things our common sense compels us to take for granted. Do not, therefore, wate any time in doubting the value of a good road. The people of other countries who have used bad roads and now use good one are well satisfied that every dollar spent in this work is a good investment, and not one of them would tolerate the miserable dit roads with which so many farmers seem to be content."

— Mayou Quincy, of Beston, made a very hearty speech at the dinner of St. Gerger's Society, Beston, on Monday evening of last week. Responding to a sentiment is hoor of this dity, be remarked upon the progress which Queen Victoria has witnessed and assisted during her reign, and the calculate blood that has at no time in the history of the world was three such a poselo as was in the hands of English speaking people as was in the hands of English speaking people as was in the hands of English speaking people to day. so thoroughly unite them that all idea or fear of war between them shall be done away forever. His Worship was loudly applauded.

—Now that an interesting programme of sports has been arranged for the afternoon of the lat of July on the track of the Bridge town Driving Company, would it not be well for our citizens to call a public meeting for the purpose of making the day more of gala one by preparing some pleasing features for the hours preceding noon and also those following 6 p.m. On more than one occasion Bridgetown has afforded visitors a day of great pleasure on the 1st of July, and we believe we voice the sentiment of many of our public-spirited and enterprizing citizens when we state that there is a willingness to lend all possible assistance towards making that of 1896 one long to be remembered by the hundreds of visitors who would flock into our pretty town for a day's outing if some pleasing features were introduced to while away the hours preceding and after the sports of the day of great are fully determined that the prestige of the track will be increased on this occasion, and that strict order and decorum will be maintained.

He was about 69 years of age.

—About 2,000,000 salmon frout and 1,0000 salmon trout and 1,000,000 salm away the hours preceding and after the sports of the afternoon. All that is necessary to accomplish the worthy object is the unity of our townspeople. Let us have it.

the Dominion is being well illustrated in St. John where a large number of prominent business men have nominated two independent candidates to press, if elected, the claims of the city before the government for a fast steamship service with England. Not being satisfied with the attitude of the government they have determined to look after the interests of St. John rather than be led blindly by their party. This means running gress of such a three-cornered fight will be watched closely. With such an able business man as W. Frank Hatheway taking an interest in the port question and engineering have an influence to cope with that cannot be easily submerged.

A number of residents might have been noticed last evening near the public scales of crop, everything now looks promising. The trees are white with blossoms and the air fragrant with their delicious odor, and the valley never looked prettier than during the present week. Could American summer tourists reach here this early they would discover that our valley is one vast flower bed and recognize its claim to the title of "the garden of Nova Scotia."

The Minister of Finance at Middleton.

J. B. Mills, Q. C., and Hon. George E. Foster, Minister of Finance, addressed a very large gathering of people on the political issues of the day at Middleton on Monday afternoon. When the special train from the west arrived it was found that the large and capacious hall in Morrison's block was filled to overflowing, and in order that all might have the pleasure of listening to the speeches it was soon arranged that the vast concourse of attendants should be addressed from the platform of the residence of Mr. George W. Andrews. This was, soon accomplished, and when the chairman, Benj. Starratt, Eq., of Paradise, took the platform to introduce Mr. Mills as the first speaker, it is estimated that some twelve hundred listeners were present.

Gloucester Vessel Setzed.

The Dominion steam fishery cruiser Aberdeen, Commander Knowlton, arrived at Halifax, at nine o'clock last Hesday night having in tow the Gloucester fishing schooner Frederick Gerning, Ir., which she seized Monday evening about 6 o'clock near White Geo. D'Arcy were saved from total destruction. A quantity of lumber piled at that which is a violation of the fishery treaty between the United States and Canada.

The rich green fields and the increasing foliage of the groves give pleasing evidence that spring has really come. We have had much cold weather and but little rain since winter left us, but this has not been altogether unfavorable to our farmers. A better season for tilling the ground and sowing seed has not visited our island for many years. There has been no interruption of any kind in this work, and many of our agriculturists have already about completed their planting operations.

Although markets have been discouraging during the past year and a good deal of material, such as oats and potatoes, remain unsold, yet our farmers have faith enough in the future to plant as largely as in previous years. They have learned by experience that years of overstocked markets are often followed by seasons of scarcity. In any case they have land to cultivate, and they must do something with it whether produce rates high or low. The ordinary method of raising miscellaneous crops seems to suit this country best, for there is usually a demand for some of these products, and the rest can be made use of in feeding stock or in other profitable ways.

Politics, bieveles and "bloomers" have

when once the disease gets hold upon the system it becomes chronic.

The political manis seems to be growing more marked as the weeks go by. Judging, by the crowds who gather from time to time to listen to the item to listen to the item to listen to the political leaders we are confident that few of our people are wholly free from some taint of the distemper. The symptoms are a little puzzling to the doctors themselves. No one can tell just how badly the popular body has become affected nor can we very safely predict what may be the issue of the matter. We shall all know by the middle of June.

As to the bicycles and the bloomers they are spreading more rapidly than the potatobugs. They bid fair to displace not only the old-fashioned steam cars but also the more advanced electric coaches. And the end is not yet. To see our sedate grandmothers sailing along on ainy wheels like spirits from another world, and clad in the bifurcated style of clothing recently adopted, awakens serious questionings as to what

BRIEF Sojourner.

BRIEF

Quietly and uncetentatiously, but none the less effectually, the great Dominion on our northern frontier is taking its place among the foremost nations of the world. English writers have described it as the re-juvenated Anglo-Saxon. Germans point to its stability, which makes it especially valu-able to investers who care more for certain luvenated Angle Saxon. Germans point to its stability, which makes it especially valuable to investers who care more for certain than large returns on their capital. But the most flattering recognition of Canadian work comes from Spain. Among the Spaniards who are just emerging from the lethargy of century, Canada is regarded as an instance of what a colony can become under proper management, and many writers of note advise the reconstruction of the government of Cuba on Canadian lines. Adolpho Posada, professor of political economy at the University of Oviedo, has a paper on this subject in the Espana Moderna. We summarize his article as follows:

Hasty persons persist in believing that social ills can be cured by the application of some political panaecas, some form of government which they judge only by the excellent results obtained in the country of its origin. We have a typical case in the Cuban

some political panacea, some norm of government which they judge only by the excellent results obtained in the country of its origin. We have a typical case in the Cuban question. The difficulties of the situation in Cuba, in a great measure caused by our traditional errors and our backwardness, naturally calls for a solution. "What is to be done," is the universal cry, "to furnish Cuba with a prosperous policy? What kind of rule will ensure progress and peace effectively?" People are gradually convinced that Cuba must have some prudent measure of autonomy, with more or less liberty. But the idea of autonomy, easy enough to express in a theoretical way, is far less easy to carry out practically. In principle, political autonomy is expressed by the English self-government, and means the right of a certain social entity to administer its own affairs, while yet it remains within a larger, and, in some respects, superior organization. Our eyes are naturally turned towards Canada. Rightly or wrongly, the impression has gone abroad that the pearl of the Antilles must be governed like Canada. The idea is seductive enough. The Dominion is certainly a strong argument in favor of autonomy, a beautiful case in point.

Canada has passed through terrible crises, has had its internal dissensions, has not been free from bloody uprisings, and looks back upon periods when its political existence was in great danger. But Canada has now established herself as a State within a State, has become a semi-national power, is strong, prosperous, and a veritable school of parliamentarian usages—all under autonomical government. Clearly, all Canada's prosperity is not due solely to reforms in political organization. It could not have been accomplished without the brave spirit within the race, fit to raise great empires. Much is also due to Canada's geographical situation, and so less to the excellent process.

the race, fit to raise great empires. Much is also due to Canada's geographical situation, and no less to the general progress of the world."

While thus the writer showers praise upon of slow growth and the result of much patient labor. He also explains that Canada, though rather than weakness to the Mother Contry.—Translated for the Literary Digest.

Devastating Cyclone. The city of St. Louis, Mo., was visited by one of the most disastrous cyclones ever known in that section of the country on Wednesday afternoon last. Some 500 per-sons were killed, 1,000 injured, buildings and bridges were totally destroyed, and gen-eral havoc met the vision wherever the eye

real havoc met the vision wherever the eye rested.

The wharves on the side of the river is a desolation. Steamboats, wharf boats and barges were swept from their fastenings almost in a solid phalanx and cast adrift. Some were overturned and sank, others were blown across the river and crushed against the other side. So destructive was the cyclone and so rresistible and so much greater in magnitude known of, that some of the star known of, that some of the staunchest busi-ness blocks went down before it. Iron beams were torn from their fastenings and carried blocks away as if they were feathers. The town of Rennick, in Randolph county, was blown away and several persons killed.

Loss of a Norwegian Barque.

About midnight, on the 26th, a Norwegian barque, bound for Miramichi, was totally wrecked half a mile from the fog whistle on St. Paul's Island, during a heavy sea and thick fog. The captain, first and second mates, and three seamen were drowned. The fatal accident was caused by the carpenter, who was at the wheel. The captain ordered the helm "hard to port," but he put it to "starboard." The first mate was washed on the rocks and then off again by the next sea, after saying a short prayer, the next sea, after saying a short prayer,-

st in which her grandmothers excelled when life was as simple as rushlights and rag carpets. Just now it is needlework. Fancy work, so-called, ran itself into the ground a few years ago. So much of it was devoid of all fancy, and so hopelessly inartistic and senseless, that there was a revulsion of feeling against the entire kit and boodle of notions with which women had been employing their fingers in odd minutes. When the athletic fever was first epidemic among women, fancy work was scorned and scoffed out of sight. A good deal of it will ever come back. The tidies that protected nothing, the bows that tied nothing to porelain, the painted placques that produce vorse shivers than tea-store prize chromos they are gone, even from the backwoods, where the women are learning that decor ated kitchen utensils and "throws" are no Excessive Tea-Drinking.

The indiscriminate indulgence of one's appetite for a good cup of tea is to be deplored. In such cases we have no means of measur ing the amount of the active principle taken nto the system, except as the resulting symptoms are indicative of a nervous distur-

In Japan, where the inhabitants live chiefly on fish and rice, and drink nothing but tea, nervous troubles are very prevalent, and

It has been found that the active principle of coffee, while identical with that of tea, is chemically not so active. more substantial and less stimulating.

The pocket question for women's gowns is a little more satisfactorily settled this season than usual. In the full plaits at the back and slightly at the side of the fashionable. skirt, it is possible to put a pocket, and with the revival of belts to a degree not known for several seasons, the manufacturers have shown a kindly appreciation of the pocket

To many of the belts are attached small purses, varying in size from the tiny one uitable for change to the bill and card purse. A genuine novelty which is provided for the bicyclist, but is not copyrighted by that fortunate woman, is a little pouch of netted cord, which fastened to the belt, and with a spring opening, is a safe receptacle for purse or handkerchief, or both.

"Will it pay?" should be the first question sked when looking over the old clothes with use then let the garment go and buy a new one. If time will permit, then consider whether the garment will look well enough when completed to be satisfactory. Will it have a shabby, made-over look, and if so, will a quantity of new material remove that objection? Then consider the expense of the new goods, make a few figures if necessary and once deciding that it is a paying inves ment, rip, cleanse and make, with a hearty
