peat found extensively in Eastern Ontario in connection with the smelting of the ores controlled by the Equitable Company. It is said that the peat may be used in the reduction of the rich Frotenac ore at a cost of about one-third of the cost of the fuel now used. The public subscriptions for the one hundred and fifty thousand shares of guaranteed stock will close at the offices of the Trusts and Guarantee Company here on Friday.

Molson Bank Pays Well.

Profits of over 14 per cent. on the actual paid-up capital were reported at the annual meeting of the Molson Bank for the year ending with September last. Out of the dividend the shareholders receive dividends equal to 9 per cent. the remainder being used to add \$125,000 to the "reserves" and 10 per cent. to the "dividend" fund. The bank evidently benefited to the full from the increased trade activity that has marked the past year, and with the increase in the capital of half a million, which the meeting authorized, it should be in a position to profit still more in the future. With its present capital of \$2,000,000, the bank has a reserve of \$1,250,000, the Molson Bank in this respect among the strongest of Canadian financial institutions. The meeting was presided over by Mr. J. G. T. R., and the shareholders were assured of their property and its management by their representatives and officers.

RUNAWAY COLLISION.

Freight Cars Break from a Shunting Engine and Cause a Wreck at Parkdale. Thirteen freight cars broke away from a shunting engine in a yard at Toronto Junction shortly after 11 o'clock last night, and came down the main line of the G. T. R. at a terrific rate. Just below the North Parkdale station a special freight train, in charge of Conductor McCormack, was standing, and a serious collision took place. The engine and the train were completely demolished, the roof being knocked over the engine of the special. The cars next to the van were also smashed, and the contents, consisting of marble slabs and a consignment of cane, were hurled in all directions. Four other cars were derailed and thrown over on their sides directly on the next track. The engine and the van were also badly damaged. The smokestack and whistle were torn from their places and thrown a distance of about 50 feet. The trucks immediately in front were forced back to the rear wheels, but in spite of this it remained on the rails. Driver Endocox and Fireman Brown of the engine luckily saw the cars approaching and jumped from the cab. By the collision a fire started in the wreck, and the western sections had to be called out to extinguish the blaze. No material damage was done by the fire, but it was impossible last night to estimate the damage as a result of the collision. Engineer Ball was in charge of the shunting engine from which the cars broke away. Superintendent Morley of the G. T. R., and an auxiliary crew were at work this morning, clearing away the wreck.

Science of the Sea.

In a paper recently read at Edinburgh by Admiral Makroff of the Russian navy on "Double Currents in the Bosphorus and Elsewhere," the cause of these reverse currents was stated to be difference in salinity. The Black Sea, for example, has had the quantity of salt found in the water of the Mediterranean. The reverse current at Gibraltar and elsewhere were due to the fact that the water of the Black Sea is much heavier than that of the surface water all over the world. Russia should take Okotok Sea, White Sea, Kara Sea and the Finnish Gulf. The English and the Norwegian take the North Sea, the Baltic and Arctic Sea. Every nation should extract the information in regard to the temperature of ships' logbooks, put it in tables and send it to the corresponding nations. In this way we could get results much more accurate than the knowledge of the temperature of the surface water, and would be enabled to study many details which up to the present time are unknown.

Lighting His Rifles of Soldiers.

Unique in the history of infantry marches was the experience of the Second Battalion of the 1st Regiment on their march from Limerick to Thurles. Colonel Currie had ordered the march to be made at night on a moonless night, and the soldiers were to be equipped with their rifles. The march was made in the dark, and the men were to be equipped with their rifles. The march was made in the dark, and the men were to be equipped with their rifles.

Metereological Reform.

In his Presidential address before the Society for the Promotion of Engineering Education, Dr. Mendelhall advocated the adoption of the metric system of weights and measures. He said that there is a certain class of objectors who see something sacred in the yard and the pound because they are relics of antiquity, and something inherently wicked in the metre and the kilogramme because they originated with the French during the revolution at the close of the last century. He quoted the words of Charles Sumner in the Senate, uttered more than 30 years ago: "A system of weights and measures born of philosophy rather than chance is what we now seek. To this end old systems must be abandoned."

Theory of Lubricating Oils.

In a lecture on "The Relations of Physics to the Mechanic Arts," Prof. Abbe stated that Prof. Reynolds was the first to show lubrication is simply a case of the flow of a viscous fluid through a narrow channel. When the journal presses on the bearing, the intermediate space is probably 1/10,000th of an inch in thickness. This space being filled with oil constitutes a thin film which covers the rubbing and tearing of the metals into the sliding and rolling of liquid molecules, like myriads of tiny spheres, which are the result of the different molecules in molecular physics. Sir George Kirchhoff and Helmholtz have given a direct application to the lubricating action of oils.
