

EUROPEAN INTELLIGENCE.

FIVE DAYS LATER FROM EUROPE.

Arrival of the Peruvian at Father Point.

FATHER POINT, Aug. 20.—The steamship Peruvian, from Liverpool at 4.30 afternoon of the 11th inst., and Londonderry 12th for Quebec, arrived off this point at 6 o'clock this afternoon.

The steamship Danusca from Quebec, and the Kangaroo from New York, arrived out on the 3rd, and the American and Edinburgh from New York, on the 10th.

At the Liverpool Assizes three men named Cunningham, Buchanan and Campbell were tried for a breach of the foreign enlistment act in having procured men to serve on board the rebel steamer Rappahannock. The prisoners were found guilty, but were liberated on their own recognizance in the sum of 150 pounds sterling, each. The Judge intimated that if the men should be charged with a breach of the enlistment act a second time they would be severely dealt with.

The little schooner Vision, bound from New York to London, was spoken July 29th, in lat. 45 10, lon. 33, and supplied with provisions and water.

The Morning Herald believes that the Danish Minister in London has been recalled, and that the vacancy will not be filled by the Danish Government, thinking it sufficient to maintain one first-class mission. In that case the Danish Ambassador at Paris will attend to important business in England.

Mr. Bateman, the father of the American actress, Miss Bateman, had been brought before a Magistrate in London, charged with an assault on a lady growing out of a theatrical scandal. The case was sent up for trial.

FRANCE.—It was rumored in Paris that the French Government had entered a protest against the extension of Prussian territory, except under the consent of the Powers who traced the boundaries.

The Bank rate remains at 8 per cent. Consols on the 10th were firmer.

Kidnaping a British Seaman.

At the Thames police court, on Thursday, George La Pierre, a seaman, came before Mr. Paget for redress under very singular circumstances. He went out in the English ship Universe, to New York. One day he went on shore in New York with the third mate, who got tipsy and made a noise. He was leading the third mate along, with the intention of returning to their ship, when the police interfered, and took the third mate into custody and locked him up for making a noise. At the same time several runners and crimps attacked him and beat him, and, having overpowered him, took him to a house, where they kept him a close prisoner all night, and in the morning forced him on board the American ship Caroline Nasmyth. He was compelled to remain on board by the captain and chief mate, to whom he represented that he was the boat-swain of the Universe, was afflicted with a bad leg, and unable to do any hard work. The captain said he did not care about his leg, and that all he wanted was his body, that he had paid men to bring him on board, and that he must work on the voyage to England. He agreed in the Victoria Dock on Wednesday, and asked for his services. The captain refused to pay him anything, and he had now come on shore to seek redress and compensation for a gross act of injustice and oppression.

Mr. Paget asked the applicant if he had any articles of agreement on board the Caroline Nasmyth, to which he answered in the negative and said he had no other clothes but what he stood upright in. In answer to further questions by the magistrate, the applicant said all his clothes were on board the Universe, which had arrived at Liverpool. His wife had applied for his chest, hammock, and clothing, which were on board the Universe, at Liverpool, and the reply of the captain was that he knew nothing about them.

Mr. Paget could not help thinking it was a very hard case on the man. He was afraid he could not interfere in the matter. If the Caroline Nasmyth was an English vessel he would grant a summons for wages. He had no jurisdiction over American ships. With regard to the clothes on board the Universe, he would recommend La Pierre to write to his wife at Liverpool, and direct her to apply to Mr. Raffles, the stipendiary magistrate there, who would render every possible assistance.

The Applicant.—What am I to do here? I have no means of living, and no money. Mr. Paget advised the seaman to wait on the American Consul and represent his grievances to him.

The seaman then left, and at six o'clock in the evening returned and said the American Consul refused to give him any redress, and only laughed at him. The consul threatened to have him arrested and sent back to the Caroline Nasmyth again.

Mr. Paget said that could not be done, and he would take care the sailor was not arrested or kidnaped in his own country. He directed Police-constable Howland, who is attached to the court, to take charge of the seaman to provide him food and lodging, and to make very particular inquiries into all the circumstances of the case, and report to him the result.

The applicant then left with the officer.

DECIDEDLY COOL.—A few of the Editors in this State were invited to accompany the Congressional Pleasure Excursion just as it was about to start, when it was entirely too late to accept, if any one had a desire to do

so—but the most of them were not even thus honored (?). The publisher of one of the best and most influential Country newspapers in the State was one of the latter class, was politely informed by one of the official managers of the concern, that "they would like to have invited all the Maine Editors, but they had to discriminate." Concluding language to be addressed to one who was discriminated against, and most decidedly cool. —Portland Courier.

FROM THE STATES.

Boston, Aug. 20.

To-day brings a batch of rumors from the Upper Potomac one that Sheridan has been repulsed by Early and recrossed the Potomac, another that the rebels were destroying the railroad near Winchester.

The rebel force is stated at 40,000 infantry and 15,000 cavalry.

Little reliance is placed on these rumors. Advertis from Mississippi report that the rebel Forrest had been badly whipped by Gen. A. J. Smith.

The Tribune's correspondent with General Grant under date of the 18th, predicts immediate action on a grand scale.

Richmond papers had despatches from Atlanta to the 5th; they acknowledge that Federal shot and shell are causing great damage in the city.

The rebel guerrilla forces in Western Kentucky have been broken up and dispersed. Gold 25 1/2.

Aug. 22nd.

The Peruvian at Father Point brings dates to the 12th.

There is no political news worth telegraphing. Bank rate remained at 8 per cent. Consols 84 1/2.

Flour quiet and steady. Mixed Corn thirty-shillings. Provisions quiet.

Official despatches from Grant are to the effect of Friday.

The 5th Corps had marched to the south of Petersburg and seized the Weldon railroad; the enemy made a desperate assault to retake the road, but were repulsed with heavy loss.

The Federals were busy destroying the track.

The rebels had also made an unsuccessful assault on the Federal lines north of the James, in which their loss is reported at 1000. In this affair the colored troops fought with great bravery.

The reported defeat of Sheridan is confirmed. Gold 25 1/2.

Boston, Aug. 23.

The reported Federal loss in holding Weldon Railroad is 3,000, of whom 1,500 were taken prisoners.

At last accounts Gen. Warren had been reinforced, and held possession.

Mobile dates of 13th state that Federal land forces were entrenching within 500 yards of Fort Morgan. All non-combatants had been required to leave Mobile.

Blockade runner Prince Albert, led by destroyed by Federal guns in attempting to enter Charleston.

Richmond papers say that several iron-clad privateers in North Carolina waters are about ready for sea.

Nothing later from Sheridan.

Rumors says that Early has been reinforced by 20,000 men drawn from Lee's army. Cotton advanced yesterday to 18 1/2. Gold opened at 25 1/2.

The Richmond Examiner says:—"In viewing the whole military horizon within the scope of our telescope, we have every reason to hope a favorable termination to the campaign, and a demonstration to the enemy that he can only expect to conquer the South after he shall have slain her last defender, and involved himself in a common ruin."

A correspondent of the Atlanta Appeal narrates the annexed fiendish outrage:

A body of Yankees went to the residence of Mr. Wm. Iverson, who lives about sixteen miles north of Decatur, Georgia, on last Saturday, and after destroying his effects content, laid hands on his daughter, about sixteen years of age, and, by force, once after another, satisfying their heinous lust. Her father attempted to take her from them. They then set on him with clubs, which soon disabled the old man, and he has not been able to turn himself since, and in all probability, will die of his injuries. This beautiful and virtuous young lady expired before they left. The Yankees came back next morning and dug a hole near the well, in the yard, and put the corpse in and covered it.

The Richmond Examiner declares the campaign of Virginia abandoned.

"Now to put aside for the present the total loss of what Yankees fondly believed to be their conquests in the trans-Mississippi, pretermittting also the dead lock to which Sherman's army has been brought, with all Kentucky, Tennessee, and half of Georgia lying between him and his own country—and looking only to this most colossal invasion of Virginia with three huge armies all bound at once for Richmond—the thing is over; Grant's army is rapidly going away from our front at Petersburg and returning to Washington or elsewhere. Of course Grant will not put up a notice on the shore of the Appomattox that he hereby abandons the enterprise; neither will Stanton officially notify that the armies of the "Union" are found wholly unable to advance one yard out of the protection of their ships, and therefore they discontinue the campaign with the loss of one hundred and fifty thousand killed, wounded and missing. This would be unreasonable to expect; nevertheless the enterprise is abandoned, and this is necessarily, so far as Lincoln is concerned, a final abandonment; Richmond is no more to hear

the roar of Yankee siege guns under that potentate's reign."

The Tallahassee at Halifax.

The Halifax Chronicle gives the following description of the Tallahassee as she appeared at that port:—

The Tallahassee is an iron steamer about 600 tons burthen, has a powerful engine, and is furnished with two screws, and is the swiftest ocean steamship in the Confederate service, being capable, under heavy pressure of steam of making from 18 to 20 miles an hour. Her sides and smoke stacks are painted white and her bottom red. She carries two formidable swivel guns, one at the bow and another at the stern, and a piece of brass ordnance of smaller calibre forward for hermast. The Tallahassee is commanded by Captain John Taylor Wood, said to be a nephew of Jefferson Davis, President of the Confederate States, and has a crew of upwards of one hundred men. This cruiser appears to be well officered, and judging from the appearance of things good discipline is maintained on board. The engines, we were informed by one of the officers, are under the control of the best and most experienced engineers whose services it was possible to secure, and the fire-department is most efficiently managed. In the cabin are a large number of ships' chronometers, and a variety of valuable articles, including many swords and small arms.

On nearing the Halifax Harbour, on Wednesday night, the Tallahassee sight the steamer Franconia from this port for Prince Edward Island, but the commander of the former, presuming that the latter was a British mail and passenger vessel, did not molest her. Had the cruiser not been about, it is probable the world would have met with and destroyed many more vessels in the vicinity of Cape Sable, but in consequence of the small quantity of fuel on board the captain was reluctantly compelled to make direct for this port to procure a supply, and was therefore not in a position to justify him in spending much time in searching for shipping, although he captured every Federal vessel he met with in his course from Wilmington to this city.

Yesterday evening the Tallahassee took on board a large quantity of coals from the Prussian brig Marie Griefswald. Soon after the cruiser arrived here the authorities communicated with her commander, notifying him that the vessel could not be permitted to remain here longer than twenty-four hours. One of the officers affirmed that crews of captured vessels, are always permitted to take with them, when landed, all their clothing and other personal property, —chronometers excepted which are kept as trophies,—in their possession at the time of seizure.

The Standard.

ST. ANDREWS, AUG. 24, 1864.

One out of many benefits arising from the Railway, is the opening up and settlement of the tract of country through which it passes. Along the line from Chamcook to Woodstock Station, new buildings are springing up, in addition to those previously noticed. The locality of Woodstock Station, the present terminus, is admirably adapted for a thriving village; the land is rich and fertile, well suited for farming operations, and the situation a good one for carrying on mercantile business. The land has been laid out in building lots, with wide streets running at right angles; and the lots can be purchased at a moderate price. A large new station building has been erected, and the direction of affairs appears to give general satisfaction. Our young townsmen Hanson Brothers have erected and in operation a respectable Hotel, which we understand is patronized and well conducted. They are energetic, smart men, although their premises were destroyed by fire a few months ago, and their loss was heavy, they set to work at once, and built their present commodious house. A Mr. Stevens, is building a store near the terminus; he is also about erecting a dwelling and other buildings. Mr. Blanchard of Woodstock, is also erecting a store, and there are other new houses being built. In fact the place is fast approaching the dimensions of a village, and as it is situated on the late Hillman farm—the place might not inappropriately be called HILMANTON.

The Congressional "Defence Committee" passed through this harbour last week, in the steam cutter Mahoning. The object of their visit "down east" is represented to be "to examine and report upon the Maine Frontier Coast Defences." Of course they would observe that on the New Brunswick side of the river and along the Provincial coast, there are no forts to repel the threatened attacks of the marauders after "this cruel war is over,"—and that the inhabitants were engaged in the peaceful pursuits of cultivating their crops and following other industrious callings, in blissful ignorance of any fear of attacks from any nations' privateers or gun boats. One of the Maine papers gravely observes "that the Committee have completely perverted the design of the Commission,

by inviting a large party to accompany them. To the people it looks like a huge excursion at the expense of the government." With this, we as colonists, have no concern; to treat the strangers with true British courtesy is our duty, and from St. John papers we learn that they met a welcome reception not only from their fellow-countrymen, who entertained them at a public dinner, but also from the public men and citizens generally; a special train was placed at their disposal, and a strip to Shediac with a good dinner given them. This is right.

AN EXCURSION TRAIN

will leave Richmond Station, next Saturday morning at 7 A. M. for this Town. It is to be hoped the day will be pleasant, and that there will be a goodly representation of our up-country friends. As the train will not return until 5 P. M., the excursionists will have several hours to spend in amusing themselves; a couple of hours fishing would be a novelty to many of them, and should they not be fortunate to catch a few haddock or mackerel, they can enjoy a good dinner of these delicious fresh caught fish, at the hotels, with prime lamb and mutton, or any other dish they choose, and something palatable to wind up with. A genial friend at our elbow says "that's so!"

LECTURE ON PHYSIOLOGY.

—Dr. O'Leary, from Canada, will lecture to-morrow evening in Paul's Hall, on Physiology, illustrated by French Manikins, Skeletons, and Paintings. The Doctor's popularity in his native Province, and many parts of the States, is highly spoken of by the papers. His style is said to be both pleasing and instructive, never wearying his audience, and frequently soaring into the sublimest heights of poetry in illustration of his theme.

BRASIL.

—We had the pleasure of receiving a letter from our friend Chas. Haslett, C. E., on the San Paulo Railway, who has been engaged on that great work for the last three years. He writes in glowing terms of the country and climate, and of the line on of the railway which will soon be completed. He mentions favorably some natives of this Province, engaged on the work, among whom is a young friend in whom we feel an interest. Mr. Haslett, will return to his family in St. Andrews, early next year.

We are happy to notice that the traffic and travel on the railway, is steadily increasing. Scarcely a trip the steamer Queen makes, that she does not bring traffic and passengers to the railway. The express train placed on the line by direction of the manager, to connect with the steamers to and from St. John and Boston, is a great accommodation, and source of profit to the road. The next move we trust will be, the mails for Woodstock and the upper country conveyed over the road, and the wire placed on the telegraph poles lately erected along the line.

Launched at Chamcook, on the 16th inst., from the building yard of John Townshend and Sons, a barque named the "Nellie," of 200 tons. Her length is 127 feet over all, 48 feet beam 11 feet 10 inches hold, 4 feet 8 inches between decks. She was built under French Lloyd's survey to class 5 years, and is owned by her builders.

On Saturday last, at 3 P. M., at Calais, Professor Lowe amidst a concourse of 3,000 spectators from both sides of the river St. Croix, ascended in his balloon, to the height of a mile and more, and then floated away in an easterly direction. The day was uncommonly fine, the atmosphere quite transparent, and as the balloon rose gracefully the shouts of the multitude rent the air. The whole scene was one of great interest and beauty. In less than an hour from the time of her departure she settled safely down at Oak Point, upon the English side, a distance of 6 miles from Calais. Professor Lowe is a very unassuming man, has considerable colloquial powers, and possesses very high scientific attainments. During the present war in America, he rendered important services to the Northern Army, and contributed much to the success at Malvern Hill. It is said that he intends to visit St. John and Fredericton the ensuing autumn; no doubt he will be fully appreciated at both places. —[Communicated.]

THE COMET.

—The Newburyport Herald says that on Thursday night, a little after 9 o'clock, a diffusely luminous body, (supposed to be the comet discovered by Mr. Hind, July 9,) was observed through the haze in the west, at an elevation of about 10 degrees above the horizon, in the constellation Virgo. The atmosphere was so hazy that it was difficult to locate it among the stars, otherwise than to say, that it formed with Jupiter and Arcturus a nearly equilateral triangle.

A Comparative Statement of Revenue collected at St. Andrews, for the Quarter ending July

Table with 3 columns: Item, 1863, 1864. Items include Railway Impost, Import duties, Export, Bay Fundy Light, Sick & dis. Seamen do., Cape Race Light, Buoys & Beacons. Total for 1863 is \$3281.78, for 1864 is \$4859.97. Increase is \$1578.19.

ITEMS.

—The rebel ram "Tennessee" recently captured in Mobile Bay, which mounts seven guns, will be used against its former owners.

—A correspondent of the Boston Transcript, speaking of the Grand Trunk Railroad says "the freight cars are marked G. T. R." which, dissipated state of the road is considered, may very appropriately be read "Going to ruin."

—The Boston Post says that in Massachusetts there are one hundred thousand more women than men.

—The hay crop in Aroostook county it is reported will prove better than anticipated, and in the State it will be more than an average.—Potatoes, oats, buckwheat, and root crops throughout the county promise an abundant yield.

—On the tenth of June last, the Crystal Palace had been opened ten years, and had been visited by fifteen millions of persons.

—It is finally determined that the breech-loading rifle is to be substituted for the Enfield in the British Army.

—Sir Robert Percy Douglas, eldest son of the late Sir Henry Douglas, has been appointed Governor of the Cape of Good Hope.

—A cocoa-nut tree in the garden of the Duke of Northumberland at St. House, a few miles from London, has produced a ripe nut. The first that is recorded in Europe.

DOWN LOW

Ye that are down low with disease, whose bodies are covered with Sores; Ulcers, Noces, with swollen Glands and Joints, with Salt Rheum, Skin Eruptions, who are banished from the companionship of the beautiful and healthy, who are debarr'd the joys and pleasures of life—rejoice—for a cure is offered you, in

DR. RADWAY'S RENOVATING RESOLVENT, that will rid you of your disease, and restore you to health and the society of your friends.

If afflicted with Scrofulous, Chronic Disease, Syphilis, Ulcers, Fester Sores, Skin Eruptions, White Swelling, Rickets, Pimples, Tetter, use Radway's Renovating Resolvent, this remedy will cure you. Price \$1 per bottle. Sold by Druggists.

Notice.

On the 15th inst., by the Rev. W. G. Ketchum, M. A., Mr. William Shaw to Miss Mary Campbell, both of St. Andrews.

At the Manse, Scotch Ridge, on the 16th inst., by the Rev. John Turnbull, Mr. Robert Polley, to Miss Nancy C. Wetherby, both of Little Ridge, St. James.

Deaths.

At Deer Island on the 14th inst., at the advanced age of 105 years 10 months and 5 days, Mr. Joseph Conley, a native of Newark, New Jersey, and formerly a Pilot of this Port. His father, John Conley, one of the loyalists, settled at St. John, when there were but three or four houses where that city now stands.

At the Basswood Ridge, St. James, on the 14th inst. of Diphtheria, James J., only son of Mr. Thomas Robinson, aged 5 years and 4 months.

At the Pomory Ridge, on the 10th inst., of Diphtheria, Nelson, son of Mr. Stephen Hall, in the 5th year of his age.

WH. H. WILLIAMSON, Druggist.

RESPECTFULLY announces to the Inhabitants of St. Andrews and vicinity, that he has resumed his former business of a Druggist, in the shop formerly known as Dr. Gove's Medical Hall, adjoining the Union Store, Water Street, where he is prepared to make up Physicians prescriptions, and medicines for cattle &c.

He has also for sale Drugs, Chemicals, Family and Patent Medicines, Perfumery, Toilet articles, Spoons, oils, Varnish, Glass, putty, &c. Every shade of paint prepared for use. The whole will be sold low for cash. American money taken at a discount. — Aug 24

Small Farm to Let, and Land

for Sale, adjoining the Town of St. Andrews, commonly called the "Hatch Farm."

TO LET possession the lot of May next, the Cottage at present occupied by Mr. Thomas Trudell, the Barn, and about 25 acres of land.

ALSO.—For Sale that part of the Hatch Farm fronting on Harriett Street, and the Road leading to Joe's Point, containing about 25 Acres; the said Property will be sold in one Lot, or in two to suit purchasers. Terms 20 per cent down, balance in four annual payments with interest.

Should the above Property not be sold by the 15th September, it will be let in parcels to suit applicants. Offers for the above Farm, and for the purchase of the land will be received by the Subscribers. — St. Andrews, Aug. 24, 1864. — D. GREEN.

Public Notice.

POST OFFICE DEPARTMENT, Fredericton, August 4, 1864.

In future, a uniform Rate of Postage of 10 cents per half ounce will be charged upon all Letters addressed to any part of the United States, without regard to distance. — JAS. STEADMAN, P. M. G. Aug 15—31

## Poetry.

HERBERT LLEWELLYN.  
SUNSHINE TO THE ALABAMA.

The following poem has been sent us for publication by the author, a distinguished provincial Physician.—When a boat filled with the wounded was pushing off from the ship, which appeared about to founder, the men appealed to "the Doctor" to jump on board and save himself; but that noble and devoted man refused, saying, "that the boat was only for the wounded, and he would not endanger them by entering them, ever laden vessel." Herbert Llewellyn went down with the Alabama.

HERBERT LLEWELLYN! A name  
That will long be honored in story;  
For hallowed and high is the fame  
Of that noble "non-combatant" glory.  
Of sea-fight had now ceased to rage,  
But the shattered ship's flag was yet flying—  
In the combat he did not engage,  
He was tending the wounded and dying.  
A glory in youth or in age,  
To succor the sick and the dying,  
But bravest before all the brave,  
He cared not his own life to save,  
He cared for the wounded and dying.

Herbert Llewellyn, he stood  
On the deck of his ship—she was sinking;  
But calm and undaunted his mood,  
Of the wounded alone he was thinking.  
That bold, able Surgeon, with hand  
Ever ready to render assistance,  
How the wounded to save he now planned,  
When his ship could no more make resistance.  
A boat, on the instant, is manned,  
Since the ship can no more make resistance.  
With the wounded that boat is now full,  
"Give way, comrades pull, comrades pull,  
For our ship can no more make resistance.

Herbert Llewellyn! beware,  
"Doctor," all cry, you must perish,  
A berth in our boat we must spare  
To save one who no honour and cheer;  
Leap in! But the Doctor replied,  
"As he stood there all fearless and lonely,  
"For the wounded that boat was supplied,  
And that boat is for wounded men only.  
For their safety it was to provide,  
For the safety of wounded men only.  
Death and danger to him were as naught,  
'Twas the safety of others he sought;  
And the boat was for wounded men only.

Herbert Llewellyn went down  
With his ship, in the deep-seething water,  
But such death has a higher renown,  
Than to be adding heaps to his slaughter.  
Must the red death of battle alone  
Claim praises from valor and beauty?  
Is not a more true courage shown,  
When calmly man meets death as duty?  
Has he not more rare courage known,  
Who calmly met death as his duty?  
Herbert Llewellyn, thy name  
Is hallowed upon undying fame.  
So calmly did thou meet death as thy duty,  
Tongue, June 20. R. T. EX.

## JOHN CLARKE'S FORTUNE.

"Never mind the whisper, John; we've got one of our own," he whispered John Clarke's wife.  
She was a rosy little thing, only twenty years old. How brightly and bewitchingly she shone!—a star amid the sombre company.  
"But what in the world has he left me?" muttered John Clarke. "I believe he hated me—I believe they all hate me."  
"Hush dear!" said his wife.  
"I bequeath to John Clarke, my dearly beloved nephew," read the grim attorney, "a reward for his services in resisting the declaration during the last two years and his determination to improve in all acceptable things, my one-horse chaise, which has stood in my barn for more than twenty-five years, requesting that he will repair it, or cause it to be repaired in a suitable manner."  
That was all. Some of the people who were present uttered, and all seemed to enjoy the confusion of the poor young man.—His eyes flashed fire, he trembled excitedly; poor little Jenny fairly cried. "To think," she said to herself, "how hard he has tried to be good, and that is all he thought of it!"  
"Wish you joy!" said a red-headed youth with a grin, as he came out of the room.  
John sprang up to collar the fellow; but a little white hand, laid on his arm, restrained him.  
"Let them triumph John, it won't hurt you," said Jenny, with her sunny smile; "pray don't notice them, for my sake."  
"Served him right," said Susan Spriggs,

the niece of the old man just dead, and to whom he had left a good deal of his money; served him right for marrying that ignorant goose of a Jenny Baxter. I suppose he speculated a good deal on the old gentleman's generosity." To which she added, "a whipper that only her own heart beat, she might have married me. He had the chance, and I loved him better than any one else—better than that little simpleton Jenny Baxter."  
"Now we shall see how deep his goodness is," said a maiden aunt. "He became very pious just because he expected a fortune from my poor dear brother; but we shall see how much of a change there is in John Clarke—he always was an imp of wickedness."  
"Well, I think John Clarke'll have to be contented with his little cottage," said the father of Susan Spriggs, to good old Joseph Hepp.  
"Well, I think he is content; if he isn't he ought to be, with that little jewel of a wife," was Joe's reply.  
"Pshaw! you're all crazy about that gal," said Spriggs. "Why, she ain't to be compared to my Susan. Susan plays on the forty piano like a saint, and manages a house first rate."  
"Hush you, neighbor Spriggs, I'd rather have that innocent, blooming face to smile at me when I waked up of mornings than all the forty piano gals!"  
"I'd like to know what you mean?" exclaimed Mr. Spriggs frowning up.  
"Just what I say," replied Joe coolly.  
"Well, that John Clarke'll die on the galows yet, mark my words," said Mr. Spriggs spitefully.  
"That John Clarke will make one of our best men yet," replied old Joe complacently.  
"Doubt it," said Mr. Spriggs.  
"Yes, may be you do," said Joe; "and that's a pretty way to build up a young fellow, isn't it, when he's trying his best? No John Clarke won't be a good man, it you can help it. People that cry 'mad dogs' are plying will to stifle the animal while he's running; and if he ain't mad they're sure to drive him so. Why don't you step up to him, and say, 'John I am glad you're getting right now, and I've got faith in you; and if you want any help, why, come to me, and I'll assist you? That's the way to do the business, Mr. Spriggs.'"  
"Well, I hope you'll do it, that's all, really, I hope I shall, and I'm bound to do, if he has the chance. Fact is, he's got such a smart little wife that he don't really need any help."  
"No—'tis a pity then that brother Jacob left him that one-horse chaise."  
"Yes, may be you do," said Joe; "and that's a pretty way to build up a young fellow, isn't it, when he's trying his best? No John Clarke won't be a good man, it you can help it. People that cry 'mad dogs' are plying will to stifle the animal while he's running; and if he ain't mad they're sure to drive him so. Why don't you step up to him, and say, 'John I am glad you're getting right now, and I've got faith in you; and if you want any help, why, come to me, and I'll assist you? That's the way to do the business, Mr. Spriggs.'"  
"Well, I hope you'll do it, that's all, really, I hope I shall, and I'm bound to do, if he has the chance. Fact is, he's got such a smart little wife that he don't really need any help."  
"No—'tis a pity then that brother Jacob left him that one-horse chaise."  
"Yes, may be you do," said Joe; "and that's a pretty way to build up a young fellow, isn't it, when he's trying his best? No John Clarke won't be a good man, it you can help it. People that cry 'mad dogs' are plying will to stifle the animal while he's running; and if he ain't mad they're sure to drive him so. Why don't you step up to him, and say, 'John I am glad you're getting right now, and I've got faith in you; and if you want any help, why, come to me, and I'll assist you? That's the way to do the business, Mr. Spriggs.'"  
"Well, I hope you'll do it, that's all, really, I hope I shall, and I'm bound to do, if he has the chance. Fact is, he's got such a smart little wife that he don't really need any help."

to be pulled down, so he sent your shay," said the laborer.  
"Thank him for nothing," said John, bitterly; but a glance at his wife, removed the evil spirit, and a better one smiled out of his eyes.  
"John, you can spare a little money now to have the old chaise done up, can't you?" you ought to, according to the will," said Jenny.  
"The old trash," muttered John.  
"But you could at least sell it for what the repairs would cost," said Jenny, in her winning way.  
"Yes, I suppose I could," said John.  
"Then I'd have it done," said Jenny, "and bless me, I'd keep it, too. You've got a good horse, and can have the old chaise made quite stylish for baby and me to ride in."  
"Well, I'll send it over to Hosmer's tomorrow, and see what he will do for it," said John.  
"Look here! Mr. Hosmer wants you to come over to his shop," shouted the wheelwright's apprentice on the following day, at the top of his lungs.  
"Old Joe Hepp's there; an' says he's right down glad. It's hundreds, and hundreds, and hundreds."  
"Stop, boy! what in the world does he mean, Jenny?" cried John Clarke, putting the baby in the cradle, face downwards.  
"My premise, John, looked at the child—precious darling! I'm sure I don't know, John, I'd go over and see," exclaimed Jenny.  
"Taint any fun, I tell ye," said the boy, while John hurried on his coat and hat; "my gracious! you'll say it ain't fun when you come to see them gold things and the papers."  
This added wings to John Clarke's speed, and in a moment he stood breathless in the old wheelwright's shop.  
"Wish you joy, my fine fellow!" cried Joe Hepp.  
"Look here! what'll you take for that old chaise? I'll give you four hundred!" cried the old wheelwright, in great glee.  
"Four hundred?" repeated John aghast.  
"Yes; just look at it! You're a rich man, sir; and, by Jove, I'm glad of it. You deserve to be," said the wheelwright, shaking John's hand heartily.  
"What do you suppose were the consternation, delight, gratitude—the wild, wild joy that filled the heart of Clarke, when he found the old chaise filled with gold and bank notes? I mean the cushions, the linings, and every place where they could be placed without danger of injury.  
Poor John!—'t was rather rich John—his head was fairly turned. It required all the balance of Jenny's nice equipage of character to keep his castled brain from spinning like a humming-top. Now he could build two houses like the one he uncle had bequeathed to his red-headed cousin, who had wished him joy when the will was read—the dear old uncle! What genuine sorrow he felt at the thought of the many times he had helped reproaches upon his memory!  
Imagine, if you can, dear reader, the peculiar feelings of those kind friends who had prophesied that John Clarke would come to grief. At first old Joe Hepp proposed to take the old chaise just as it was—linings, straps, and all, and to give him the gold and the claim with a trumpet the next day; but the whole village, taking especial pains to stop before the house of Mr. Spriggs, and blowing loud enough to drown all the forty-pianos in the universe; but that was vetoed by John's kind little wife.  
"Eh! they'll know it soon enough!" she said, kissing the baby; "I wouldn't hurt their feelings."  
They did know it; and a few years afterwards they all agreed that John Clarke had turned out a really good man. So much for that old one-horse chaise!

A NCESSARY ACCOMPLISHMENT.—Jenny June in her sensible book urges the necessity of cooking to the comfort of a family. She sees no beauty in delicate hands that can't knead the dough nor turn the stick. If anything in the world will make a man miserable it is the want of a good cook's dinner, and here she hits a truth.—She warns the ladies, the wives, that the desire loves bonnets, and lots of small change in the shape of five and ten, they must cook the best of dishes and regale their husbands with them. This may be very homely advice, but it has more to do with the comfort of a family than all the fine arts of music and dancing and crocheting and fiddling generally in the world. A woman who can't

troys without more than momentary pain. The mother is supposed to be partially deformed.

**THE YELVERTON CASE.**  
HOW MISS LONGWORTH RECEIVED THE JUDGMENT.

During the whole of the fourteen days that the arguments in the memorable Yelverton case lasted in the House of Lords, Miss Theresa Longworth, accompanied by her two lady friends, was to be daily seen at the back of the reporters' gallery, earnestly watching the proceedings. Of course, she naturally felt pleased with the reasoning of the Attorney-General, which were all in her favour, but she betrayed no emotion when Mr. Roll, with cutting criticism, analysed her evidence and her correspondence. On Thursday, however, she did not make her appearance in the house. She arrived on that day at the office of her attorneys, Messrs. Simson, Trail, and Wakeford in Abingdon-street, whose place of business is situated within a stone's throw of the grand entrance to the House of Lords, at ten o'clock, accompanied by her two lady friends, one of whom was said to be her sister. Here she waited in a state of most anxious inactivity as to the result. She had a tolerably clear idea; for somehow or other the fact had leaked out, as we stated in the "Mercury" of Wednesday, that the Lord Chancellor and Lord Brougham were in her favour. She was also equally aware that Lord Chelmsford and Lord Kingsdown were against her. But she was not certain about Lord Wensleydale. It was said that the latter noble and learned lord had wavered in his opinion since the case was heard, and that he was only brought over at the last moment to take the side of Major Yelverton by the plausible pleasings of Lord Chelmsford. Miss Longworth knew that he was wavering, but she was not made acquainted with the influence exercised upon him by his brother lord, and she was thoroughly aware that if Lord Wensleydale would give judgment in her favour the scale was at once turned, and the victory of her marriage with the major was established. Her grand object, then, on Thursday, was to ascertain, as she sat in the office of Simson and Co., how matters in the house were proceeding; and for this purpose she despatched one of her lady friends to the reporters' gallery. The Lord Chancellor rose at eleven o'clock, spoke until twelve, and then sat down upon the woolsack. Immediately after his conclusion the lady friend despatched a note across to Abingdon-street in these brief terms—"It is all right, the Chancellor is in your favour—Wensleydale is up." The impatience—then several reports of Miss Longworth's now at his height, found during the time Lord Wensleydale was speaking she sent two messengers across to the house to learn the drift of his argument. His lordship spoke in so low a tone of voice that it was impossible to gather the view he entertained until he had finished at eleven o'clock, and then the astounding fact was made apparent that he pronounced the Scotch marriage invalid. Instantly this momentous fact was conveyed across the street to Miss Longworth, and when it was communicated the effect was heart-rending. She burst into tears, sobbing loudly, and fell upon the floor in a state of utter unconsciousness. She swooned after swoon succeeded; the principals and clerks rendered all the assistance in their power, but nothing seemed to soothe or administer to her the slightest relief.—Now and again she rallied, and then impatiently asked to be informed of the final result, and when at length it was communicated to her as delicately as it could be, about two o'clock, namely, that there was a majority against her of three to one, or, if Lord Brougham had been present, of three to two, she dropped again from her seat, was removed on the shoulders of one of the bystanders to the brougham which was in waiting, and has since been confined to her room.—Liverpool Mercury, July 30.

**REVERIES FROM THE VALLEY.**  
The best talkers are not always the deepest thinkers. There is a mind of unexplored wealth in some people's minds—a fund of unexpressed knowledge and sense. This silent ones among us are not to be slighted or despised. There is some truth in the adage, "Still waters run deep." And if we were seeking friends, we would not choose them among those who wear all their feelings out side of us, of which we get a glibly of affection, &c.; who never hesitate for words when they are speaking on some subject sacred and dear to us. We would rather select a heart than a tongue. And there is often touching eloquence in silence. An unfinished sentence often tells us more than a whole array of properly spoken ones could do.

We are apt to judge from mere appearances. We believe what we hear, and will not take things on trust. Nevertheless, we often judge wrongly. There are wells of wealth and excellency lying still and deep beside us of which we little dream. There are during thoughts in many a silent breast passionate pleadings which cannot be out-poured in words—leaping, living desires, that struggle but cannot find utterance. These are hearts worth winning. Their silent language, flashing out now and then a little in the eye or the face, will repay the student a hundredfold.

Thoughts are the parents of deeds. Not a few grand and noble achievements come from men whom the world has called idle dreamers. They have not talked much, but their active minds have produced wonders enough to furnish conversation to more talkers by the score. Their thoughts have been definite, well arranged. They knew they were mighty powers for good or for evil, and used them as those who must give an account.

Nevertheless, there are idle dreamers far too many of them. Doubtless, precious hours are frequently wasted in listless, undefined, floating thoughts that do harm rather than good; while much good might be accomplished by spending the same time in work.

None of us are good thinkers who do not live better, act nobler, and work more earnestly, in consequence of our thoughts.

**PROVERBS OF THE BILLINGS FAMILY.**  
You don't swap with your relations unless you ken a way to give 'em the big end of the tarry.

Marry yung, and, if circumstances require it, often.

If you can't get fine cloaths, and education too, git the cloaths first.

command every minutiae of the process, from raw beef to the well flavored dish, is not worth a haund.

None of us are good thinkers who do not live better, act nobler, and work more earnestly, in consequence of our thoughts.

**PROVERBS OF THE BILLINGS FAMILY.**  
You don't swap with your relations unless you ken a way to give 'em the big end of the tarry.

Marry yung, and, if circumstances require it, often.

If you can't get fine cloaths, and education too, git the cloaths first.

Say how are you, to everybody.

Cultivate modesty, but mind and have a good stock of impudence on hand.

Be charitable—three-cent pieces were made on purpose.

Do not take anybody's advice except yer own.

It costs more to borrow than it does to pay.

If a man flatters you, ye can killicate he is a roag'er or a fool.

**WANTED.**  
A BOY from 14 to 16 years of age, who can read and write, to work at the Printing business. Apply at the STANDARD OFFICE.

EUROPEAN INTELLIGENCE.  
FIVE DAYS LATER FROM EUROPE.

Arrival of the Peruvian at Father Point.

FATHER POINT, Aug. 20.—The steamship Peruvian from Liverpool at 4.30 afternoon of the 11th inst., and Londonderry 12th for Quebec, arrived off this point at 6 o'clock this afternoon.

The steamship Damascus from Quebec, and the Kangaroo from New York, arrived on the 9th, and the American and Edinburg, from New York, on the 10th.

At the Liverpool Assizes three men named Cunningham, Buchanan and Campbell were tried for a breach of the foreign enlistment act in having procured men to serve on board the rebel steamer Rappahannock. The prisoners were found guilty, but were liberated on their own recognizances in the sum of 150 pounds sterling, each. The Judge intimated that if the men should be charged with a breach of the enlistment act a second time they would be severely dealt with.

The little schooner Vision, bound from New York to London, was spoken July 20th, in lat. 45 10, lon. 33, and supplied with provisions and water.

The Morning Herald believes that the Danish Minister in London has been recalled, and that the vacancy will not be filled by the Danish Government, thinking it sufficient to maintain one first-class mission. In that case the Danish Ambassador at Paris will attend to important business in England.

Mr. Bateman, the father of the American actress, Miss Bateman, had been brought before a Magistrate in London, charged with an assault on a lady growing out of a theatrical scandal. The case was sent up for trial.

FRANCE.—It was rumored in Paris that the French Government had entered a protest against the extension of Prussian territory, except under the consent of the Powers who traced the boundaries.

The Bank rate remains at 8 per cent. Consols on the 10th were firmer.

Kidnaping a British Seaman.

At the Thames police court, on Thursday, George La Pierre, a seaman, came before Mr. Paget for redress under very singular circumstances. He went out in the English ship Universe, to New York. One day he went on shore in New York with the third mate, who got tipsy and made a noise. He was leading the third mate along, with the intention of returning to their ship, when the police interfered, and took the third mate into custody and locked him up for making a noise. At the same time several runners and crimps attacked him and beat him, and, having overpowered him, took him to a house, where they kept him a close prisoner all night, and in the morning forced him on board the American ship Caroline Nasmyth. He was compelled to remain on board by the captain and chief mate, to whom he represented that he was the boat-swain of the Universe, was afflicted with a bad leg, and unable to do any hard work. The captain said he did not care about his leg, and that all he wanted was his body, that he had paid money to bring him on board, and that he must work on the voyage to England. He arrived in the Victoria Dock on Wednesday, and asked for his services. The captain refused to pay him anything, and he had now come on shore to seek redress and compensation for a gross act of injustice and oppression.

Mr. Paget asked the applicant if he had any articles of agreement on board the Caroline Nasmyth, to which he answered in the negative and said he had no other clothes but what he stood upright in. In answer to further questions by the magistrate, the applicant said all his clothes were on board the Universe, which had arrived at Liverpool. His wife had applied for his chest, hammock, and clothing, which were on board the Universe, at Liverpool, and the reply of the captain was that he knew nothing about them.

Mr. Paget could not help thinking it was a very hard case on the man. He was afraid he could not interfere in the matter. If the Caroline Nasmyth was an English vessel, he would grant a summons for wages. He had no jurisdiction over American ships. He had regard to the clothes on board the Universe, he would recommend La Pierre to write to his wife at Liverpool, and direct her to apply to Mr. Raffles, the stipendiary magistrate there, who would render every possible assistance.

The Applicant.—What am I to do here? I have no means of living, and no money.

Mr. Paget advised the seaman to wait on the American Consul and represent his grievances to him.

The seaman then left, and at six o'clock in the evening returned and said the American Consul refused to give him any redress, and only laughed at him. The Consul threatened to have him arrested and sent back to the Caroline Nasmyth again.

Mr. Paget said that could not be done, and he would take care the sailor was not arrested or kidnaped in his own country. He directed Police-constable Howland, who is attached to the court, to take charge of the seaman to provide him food and lodging, and to make very particular inquiries into all the circumstances of the case, and report to him the result.

The applicant then left with the officer.

DECIDELY COOL.—A few of the Editors in this State were invited to accompany the Congressional Pleasure Excursion just as it was about to start, when it was entirely too late to accept, if any one had a desire to do

so—but the most of them were not even thus honored (?). The publisher of one of the best and most influential Country newspapers in the State who was one of the latter class, was politely informed by one of the official managers of the concern, that "they would like to have invited all the Maine Editors, but they had to discriminate." Consoling language to be addressed to one who was discriminated against, and most decidedly cool. —Portland Courier.

FROM THE STATES.

Boston, Aug. 20. To-day brings a batch of rumors from the Upper Potomac one that Sheridan has been repulsed by Early and recrossed the Potomac, another that the rebels were destroying the railroad near Winchester.

The rebel force is stated at 40,000 infantry and 15,000 cavalry.

Little reliance is placed on these rumors. Advertisers from Mississippi report that the rebel Forrest had been badly whipped by Gen. A. J. Smith.

The Tribune's correspondent with General Grant under date of the 18th, predicts immediate action on a grand scale.

Richmond papers had despatches from Atlanta to the 6th; they acknowledge that Federal shot and shell are causing great damage in the city.

The rebel guerilla forces in Western Kentucky have been broken up and dispersed. Gold 256.

Aug. 22nd. The Peruvian at Father Point brings dates to the 12th.

There is no political news worth telegraphing. Bank rate remained at 8 per cent. Consols 89 1/8.

Flour quiet and steady. Mixed Corn thirty shillings. Provisions quiet.

Official despatches from Grant are to the evening of Friday.

The 5th Corps had marched to the south of Petersburg and seized the Waldon railroad; the enemy made a desperate assault to retake the road, but were repulsed with heavy loss.

The Federals were busy destroying the track.

The rebels had also made an unsuccessful assault on the Federal lines north of the James, in which their loss is reported at 1000. In this affair the colored troops fought with great bravery.

The reported defeat of Sheridan is confirmed. Gold 256 1/2.

Boston, Aug. 23. The reported Federal loss in holding Waldon Railroad is 3,000, of whom 1,500 were taken prisoners.

As last accounts Gen. Warren had been reinforced, and held possession.

Mobile dates of 13th state that Federal land forces were entrenching within 500 yards of Fort Morgan. All non-combatants had been required to leave Mobile.

Blockade runner Prince Albert led been destroyed by Federal guns in attempting to enter Charleston.

Richmond papers say that several iron-clad privateers in North Carolina waters are about ready for sea.

Nothing later from Sheridan.

Rumors says that Early has been reinforced by 20,000 men drawn from Lee's army. Cotton advanced yesterday to 185.

Gold opened at 257.

The Richmond Enquirer says:—"In viewing the whole military horizon within the sweep of our telescopes, we have every reason to hope a favorable termination to the campaign, and a demonstration to the enemy that he can only expect to conquer the South after he shall have slain his last defender, and involved himself in a common ruin."

The Tallahassee at Halifax.

The Halifax Chronicle gives the following description of the Tallahassee as she appeared at that port:—

The Tallahassee is an iron steamer about 500 tons burthen, has a powerful engine, and is furnished with two masts, and is the swiftest ocean steamship in the Confederate service, being capable, under heavy pressure of steam, of making from 18 to 20 miles an hour. Her sides and smoke stacks are painted white and her bottom red. She carries two formidable swivel guns, one at the bow and another at the stern, and a piece of brass ordnance of smaller calibre forward for her mast. The Tallahassee is commanded by Captain John Taylor Wood, said to be a nephew to Jefferson Davis, President of the Confederate States, and has a crew of upwards of one hundred men. This cruiser appears to be well officered, and judging from the appearance of things good discipline is maintained on board. The engine, under the control of the boat and most experienced engineers whose services it was possible to secure, and the fire department is most efficiently managed. In the cabin are a large number of ships' chronometers, and a variety of valuable articles, including many swords and small arms.

On nearing the Halifax Harbour, on Wednesday night, the Tallahassee sight the steamer Franconia from this port for Prince Edward Island, but the commander of the Franconia, presuming that the latter was a British mail and passenger vessel, did not molest her. Had the cruiser not been short of coals she would doubtless have met with and destroyed many more vessels in the vicinity of Cape Sable, but in consequence of the small quantity of fuel on board the captain was reluctantly compelled to make direct for this port to procure a supply, and was therefore not in a position to justify him in spending much time in searching for shipping, although he captured every Federal vessel he met with in his course from Wilmington to this city.

Yesterday evening the Tallahassee took on board a large quantity of coals from the Prussian brig Marie Griefswold. Soon after the cruiser arrived here the authorities communicated with her commander, notifying him that the vessel could not be permitted to remain here longer than twenty-four hours. One of the officers affirmed that crews of captured vessels, are always permitted to take with them, when landed, all their clothing and other personal property, —chronometers excepted which are kept at trophies,—in their possession at the time of seizure.

YESTERDAY evening the Tallahassee took on board a large quantity of coals from the Prussian brig Marie Griefswold. Soon after the cruiser arrived here the authorities communicated with her commander, notifying him that the vessel could not be permitted to remain here longer than twenty-four hours. One of the officers affirmed that crews of captured vessels, are always permitted to take with them, when landed, all their clothing and other personal property, —chronometers excepted which are kept at trophies,—in their possession at the time of seizure.

by inviting a large party to accompany them. To the people it looks like a huge excursion at the expense of the government. With this, we as colonists, have no concern; to treat the strangers with true British courtesy is our duty, and from St. John papers we learn that they met a welcome reception not only from their fellow countrymen, who entertained them at a public dinner, but also from the public men and citizens generally; a special train was placed at their disposal, and a strip to Shediac with a good dinner given them. This is right.

AN EXCURSION TRAIN will leave Richmond Station, next Saturday morning at 7 A. M. for this Town. It is to be hoped the day will be pleasant, and that there will be a goodly representation of our up-country friends. As the train will not return until 5 P. M., the excursionists will have several hours to spend in amusing themselves; a couple of hours fishing would be a novelty to many of them, and should they not be fortunate to catch a few haddock or mackerel, they can enjoy a good dinner of these delicious fresh caught fish, or the hotels, with prime lamb and mutton, or any other dish they choose, and something palatable to wind up with. A genial friend at our elbow says "that's so!"

LECTURE ON PHYSIOLOGY.—Dr. O'Leary, from Canada, will lecture to-morrow evening in Paul's Hall, on Physiology, illustrated by French-Mankins, Skeletons, and Paintings. The Doctor's popularity in his native Province, and many parts of the States, is highly spoken of by the papers. His style is said to be both pleasing and instructive, never wearying his audience, and frequently soaring into the sublime heights of poetry in illustration of his theme.

BRAZIL.—We had the pleasure of receiving a letter from our friend Chas. Haslett, C. E., on the San Paulo Railway, who has been engaged on that great work for the last three years. He writes in glowing terms of the country and climate, and of the line of Railway which will soon be completed. He mentions favorably some natives of this Province, engaged on the work, among whom is a young friend in whom we feel an interest. Mr. Haslett, will return to his family in St. Andrews, early next year.

We are happy to notice that the traffic and travel on the railway, is steadily increasing. Scarcely a trip the steamer Queen makes, that she does not bring traffic and passengers to the railway. The express train placed on the line by direction of the manager, to connect with the steamers to and from St. John and Boston, is a great accommodation, and source of profit to the road. The next move we trust will be, the mails for Woodstock and the upper country conveyed over the road, and the wire placed on the telegraph poles lately erected along the line.

Launched at Chatham, on the 16th inst., from the building yard of John Townshend and Sons, a barque named the "Nellie," of 400 tons. Her length is 127 feet over all, 28 feet beam 11 feet 10 inches hold, 4 feet 8 inches between decks. She was built under French Lloyd's survey to class 5 years, and is owned by her builders.

On Saturday last, at 3 P. M., at Calais, Professor Lowe amidst a concourse of 3,000 spectators from both sides of the river St. Croix, ascended in his balloon, to the height of a mile and more, and then floated away in an easterly direction. The day was uncommonly fine, the atmosphere quite transparent, and as the balloon rose gracefully the shouts of the multitude rent the air. The whole scene was one of great interest and beauty. In less than an hour from the time of her departure she settled safely down at Oak Point, upon the English side, a distance of 6 miles from Calais. Professor Lowe is a very unassuming man, has considerable colloquial powers, and possesses very high scientific attainments. During the present war in America, he rendered important services to the Northern Army, and contributed much to the success at Malvern Hill. It is said that he intends to visit St. John and Fredericton the ensuing autumn; no doubt he will be fully appreciated at both places. —[Communicated.]

THE COMET.—The Newburyport Herald says that on Thursday night, a little after 9 o'clock, a diffusely luminous body, (supposed to be the comet discovered by Mr. Hind, July 9,) was observed through the haze in the west, at an elevation of about 10 degrees above the horizon, in the constellation Virgo. The atmosphere was so hazy that it was difficult to locate it among the stars, otherwise than to say, that it formed with Jupiter and Arcturus a nearly equilateral triangle.
