UNLOCK BRINGS OUT  
NICE SURPLUS  
FOR THE YEAR.

General Government Management  
Increases the Postal  
Service, and More Than  
Halves Expenses—It Had  
Usually a Half-a-Million  
Deficit—St. John Figures.

St. John, Nov. 3.—(Special)—The annual report of the postmaster-general for the year ending June 30 last was issued today. It shows that the department is not only making a profit, but that it has increased the postal service, and more than halved its expenses. The deficit of the year ending June 30 last was \$1,000,000. The postmaster-general reduced the postal rates from three to two cents, and the imperial postage from five to four cents. The department also reduced the cost of printing, and the cost of the paper used in the printing of the newspapers. The total revenue for the year was \$15,540,000, and the total expenses were \$14,540,000. The profit for the year was \$1,000,000.

MORE COAL MINED YESTERDAY THAN  
ON ANY DAY SINCE WORK WAS RESUMED.

Commissioners Visit Collieries Where Men Are Still on Strike—They Get a Scare When 300 Feet Below the Surface—Copies of Miners' Case Sent to the Operators.

Wilkesbarre, Nov. 3.—All of the mines in the Wyoming and Lackawanna regions are working with an increased force today and the output will be the largest since mining was resumed. A great many of the mines which were operated with a limited force last week now have their full quota.

President Mitchell has completed his task of collecting data for presentation to the anthracite commission.

Hazleton, Pa., Nov. 2.—The strike commission spent the day in the Lehigh Valley region, visiting one mine and several mining villages.

A copy of President Mitchell's statement of the miners' case was sent today by the commission to all the coal companies involved in the controversy. The operators will make a reply in three or four days.

MURDERER OF NOVA  
SCOTIA GIRL A  
SOCIETY MAN.

Many Circumstances Point to Him as Slayer of Clara Morton, and That He is the Notorious "Jack the Slugger"—To Be Arrested Today.

Boston, Nov. 3.—State Officer Dunham will tomorrow arrest a man whom he believes will be able to prove he is "Jack the Slugger," slayer of Clara Morton, murdered in the McLean Asylum grounds, Waverley, Saturday night. The man is a wealthy Boston manufacturer, a club man, and a member of the highest social standing in Boston for years.

The suspect has been an inmate of two insane asylums. His ailment has been classed as melancholia, but he has been violent at times and has been known to attack women. He is said to have posed as a woman later.

The police declare they are able to prove that he was seen and recognized by five persons in and about the McLean grounds Saturday night. Furthermore, he was seen near where the murdered girl's abating bag was found.

It is also declared that he has been identified as the assailant in another case.

Sensation in Social Circles.

A week ago this man was in Waverley and frightened a young woman there. A young man caught him and narrowly escaped giving him a thrashing. The young man recognized him and had a long talk with the police. No greater sensation could happen in social circles than the arrest of this man. He poses as a social leader and his arrest will stir society to its foundations. The police would not dare to make an arrest unless they were absolutely sure of their ground and so they claim to be.

The suspect has been recognized as a man seen in Somersetshire the night Miss McPhee was murdered. He has been seen in other places. When the suspicions were first aroused, the police hesitated to believe them true until by the mass of corroborative evidence brought up, they were forced to admit that ground existed for an arrest.

He was seen near the square before Miss Morton left and had a long talk with the police. When the suspicions were first aroused, the police hesitated to believe them true until by the mass of corroborative evidence brought up, they were forced to admit that ground existed for an arrest.

There are some things yet to be cleared up, but the police expect their solution. The weapon used was an iron bar, undoubtedly. Near the station was a sort of scrap heap, where quite a number of pieces of railway iron could be picked up, and this is where the weapon may have come from.

Contrary to his usual rule, the slagger did not leave his weapon behind him, and (Continued on page 2, third column.)

At Jeddo, John Markle, the independent operator, escorted the commissioners to the mining village of Oakdale. Mr. Markle showed them the club house which he maintains there for the benefit of the men. On the run into Hazleton where the breaker of No. 40 shaft was inspected, Messrs. Markle, Duffy and Gallagher had a spirited discussion over the differences existing at the Markle mines. None of the men at the Markle colliery have returned to work for the same reasons as those which are keeping the men out of the Cox mines. Mr. Markle told them he was running the Markle Company and would maintain discipline.

The afternoon was spent in the Audenford mine. The commissioners were lowered into workings 300 feet below through an eleven hundred foot slope. One of the new "typical features" they saw was a vein of coal with a very steep pitch which was difficult to mine. While they were inspecting this a blast was fired in a nearby chamber, and the lights carried by those who remained in the gangways below were extinguished by the rush of

men returning to work as individuals and not in a body.

At Hazleton, Pa., Nov. 2.—The strike commission spent the day in the Lehigh Valley region, visiting one mine and several mining villages.

A TRECHANT LETTER ON THE BOY PROBLEM, FROM A CLERGYMAN.

The following outspoken letter, on Home Influence and the Boy Question, is written by a prominent New Brunswick clergyman who formerly preached in this city, and who is well known here.—Ed

Are men brave enough and honest enough to grapple with the question from its true and proper standpoint? It is my own opinion that they are not. And I think it is just here that the clergy show their weakness (I will not say lack of faithfulness) in dealing with this tremendous evil.

There is often far more attention given to the breeding of horses than to the training of boys. Let the parents remember that there is nothing in the boy, no trait or quality, that he has not inherited from one or both of themselves.

Let him also consider the gulf, deep and almost impassable, that separates these men from the respectable church-member and earnest and intelligent Sabbath school worker, let him think for an hour of the homes these men make as schools for their boys and girls to be trained in and in which they receive their earliest impressions, and he will see how difficult the task is which at least one-third of the young plants of your city spring and the soil in which they grow is entirely calculated to produce just such results as those that these respectable men today so properly deplore.

His life, home, habits, general appearance, and the nature of his death were a straight line, a chain without a missing link. Such a man should never have been allowed to live such a life and inhabit such a den as his in one of the largest cities of these provinces. It has a desperately bad effect on boys and it placed temptation in their way. And his murder was like the chin end of a wedge.

But, sir, the home has the most powerful influence on the youthful mind of any that can be brought to bear. Church, Sabbath-school, day-school, mission-hall, police vigilance, are as nothing beside it. The home is the nursery of the nation.

View of intelligence and close observation who have visited England and Scotland, especially men from the continent of Europe have spoken with amazement and admiration of the home-life of the people. Some have made the subject, as Edmund Demoline did, the basis of profound study, and in published volumes have called the attention of their countrymen to the fact as the secret of "Anglo-Saxon superiority." Indeed the fact is so obvious to men too obvious to be disguised.

Now, sir, I enter a plea on behalf of the boys. It is easy to call them "young rascals," as is the custom almost everywhere. But many of these have not been so much born as shipwrecked into the world. With highly imitative natures they have been led astray from the start. The boy needs "reforming," but not half so much so as the home from whence he enters on life.

The oversight of the boy should be parental oversight. All other is unnatural and strained. Go then to the home. Let the parents be careful not to depreciate religious effort or religious character in the presence of their children. Carelessness in this matter will ruin the most respectable home and neutralize all the work of religious teachers.

Therefore in all their efforts, public and pastoral, the ministers should accentuate the importance of home influence. And I believe in this more than in anything else, the minister is remiss today.

OSERVER.

SIR WILFRID LAURIER TO SPEAK IN BOSTON; SUBJECT, RECIPROCITY.

Accepts Invitation to Dinner of Boston Merchants' Association.

Also Agrees to Talk on "Reciprocity With Canada"—Secretary of Association Sent to Ottawa to Present Invitation—Others of the Cabinet May Attend, Too.

Boston, Nov. 1.—Sir Wilfrid Laurier, the Canadian premier, has consented to speak at the coming dinner of the Boston Merchants' Association in Boston. The association secretary, E. H. Walcott, today returned from Ottawa, where he went to propose the matter to Sir Wilfrid Laurier.

Mr. Walcott not only secured the consent of the Canadian government to be present at the dinner, but also to speak directly on the subject "Reciprocity with Canada," which is to be the topic for discussion.

The dinner will be held about the middle of December. At the last directors' meeting the association decided to take up the subject of reciprocity as the subject for discussion at its annual dinner. In view of the present live interest in Canadian reciprocity among Boston business men, an interest brought to a head by the congressional campaign and the action of the Republican state convention in regard to a reciprocity movement—it was felt that a discussion would be timely.

It was decided to send Secretary Walcott to Ottawa, to present an invitation personally to Sir Wilfrid Laurier. Who the other speakers will be is not known, but it is assumed that other Canadian government leaders would consent to accompany Sir Wilfrid to the association's guests, Sir Richard Cartwright, or Hon. W. S. Fielding, or perhaps both, are mentioned as likely to come.

MOTHER KILLED HER BOY, MISTAKING HIM FOR THIEF.

DEALING WITH THE DOUKHOBORS. American Paper Has Dispatched That Force Must Be Used With Them.

St. Paul, Minn., Oct. 31.—A special to the Dispatch from Yorktown (N. W. T.) says: "I think it is beyond power or reason to parley with the Doukhobors any longer. Education, hunger and sleeplessness have rendered their condition such that they can no longer be reasoned with. I have worked night and day with the misguided people and have failed to give the question of their condition the most serious consideration. It is impossible to predict the outcome. It seems to me that force is now necessary. If disaster is to be prevented the frenzied Russians must at once be induced to abandon their mad march. I can suggest no method to bring this about."

NOVA SCOTIA BOY CUTS THROAT TO END PAIN FROM GUNSHOT WOUND

His Dog Brings Aid Too Late to Master in the Woods.

Barrington, N. S., Oct. 30.—Word reached here today of a shocking accident and tragedy which occurred at Stoney Island yesterday morning. James Nickerson, a young man of about 19, left his home on the island accompanied by his dog, after breakfast, for some beach bird shooting.

Some of the family became alarmed and followed the dog, which led them a long distance from the house to his master's body. The young man had been badly wounded in the side by the accidental discharge of his gun, but had managed to take his coat off. Then, apparently, seeing the impossibility of reaching home or of lingering in agony until help came, he had taken his knife and cut his throat to close the struggle the sooner. The knife, with blood upon it from where he had severed his jugular vein, was found near the body. Deceased was one of three brothers and his parents are living.

ACCIDENTS ON TWO NOVA SCOTIA RAILWAY LINES; AN INVESTIGATION.

Obstructions in Two Places on the Tracks of the Midland Road.

Truro, Nov. 1.—(Special)—A serious accident occurred on the Midland railway today. A flyer coming into Truro ran into two crossing gates that had been piled on the track by some unknown parties.

When the train stopped two more gates were found piled a short distance from the one the train struck. Manager Harris was told by telegraph today that the railway company have suspicion the four gates were piled on the rails by some vicious party and a reward of \$50 will be offered for conviction of the guilty parties.

DOWN IN MINE'S DEPTHS COMMISSIONERS GROPE.

Practical Inquiry Into Conditions in Strike Region Continues.

Scranton, Pa., Oct. 31.—The first important action by the anthracite coal strike commission was taken today, which was announced by Carroll D. Wright, the recorder of the commission, that if any award affecting the prevailing rate of wages shall be made, it shall be effective from November 1. It was fully expected that this question would come up before the arbitrators, but the action of the commissioners shuts off any possible controversy that either side may have desired to raise.

PACIFIC CABLE COMPLETED; ROUND THE WORLD GO CONGRATULATIONS.

Some Hopeful Expressions in First "Wires"—Sir Sandford Fleming Sounds a Note of Warning—Death of Simon James Dawson, Former M. P.

Vancouver, B. C., Oct. 31.—The completion of the cable line between Vancouver and Brisbane was accomplished last night, although the first message did not get through until this morning, when the announcement was made that one dream of the imperialists was a reality.

The cable is still in the hands of the contractors and it will not be open for business for about three weeks. During that time it will undergo an elaborate system of tests, in order that the officials may be satisfied that it is in thorough working order before being taken over from the contractors.

Semi-Weekly Telegraph

ST. JOHN, N. B., NOVEMBER 5, 1902.

THE PERSONALTY TAX.

In its investigation of the present city assessment act, the committee of the common council empowered to deal with the question will probably give some consideration to the resolutions of the Board of Trade recommending some change in the method of taxation of personal property in the city.

The entire valuation of St. John's personal property under the 1902 assessment is \$8,065,930, from which a revenue of \$125,015.25 is to be derived.

Unfortunately The Telegraph is not in possession of the exact figures showing the valuations of the different classes of personal property, which would be valuable as a basis for discussion.

The assessed value of all St. John's manufacturing plants (considering this term merely in its narrower sense), we have ascertained to be \$1,900,000. The valuation of the merchants' stocks and the plants of machine shops, printing establishments, etc., not covered by the foregoing head would be probably at least twice as much more.

If it were proposed to abolish the tax on manufacturing plants this would mean a raise in the rate of 12 cents or from \$1.55 to \$1.67 on each \$100 assessed.

It is interesting to note that the present system of civic taxation divides the load most inequally and most unfairly.

THE ALL-RED LINE.

There is another date which should prove memorable in our history, that of the completion of the Pacific cable—the All-Red line to Australia.

It has been written of the Anglo-Saxon that he was a man, blue of eye and yellow of hair, who went to the four corners of the earth with a bag in one hand and a knife in the other—and filled the bag with bursting.

That class of every-bitten writers who are forever seeking to discern signs of Britain's decay might find food for thought in the multiplying evidence that the empire's sons stand closer and closer together as the years go by.

So, wherever the English tongue is spoken, will be read with something like a thrill, the messages flashed from country to country yesterday—the Canadian Premier's congratulations to the Mother Land, Sir William Mulock's to the Hon. Joseph Chamberlain on the completion of a work which will afford a new and important channel of communication between parts of the Empire.

HOLIDAYS AND SLEEP SIMILARLY REGENERATIVE.

The return home of Sir Wilfrid Laurier, the other day, lent new interest to the question of the influence of holidays on the human system.

The first thing that is suggested by nearly everybody is "the change of air."

Some physiologists assert that there is a close analogy between the restorative power of sleep and holidays.

of adventure and wonder." These all have their counterpart during the holidays. Who has not heard people, when enthralled by beautiful scenery, employ the phrase, "That is just like a dream."

Holidays remove, as a rule, from the mind the anxious cares of business and this doubtless has a certain physiological influence.

"THE MOST NOTABLE CANADIAN." A scholarly and keen analysis of Canadian loyalty and its growth is contributed to the Canadian Magazine by George Bryce, J. L. D. The writer tells how Confederation gave to Canada "the opportunity of conceiving the thought, 'This is my own, my native land,' and goes on to say that we cannot be blamed if we regard our present position with some complacency.

He believes some of our love for Britain is due to what we have seen in the United States for

"During the half century which has witnessed the uprise of Canada, we have seen in the neighboring republic a terrific fratricidal war, out of which grew an era of unexampled corruption; a subsequent war of strife between black and white marked by streams of blood; a maladministration of justice unknown under the British flag; and a struggle between labor and capital even now causing greatest anxiety.

"That was a gladdening sight! When the most notable Canadian of today—the Premier of the Dominion—who is also the greatest French-Canadian, can speak as he bears the insignia of honor given him by his sovereign, in words of undoubted loyalty, of his love for the British crown and constitution, we are sure the lasting basis has been laid for a loyalty and devotion of the whole Canadian people to the British crown and empire."

Here in the loyalist city we need no need to tell us how true Canada is to herself and the mother country.

A TRENCANT LETTER. The Telegraph prints this morning a communication, some sections of which are calculated to startle those citizens who are inclined to say "Boys will be boys and there's an end of the matter."

The author is a well-known clergyman, who knows St. John, and who has given much thought to the problem which, always of interest, is receiving more than ordinary attention now because a youth is under sentence of death for murder, and will be executed next month unless an appeal for clemency avails to save his neck.

While there is much force in some of the correspondent's views The Telegraph is not in accord with him throughout. For instance he says it is his opinion that men are not "brave and honest enough to grapple with the question from its true and proper standpoint."

Yet "Observer's" trenchant letter is a contribution "not to be put aside lightly, and his almost brutal frankness in saying that "there is often more attention given to the breeding of horses than to the training of boys" has the sting of truth in it.

THE LABOR ORGANIZATIONS AND THEIR COAL PLAN.

That was a lively meeting which the labor organizations held Friday night to settle just how they were going into the coal business.

Whatever measure of success they meet with the consumer at least may regard with equanimity their plan to buy at the mine and bring coal here by the load—

The chief danger which confronts the labor people is that after all the most successful coal merchant is likely to be the coal merchant, whose specialty it is, and who is established.

ELECTION DAY.

This is election day in the United States. Both sides have followed the usual course and claimed everything in sight, but it is thought the Republicans will about hold their majority—45—in the House of Representatives, and that the new governor of New York will not have a large plurality.

Throughout the country it is thought the trusts and the coal strike have created strength for the Democrats, but now far this has been modified by President Roosevelt's success in having the operators and miners submit their differences

to a commission, remaining to be seen. In any event tariff reform before 1904 seems assured.

It is possible that when the result of the elections are known it will be seen that the Democrats have developed unexpected strength, but the prosperity of the country and the settlement of the coal strike would indicate that they have not done so.

"SQUELCHING RECIPROcity COERCIONISTS."

Under the above caption the New York Commercial prints an editorial on Canadian affairs in which it assumes that Mr. Tarte was forced out of the cabinet only because of the nature of his views on the tariff, while the fact is that he got into trouble because of his indefensible and unconstitutional action in proclaiming, as a cabinet minister, doctrines to which his premier and colleagues had not subscribed and upon which he had not consulted them.

We do not anticipate that the dominion law-makers will now turn around and "indicate" this discredited cabinet minister by slapping duties onto American goods so high as to shut them out of the Canadian market.

The first-gun of a tariff war by Canada on the United States," says the Boston Journal, "would put an end to reciprocity forever. It would mean the political death and burial of every public man and every newspaper that dared to champion it on this side of the U.S.C."

Canada is not coercing anybody, but she is seeking markets outside the United States and getting them. When the Americans get ready to "make a reasonable agreement Canada also will be ready. But she is not now and is not likely to be ready to make a bad bargain.

THE BOON IN FARM LANDS.

While the American newspapers admit that settlers by the thousands are leaving the border states for the contiguous Canadian territory, they assert that there is a great general western movement of colonists of which the United States is reaping much of the benefit.

It has been estimated by the Chicago Record-Herald that between 40,000 and 50,000 colonists have gone into the Far Western, Northwestern and Southwestern States since the first of September; "the movement of homeseekers and settlers has never before been so great in the history of western railroads."

TWO TELEGRAMS.

Premier Roblin, of Manitoba, seeking to make political capital out of the movement of the foolish Doukhobors, wired to the Hon. Clifford Sifton, asking if Manitoba would be indemnified in case of financial loss resulting from an invasion of fanatics, intimating that his people were about to take up arms to defend their firebrands from the harmless fanaticism and that a grave crisis was upon the country.

There will be neither suffering nor disaster on our side of the line, and the attempt to make the settlers now crowding into the western states pay unreasonable figures will send them into Canada, which lies invitingly near.

MONTREAL'S POLICE SCANDAL.

Despatches indicate that Montreal has on its hands a police scandal which is likely to assume large proportions.

The Montreal premier, whose bubble of sensation is true pricked, will comfort himself with the assurance that this heroic attempt to save his province will be featured prominently in newspapers hostile to the Dominion government.

NOBODY IS TO BLAME.

If Hon. Mr. Sifton made a mistake in bringing the Doukhobors to Canada, he erred in the good company of nearly all Canadians.

Overcoat Time.

We charge a price only large enough to give us a legitimate profit, and do not sell a customer a coat today, and sell the same kind of coat to another man tomorrow at a less price which is unfair.

This is a fair store—one price in season. Buy your Overcoat here and KNOW that you pay only what it is worth, and no more, or no less than any other patron of this store.

At \$8.00 A Dark Grey Cheviot Overcoat, made raglanette style, having cuffs on sleeves, vertical pockets, velvet collar, Italian body linings and mohair sleeve linings. Also, a Grey Frieze Overcoat, made and finished the same with the addition of satin piping. A plenty of your size whatever you are. Cheaper than catching cold.

At \$12.00 Men's Stylish Fall Overcoats made Chesterfield style of Coronation Tweed—being a mixture of black and white—having full back and velvet collar, Italian body linings, mohair sleeve linings and satin piping. A Box Back Overcoat, light grey herringbone pattern, no body lining, but backed by a fancy pattern woven into the cloth itself—makes the coat lighter but just as warmful—mohair shoulder and sleeve lining, velvet collar and bellows pockets. Also, an Overcoat of dark grey material, being 46 inches long, velvet collar, vertical pockets, cuffs on sleeves having six rows of silk stitching and five rows of stitching down the centre of back. This is a new style this season. We have also at this price a Light Grey Herringbone Tweed Overcoat, made raglanette style, being 45 inches long.

At \$10.00 The values we offer at this popular price cannot be found anywhere else in St. John. Blue and Black Beaver Overcoats, made Chesterfield style, velvet collar, Italian body linings and mohair sleeve linings. A Dark Grey Tweed Overcoat, very warm, made raglanette style, cuffs on sleeves having several rows of stitching; also, a Dark Grey Tweed made Chesterfield style, being 45 inches long, velvet collar and Italian body linings. Material, making and finish of these coats better than you are apt to get anywhere else for a few dollars more.

Overcoat Prices, \$5.00 to \$25.00.

We'd like the opportunity to prove to every man who needs an Overcoat that he can Save from \$2.00 to \$5.00 if he buys it here.

The proof is as plain as the nose on your face—if you'll but come!

GREATER OAK HALL,

SCOVIL BROS. & CO.

NOT ALLOWED TO FLOURISH IN FUTURE UNBROKEN.

In these matters there is no cure like publicity. Transactions which will not bear the light of day soon lack defenders and find determined opponents when they are laid bare in cold type.

It is a matter for congratulation that in St. John the interests which menace civic decency in Montreal are not powerful enough to buy protection or command the amazing tolerance which marks the attitude of the police in two or three Canadian cities.

UNITED STATES OF EUROPE IDEA.

has to make the best of conditions which are not due to the fault of Hon. Clifford Sifton or any other individual. But the authorities should insist to suppress the antics of the Doukhobors, and, at least, save the lives of the helpless children, who are being exposed to the rigors of a Northwest winter by the folly of their parents.

The foregoing is from the Toronto Telegram, a newspaper whose attitude toward the Hon. Clifford Sifton has been particularly hostile. Had Mr. Sifton tried to have the Doukhobors excluded what a howl would have gone up from the Tory press! Of course that national watch-tower, the Telegraph's morning contemporary, saw "the Doukhobor peril" four years ago and hoisted danger signals at that time.

NOTE AND COMMENT.

Mr. F. M. Anderson seems to be in the political mulligatwny.

The retirement of Mr. Tarte seems not to have changed the face of nature materially up to date.

"Sir Wilfrid's Trouble" appear to trouble the Sun a great deal more than they trouble Sir Wilfrid.

"A Miner's Victory" is the London Daily Telegraph's estimate of the appointment of the strike commission.

Mr. H. A. Powell has found that it is not safe to say in British Columbia what he dare not say in New Brunswick.

The eagerness of the Tory press to bear the Premier's burdens for him is calculated "to provoke in the sinful a smile."

The C. P. R. land sales for September were 154,535 acres. They were 60,000 in the corresponding month last year. The West grows fast in these days.

Mr. Carnegie was a little late with his United States-of-Europe idea. A Russian

invited it two years before him.

William J. Bryan, of silver fame, is comforted by the news that a volcano in Peru is throwing up gold dust—if we may believe a factious New York editor.

An alarmist announces that John Mitchell, the strike leader, may be a presidential candidate two years hence. This must give the capitalists a chill.

It is to be hoped that the boys of St. John will not grow old before the various persons interested in reforming them unite upon a plan for their salvation.

Sir William Mulock Postmaster-General, has a surplus of \$5,000 in spite of the reduced postal rate. Ordinarily this department has shown a deficit of half a million. The figures are worth thinking about.

The valiant Sun has not much to say about that "humorous" five steamship with "a small army of officers and employes." Has the disciple of J. Pierpont Morgan modified his views on river transportation?

The London Daily Mail has the blues over England's industrial outlook. It asserts that the demand for British manufactures is decreasing, employment is scarce and wages have fallen by 1s. 3d. since July, while the price of many necessities has increased owing to the American coal strike and beef trust.

Where is the crisis? The answer is like unto that of the boy who was asked for the core of the apple: "There ain't going to be no core." One minister was out of accord with his colleagues; he has gone; that is the whole story. The only result of the incident is to demonstrate the unity of the cabinet and the firm grip which the premier has upon the management of public affairs.—Toronto Globe.

The London Standard does not fall into the error of some New York newspapers in overlooking the constitutional aspect of Mr. Tarte's conduct. The Standard which publishes the Laurier-Tarte correspondence expresses natural surprise that the ex-minister makes no attempt to defend his course which it characterizes as contrary to all traditions of cabinet government. The London newspaper views the premier's letter as noticeably moderate in tone and says the Duke of Wellington and Lord Palmerston would have written more harshly under similar circumstances. But Sir Wilfrid's letter, Canadian Liberals think, could not have been improved.

UNFORTUNATE AND SHOCKING DEATH OF THOMAS BARKER OF HORSFIELD STREET.

Killed by Drink of Leather Dye, Self-Administered—No Thought Among Family of Anything of the Kind—Sad Discovery Made by Mother.

The St. John, or at least that portion of it which patronizes the Free Public Library, is possessed of diversified literary taste as shown by the following list.

Kindred of the Wild—C. G. D. Roberts. Tale of Two Cities—Dickens. Sir Richard Calmady—Mrs. Harrison. Count Hammett—Stanley Weyman.

The Kent Northern Railway came before Judge Barker Friday on return of a writ of mandamus. It appears that the Kent Northern is indebted to the government for steel rails amounting to \$60,000 and a further sum of \$50 for car service and repairs.

The Apple Barrel and the Fruit Marks Act is stated by one who knows that there are numerous complaints made by retailers that the barrels in which apples come here are not properly marked.

MAN FROM APOHAQUI; TWO BOTTLES OF THE BEST; THIRSTY WATER PORTERS.

James Allison's Experience Causes Some Drought in Kings County.

An Apohaqui gentleman named James Allison came down on Saturday with reasonable market produce and succeeded in effecting ready cash sales.

Business dispensed with and an hour or so to spend before it became time to return for home. Mr. Allison peeped himself into the task of discharging a certain little duty which had been entrusted to his care.

Unabashed and smiling the sociable paroled him to believe something to the contrary, and with manifestations of tender solicitude, they ranged on either side and so conversing in an inimitable and most engaging manner, accompanied the worthy gentleman from Apohaqui as far as the Grand Union Hotel.

It was becoming dark and, Pond street—partially deserted, poorly lighted and quiet—seemed to offer special opportunities to the trio for the exchange of comments or confidential opinion.

Then—well—something happened. Mr. Allison was approached by a man in an individual whose clothes were spotted with mud, and who seemed to be in a very bad humor, for said he, 'I want to tell you that I've been robbed; I have my name is Allison and I'm from Apohaqui. I'm going out on this train, and was coming down the street, and I remember the name that had been told her, and when I asked her what she thought it sounded like, she said, 'I guess it's something like when you have a hill as far as I could see in the dark.'

And Mr. Allison brushed the soil from his clothing, and also that of the other friend in Apohaqui is waiting for that parcel. It looks like a drought in that region.

THE KENT NORTHERN. Rails, for Which the Road is Indebted to the Government, Ordered Exempt from Sale—Other Court News.

MEN WHO KNOW TALK ABOUT THE RIVER BOAT SERVICE.

Most of Them Agree That a Combination is Unlikely.

The Present Lines and the Views of Some Who Run Them—Farmers Not Panicking for a Chance to Build a River Greyhound.

The river steamboat service and whether or not an amalgamation of companies is the best policy and whether special boats should be put on the service, are live questions to those whose interests lie in river transportation.

As conditions now stand, the business is divided among various steamship companies, each with one or more steamers. There is the Star Line with the Victoria and David West. There are the Majestic Steamship Company, the May Queen, Hampstead, Springfield, Clifton, Douglas and Frederickton and Woodstock Steamship Company.

The Star Line management said yesterday it was doubtful if amalgamation would ever come to be.

It had been rumored that the river farmers would build a serviceable boat in the event of a combine.

Regarding special accommodation for farmers who have products to ship, boats would be required for each route, of which there are several. Such an arrangement would hardly pay.

Upper Gloucester and the Fruit Marks Act is stated by one who knows that there are numerous complaints made by retailers that the barrels in which apples come here are not properly marked.

The large receiving storehouses in Annapolis Valley will not take charge of a barrel unless it is properly marked and the apple trading shippers and jobbers have had ample opportunity of getting acquainted with the requirements of the act.

GHOST OF "EVA BENNETT'S" BAD LIFE CREATES FEAR OF FURTHER PUBLICITY.

Telltale Bundle of Letters from Well-known Men Found in Trunk of Suicide—Search Being Instituted by S. P. C. A. Secretary for Child of the Dead Woman.

Another chapter was added Friday to the tragic life story of Ethel Stevens (or Eva Bennett), the unfortunate woman who committed suicide in a house on the Marsh road a week ago.

Friday afternoon Lizzie Pearce's house, where the Stevens woman had boarded for some time, was visited by S. M. Wetmore, of the S. P. C. A., and Mrs. Morrison, of Calais, a connection by marriage of the dead woman, in an effort to locate the latter's two and a half year old child.

Lizzie Pearce says the child was never seen and that she has not the faintest idea of its whereabouts. She says that Mrs. Morrison came to her place five weeks ago.

Minnie Eaton's house on the Westmoreland road was next visited by Mr. Wetmore and Mrs. Morrison in an effort to obtain some information regarding the little waif, but there also the search was fruitless.

Two or three weeks ago a man and woman called at a house in Sydney street and made arrangements for board for themselves and a young child. A short time afterwards the couple disappeared and left the child on the landlady's hands.

An effort will be made today to find out if this is the little waif sought for by Lizzie Pearce to her is to the effect that she did not know when or how she had been informed of the child's whereabouts.

None of the friends of the woman ever heard of her having a child and they all state that if she had one it was not brought to this city. The general opinion is that if it is still living it is in Halifax.

Lizzie Pearce says she may have taken the poison over night or in the morning.

CAMPBELLTON BOOMING.

H. F. McLatchey Reports Good Conditions on the North Shore.

H. F. McLatchey, of Campbellton, is the timber business is booming as it never has before. 'There is,' said he, 'likely to be a large increase in the output of lumber from Campbellton this year. Two new firms are building mills in the vicinity of Campbellton.'

'One large modern mill in the course of construction is situated just across the mill. This mill will procure its supply of logs from Quebec.'

'The other mill is being built by the Selkirk Lumber Company Ltd., lately organized and who have taken over what was known as the Muskoka Lumber on the Pictou coast. Both these mills are truly modern and have an immense capacity.'

'A great drawback is the extreme scarcity of labor. An ordinary workman can command \$1.50 per day at present. This is accounted for by the large number of men employed on the new railway and in the construction of the new sewerage system in Campbellton; also the unusual amount of building being done makes a great decrease in the supply of labor.'

'This latter fact shows one that the population of Campbellton is on the increase. The last census puts the population at 3,000, but notwithstanding this the population of Campbellton at the present is easily 4,000, and it is yet growing.'

The two new lumber firms will very nearly double the output of lumber from Campbellton. There is at present a large force of men at work in the woods and there is room for as many more as can be procured.'

QUESTION OF NUMBERS OF FREE BAPTISTS IN NEW BRUNSWICK.

Census Commissioner Stands by His Figures, Which Were Disputed.

Correspondence instituted by Rev. Dr. McLeod, Who Claims 25,000 of the Dominion in This Province, While Census Gave 15,000.

Ottawa, Oct. 30—Some days ago the Montreal Gazette published a statement purporting to be a report from the corresponding secretary of the Free Baptist conference of New Brunswick, Dr. J. McLeod. In the statement Doctor McLeod claimed that the census enumerators had made a gross error in the enumeration of the Free Baptists in New Brunswick. He said that whereas the reports of the churches would amount to a moderate estimate give the Free Baptists fully 25,000 people in the province, the census enumerators had shown only 15,000.

Doctor McLeod likewise stated that he had asked the census commissioner to make an explanation of this apparent discrepancy. He stated that he had furnished with any satisfactory information. In his calculation of the Free Baptists in New Brunswick Doctor McLeod stated that from the figures of 133 churches, they had found 9,000 members. Leaving out the members of 28 unreported churches, he estimated that in all the province should have fully 25,000 members of the Free Baptist church.

In connection with this matter Commissioner Blue says that when he attended the Free Baptist conference at the Hotel he had procured a revision of the old religious population of all the districts in New Brunswick, and the result was a discovery of 160 persons described as "C." Baptists, who had been added by the compilers to the Calvinistic Baptists, whereas they should have been counted as Presbyterians.

There are, however, numerous branches of Baptists in New Brunswick, all of which excepting Free Baptists, were enumerated under the general head of Baptists. And, although it is possible that names were confused by the enumerators, the correspondence shows that in each case they were familiar with the names of the people and the districts in which they as enumerators were employed, that they were aware of the distinction between Free Baptists and Baptists of other sects, and that they aimed to make an accurate record according to the instructions.

Doctor McLeod corresponded with Commissioner Blue in connection with the matter last June, and at the time was given all possible information. It was also pointed out to him that in many cases where the head of a family was enumerated as being of one religious denomination, other members of the family were found to belong to various other churches.

In this connection Mr. Blue in his correspondence with Doctor McLeod gave several instances which had come under his notice. It is quite possible, therefore, that Doctor McLeod in making his report to the conference in New Brunswick, has based his calculation of the membership of the Free Baptists on the ground that each family of which the head was a member of the Free Baptist church was also a member of the Free Baptist church. There is little doubt that the census report of 15,000 Free Baptists in New Brunswick, formed as it was, after a careful and thorough investigation, is correct notwithstanding what has been said by Doctor McLeod.

The general census of the Baptists in the lower provinces shows that there has been little growth during the past decade, and undoubtedly the Free Baptists suffered as well as others. Montreal Herald.

SIFTON CALLS ROBLIN'S BLUFF

Manitoba Premier Tries to Shift on Dominion a Responsibility of Action He May Take With Doukhobors.

Ottawa, Nov. 2.—(Special)—Hon. Clifford Sifton received the following telegram from Premier Roblin yesterday: Winnipeg, Man., Nov. 2.—Doukhobors whom we believe to be dangerous, are rapidly approaching Manitoba boundaries. Will have to be dealt with either as lunatics or criminals. We do not want them, to cross boundaries. We have no facilities for handling them. Immediate steps should be taken by you to prevent their entering Manitoba. A change of weather serious fatality sure to overtake them. Please say if we will be relieved of all responsibility, financial and otherwise, should they reach Manitoba. (Signed) R. P. ROBLIN.

Mr. Sifton replied as follows: R. P. Roblin, Winnipeg, (Man.). The office of my department with necessary police assistance, are giving their best attention to the Doukhobors. I do not know of any reason to anticipate injury to anyone except themselves. Every precaution possible is being taken to prevent harm arising from the movement. I see no reason for giving any special assistance to your government. I have no opinion to offer as to any action you may take. If you should decide to interfere with the Doukhobors, your action will be taken on your own responsibility. (Signed) CLIFFORD SIFTON.

FOUR MORE RAILWAYS THROUGH NORTHWEST TO PACIFIC COAST.

Hon. Mr. Blair Sees Big Possibilities in the West.

Country Has Grown Beyond the Present Facilities—Thinks That 100,000 Americans Will Immigrate to Canada Next Year—The Doukhobors and Galicians.

Montreal, Nov. 1.—There is great disaster threatening the farmers of the west today and they do not seem to realize it; they must change. At present they do not realize that what they ought to do is to build barns and store their grain. They do not realize that there will come a time when the market will be so flooded with grain that the price will fall so low that they will suffer a complete loss. The banks will not advance them any money under such conditions and what they must learn to do is what the American farmer in the western states has learned by bitter experience, store their grain and wait for the most favorable time to forward it to market. Such was the statement given to the Globe correspondent today by Hon. A. G. Blair, minister of railways and Canada.

Mr. Blair, minister of railways and Canada, is stating what had been the exact results of his trip through the west to the Pacific coast. There cannot be any wonder, the minister of railways went on to say, that the railways should find it impossible to rush the grain through and to avoid blockades, even if there were four times as many railways as there are at present it would be impossible to handle it at once, owing to the fact that farmers from all the districts, hustle all their grain right to the railway and expect and want to get it on the market as rapidly as possible. They will have to hold their grain until the market is glutted and prices are to be maintained.

Then, as minister of railways, I am particularly interested in seeing for myself what could be done to the west to solve the problem of transportation. It was six years since I had been through the country, and I had never before been through it in the open season. What I was particularly anxious to find out was how do the present railways, the Canadian Pacific, the Canadian Northern, the Great Northern and the Northern Pacific, answer to the needs of the country and what are the chances for new railways. After looking into the question as carefully as I could I have decided that while such one of the railways made all the progress it could the country has grown greatly beyond them. In fact, I am thoroughly convinced that there is room for at least four more railways right through the Northwest to the Pacific coast today, not only convinced of that, but even of the fact that it must have been so long ago that I have been through them. I travelled over portions of all the four present railways and branched inland to see the condition of the country. Everywhere the soil is so rich, its possibilities so great that I would not hesitate for a moment to say that 20,000,000 on either side would be amply sufficient for a railway to be run with satisfactory results. Then I went among the people and I found that there was a very general opinion in favor of a government railway, right through to the coast. I had thought so for many years. I am more and more convinced of the fact as the farmers pointed out to me it would be the one great thing that would tend to equalize rates, the one thing that would prevent their continually being at the mercy of the railways. They have the right to such a railway, and there cannot be any doubt that such a line might be run with great profit to the country. But, then the country has gone ahead so fast that more railways must be established or immigration will receive a severe setback. Settlers are now obliged to go into the outlying districts and unless railway facilities are afforded there is no order to get their produce to market they will become discouraged and anxious to leave the country. Everywhere you go the same cry is to be heard, more railways.

Then I was specially interested in the big immigration from the United States. While in England last summer the objection was made that so many general agents coming into the country would tend to favor the cause of annexation. I wanted to go among them and see if there was any truth in the charge. The fact is, I found that there was not. They are all anxious to make Canada their home, and I am quite sure that in a generation it will be impossible to tell the difference between the real Canadian and those who have come here from the United States. I visited the chief centers and now I am going to the west. From what I have seen and learned I will prophesy that the next year at least 100,000 Americans will find their way into Canada to settle down. The movement has only started and the coming of so many Americans into the country will tend to offset the disaster that now threatens the west, for they will, by example, show the Canadian farmers the benefit to be derived from holding on to their grain.

Then, naturally, I was interested in seeing what progress had been made by the Doukhobors and the Galicians. For the most part I found that the Doukhobors had shown themselves to be good settlers. The present trouble among them is not likely to spread very much. The Galicians have certainly gone ahead very rapidly. They have adapted themselves admirably to the conditions of the country and are very anxious to learn English. But, say, it is wonderful how that country has gone ahead in the last six years, and there cannot be any greater truth than that the greatness of Canada lies in the west—Globe, Nov. 1.

THE PHILOSOPHY OF JOHN GRAHAM FOR THE BENEFIT OF HIS SON PIERREPONT.

Some Selections from Letters of the Chicago Pork Man, Who is Gruff in Expression, But Sound in Idea.

Everybody is talking about the "Letters of a Self-Made Merchant to His Son." This is a book full of peculiarly American wit and humor, with an undercurrent, at least, of practical wisdom. John Graham is a big man in Chicago, and head of the house of Graham & Co., pork packers. He is a familiar name as "Old George Graham," while his son, Pierrepont, to whom the letters are addressed, is humorously called by his intimates "Piggy."

The letters begin with Pierrepont entering Harvard, and end after he has proved himself worthy of succeeding his father in the management of a great business, and has betrothed himself to a nice girl. In the meantime "Piggy" has some valuable, if disagreeable, experience. When he leaves college he wants to "go abroad," but his father's idea is that he shall enter the Chicago house at the foot of the ladder, and work his way up. His father's ideas prevail.

No better idea of the quality of the book could be given than that derived from a few quotations at random from the various letters. Old Mr. Graham is certainly what is called a "rough proposition" in the slang of the hour, and the slang of the hour cannot be ignored in considering the amusing volume.

The following selections from "Old George's" letters sufficiently explain them: "If you graduate with a sound conscience, I don't care so much if there are a few holes in your Latin." "Does a college education pay? Does it pay to feed in pork trimmings at five cents a pound on the range and living on cactus and perfracted wood till he's just a bunch of barb wire and sole leather, and feed him corn till he's just a solid bank of porthouse steak and olio oil?" "You bet it pays. Anything that trains a boy to think and to think quick pays; anything that teaches a boy to get the answer before the other fellow gets through biting the pencil pays." "College doesn't make fools; it develops them. It doesn't make men bright; it develops them."

The cashier has just handed me your expense account for the month, and it fairly makes a fellow hunch-shouldered to look it over. When I told you that I wished you to get a liberal education, I didn't mean that I wanted to buy Cambridge. Of course the bills won't break me, but they will break you unless you are very, very careful.

I can't hand out any ready-made success to you. It would do you no good, unless it would do the man in the street a plenty of room at the top here, but there is no elevator in the building. If you gave some fellows a talent wrapped in a napkin to take with in business, they would swap the talent; and there are others that you could start out with just a napkin, who would swap it with it in the dry goods business in a small way, and then coax the other fellow's talent into it.

I know that a good many people say I am a pretty close proposition, that I make every hog which goes through my packing house give up more than half the lot. I know that a good many people say I am a pretty close proposition, that I make every hog which goes through my packing house give up more than half the lot. I know that a good many people say I am a pretty close proposition, that I make every hog which goes through my packing house give up more than half the lot.

What you know is a club for yourself, and what you don't know is a meat axe for the other fellow. He was a powerful hand for a joke and had one of those porous heads and more able scraps which go with a sense of humor in a small village. The only animal which the Bible calls patient is an ass, and that's a bold doctrine and good natural history. The wheat pit is only 30 feet across, but it reaches clear down to hell. And trading on margin means trading on the ragged edge of nothing.

With most men duty means something unpleasant which the other fellow ought to do. Smallpox in Barbados Spreads. Kingston, Ja., Oct. 23.—Smallpox continues to spread in Barbados at an alarming rate. Advertisement for Famous Active Range. YOU can't get the results the "Famous Active" gives by doing your cooking on any other kind of range, because no other range has all its special features, such as: A Vented Oven that does admit fresh, hot air, and does not get off all the roasting fumes. A Deep Fire-pit with "McClary's Special" Duplex Grates, in Sections—Cast-iron Linings, which wear longer and give better satisfaction than the brick and cement used in common ranges. A "Famous" Thermometer that registers the exact heat of the oven, so that you can regulate the heat to suit your needs, and yet too small to admit enough cold air to chill the oven. NEW BRUNSWICKERS WHO ARE MAKING A NAME IN NEW YORK.

ALLAN F. RAMSAY OF MIRAMICHI; TOM HALL OF ST. JOHN--MOLINEUX TRIAL THE SENSATION OF THE DAY--A GREAT MUSICAL SEASON.

New York, Oct. 30--Prominent among the younger generation of men who have achieved success in the business world here, the name of a New Brunswicker stands out in bold relief.

OUR NEW YORK LETTER.

St. John man's success. Molineux to be a free man. Kennedy murder trial cited.

The eminent Vienna surgeon, Lorenz, to demonstrate in New York 265 most surgical events to take place in the metropolis this season.

which he now has the honor of being a member. Your correspondent was informed by Mr. Ramsay the other day that he had recently been made second vice-president of the firm.

Thomas Hall, son of the late T. H. Hall, of St. John, is a conspicuous figure in downtown business circles.

The interest of the New York public is directed this week between local politics and the second trial of Roland B. Molineux, once convicted of the murder of Mrs. Katherine J. Adams.

While it is thought that the trial will speedily terminate, and that very possibly counsel for the defence will rest without introducing much testimony in rebuttal, relying upon a dismissal of the complaint on the ground that nothing has been introduced by the prosecution tending to prove the guilt of Molineux, matters nearly came to a deadlock yesterday over the exclusion of testimony given by witnesses at the former trial, who are now in New Jersey and cannot be induced to come into this state while the trial is in

progress. Assistant District Attorney Osborne, who has charge of the prosecution, has been talked at every step, and his chagrin has been apparent throughout. The prosecutor has more than hinted that former Governor Black and his associates who are defending the prisoner, have had a hand in keeping important witnesses away from this city.

Public Prosecutor Seeks to Strike Terror.

The hope of the public prosecutor for a conviction is now based solely on the testimony of the handwriting experts, and Mr. Black has so confused them, and weakened the force of their testimony, that the evidence really amounts to little or nothing.

James W. Osborne, the assistant district attorney, who has charge of the case for the people is one of the most aggressive men who ever pleaded at the bar of the criminal branch of the Supreme Court of New York.

Mr. Osborne is a man with a bulldog expression, which is at times almost ferocious. He has a thick neck, a square jaw, and a wide, determined mouth.

He used to wear his moustache cropped close, and it was thought he did this for the purpose of terrifying unwilling witnesses by the sternness of his expression.

Mr. Molineux will go free. The general public, however, will continue to regard him as a guilty man. The idea has become widespread here, and in truth there is no lack of foundation for such a belief that no one, if he has money and influence, need suffer the extreme penalty of the law for the crime of murder in this state.

Visit of Dr. Lorenz, Eminent Surgeon. A topic of exceeding interest to New Yorkers in general, and the medical fraternity in particular, is the forthcoming visit of Professor Lorenz, the eminent surgeon of Vienna, who is expected here next week.

delight at the prospect of permanent relief from these peculiarly unfortunate afflictions.

Election Next Tuesday.

Discussions among curb brokers and traders in general in Wall street, this week is confined chiefly to the political outlook. The general elections will be held on Tuesday of next week and the outcome is naturally awaited with the keenest interest.

Coal Strike Cut Railroad Earnings.

The day's returns for railroad traffic yesterday were the occasion of considerable comment concerning the political outlook. The general elections will be held on Tuesday of next week and the outcome is naturally awaited with the keenest interest.

Dr. J. Collis Browne's Chloro

IS THE GREAT SPECIFIC FOR Diarrhoea, Dysentery, Cholera, Coughs, Asthma, Bronchitis.

THE ILLUSTRATED LONDON NEWS. Sept. 25, 1886, says: "I was asked which simple medicine I should prefer to take abroad with me, as Italy is the most generally used, to the exclusion of all others, I should say CHLORO-DYNE. I never travel without it, and its general applicability to the relief of a large number of simple ailments forms its best recommendation."

Dr. J. Collis Browne's Chlorodyne is a head medicine which saves PAIN IN EVERY KIND OF COLIC, retching, sleeping, WITHOUT HEADACHE, and invigorates the nervous system when exhausted.

AN INTERESTING GROUP IN THE LUMBER WOODS.

In a month or five weeks, the lumber operators say, a fairly intelligent estimate can be had regarding the cut for the season throughout the lumbering districts of the province. As yet it is too early to

make any reliable forecast, for at the present time prominent lumbermen, discussing the situation, say the opportunities extended for hoarding of provisions or equipment up to the different camps are very

good. Men are now being hired for the woods much more freely than they were and the number is placed at somewhere between 10,000 and 15,000.

As an indication of what the leading operators will do one has already 150 men in the woods and is paying from \$22 to \$30 a month. The general outlook is for a busy season.

Havelock Sunday School Work.

The district Sunday school convention of Havelock and vicinity was held at Springhill on Friday, Oct. 31st, in the public hall.

A conference on Sunday school conditions and how to improve them was conducted by the field secretary. It was discovered that Springhill, under the influence of old habits, had closed the school. From his standpoint, the Secretary of the convention, Thos. Perry reported Lower Ridge as improved, and about forming a normal class.

Salem had closed, but an effort will be made to re-open it as once. Steves Settlement had closed, but the field secretary will have a meeting there next Friday and try to re-open it. Head of Ridge school is prosperous. Havelock school home department has brought other members in, has begun a strong normal class and is introducing the cradle roll as part of the primary work.

A sample normal lesson was conducted by Rev. Dr. Brown on Old Testament History, showing what and how the case is here.

In the evening session President C. F. Alward was in the chair. Doctor Brown conducted responsive scripture readings. Rev. Mr. Lucas conducted a conference on normal course studies for teacher training. Several joined in this and a number of persons expressed their desire to begin.

Some work of visiting was outlined and the next meeting was invited to Steves Settlement for Friday, Jan. 2.

This practical convention was well attended, marked by deep interest and its encouragement acknowledged.
