## BOUGHT ONE YET?

Not since the tail of the last comet swept across the sky have we had such a run on Overcoats as we have had so far this season. We have had to buy several extra webs from the mills and have our warehouse work overtime to get extra coats made to fill orders.

Just now we are in fine shape to supply you with one from new models, and as we have two more webs on the way we expect

to be able to meet all demands between this and Christmas. The Motor Coat and College Ulster are the rapid sellers, and our **4 In One** is the talk of the town. Priced from \$10.00 to \$35.00. We have a grand showing.

### COUNCIL UNANIMOUSLY VOTE FOR THE CONTRACT

It's For 1000 H.P. From Ontario Commission—Waterworks Bylaw Also Passed—Happenings.

HAMILTON, Nov. 29.—(Special.)—After a bitter fight extending over nearly three years, the city council this evening unanimously voted to make a contract with the Hydro-Electric Power Commission for 1000 horsepower. All year long, a majority of the council have been doing their best to get a contract with the Cataract Power Company, and to block a contract with the commission. Tonight, with the elections little more than a

month away, they made a general flop. There was not a division on the subject, and the bylaw providing for a contract with the commission was signed, sealed and enrolled without opposition. At the conclusion of the meeting, Ald. Morris proposed that the mayor should lead them in singing the doxology, because the bitter controversy had been ended for the time being. Ald. Hopkins and Wright pointed out that the question was not by any means settled by the contract for 1000 horsepower, and it would be continued at the elections for a council favorable to signing the whole contract. After a long debate, the waterworks bylaw was passed. It provides for a manufacturers' rate of 7-1-3 cents a thousand gallons, including landrises

He also protested against the acceptance of \$75,000 from Andrew Carnegie for a library, saying that while it was a good advertisement for Carnegie, it was a bad advertisement for Hamilton.  
B laws to raise \$200,000 for good roads, \$50,000 for police stations and \$26,000 for a registry office, were carried.  
Marv E. Havers, 336 North Bay-street, 64 years of age, died this evening. She leaves nine sons and three daughters.  
Chancellor Boyd opened the non-jury assizes this afternoon. C. J. Smith sued the Allith Manufacturing Company for \$500 royalties. The case was signed, sealed and enrolled without opposition. The Reasons for the Miniature Grand Piano.  
Many people prefer the Grand Piano to the upright, and find yardage Grand too large for their drawing-room. To meet this difficulty Heintzmann & Co., 115-117 West King-street, have made what they call a Miniature Grand on a smaller scale to suit the ordinary size drawing-room. The instrument has all the beauty of tone and delicate touch that go with the larger piano, and, besides, is a most handsome piece of furniture. It is worth while calling at the firm's warehouse to see it.

were committed a few days ago on the charge of stealing brass knobs from Tallman & Sons, and Williams, who testified against them, pleaded guilty. This morning Williams wanted to be tried by the magistrate, evidently expecting to be treated leniently for the evidence he gave, but the magistrate insisted upon sending him for trial with the other two. The trio are suspected of terrorizing the farmers in the neighborhood of Aldershot. Thomas Brown, 428 West Main-street, is said to be a model boy in every respect, except that he cannot resist the temptation of breaking windows. He was remanded for examination.

The following are among those who have announced themselves as candidates for the board of control: Ald. Cooper, J. J. W. Wright, Leese, Gardner, Allan, and Peregrine, and Frank Quinn, R. R. Morgan, James Miller, Col. A. H. Moore, W. M. Findlay and ex-Ald. Bailey.

**U. S. NAVY REFORMS**  
Secretary Meyer Will Put the Department on a Business Basis.

WASHINGTON, Nov. 29.—Secretary Meyer will inaugurate on Wednesday some of the most sweeping changes in the United States navy department since the establishment of the bureau system in 1842.  
Summarized the essential changes are:  
The selection of four responsible advisors on subjects within the four groups into which duties of the department fall, to be known as the "aide for material and personnel"; the aide for operations of the fleet and the aide for inspections.  
The grouping of the bureaus into two divisions, the "aide for personnel and the aide for operations of the fleet."  
The establishment of a comprehensive inspection system.  
The establishment of a modern and efficient cost-keeping system in the navy department at the navy yards.  
The separation of navy yards' work into two divisions and machinery.  
The abolishment of the board of construction and the bureau of equipment. Henceforth the officers who fight the ships are to have more influence in the navy department.

The Toronto World

FOUNDED 1851. A Morning Newspaper Published Every Day in the Year. WORLD BUILDING, TORONTO.

Readers of the World will confer a favor upon the publishers if they will send information to this office of any news stand or railway train where a Toronto paper should be on sale and where The World is not offered.

LITTLE EVA'S PET NEWSPAPER AND ITS ALLIES. For cold-blooded enmity to public rights by so-called public newspapers commend us to The Globe, The Mail, The Star on the Hocken tube proposition.

The Toronto Railway denied the city, the citizens, broke its agreements, refused the most reasonable requests, went to law on every occasion. The World advised three things that would bring the company to time: (1) The city to be empowered to expropriate; (2) The city to be empowered to buy stock in the company; (3) The city to build a system of tubes.

These newspapers stated all these propositions. So did the company. But it is now evident that a comprehensive system of local traction is in sight by the city having the courage to carry out any one of these three suggestions of The World. These are the same papers that have fought the Whitney power policy at every turn. And yet The Mail professes to be the official Conservative organ; The Globe to be burning up with Liberalism and righteousness and zeal for the people; The Star that it is the organ of the home of the little children of Santa Claus, not to mention Little Red Riding Hood and Little Eva.

TELL IT TO THE TUBE MEN. There is no doubt now of the popularity of the proposal for tube railways in Toronto, nor is there any doubt in the minds of tube contractors and tube engineers as to the feasibility and the financial certainty thereof.

HOW LIBERALISM IS DEGRADED. The Globe has another of its hypocritical articles: one devoted to singing "the work of a Liberal party"—the Liberal party of Great Britain and what that party there is doing.

WHAT THE TUBES WILL DO. One of the many benefits that the tubes will confer will be the saving of the city from having to alter the present surface lines in order to accommodate the radials. The radials, it will be remembered are of the standard gauge of 4 ft., 8 1/2 inches, while the city tracks are nearly three inches wider.

BLOOR STREET VIADUCT. It was a big thing for Toronto yesterday when the council resolved to submit the bylaw for the construction of the Bloor-street and Danforth-avenue viaduct to the people.

As Ald. Foster pointed out, it could have been built ten or twelve years ago for half the amount now estimated, \$750,000. The longer it is delayed the more it will cost, and as everyone admits its ultimate necessity, there is really no valid objection to its immediate construction.

FOR NORTH TORONTO. Editor World: I have studied the facts of North Toronto as a town and

The main expenditures on the exhibition and the firehalls and police stations will go for the direct benefit of the west end. It is many years since any important improvement has been undertaken for the east end, and the ratepayers will undoubtedly afford this neglected district a much needed relief, which will at the same time so greatly benefit the whole city by expanding remunerative tax values.

PROVINCIAL POLICY AND CREDIT. The inauguration of the new Conservative Club on Saturday, bearing the honored name of Premier Whitney, was the occasion for much party congratulation over the hydro-electric power policy. The World fully shares any benevolent interest that may be felt in the hydro-electric success and with the more satisfaction that it is not necessary to modify or retract any views it has expressed about it.

By accepting the statement as being made in the interests of the shareholders of the Peterson Lake Mining Co. shareholders, Judge Winchester acquitted John Langden yesterday of the charge of making a false declaration with regard to the output of the Peterson Lake mine.

THE TERMINAL OGRE. Montreal and Toronto have common cause for once in taking up arms against the monstrous "terminal company" bills which have been introduced in the Dominion House. The two bills are identical in their clauses and demands. Each of them wants everything in sight in their respective spheres. There can be no reasonable doubt that the same interests are behind the two bills.

## No Distinctive Feature To Cobalt Mining Securities

### Trading Generally Heavy, But Tendency Favors Steadiness—La Rose Exhibits More Buoyancy.

World Office,  
Monday Evening, Nov. 29.

The market for Cobalt mining securities continued without any distinctive feature to-day. Trading was, if anything, heavier than last week and stocks generally moved in a narrow range through the session.

Steadiness remains the predominant trend of the mining issues and while considerable activity prevails in the financial circles connected with this department of the exchange, the floating supply of stock is being well taken care of and the shares which are being realized on continue in the main to be well placed.

La Rose, which closed on Saturday at \$4.00, opened this morning nearly 30 points higher, and the advance was not at times sustained, the stock displayed a much better tone than has been apparent for some time. The shares sold as high as \$4.85 for a small lot and were strong throughout, closing at \$4.77.

Crown Reserve was dull, changing hands around \$4.75 and closing five points lower. This issue has now settled into a dull routine of trading and is apparently in poor demand.

Of the lower priced Cobalts, Beaver, Little Nipissing and Silver Leaf remained steady with last week; Otissee fell fractionally higher; Rochester was quieter, but firm, the no case did the shares equal the high prices of Saturday; Chambers-Ferland opened easy, but sold up two points during the day and closed firm at \$3.84. The other securities which traded in were comparatively unchanged.

The market was moderately firm throughout the whole list. The strong advance of La Rose augurs well for the future of that issue and the Cobalts as a whole are likely to be sympathetically influenced by any buoyancy in the London market which has been characterized during the past few days. It is more than evident that there is gold sentiment over the northern part of Ontario.

## NEW GOLD FINDS

### Boom Over Porcupine Gold Field Spreads to Larder Lake.

The recent gold boom that has swept over Porcupine has also spread to Larder Lake, and this last week hundreds went out into the country to again search over the claims that were once prospected and left, says The Timiskaming Herald. There are several mines now taking out gold at Larder and the report that new finds are being made caused the recent stampede. It is more than evident that there is gold sentiment over the northern part of Ontario.

## WILL ONTARIO GOLDFIELDS OUTRIVAL COBALT SILVER?

### Years of Diligent Search and Systematic Prospecting Reveal Remarkable Gold Deposits.

In the history of mining and of mineral production, the premier place is at once conceded to Cobalt. The silver values uncovered in this district within the past few years—in fact, it may be said, within the past few months—have not only amazed the ordinary individual, but, as well, have played havoc with the generally accepted theories heretofore advanced by expert mineralogists and geologists. To such an extent is the latter statement absolutely true, that even to-day some of the most eminent and experienced mineralogists and mining critics are engaged, side by side with the hitherto obscure and inexperienced prospector in harmonious effort to seek out the various hiding places of the precious metal and to determine approximately, of course, the silver values, not only of the veins already in sight, but also of the silver linings still uncovered, yet known to exist without doubt in the marvelous Cobalt district.

It may be truthfully said that the revelations of Cobalt mining region as a producing camp have startled the mining world. This extensive and immensely rich mineral area has been practically in the hands of novices ever since the "day" of La Rose detected what the "day" generally accepted as the hitherto known famous as a silver mine. Still, to this day, the

The total shipments for 1909 were 24,460 tons, valued at \$10,000,000. The total shipments for the year 1907 were 14,900 tons, valued at \$6,000,000. In 1908 the camp produced 219 tons, valued at \$1,800,000. In 1909, 214 tons, valued at \$1,413,196, in 1908, 188 tons, valued at \$1,310,371.

## Surely a Remarkable Letter

The World has been handed a remarkable letter. The letter was addressed to Mr. J. H. Waldman, President of the Waldman Mine. It was Mr. Waldman who handed the letter to The World.

Mr. Waldman, as all who know him know, has done more for the true development of Cobalt within the short time he has been interested, than almost anyone else. He is naturally indignant that such a letter has been sent to him. He has nothing to conceal. His work on his Cobalt properties is well known, and can be seen by all. It is an open book to everybody.

He asks The World to publish this letter, and The World gladly does so. He hopes that if there are any other mine owners who have received similar letters his example in this case may be emulated.

Mr. Waldman is a fighter, and throws down the gauntlet to any and every ready-letter-writer. Here is that remarkable letter:

SMITH'S REPORT SERVICE  
LONDON NEW YORK TORONTO  
NEW YORK TEMPORARY ADDRESS 35 BROADWAY  
Nov. 23, 1909.

Mr. J. H. Waldman,  
The Waldman Exploration & Development Co.,  
Montreal, Canada.

Dear Sir:

We learn with regret that our Mr. Smith was unable to do business with you when in Montreal.

We hear rumors that the Waldman vein has been a failure so far at depth and that the publicity given your property is part of a campaign to enhance the value of the unsold mining claims of the Gillies Limit.

We had hoped to have been in the position through a personal visit to your property to refute these statements which if allowed to be published will detract greatly from the values of your holdings.

Before accepting your decision as final, we beg to suggest that a special illustrated article in the Twenty-five Cent December Number of the Cobalt News Bureau, written by our Mr. Smith, after a personal inspection of the Waldman Mine, would give widespread publicity to the true facts in Canada and the United States.

This would occupy three pages including the front cover page which would carry illustrations of the Waldman Mine.

Our terms for the three pages would be \$500.00 in advance, or \$1,000.00 including publicity in Buck's Weekly Cobalt Letter and the twenty-two associated publications in the United States and Canada as per the original offer made through Mr. Buck. This offer gives one additional page for reading matter in the Cobalt News Bureau.

We hope to hear from you in reply during the next few days as Mr. Smith leaves for Cobalt early next week.

Yours very truly,  
SMITH'S REPORT SERVICE.  
BY J. H. Waldman

The above is a photographic fac-simile of the letter to Mr. Waldman.

are residents in the Cobalt camp, many of the old doubting school, who have not yet awakened to the fact that they are at this moment dwelling in the midst—the very centre—of the great silver deposits the world has ever known, nor do they contemplate for an instant the importance of the demonstrated fact that the Cobalt camp still retains beneath the surface innumerable "silver miracles"—for, indeed, the showings thus far are viewed by some in the light of a "miracle."

And thus it is that no miner or mineralogist can point to a single undeveloped claim and assert that it is "no good."

The world at large, especially the mining world, stood aghast as from day to day and week to week came to their notice the romantic story of silver finds in Cobalt. And these reports are now of even more frequent occurrence since Cobalt has developed into a throbbing and business-like mining camp under the careful management of practical mining men who have gradually rescued the great silver-producing area from the well-meaning but incapable novice. What future years of practical mining in the Cobalt camp will reveal, no man can tell, but sufficient can be said to warrant the prediction that remarkable values are yet to be found.

As to the value of this great silver belt and the value of its interest and value, while at the same time to vary with the richness of the Northland in precious metals, the hitherto ignored and almost thrust aside into the limelight of the mining world, with every eye on end, with a gold nugget on every point, each shedding its yellow radiance along the shores of the placid river the waters of which wash the clinging earth from the filthy ditches, but as well in their shining saltness, boldly announces that Cobalt possesses not only the greatest silver belt yet discovered, but that its next-door neighbor, the unknown Porcupine, possesses along its rugged shores and wooded interior the greatest of all gold fields.

And where is Porcupine? You will ask. What does it amount to? What will it ever amount to?

Easily answered, the perhaps difficult to realize and understand. Porcupine is less than a day's journey from Cobalt. During the summer season it

## LOW PRICED STOCKS

La Rose made a good recovery yesterday, as predicted by us, and we still think that the shares are due to sell higher.

Several of the low-priced stocks offer good buying opportunities at present. After the irregularity a general advance will follow, and some profitable turns can be had. Buy now, however, and do not wait until the upward movement is well in force.

We will tell you what we consider the surest buys if you ask us.

### Heavy Liquidation Forced In New York Securities

**A Steady Drive on Wall Street From Opening Till Close—Average Business at Toronto Market.**

World Office, Monday Evening, Nov. 29. With about the average amount of trading local securities barely held their own to-day.

Another dip in New York was an adverse influence, but this did not bring any special pressure at the Toronto market and offerings were generally well taken care of at minor declines. The firm stocks were Twin City and Toronto Rail, but the former was the issue in most enquiry.

With the Twin City suit now before the supreme court some buying of the company's stock is being made on the grounds that the winning of the suit means a six per cent. dividend for the stock and a consequent higher price. The stock of the company is being bought on the grounds that the winning of the suit means a six per cent. dividend for the stock and a consequent higher price.

Mexican Light and Power sold at 71 1/4, and closed offered at 71 1/2, with the 71 support still extant.

Mining issues were steady to firm, with a further recovery in the price of the La Rose.

A feeling of apathy marked the late dealings and the market will be under the effect of Wall-street until the present unsettled state of that market has passed off.

Wall Street Pointers. London expects easier money early in December.

One million hundred thousand dollars in gold will be exported this week.

R. I. earnings for first quarter best on record for that period.

Car Foundry reports all plants running full, but increase in common dividend not expected.

The Bank of Montreal is shipping \$500,000 in gold to Canada.

London: Economist says there is little danger of a government loan, and less concern is being given to apprehended financial difficulties.

On the Paris Bourse negotiations for consolidation of American Copper interests regarded as well founded.

Equipment market is being bought when weak. Buying orders are still noted in St. Paul around 155. Cons. Gas should be taken when weak. Rock Island issues should do better. We do not like New York Central—Financial Bulletin.

The present outlook is not entirely an encouraging one, considering the high level of security values and the indications point to a hesitating market for some time to come. Its chief support still comes from a few enormously wealthy holders who forced the market when money was cheap to an abnormally high level. This group of men have already tried to sell their shares, and it remains to be seen how long they will be able to successfully resist natural tendencies which favor a lower and more stable range of values—Henry Clews.

Were it not that increases are in strong hands, a more pronounced decline than has yet occurred would seem probable. With so important a matter as the standard Oil decision overhanging the market indifferently, there seems to be an encouragement for positive advance in prices. Under the circumstances we shall probably have alternate recoveries and recessions, but for the present

**STOCKS LESS DIFFICULT TO BUY.**

World Office Monday Evening, Nov. 29.

Dull but steady is all that can be said of the Toronto stock market at present. About the usual amount of business was transacted to-day, and stocks are less difficult to buy than they were. Excitement over the Coal-Steel merger has died down, and, with it, speculation in the two stocks. Good support is still given to Dominion Steel, but traders are not disposed to buy the shares at what they consider high prices. Twin City is being bought on the belief that the company will win its suit, and which is expected to be reached shortly. Nova Scotia Steel is subject to considerable profit-taking, but the price is well maintained.

**A BANK ROBBER AT 13**

St. Louis Police Capture Youngster Who Was Bent on Raid.

S. LOUIS, Nov. 29.—Tom Gallagher, 13 years old, captured after a wagonload of policemen had surrounded the Legayette Bank, Broadway and Park-avenue, to-day, confessed that he, with another boy, who was acting as lookout, fled when the patrol wagon appeared. Gallagher, who had ascended the fire-escape, Number 13, Queen Street East, in the City of Toronto, on Friday, the third day of December, 1909, at the hour of 3 a.m., for the following purpose:

(1) To consider the position of the company generally.

(2) To arrange for the election of a new board of directors for the said company, or to have the vacancy on said board of directors filled by the death of Philip E. Durst, filed in the effort to get into the bank's quarters, was captured as he came down the fire escape.

The other boy put me up to it," said the young prisoner. "We were going past the bank to-day and he pointed to a pile of money we could see thru the window, and said it would be easy to get that. Then he planned how and I went to get it.

"He made me go ahead of him, and said he would whistle if he saw any body coming. But he never did. It was just ducked."

**WHOLESALE I. C. R. DISMISSALS**

Cancellation Board Will Weigh the Evidence and Make a Decision.

The I. C. R. cancellation board will meet in Toronto in a few days, to arrive at a finding in regard to the complaints by several hundred former employees of wrongful dismissal. Judge Barron, Stratford, is chairman.

The board has not yet considered the evidence, and the meeting here will be for that purpose, and the adoption of a judgment.

SPRUCCLEDALE, Nov. 29.—(Special)—The body of John Middleton, who disappeared suddenly on the evening of Nov. 15, was found in a field belonging to Chas. Brown, three miles east of Spruceville, by Wall Thompson. It is believed that Middleton lost his way en route to Emsdale on foot, perishing in the severe cold on that night. The remains were brought to Spruceville, and the funeral will be held Tuesday afternoon.

Fifty Dollars Fine For Drunk.

The price of a plain drunk was soaring in police court yesterday morning when the magistrate pinned an assessment of \$50 and costs on Frederick B. Brophy to preclude him from avoiding the alternative of six months imprisonment. Fred has been drinking too much and too frequently and has disregarded warnings, wherefore he is now receiving the Denison special cure which, the harsh, is known to be effective.

Was It Only a Dream?

THE other night a boy woke up and thought somebody was in the room. It was so dark that he couldn't tell for sure, but he felt sure there was somebody. He listened for a long while, but heard not a sound save the ticking of the clock in the hall downstairs, and once in a while the crackle of the kitchen stove, or the fall of a cinder into the ash pan. - So by and by he went to sleep again. In the morning he remembered and looked all over the room from the floor to the ceiling. But in the daylight he couldn't see it as plainly as he could in the dark. His father said he had been dreaming. But was he? Take a look at this picture and see for yourself.
