The complainant swore that the defendant was backing his horse and team into his yard, and as the horse came back the head of the horse struck her without much difficulty, he beat the horse over the head and breast. She remonstrated with him from her window about beating the horse, whereupon she alleged that he, having gotten a strap from his barn, jumped on some bags of coal under the window and struck her with it.

DECLINED SUMMER VISITS TO STUDY MANUAL TRAINING

But Miss Lily A. Byleya of West End, One of St. John's Entertaining School Teachers, is now Glad She Made the Sacrifice.

The enthusiasm evidenced by those who up to the present have discussed manual training with the Times is a strong indication that its introduction here will be welcomed by the large majority of citizens who have at heart the welfare and advancement of the coming generation. There are of course differences of opinion with reference to the present curriculum. Some feel that such subjects as Latin, French, English or Algebra should be withdrawn as being of no practical value to those who intend entering the commercial circle.

Several have expressed the opinion that it would be much better to give them time rather than withhold them all together; whilst others again would withdraw nothing whatever from the general course, arguing that it is by no means manual training has been of very material benefit to her.

The Times New Reporter

ONE OF THE IMMORTALS. When the city engineer entered the office of the mayor's clerk this morning he was surprised to observe that it was gayly decorated, and to be met by his old friend with a hand-shake and congratulations that quite overwhelmed him.

"What's all this about?" he inquired. "Have we got a new story?" "You old rogue!" rejoined the mayor's clerk, poking him in the ribs. "And you never told me a word about it." "About what?" asked the city engineer. "I suppose," went on the mayor's clerk, "you'll know it after me or his workshop."

The Times New Reporter

"The city engineer said he had the plans prepared for one birth." "I should think," said the mayor's clerk, with another old joke, "that you might have made it twice." "The city engineer sank into a chair and mopped his brow."

"At your age, too," went on the mayor's clerk, "Prof. Oeder must be told about it at once." "These the door opened, and the mayor, the common clerk, and a long train of officials entered and formed the circle of honor and fellowship around the city engineer, while the mayor's clerk placed a wreath of evergreen upon his brow. He will not, however, be granted the freedom of the city."

THE PROBLEM OF IMMIGRATION

To Be Exhaustively Discussed By the National Civic Federation.

It was easy to see early in the fiscal year which closed last month that the immigration record would be a notable one. As a matter of fact the fact of the matter is that the immigration record for the first nine months of the fiscal year has been a record. The immigration for the first nine months of the fiscal year has been a record. The immigration for the first nine months of the fiscal year has been a record.

THEY FAVOR A PARADE

It would seem that the stand taken by the executive committee of the Trades and Labor Council as against a parade on Labor day, is not shared by some at least of the members of organized labor. Last night, in Sutherland's hall, there was a meeting of union members in favor of celebrating the day by a monster labor parade.

NO TIME FOR DELAY

The board of works did not wait to allow itself to be put to sleep by the chairman yesterday afternoon when the question of the new wharves came up. Ald. Christie was opposed to the idea of building in readiness to go on with the work when the board decided to have the plans examined and action taken to the end that the city may be able promptly to go on with its share of the work.

WATERWORKS TANGLE

A case by any other name, we are told, would smell as sweet. It may also be assumed that waterworks extras by another name would cost as much. The aldermen do not like the word "extras." It appears to have a harsh sound, when uttered in connection with those waterworks contracts. But gradually the citizens are becoming aware of the fact that the extension of the water-works promises to cost more than they were at the outset given to understand. Whether it be by any other name, will not at all affect the main fact that the bill is expected to be much larger than was stated when the contracts were awarded.

between some form of actual compulsory service (a hateful but possibly an inevitable measure) and a great development of the rifle club movement, it is a very serious matter to consider what are the easiest and most practical steps to bring the latter into existence.

At present, in hundreds of places, this money has been found by local effort, and the club has been started successfully. In many others it has languished after the first novelty was past.

If the ranges are, as I have tried to show, both efficient and cheap, the next point is to determine how they could be best organized as a public institution all over the country.

What would be needed then to attain this great end? Simply a law by which each parish council must establish a rifle club, with power to levy the money for that end.

Readers of this paper for some time past have been charmed with the Sherlock Holmes stories which are one of its daily features. For that reason if for no other they will be equally interested in a recent letter by the distinguished author on the subject of Rifle Shooting as a National Pursuit.

Magistrate Denison, of Toronto, made some soldiers take off their helmets while in court. The shock to military etiquette is said to have been quite dreadful.

The water board this afternoon will no doubt deal promptly in the matter of clearing up the area to be flooded at the Robertson dam.

SUPREME COURT OF I. O. F.

Much Business Done at the Session in Atlantic City—A Plan to Settle the West With Foresters.

Atlantic City, N. J., July 31.—Previous to the business session of the Independent Order of Foresters, which convened here today, a reception was tendered Dr. Oronhyatskah and the members of the supreme council at the Hotel Bedford, where they have headquarters. In his address to the Foresters today, in speaking of the life insurance rate, Dr. Oronhyatskah said:

This great agricultural empire, I propose that we shall take hold of every sober, industrious, honest young man who is a member of our order, or is willing to become one, and place him on one of these farms, thereby giving him such opportunities to enable him to become the possessor of a home and a self-supporting member of the community.

Our premium rate has given us much comment, where we were met with the statement that the law of the state required of all orders seeking license to do business in Massachusetts that they should have rates equal to that of the national fraternal congress table of rates, with the uniform bill of the national fraternal congress would be adopted in many of the states of the United States, I at that time, came to the conclusion that it was better that we should at the present time harmonize our rates with the requirements of the national fraternal congress table of mortality, at four per cent, because it would be some ere long a legal necessity in many of our jurisdictions.

He also advised that a movement be started toward sending young men, members of the Foresters order, to the richly cultivated lands of the northern state and in Canada, saying: "In our great Canadian northwest there are millions of acres rich with the accumulated fertility of the centuries awaiting settlement, where any young or middle-aged man can easily in a few years make a competence and secure a comfortable home. This year it is estimated that from the Canadian northwest alone there will be harvested 100,000,000 bushels of wheat. In a few years this will be doubled and quadrupled. Lands now can be purchased at a small cost. They are rapidly rising in value, and those who are able to procure and take possession of them now have their future assured. The opportunities thus offered are being embraced today by hundreds of thousands of people from the different countries of the world, and I am anxious that a large number of Foresters should reap a share of the prosperity which must flow from the development of

WEALTH.

Robust Health More Valuable Than a Gold Mine.

Everyone desires to be wealthy. What is wealth? A hoard of gold or bank stocks? No, not by any means. A Croesus, facing death, would freely give all for health. A healthy, strong man or woman is wealthy. Analyze this and see. To be healthy, all the functions of the body must work well. The bowels must move daily, the kidneys must act regularly and the skin must do its work.

The Prince of Wales, a lad of fifteen, was sorely pressed in the front of the battle, and an urgent request for reinforcements was sent to the King. "No," said Edward, "let the boy win his spurs; his shall be the glory of the day." The French were defeated—with a loss of eleven princes, twelve hundred knights, and thirty thousand soldiers.

REV. DR. CARMAN IS IN ST. JOHN

(Continued from Page 1.)

The western Methodist church. The work amongst the Indians along the Red River was greatly blessed.

The Church of England missionaries are very successful near the north of Lake of the Woods. Here the Indians have been very savage and more than one missionary has lost his life in dealing with them.

They are now, however, becoming more civilized. One great difficulty which the missionary has to deal with is the way in which the Indians move about.

They start for a place where a large settlement of Indians is located, by the time he gets there he often finds that they have moved.

The Roman Catholic church has been very successful with the Indians, as their method of worship is, in a way, more attractive than the Methodist, and the Catholic churches, where they are taught the bible.

One missionary asked Prof. Riddell once if he thought it would not be better to make the service of the Methodist denomination more attractive to the Indians, and thus win them over, but the Professor said that it mattered very little which denomination won the souls of the Indians, as all were working for the one God.

There is very little rivalry amongst the denominations in the west, and this is one thing to be very thankful for. There are Galicians, Italians, Catholics, Presbyterians, Baptists, Methodists, and Roman Catholics, and if there was any rivalry the missionaries would not be so successful as they are.

Professor Riddell spoke enthusiastically of the Alberta College. It is a fine educational institution, where from ten to fifteen young men are always studying for the missionary field. They study through the week, and on Sunday go to different places and preach. One young student has to go sixty miles away each Sunday to preach, and be back in time for study Monday morning.

The speaker said he thought the Methodist missionaries in the Northwest should get better salaries. "Presbyterians are doing the best missionary work in the West," he said, "and they are not getting more money and are able to buy literature and other things which are necessary to properly preach among the heathen. Professor Riddell's address was much enjoyed by all.

The meeting adjourned at twelve o'clock.

WILL BE LIVELY

Interesting Discussion Promised at the Water Board This Afternoon.

The meeting of the water and sewerage board, which is held this afternoon, will probably be an animated one, as there are many questions to be brought up that will doubtless create considerable discussion.

Mayor White has prepared a very lengthy report in which he sets forth the needs of the city for this year and dealing with the progress of the work as far as it has gone.

The contractor, Messrs. McArthur & McEwen, will, in all probability be present, and will be heard in reference to their claims that the work done to date is not in accordance with the specifications, they having found, so they claim, rock where it was stated that gravel would be found.

It is said that in McArthur & McEwen's portion of the work it has been found that for half a mile, between the Murray lake and Kilderville brook, it is solid rock, which will have to be blasted. In this portion it was stated on the plans to be excavated to a depth of 20 feet.

Some of the aldermen have stated that they are not altogether pleased with Engineer Barbour's work, and state that they should have given more attention to the suggestions offered by Supt. Murdoch. It is altogether likely that the question of clearing away the rubbish from the Robertson dam will also be considered.

Says a health writer: "Sleepless persons should count the sun." Now, had he said "laughter," thousands would embrace the remedy, instead of simply laughing at it.

RACES WERE A JASCO

Sydney Regatta Not a Success

Coates Won Singles.

SYDNEY, N. S. W., Aug. 2.—(Special)—Through mismanagement on the part of the regatta committee of the Sydney regatta, the single shell and four-oared races, which were rowed this morning, while they might have pleased some, were disgusting to others.

In the first place, two French warships of the Canadian fleet had crossed the course, and then the course itself was strewn with wreckage that drifted on shore with a high tide last evening.

The judges' boat made one of the starting points and during the race it was found to be unable and to have drifted. The single was first rowed. There were three competitors: Coates and Ross, St. John, and Duggan and Hallifax. The starter's pistol missed by two seconds, resulting in a bad start, Ross being fully a length behind in clearing the line.

Coates and Ross were more or less tortoise owing to the warships and sail boats that perturbed in crowding in upon them.
