**WANTED**  
Middle-aged woman wanted for general housework. Apply to Dr. L. W. M. Freese, Glencoe.

**CARD OF THANKS**  
The husband and relatives of the late Mrs. George W. Mitchell wish to thank the friends and neighbors for their kindness during their sad bereavement, and especially the neighbors. Words cannot express our thanks also for the floral offerings from No. 5 school and the London friends.

**CARD OF THANKS**  
Mr. D. R. Hagerty and family wish to thank their many friends for the many kindnesses shown to him and his little folks in their sudden and sad bereavement in the death of wife and mother. Words fail to express our gratitude. We also wish to thank our numerous friends for the floral gifts and make special mention of the town council, the fire company, the Daughters of the Empire, the Gordon Mission Band, the Pratt's Siding Book Club, the teachers and pupils of the Glencoe public school.

We also desire to thank Rev. Mr. Paton and the Glencoe Presbyterian choir, also Rev. Mr. Robertson and all Mrs. Hagerty's and our own old friends of the Kilmartin church and community.

**DISTRICT AND GENERAL**  
A Niles, O., school board rules that women teachers who marry must quit or be fired.

A Toronto-owned racing pigeon flew 75 miles in 77 minutes last week, St. Marys to Toronto.  
A tarantula, which measured four inches from tip to tip, was found in a bunch of bananas in a Forest store.  
The death is recorded at her home in Detroit of Mrs. Tall Dewey, a former well-known resident of Wardsville.

Rudolph Pfeiffer, a farmer near Gratton, O., is receiving \$2,500 a day from a gas well just sunk on his farm.

Jane Colthart, wife of Hugh McVicar, passed away at the family residence in Rodney on Friday, aged 74 years.

During the past 12 months the population of Petrolia has decreased by 125, giving the town a present population of 2,709.  
June Halsey, two-year-old daughter of A. E. Halsey, Toronto, died as a result of swallowing a peanut, which got imbedded in a lung.

Colonel James Cooper Mason, former general manager of the Home Bank, who died August 6th last, left only \$15,419 in real and personal estate.

E. Marie Wilson, a nurse, was awarded \$30,000 at Watertown against the Syracuse Telegram for publication of a story asserting she had eloped.

Gordon Jarvis, three-year-old son of Wm. Jarvis, of London, was saved from drowning in the Thames river by two women who held on to a rope and rescued him.

A large party of Swedish settlers will arrive in Alberta shortly with sufficient financial resources to purchase farms. Some 5,000 are expected during the present year.

A section hand at Tuscola, Illinois, was killed recently when a rock picked up by the momentum of a passing passenger train, struck him in the forehead and fractured his skull.

W. Fred Beamish, manager of the Bothwell Manufacturing Company's wringer of an electric washing machine and badly torn. Fourteen stitches were required to close the wound.

Rev. W. G. H. McAllister, retired Methodist minister, died at his home in Galt May 28th. He was 67 years of age and had charges at Watford, Alvinston, Aylmer, London, Ridgeway and Exeter, spending altogether 41 years in the ministry.

Five prize sheep, valued at \$1,000, were killed by dogs some weeks ago, and the township of London is faced with the possibility of having to pay for them. The sheep were owned by Eugene Patrick, of concession 11 and were choice Persian black karakuls.

Owners of heavy trucks, which destroy the roads to a far greater extent than any other vehicle, are being warned by the deputy-minister of highways that if they continue to persist in exceeding the specified loads they will not be permitted the use of the highways.

James A. McLardy, an old employee of the Wabash and Grand Trunk Railways, passed away at Grace Hospital, Windsor, Saturday night, following an operation. For a number of years he was trainmaster on the division of the Wabash between Windsor and St. Thomas.

Mrs. Hughes, one of St. Thomas's best-known citizens, passed away on Friday afternoon at Amasa Wood Hospital, after an illness of about a week, following a stroke. She was the widow of the late Judge D. J. Hughes, who predeceased her about twelve years ago, and was formerly Miss Adelaide Rowland.

Marked improvement in weather conditions throughout the Prairie Provinces has proved a welcome boon to the Western farmer generally. Despite the lateness of the seeding operations and the unusually cold weather during the past month, recent rains and rise in temperature have contributed greatly to rapid growth.

According to the report of the auditor-general for the year ending March 31st, 1923, Geo. E. McIntosh, fruit commissioner, received that year a salary of \$3,175.00, and travelling expenses \$677.47, a total of \$3,852.47; and H. Dunham, Forest fruit inspector, for eight months, received \$2,000 salary, bonus and expenses \$2,039.54.

Frequent and seemingly mysterious deaths among cattle in certain sections of Alberta within the past week or so have now been diagnosed as poisoning from the weed known as "waig hemlock," chiefly found along the edges of sloughs. Large numbers of cattle have died from this poisoning recently, and farmers have become alarmed.

**NEW HYDRO RATES**  
Announcement is made by the Ontario Hydro-Electric Commission of a reduction in rates in several municipalities, but whether Glencoe will be included in the reduction has not been as yet intimated to the local commission. The charge for floor service is, however, to be done away with, and in lieu thereof there will in future be a uniform fixed service charge, which will work out to the benefit of nearly all consumers.

**METCALFE ASSESSMENT**  
Metcalfe township assessment roll for 1924 gives the following information:  
Number of acres, 36,198 7-20; value of land, \$1,270,510; value of buildings, \$227,035; business assessment, \$2,300; total assessment, \$1,499,845; population, 1,114; children between 5 and 17 years, 259; dogs, 194; exemptions, \$15,400.

**CAPTURED THREE FOXES**

When back in his bush one day recently, Alex. McLachlan, of the 10th concession of Brooke, noticed a fox run into a hole in the ground, together with little ones. He called up the McVicar brothers on the next farm to come over and help dig them out. He again went back to the bush and while waiting took a peek down the hole and the mother fox, coming up behind, attacked him. His smock was torn off his back before he managed to drive her off. Three little foxes were then dug out of the hole, after which they were taken to Reeve Rillet's fox ranch in town.—Alvinston Free Press.

**FUNERAL OF MRS. HAGERTY**

The funeral of the late Sarah McCallum, wife of D. R. Hagerty, was held from the family residence, Elizabeth street, on Wednesday afternoon, and was very largely attended. Services were held in Burns' church, Mosa, conducted by Rev. D. G. Paton, of Glencoe, and Rev. D. Robertson, of Burns' church, the sermon being preached by Mr. Paton, of whose congregation deceased was a member. Interment was made in Kilmartin cemetery.  
The pallbearers were Hector McKellar, D. J. McKellar, J. C. Graham and Gordon McLachlan.

**Special Bargains for Saturday at Lamont's.—Men's Fine Shirts and Underwear, Men's Work Shirts, Men's Pants and Overalls of all kinds, Children's Play Suits, Boys' Shirts and Bloomers, Men's and Boys' Caps, Etc. The store with the best quality of goods and the lowest prices.**

**BIG FOUR LEAGUE GAMES**

Quite a number of baseball enthusiasts witnessed a snappy game here on Wednesday afternoon, when Glencoe defeated Newbury in the first game of the Big Four series by 6 to 5.

Mount Brydges defeated Walkers at Mount Brydges on Friday afternoon by 14 to 4.

Glencoe is scheduled to play at Walkers and Mount Brydges at Newbury on June 4th.

Glencoe's team this year consists of Clarence Leitch, catcher; Ed. Hamilton, pitcher; Arthur Davenport, 1st base; Bill McMillan, 2nd base; Cameron McPherson, 3rd base; D. A. Weaver, short stop; R. D. McDonald, Stanley Humphries, Chester Bechill, fielders.

**TUFFIN REUNION**

On Saturday, May 24, the Tuffin reunion was held at the home of Mr. and Mrs. A. D. Black, of Ekfrid. Despite threatening clouds a great many of the relatives were present. The afternoon was spent in games and music. After supper an old-time dance was enjoyed.

Friends, outside of the family, were present from Hamilton, Walkerville, Melbourne and Windsor.

**DIED IN LONDON.**  
The death occurred at London on Wednesday evening, May 28th, following a surgical operation, of Mrs. George W. Mitchell, of Ekfrid, in her 60th year.

Mrs. Mitchell was a daughter of Mrs. and the late Joseph White, Dawn township, near Rutherford. About seven years ago she and her husband moved to the farm formerly owned by John Hick, lot 24, first range north, Ekfrid. Mrs. Mitchell had been in ill health for about two years. She leaves her husband and an adopted son, besides her mother, Mrs. White, near 89th year.

The funeral took place from her late residence on Saturday afternoon to Oakland cemetery.

**PRESBYTERIAN ANNIVERSARY**  
Rev. R. W. Ross, D.D., of Fort Massey church, Halifax, who was the minister here some thirty years ago, conducted the sixty-second anniversary services in the Glencoe Presbyterian church on Sunday morning and evening. The congregations were the largest that have assembled in the church in many years. Dr. Ross delivered inspiring and uplifting sermons, speaking in the morning on "The Church of the Living God" and in the evening on the 23rd Psalm. The musical part of the services, under the leadership of Miss Elma King, were of an exceptionally pleasing character. The choir was assisted in the morning service by George Pinkett, soloist of Knox church, Woodstock, who rendered two solos with good effect. In the evening the sister churches of the town withdrew their services, as is customary. The church was tastefully decorated with flowers and fernery. Under the ministry of Rev. D. G. Paton Glencoe congregation has been making good progress, many new members coming in at each communion season. The present membership is 414.

On Monday evening a musical entertainment was held in the church, which was also a splendid success and greatly enjoyed. The program was provided by a quartette from First Presbyterian church choir, London, conducted by George Lethbridge, organist and choir director, one of London's most talented musicians, and a former resident of Glencoe. Musical numbers consisted of solos, duets and quartette selections by Misses Viola Williams and Crissie Wright and Donald Payne and Chas. Burnett. Mr. Lethbridge rendered several organ solos. Addresses were given by Rev. D. Robertson of Kilmartin, Rev. W. Stevenson of Appin, Rev. Wm. Williams and Dr. Ross. Rev. D. G. Paton was chairman for the evening.

**KILLED WHILE DISKING**

Alex. Sellars, eighty-year-old farmer of Aldborough township, residing four miles west of West Lorne, was killed on Monday while disking a piece of ground. The team he was driving took fright and bolted, and Mr. Sellars was thrown from the seat of the machine to the ground beneath the disk wheels. His body was badly crushed and death was almost instantaneous. The accident was witnessed by residents of an adjoining farm, who hurried to the scene but were unable to render any assistance. Deceased had resided in Aldborough for some 63 years. He was unmarried and leaves a sister, Mrs. John McGill, of Aldborough.

**DEATH OF LITTLE BABE**

The death occurred at the home of her parents on Tuesday, May 27, of Mary Edna Ruth, only daughter of Mr. and Mrs. Wm. McRae, aged seven months and six days.  
Funeral service was held at the family residence, Victoria street, on Thursday, conducted by Mr. Robinson, of Toronto. Four little girls—Doris Love, Virgie Clarke, Leah Tomlinson and May Blacklock—acted as pallbearers. The flowers were carried by Beulah Copeland, Mildred Blacklock and Clara George.  
Interment was made in Oakland cemetery.

**RURAL SCHOOL FAIRS**

R. A. Finn, agricultural representative, and his assistant, J. P. Andrew, of the Ontario Department of Agriculture, London, are busy making preparation for the annual rural school fairs of the county to be held in the autumn.

Prize lists and programs are being issued this week and, besides the regular departments, provide for live stock naming contests, school parades, poultry culling and killing, public speaking, stock judging and sports.

Dates of fairs are as follows:—Brinsley, Sept. 15; Dorchester, Sept. 17; Appin, Sept. 19; Glencoe, Sept. 24-25; Kerwood, Sept. 26; Thorndale, Sept. 29-30; St. John, Oct. 1; Mt. Brydges, Oct. 3; Adelaide, Oct. 7; Poplar Hill, Oct. 9.

**CASE ADJOURNED**

Henry Smith and Joseph Walker, farmers residing in Mosa township, are defendants in action brought against them by Edward Francis, farmer of the same township, in a dispute over a right-of-way. The plaintiff asks that fences now erected be removed, while the defendants claim that they were erected with the full knowledge and consent of the plaintiff.

The case came up at the recent non-jury sittings in London and was adjourned.

Elliott & Moss, of Glencoe, are acting for the plaintiff, while McEvoy & Henderson are acting for the defendants.

**GLENCOE HORSE SHOW**  
Preparing For This Annual Event on Wednesday, June 11

The annual horse show and race meet under the auspices of the Mosa & Ekfrid Agricultural Association will be held this year on Wednesday, June 11, at the Agricultural Park.  
The races will be a 215 trot or pace, 225 trot or pace and 250 trot or pace, with purses of \$300 in each case.

The horse show includes good cash prizes, to be divided first, second and third, for carriage and roadster, single and double; high stepper, saddle horse and lady drivers.

Entry blanks and further information may be had on application to the secretary, R. W. McKellar, Route 2, Glencoe.

In the afternoon there will be added attractions, including two Big Four League baseball games, band music, etc. In the evening the opera house is furnishing a special attraction in a comedy-drama entitled "Martha Made Over."

**COUNTY RATE INCREASED**

The tax rate for Middlesex county this year has been fixed at 11 mills by the county council. This is an increase of 2 mills over last year. It is explained that in past years the council, in order to keep down the rate, has been incurring deficits, which finally amounted to about \$100,000. Last year this was cut down to \$74,000. This year the increased tax rate will take care of half of this sum, and the balance, \$37,000, will be carried over to next year as a deficit.

**METHODIST MINISTERS**

The stationing committee of London Methodist Conference in their recommendations which are of a local interest have placed ministers as follows:—Belmont, M. C. Parr; Appin, J. Penrose; Mt. Brydges, H. B. Barnaby; Melbourne, M. C. Colling.

**TAIT'S CORNERS ANNIVERSARY**

Anniversary services of the Tait's Corners Presbyterian church will be held on Sunday, June 8, at 2:30 and 7 o'clock, conducted by Rev. Dr. McIntosh, of London. Special music will be provided for the occasion. A cordial invitation is extended to the public.

**AN HEIR IN TROUBLE**

London, May 30.—Heir to a fortune reputed to be from \$25,000 to \$40,000, yet unable to pay a fine of \$200 imposed for a breach of the O. T. A., is the position in which Stanley Merritt of Chatham, finds himself.

Merritt was brought to London from Glencoe Thursday by Provincial Constable Stratton and High County Constable Wharton. He had gone on a rampage in the camp of a Mrs. Currie on the Provincial Highway and was fined \$200 for having two gallons of wine in his possession. The optional term of imprisonment was set at three months.

Finding himself financially embarrassed, Merritt was forced to accept the jail term. He is, however, said to be heir to approximately one-third of his father's estate, which is unauthoritatively estimated at about \$75,000. Merritt the elder died a few weeks ago in Chatham and sufficient time has not yet elapsed to have the will filed for probate.

Not only is he heir to a fortune on his father's side of the family, but his mother, who is now confined to a Sarnia hospital with a serious illness, is also reputed to be worth a fortune in her own right. From her estate it is said the prisoner will fall heir to approximately \$15,000.

Merritt is the composer of a number of songs all of which have gained favor in the public taste and have netted a large sale. "Ten Little Fingers and Ten Little Toes" is claimed to be one of his compositions of several years ago.

He will be forced to remain a prisoner in jail here until either the sentence is served or until friends come to his rescue with the necessary cash.

Some men would rather win \$1 on a wager than earn \$5 at honest labor. Charles Andrew Brower, who represented East Elgin as a Conservative in the Ontario Legislature from 1894 until 1919, died at his home in St. Thomas on Sunday morning.

The fact that she was attending a class in physics when she swallowed a pin probably saved the life of 13-year-old Laura McGregor, Glasgow, Scotland. The pin lodged in her throat out of sight and was strangling her when the instructor recalled that he had been using a large magnet for demonstrating certain facts about the action of a magnet. The magnet down the girl's throat he pulled it out slowly and found the pin clinging to the metal.

## HYDRO-ELECTRIC COMMISSION ANNOUNCES CHANGE IN RATING SYSTEM

Flat Service Charge of 30 Cents Replaces Domestic Floor Space Toll—155 Municipalities Get Cheaper Power.

A despatch from Toronto says:—A revolutionary change in the rating system for domestic and commercial lighting throughout the various Hydro Electric systems of the Province was announced Thursday night by Sir Adam Beck, speaking on behalf of the Hydro Commission.

Simplification of the rating method has been under consideration by the officials of the Commission for some months, and on Tuesday members of the Municipal Hydro-Electric Association were called into conference. The call for this conference was issued by ex-Mayor McGuire of Toronto as president of the association. The result of these deliberations was a decision—which was communicated officially to the municipalities throughout the province—to abolish floor-space rating for all domestic services and to provide instead thereof a 30-cent service charge in the case of all houses, large or small, connected with municipal distribution services in the various Hydro zones.

It is believed, Sir Adam states, that this will be found in the end to be more equitable than the minimum and maximum floor space ratings hitherto enforced.

It also has been decided that the standard charge for current shall be 2 cents for a minimum of 60 kilowatts and 1 cent per kilowatt for all current supplied above that minimum. In the case of municipalities which find the revenue from this basis of rating insufficient for their needs and necessary additional revenue will be obtained by increasing the number of

kilowatts from 60 upwards to which the 2-cent rate is applicable.

If, for example, a municipality finds that it requires a minimum of 80 kilowatts per month at 2 cents to carry its necessary expenses, the local authority will have power to increase the standard minimum from time to time, subject, of course, to the general supervision of rating by the Provincial Commission.

It has been decided, Sir Adam stated, to accept for general use in the matter of commercial rating the basis put forward by the Toronto Hydro-Electric Commission for use in this city. Formerly commercial lighting was supplied at a minimum rate of 5 cents per kilowatt hour for 30 kilowatt hours, 3 cents for the next 70 and 1 cent for all over 100. The Toronto rate, which will now be applied throughout the province, provides for a rating of 4 cents per kilowatt hour for the first 50 hours, 2 cents for the next 50, and 1 cent for all over 100.

These changes have been formally approved by the Provincial Commission, as well as the new domestic rating system, and, so far as possible, goes into force on the first of June.

At the session of the Commission, revisions of provincial rates in 212 cities, towns and villages were formally approved, having regard to the surpluses disclosed by last year's revenue returns. In 155 cases reductions were made in the rate for power supplied by the Provincial Hydro to the local authorities; in 54 the rate was increased; in 3 the rate was only as it found necessary to make increases.

The first splice in the new cable which is being laid between Alaska and Seattle, a distance of 955 miles.

## ROYAL PERSONAGES VISIT BRITISH FAIR

King George Roars With Laughter at Prince of Wales Modeled in Butter.

A despatch from London says:—King George and Queen Mary, with King Victor Emmanuel and Queen Helena of Italy, and Princess Mafalda spent a considerable part of Wednesday forenoon at the Canadian Pavilion at the British Empire Exhibition. Announcement of their Majesties' visit to Wembley brought sighs of joy from the thousands of people, thanks to the skillfulness of the police and the good humor of the crowd, the royal party made a walking tour at the exhibition in perfect comfort.

The first call of the royal party was at the Canadian National Railway pavilion. The longest visit of the Italian royal visitors and their royal host and hostess was in the Dominion pavilion, where they were shown around by officials. King George fairly roared with laughter when he was suddenly confronted with the model of the Prince of Wales in Canadian butter. The butter exhibit is in the form of a model of the Prince's Alberta home, the Prince, his horse, his ranch, the house and landscape all being in butter.

"Capital, capital, is it not?" King George exclaimed to Queen Mary, who was also much entertained by the display.

The Canadian Pacific Railway Building then was visited by the royal party. The spectacle of a model train running right around the C.P.R. Building attracted the visitors' attention.

## Sleeping Sickness Peril is Gaining in England

Sleeping sickness is increasing rapidly in this country, and 649 cases were notified by doctors in the first three weeks of April, against 468 in March, 217 in February, and 75 in January, says a London despatch.

While investigations into the cause of the disease are being carried out by the Medical Research Council, doctors admit they do not know either a cure or any means of preventing the spread. Large towns appear to be more affected than rural districts and the disease seems to spread westward.

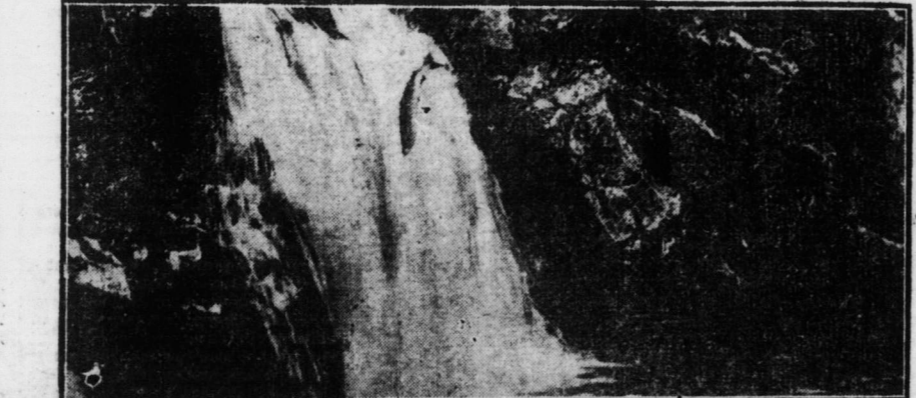

## Thirteen Unaccompanied Children on Atlantic Voyage

A despatch from Quebec says:—There were 13 unaccompanied children whose ages ranged from 7 years upward on the Canadian Pacific steamer "Montcalm," which arrived at Quebec at two o'clock Friday afternoon.

William Burgess, aged 9, is destined to meet his uncle at Tadoussac, Sask.; Gertrude and Jack Hamrahon will meet their mother at Walkerton, Ont., and the remainder of the children are going to join relatives in other parts of Canada, mostly in the Western Provinces.

## Immigration Shows Increase of 103 Per Cent in April

A despatch from Ottawa says:—Immigration into Canada in the month of April this year shows an increase of 103 per cent over that of the same month last year, the total for April, 1924, being 19,339, as compared with 9,500 in April, 1923. Of the total for April this year 9,410 were British, as compared with 4,671 in the same month last year; from the United States, 1,898, as against 2,140 in April last year, and 8,029 from other countries, as against 2,689 in April last year.

So near and yet so far—but the plucky New Brunswick salmon pictured will keep on trying until it eventually scales the falls and reaches the quiet waters above.

James Brown, Labor-Miner M.P., has leaped into the limelight through being named by King George as Lord High Commissioner of the Church of Scotland and ruler of Holyrood Palace. He didn't forget to chat with the "bobbie" at the gate.

## CHINESE BANDITS CARRY OF MISSIONARIES

One Canadian, One Englishman and Two Americans Held Prisoners in Hills.

A despatch from Hong Kong says:—The Chinese captain of the motor boat, belonging to the Stout Memorial Hospital, boarded by pirates as it was proceeding up the Cassia River from Wuchow to Kweilin, which place is being besieged by opposing Chinese armies, and where twenty missionaries are believed to be in danger, has escaped and returned to Wuchow. He reports that 300 brigands, all ex-soldiers, attacked and routed the escort of 80 soldiers. A Chinese gunboat passed and fired a few shots, but did not stop. The brigands then boarded the motor boat and demanded £100, firearms, gold leaf, etc.

When military reinforcements arrived, however, the pirates abandoned the motor boat, which they had ransacked, and carried off the four missionaries who were on board toward the hills. Soldiers followed in pursuit.

A despatch from Shanghai says:—Despatches published in the Shanghai papers tell of military and bandit outrages against missionaries both in South and North China. Reports state that five missionaries in Kwangsi and Kwantung Provinces, at the towns of Talwan and Pienlo, consisting of the Rev. R. A. Jaffray, of Toronto, and the Rev. E. H. Carne, Britishers, and two Americans, named Rev. Rex Ray and Dr. H. G. Miller, were captured and are being held prisoners in the mountains. The missionaries were proceeding toward the Town of Kwai-shun, in Kwangsi Province, in order to take supplies to their group of missionaries, practically held prisoners there due to the internal fighting.

A despatch from London says:—The Government has communicated with the British Minister at Peking instructing him to make vigorous and immediate representations to the Chinese Foreign Office for action to effect the release of the four missionaries, two of whom are British, who were captured by pirates while en route to the relief of a band of twenty missionaries believed to be in danger at the hands of Chinese bandits. The Government has asked for an immediate official report of steps taken to secure the release of the captives.

Hong Kong, June 1.—Two of the four missionaries recently captured by Chinese pirates, Rev. Robert A. Jaffray of Toronto, Canada, and Dr. H. G. Miller of New York City, have been released by their captors to arrange for the payment of the ransom demanded. The other two, Rev. E. H. Carne, an Australian, and Rev. Rex Ray, an American, remain prisoners in the mountains, ten miles above Chipping. The military authorities are endeavoring to secure their release.

Washington, May 31.—Official word of the latest outrage by Chinese pirates against British and American missionaries in China was reported to the State Department to-day. The Pekin Legation is already pressing upon the Central Government the necessity for prompt action to obtain release of the foreigners and punishment of the pirates.

## NIAGARA WHIRLPOOL CLAIMS YOUNG VICTIM

Youth of Seventeen Leaps from Boat in Futile Attempt to Reach Shore.

A despatch from Niagara Falls, Ont., says:—Joseph Alexander Dempsey, 17 years of age, was drowned in the whirlpool in the lower river early Thursday morning when he jumped out of a rowboat which had become unmanageable.

Dempsey, with Edward Barrie and Morley Pearson of this city, went along the river bank with a skiff and launched it just above the whirlpool with the idea of taking it down to Queenston for the summer. Dempsey got into the boat himself and started to row across the big eddy. The current, however, was too strong for him and he had to pull the oars into the boat. Finding himself gradually being drawn into the vortex of the pool, he jumped into the water and started toward the shore. He made about twenty strokes, shouting for help, and suddenly disappeared. It looked as if he was caught by a strong undertow. The body has not been recovered.

It is probable that if he had remained in the boat he would have been saved, for it drifted around the eddy and was drawn up near the shore.

Pte. Charles Mullet of Toronto, spent his 65th birthday in the trenches of Flanders during the Great War, and can still fix bayonets with the best of them.

## West India Isles Shown as Very Loyal to England

Sir Eustace Finnes, Governor of the Leeward Islands, on a recent visit to England, told reporters that he was certain the British West Indian possessions would never be ceded to America for war debt. The sentiment of the people was strongly against such a change of flag, and they were very loyal to Great Britain.

Sir Eustace said also that despite the commercial loss occasioned by the war and four successive years of drought, the future outlook of the islands was excellent.

## BRITAIN LIQUIDATES SURPLUS WAR STOCKS

Supplies to the Value of \$3,235,890,000 Sold in Past Five Years.

A despatch from Montreal says:—The Disposal and Liquidation Commission of the British Government, which in connection with its predecessor, the Ministry of Munitions, has had in charge the liquidation of the surplus war stocks and properties of the British Government, has just completed its work, and as reported by the English Information Service, has realized for these stocks in the past five years \$3,235,890,000 at par of exchange.

The releasing of these surplus properties and stores in large and small lots has involved more than three million separate business transactions, including railways in Europe, Asia and Africa, as well as thousands of miles of railways, sidings, etc., in the British Isles and a large fleet of miscellaneous craft lying in various harbors all over the world. Among the properties liquidated were real estate and factories, rolling stock, industrial plants, machinery, mechanical transport and road plant, metals, huts, buildings, furniture, building materials, horses and other animals, textile goods, medical stores, food stocks and aircraft material.

After ten years of experimentation, J. L. Baird, a young Scottish engineer, has announced the invention of an apparatus which enables one to see by wireless.

## PRAIRIE GRAIN CROPS MAKE UP LOST TIME

Improvement in Weather Conditions Results in Rapid Growth of Grain.

A despatch from Winnipeg says:—Marked improvement in weather conditions throughout the Prairie Provinces has proved a welcome boon to the Western farmer generally.

A despatch from the latest of the seedling operations and the unusually cold weather during the past month, recent rains and rise in temperature have contributed greatly to rapid growth. Wheat seeding is completed in the three Provinces with the exception of a few isolated districts, while good progress is reported in the seeding of coarse grain.

Farmers in the Regina district report that crops are slightly ahead of last year, and in some districts wheat has reached the height of three inches. In the Prince Albert district lack of precipitation has somewhat retarded growth, but rain is forecast.

The season's crop prospects in Alberta are regarded as the most ideal in many years. A steady but gentle downpour of last week-end over a wide area proved very beneficial.

In Manitoba the crop is not much later than in former years, although the lateness of the seeding season materially reduced the acreage sown to wheat.

"There is ample time yet for the development of a good crop, and notwithstanding unfavorable weather conditions during the early spring, no fear need be entertained concerning the crop," declared Premier John Bracken, Minister of Agriculture for Manitoba, following a visit through the Neepawa district.

## BRITAIN' ARMY NOW REDUCE D TO 156,935

Soviet Russia Has Largest Force in Europe While France Ranks Second.

A despatch from London says:—Great Britain, which during the war was an army of 4,000,000 in the field, now has an army that is smaller than Spain's or Holland's and not much bigger than that of Czechoslovakia. This fact was brought out by Stephen Walsh, Secretary for War, in reply to a Parliamentary question.

According to Mr. Walsh, Soviet Russia has the largest army in Europe. It numbers 1,008,000 men, France ranks second, with 732,248. The British army—without including the Indian army—with a strength of only 156,935 men, trails Poland, Italy, Spain, Holland and Switzerland.

Inexperience is an evil that cures itself from day to day—Mr. Stanley Baldwin.

## The Week's Markets

TORONTO.

Man. wheat—No. 1 North, \$1.13 1/4; No. 2 North, \$1.06 1/4; Man. oats—No. 3 CW, 42 1/2c; No. 2, 41c.

Man. barley—Nominal. All the above c.i.f., bay ports. Ont. barley—65 to 70c. Am. corn—No. 2 yellow, 95c. Ont. rye—74 to 78c. Peas—No. 2, \$1.40 to \$1.45.

Miller-Del. Montreal freight, bags included: Bran, per ton, \$25; shorts, per ton, \$24; middlings, \$30; good feed flour, \$1.85.

Ont. wheat—No. 2 white, nominal. Ontario No. 2 white oats—39 to 41c. Ont. corn—Nominal.

Ont. flour—Ninety per cent. pat. In jute bags, Montreal, prompt shipment, \$4.95; Toronto basis, \$4.95; bulk, seaboard, \$4.60.

Man. flour—1st pat. In jute sacks, \$6.50 per bbl.; 2nd pat., \$6. Hay—Extra No. 2 timothy, per ton, track, Toronto, \$16; No. 1, \$16; No. 3, \$13 to \$14; mixed, \$11 to \$11.50; lower grades, \$10 to \$12.

Straw—Carlots, per ton \$9.50 to \$10. Screenings—Standard, re-cleaned, f. o. b., Bay ports, per ton, \$17.

Cheese—New, large, 10 1/2 to 17c; twins, 17 to 18c; triplets, 18 to 19c; stilltons, 20c. Old, large, 22 to 23c; twins, 23 to 24c; triplets, 24 to 25c; stilltons, 26c.

Butter—Finest creamery prints, 35c to 36c; No. 1 creamery, 34 to 35c; No. 2, 33 to 34c; dairy, 28 to 30c.

Eggs—Extras, fresh, in cartons, 33 to 34c; extra loose, 31c; firsts, 28c; seconds, 24c.

Live poultry—Hens, over 5 lbs., 26c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 22c; spring chickens, 2 lbs. and over, 55c; roosters, 18c; ducklings, over 5 lbs., 26c; do, 4 to 5 lbs., 24c.

Dressed poultry—Hens, over 5 lbs., 28c; do, 3 to 4 lbs., 18c; spring chickens, 2 lbs. and over, 60c; roosters, 22c.

Bacon—Can., hand-picked, lb., 64c; Dressing—Can., hand-picked, lb., 64c; Maple products—Syrup, per imperial gallon, \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 11 to 11 1/4c per lb.; 10-lb. tins, 11 to 12c; 5-lb. tins, 11 1/2 to 12c; 2 1/2-lb. tins, 12 1/2 to 13c; comb honey, per doz., No. 1, \$3.75 to \$4; No. 2, \$3.25 to \$3.50.

Smoked meats—Hams, med., 23 to 24c; cooked hams, 34 to 36c; smoked rolls, 17 to 18c; cottage rolls, 18 to 20c; breakfast bacon, 21 to 22c; special brand breakfast bacon, 28 to 30c; backs, boneless, 28 to 33c.

Cured meats—Long clear bacon, 50 to 55 lbs., \$15.50; 70 to 90 lbs., \$18; 90 lbs. and up, \$17; lightweight rolls, in barrels, \$37; heavyweight rolls, \$32.

Lard—Pure tallow, 14 1/2 to 15 1/4c; tubs, 15 to 15 1/2c; pails, 15 1/2 to 16c; prints, 18 to 18 1/2c; shortening, tins, 14 to 14 1/2c; tubs, 14 1/2 to 15c; pails, 15 to 15 1/2c; prints, 15 1/2 to 17c.

## ROUMANIAN ARSENAL WRECKED BY EXPLOSION

Loss to Country Equal to That of a Lost Battle—Communist Plot Suspected.

A despatch from Vienna says:—Despatches from Bucharest show the explosion of the central ammunition stores at Cotroceni nearly was one of the biggest of such disasters in recent years. The depot was the chief store of the Roumanian Army, and the biggest calibre shells, as well as an immeasurable quantity of small arms ammunition, received only a few weeks ago from the Skoda works at Pilsen, Czechoslovakia, were destroyed.

It is only natural that because of the tension with Russia, a Communist plot is suspected as the cause of the explosion. The number of victims is still unknown. The damage is estimated at a billion lei (par value \$200,000,000).

The day before the explosion the Roumanian War Minister Madareu was in Parliament that Roumania was ready for all eventualities. A neutral military infantry who arrived here on Friday from Bucharest, said possibly the highly inflammable French powder used by Roumania, which is like that which during the war caused numerous accidental explosions, may be the indirect cause of the great magnitude of the catastrophe. Although Roumania is not at war with Russia, her loss through the explosion is equal to that of a lost battle.

Bucharest, June 1.—The loss of life in the fire and the series of explosions at the Government Arsenal, west of the Capital, Wednesday, now is estimated at forty, which is somewhat smaller than at first believed. The material damage is placed at 6,000,000 lei—\$1,158,000,000 at the normal rate of exchange.

## WHY CANADA OBJECTS TO RECEIVING TITLES

Manchester Guardian Says Sale of Honors Makes Them Undesirable.

A despatch from London says:—The reason why Canada and South Africa have shown a repugnance to titles being conferred on their citizens, according to The Manchester Guardian, is partly explained by the fact that these Dominions have had bad luck in London's choice of the recipients for honors.

Shady modern history, The Guardian says, which has involved the virtual sale of peerages to rich men who have financed English political parties also makes titles objects of dislike in those Dominions.

The Guardian's references to Canada and South Africa are made in an article discussing the recent announcement of the South Australian Government's proposal that no person in that state shall be recommended for knighthood unless such recommendation is endorsed by both Houses of South Australia's Parliament.

## Rough Riders Admit Defeat They Ride Atlantic

A despatch from London says:—One hundred and thirty rough riders from Western Canada, Texas and Wyoming, now en route to England to participate in the International rodeo at the British Empire Exhibition in Wembley, admit defeat in their efforts to rough ride the Atlantic Ocean.

According to a wireless received here, the whole cowboy contingent has been laid low by seasickness. The Menominee, upon which they are travelling, struck a southeasterly gale off Sandy Hook and ever since has encountered a series of fogs, rain, squalls and cross seas, so that the whole outfit has been put out of commission—all except Tijuana, a spirit-eater Texas pony which the rangers are going to present to the Prince of Wales.

According to the message, the only mitigating circumstances of the trip is the presence of a ministering angel in the guise of a lively young woman champion bareback rider, who soothed the spirits of her fellow travellers by saxophone selections.

## Arabs to Establish University at Bagdad

First steps toward a return to the glories of Harun-Al-Rashid have been taken by the Arabs, with the encouragement of the British, in Bagdad, where the cornerstone of a new Arabic university has been laid, says a Constantinople despatch.

The learning of both the East and the West will be taught in the university, called Al al-Bait which will include colleges of divinity, engineering, science, law, education and medicine. The building which has been started will be a combination of Eastern and Western architecture and will house the divinity school.

As the Ministry of Moslem Pious Foundations, which is advancing the money, lacks funds, the other colleges will not be started for several years. A thousand years ago, when Oxford and the Sorbonne were unknown, Bagdad, as the capital of the Abbasid Caliphs, was a great center of learning, which, during the Dark Ages in Europe, saved many of the Greek classics for the West.

## CANADIAN FLOUR EXPORTS

Canada being one of the greatest wheat-raising countries, it is only natural that the flour-milling industry should be one of importance, and figures compiled recently by the Dominion Bureau of Statistics show that this industry is in an excellent condition, and that the demand from foreign countries for Canadian flour is increasing at an unprecedented rate. At the present time there are about 1,250 mills engaged in manufacturing flour and kindred products, with an estimated capacity to produce 40,000,000 barrels of flour per annum, given 200 working days of 24 hours each. Last year the total production was about 20,000,000 barrels, of which 9,000,000 only were for domestic consumption.

The splendid quality of Canadian hard wheat produces a first-rate flour, which is unequalled by any other country. In fact, Canadian wheat flour is everywhere recognized as the standard, and American flour, which so long dominated the foreign market, is gradually giving way to the superiority of the Canadian product, with the result that mills in the Dominion are finding a better market in the European countries and are being constantly called upon to fill the requirements of other countries which hitherto have been buying their flour elsewhere.

### Great Britain Best Customer.

It is only within the past five years that Canada has really got into its stride as a wheat-flour exporting country. According to the trade returns of the Federal Government for the fiscal year ending March 31, 1923, Canada exported 10,277,660 barrels of wheat flour, valued at \$60,075,426, as compared with 7,414,282 barrels, valued at \$53,478,150 in the previous year, and 6,017,932 barrels in 1921-22. The United Kingdom, of course, was the largest importer, accounting for 4,723,527 barrels, worth \$27,174,526. Next in importance was Germany, with imports of 675,599 barrels, valued at \$3,955,408, followed by the United States with 612,564 barrels, value \$3,853,424. Other countries who purchased Canadian wheat flour in the last fiscal year were: Italy, Netherlands, Russia, Sweden, Greece, Japan, Denmark and such out-of-the-way countries as British Guiana, Canary Islands, Hayti, Morocco, Portuguese Africa, etc. In all, some 49 countries were wheat-flour customers of Canada in 1922-23.

### Increase in U.S. Tariff.

At the present time, the United States is Canada's chief competitor for the flour trade of foreign countries. As it is necessary, in order to produce an A-1 flour, the United States mills are forced to import a large quantity of Canadian hard wheat to mix with their soft wheat. In the last two or three years, the United States has put a heavy tariff on Canadian hard wheat and recently increased it by 12 cents a bushel, and it will mean that if the flour is not milled in bond at Buffalo and Minneapolis, the American millers will have to raise the price of flour, which will make it all the more difficult to compete with the Canadian output in some of the foreign markets.

All indications at present point to a steady growth of the Canadian flour-milling industry. As long as wheat is produced in Canada, the Canadian miller will be able to produce a superior quality of flour, and with competition lessening from American mills, and a continued demand for Canadian flour from foreign countries, it should not be long before the Dominion is pre-eminent among the wheat flour exporting nations of the world.

### Squatting Said to Have Stunted Japanese Race.

A new theory to account for the small stature of the Japanese race has been advanced.

A member of the government health bureau says that the Japanese custom of sitting on the floor with legs cramped has retarded the development of the lower limbs of the race as a whole.

In support of his contention, he quotes statistics of the Department of Education which show that the average stature of Japanese male students of twenty years of age has increased three-tenths of an inch, and that of female students nine-tenths of an inch, since the year 1907 in consequence of spending less time sitting on the floor at home and more time in physical exercise at school.

As a further argument he cites the example of the inhabitants of a fishing community in Okinawa prefecture. The men in this district, who have been accustomed since childhood to spend most of their time squatting in the bottoms of their fishing boats, are below the average in stature and have unusually short legs. The women, whose lot in the economic scheme has been to walk long distances to sell the fish, which they carry in baskets balanced upon their heads, are taller than the men and have remarkably well developed and comparatively long legs.

### Woman's Farmhouse Figuring.

A Virginia farm housewife recently installed running water in her kitchen after she found that she was walking 140 miles a year to get water and expending enough energy in lifting it to do the work of two horses in plowing eleven acres of land.

The fire proves gold, adversity strong men.

# RED ROSE

## For particular people

### COFFEE

Pure! No chicory or any adulterant in this choice coffee

## Surnames and Their Origin

### LIPPMAN.

Variation—Lipman.

Racial Origin—English.

Source—An occupation.

Among the medieval English a Lippman was a "leapman," "leppeman" or "leppman." All three spellings are to be found in the old records. You might conclude from this that the various founders of the Lippman and Lipman families were celebrated as jumpers. Such a conclusion, however, would be entirely erroneous.

The word "lepe" has been for many generations defunct in our language, though the family names derived from the occupation connected with it are very much alive and by no means uncommon.

The "lepe" was a form of basket, strong but flexible, and in wide use about the period when family names began to crystallize from occupations as well as other sources.

In an old Bible, in the parable of the loaves and fishes, is found the following: "And they eaten and were filled and they taken up that that left of twelve severe leppies."

It was the usual thing to refer to a man by his occupation, as "Roger le Leppeman" ("the maker of baskets"), but quite often without even the article, "le," particularly toward the close of this period, in which common

usage made the names mere verbal tags of identification rather than literal descriptions of occupation.

### DRISCOLL

Variation—O'Driscoll.

Racial Origin—Irish.

Source—A given name.

You might not even recognize Driscoll as an Irish family name, though if you run across it in the form of O'Driscoll the significance of that prefix is clear.

Like virtually all Irish names, it is the Anglicized form of an ancient clan name, and this clan name was "O'Driscoll," which is something quite different in both spelling and pronunciation from O'Driscoll, though your English pronunciation of the Gaelic spelling would probably be wrong, for that syllable "ceol," containing the three vowels was pronounced simply "col."

The clan was founded by a chieftain named "Ederseal," who was the great-grandson of "Lugadith MacCon," the 113th monarch in that line of "high kings" whose reigns stretched through virtually 3000 years.

There are no records which show specially the year in which the clan was founded, but history gives definitely the reign of this great-grandfather of the founder, which was between the years 195 and 225 A.D.

## SATISFIED MOTHERS

No other medicine gives as great satisfaction to mothers as does Baby's Own Tablets. These Tablets are equally good for the newborn babe or the growing child and are absolutely safe. They cannot possibly do harm—always good. The Tablets are mild, but thorough laxative which regulate the bowels and sweeten the stomach and thus relieve baby of any of the minor ills of childhood such as constipation, indigestion, colds, colic, etc. Concerning them Mrs. Arthur Fillion, St. Sylvester, Que. writes:—"Baby's Own Tablets have been of wonderful benefit to my baby who was suffering from constipation and indigestion. I always keep the Tablets on hand and would advise all mothers to do likewise." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Label Them Correctly!

I have seen careless people wash out a medicine bottle, and without changing the label, refill the bottle with some entirely different kind of medicine. This is a mighty dangerous practice, as we are not always on the job ourselves and it might prove a very disastrous act to the stranger who is helping us out.

### Keep Minard's Liniment in the house.

Caution on Wet Streets. When driving on wet streets the clutch should never be released except at the last moment to prevent the engine from stalling. Always apply brakes gradually.

The love of power is natural, insatiable and never cloyed by possession.

### Label Them Correctly!

I have seen careless people wash out a medicine bottle, and without changing the label, refill the bottle with some entirely different kind of medicine. This is a mighty dangerous practice, as we are not always on the job ourselves and it might prove a very disastrous act to the stranger who is helping us out.

came word from her former hostess that her new chambermaid had searched for and recovered the clock!

**The Duke's Popular Comptroller.** It has been with the keenest regret that the Duke of York has consented to the resignation of Commander Louis Greig as Comptroller to H.R.H. Indeed, he did so only on condition that the Commander, who is joining a firm of stockbrokers as a partner, should remain as adviser to him in financial matters.

Like most of his race, he is a Glasgow man. Commander Greig has a head for figures, and has been of invaluable help to the Duke in regard to the management of certain trusts.

### Mrs. Coolidge's Retort.

Mrs. Calvin Coolidge is noted for her quick flashes of wit and repartee. When her husband was Vice President and she was meeting the ladies of the Senate for the first time at their luncheon club, over which she was to preside, the Senators' wives filled by introducing themselves. When Mrs. John B. Kendrick's turn came, she said:

"I'm Mrs. Kendrick, the junior from Wyoming."

"And I'm Mrs. Coolidge, the freshman from Massachusetts," was her prompt retort.

## PALE, WAN CHEEKS AND DULL EYES

Is Proof That the Blood is Thin and Impure.

It is the blood that gives color to the cheeks and lips, as well as brightness to the eyes. If your blood gets thin the color will fade and the eyes grow dim. By the time this happens you will notice that you tire easily and are subject to headaches and backaches, for the blood goes everywhere and the entire system feels the effects when it becomes thin. Dr. Williams' Pink Pills contain the elements necessary to enrich the blood, and this better blood strengthens the nerves and all the organs of the body, brings a glow of health to the cheeks, brightness to the eyes and a general feeling of renewed health and strength. Miss Florence Johnson, Stratford, Ont., who has proved the value of Dr. Williams' Pink Pills in cases of this kind, says:

"A few years ago I was greatly run down, my blood was very poor and my nervous system in bad shape. The doctor said my condition was due to improper diet and lack of fresh air. I then commenced eating the food he advised and went out daily for a walk. I did not improve, however, and was which now I recommend them to all suffering from similar ailments. I lost no time in getting a supply and can truthfully say that when I had finished the first box I could note an improvement. From then on the progress was steady. My complexion, which had been pale and sallow, began to take on a healthy glow. I felt a great deal stronger and my appetite became normal, and soon my health was fully restored. Before using Dr. Williams' Pink Pills I did not know anything about their wonderful qualities, but now I recommend them to all suffering from similar ailments. I lost no time in getting a supply and can truthfully say that when I had finished the first box I could note an improvement. From then on the progress was steady. My complexion, which had been pale and sallow, began to take on a healthy glow. I felt a great deal stronger and my appetite became normal, and soon my health was fully restored. Before using Dr. Williams' Pink Pills I did not know anything about their wonderful qualities, but now I recommend them to all suffering from similar ailments. I lost no time in getting a supply and can truthfully say that when I had finished the first box I could note an improvement. From then on the progress was steady. My complexion, which had been pale and sallow, began to take on a healthy glow. I felt a great deal stronger and my appetite became normal, and soon my health was fully restored. ## The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

**Advertising.**—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

**Job Printing.**—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

A good sport is a man who will give his straw hat a 50-yard start when it blows off before giving chase.

When you think well of a friend show it while he is alive. Flowers are pretty and very appropriate, but personally we don't believe that dead men care much about them.

In the good old days the man who spent Victoria Day pushing a lawn mower was thought guilty of high treason. Now he's only judged guilty of annoying the neighbors.

Critics, musical and otherwise, write to the press making objection to "O Canada" as the national anthem. Their criticism would be much more effective if they would produce a better anthem.

The United States have only now decided to give its Great War veterans a bonus. Canada, infinitely less rich, gave its veterans a cash bonus immediately they came home. It was a creditable chapter in our history in the war.

Petroleum council is considering a by-law to prohibit canvassing on Main street for various funds, organizations, etc. All power to them! Canvassing the business section of any town is almost a daily occurrence. This is one prohibition law which will be readily endorsed by all.

Sixty thousand Canadians are now in process of invading Europe. Some ten years ago, another Canadian invasion of the old country began—larger one than this. This one is peaceful; an invasion of tourists. It is the greatest movement of tourists in the history of the country. Twenty-six first class steamers will take this number over and return in some three months. Of course large numbers will have to go via New York, but the majority are travelling by Canadian-owned boats. The drawing card is the Wembley Exhibition. The average cost for a couple will amount to around \$1,500; therefore, 50,000 Canadians will take out of the country this summer some \$45,000,000.

The Dominion Redpath Chautauqua, which opens here July 5th and continues for four days, offers such notable attractions as the irresistible comedy, "Cappy Ricks"; the Plantation Jubilee Singers; Geoffrey F. Morgan, well-known lecturer-educator; Bhaskar Hivale, native Hindu

and into the immediately adjoining states—that a good many Ontario towns and Ontario manufacturers are missing an opportunity. This unsnatched opportunity is at present represented by the bare and smoke-stained walls of more or less extensive factories close to the railroads or the main travelled roads.

In New York State or Pennsylvania, it is the almost general rule for the factories to carry in huge though neat letters some intimation of their purpose and location. The traveller gazing from the car window is interested to learn that this huge building is the birthplace of a certain variety of non-skid tires, or the home of a 99 per cent. pure baking powder. Nor is the name of the community lacking.

In Ontario the reverse is the rule—proved by a few striking exceptions. In most cases the passing wayfarer blinks at a huge factory and guesses what it is, or wonders from the car window to fonder: "What place is this, anyway?" If the train is on time he can discover the answer to this last question by laboriously searching his time-table. Otherwise, he can painfully crane his neck towards a station sign which is almost always hung where the passenger can't read it.

A good many Ontario towns are missing this opportunity to advertise themselves. And it is even more an opportunity for the industries whose blank walls fling a daily question at thousands of strangers going by, when they should provide an answer.

Woodstock Sentinel-Review.

## DEFINING A GENTLEMAN

Here's an anonymous definition clipped from a newspaper: A man who is clean both inside and out, who looks neither up to the rich nor down on the poor, who can lose without squealing and win without bragging, who is considerate of women, children and old people, who is too brave to lie, too generous to cheat and who takes his share of the world and lets other people have theirs.

## A LITTLE ABOUT GLENCOE

Glencoe is situated in the South-western part of the county of Middlesex, about 15 miles from London, and is the centre of a thrifty agricultural community, with good gravel roads in all directions, and within two and a half miles of Provincial Highway Toronto to Windsor and on route of the Lakes Erie and Huron and three trunk lines of Provincial Highway running east and west; has three lines of railway—Canadian National, Canadian Pacific and Wabash, with 25 passenger trains daily, and is a divisional point on the C.N.R., is the terminus of the London (30 miles) and Chatham (40 miles); 2 hours by train to Detroit and 3 hours to Toronto.

Glencoe has a good record from a sanitary point of view, which is further attested in the general good of its citizens, high school buildings, high and public schools, Carnegie Library and Reading Room, bowling greens, tennis courts, large curling and skating rink, ball grounds and recreation park—making it a most desirable place of residence.

Glencoe has several industries, including a foundry and manufacturing plant turning out woodenware and many kinds of machinery and employing some sixty workmen. Its splendid railway privileges and desirable location offer unusual inducements for other industries.

Glencoe has hydro-electric power for heating and lighting and manufacturing purposes; streets are well lighted; has pavement on the principal business street and granolithic walk leading to all residences; Bell Telephone, with 156 subscribers in town, connected with Carleton Place, rural lines extending over the greater portion of the county.

Glencoe is a sub customs port of entry and has handsome Dominion Government building, recently erected, containing post office, customs office and armory; has large municipal building containing opera house, seating 400, assembly hall, council chamber, fire hall and jail quarters; has Memorial Hall, with comfortable veterans' rest room and other conveniences.

The registry office for the West Riding of Middlesex is located here; the Fifth Division Court of the county holds its sittings here.

Glencoe has two bank branches—the Royal and the Bank of Montreal. The weekly newspaper, The Transcript, is one of the best conducted local papers in the province and has been established for upwards of fifty years; it has a large circulation.

There is a fine hotel building; stores and other business places carry large and attractive stocks, and have a large trade.

Societies and clubs are well represented.

Agricultural and schools fair is held here annually in the fall, also a horse show and races in June, there being an excellent half-mile track.

There is a Board of Trade, the secretary of which will be pleased to furnish any further information applied for.

Too many fellows like to stand around and grunt while the other man lifts.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

## THE ONTARIO RED CROSS

The fourth annual report of the Ontario division of the Canadian Red Cross Society, just received, makes interesting reading.

Too many people continue to think of the Red Cross as merely a war auxiliary.

On the contrary, the organization is always at work in this province.

It is still caring for the comfort of soldiers in hospitals or on lonely farms.

It is carrying a nursing service to some of the outlying parts of the province through its outposts, which, it is hoped, will be trebled during the present year.

Through the Junior Red Cross it is reaching over twenty thousand children in our public schools, who under its auspices are learning to play the game of health and growing up straight and strong to be good citizens of Canada.

Through its emergency department the Ontario Red Cross has held out a helping hand to Halleybury, Cochrane and the people of Japan.

The annual report gives many interesting details about these and other activities of the organization, and the extent of the work carried on, as shown by the pamphlet and by the "foreword" at the beginning of the report, published for the benefit of those who may not care to read the complete details, will be a surprise even to those who have been brought into touch with some one phase of the society's activities.

The work done in connection with the epidemic of typhoid fever at Cochrane last spring furnishes a typical example of the peace-time usefulness of the Red Cross.

The appeal of the stricken northern town was responded to promptly.

The Red Cross conducted a large emergency hospital for nearly two months.

It furnished food to a large number of indigent sick families, supplied medicines and sickroom supplies, sanitary appliances and antiseptics for the control of the disease, a trained personnel, medical nursing, etc.

There are few organizations of more general usefulness than the Red Cross Society.

## Little drops of water.

Often called a drizzle.

Make a summer picnic.

Very much a fizzle.

One's opinion of church union depends on whether one would describe it as a wedding or as a funeral.

A calf with two tails born on a farm near Wakefield has a great future before it as a fly swatter.

## Clearing Sale

J. D. JOHNSTONE, Proprietor; H. D. McNAUGHTON, Auctioneer.

## AUCTION SALE

— of —

**VALUABLE FARM**

Being north half lot 19, concession 14, Metcalfe Township, County of Middlesex, within a mile and a half of Walkers Station, M.C.R. This farm contains 100 acres, more or less, and has on it a comfortable dwelling-house, a good frame barn, and a good rock well. There are 10 acres of fall wheat, 18 acres of oats, about 15 acres of hay, 12 acres summer fallow; balance under pasture, including 25 acres of bush. This farm will be offered at the McKellar House, GLENCOE, on SATURDAY, JUNE 7th, 1924, at 3 o'clock p. m.

As Mr. McNeill is in poor health, no reasonable offer will be refused, but will be subject to his approval. Terms and conditions will be made known at time of offering.

Peter McNeill, L. L. McTaggart, Prop. Auct.

## Columbus Entertainers at Chautauqua Here

Through many seasons of appearances in musical entertainment work, the well-known Columbus Entertainers, who will be heard at the Dominion Chautauqua here, have become one of the most talented companies appearing on the platform.

The company consists of Miss Beatrice Baughman, pianist and impersonator, and Miss Miriam Hoover, violinist and pianist. Their programs include both classical and popular instrumental numbers. The introduction of character sketches by Miss Baughman adds interesting variety. Stories in Italian and negro dialects are also given, as well as selections from well-known modern writers.

The Columbus Entertainers will be recognized immediately as a company of premier artist entertainers.

## BEHIND STEEL DOORS!

THE home is no place for valuable papers. No matter what precautions are taken, you never can be sure that they will not be lost, stolen, destroyed or misplaced.

For a small sum, less than the cost of replacing most documents, you can give them the protection of a Safety Deposit Box.

Each Box has two keys—both different—one held by you, the other by the Bank. Each Box is locked in its own steel compartment. Boxes are of varying sizes and different rental charges. Let us show them to you.

## BIRD'S ROOFS

## Art Craft Roll Roofing

Homes, Garages, barns and sheds may all be protected and decorated with Bird's Art Craft Roll Roofing. It is—

1. A thrift combination of good looks and real economy.
2. Spark-proof and water-proof—affords complete protection.
3. For new construction or right over the old, wooden shingles.
4. Handsome—comes in natural red or green slate surfacing.

Bird's Art Craft Roll Roofing is made by Bird & Son, Limited (Est. 1795), manufacturers of Neponset and Canadian Twin Shingles, Paroid Roofing, Neponset Black Building Paper and Combination Wall Board. There's a Bird product for every sort of building.

We are headquarters for Bird's roofing, building papers and wall board.

## TOWN AND VICINITY

Reeve McPherson is at county council this week.

Mrs. Wm. Quick is moving into rooms over Lumley's drug store.

Regular business is having quite a time of it keeping tab on the holidays.

Rev. Frank Ballantyne, of London, is expected to occupy the Glencoe Presbyterian pulpit next Sunday.

Rev. D. G. Paton is a commissioner from the London Presbytery to the General Assembly meeting at Owen Sound this week.

The Major-General MacRae Chapter L.O.E.E. acknowledge with thanks the donation of \$10 from the Women's Institute of No. 9, Mosa.

The only observance of the King's Birthday locally on Tuesday was the closing of the banks and holiday hours in vogue at the post office.

Ontario orchards are now in full bloom, about two weeks behind normal time. Little harm was done there by the recent heavy frosts.

Secretaries of societies, clubs and other organizations are requested to mail The Transcript concise reports of all their meetings for publication.

Anniversary services will be held in Church of Christ, Mosa, on Sunday, June 8th. Rev. R. G. Quiggin, of Toronto, will preach at 11 a. m. and 5 p. m.

The death occurred at the family home in Welland on May 23rd of Willie Garfield Wehmann, youngest son of Mr. and Mrs. W. Wehmann, formerly of Glencoe, aged one month and three weeks.

The Presbyterian W. M. S. conference of the Glencoe district will be held in Tait's Corners church on Tuesday afternoon, June 10, at two o'clock. Mrs. Gauld, of Formosa, will be the chief speaker.

Chas. M. Macfie, of Appin, will have charge of the morning service in the Methodist church next Sunday in the absence of the pastor, Rev. A. S. Whitehall, at Conference. The evening service will be withdrawn.

Glencoe fire department gave a demonstration of their fire engine on Thursday evening for the benefit of a deputation from Rodney who are interested in promoting an improved system of fire protection for that village.

S. Irwin is remodelling his store now occupied as a tailor shop by Colin Leitch. Mr. Leitch will move his business into the rear room on the second floor of the building occupied on the ground floor by J. B. Gough & Son.

The semi-centennial of the Ontario Agricultural College, Guelph, is being celebrated next week. Two days of the celebration, June 12 and 13, have been set apart for farmers, when excursions will be run to Guelph at reduced rates.

Big attraction in Glencoe next Wednesday. Annual horse show and races at the driving park. Fast baseball games and music, etc.; play at the opera house in the evening. Take a half-holiday, come with the crowds, have a good time and meet your friends.

That youthful fiend who does so much speeding on Main Street south, almost suffocating others with his dust, should be squelched, and that right early. The question arises, Why are the authorities sleeping?—and another, Why the delay in oiling or watering the streets?

Quite a number of sturdy Hollanders have arrived in the community and have taken positions as farm helpers. They promise to make good citizens of our country. Some of them are typical Dutchmen, even to the wooden shoe or clog, which is quite a curiosity to Canadians.

No. 2 Wabash passenger train sideswiped a freight train near Attica, Indiana, on Sunday night. Six persons were killed and more than a score seriously injured. No. 3 is the train reaching Glencoe daily at 12.15 p.m. It is not probable that there were any Canadian passengers on board, as it is a through train.

An amateur dramatic club from Thamesville attracted a small audience at the opera house on Friday evening, presenting the play "Wiggin's Pop-over Farm." The acting was "fair to middling,"—with Wiggin's redeeming character. The show was under the auspices of the local tennis club, and was not a howling success financially.

The Oddfellows of Glencoe will observe the 105th anniversary of the Order on Sunday, June 15th, when Divine service will be held in the Methodist church at 11 o'clock, conducted by Rev. A. S. Whitehall. In the afternoon the graves of deceased brethren in Oakland cemetery will be decorated. At the same time the Daughters of the Empire will decorate the graves of Great War veterans.

## PERSONAL AND SOCIAL

—Miss Margaret Eddie was home from Woodstock over the weekend.

—John M. Beckton, of Toronto, spent the week-end at his home here.

—Mrs. Wm. Strachan, of Guelph, is visiting Mr. and Mrs. J. A. McCracken.

—Mrs. W. T. Rapley, of Strathroy, visited her sister, Miss Mary Tait, last week.

—Mrs. James Cobban, of Rose town, Sask., is visiting relatives in Dutton and Danwich.

—Mrs. Fred Lawrence, of St. Clair, Michigan, was a guest of Miss Mary Tait for a few days.

—Mrs. J. A. McCracken spent a few days last week in London, the guest of Mr. and Mrs. Harry Langford.

—Mrs. (Dr.) Hawley and children of Detroit, and J. D. McAlpine, of Windsor, are visiting Mrs. D. R. McAlpine.

—Mr. and Mrs. D. G. McPherson, of Rodney, and Horace Fedrick, of London, were guests at Wm. Hurley's on Sunday.

—Mrs. Barton Horbridge and son Bobby have returned to St. Thomas after visiting her parents, Mr. and Mrs. James Tait.

—Mr. and Mrs. Palmer, of Owen Sound, and Mrs. F. J. Wright and son, of Strathroy, visited at A. J. Wright's last week.

—Mr. and Mrs. Thos. Harris and son, of Buffalo, spent the week-end with the former's sisters, Misses Lizzie and Phemie Harris.

—Gilbert McAlpine and Mr. Pinkett, of Woodstock, motored to Glencoe and spent Sunday with the former's mother, Mrs. McAlpine.

—Mrs. Weir, of Ridgetown, is in Montreal attending the meeting of the General Council of the Presbyterian Women's Missionary Society.

—Mrs. (Rev.) G. S. Lloyd, of Vir den, Manitoba, formerly of Glencoe is in Montreal attending the General Council of the Presbyterian Women's Missionary Society.

—Archibald Finlayson and daughters, Jean and Mrs. C. McLean, and son, Archie, and Mrs. Rathburn, of London, motored to Glencoe and spent Sunday with friends.

—Harold Waterworth, of the Air Service, Selfridge Field, Mount Clemens, Mich., arrived on Monday to spend a couple of weeks with his parents here, Mr. and Mrs. Gordon Waterworth.

—Mr. and Mrs. Fred Evans, of Strathroy, were visitors at Mrs. T. C. Reycraft's on Sunday. Mr. and Mrs. Evans are leaving this week on the trip to the Old Country of the Canadian Weekly Newspapers Association.

Gospel meetings at Appin town hall Sunday, June 8th, at 7.30 p. m., if the Lord will. A hearty invitation is extended to everyone to come and hear God's way of salvation.

The indications of worms are restlessness, grinding of teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and the return of the attack will not be likely.

## POISONS SELF; DIDN'T KNOW IT

**Merchant Didn't Know What Was the Matter Until Nausea, Sick Headache and Bad Digestion Were Traced to Their Cause.**

A local merchant was surprised to find that his tired, nervous, bilious condition was due to poison from the food he ate. Instead of being digested and eliminated properly, his food was poisoning his whole system, causing sick headaches, nausea, gas on a sour, weak stomach, bad digestion, improper movement of his bowels. Having neglected his liver, that important organ became a menace to his health instead of an aid. Dr. H. S. Thatcher's Liver & Blood Syrup, however, made a quick difference in the way he felt, slept, ate and looked. This remarkable remedy acts directly on the liver and keeps the whole system toned up. It is sold with the understanding that you will be completely satisfied; otherwise, there will be no cost. Get Dr. Thatcher's from P. E. Lamley in Glencoe.

## CASTORIA

For Infants and Children  
In Use For Over 30 Years

Always bears the Signature of

Wm. D. Mitchell

What will probably be the last big round-up of horses in the West will take place within a few weeks in the range country southeast of Calgary. The round-up will be for the purpose of cleaning the ranges of stray horses, the Department of Agriculture supervising arrangements. The horses will be rounded into one central corral, where owners may claim their animals. It is expected that about 10,000 horses will be rounded up.

The Michigan Grange, said to be the largest farmer organization in the world, has invited the farmers of Middlesex to join in a motor tour with the farmers of all parts of America, commencing on August 7. It is announced that the caravan will proceed from Fruit Range, Michigan, to Cleveland, Jamestown, Springfield, New York, Providence, Concord, Saratoga Springs, Niagara Falls, Hamilton and through London, home to Michigan.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

## Mortgage Sale

Under and by virtue of the powers of sale contained in a certain mortgage which will be produced at the time of sale, there will be offered for sale by public auction on SATURDAY, JUNE 7th, 1924, at the hour of 4 o'clock in the afternoon, at the McKellar House, in the Village of Glencoe, by L. L. McTaggart, Auctioneer, the following property, namely:

All and singular that certain parcel or tract of land and premises situate, lying and being in the Township of Ekfrid, in the County of Middlesex and Province of Ontario, and being composed of the west half of lot sixteen, in the first range north of the Longwoods Road in the Township of Ekfrid aforesaid, containing one hundred acres, more or less, except railway lands, as described in the mortgage made by John W. McAlpine and Carrie Ellen McAlpine, and registered in the Registry Office for the Registry Division of West Middlesex as number 12392 for the Township of Ekfrid.

On the said farm there are said to be erected one dwelling house and two barns. The land will be sold subject to a reserve bid.

Terms of sale: Ten per cent. of the purchase money to be paid down at the time of sale and the balance within 30 days. For further particulars and conditions of sale apply to Harry W. Page, Esq., 15 Queen's Park, Toronto, Solicitor for the Mortgagee.

Dated at Toronto this 20th day of May, 1924.

HARRY W. PAGE, Solicitor.

## Mortgage Sale

— of —  
**Valuable Garage Property**

Under power of sale in a certain mortgage to the Vendor, which mortgage is now held by the Vendor and will be produced at the time of sale, there will be offered for sale by Public Auction, subject to a reserve bid, on TUESDAY, JUNE 10, 1924, at 1 o'clock in the afternoon, by George K. Gardner, Auctioneer, on the premises, The Tourists' Garage, Wardsville, Ontario, the following property, namely:

Being all and singular that certain parcel or tract of land and premises situate, lying and being in the Village of Wardsville, in the County of Middlesex, and the Province of Ontario, and being composed of part of Village Lot Number 16 on the south side of Main Street in the said Village of Wardsville in John Davis's survey of part of the Village Lot Number 16 in the First Range South of the Longwoods Road in the Township of Mosa, a plan of which survey is registered in the Registry Office for West Middlesex as Number 127, containing 3,120 square feet, which may be described as follows: Commencing at the intersection of Main and O'Mara Streets on the north corner of Village Lot Number 16, thence southeasterly along the north side of O'Mara Street, thence southeasterly parallel to Main Street 48 feet, thence northwesterly and parallel with O'Mara Street 65 feet to the south side of Main Street, thence northeasterly along Main Street to the place of beginning.

NOTE.—On this property is situated the premises and building known as The Tourists' Garage. In the building there are certain important fixtures which form part of the building and go with it and which are necessary and valuable in the garage business. The property is on the Government Highway and should be a money-getter for a purchaser.

For further particulars and conditions of sale apply to FRANK H. CURRAN, Bank of Montreal Chs., London, Ontario, Solicitor for the Vendor.

—a factor in modern business and social activity

IF the automobile were suddenly withdrawn from our modern business and social life, do you realize how speedy and complete would be the disorganization? Wider in its influence and effect than any other factor of present-day existence—the automobile has become of vital importance to commerce and society.

And Chevrolet can claim a prominent place in automobile progress, because it has brought quality and dependability within the realm of the popular-priced car.

Chevrolet transportation is the most economical per mile. Chevrolet reliability is an established fact among motor-car users. Chevrolet exceeds expectations in the beauty of its appearance and the completeness of its appointments.

The Chevrolet Utility Coupe (with its handsome "body by Fisher") is the choice of the commercial user—the business or professional man, or salesman, whose business the automobile has assisted so materially. The Utility Coupe is a car of which anyone may well feel proud.

Investigate Chevrolet prices and performance. Ask us about the GMAC Deferred Payment Plan for Economical Transportation.

### REMODELED WINDOWS.

In many of the very old country houses are to be found architectural features that are the despair of their modern occupants. Windows between connecting rooms are one of these; a wing was added to the house and the original windows were not removed. If the dissatisfied modern occupant owns the house she very likely will have the windows removed and the openings plastered. But occasionally we find a housewife so ingenious that she utilizes these odd features in a way that actually adds to the attractiveness of her house and preserves the old-time charm in its unity.

In one old farmhouse there were two such windows, one at each side of the door leading from the living room to the dining room. The owner removed the sash and hinged them, like doors, at the edge of the casing on the dining room side. Glass doors were procured and hinged in the same way on the sitting room side. Then shelves were placed in the enclosed space. And here the mistress of the house arranged her pretty glass and china. The result is most charming. Never have her glass and china appeared at such an advantage as when seen with the light shining through the glass doors. The soft colors add greatly to the decoration of both rooms and the dishes are protected from the dust.

A window between dining room and kitchen could have paneled doors and would make a very inexpensive connecting cupboard where everyday table accessories could be kept and food passed. If one is troubled about such a window within the house, it pays to think twice before going to the expense of having it removed; because, with a fraction of the expense, a charming feature may be added to the house.—A. M. A.

**CUTTING "CRAWLY" GOODS.**  
In working with organdies, crepes and other "wiry" or "crawly" materials, I find it is better to pin the material to paper before I cut into it. I used to have a hard time getting organdie collars to lie straight until I tried this plan.

Get big pieces of wrapping paper, or pin newspapers together in a strip. Lay your material on so that the selvages are parallel with the straight edges of the paper and so that the ends of the cloth are square. If the material does not have a visible grain or thread you may have to draw threads to get the ends even. It saves time in the long run.

Pin the goods to the paper at close intervals, not only along the edges, but, if the pieces to be cut out are small, all over the surface. I use needles or glass-headed pins—which usually have fine points—if the material is delicate. In this case it is a good plan to keep the paper with the cloth until it is basted and stitched.

You will not only find this a time-saver, but your finished garment will also look better, as the skirts will hang straight, the collars will not twist and the seams will require little pressing and will not draw.—M. J. M.

**SHELLAC YOUR KNOTHOLES.**

When we painted the woodwork in our bathroom we knew that we should

put a coat of shellac over the knot-

holes before applying the first coat of

white paint, for the experienced

Danish painter who was enameling

the woodwork downstairs was direct-

ing our work. We forgot, however,

to do it on one door. Within a few

months our carelessness was revealed.

Those knotholes stood out in yellow

on the white enamel door. We shall

not soon again forget to shellac

knotholes before we paint.

It is a good plan, by the way, to

shellac the entire surface before ap-

plying the flat coat of coats of paint

which are the base for enamel. In

enameling furniture or book shelves,

or in doing any sort of fine interior

finishing, much more uniform results

can be obtained if the shellac is put

on first. It dries very quickly, within

an hour or so, and so your work need

not be delayed.—M. J. M.

**VERSATILE GINGERBREAD.**

My gingerbread is easy to make and

delicious to eat. You can bake it on

baking day, with the bread, and save

fuel. You can vary the recipe by

adding nuts or raisins, or both. With

these additions it tastes like real fruit

cake.

You can bake it in a shallow pan

and cut in squares, or in an angel-food

pan. Or you can bake it in muffin

pans. This way is the most conven-

ient for the children's lunches.

Here is the recipe: Bring to boil-

ing point one cupful of molasses and

1-3 cupful of butter.

Add 1-2 teaspoonfuls of soda and

1-2 cupful of sour milk. Beat vigor-

ously.

Then add 1 egg, well beaten, 2 cup-

fuls of flour, 1 teaspoonful of ginger,

1/2 teaspoonful of salt, 1/2 teaspoonful

of cloves, 1 teaspoonful of cinnamon,

1/2 cupful of raisins or nuts, or both.

The raisins and nuts may be omitted

if desired.

Bake slowly forty-five minutes.

—E. F.

**IF THE PITCHER DRIPS.**

If the milk or cream pitcher drips

from the spout, letting a line of liquid

run down and spot the tablecloth, try

rubbing a little butter on the under

side of the spout close up to the rim.

The liquid will not run over the

greasy surface.

**WRIGLEYS**

after every meal

Cleanses mouth and

teeth and aids digestion.

Relieves that over-

casten feeling and acid

mouth.

Its l-a-s-t-i-n-g flavor

satisfies the craving for

## "When Hearts Command"—

By ELIZABETH YORK MILLER

"When hearts command,  
From minds the wisest counsellors depart."

### CHAPTER XX.—(Cont'd.)

But, oh, what happy things Jean hoped for from this marriage! Even at great personal loss to herself. She was—she knew—losing a daughter and not, as traditionally expressed, gaining a son. Alice would leave her for ever. Her own life was cast in less pleasant lines. She had the burden of Hugo, and there was not much fun in that, but at least she would be occupied, and perhaps, after all, it was better to have Hugo than nobody at all. Despite his threemonths and the dreadful uncertainty of him, Jean found that she was becoming quite attached to the strange little man. Hugo was an awful creature, one never knew for one moment to the next what he would do or say; he made existence lively and uncomfortable, but he was at the same time woefully pathetic and anxious to please.

Love, as understood between men and women, seemed to have no place in his life-like consciousness. He made no claims upon her as a wife, but he did find his place in her affections. She began to see how, after all, everything was for the best. How could she have been so cruel as to have expected poor Hugo to spend the whole of his life in that dreadful place? What she had regarded as a cross might well prove to be her crown. Think what it would have been like alone in the world without Alice. Perhaps Hugo and she would stay here all the time, and if the heat got too unbearable in the summer, Hector Gaunt might invite them up to the farm for a few weeks, or some very, very cheap little place in the mountains could be found.

It was extraordinary how life simplified itself. One only had to wait, to take things quietly, not to worry, but it was difficult not to worry sometimes—however, know that everything was for the best, and suddenly the clouds slipped over and there was the sun that was always shining somewhere.

She sat down to count her money and discovered that a few of the clouds still lingered. Again that guilty feeling came over her. She had pretended to Hector that paying him back for all he had spent in getting them settled would be a matter of a few weeks at the most, but how could it would have been had he accepted the money she had vainly tried to press upon him. They would have had nothing to live upon at all. Next quarter day was a long way off. Should she write to Christopher Smarke and remind him of his promise? She had asked Christopher for money.

Alice's few hundred pounds were inaccessible for immediate purposes. One had to give thirty days' notice of withdrawal at the savings bank. And it was principally for Alice that she required money. They would have to go to Genoa, too, and there would be hotel expenses. Oh, dear!

Well—always remember somewhere the sun is shining. At least there was enough to buy the silk for the wedding dress. The next day they went gaily into San Remo and made that interesting purchase, and in the big lace shop Mrs. Carnay fell a helpless victim to the lure of an old confirmation veil—only Lire 500, not more than five pounds sterling—and three yards of Venetian rose-point, the price of which had better not be set down. Before she was half way home, poor Jean made up her mind very firmly that she would forget at once and for ever the hole that Venetian point had made in her heap of soiled bank-notes.

When they got back, tired but immensely satisfied, a happy surprise awaited them. Jean discovered that she need not have worried all day about poor Hugo being left alone at the Villa Charmil, to fall over the cliff or otherwise make trouble for himself. Gaunt had looked in on his way to market and taken Hugo very firmly to Ventigimilia. Hugo had had a lovely day, and there he was with Hector Gaunt having tea in the arbor when his womenfolk returned, and Gaunt had brought them all sorts of things to eat, and there were new strings for the old guitar, and yards and yards of muslin for Jean to make up into curtains and cushion covers, and a new pipe for Hugo, and a big box of chocolates for Alice. Well, no end to it, really!

Jean tried to be shocked at Gaunt's extravagance, but in her heart she was pleased—though guilty to accept so much—and Hugo was as happy as a sandboy.

The little bride-to-be sighed for her lover, but there could be no sadness in this brief parting, and suddenly when dinner was over and the sea wore a filmy opal sheen under the light of the young white moon, and while Hugo was trilling an old Spanish love song by the aid of the guitar, Alice recollected that she could write a letter to Philip. Practically the first love-letter she had ever written. She slipped away to her room, opening the window wide so as to be sentimentally touched by "Uncle John's" song. It was like a play.

Hugo, his eyes gleaming slightly awry and his toe beating time, sat in the earwiggy arbour and drenched the world in thin, sweet melody. There were faded red and yellow ribbons on the handle of the guitar, and Gaunt had playfully decorated the musician's ear with a red rose.

They laughed at him. Jean and Hector Gaunt, and he laughed back at them with the glee of a humiliated child—but their laughter was near to tears.

"I think he enjoyed himself to-day," Gaunt said as Jean and he sat down

side by side on the edge of the steep terrace.

Jean nodded, her throat uncomfortably full.

"You've been so good to him, Hector. So kind and good to all of us. It's no use my trying to thank you. I simply don't know how to begin."

Gaunt enclosed the hand which lay nearest him in his big flat, tenderly, gently. Something stirred and fluttered in her heart. Oh, dear Heaven, so long ago it was they had met and loved each other—like a dim dream now.

"How little I've counted in your life, my poor dear—I, who expected to be so much," he said quietly. "You don't know what it means to me to have you here—you, and the little girl. Jean—I'm coming to the wedding. I'm—I'm going to give her away at the church ceremony. Hugo doesn't object, I asked him."

He released her hand, and for safety's sake she let it lie in her lap. "Hugo doesn't mind?" she asked, her voice husky. "Did he let you know that he understood about Alice?—about her not being his own daughter?"

Gaunt shook his head. "On the contrary, he was rather emphatic that she is his daughter. But he said he thought it would be better if I gave her away."

He was horribly pathetic about it—little wretch! The years in that Place, as he calls it, have unnerved him. He feels that he'll be bewildered and perhaps make a mistake, and he'd be much happier if I stood to her in loco parentis. That was the way he put it."

Jean quivered and sighed. It was the one thing about Hugo that she hated; he would persist in that tiresome attitude. He had even managed to fill Alice with suspicion that he was her father.

At the present moment he had stretched himself from the fire of Spain to "Knocked 'em in the Old Kent road." There was the sound of Alice's window going down with an insouled bang, and Gaunt rose and stretched himself. That was Hugo, a faun, an elf, an imp, making them all, figuratively speaking, dance to his tune. The atmosphere was swept of sentiment.

"What about spending a few days with me?" Gaunt suggested. "The ladies, I take it, will have their hands full with all this darning, and they'd be glad to get you out of the way."

Hugo beamed upon his idol, and Jean's heart gave a joyous leap. How excited he was of Hector to think of such things!

"Are you sure you want me?" Hugo asked eagerly. "Could I help with gardening in that Place, you know?" "Fine! Why didn't you tell me before? Of course I want you, and of course you can help. What about tomorrow? I'll tell Gaunt for you directly after breakfast."

"What's the matter with to-night?" Hugo inquired. "It won't take me ten minutes to pack a bag."

There was a short, excited argument. Wasn't he too tired? It was a long pull up Monte Nero.

No, Hugo wasn't a bit tired. He danced excitedly and begged to be allowed to go to-night. They could tie his bag and the precious guitar, which he now regarded as his, to the mule's pack. It would be nothing, climbing up in the moonlight. Finally he was allowed his way.

It seemed lonely after he had gone, Alice, who had emerged, to see what the racket was about, remarked that Uncle John made the place seem quite gay, and it might even be a little dull without him. Then she went back to the letter which had been so rudely interrupted by the "Old Kent road," and Jean, having unpacked their purchases, sat dreamily in the salon with the Confirmation veil that was to be Alice's wedding in her lap, stroking it with soft and tender gestures.

Dear Alice—dear, sweet little daughter! They seemed safely to have passed a terrible crisis, bridged a yawning horror.

Two weeks slipped by and they were well into the third, when one morning the post-girl laid another letter, bridged the one which arrived daily from Genoa.

Alice brought it in and gave it to her mother. "For Uncle John," she said. "And Mr. Gaunt won't be in to-day. It looks important: I suppose we ought to send it up to the farm."

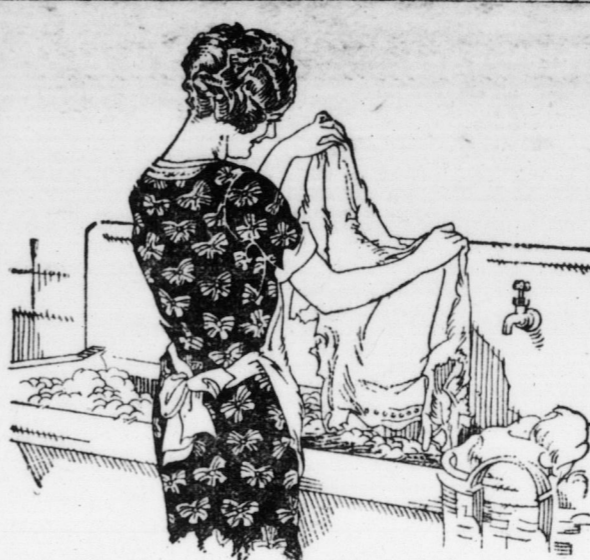

It did look important—"John Balis, Esq., c/o Mrs. Carnay, Hotel Mimosa," etc., forwarded on to the villa. In the upper left-hand corner were the name and address of a London solicitor.

Jean's fingers itched to open it. Of course Christopher Smarke knew that Hugo was calling himself John Balis—she had written and warned him—but this letter was not from Christopher.

"I'll take it up myself," she said. (To be continued.)

Drawer 55, Warton, Ont.

## Making wash day pleasant—

Just use Rinso where you used to use bar soap—for soaking, boiling, or in your washing machine.

THE hardest part of wash-day, rubbing, rubbing, rubbing, has given way to the new method of soaking the clothes clean with Rinso.

This wonderful new soap gently loosens the dirt and a thorough rinsing leaves things white and glistening as you never could get them before.

Only spots where the dirt is ground-in, such as neck bands, cuff edges, and the like need a light rubbing, and a little dry Rinso rubbed on these spots quickly makes the dirt disappear.

Rinso is sold by all grocers and department stores

**Rinso**  
MADE BY THE MAKERS OF LUX

### The Young Huntsman.

Through the gray leaves of the stark, November trees  
We saw him pass by, urgent as a fire,  
Love, the young Huntsman, riding with the breeze;  
Red in the distance, the little Fox,  
Desire.

Home with the pale moon, home with the star,  
Home with his quarry, hunted to the death,  
Oh, but the Red Fox rode him fast and far;  
Love, the young Huntsman, draws a weary breath.

Blinds down and lamplight, veiling starry eyes,  
Off with the silver spurs, gone the scarlet coat,  
Love, the young Huntsman, grown old and wise,  
Sits by the fireside, incredibly remote.

Close by the chimney shelf, close the Huntsman keeps,  
Nods in an armchair, dreaming of the chase;  
Love has killed Desire; now he sits and sighs,  
Gray and regretful, for a little space.

—Faith Baldwin.

### EXTRA CURTAINS.

Few housekeepers, who have not tried it, realize the saving of work by having a few extra sets of washed draperies for the windows. Many times fresh curtains for a bedroom or the living room or dining room will be needed in a hurry. And it is sure to be when it is inconvenient to take down the soiled ones and launder them immediately.

To have a few in reserve is an excellent plan. Then the soiled one can be done at leisure and at one's convenience. The simple, straight hangings are more desirable for summer when the windows are open.

The lace or lace-trimmed curtains may then be saved for cold weather furnishing.

**Minard's Liniment for Dandruff.**

Damage by Field Mice.  
Field mice in the United States every year kill thousands of valuable orchard trees and do millions of dollars worth of damage to grain and other crops.

**For the June Bride**

**3 HEAT GRILL**

Boils, broils, fries or toasts.  
Any two operations may be carried on simultaneously. It may also be used with an oven to bake or roast.

Controlled by a three heat reversible switch. Equipped with two aluminum dishes, each 21 plates capacity, also bright nickel cover to fit either dish, or for use as a reflector or cake grille.

For sale by dealers everywhere

Hotpoint Division of Canadian General Electric Company, Limited.

## DIRT REMOVED FROM WESTMINSTER

GILDING AND HERALDIC DESIGNS ARE NOW REVEALED.

One Enthusiastic Workman Reverently Undertakes Task of Cleaning in Historic Abbey.

For the first time in many years, Westminster Abbey is being spring-cleaned, not, of course, with soap and water and mops, pails, electric sweepers or any other of the paraphernalia used by the housewife in the annual upheaval, but with a little oil, a soft brush, a cloth, much patience and the labor of one man.

R. J. Quennell, who has undertaken the work of renovation of the old gates, tombs, shields and other glories in Westminster Abbey, is a neophyte workman and cleans and polishes with reverent care, not forgetting to step back every now and then to admire the beauties which are being revealed through his skill and craft.

This month Mr. Quennell is busy on the huge gates of Henry VII's Chapel, which have not been cleaned for a hundred years or more. These beautiful gates, which have guarded the tombs of kings and queens for centuries, had become so dirty that it was difficult to see whether they were made of bronze or wood, or what were the badges which adorned them. Previously the only attention they had received was an occasional rubbing down with oil and though this had kept them in a good state of preservation it has also tended to attract the dust which has concealed so much of their splendor.

Polishing the Coronation Chair. One of the first tasks Mr. Quennell undertook was the cleaning of the famous old coronation chair, which was quite black with dust and dirt, and moreover was a little damaged; this latter being the work of the suffragettes during the votes for women campaign in 1912. Now the chair stands in all its original beauty, with its gilding and the birds and foliage painted on the oak hundreds of years ago once again showing.

One of the most beautiful monuments in the Abbey, the tomb of the Earl of Lancaster, which sightseers have been accustomed to look on as black, has also just been cleaned by Mr. Quennell. Underneath the accumulated dirt of the ages, gilding and heraldic designs still retaining much of their original color and beauty, have been revealed.

Incidentally, this workman made an interesting discovery while at work on the Lancaster tomb. Lodged in a little recess between two of the stone angels, he found a piece of dirt about the size of a large marble. He managed to get this out and chipping it with a knife he split it open, revealing inside, like the kernel in a nut, a small piece of gilded stone. This proved to be a tiny portion of an angel's curl, which, experts declare, must have been broken off very soon after the monument was put up. For hundreds of years it had lain in the crevice with the dirt collecting about it. The gilding was in perfect condition, which seems to show that dirt is not such a bad preservative after all. The fragment has now been placed in the Abbey Museum.

**Reclaiming the Goodwins.** The sea is continually either eating away from or adding to our "light little island," but few people realize the full extent of its activity in this direction.

One of the best examples of this is the Goodwin Sands, that "graveyard of mariners," on which is to be dumped the 50,000 tons of refuse which will be brought to the surface weekly with the development of the East Kent coalfields begins.

Thousands of tons are moving steadily landwards at the rate of some fourteen yards a year. The "dumping" process may speed this up, and if it is continued long enough the sands may rejoin the mainland, and one of the greatest perils of our coast be removed.

**Quite the Latest.** She was an elderly lady, and on entering the shop she had asked to be shown some tablecloths. The salesman brought out a large variety, but all to no purpose. She did not seem to be satisfied with any of them.

"Haven't you got anything quite new?" she asked.

The perspiring salesman brought another pile and laid it on the counter, saying: "These are quite the latest thing, madam. You will notice that the edge runs right round the border and that the centre is in the middle."

"Dear me, yes," remarked the dear old thing, peering at the goods through her spectacles. "I will take half a dozen of these, I think."

**Expert's Work.** A Scotswoman once applied to a collector for advice. After she had detailed all the circumstances of the case, says the Tatler, the lawyer asked her if she had stated the facts exactly as they had occurred.

"You say, sir," she replied, "I thought it best to tell you the plain truth; you can put the lies (if any) yourself."

# Soils & Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

## PROTECTING THE HARNESS.

Hanging the harness where the horses passing back and forth will not brush against it, and where none of the dangling straps will trail upon the floor necessitates the placing of hooks upon the wall far above one's head. But the difficulty experienced by the boys in removing and replacing the harness, where such precautions had been taken, caused a certain considerate farmer to employ a novel extension handle.

A three-foot length of four-inch board was dressed to provide a handle at one end and a strap of band iron was nailed upon the other end to make a wide loop. Upon this board the harness hook was fastened and heavy spikes were driven partially into the wall at heights of four and seven feet, respectively.

With this arrangement, when a harness is to be placed upon the hook, the board is suspended from the lower spike where the heavy pieces may be arranged upon it with ease. It is then raised by means of the extension handle to the second spike, where it is supported safe from accidental disturbance and ready to be lowered again without difficulty.

## A ONE-MINUTE MILK STOOL.

We have tried many milk stools but none that we like better than our present one which will stand so much knocking around.

The construction is simplicity itself. Take a piece of one-inch board and cut to a square about eight inches on a side. Smooth and round the edges and corners. Fasten this to the bottom of an old bucket of the desired height, using wood screws.

## WHY MY CAMERA HAS BEEN OF VALUE TO ME.

My camera has been of value to me both from a gainful and a sentimental standpoint. I find that a sharp, clear picture of some prize-winning member of the farm yard, or some member of the poultry that has established a noteworthy egg-laying record, ac-

companied by a brief caption, will bring a cheque from most any farm journal. Newspapers and magazines are always in the market for pictures of something unusual or noteworthy.

One day my neighbor's boys caught a woodchuck that certainly must have been the great grand-dad of all his tribe. One of his lower tusks was over two inches in length. It protruded from the side of his mouth, extending above his nose where it curved at the end like the horn of a Rocky Mountain goat. One is apt to run across these freaks of nature either in forest growth, the animal world or geographical formations; and there is a wide market for good pictures of that kind.

From the sentimental standpoint the pictures of your family early attain an almost priceless value. The careless easy poise assumed among home surroundings, is a great deal more natural than the stiff, stilted attitude assumed before the photographer. Then the family gatherings. Then there was "Old Nell," the kindest, gentlest horse that ever lived, who seemed to be always trying to acquaint herself with your every wish that she might render to you faultless service. I always left the lines tied to the harness when cultivating corn with her.

The reverse was "Prince," in the picture I can detect that same roguish glint of eye that was characteristic of him as he used to look back over his shoulder when he had reached the end of the corn row, seemingly searching the side of the freshly turned earth to acquaint himself if one single hill had escaped his devastating feet. Undoubtedly in the event of there being any survivors he was fully as much surprised as I was. Then the faithful dog, and the cat who, back in 1900, was named "Century." When the years pass, and the subjects of these pictures have passed away, as many already have, these pictures will be of unparalleled value, for there is nothing that will go as far as they in bringing back the happiest days of my life.—G. E.

## "Oh, What Shall I Do?"

### Everyone Should Learn What Can Be Done in Case of Accidents.

BY MARY K. GREGG.

These condensed directions and suggestions for first-aid-in-the-home can be clipped out, pasted on cardboard and tucked up near the medicine or emergency chest, where all who pass by can read them and learn them so as to have them in mind in case of need.

**Wounds**—1st, check bleeding; 2nd, cleanse wound; 3rd, keep wound at rest; 4th, protect wound from dirt or dust. Do not touch wound with dirty hands. Never apply cologne, tea, or leaves or any such substance to check bleeding. If impossible to cleanse hands before rendering first aid, cover wound with piece of clean old linen soaked in solution made by dissolving 1 teaspoon table salt in a pint of boiling water.

**To Check Bleeding**—1st, apply water as hot as can be borne, or clean ice-cold water, or direct pressure with bit of clean cotton. A tourniquet may be improvised from a bandage or handkerchief. If in arm or leg, elevate injured part. Do not give stimulants. They never apply cologne, tea, or leaves or any such substance to check bleeding. If impossible to cleanse hands before rendering first aid, cover wound with piece of clean old linen soaked in solution made by dissolving 1 teaspoon table salt in a pint of boiling water.

**Burns**—Use gauze, cotton, or linen soaked in solution made by dissolving 1 teaspoon baking soda to a cup of water. Cover burn. Olive oil is good to cover burn. Burns from carbolic acid will be relieved by applying common vinegar. Alcohol is the best antidote, and either alcohol or vinegar may be used externally or internally for this purpose. Carrot oil may be used, which is equal parts of linseed oil and lime water. Keep air away from burned parts.

**Sprains**—If arm, support with sling; if leg, apply splint and keep slightly elevated. To relieve the pain, apply a hot fomentation or an ice poultice.

**Hemorrhage from Nose**—Keep person sitting up; never allow head held over basin. Give fresh air; stretch arms upward above and behind the head. Pinch nose below bridge between thumb and forefinger. For extreme cases, spray nostrils with alum solution, 1 to 2 teaspoons to a pint of water.

**Foreign Bodies in Eye**—If under upper lid, invert lid by drawing it down; hold a toothpick or match across it, and roll lid back. Take a twist of absorbent cotton or clean linen and remove foreign body. If lime should get in the eye, wash thoroughly with warm water and oil, such as olive oil.

**Fractures**—Send for doctor at once. While waiting, support injured part. If patient has to be moved, bandage a pillow around the fracture with two or three pieces of board outside the pillow to act as splints.

**Poisoning**—Remove unabsorbed poison as quickly as possible by giving emetic such as (1) tepid water, 2 to 4 glasses, or add as much salt as water will dissolve. (2) Alum, ½ teaspoon for child or 1 teaspoon for adult mixed with honey or syrup. (3) Mustard can be used; ¼ to 1 teaspoon for child; double dose for adult, in one glass of warm water. If patient cannot swallow, give a stimulating injection into the rectum. To remove the pain, and irritation, give milk, white of egg and milk, flaxseed tea, or any gruel. These to be given internally.

**Ptomaine Poisoning**—Symptoms: acute inflammation of stomach and bowels, pain, cold sweats, and sometimes chills. Remedy: first get the offending substance out of system, give castor oil; wash the stomach, see doctor.

**Poisoning from Inhaling Gas**—Remove from poison air as soon as possible. Use artificial respiration; give stimulation and an injection of salt solution.

**Drowning**—Artificial respiration. Draw arms away from sides and upward so as to meet over the head; then brought down to the sides, the elbows made to come almost together over the chest. This movement continued at rate of about 16 per minute. Friction and warm blankets are needed when breathing has started.

**Points to Remember**—To keep a wound clean is one of the most important duties. Direct pressure is the most effective method to check bleeding. A tourniquet bandage should not be left on too long or serious results may follow. Best to remove after two hours, even if you have to re-apply it. Stimulants tend to increase bleeding. The dirt that is under the finger nails may cause blood poisoning if it gets into a wound.

Every home nurse should know the substance which can be used to quickly empty the stomach and be quick to use it when necessity arises. In all forms of poisoning, cholera morbus, etc., the first and most important thing is to get rid of the offending substance as quickly as possible. Even if diarrhoea is present, a dose of castor oil should be given, to quickly clear the food tract.

**Things to Have for Sickness**—Fountain syringe, bed pan, rubber sheet, box of bandages 1 inch wide; also 2 to 2½ inch.

**Some Improvised Appliances**—A shawl or blanket pinned to clothes-bar makes a good screen to protect patient from draught. Roller towel makes good abdominal bandage. Bricks and flat-irons wrapped in newspapers are good when artificial heat is needed. Save old table linen, sheets, handkerchiefs, etc., for bandages, poultices, etc. Old blankets and

flannel underwear for applying hot fomentations.

**For Home-made Medicine Chest**—Olive oil, castor oil, a laxative of some kind, glycerine, vaseline, turpentine, borax, mustard, ginger, oxide of zinc ointment, boric acid, and peroxide.

**Household Disinfectants**—A disinfectant is a substance that kills all germs that have power to infect or cause disease. There are two classifications of disinfectants: natural and chemical. The natural are sunshine and heat, and the chemical are sulphur, formaldehyde, etc. Sunshine is the best of all. It has power to kill tuberculosis germs in a few hours. Fresh air is needed, soap and water is necessary for cleanliness. Heat—the boiling of clothing, utensils, etc., is one of the easiest way to kill germs. All soiled dressings, excretions, etc., from wounds and contagious or infectious diseases, should be burned.

**To Fumigate a Room**—Close completely. Arrange all furniture so that surface is exposed to fumes. Open all drawers. Mattresses should be thrown over foot of bed. Use 1 pint of formaldehyde to 1,000 cubic feet. Allow room to stay closed 12 hours.

**An Antiseptic** is a substance that prevents growth of germs, but does not kill. Listerine and boric acid are antiseptics. To make boric acid solution, add as many crystals as the water will dissolve. This is a mild, irritating solution, and is used in eye treatment and surgical dressings. Fumigation cannot be depended on to kill germs.

## HOGS

"In the making of bacon it must be remembered that the right type of pig may be ruined by heavy feeding on barley, corn and other heating and fattening feeds just after weaning and before he is properly grown. Rations should be made up with the idea of promoting growth rather than finish. The best growing feeds are middlings, shorts, finely ground oats, skim milk, buttermilk, whey tankage (alfalfa, red clover, green), rape and roots. The bacon hog must be grown first, then finished. Heavy feeds too early in life tend to round the ribs, shorten the side and lay excess fat on the back and ham as well as make for a flabby jaw and a wasteful middle. Many well bred hogs of good type are spoiled by early pushing with the wrong kinds of feed. Middlings, oats, milk, whey, tankage, and the clovers are high in protein, and so build bone and muscle rather than fat. Exercise helps to build muscle also, and should be freely given to young pigs.

"Generally speaking, it is well to grow the pigs until they are four- and one-half to five months old and then finish them as quickly as possible by gradually adding barley in place of middlings, a good finishing ration being composed of two-thirds barley and one-third finely ground oats. If skim-milk is not available, tankage up to 8 or 10 per cent. in the ration will prove profitable, particularly in winter feeding. The plan should be to grow the pig before he is finished. The all too prevalent idea that pigs make cheaper gains when around 200 lbs. is erroneous. Pigs, like all other animals, make most economical gains when young. It does not pay to hold them over the market weight, either in gains or in market price."—Ontario Government Pamphlet.

## Egg Production at O.A.C.

The average egg production of the one thousand pullets that were trapped for the year was 168 eggs each. We are trying to improve the strain in size of body, size of eggs and color, rather than increasing the number of eggs.

Five pens of ten pullets each were placed in laying competitions. The fifty birds averaged slightly above 190 eggs each. The high bird of those in the contests was 263 eggs, and the high bird of those on the plant was 295 eggs, so says Prof. W. R. Graham, O.A.C.

The guns aboard the U. S. battleship Colorado can fire a one-ton shell a distance of nearly nineteen miles.

## DAIRY

After twenty-six years' experience handling a dairy herd on my farm of 145 acres under varied conditions, I am firmly convinced that it pays to graze cows well throughout the entire milking period. Early spring and summer pastures are highly succulent, containing a large amount of water and a low amount of dry matter. Cows producing a heavy flow of milk cannot consume enough pasture to supply the essential amount of dry matter.

In past years, when my farm-grown supply of grain was exhausted, I thought I could economize by not grazing my cows while on pasture, especially during the early spring months. However, after thoroughly trying the matter out I am convinced that it is unprofitable economy.

Every dairyman knows when the cows go to pasture in the spring the milk flow for a short time increases. This may continue for a month or two, then a gradual falling off becomes apparent. Not infrequently before this decline is checked a heavy loss develops. Pasture does not contain sufficient concentrates to sustain heavy-milking cows for any length of time. For this reason I find it unprofitable to depend upon pasture alone even for a few weeks during early spring.

Some good dairymen I know think it does not pay to graze cows on pasture, as the increased milk flow is not sufficient to offset the cost of the grain ration. This in a measure may be true if taken alone from the standpoint of immediate increase in milk production. But there is something more important. I endeavor to encourage a heavy uniform milk flow throughout the entire milking period.

Grazing on pasture keeps the cows in proper physical balance. The cows keep in better flesh, give less trouble before this decline is checked a heavy loss develops. Pasture does not contain sufficient concentrates to sustain heavy-milking cows for any length of time. For this reason I find it unprofitable to depend upon pasture alone even for a few weeks during early spring.

## The Live Stock Market.

Up to the end of April this year the sales of cattle at the five principal markets of the country, according to Dominion Live Stock Branch returns, totalled 224,873 against 211,085 in the corresponding four months of last year; of calves 78,284 against 67,151; of hogs 442,095 against 360,496, and of sheep 50,129 against 69,132. In addition there were killed during this year, in the four months, 44,211 cattle against 41,621; 31,777 hogs against 61,583, and 5,279 sheep against 16,985. Top prices for butcher steers averaged on May 1 this year, compared with the same date last year, \$7.41 to \$7.18 per hundred, veal calves \$8.50 to \$8.89, select hogs \$8.06 to \$11.19, and good lambs \$13.41 to \$12. In computing these prices the markets at Toronto, Montreal, Winnipeg, Calgary and Edmonton are averaged.

## Soldering Irons for Putty.

When removing a broken window-pane from an old sash where the putty has weathered and baked to the hardness of brick, it is usually a difficult matter to scrape the putty away, and bruised and torn fingers often result. There is an easy way to get around this.

If a soldering iron is heated and drawn over the putty, it will be softened to such an extent that it can be removed almost instantly. Any heated iron will do the trick.

## Spitting Carburetors.

Aside from worn mechanism, spitting or back-firing in a carburetor can very often be traced to a little water that has collected in the gasoline. The water is usually the result of condensation of moisture within the gasoline tank, something that cannot be avoided.

Again the trouble may be due to a clogged high-speed spray nozzle, which has a very small hole that can easily clog. A careful cleaning is the remedy for both the above-mentioned troubles.—Ed. Henry.

## MR. WRIGLEY'S COUNTRYMEN

(From London Opinion.)

"I believe I've got America. I hear a persistent chewing sound."

## Home Education

"The Child's First School is the Family"—Froebel.

### Baby Talk—By Florence Bascom-Phillips.

The half intelligible "baby talk" little Buddy learned sounded cute to his mother. She taught it to him, herself, with such speeches as the following:

"Does muzzer's 'tittle snooky-okums' want a drink of vew? Sure him do. B'ess his 'tittle heart.' 'Baby see ze titty tat.' 'Him wants a nice eggie to eat, don't him? Yes him do.'"

When he began to talk he combined a little lisp of his own with the erroneous pronunciation and construction which he had been taught, and it sounded so irresistibly cute that no effort was made at home to correct it. Later, however, when he entered school, it ceased to be cute and became a problem. When he was seven or eight years old I taught him. He could read as rapidly as the usual beginner, but there was scarcely an intelligible word to be heard. I tried in vain to teach him to speak plainly, and when I left the school he still habitually lapsed into his baby lisp and pronounced his words and chose his constructions irrespective of any rules ever written.

How unnecessary for a child to start his school life so handicapped!

## POULTRY.

During the heat of summer I find that the hens with a shady range keep up their appetites the best and lay more summer eggs. When the hens dust they select cool moist soil in a shady place rather than hot dry dust in an exposed position. Young stock like the rest during the heat of the day. I note that hens with a cool summer range seem less apt to stop egg production and start a summer moult.

Fine shade can be provided every year with corn and sunflowers. After the plants are up a few inches they grow so fast that very little injury will be done to the foliage by the hens. Fruit trees make a fine permanent shade on the range. My plum and cherry trees in the poultry yards are seldom troubled with curculio although it has not been necessary to use much spraying to control that pest.

Evergreens like Norway spruce are good for shade and windbreaks. I have noticed that a still warm day does not retard the hens from ranging like a hot windy day. The wind blows the feathers away from the hen's warm body and makes ranging uncomfortable. A windbreak on the range increases the number of days each summer that the hens will continue foraging.

Presently houses for young stock can be raised on skids providing a cool shady place beneath where the poultry can dust and rest during the heat of the day. In furnishing artificial shade with boards or canvas be sure they are well built or sudden storms may blow the shelter down and the poultry cause a serious loss.

## SHEEP.

The presence of worms in a flock is indicated by the lambs becoming dull and listless, the wool dry like harsh; the skin, which should be a bright pink, becomes pale, and the eyelids when turned back show the membranes to be clear instead of a net work of blood vessels. In the last stages, a dropsical swelling appears under the jaws. When worms are present, the lambs should be drenched with some vermifuge and changed to fresh pasture. Copper sulphate, commonly known as blue vitrol, is an excellent remedy, but one that must be used with extreme care owing to its poisonous nature.

Sheep to be treated should be kept off feed and water for eighteen hours before treating. Just before treating dissolve one ounce of copper sulphate in three quarts of water and administer the doses as follows: For a three months old lamb, one ounce of the solution; for a six months old lamb, two ounces; for a yearling, three ounces and for a mature sheep, four ounces. Any of the solution left over should be destroyed, as it is not safe to use unless fresh. A solution can best be obtained by suspending the ounce of copper sulphate in a cloth and lowering it in the water only far enough to submerge the copper sulphate. In measuring out the doses, the size and strength of the lamb should regulate the amount, rather than the age. A weak lamb, somewhat small for its age, should not receive as large a dose as indicated above.

## Handy Storage Bin.

In most laying-houses a storage bin for scratch grain can be built out from the sill without taking up any of the floor space. Such a bin can hold at least six or eight hundred pounds of grain. It should have a smooth slanting roof so the hens cannot roost on it.

The storage bin enables carrying grain every day and enables the caretaker to feed the hens quickly in the evening when other work requires attention. The farmer who will carry grain to the hen house with the team and keep the bin filled will find that his wife can care for the hens without carrying heavy pails of scratch feed. In snowy and rainy weather the handy grain supply may insure better care for the hens.

It was Buddy's sister, Edith, a bright little thing with a clear voice and distinct enunciation, who had explained the matter to me. The members of the family were then beginning to realize the harm that had been done but were too indolent to make more than spasmodic efforts to correct it. Edith was less than a year old when Buddy was born, and since then had spent most of her time with her grandmother so she had escaped her brother's predicament.

All parents are not educated, and few are capable of using the best English, but all can and should use the most correct English they know especially in speaking to their children. The truthfulness of the old adage, "First impressions are lasting," is proven in nothing more than in speech.

I remember a classmate of mine who could not overcome the occasional use of such colloquialisms as "yourn" and "hishin," even after finishing her normal course. Her parents were very ignorant. I even catch myself saying, "ain't," from home usage, though my parents know better. Let us all use "good English homes" instead of "good English weeks."

## THE CHILDREN'S HOUR

OH, BOY!

Make the most of your school, Boy! Study as hard as you can! School days will soon be over And soon you will be a man!

Then comes the world of business, The work of life and the care— Learn what you can each day, Boy, 'Twill count up a lot in a year!

Tackle the hard job first, Boy, Oh, don't be afraid to work! The lazy ones may laugh, Boy, But never you try to shirk!

Hold out a helping hand, Boy, To your mates on Knowledge Hill! Pull together—it's fun, Boy, To work and play with a will! —E. H. Glover.

## BENNIE FOX FINDS THAT IT DOESN'T PAY TO CHEAT.

"Oh, Bennie, we are just choosing sides for a game of pullaway," said little Jackie Rabbit, running into the schoolroom. "Come out and play with us. I want you on my side."

(You remember Jackie Rabbit was Rolly Rabbit's little nephew.) Well, now Bennie Fox knew that he didn't have but one of his arithmetic problems for his lesson that day and that he should finish them before he went out to play. But pull-away was his favorite game. He liked to play it more than any other game he knew.

"Sandy Squirrel has all his problems worked," he thought to himself. "I'll just look on his paper." So he skipped out to play pull-away, and left his lessons undone.

They played and played, but the time seemed short when the bell called them back to their lessons.

Bennie sat right beside Sandy Squirrel, so he copied all the problems and slipped the paper back in Sandy's desk.

At class, Teacher Rabbit called on Bennie first.

"What is your answer for the first problem?" she asked.

Bennie gave the answer, which happened to be 15.

"Correct, Bennie. Please put your problem on the board so the rest may see. Sandy you may put on the next one," said the teacher.

Bennie went to the board with a quaking heart. Oh, how he wished he knew how to do that problem. In a few minutes Sandy had his problem neatly done and was back in his seat. But still Bennie stood at the board, unable to do even the first part of his problem.

"Bennie, I do not see how you knew the answer if you can't work the problem," said Teacher Rabbit.

"I bet he copied his problems," said little Jackie Rabbit.

And then how Bennie did feel. Everyone in the school knew that he had cheated. He hung his head and went back to his desk.

But he thought he had learned a good lesson, even better than his daily arithmetic lesson, for he resolved, that no matter how poor his lessons would be, he would never cheat again.

## Weak Link.

The number of eggs set to get a mature pullet is possibly the most inefficient part of the poultry business. The hatching power of eggs is known to be an inherited character, yet the hatching power of eggs is very seriously affected by nutrition and general care and management. The Department of Poultry Husbandry, O. A. College, has been conducting some experiments along these lines, but results so far would not warrant any conclusions being offered. The problem is complicated and will take some time to work out, so says Prof. W. R. Graham, O.A.C.

It is fortunate that no one in real life is quite so wicked as some of the characters in fiction.

## WAKE UP, DADDY!

Little Dick, aged four, awakened early. Peering eagerly through the shutters he saw, in all its brightness, the rising sun; he saw the green grass, and the trees bursting into bloom; he heard the birds singing joyously; out along the highway hurried a heavy laden truck. He ran to his father's couch and with boyish enthusiasm cried, "Wake up! Daddy, the world has begun."

Daddy, whom you may consider symbolic of thousands of other daddies throughout the land, is beginning to think the world has about finished, or at least come to a standstill. For three years the crops have not been profitable, his recent live stock ventures have lost him money, the farm has ceased to pay. But has it? Let us stop and consider. What are the compensations of farming anyway?

The outdoor life is healthful and free, and it is as healthful and free now as ever; the youngsters of the household grow sturdy and strong, and they flourish with life in the open air, healthful play and wholesome, unbeatable food, now as ever. The field crops produce the same high average yields, now as ever. The little pigs, the calves, the baby colts and lambs frisk and play in the sunbath, there are as many of them and they grow like weeds, now as ever. The fruit trees are laden with bloom that promises to develop into heavy burdens of fruit later on, the same as ever. The grass grows as green, the flowers as bright, the berries as sweet and as plentiful, now as ever. All this wealth of good things the farm holds now the same as it has in better times. The one thing lacking is dollars, and they are scarce. They are like a rubber yard stick that has been stretched to twice its normal length for the time being. Dollars fluctuate in value the same as any other article. Just now the farmers' dollar is pretty high priced, it takes a lot of goods to get it.

These elusive dollars may have slowed up traffic for a time, but with all, the world moves on. Each day sees many new things under the sun. The child is nearer right than we think in his interpretation of the new day. You and I each play our part, infinitesimal though it may be, in the progress of the world. We cannot afford to slump. As we advance or retard in our own little sphere of endeavor, the world benefits or loses accordingly. Who is there who wants it said of him, he held civilization back? Who is there who wants the world to move forward and leave him behind? Then we should heed the admonition of the child and "wake up!"

With a clear realization of our responsibility, give to the changing world each day the best we have.

## Insulated Wire for Tying.

Binder-twine is the gardener's mainstay for tying plants to supports, but for some things this is too hard. The best material for tying tomato plants is cloth; strips of muslin are safe and effective. The twine is very well for raspberries, especially if it attaches the canes to strong wires, and is tied loosely so as to give the canes a little natural movement with the wind. Lima beans are often tied when young, and because of their tenderness, cloth is best.

A third material which I have found excellent for all-round tying, which is soft, and is so durable as to be almost permanent, is insulated wire, such as is used on telephones. You may say that this material is too expensive, but any electrical repair shop carries a great quantity of second-hand wire of this type, and it can be had very cheaply. Cut into short lengths, it makes the ideal tying material. Make a turn with the soft copper, and the fastening is made and it will stay for years. There's no rotting and popping off as is sure to be the case with twine. This material is especially valuable on climbing roses, grapes, and other growths which you wish to take permanent positions; and also for all kinds of tying in the garden which is to hold for one season only. At the end of the season, the wire can be saved for another year.

What directions did Jesus give concerning the giving of alms?—Matt. 6: 1-4.

### NEWBURY

Reeve Holman is in London this week attending county council. During his absence Councillor Moore is acting reeve.

Mrs. W. O. Kraft was a London visitor on Saturday.

Mr. and Mrs. Ray Hanson and Miss Lillian King, of Detroit, spent the week-end at Wm. C. King's.

A. Graydon Batsner, of Cincinnati, was in town a few days last week.

Mrs. Duncan McKee and daughter Jean, of Windsor, spent the week-end with Mrs. H. D. McNaughton.

J. Stephenson, wife and children and Mrs. J. J. Whittaker, of Windsor, visited Miss Laura Gay this week.

Mr. and Mrs. John G. Bayne and son Allan were in Toronto attending a convocation, where the latter received his degree as a qualified dentist.

Dr. Allan is only in his 23rd year and is to be congratulated on his success.

Miss Stotts spent the week-end the guest of Miss Keith in Glencoe.

A treat is in store for the members of the Y.P.S. of Knox church on Sunday evening when Mrs. (Rev.) Boltonbroke will give an address. All are welcome.

George Harcourt has purchased a new piano.

Mrs. Collier, of Melbourne, and Mrs. Johnston, of Windsor, have been visiting at B. F. Jeffery's.

Miss Winnifred Owens, of Leamington, spent the week-end at her home here.

J. H. Bayne, of Detroit, spent the week-end with his brother Will.

Miss Winnie Dobson, of Florence, spent the week-end with her brother, G. D.

Mrs. Alfred Nethercott, of Woodgreen, visited her brother, Wm. Gillett, last week.

Mrs. Beamish, of Bothwell, is visiting her sister, Mrs. M. Glennie.

Mrs. L. Russell McVicar, of Regina, and Mrs. Armstrong and daughters, of Bridgeton, have been visiting Mrs. McVicar, "Ingleside."

Hugh Boyle and Mrs. Boyle moved to Chatham on Monday, they having sold their property to Herbert Brownlee, of Anghrim, who will move in this week.

Mrs. Samuel Charette has returned home after spending a few days in Windsor, accompanied by Mr. and Mrs. Henry Parent, from Ford City.

Mr. and Mrs. Samuel Charette had as guests Sunday Mr. and Mrs. A. W. Woodruff and family, from Windsor; Mr. and Mrs. McLellan, daughter and son, from Melbourne; Mr. and Mrs. Shumaki, from Windsor, and local visitors.

Ephrem Charette is on the sick list.

### WARDSVILLE

Joe Guest, of Wardsville, spent the week-end with friends here.

Mr. and Mrs. Earl Henderson, Roy Walter Henderson and Garfield, Roy and Henry Henderson, all of Detroit, spent the holidays with Mr. and Mrs. J. F. Henderson.

Mrs. Funnell has returned home after spending some time with her sister in Leamington.

Mrs. Weir, of Digby, N. S., is visiting Rev. S. J. and Mrs. Bridgette.

Mr. and Mrs. Voce and children, of Detroit, spent the week-end with Mr. and Mrs. J. Voce.

Gerald Randles, of Detroit, spent the holidays at his home here.

### QUESTIONS and Bible Answers

If Parents will encourage children to look up and memorize the Bible Answers, it will prove a precious heritage to them in after years.

Roll of honour. — Florence Moore, Charlie Towers, Orville Towers, Dennis Giles, Christopher Carruthers, Elizabeth Carruthers, Martin Walker, Archie Carruthers, Lloyd Munroe, Gladys Lunn, Teacher.

Strangled with Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

### METCALFE COUNCIL

Meeting of Metcalfe council held May 26th. Members all present. Minutes read, approved and signed.

Moved by Blain and Moyle that P. D. Campbell be paid \$5, pay sheet, road 7, div. 5; H. McCallum, \$53.50, Loy sheet, road 8, div. 5; John Little, \$16, pay sheet, road 9, div. 5, half to Ekfrid.
