MAY.—May (Latin, *Maius*) is so denominated from Maia, the most beautiful of the constellation Pleiades, and the fabled mother of Mercury, one of the false deities. The corresponding Jewish month was SIVAN (Ezth. viii. 9), the ninth of the civil, and third of the sacred year.

Equation of time to be subtracted from apparent time to the 14th, and to be added the remainder of the month.

JUNE.—June, (Latin, *Junius*), was so named from Juno, one of the fabled Goddesses of the Romans. It answers to the Jewish TAMMUZ, the tenth of their civil, and fourth of their sacred year.

JULY.—July (Latin, *Julius*), was originally called Quintilis, being the fifth month of the Roman calendar. Marc Antony designated it Julius, in honor of Caius Julius Caesar, dictator of Rome, who was born in it, and who reformed the calendar. It answers to Ab, the eleventh month of the Jewish civil year, and the fifth of their sacred year.

AUGUST.—August was originally called by the Romans *Sextilis*, or the sixth month; which was afterwards, by the senate, changed to *Augustus*, in honor of the Emperor. It corresponds to the Jewish *ELUL* (Neh. vi. 15), their twelfth civil, or sixth sacred month.

OCTOBER.—October derives its name from the Latin word *octo*, "eight," indicating the place it held in the Roman calendar, and *imber*, or "shower." To the Jews it was known as *BUL*, signifying decay, as in the fall of the leaf (1 Kings vi. 38), or *MARCHESVAN*, as it was called after the captivity.

Equation of time to be subtracted from apparent time to the 24th, and added to it during the remainder of the month.

DECEMBER.—December derives its name from the Latin *decem*, "ten" as, in the Roman year, instituted by Romulus, beginning with March, it was the tenth month.

The 19th of Vic. Cap. 5, Sec. 5, enacts—"That no greater sum than £26 sterling shall be in any year levied for Light Dues on any Steamer or Vessel entering any port of this Colony; and no Steamer plying between Europe and any port of North America, and entering any port of this Colony as a Port of Call, shall be liable to pay any Light Dues or other port charges except Pilotage."

## DESCRIPTION OF LIGHTS.

*Fort Amherst Light, at the entrance of St. John's*—A Light was first established at this station in 1813, and until the granting of a Legislature to this Island the expenses consequent on its maintenance were defrayed by voluntary contributions; in 1850 a new House, Lantern and Apparatus were erected. The Light burns at an elevation of 110 feet, is produced by a treble argand burner placed in the focus of an annular lens of the fourth order, and in favourable weather can be seen 12 miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during day light, to assist vessels in making the harbor.

*Cape Spear Light*—This Light was first exhibited on the 1st September, 1836; it is produced by seven argand burners and silvered reflectors burning at an elevation of 275 feet—it revolves, shewing a bright Light every minute, and in favourable weather can be seen 36 miles. It is situated in 47.31' N, lat. and 52.33' W. longitude.

*Harbor Grace Island Light*—First exhibited on the 21st November, 1837; it is a fixed Light, has fifteen argand burners and reflectors, shewing a steady bright Light from N. to S.W. and by W. seaward, elevated above the level of the sea 151 feet, and can be seen in fair weather in rounding Cape St. Francis or crossing Conception Bay, on the intervening space between N. and S.W. and by W.; on the land side the Light is more feeble. It is situated in lat. 47.42 N., and in lon. 53.05 W.

*Cape Bonavista Light*—Situated in lat. 48.42 N., lon. 52.59 W., is a Revolving Light, shewing alternately every two minutes a White and a Red Light. It is produced by sixteen argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favourable weather can be seen 30 miles. For some years the Light apparatus was in use at the Bell Rock, East coast of Scotland. By keeping this Light open with Cape Largent, it will carry you clear of the Flowers Rocks; first exhibited 11th September, 1843.

*Cape Pine Light*—This tower is of iron, built by the Imperial Government in 1849-50, and first put in requisition on the 1st January, 1851. It is revolving, and shews a bright flash every 30 seconds—has 12 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. 46.37 N., and in lon. 53.30 W. In a favourable state of the atmosphere it can be seen 86 miles.

*Harbor Grace Beach Beacon and Light*—First exhibited 11th September, 1854; stands on the Point of Beach at the entrance of Harbor Grace. It is a double Light, as a distinction from Harbor Grace Island Light, one being placed above the other, preserving that appearance for six miles; exceeding this distance up to ten

miles, the two Lights appear blended into one. In sailing into Harbor Grace with a fair or leading wind, bring the Beach Beacon to bear W. or W. by S., and by keeping the Light or building a little on the starboard bow it will carry you clear of the Bar, on which at low water there is not more than 8 feet of water.

*Green Island Light, at the entrance of Catalina Harbor, Trinity Bay*—Situated in lat. 48.30 N., lon. 53.03 W. This is a Fixed White Light, burns at an elevation of 92 feet above high water, exhibited every night from sunset to sunrise, and in favorable weather will be seen from E.N.E., seaward, to S.W., 12 miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Bonavista Light opens with Cape Le Jean, will give the Flowers Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N. Head a moderate berth, you will clear the Brandies Rocks by steering for Green Island Light.

*Cape Race Light*—Exhibits a Fixed White Light, from sunset to sunrise. The Light will be visible to seaward from N.E. by E. round by the S.E. and South to West. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 17 miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Light house is in lat. 46° 39' 12" N., lon. 53° 2' 38" W. All bearings are Magnetic. Var. 24° W. N.B.—A Toll will be levied upon all Vessels benefiting by this Light.

*Dodging Head, Great Burin Island, Light*—This Light was put in requisition on the 3rd August, 1858, and is exhibited every night from sun-set to sun-rise. It is revolving, catoptric, of the second order, producing a brilliant White Light every minute, with intermediate flashes, at intervals of 20 seconds, burning at an elevation of 410 feet above the level of the sea, and in favourable weather can be seen 30 miles—situated in 47° 0' 0" North Latitude 55° 0' 5" West Longitude.

*Offer Wadham Island Light*—Was first exhibited on the 4th October, 1858, and will continue to be lighted every night from sunset to sunrise. The Light is a steady, fixed lens-light, burning on a circular Brick Tower 96 feet above the level of the sea, and can be seen in a favourable state of the atmosphere 12 miles. Situated in Latitude 49.36 North—Longitude 53.46 West.

*Baccalieu Island Light*—This Light is exhibited every night from the going away of day-light in the evening to the return of day-light in the morning. The position and characteristics of this Light are as follows:—Baccalieu Light House is situated on the Northern end of that Island—Latitude 48.09 North, Longitude 52.50 West,—the Tower is of brick, the Keeper's Dwelling a Square Building, detached from the Tower, painted white, with the roof red.

The Light is a Catadioptric first class Holophotal Revolving White Light, shewing a flash every twenty seconds. It is elevated 380 feet above high water, and can be seen in clear weather forty nautical miles, and a lesser distance according to the state of the atmosphere. When the Southern end of the Island bears N.N.E., the Light will not be visible when nearer the Island than eight miles.

## THE PHENIX FIRE OFFICE

Is confidently recommended to the notice of the Public, for the liberality and promptitude with which all claims upon it are adjusted and paid—as well as for the almost unlimited security which it affords, comprising, in addition to the large invested Capital of the Company, the whole fortunes of a numerous Proprietary composed of some of the most opulent gentlemen and merchants in the United Kingdom.

The “Phoenix Office” has carried on an extensive and successful business for upwards of “Seventy-five Years”. The duty paid by it to Government for Insurances in Great Britain and Ireland alone (exclusive of Farming stock) exceeds ONE HUNDRED AND TWENTY FIVE THOUSAND POUNDS sterling per annum.

Annual and short time Insurances are undertaken by the “Phoenix Company,” on almost every description of risk in Newfoundland at moderate rates of premium, which may be known on application to the Agents at their Office in St. John's, where Policies are issued free of charge.

W. &amp; G. RENDELL,

Agents for Newfoundland.

\* The 141 Servants set forth at foot of General Abstract for Ferryland are non-residents.

NOTE.—The Census of the Labrador was cursorily taken by the Superintendent of Fisheries, (JAMES L. PRENDERGAST, Esquire,) in 1856 and 1857, but it is not sufficiently correct or full to form a part of the foregoing Returns. The number of permanent residents, as given by that gentleman, from L'Anse Sablon to Sandwich Bay, both inclusive, including Belle Isle, is 1650, of whom 1331 are Protestants, and 319 Roman Catholics.

### FIRE.

Only one out of 72 London and Country Offices, included in that Report, exceeds the "Royal" in its increase of Duty for the year; and that one Office solely by the all but nominal sum of £2—being more than the total increase of *all the Scotch Offices*, and greater than any two of the fourteen English Offices established North of Birmingham. No Country Office establishment in London equals this Company in its Revenue derived from the metropolis.

*Bankers*—Commercial Bank of Newfoundland.

The Policies of this Association will be paid in the event of Death happening within the Days of Grace, notwithstanding the omission of the payment of the Premium.

The Bank of London and this Association are entirely distinct and separate Companies.

Banking operations are in many cases closely allied to Assurance transactions; few persons extensively acquainted with business, can be unaware of the facilities possessed by a large Banking Establishment for furthering the objects of an Insurance Office, where cordial relations exist, and harmonious co-operation can be secured.

Nevertheless, the two businesses, although capable of mutual assistance, are essentially distinct; and it is indispensable to their satisfactory working, that they should be kept wholly distinct as regards Capital, Liability, and Management.

In order to preserve perfect independence of action, the Bank of London and National Provincial Insurance Association is conducted upon its own risk, with a separate Capital; but to secure and retain the advantages of the Bank connection, six Directors of the Bank occupy seats on the Board of the Association.

The Association, while it enjoys the valuable co-operation of the Bank, is by no means wholly dependent upon that connection for the elements of success; its present Annual Income, from Premiums alone, is about £120,000 per annum; it possesses a large and influential Proprietary of upwards of One Thousand Shareholders, and a staff of more than One Thousand Agents.

In all Assurance transactions, the first consideration to an insurer should be to satisfy himself that the Office in which he effects his insurance possesses unquestionable means for fulfilling the engagement entered into by his Policy.

This Association, in addition to its large Annual Income, affords the protection and security of a Capital of One Million Sterling, thereby offering ample security to all having transactions with it.

## LIFE DEPARTMENT.

The Association undertakes every description of business contingent upon the duration of life.

The Deed of Constitution provides that the Life and Fire Departments shall be kept totally separate and distinct, so that the accumulated funds of one department shall not be liable to make good the losses of the other.

The Assured, in addition to possessing the advantage and security of a large paid-up and subscribed Capital, enjoy the valuable privilege of participating in the profits of the Association to the extent of 80 per cent., which must be considerably enhanced by a portion of the expenses of management being borne by the Fire Department.

A valuation of the assets and liabilities will be made on the 31st December, 1859, and thenceforward every three years, and the profits divided among the Policyholders in proportion to the number of Premiums paid.

This Society is chiefly, but not exclusively devoted to the Assurance of the lives of members of the Wesleyan Methodist Societies, and of the hearers and friends of that religious connexion; Assurances, however, may be effected upon all assurable lives.

One half, at least, of the Directors are chosen from the credited Members of the Wesleyan Methodist Societies.

The *advantages* it offers to Assurers include all the benefits which have been developed during the progress of the system of Life Assurance.

Nine-tenths or ninety per cent. of the Profits, ascertained every five years, are divided among Policy-holders having paid Three Annual Premiums.

All claims paid within Fifty days of their being passed by the Board.

## To the Public.

THE Compiler, in laying before the Public the NEWFOUNDLAND ALMANACK for 1859, indulges the hope that consideration will be accorded for any imperfections or mistakes which may be found in the work. He has spared no effort to make it a popular and useful book of reference, and trusts it will be found quite equal to its predecessors.

The Compiler has again to acknowledge his indebtedness to his talented friend and countryman, W. C. ST. JOHN, Esq., of Boston (late of Harbour Grace) for the Astronomical Calculations, and that gentleman's high character for scientific and literary attainments will be a sufficient guarantee for their correctness. He also acknowledges his indebtedness to the Heads of Departments and other gentlemen, for their courtesousness and the promptitude with which they furnished the information requested.

JOSEPH WOODS.

St. John's, Nfld., December, 1858.
