THE KING AT PLYMOUTH.

London, March 10 .- King Edward and Queen Alexandra participated in a number of inspections and ceremonies at Plymouth Saturday, including the distribution of China medals. Among the recipients was Admiral Sir Edward Hobart Seymour, who commanded the first Pekin relief expedition. The principal ceremony was the launching of the battleship Queen and the laying of the keel plate of the King Edward

Nothing happening in South Africa or at Westminster rivals the royal progress in Devonshire and the coming historic ceremonial in the Abbey as a subject of public interest. What is proved wherever the King goes in England is the fact that the ornamental or ceremonial side of monarchy has acquired a new lustre and glamor, and appeals to the imagination as well as

to the loyalty of subjects.

The King and Queen will celebrate on Monday the anniversary of their wedding by a dinner party at Marlborough House. This is a quiet day

BRITISH POLITICS. The government grows more torrid not far distant future is accepted seras opposition languishes and weakens. jously by all sorts of people. The education bill, naturally, will be dropped as a most inconvenient measure, which can hardly fail to create

red, as a contentious proposal which been half settled. Let the dinner hour be fixed and the week-erd outings be facilitated and the jaded ministers will be enabled to shake off the influenza. This is the random talk among the government ranks, and no legislation apart from the money grants is expected before or after the coronation. What is implied is the complete collapse of the alternative party system of gov-ernment. The faction-rent Liberal party has gone from bad to worse, and the ministers are released from the or-

dinary restraints of vigilant, effective opposition. COERCION FOR IRELAND. Despite the premature announcement of the substitution of the coer-cion of Ireland for the legislative programme, there is reason to believe that the ministers have been frightened by the steady progress of Mr. O'Brien's powerful league, and that a belated attempt may be made to grapple with it. The postponement of the education bill after three unsuccessful attempts to reorganize the system of primary and secondary educa-tion will be discreditable when the local authorities throughout the country are demanding evolution from chaos to order in the existing arrangements, but the reversion to the coercion of Ireland will be a confession that the policy of smothering the island with kindness is a failure. It seems incredible that Mr. O'Brien's power should be challenged a few before the coronation festivities, but the Unionist journals are already denouncing him as a frenzied fanatic, describing the intimidation ing the battleship Empress of India to

\$2,500 FOR A CLOCK. After the sale of a Louis Seize clock for 500 guineas and a Dresden service for 870 guineas the Battle Abbey paintings were auctioned off at low prices, although Christies' rooms were crowded. Titian's sketch for the "Apotheosis of Charles V." fetched 55 guineas, and Domenichino, Berchem, Poussin and other old masters were neglected. Sales of other articles illustrated the vageries of taste in the open market. Opic's portrait of Hannah Moore in yellow and gray gown, with lace cap, was sold for 10 guineas, and portraits by Romney, Holbein, Lawrence and Hals went begging. Stubb's picture of the famous horse Eclipse, foaled in 174, ran up to 660 guineas. It was a genuine sporting picture, and the old masters' religious subjects paled before it. Tenier's "La Roi Boit" commanded 400 guineas. The Ionides collection of antiquities will be auctioned

next week. RUSH TO SOUTH AFRICA. There is a very general impression that as soon as peace is declared there will be such a rush of immigration from all parts of Europe for the Eldorado of South Africa as has never been known in the history of the world. Business houses have their plans already made for the establishment of branches at Johannesburg and the other great towns of the late republic. Companies, from the small "bubble" affairs to those involving millions upon millions of pounds, are ready to be launched as soon as there is the first announcement of a settlement, and hundreds of thousands of young men are talking of nothing but their impending departure for the south. On the continent, the far-seeing German looks forward to a time of affluence and prosperity under British rule in the land of the Boers, and even the home-staying Paris Frenchman is prepared to try his luck in the new land of milk and honey. There will be at least five great newspapers started at various points, Jo-hannesburg, Pretoria, Kimberley, Buluwayo, and Port Elizabeth. The machinery has been contracted for, the type is ready, and the editors have signed their contracts. The great steamship companies are looking forward to a prolonged season of ships crowded with passengers in cabin and steerage, and with lower decks laden with immense tonnage of freight. Milner's estimate of a population of 5,000,600 inhabitants for Johannesburg in the
not far distant future is accorded.

A LITTLE "PREVIOUS." But it must all take time. The inspection permits may be had of the executors. Andrew McCormick and Joseph A. Childs, or of their solicitor, The Irish land bill may also be deferknows to what extent the mines have red, as a contentious proposal which been damaged or what the condition will only tend to unsettle what has of affairs will be when industry and enterprises are ready to take over the task prepared for them by the big guns and the battalions of Kitchener. There has been incalculable damage and irreparable loss. It will be many after the speculators have their look in first. It will not be a good place for the careful man who has only a small sum with which to risk his future.

A SECOND DISPATCH.

In a second dispatch, dated Sunday, March 9, Lord Kitchener says: "Paris has come in at Kraaipan, with the remainder of the men. He reports that the column was moving in two parties. One, with the ox wagons, left webosch at 3 a.m. The other, with the mule wagons, started an hour later. "Just before dawn the Boers attacked. Before reinforcements could reach them the rear guard broke. In the meantime a large number of Boers galloped up on both flanks. These at first were checked by the flank parties, but

had begun, and all the mule wagons, with a terrible mixture of mounted men, rushed past the ox wagons, all efforts to check them being unavailing. "Major Paris collected 40 men and occupied a position a mile in front of the ox wagons, which were then halted. After a gallant but useless defense, the enemy rushed into the ox wagons and Methuen was wounded in the thigh. Paris, being surrounded, surrendered at 10 a.m. Methuen is still

As Lord Kitchener announces that Major Paris had surrendered, and also telegraphed that he had reached Kraaipan with the remainder of the men. it would seem that the Boers subsequently released the major and his compan-

John Halloran, an eccentric resident of Sandwich South, died at his home there on Wednesday evening aged 89 years. The Treatment Prescribed by an Eminent Medical Author and Physician-Timely Action the All Important Point in Treating Colds

"Colds that will never be cured." A startling sentence, but you know it to be true. Scarcely a day passes but some death from consumption, pneumonia or similar ailment emphasizes the truth of this statement. It is well to remember that a newly-contracted cold can, in almost every case, be cured. It is the neglected cold that leads to death—the cold that runs on and on—the cold that is added to by

fresh colds from time to time. But what treatment is to be chosen from the great number of remedies that are recommended? You can use common-sense in buying medicine, just as you can in the purchase of a plano, a bicycle or a sewing machine. Find out what treatment has the best record in the past, apply the test of

know from experience. If you apply this test to medicines for coughs, colds and similar ailments, you will select Dr. Chase's Syrup of Linseed and Turpentine, because of the extraordinary merits which it possesses, and which have become known to the public generally through years of trial. The sales of this remedy are far in excess of any similar preparation, and have never been so large as during the present season. These two facts are, we believe, the strongest evidence that can be produced in verifying the merits of any remedy that has been thoroughly tested for years. Dr. Chase's Syrup of Linseed and Turpentine is prized especially because of its far-reaching effects, even in the most serious cases of bronchitis, whooping cough, croup and asthma. It is not a mere relief for coughs, but acts on the whole system thoroughly, curing the cold and removing the chest pains, soreness of the lungs and bronchial tubes, and all inflammation of

the respiratory organs.

GOOD HORSEMANSHIP SAVED MISS FORAKER

Lady's Exciting Ride at French Lick Springs, Ind.

Indianapous, March 10 .- Miss Ethel Foraker, daughter of United States Senator Foraker, of Ohio, had a thrilling experience at French Lick Springs with an unmanageable horse.

She and Miss Katherine Maitland, of Michigan, were horseback riding, when Miss Foraker's animal became frightened at a piece of paper and ran for over three miles. Gerald Sewegemith, of Chicago, who was with the ladies, and Miss Maitland followed as rapidly as possible.

At a turn of the road Miss Foraker's horse vaulted the fence, and continuing across the open field leaped a small brook. There he became mired in the soft earth and Miss Foraker succeeded in holding him in check until her friends arrived, never having left the Maitland was thrown in the chase, but not seriously hurt.

Nature's Ice House.

[From Pearson's.]

The number of birds that go to the Arctic regions to breed is vast beyond conception. They go not by thousands but by tens and hundreds of thousands, and because nowhere else in the world does nature provide at the same time and in the same place such a

lavish prodigality of food. The vegetation consists of cranberry, cloudberry and crowberry bushes, and these, forced by the perpetual sunshine of the Arctic summer, bear enormous crops of fruit. But the crop is not ripe until the middle and end of the Arctic summer, and if the fruit-eating birds had to wait until it was ripe they would starve in the meantime, so they arrive on the very day of the melting of the snow.

But each year of the snow descends on an immense crop of fruit before the birds have time to gather it. It is thus preserved perfectly fresh and pure, and the melting of the snow discloses the bushes, with the unconsumed last year's crop hanging on them or lying, ready to be eaten, on the

ground. The frozen meal stretches across the breadth of Northern Asia. It never decays and is accessible the moment the snow melts. The same heat which thaws the fruit brings into being the most prolific insect life in the worldthe mosquito swarins on the tundra. No European can live there without a veil after the snow melts. The gun barrels are black with them and clouds of them often obscure the sight. Thus the insect eating birds have only to open their mouths to fill them

I never did know what girls carry in all those dangling boxes and flasks and chatelaine affairs that have now given way to the omnipresent silver bag, but I heard the other day of what a Seventeenth street girl carried in hers. So the other girl, felt under the table, took out two of the small, smooth tabloids, popped them into her mouth, swallowed them and soon her headache disappeared.

A fortnight later the two met again at another luncheon. "Madge," called the girl who had had her headache cured, across the table, "give Flo some of those headache pellets that helped me so the other day.' Madge fished up the little silver box

and passed it across the table.
"Let's see what they are before Flo

THE USE OF THE WORD "LADY." [From Harper's Weekly.]

It is said that it is coming to be the

fashion again to use the word "lady," and that the word "party" is also in better favor. For some years modish persons have called ladies "women," and parties "functions." There was some excuse for the former substitutions, because "lady" was worked to death, and so misused as to make it time, and get the opinion of people who | ridiculous. But vague as its meaning is, it has a meaning (or meanings) to the conveyance of which it is indispensable, and the folks who have dismissed it from their vocabularies have not been persons of much philological discernment. The use of "function" for "party" has been a mere fad that must have started as a pleasantry and gradually became a habit. It makes it possible to speak of a row at a ball as a "functional disorder"; but even that doesn't warrant its vogue. It is the postoffice at Eibsee in the valley, a poor, borrowed, anglicized word, three miles away. The observer in his which the British-American language lofty perch is thus made independent doesn't need.

Isolation

Away ahead, in the matter of styles, this store stands supreme in the matter of merchandising. It has stood the test of years, and from its first day has battled with and overcome the severest competition. In our case the

statesman's utterance in regard to the position of England among the nations-"Splendid Isolation"-is appropriate to our standing in this community. It is here the fashionably-inclined come for the newest things from the style centers of the world; it is here those who wish to be stylishly, comfortably and modestly dressed have their needs supplied; it is here all classes and conditions secure the biggest value for their money. It is not much in little, but much for little here. We aim at big things and accomplish big things. Our plan of buying for the people the things they want at prices they can afford has been indorsed by the people themselves. Every cent's worth of value we have to give we give with our goods. Real merit all the time; no prizes at any time. No humbugging-your money back if you're not satisfied. Exalted policy! Exalted position! Splendid isolation!

The Beauties of Spring Are Coming Fast

Beautiful spring brings many beautiful things besides sunshine. Our European buyer is returning home. He has been away all winter touring the markets of the British Isles and the continent. He has sent on from time to time many choice, exquisite and cheerful things for spring and summer trade. These are coming to hand day by day, and as they come we show them. Consequently there are many changes in appearance of stocks. Customers do not permit these advance specimens to stay with us long. They have been watching for them, and when they see them they take them. You are at liberty to do likewise. First come, first served. Everywhere throughout the store spring attractiveness is asserting itself. Each department is vieing with the other to get into line first. A visit to the store every day will be necessary to keep posted on the new fashions.

It is inclosed in an air-tight glass cylinder, and has frequently run for periods of two or three months with an average daily deviation of only 15-1000 of a second. Yet astronomers are not satisfied even with this, and efforts are continually made to secure ideal conditions for a clock by keeping it not only in an air-tight case, but in an underground vault where neither changes of temperature nor of barometric pressure shall ever

LONDON AIR DEPOSITS GYPSUM. A recent chemical examination of the black deposit, resembling boiler scale, that has formed to a thickness of three-quarters of an inch under the coping of the balustrade surrounding the "Stone Gallery" at the base of the dome of St. Paul's Cathedral, reveals the curious fact that it is essentially a calcium sulfate collected from the air. In two centuries the smoke and gases from London chimneys have charged the rains with sufficient sulfurous and sulfuric acids to cover the stone with a deposit that strikingly resembles calcareous tufa. It is thickest on the under side of the copings because of the dripping of the rain.

THE BILL BOARD NUISANCE. [From the San Francisco Call.]

Bill board and fence advertising is ike peddling, inasmuch as it makes use of public thoroughfares, and therefore is rightly subject to municipal supervision and control. Finally such advertising is not infrequently a gross nuisance, marring the appearance of the city, offending the eye and leading up to the erection of huge fences that are a serious danger to passers on the streets and to the adjacent property by reason of their liability to fire.

What She Was There For.

There is at least one court in the world, an English Midland assizes, the judge of which is not afraid to say that black is black. The Birmingham Post gives the following glimpse of his method of dealing out justice:
A respectable-looking man was in the court in the autumn session. The charge was theft. The aggregate value involved was considerable, and the plea was guilty, but it was alleged that there

were extenuating circumstances.

The defense introduced a medical expert to testify for the prisoner. He said that the self-confessed thief had kleptomania.
"What's that?" asked the judge, gravely.
"Er-it's-er-a disease, my lord," said

the astonished expert.
"What kind of a disease?" asked the judge.
"Well, it's a-er-a mental disease that causes the subject to appropriate property not his own," stammered the phy-"Makes him steal?" asked the judge. "Yes, my lord, that is generally the "I know the disease," said his honor, a

grim smile in his eyes. "I know the disease, and I am sent here to cure it." ANECDOTE OF ARMOUR Philip D. Armour, millionaire and philanthropist, continually warned

young men against getting into debt. He loved free men and dispised slaves. When asked if he admired a certain brilliant orator, he said: "He may have a superb voice and fine presence, nave a superb voice and fine presence, but can't you hear the rattle of his the light grew fainter, and finally died chain? That man is not free; he is out like a soap-bubble. under moral obligations that demoralize him. He is not speaking the deepest thing in his soul, and I haven't time to hear any slave talk. I want a man to be just as free as I am.' On another occasion he said: "Don't get into debt-I mean moral debt. It is bad enough to get into debt financially. There goes a young man who is mortgaged. That young man is legging it along with a debt, and it will take twice as much power to get him along as the man without a debt. There are other debts and obligations that are embarrassing in their entanglements. Don't get into debt morally, my boy; don't get into debt so

is therefore of interest: On the occasion I was with others on board a small schooner at anchor off Tavoy Point, when a severe squall of wind and rain, accompanied by much thunder and lightning came on. After the storm began to abate we

were aroused by a cry on deck: "There is a ball of fire at the masthead!" We went up and saw what is very rarely seen, "the fire of St. Elmo," or "the fire of St. Elmo and St. Anne." It exhibited an appearance quite different from all the descriptions I have read. Phipson says: "Lord Napier observed the fire of St. Elmo in the Mediterranean during a fearful thunderstorm. As he was retiring to rest, a cry from those aloft, 'St. Elmo and St. Annel' induced him to go on deck. The mastnead was completely enveloped in a

blaze of pale phosphoric light.' The St. Elmo that I saw did not envelop the masthead in a biaze at all, but it took the form of a perfect globe of phosphoric light, perhaps a foot in diameter. It was not on the summit of the mast, but touched it on one side, playing about it, and when the vessel rolled, as a large soap-bubble, a trifle lighter than the air.

CZARINA CLIMBED A WALL [London Telegraph.]

The czarina is said to be of a retiring disposition as regards the public, and not at all fond of the applause of huge crowds. One day when, at Kiel, in Germany, she paid a visit to an art studio, the people heard of the fact and collected in great numbers in the street. "Is there no way out at the back?" asked the czarina. "Only over a fence, your majesty," was the answer. "Bring a ladder, then," said the czarina; and one being procured the wife of the czar climbed the fence and rejoined her carriage.

"Since I've made my pile, doctor, I've got so I can't eat a thing.' "Well, sir, I think I can place you where you were before."

SMALLPOX SCARE AT THE UNIVERSITY.

Eleven Hundred Toronto Students To Be Vaccinated - Smallpox Patients Want to Play Golf.

Toronto, March 10 .- Toronto University has a smallpox scare. On Saturday Ernest Simpson, a four-year student from Bruce county, who roomed on Isbella street and took his meals at the university dining-hall, was removed from his boarding-house to the Swiss Cottage Hospital as a smallpox suspect. Dr. Sheard said last night that it is not quite certain that Simpson suffers from the disease, and in any case the attack is a mild one. The only likely cause of contagion is a letter recently received by Simpson from home. The Provincial University and the city authorities held a conference to determine what steps should be taken to protect the students, in view of the fact that Simpson had been freely mingling with them up till rriday. It was determined that all the students of the University lege should at once be vaccinated, and the order will be carried out promptly It is expected that this will involve the vaccination of some 1,100

Another dispatch says Simpson is suffering from a well-developed case of smallpox. The news caused considerable excitement among the students at the university, with whom Simpson had been mingling freely.

SMALLPOX PATIENTS WILL PLAY

GOLF. Omaha, Neb., March 9 .- A number of the smallpox patients at the emergency hospital have sought and obtained permission to organize a golf club. It is one of the peculiarities of smallpox that a patient is bedfast only a short time compared with the con-valescent period, and the result is that fully two-thirds of the patients of that institution are up and about, fretting over their confinement. The use of a forty-acre pasture has been secured for this purpose. A rule was adopted that none but smallpox patients at the hospital shall be admitted to membership in the club, and none but members will be allowed on the course.

STEAMER STRUCK BY AN ENORMOUS WAVE.

White Star Liner Majestic Had a Thrilling Experience En Route From Liverpool.

New York, March 10 .- One saloon passenger and several of the crew of the White Star steamer Majestic were hurt on that craft during the trip from Liverpool, which ended Friday. The vessel reached its berth in the Hudson River eighteen hours late, with several of its main and promenade deck fixtures damaged, and with the loss of a lifeboat, which was wiped out of the forward davits by a terrific wave Sunday morning. The seas ran enormously high, reaching a crisis a week ago Saturday, when Capt. E. J. Smith, master of the vessel, ordered that no passengers be allowed the use

of the exposed decks. The sea that swept away the lifeboat, ventilators, and damaged other deck fixtures was so great that it almost engulfed the craft. One of the officers classed it as a tidal wave, but this Capt. Smith denies, saying that while it was one of the biggest waves that he ever saw, it was not of

the cumulative variety.

It took the Majestic, which is splendid sea boat, fully a minute to roll back to an even keel after being struck by this wave. Mrs. H. Irving Goodrich was thrown down a companionway and had her head badly cut and her arms severely wrenched.

INTERESTING STORY FROM GALESBURG

Mother and Son Reunited by the Scalp of the Former.

Galesburg, Mich., March 10 .- An incident in connection with a recent masquerade ball in this village borders very closely on the romantic. In the year 1866 Mrs. Catherine Sinclair, with her husband and infant son, were captured by the Sioux Indians while the former were crossing the plains with the intention of reaching California. Subsequently Mr. Sinclair and the little boy escaped, but the wife was unsuccessful in the attempt, and after suffering cruel indignities at the hands

and left for dead. The boy grew to manhood and subsequently enlisted in the regular army, serving in the west against the Indians, during which service he collected many mementos of savage warfare. On the occasion of the recent mas-querade Mrs. Sinclair, who was discovered by our troops, and who, under proper care, recovered from the injuries inflicted by the Indians as above narrated, was a spectator, at the age

of the enraged savages, was scalped

spectator, and during this conversa-tion it was developed that their names were the same. This led to further investigation, and today it has been verified that the twain are the mother and son so tragically parted thirty-six years ago, when the mother was given up for dead by her husband and all traces consequently lost.

The identification was made com-

MICHIGAN WOMAN CLEARED OUT SALOON

She Wanted Her Husband, Who Escaped Through the Rear Door.

Durand, Mich., March 10.-Mrs. Ed Ware, representative for Mrs. Carrie Nation in Durand, made her appearance Saturday. Her husband drew his check and started to jolly up at the Last Chance saloon. Mrs. Ware found out where he was and she armed herself for battle. She entered and asked the crew, alarmed by its speed, stop-that her husband be produced. Upon ped it. a refusal she started in to have a house-cleaning. All of the glasses were swept off the bar, and she then turned her attention to a couple of card tables. The stakes, kitty and everything, were dashed upon the floor and three

fellows upset. In the meantime her husband made good his escape by a rear door and set a merry pace down the alley. Ware is sleeping off a bad drunk and she is scouring the saloons and making all kinds of threats. Once before she entered a saloon

here and dispersed the customers a the point of a revolver. Her husband draggd out from under a table and she gave him a thrashing.

HOW ARE YOUR KIDNEYS?

THIS SIMPLE TEST WILL TELL.

If any of your family have been troubled with kidney disease, make a test of the urine, and satisfy yourself whether you need a food remedy be-fore the disease has caused serious

complications. Tomorrow morning put some urine in a glass bottle, and let it stand for 24 hours. If it shows particles or germs floating about, is milky or cloudy, or contains a reddish sediment,

then your kidneys are diseased. Commence at once to take Ferrozone to arrest these unnatural conditions. Ferrozone is especially intended for the immediate relief and cure of kidney and bladder troubles, and its health-giving, strengthening properties will be felt at once in new, pure blood, healthy circulation, good color, increased vigor, and a general

strengening of the system. Ferrozone quickly corrects urinal disorders, headache and pain in the back. It improves the appetite, di-gests the food, and makes it nourish the nerves, makes them strong and enduring, and fits one for lots of hard

HOLOCAUST

Mother and Nine Children Perished

By the Burning of Their Home in Matane, Quebec.

Farmer Committed Suicide by Jumping From a Wharf at Toronto-Other Casualties.

Matane, Que., March 10 .- One of the most dreadful holocausts that has ever been known in this part of the country occurred here Sunday morning, resulting in the loss of ten lives. About 6 o'clock a servant girl returning home from a walk in the village, discovered the lower part of the house of Arthur Bouchard to be in flames. The lower part is used as a grocery store and the upper part as a dwelling house. The servant girl managed to arouse the family.

Mr. Bouchard immediately jumped from an upper window, and was about to be followed by his wife, but she was evidently overcome, as she failed in her attempt to escape, and perished together with her nine childrensix boys and three girls, the eldest boy being 14 years, and the other children as follows: A girl 12 years, four boys aged 10, 9, 8 and 7 years; two girls 6 and 4, and a boy 2 years. Bouchard arose about 5 o'clock and lighted a fire in the kitchen, and then returned to bed again. It is thought the fire caught in the kitchen.

SUICIDE OF A FARMER. Toronto, March 10 .- Samuel Miller, aged 52, formerly a farmer of Markdale, Grey county, committed suicide by jumping into the lake at the Queen's Wharf yesterday morning. Two men saw him take a jump from the wharf far out into the water, and after a short interval they recovered the body. Miller sold his farm some time ago and came into the city to He was unsuccessful in search of employment, and became discouraged. He leaves a wife and one daughter, resident at 322 Adelaide street west.

FATAL KICK.

Brockville, Ont., March 10.-Fred Whelan died at the General Hospital, where he had been lying for two weeks in an unconscious condition. About the middle of December he was kicked in the head by a horse, his skull being fractured. He was a resident of Bedford Mills and was 36 years of age. He leaves a widow and four children. FALLING LIMB CAUSED DEATH. Lewiston, Mich., March 8 .- James Fulford, aged 25, working at the Kneeland & Bigelow camp, was struck by a falling limb about 7 this morning, and died at 7 this evening.

12 KILLED IN TEXAS WRECK. Tex March 10 -At So ern Pacific headquarters it is reported that the number killed in the wreck Friday near Maxon is 12. Reports of the injured from El Paso are to the effect that none have died, but three are expected to die at any time. FIREMAN KILLED.

Utica, N. Y., March 10. - An engine on a log train at the Upper Lake Junction, on the Mohawk and Malone Railway, left the track Saturday and tipped over. Fireman J. R. Cummings, of this city, was pinned under the engine and killed.

DEAD IN HIS CAB. Newburgh, N. Y., March 10.-Michael Hoey, of Middletown, an engineer on an O. and W. coal train, was found dead in the cab of his engine, near Cornwall. His skull was fractured, probably by looking out of the window. The train was running wild when

KILLED ON THE TRACK. Schenectady, N. Y., March 10 .- A man supposed to be Paul Gerard, of West Warren, Mass, while walking on the New York Central tracks in this city, Saturday, was struck and instantly killed by a passenger train.

PRINCE ENJOYING HIMSELF. New York, March 10 .- Prince Henry was the guest of the German Society

of the City of New York, and at its annual dinner at the Waldorf-Astoria Saturday night. There were 750

The prince during the day sent Lieut.-Commander von Egidy, of his suite, to place a wreath on the dead president's sarcophagus. His royal highness remained in his apartments most of the day.

The wreath sent to Grant's tomb by the prince was nearly nine feet in circumference, was made almost entirely of laurel and was tied with broad purple ribbon. Twenty sailors to man the German

emperor's yacht, Meteor, arrived on the St. Paul. They are Englishmen, and have been in the emperor's service for SPENT A LIVELY SUNDAY.

New York, March 9.-Prince Henry of Prussia was the central figure today in another round of entertainment arranged for his honor. He first listened to a concert at the Waldorf-Astoria Hotel, largely made up of his favorite American songs, the concert being arranged at his request. When that was of 64.

NEWSPAPER SARCASM. London, March 10 .- The editorial sarcasm with which many of the London papers commented on Prince Henry's visit to the United States was to no small extent suggested and fostered by the ill-natured telegrams of their special correspondents in America. With but few exceptions those correspondents who retailed Prince Henry's doings for English consumption did so only with an eye to the ridiculous. They magnified every outburst of humor or minor contretemps into a guage of national feeling or characteristic miscarriage of plans. The desire to receive Prince Henry hospitably was almost invariably represented here as an outburst of sickening sycophancy in which all the Americans well known socially were represented as endeavoring to outvie each other as to who should pay the most self-demeaning obeisance to the

royal visitor. The particular offender in this respect is the Daily Mail, which, in spite of its alleged friendship for America, devoted much space to cablegrams depicting the wife of an ex-minister to Austria spending weeks in teaching Chicago women how to curtsey, and detailing the alleged upheaval in Chicago as to whether the prince should visit the stock yards. Such alleged incidents as these were made so prominent that the average Englishman was inclined to believe that Prince Henry's tour was only a huge travesty on himself and on the American people.

A PRINTER'S BLUNDER.

But Perry Heath Was Much Distressed at It Nevertheless.

Perry S. Heath, late first assistant postmaster-general, has successfully launched his new newspaper at Salt Lake City, but is already suffering some of the pangs of which editors are occasionally subject. One of the articles which enlivened the columns of the first issue was a complimentary sketch of Senator Kearns. In the course of the tribute to the senator's abilities the writer indulged in the Scriptural phrase which says:

"He that is diligent in business shall stand before kings." The quotation was all right in the manuscript, but when it appeared in print it read: "He that is diligent in business shall

stand by four kings." The rival newspapers have been having a good deal of fun at Senator Kearns' expense, and it has even been suggested that if the senator has to get his poker knowledge out of the Bible he had better come home at once. -Chicago Chronicle.

Majorities go Steadily Up.

Mr. Whitney and his friends were In a minority of 13 in the latest division in the Ontario Legislature. This Is very unlucky for the Opposition. In the first division after the last general election, Aug. 12, 1898, the Government had a majority of 6. By March 28, 1901, the majority had increased to 8. Now, on the eve of a general election campaign, the majority is found to be more than double what it was after the last general election. Persons who have been through the Province recentlymen who are commercial travelers, with no very strong political bias-now assert that the feeling in favor of the Ministry is such that the majority will be increased to at least 20 when the next election is held.

COMMONS. The origin of these two legislative bodies may be traced to the remotest

antiquity. The business of parliament is conducted with the utmost regard for parliamentary usage, as the antiquity of this great institution would naturally demand. To the spectator the idea of freedom among the members seems to be carried to an extreme. The attention and order accorded an honorable member while addressing the house, or rather Mr. Speaker, for all remarks must be addressed to him, are not characterized by a churchly silence. If the subject be of sufficient importance, and the member of pleasing address and utterance, he can usually command attention. But it matters little to the speaking member whether he be heard by his confreres or not, for there are the Hansard reporters taking down his speech, copies of which he may scatter broadcast among his constituents, and in a small gallery behind the speaker are over 25 knights of the quill, purveyors of parliamentary ut-Four years ago, Dawson was a place terances, who are taking down his speech from two points of view for the various newspapers they represent. Two Steamers Tried in Vain to Tow Her Along-All on Board Well-The Huronian Overdue.

Porta, Azores, March 10 .- The Cunard liner Etruria arrived here yesterday in tow. All on board are well. She had a comparatively uneventful passage, except for the breakdown which occurred during the dinner hour of Feb. 26. When this occurred the Etruria had only just finished speaking by wireless telegraphy with the Cunard liner Umbria. After the accident was discovered the Etruria called the Umbria wirelessly for one hour, but without success.

Upon examination it was found that the ship's propeller had broken off outside the tube, and that the rudder had been carried away by the propeller. The Etruria then sent up rockets, which were seen by the British steamer William Cliff. The latter bore down and was alongside in 50 minutes after the accident. She stood by until daylight, when, after several attempts, she succeeded in passing a hawser aboard the Etruria. The tank steamer Ottawa arrived on the scene at this time. The William Cliff then attempted to tow the Etruria, while the Ottawa attempted to steer her. The hawser, however, snapped. The Ottawa stood by for two days, and then left for Fayal, bearing the second officer of the Etruria, to report the dis-

aster and obtain assistance. In the meanwhile the crew of the Etruria, after continued efforts lasting for two days, successfully adjusted a jury rudder. The passengers of the Etruria were satisfied they were in no danger, and they praise the conduct of the captain and crew of the vessel. After the accident the passengers amused themselves with the usual deck sports and concerts were held in the

HOW MORMONISM IS BEING SPREAD

Scandinavia Regarded as Canada and Good Fields.

The newspapers of Copenhagen say that the Mormons have energetically resumed their missionary work in Denmark, says a recent article in the New York Sun. There are now over a hundred Mormon missionaries in that country, their work being supervised from their headquarters at Copenhagen, where they publish a newspaper organ. Thousands of tracts and books are being continually sent out from this center to supplement the work of the missionaries. The Mormons in the United States have contributed an important sum of money toward the building of a Mormon church on a

piece of property that has been purchased in Copenhagen. The Mormons have always regarded Denmark as an exceptionally good field for their operations, For some years after our state department, in the days of R. B. Hayes, sent out the famous warning foreign countries against the efforts of Mormon missionaries, on the ground that Mormons persistently violated the marriage laws of this country, all Mormon missionaries were excluded from Denmark. In the past few years, however, it being understood abroad that the practice of polygamy no longer characterizes the Mormon Church, the missionaries have

been permitted to renew their labors. There never was a time when the Mormon Church put forth greater effort to win converts to its faith than at present. Bishop Joseph Binker, one of the foremost Mormons in Utah, said in 1890 that at that time the church had 1,623 young men employed in various parts of Europe and America in Mormon missionary work. He said the church was engaged in the greatest missionary labor ever undertaken by a religious body. He said that the church expected in 1901 to have at least 2,400 missioaries busy in the

President Snow of the Mormon Church declared in the same year that by 1910 he expected that the church would have between 3,000 and 3,500 missionaries in

the field. One of the Mormon newspapers in Utah reported in December, last year, that the church had missionaries at that time in every country of Europe, excepting Turkey and Italy, in fortyfour states of this country, and even in Australia, Brazil and South Africa. Canada and Scandinavia are at present regarded as the most promising fields for missionary activity. There are now over 300 Mormon missionaries at work in Canada, and there are about 10,000 members of the church in the Province of Ontario alone.

Every Mormon missionary is expected to proclaim loudly that today plural marriages are not sanctioned by the church. This fact is undoubtedly ing them to gain converts. In the early days of their proselytism abroad the missionaries tried to induce at least all the young converts to emigrate to Utah. They are not now so active in that direction, though they are very glad to have their church in this coun try reinforced by recruits from abroad. But their main idea now is to build up the church in all lands, so that it may take its place as one of the great churches, established widely in all parts of the world. They therefore do not care so much for large immigration to Utah or the other Western States in which their church is strongest, for they wish to have powerful Mrs. Winslow's Soothing Syrup Has been used for over FIFTY YEARS by MILLIONS OF MOTHERS for their CHILDREN WHILE TEETHING, with PERFECT SUCCESS. freely, and holders, more especially of fine samples, resist any further concession in price. Alsike and white command former terms, while trefoil keeps very steady. Rye grasses, however, continue to favor buyers. The sale for spring tares has recently been on a small scale. Linseed is scarce and exhibits a substantial advance. The mustard seed trade has throughout the season been very disappointing. Stocks of canary seed, both in London and Liverpool, are now in remarkably small compass. The consumption of blue peas and haricot beans has been of late much increased.

"A Runaway Girl" at the Grand

Opera House. The performance of "A Runaway Girl" at the Grand on Saturday would probably have been more enjoyable to entation given the piece by the company which brought it to London in 1899. While comparing rather unfavorably with the former organization, the lege at Pretoria. present company managed to amuse its audiences, and the essential brightness and tunefulness of the work itself help to carry it through, where a less catchy piece would fall flat. The leading female role, that of Winnifred Grey, was in the hands of Miss Celeste Wynn, whose physical attributes fit the part well, but whose voice, while sweet and well-trained, is hardly strong enough for the demands perience of being compelled to drive made upon it. Miss Wynn pleased her hearers with the "Sly Cigarette" song in the first act and "The Boy Guessed it and so enable the Boers to break Right" in the last act. Miss Rose La-Harte, as Dorothy Stanley, sang several numbers, which proved the most acceptable features of the evening. Miss Margaret Bland, who sang the stirring march song, "Oh! Listen to the Band!" was evidently still suffering from a recent throat trouble, which disguised her possession of a really pleasing voice. Miss Bland's other qualifications, in the way of an animated style and shapely proportions, palling total of over 11,000 men. fit her admirably for the part. The number was encored half a dozen times. Clara Belle Jerome was especially good in the piccaninny duet with Arthur Dunn in the last act. Sadie Kirby, as half the number of registered voters Carmenita, was acceptable, making a for that district. At the head of the

H. W. Tre-Denick made a hit as Prof. Tamarind, one of the unctuous roles in which he has been successful. Mr. Tre-Denick is remembered here for appearances in leading parts in "The Highwayman," "The Fencing Master," "The Geisha" and "The Circus Girl." Henry Leone's stalwart Master." form and robust baritone voice accorded well with the role of Pietro Pescare, the bandit chief. His singing of "Sea-Girt Isle of My Home" was well received. Harry Dickeson as Lord Coodle and George F. Beard as Signor Poloni, deserve mention. The organ-ization is lamentably weak in the line of male voices, having practically no male chorus.

"A GAMBLER'S DAUGHTER. "A Gambler's Daughter," the sensational melodrama that comes to the New Grand tomorrow night, is a new play that has met with great success this year. It will be produced here by a good company, headed by the talent-ed leading woman, Miss Elsie Cresey. "A Gambler's Daughter" tells a thoroughly modern, up-to-date story of Chicago life, and is so exciting that the audience is kept in a constant state of thrills from beginning to end. At appropriate stages of the performance some clever songs and specialties are introduced, and there is enough of comedy to enliven the more serious and stirring features of the drama. The scale of prices will be a popular one-50c, 35c and 25c.

GRAND OPERA IN ENGLISH. Commencing Friday evening and with Saturday matinee and evening performances, the New Grand management will present the famous Boston Lyric Opera Company, in English grand opera. The company carries a double cast of principals and a chorus of experienced grand opera singers. The reportoire will embrace Verdi's masterpiece, "Il Trovatore," Balfe's tuneful and popular opera "The Bohemian Girl," and Guonod's renowned opera "Faust."

THE CANADIANS' DISCOVERY. The capture of a large Boer stock of ammunition near Reitz by Canadian Scouts reminds a veteran army officer that its hiding place was closly indicated in a pamphlet published at the outbreak of the war. RICH MAN BAPTIZED IN THE RIVER JORDAN

Millionaire Van Ness Immersed in the Historic Stream-Presbyterian Minister Becomes Baptist.

Middletown, N. Y., March 10 .- Word has reached here that Cornelius Van Ness, the octogenarian millionaire of Port Jervis, formerly of New York, has been baptized in the River Jordan by the Rev. William K. Hall, of Newburgh, N. Y. Mr. and Mrs. Van Ness sailed on the steamer Celtic for a trip to the Orient, his desire being to gratify an ambition of years to be baptized in the Jordan.

Toronto, March 10 .- The ceremony o receiving into the Baptist Church a former Presbyterian pastor was solemnized last evening at the Dovercourt Road Baptist Church, when Rev. E. B. Chestnut was received into this church. Rev. Mr. Chestnut was formerly the pastor of the Presbyterian Church at Carluke, near Hamilton, but resigned his charge and severed his connection with the Presbyterian body because he was unable any longer to administer infant baptism. Both the presbytery and the congregation recognized that the reason was sufficient to justify the resignation.

Before being baptised, Rev. Mr. Chestnut preached in the Dovercourt Road Baptist Church, the service being conducted by the pastor, Rev. Jesse

Previous to Mr. Chestnut's departure from his former congregation, the members presented him with a gold watch, Mrs. Chestnut with a gold chain and their little daughter with a beautiful brooch, the presentation being accompanied by an address of the most flattering character.

New York, March 9 .- Despite the alleged promises of the saloonkeepers that today should be the very dryest Sunday on record, so far as New York was concerned, the man or woman who wished had little or no trouble in purchasing a drink. Boston, March 10.—The strike of the freight handlers of this city, which, according to votes passed by the local unions yesterday, threatens to involve 10,000 men, was begun early today. The Team Drivers' Union, embracing about 2,000 men, led off. Other unions followed, and the strikers claim that by tonight fully 10,000 will be out. The strike grows out of the Brine Transportation Company's trouble with its teamsters, who began several weeks ago, but was preci-pitated by the refusal on Saturday of members of the Freight-Handlers' Unions to take care of merchandise carted by non-union teamsters employed by the Brine Company.

> THE PRINCE'S STRENUOUS OUT-ING.

This is the way Henry's visit struck the Boston Herald: "The falling star The result of the first month's operations on the East Coast, under an alty, whose chariot had the wings of a Mercury, if lacking the splendor of a Mercury is a Mercury, if lacking the splendor of a Mercury is a vaal was closed as a source of supply. has been distanced and the aerolite's some time please the house Hohenzollern to print the incidents of the Paul Revere pace through Boston and Cambridge town, the narrative will fairly eclipse in strenuousness Ben Hur's race for laurel, in anecdote 'John Gilpin's Ride.' For thirteen hours the brother of the German emperor was the guest of Boston, Cambridge and Harvard University. For thirteen hours he ran the gauntlet of handshaking serenading, cheering, flower-throwing, speech-making, degree-giving, luncheoning, dining, and night-capping. For thirteen hours he applied the concentrated mind, the observant eye and the appreciative hand to all that deliberative hosts and demonstrative populace had to offer. For thirteen hours rovalty had the front center stage, while the best of republican New England applauded and enthused."

Letters to the Editor

THE 20TH CENTURY SUNDAY.

To the Editor of The Advertiser: On behalf of the Lord's Day Alliance I would respectfully request the inser-

tion of the inclosed in some early issue of your paper. Yours, etc., C. T. SCOTT, Local Secretary

The Parsonage, 484 Dundas street, London, March 3. At a legislative hearing on a question of legal restriction of trade, a gentleman favored wider liberality because we are at the opening of a new century, implying that Sunday laws are a relic of the dark ages. Not of the darkest ages, he should reflect. They do not prevail now in "Darkest Africa," or in any dark and savage land, nor ever did. Sunday observance is not a mark of rude, unies, but the others may recover. Wyatt and protect the civil rest day by law Christian nations observe Sunday rest. society. Not only savages but bad men everywhere do without Sunday. Either they are not able so see that it is a necessity of wise living, or they do not wish to live wisely. Just in proportion as men advance in enlightenment, and in a desire to live in accordance to the best light, they keep Sunday. There are exceptions, but on the large scale, and in the long run, exactly as men gain in spiritual insight, attain breadth of view, and a comprehension of the forces and ten dencies which govern human life, if they also are wise enough to conform their conduct to their increased knowl. edge, they will prize Sunday, and keep it with all their heart. This is absolutely sure. How do we know it? On the word of Him who cannot err, who is the truth for he said "The Sabbath was made for man"-for man as man, always and everywhere; not for Jews alone, not for certain centuries only, but for all the centuries, for the twentieth and the fortieth, for all those blissful and prosperous ages when human progress shall have lifted man to the high vantage ground of enjoying the blessings a dence makes ready for his use. And of all these blessings, one of the richest in value in itself, and most prolific of other blessings is the day of Sunday rest and worship. And when God made the Sabbath for man, he thereby declared that the Sabbath is something man needs in every age and land. It is indispensable to his property, therefore a kind Heavenly Father will see to it that this precious gift shall not always be as pearls cast before swine. He will educate men and train them up to see what is good for them, and will give them wisdom enough to take what is good for them. Many men

Through the voice not of written revelation alone, but through the cry of man's entire nature, body, soul and spirit, by the examples of Christ, and Providential favor shown to Sabbath keeping in its good results, God has made known his will, that man should take one day in seven, so far as the claims of necessity and mercy allow, to rest the body and train

the soul.

ALEXANDRIA, DRC., 20th. 1901. Speaking from personal experience I can state that your Stout is excellent in building up the system—I was very much run down and was advised to use Labatt's Porter—this I have done for some time and I largely attribute to its effects my steady improvement in strength and weight. I deem it but justice to you, and it certainly is a pleasure to me, to add my testimony to its sterling qualities, and I gladly recommend your Stout as an excellent tonic and food in cases where such is required. City Hall Notes.

The letter from the Walkers notifying the city that negotiations for the extension of the L. and P. S. R. to the L. E. and D. D. R. were off was received by Mayor Beck late on Saturday afternoon. The letter was a brief one, merely saying that owing to the delay in having the lease ratified the Walkers refused to sign under the agreement discussed. Whether they will discuss other terms remain to be seen. The letter will be read at tomorrow's meeting of the shareholders of the L. and P. S. R. This is probably all that will be done at the meeting, as there is no lease to ratify.

The board of hospital trustees meets tomorrow at 2 p.m. The chief business will be the appointments to the three vacant positions on the staff. As there are nearly 80 applications in the making of selections will not be easy. It is understood that Mr. John Drewe, at present a clerk at Hobbs' Hardware Company, and Mr. Wm. Pratt, of Petrolea, are both favored for the position of superintendent, while the name of a former commercial traveler is also mentioned The position of bookkeeper will probably go to Miss Sutherland, daughter of Mr. Thomas Sutherland, of the United States customs office at the G. T. R. depot. For the post of steward an employe at Wolseley Barracks is mentioned. Other business to come before the trust is the letting of tenders for steam tables and smaller supplies.

A special meeting of the city council is being held this afternoon for the purpose of appointing an arbitrator to represent the city in the claim for damages to property, made by Edward Boles, on account of the raising of the level of the sidewalk at Ann and Talbot streets. Mr. Bowles has appointed Mr. R. K. Cowan to represent him.

Up at the stone-pit 42 men are today breaking large stones into small pieces. They sing cheerily as they work, and when they pause for breath they fill in the interval by calling down blessings on the head of Ald. Cooper, at whose instance the council ordered the work to be done. The men work piece-work, and make from \$1 to \$1 50 per day, which, as Ald. Cooper says, "is much better than having them walk around the streets idle all day."

The alterations at the city hall are well under way. The inside of the old Mountjoy store has been torn out, preparatory to fitting it up for the assessment commissioner's office.

Engineer Graydon is so far improved in health that he is to be removed from Victoria Hospital to his home today.

Untimely Death.

TO PERPETUATE THE LIFE OF OUR TREES

Efforts of the Forestry Association of Canada-Interesting Reports Presented.

Ottawa, March 10. - At the annual

meeting of the Canadian Forestry As-

sociation the report of the board of directors showed that during the year there had been an increase in membership of 347, of which 117 were from Ontario. The attention of the British Columbia authorities was drawn this year to the extensive forest fires in that province, and a request sent that the penalty clause in the British fire act should be enforced. The system of co-operation with the settlers of the western prairies in forest tree planting adopted by the Dominion Government is developing into large proportions. Upwards of five hundred farmers prepared their land last season under instruction from the agents of the for-estry branch, and will be supplied with seedling trees to plant shelter belts this spring. The work of guarding the for-ests from destruction by fire has, from all reports, been attended during the past year with gratifying results.

Mr. R. H. Campbell, assistant secretary, submitted a valuable report on the forest fires of 1901. The forests in every province of the Dominion have been threatened by fire, and only by the determined efforts of the fire-rangers was more serious loss prevented. In the Temiskaming district last June fully 200,000,000 fet of lumber must have been destroyed. In Nova Scotia almost fifteen thousand acres, the timber on which was valued at about \$10 per acre, was burned over. In Northumberland, county, New Brunswick, 42,000 acres of forest was burned over. In British Columbia a considerable area was ravaged by fire. In Ontario there were no serious losses in the districts patrolled by rangers, but a district fully 3,000 square miles in the Missanabie River, Northern Ontario, sufferedy from the ravages of fire. There was a general concurrence of opinion in the discussion which followed in favor of presents of the concurrence of the concurr cautionary measures against fire and a rigid enforcement of the law against those whose carelessness led to outbreaks.

The reports from the other provinces of the Dominion are equally gratifying, except Quebec, where the measures taken were not effective in preventing a serious loss in the Temiskaming. IN ONTARIO.

Mr. Thos. Southworth read an instructive paper on forestry in Ontario. He spoke in an interesting manner of the division of the districts and the other measures for reforestization adopted by the Provincial Government. In the central division, extending for about a thousand miles in a straight line from a little west of Ottawa to Rat Portage, the great permanent for-

est of the province is to be maintained. A fairly effective system of fire protection exists in Ontario, and a definite system of forest reserves, to form part of an extensive and permanent crown forest, has been inaugurated. From this forest the province will derive a large annual revenue, and it will also prove a source of wealth and employment to the people. The province had 2,500,000 acres available as a state forest, which was larger than that pos-

THE STRIKES

Newfoundland Sealing Business Comes to a Deadlock-Boston Teamsters' Strike in Full Force.

St. Johns, Nfld., March 10 .- The striking crews of the sealing steamers left their ships at midnight last night, rendering it impossible for the vessels to sail this morning. A complete deadlock prevails. The men are jubilant over the success of their movement, and have telegraphed to other leading centers, appealing to them there not to join their ships. The crews here, with their belongings, line the streets, but there is no disorder. As the weather is fair, the men are not seriously incommoded by being without shelter.

Business is practically suspended. Boston, March 10 .- In view of the threatening aspect of the strike, the state board of arbitration early today placed itself in touch with all concerned in the trouble. It was learned this forenoon that the newspapers are exempt from the embargo of the teamsters and their paper will be delivered as usual, the same as supplies to hospitals and public institutions.

IMPROPER POSTERS

Crusade Started Against Objectionable Classes of Theatrical Show Bills.

Toronto, March 10.-The power which is being sought by the police commissioners from the legislature to enable from New York for Glasgow, arrived them to act as censors in the matter out on Friday afternoon and landed all of theatrical posters is likely to be them to act as censors in the matter more far-reaching than was at first supposed. The illustrations which have raised so much criticism, as showing too much of the human form, are not the only ones likely to be officially disapproved of. Magistrate Denison, who is one of the commissioners, says that he considers the influence of the bills showing murder scenes to be bad. Posters, he explains, have been put up portraying deeds of extreme cruelty, as if such things might be looked for in everyday life. We can keep our children from going to these things in the theaters, he says, but we cannot help their seeing

Defense of the Flirt.

Ruskin advised every girl to have six sweethearts coincidently. It was excellent advice. That misguided person, the flirt, is most frequently a woman whose heart aches for friendship, but her king when he shall come. Those who were never her king, who never could be her king, call her names by way of rejoinder. They overlook the salient fact that all she gave them was friendly interest, and that was all she pretended to give them; for a conscientious flirt, that is, a woman who conspicuously pretends to love-is as impossible as a conscious hypocrite. In fact, the flirt is the only remaining artist in friendship, and a world which knows not what friendship is makes good the deficiency by maligning her. -Macmillan's Magazine

In one of the St. Louis Sunday schools the classrooms are separated by glass partitions. A St. Louis paper says that during a session of the school one of the teachers was much annoyed by loud talking in an adjoining room. At last, unable to bear it any longer, he mounted a chair and looked over the partition. Seeing that one boy who was a little taller than the others was talking a great deal, he leaned over, hoisted him over the partition, and banged him into a chair in his room, saying, "Now be quiet!"

A quarter of an hour later a small

head appeared round the door, and a meek, scared little voice said: "Please, sir, you've got our teacher."

MURDERED BY MAIL. Lowell, Mich., March 8 .- The coroner's jury which has been investigating the mysterious death of Mrs. Wm. Klump here, decided that she was murdered. Mrs. Klump .received a supposed sample of headache powder by mail last Saturday afternoon; Sunday morning she took it, and lived but a few hours. A quantity of strychnine was found in the stomach. A headache powder similar to the one taken by Mrs. Klump, was received by another woman in the village, and this was examined. It was more than 50 per cent strychnine.

The Father of Modern Japan

The Marquis Ito, who recently completed a tour of the world, has lived through the romantic period of the Japanese awakening, and his career illustrates those virtues of perseverance and patience the practice of which has won for Japan the distinction of being called the Germany of the East.

He was a member of the anti-foreign party in his youth; but when he saw Commodore Perry's squadron in Nagasaki harbor he decided that if his country was to hold its own, it must fight the Caucasians with modern weapons. He determined to learn how to use those weapons, and although it was a capital offense for a Japanese to leave the empire, started for England. In order to learn navigation, he worked his way to London before the mast on a sailing vessel. When the ship arrived the crew went ashore, and Ito, the future adviser of the emperor, spent his first night in England lonely and supperless in the fore-

At once he set himself about mastering the ways of the west. He was not long in winning the confidence of men, for when Europe was preparing to destroy the Japanese forts on the Straits who keeps the richest store hidden for of Shimonoseki, after they had fired on the foreign war vessels, he persuaded the British Government to delay action until he could return to Japan to advise his master against

continuing his foolish course. From this period his biography becomes the history of the nation. was made governor of Kobe to protect the Europeans; he was the chief of the embassy sent to Europe to ask that Japan be treated as an enlightened power; he studied western governments, and under his guidance the feudal laws were changed, the judicial system was reorganized and a constitution was

drafted The Japan of Ito's youth was, in its relations to the world powers, a bar-barian nation. It was compelled to allow foreign governments the privilege of maintaining in its cities consular courts, before which all cases were tried in which foreigners were concerned. To him more than to any other man is due the release of Japan from the trammels of foreign guardianship, and its conquet of a place among the nations which treat with each other on equal terms.

Engaged Girls Barred.

"No engaged girls need apply," is the latest phase of the nursing profession. Doctors and matrons have, it appears, been discussing the subject, and have come to the conclusion that damsels who are engaged to be married should not be admitted as probationers to training schools because, in the opinion of those staid, matterof-fact persons, they only dally with nursing until the time come to trip lightly into marriage, and thus stand in the way of those who intend to de-vote themselves whole-heartedly to

their profession. Moreover, doctors and matrons entertain a strong suspicion that not a few of these giddy candidates seek the privilege of wearing a nurse's uniform, with all the attraction it possesses for the purpose primarly of working havoc among the hearts of medical students and others with the view of speedy marriage. An argument used on the who are engaged to be married would derive inestimable advantage from g a year or tw and learning something about how to treat simple maladies such as occur frequently in households. That may be but nursing is now a recognized Gyer—The delicious feeling which profession, and those engaged in it do makes you want to sit down and not look favorably on those whom they regard as matrimonial interlopers. CHAPTER XV. So far as the world at large was con-cerned, this was the history of that evening, according to the dramatic critic of the Trumpet:

"Last night was produced at this house or the first time a new musical drama ntitled 'Faith's Reward,' written by entitled 'Faith's Reward,' written by Mr. —, the music being composed by M. Posper. The plot is briefly this," etc. "The music is excellent," etc. "Miss Marchmont, the debutante, however, must be pronounced a failure. She is remarkably pretty, and that is always something; but, unfortunately, in her case, that is all. It often happens that a first appearance calls for indulgence; but when the debutante, far from showing any nervousness gives by her care. ing any nervousness, gives, by her care-lessness of demeanor and apparent in-difference to what she is about, the impression that she thinks herself too good for her audience, for her fellow-actors, and for her part, while her whole style of singing and acting proves that she is very much mistaken, she deserves the reverse of indulgence. We are afraid, however that an actress as careless of however, that an actress so careless of applause will be equally careless of cen-sure; and if that is the case, it will be unnecessary for us to give ourselves the trouble of breaking a fly upon the wheel. We should say that a few years' diligent

practice of her profession in the provinces would be extremely beneficial to her, as to many others we could name whose strength is not equal to their courage."

The truth is, however, that the preoccupation of the debutante in question was very excusable indeed. She was not like Warden who could grasp at shedlike Warden, who could grasp at shadows without dropping substances; nor could she throw herself into Mr. —'s Ah, Mr. Warden," she said, "you have

THE DEATH RECORD

Demise of Two Well-Known Clergymen at Toronto-Bishop Spaulding of Solorado Dead.

Erie, Pa., March 10 .- Bishop Spalding, of the Protestant Episcopal Church of Denver, Col., died yesterday at the home of his son in this city, of pneu-

monia, aged 85 years. Toronto, March 10.-Rev. Henry Bath Osler, for 26 years rector of St. John's Church, York Mills, and for the past two years canon of St. Alban's Cathedral, Toronto, died at his residence, Eginton, Saturday night, aged 78. He was born in Falmouth, Cornwall, England, in 1814; came to Toronto early in forties, and was ordained in 1843. W. P. Osler, of Wolseley, N. W. W. P. Osler, of Wolseley, N. W. T.; A. E. Osler, of Toronto, and Mr. E. H. Osler, of Cobourg, are sons, and Mrs. F. Banks, of York Mills, and Miss Emma Osler, the only surviving daughters. The late Rev. Featherstone Osler was

the canon's brother, and the late B. B.

Osler, E. B. Osler, M. P., and Dr. Wm. Osler, of Baltimore, are nephews.
Toronto, March 10.—The Rev. Father Ryan, Dean of St. Michael's Cathedral, died in St. Michael's Hospital, Rev. Francis Ryan was of Irish parentage and was born in New-foundland in 1844. At an early age he was sent to Ireland, where he studied at several of the large schools of learning. Later he went to France, where he studied with the Jesuits, graduating in philosophy and theology. On 1875, he was ordained priest. Shortly after his ordination he came to Canada as secretary with the late papal delegate apostolic, Rev. George Conroy, whose pupil he had been in Ireland. On the death of Most Rev. Mr. Conroy, Father Ryan went to Montreal, where for two years he was the English preacher in the Jesuits' Church. On leaving Montreal he went to the United States and taught philosophy at St. John's College, Ford-ham, and at St. Francis Xavier's College, New York. Some years later he became pastor of St. Ignatius' Church, Baltimore, and of the Church of the Holy Trinity, Chicago. On leaving Chicago he came to Toronto and became rector of St. Michael's Cathedral. As an orator he was eloquent and impressive, and was a most successful lecturer. On many occasions he appeared at public ceremonies in Toron-

PAPER DEALERS ORGANIZE. New York, March 10 .- Forty-two of he large wholesale dealers in paper have formed an organization to be known as the Wholesale Paper Dealers' Association of the city of New York. The object of the association was stated to be eradication of abuses in the trade and for social purposes. The combined dealers represent in capital \$10,000,000. Eben Miller, of Miller, Sloane & Wright, was elected president; Wm. D. May, of George Miller & Co., was chosen as vice-president; Thomas Barrett was elected treasurer and Henry J. Lathrop, of Morrison Bros. & Co., secretary.

STORY OF AFRICAN CAMPS. Washington, March 10.-Dr. Heinrich Muller, one of the European diplomatic representatives of the Orange Free State, called upon Secretary Hay at Washington on Saturday and had a half-hour's interview with him. As in the case of the other Boer representatives, Mr. Muller was received upon distinct understanding that he came in a private capacity, and not as a diplomatic representative. Unlike the preceding callers, he did not address himself to the subject of intervention or mediation, nor did he broach the question of the mule shipments to South Africa. His sole concern was with the concentration camps in South Africa. He told the secretary a pitiful tale of the sufferings of and mortality among the reconcentrados, the death rate among the children in the camps running as high as 50 per cent, according to his statement.

INTERNATIONAL TOURNEY. New York, March 10.-W. A. Gavin and G. C. Lea, of the National Sporting Club of London, arrived Saturday on the St. Paul. "We have come," said Mr. Gavin, "to try and induce American champions of boxing, fencing and wrestling to go over to England during coronation week, and there to meet the best men that Great Britain and other countries of Europe can produce. We chiefly want the champions of the army and navy, but they must get men that are at present in the country's service, and not like Tom Sharkey, who, although formerly in the United States navy, has been a professional for many years. We will also try to get Harvard and Yale to send their best boxers to England and compete against those of Oxford and Cambridge. That old copybook maxim finds its most forceful application in the waste of vitality, which is called "burning the candle at both ends." A woman is often tempted beyond her strength by domestic or social demands. Some day she awakens from this waste of strength to the woeful want of it. She has become weak, nervous and miserable.

For weak, nervous, run-down women there is no better tonic and nervine than Dr. Pierce's Favorite Prescription. It restores the appetite, quiets the nerves and gives refreshing sleep. It cures local diseases peculiarly womanly which undermine the general health. It makes weak women strong, sick women well.

"No doubt you have forgotten me, but after "No doubt you have forgotten me, but after you read my letter you will remember me," writes Mrs. Annie E. Moring, of 238 7th Avenue, S. W., Roanoke, Va. "In the year 1897, I wrote to you for advice, which you gave me free of charge. When I wrote to you I was a wreck; I could not walk straight for pains in my abdomen; could not sit down, lie down, or get any ease at all. I had what was called the best doctor here, but did not get any better until I went through a course of your medicine. I took eight bottles each of 'Favorite Prescription' and 'Golden Medical Discovery,' and ten bottles of the 'Pleasant Pellets,' I tell you the medicine made a cure of me."

STRATFORD-U. C. C. GAME. Toronto, March 10 .- The Stratford hockey club has not yet decided whether they will protest their game against Upper Canada College or not. They feel that they are technically right, and are inclined to push the matter. The contention is that the Q. H. A. sub-committee, which ordered that there should be no ties on the round, had no authority or jurisdiction in the matter, which sheeld jurisdiction in the matter, which should have come under the consideration of the whole executive. It is likely, hovever, that cooler judgment will prevail, and

that Stratford will take their setback a better spirit than the first thoughts suggested. The protest would doubtless be thrown out by the executive in any case. The receipts of the Peterboro-Galt game at Peterboro on Friday night night amounted to \$376 75. WATERLOO WON.

advisable the commissioners shall make such recommendations to their governments tooking toward an agreement or treaty which shall provide for the construction of the dam. The commissioners are also authorized to make an estimate of the cost, in

case Great Britain accepts. The president is authorized to appoint a United States engineer and a civil engineer well versed in the hydraulics of the great lakes; also a lawyer experienced in international and riparian law, and to fix the compensation of the commissioners. aries and expenses are authorized to be paid from the St. Mary's River fund, provided for in the river and harbors account of Sept. 19, 1890. Speaking of the proposed project, Representative Alexander said that the building of such a dam would compel the construction of a channel for deep draft vessels around the rapids and shoals at the head of Niagara River regardless of cost. Mr. Alexander also expressed the opinion that the dam would raise the water from two to three feet above the low water level of the lakes. The section leaves it to the commission to fix the location of the dam.

washington, March 10.—Several days ago Representatives Alexander brought to the attention of the rivers and harbors committee the report of the deep waterways commission, which provides for a dam at the headwaters of the Niagara River. Coupled with the report he presented statistics to show that during the last four years there has been a gradual lowering of the lake level, which led to the appointment of a sub-committee consisting of Chairman Burton and Representative Alexander to draw up a proposition for the construction of a dam.

They completed their report Saturday and it will be made a part of the river and harbor bill that will be reported to the house today. The section provides for the formation of an international commission, composed of three members from the United States and three from Great Britain, to represent Canada, whose duty it will be to report upon the advisability of leating a dam across the Niagara River at the outlet of Lake Erie, with a view of determining whether such a dam will benefit navigation, and if deemed advisable the commissioners shall make such recommendations to their governments tooking toward an agree-

HANDLE WORKS BURNED DOWN

Loss on Building and Machinery Is About \$25,000.

Fire Originated in the Boiler-Room-Seventy Men Thrown Out of Employment.

As flerce a fire as the firemen have had to cope with in years was the one which early Sunday morning destroyed the entire contents of the main building of the Columbia Handle Works. The loss amounts to about \$25,-000 to the company occupying the building, and seventy hands are thrown out of work. The company is said to have been among those paying the highest wages in the city, and the loss in various ways will amount to many thousands of dollars.

FIRE IN BOILER ROOM The firemen and others are of the belief that the fire started in the boiler matter is now in the hands of room. On two other occasions the firemen were called to this factory, and on each occasion the blaze was in the boiler room. The alarm was rung by the watchman about 2:20 o'clock, and when the fire companies came on the scene the fire had played much havoc with the contents of the building. Smoke was belching from every part of the structure, and the fire had a good start. Four lines of hose were laid as quickly as possible, two from Adelaide street and two from Simcoe street. The hose from Simcoe street had to be pulled through cars, over lumber piles and around fences, and it was here that the brigade were handicapped by not hav-ing enough men. The men chopped the good things provided, an excellent programme, in which members of the piles of logs blocking their progress. lodge and local talent took part, was rendered. County Councilor R. W. Jackson, the present acting county clerk, presided. The programme of the building, only to find piles of logs blocking their progress. Much delay was experienced, which proved costly. When the difficulty was overcome the firemen were unable to go into the building. To play on the fire with the hose was the only course they could pursue. The flames in many Irene Carmichael and Miss Morgan. places melted the metal sheeting under Grand Organizer R. M. Graham also the slate, and the flames burst through the slate, and the flames burst through the roof, casting a reflection for miles.

> done except to prevent the fire from spreading Viewed last night, the ruins presentchinery. The fire, although it burned every window sash, did not appear to have scorced any of the immense quan-

tity of logs and small wood piled around the place. Ex-Mayor Rumball would not state definitely this morning that the com-pany would rebuild the factory, but everything points to the likelihood of their doing so. A meeting of the directors, Messrs. Rumball, John Stevely and Wm. Braddon, was held this morning, but no definite conclusion was arrived at. The building belongs to the Grand Trunk Railway Company, and is completely covered by insurance. It was formerly used as a roundhouse by the Grand Trunk. The railroad would no doubt be sorry to lose the money accruing from the freight business the handle works did, but may not agree to the company again building on the site. Much inconvenience would come about by this, as new switching would have to be put in a new yard. Two warehouses, containing finished goods, escaped untouched. The works covered about 150x80 feet. The walls are said to be of the strongest in the city. Ex-Mayor Rumball, president of the

company, stated that the loss would be about \$15,000 to the company-\$10,000 to the machinery and \$5,000 to the Death on Coughs Don't let a new cough grow old. Kill it while it's young or it may kill vou.

Jerusalem Lodge Defies Edict of Canadian

Grand Lodge.

"The Masonic fraternity in Toronto had to put on their thinking-caps last evening when they read in the evening papers the announcement that brethren who are passengers on the steamship Celtic, now making an excursion trip to eastern ports in the Mediterranean, intend remaining at Jaffa, and while at Jerusalem attend a meeting of the Masonic lodge of that city, which is under the grand lodge of Canada. The dispatch says the meeting is to be held in King Solomon's quarries, some quarries that can hardly claim the antiquity of the royal king, but which were probably in use two or three hundred years ago, and were rediscovered about twenty years ago. They are underground, and evidently supplied a lot of stone for buildings around Jerusalem, cer-tainly none for the Temple of King Solomon, because the stone is of a soft character and more fit for interior than exterior work. This lodge has made a business of holding meet-ings in these quarries at Jerusalem, and receives contributions from tourist agents in order to defray the ex-pense of so doing. Indeed, the hat has been passed around for collections amongst American tourists in order to help the lodge out of financial difficulty. It apparently does not reflect very much credit upon the grand lodge of Canada, when a lodge of its jurisdiction should act in this manner, but, of course, all this was done with out the knowledge of the grand lodge. Some time last winter reports were made to G. M. R. Bro. R. B. Hungerford, of London, who died last summer. In his last address to the grand lodge he recommended that this lodge be stricken off the roll or disciplined, and the grand lodge suspended the lodge at Jerusalem.
