## IS THE EMPEROR WILLIAM TO BECOME PEACE-MAKER?

Report That He Has Been Empowered to Act for the Boers—Another Convoy of Burghers Captured.

London, July 26.—The rumor as to early peace negotiations which has pervaded the house of commons for some days, says the Daily Express, has taken the more definite form that Emperor William is soon to assume the role of peacemaker.

Mr. Kruger and his advisers are represented as having empowered the Kaiser to act for the Boers, and he is considered willing to take the initiative in order to popularize his relations with the German people, who disapprove his friendship for Great Britain.

Something apparently is on foot whether Emperor William is in it or not.

Mr. Kruger's arrival at The Hague is connected, the Daily Express thinks, with the rumored peace suggestions. On his arrival at The Hague, Kruger proceeded to the residence of Mr. Wolmarans, one of the Boer envoys at Scheveningen, a watering place on the North Sea.

### CONVOY CAPTURED.

London, July 26.—The war office has received the following despatch from Lord Kitchener, dated Pretoria: "Garrett's column captured a Boer convoy, taking 25 prisoners near Reitzburg. Our casualties were 8. "French's columns are gradually

pushing the enemy north in Cape Colony."

### THE CENSORSHIP.

London, July 26.—War correspondents in South Africa have united in a belated revolt against the military censorship. Mr. Bennett Burleigh describes the censorship as a "bungie and a blunder," and declares that the sooner the whole matter of unofficial correspondence is on a definite basis conformable to free institutions the better it will be for everybody. Edgar Wallace asserts that there is nothing in the military position to justify maintenance of censorship, and that it is creating a bad precedent, since the only service which it can render is a political one, favoring "somehow of Russia; nay, it is Krugerian."

It is not easy to understand what are the political motives for the suppression of news from the seat of war. Ministers have no conceivable reason for dreading possible revelations from the seat of war. Some incidents suppressed would bear heavily against advocates of the Dutch cause. "Vlaanderen atrocities, if fully confirmed in detail, would tend to alienate sympathy for Boers. The fact that the horrible shooting of the wounded has been left to come out little by little by soldiers' letters home excites suspicion that there may have been drastic measures on the British side in establishing concentration camps."

## BLENHEIM HAD HARD LUCK

Twice Beaten in the Semi-Finals at the London Bowling Tournament.

Fought Their Way Through the Early Stages only to Fall by Narrow Margin at the Finish.

London, July 26.—Yesterday was the third day of the Western Ontario Bowling Association's tournament, and it was the finish of the association match and the bringing of the consolation match to the last stage. The preliminary of the doubles was also played, and some of the contests in the preliminary of the singles were played, but the round was not completed.

The association match was captured by a team of colts, with James S. Tyler, of London, as skip, and the win was the most popular of the tournament. This was the first tournament in which the rinks, who style themselves the "Cooks' Ladies' Union," have figured, and their victory is, therefore, all the more creditable. In the second round the Tyler rink defeated a St. Thomas rink of older players, and in the third round, it had an easier win over Petrolia. A Brampton rink were the victims in the next round, and the youngsters overcame four London did-timers, skipped by J. S. McDougall.

The final in the conclusion will be played to-day. Two London rinks have qualified for it, with J. H. Brown and F. S. Clark as skips.

### ASSOCIATION MATCH—FIFTH ROUND.

London—J. S. McDougall, skip—10.

London—J. Tyler, skip—19.

Blenheim—R. L. Gosnell, skip—17.

St. Thomas—Col. Burke, skip—22.

### FINALS.

London—J. Tyler, skip—17.

St. Thomas—Col. Burke, skip—15.

### CONSOLATION MATCH—FOURTH ROUND.

London—Dr. English, skip—18.

Clinton—W. Jackson, skip—21.

St. Thomas—T. Williamson, skip—13.

London—J. H. Brown, skip—19.

Seaford—J. S. Roberts, skip—19.

Stratford—J. Steele, skip—26.

London—A. Parfitt, skip—17.

Brampton—J. A. Laird, skip—14.

T. S. Clark, London, won by default from Dr. Holmes, Goderich.

### FIFTH ROUND.

London—J. H. Brown, skip—20.

Clintson—W. Jackson, skip—18.

Stratford—J. Steele, skip—15.

### SEMI-FINALS.

London—J. H. Brown, skip—18.

Stratford—J. Steele, skip—15.

London—T. S. Clark, skip—16.

Blenheim—R. L. Gosnell, skip—15.

The final between J. H. Brown, London, and T. S. Clark, London, will be played to-day.

In the preliminary doubles McDougall and Spry, London, beat Gibb and Mulholland, Blenheim, by 13 to 41.

Kent and Parfitt, London, beat Ferguson and Gosnell, Blenheim, by 11 to 6.

## THE COMBINE DEFIES STATE

Attempt to Import Alabama Negroes to Take Place of Strikers Being Made.

Riot May Follow When the Colored Men Reach Chicago, and Dozens are Jumping From the Train.

Chicago, Ill., July 25.—The Latrobe Steel Co., a part of the United States Steel Corporation, in defiance of Illinois state law making importation of laborers a felony, is alleged to be endeavoring to import negroes from the south to work in Chicago, as part of an alleged organized effort to break the great strike.

A tempest has been aroused, and Gov. Yates was appealed to last night to stop the train carrying the negroes from entering the state.

Yates said he could see no way to interfere personally, but suggested that if there should be danger of disorder or violation of laws by bringing persons into the state, either under arms or under false pretenses, the sheriff of Cook county should be called on to preserve the peace.

The law is specific on the matter of importing laborers into the state. The importation of an armed body of workmen is made a felony. It is also a felony to import persons who have agreed to work for stipulated wages. As none of these things was alleged in the message asking the governor to interfere, he could see no way under the law to take a hand in the matter.

At the time when the appeal reached the governor a train had reached Carbondale with 295 negroes from Birmingham, Ala., on board, accompanied by seven or eight white men supposed to be guards, en route for Chicago. The men were hired with the distinct understanding that no strike whatever was on. They claimed to be union men and said that under no circumstances would they take the places of strikers. The men were told trouble might occur on their arrival in Chicago.

While residents of Maywood, Melrose Park and Bellwood waited along the tracks of the Chicago Junction railway during the early hours of the morning to bear out the trainload of southern negroes the much sought train was sidetracked at Blue Island. The Illinois Central road turned the special train over to junction railway at 4:20 a. m. When Blue Island was reached it was decided not to proceed to Melrose Park till morning.

The negroes were loud in their protestations that they would not have come north had they known such a tempest was brewing. All day yesterday the reports that reached them of the greeting awaiting them at Melrose Park grew more threatening.

Early to-day it was declared on the train that 100 of the men had deserted at Fulton, Ind., and gone to work for the railroad company.

Ignorant that the train was at Blue Island a peaceable committee composed of Rev. E. E. Cookingham, Peter H. Bohlander, W. H. Schooley, A. H. Gallagher, Chas. Wolff and 15 others during the early hours of the morning awaited the negroes, hoping to persuade them not to leave the cars and the engineers to pull out to some safe place.

As an offset to the peace committee another crowd, estimated at 125 men, all armed with revolvers, were scattered along the tracks waiting to give the negroes a hint to leave or

take the consequences if they remained.

Pittsburg, July 25.—Two moves, it is reported, were made by the aggressive officials of the American Sheet Steel Co. yesterday toward breaking the strike.

One was the shipping of some of the non-union men that have been employed in the Vandergrift mills of the company to Wellville to assist in the starting of the plant there.

The impression is strong that the general officers of the United States Steel Corporation have become determined on the subject of the early breaking of the strike and to ultimately force the operation of all the idle plants.

The second move understood to have been initiated is the starting of the long idle Hyde Park plant of the American Sheet Steel Co. idle since the American Sheet Steel Co. took hold of the property.

## WHAT'LL ROSS DO?

To-day is the Time for the Cancellation of Gas Company Lease.

Windsor, July 25.—The United Gas & Oil Co. remains its confidence that the export of natural gas will continue, although to-day is the date set by the government for the cancelling of the lease of the bed of the Detroit River.

"The report is authenticated that J. C. Donnelly, attorney for F. B. P. Burns, of the Interior Construction Co., has made an arrangement with the government to continue the lease until fall," said W. C. Kennedy, secretary of the United Gas & Oil Co. to-day. "We will continue to send gas to Detroit to-morrow, and many days after that."

## AT REST.

Obsequies of the Late Rev. F. M. Baldwin at Toronto.

Toronto, July 25.—The funeral of the late Rev. Francis M. Baldwin took place this afternoon from the residence of his mother, Dowling avenue, to St. James' cemetery. The religious services were conducted in the late Mr. Baldwin's church, in Ridgeway. The Rev. Mr. Barr, of All Saints', conducted the services at the grave. The chief mourners were the mother of the deceased, his uncle (the Bishop of Huron) and his cousin, the Rev. Dr. Baldwin. A great abundance of flowers was sent by the late rev. gentleman's parishioners in Ridgeway and Woodstock.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires a constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

## .. The Planet..

S. STEPHENSON - Proprietor.

## SERIOUS COUNSEL.

Permit us to say a few words—seriously and sincerely.

There is, perhaps, no creation of the perverted mind so genuinely abhorred as the unclean newspaper publication. The Canadian press is upon a high plane. It is deservedly proud of the fact. It is welcomed into the homes. It enjoys the confidence of the people.

That standard must be kept up. We betide our homes and our country if Canadian journalism lapses to the low level of laxity and uncleanness.

Such disgusting pictorial representations as appeared on yesterday's editorial page of the Banner-News will not be tolerated in this Canadian community. They meet no welcome in the homes. They carry their own condemnation.

The Banner-News must mend its methods. Else the inevitable end must follow. It is to the credit of our community that a journal pursuing such a course can but measure its struggling existence by a few months at most.

There must be radical reform—and right away. The present week has produced a spectacle that is profoundly regretted. A controversy, commenced with a flow of epithets gathered from the slums of Chicago, has been augmented with a picture whose only distinctive feature is its nastiness.

The Planet speaks seriously. The cut was probably printed to annoy this journal. It has done more. It has hurt us—destroyed our pride in clean Kent County journalism. And such methods gain nothing. The attack could be quite as keen, the criticism fully as caustic, the point gained just as effective, if the method were such as could be utilized in the drawing room without a blush.

We trust, and trust sincerely, that the Banner-News will take these few earnest words of kindly counsel in which they are tendered, and set about conscientiously to regain the forbearance and respect of the community, which its unfortunate and regrettable course has lost.

## CONDEMNED BY FRIENDS.

The Conservatives and Independents have condemned the disgraceful proceedings at the North Waterloo election trial, but now the better class of Liberals also come out and condemn the government in no gentle terms, says the London News, Independent. The Kingston Whig, which is one of the best conducted and most independent papers in the province, practically calls the election trial an outrage, and holds the government responsible.

"Why was the prosecution delayed for two years?" asks the Whig. "The reasons given are not generally acceptable, and the government cannot escape the suspicion of not being anxious for a conviction. The necessity for an immediate prosecution appears to be evident from the experience," continues the Whig. "The ballots were switched. That is certain. Who did it? The voters or the deputy returning officer? The latter says he did not, and one of the scrutineers, who was detailed to watch him, says Wildford did not miscount or alter the ballots as he took them out of the box. The voters in the case could have been sworn. Why was this not done? Supposing that they declared on oath, that each ballot was free of the marks that were found upon it would the returning officer not be obliged to account for the marks or stand accused of switching?"

"The man has been acquitted, but there is something about the case which is unsatisfactory, and which calls for a change in the routine of election trials. The judges who find the wrong doers should punish them at once, and the law should be amended so as to permit of this being done."

MAX O'RELL ON KING EDWARD VII.

Max O'Rell, the able French wit and litterateur, who has lectured and is well known all over the world, is fundamentally friendly to Great Britain, though retaining his right to occasional sharp criticism, says the Blenheim Tribune. It is rather interesting to read his latest estimate of the new King. He says:—

"During the past few months England has witnessed without surprise, but with lively satisfaction, the assiduity, the wisdom and the many-sided sympathy which King Edward brings to the discharge of his duties. He is everything that the president of a republic can be. He has from his earliest years been brought up to the business of statesmanship.

"His experience is that of a man who has practically always been in of-

rice. His impartiality is made easier by his independence of and his superiority to all political parties. The late Queen has been succeeded by a son brought up in her school, who thoroughly realizes her character and her modes of action, and who is stepping carefully in the footsteps by which she expressed her constitutional attachment to the institutions of Great Britain.

"King Edward is a success, and as formal coronation will add to the deep feelings of loyal affection which unites him with the people of the land, there is no doubt that he will respect the constitution as his mother did, but there is no doubt that he will have more influence than she had in the direction of affairs. He will not efface himself so much, and the dignity with which he conducts himself shows that King Edward has parted company with the ex-Prince of Wales. Yes, a decided success he is. Nothing but admiration and praise is expressed everywhere.

"Never was the English monarchy more firmly established than it is today, for it is based not upon hereditary privilege or legal enactments, but on the hopes, the sentiments and aspirations of a grateful and loving people."

## DISGRACES THE COUNTRY.

This country is disgraced by the beggars who seek money in Great Britain for this mission or that good cause "in Canada," says the Toronto Star. The time has gone by when it is necessary for preachers to appeal to the British public for funds to carry on their work out here, and in some way this country should repudiate such beggars.

In nearly every case where a clergyman appeals in England for subscriptions he is a man engaged in a work that is locally considered superfluous, or he is a preacher who has outlived his usefulness, who perhaps, never put himself in touch with the people among whom he lives, and is deserted; but will not make way for another, and so appeals to "the folks at home," so that he can snap his fingers at his enemies. There is no need for going abroad for alms. The cause that has good recommendations can have its needs satisfied in Canada, and the man is a poor specimen of a Canadian who will discredit the country in sight of the world by taking up a collection in Europe to carry on work here that we should do for ourselves.

The craze for begging, for passing the hat wherever a likely-looking lot of people are gathered together, seems to break out in an odd man here and there; but if this is a disease it should be so explained to the British public, and the people of Canada not held responsible for the vagaries of the patients. Lord Strathcona might very properly warn Englishmen against subscribing funds to alleged good causes in Canada. Such causes can probably come as near to getting what money they need as such causes can in any other country.

One reason why so few elderly people in Canada succumbed to the heat was because all the weak ones had already succumbed to the grip.

## DISQUIETING.

Hamilton Times.

Some Canadians who have re-married after securing United States divorces are wondering where they are at, and it is said that bigamy prosecutions may follow the decision in the case of Earl Russell.

"I'm thinking of doing a little speculating," said the lamb. "What's the best thing to put your money in?" "A safe deposit vault," replied the old bird.

## GOOD INVESTMENT.

## PRACTISING AND PREACHING.

Hamilton Herald.

The other day the Herald heard a lady scolding a 'bad little boy' for throwing sticks into a tree to bring down a bird's nest. And that lady's hat was bright with birds' plumage. In such cases it would be well for ladies to talk through their hats.

## BUFFALO WANTS THE DUKE.

Buffalo Courier.

That is rather a fanciful story that the Duke of Cornwall and York will not visit New York City, or set foot on American soil, because he fears insults for political effect. We are inclined to believe that the Duke's wishes may not have been consulted, but that his Canadian entertainers are reluctant to lose him even for a day. He is quite sure to visit Niagara Falls, and will hardly leave there without seeing the Pan-American. It would not be surprising, however, if Buffalo were the only large city of the United States visited by him, for lack of time.

## THE FLAG.

London News.

On holidays there are only about half a dozen banners in sight, and they look lonely. The mission of a flag is not to droop at half-mast to mark respect for the illustrious dead, though that is its misfortune occasionally. In this we can learn a few lessons from the Yankees, who are no more loyal than we are, but have in some instances a better way of showing their patriotism. In any city on the other side of the line with the population of London on any day in the year there are more flags flying than on any of our gala days in London. The effect is good. The town looks better and more wide-awake, and loyalty to the flag is inspired in the rising generation. Let all the public buildings fly the flag, and any private person who has a national banner, let him wave it aloft.

PAN-AMERICAN, BUFFALO, N. Y. Parties who intend visiting the Pan-American Exposition at Buffalo can secure private accommodation within ten minutes' walk of the grounds. For particulars and rates address M. H. Terry, formerly of Chatham, 1222 West Ave., Buffalo, N. Y.

## FINEST OF ITS CLASS

THE ONTARIO MINERAL EXHIBIT AT THE PAN-AMERICAN.

The Economic Ores and Minerals of This Province on a Scale That Shows the Real Importance and Abundance of These Resources of Ontario—Well Displayed and Artistically Grouped.

(Special by Martha Craig)

It is now generally acknowledged that the Ontario mineral exhibit is the finest of that class at the Pan-American Exhibition, Premier Ross, Hon. E. J. Davis, Commissioner of Crown Lands, and F. W. Gibson, of Toronto, Director of the Bureau of Mines of Ontario, decided to show the economic ores and minerals of Ontario on a scale that would convince visitors of the real importance and abundance of these resources of the Province. All the ores have been taken from working mines and represent the ordinary run of ore from these mines. Mr. Frank N. Speller, B. A., secretary, of Toronto, was appointed superintendent in charge of the collection and installation of this notable exhibit. Mr. Speller is the right man in the right place, he understands his work thoroughly and deserves to be congratulated on results attained. The exhibits are well displayed and artistically grouped.

Occupying a prominent place is a large map of Ontario, 13x20 feet. It is geologically colored and was prepared by the Bureau of Mines and executed by Elliott and Sons, of Toronto. The map shows the location of the principal mineral deposits of the Province and has been pronounced by artists the finest piece of artistic decorative work in the building.

A second map of Ontario 10x15, shows in particular the mineral and forest resources about the region of Sault Ste. Marie. The lines of communication are shown by colored incandescent lights. The map was prepared by order of F. H. Clague, general manager of the Lake Superior Power Company of Sault Ste. Marie.

The nickel-copper exhibit shows the ore from the Sudbury region. Every working mine is represented here. The weight ranges from 1,000 to 10,000 pounds per specimen. The entire pile contains about 17 tons of ore. Every stage of the operation of the reduction of nickel and copper from the ore is illustrated by samples. The final operation of the reduction process is also shown, thus illustrating completely the manner in which the nickel and copper are extracted from the ore. The Nickel-Copper Co., of Ontario, have attractive exhibits showing the new French process in detail. The average visitor appreciates the details by the lucid manner in which it is illustrated.

Copper ores of the north shore of Lake Superior are shown on a similar scale, every mine being represented. The pieces weigh from 1,000 to 8,000 pounds, the pile weighing 12 tons in all. It is evident that modern machinery must be used in these mines to raise and transport such great masses.

The Lake Superior Power Company have collective exhibits of iron ore from Michipicoten. Copper and building and ornamental stone and the pig iron, also a large assortment of enlarged photographs showing the works and mills of this company. Ferrous nickel made by the new electrolytic process is shown in the form of bars, and is attracting the attention of steel mill who know the value of nickel steel.

As a central point in the display stands the most remarkable feature of the Mines Building in the form of a column of solid graphite from the Black Donald Mine, Renfrew County. It is made up of three large blocks, the lower one being 3x3x4 feet in size. A base three feet high of limestone of excellent quality from Queenstown Quarry, St. David's, Ont., was provided by that company. On this pedestal is placed a statue of Canada, extracted by J. W. Banks of Toronto. Its dignity of pose and excellent treatment have created universal admiration amongst exhibition sculptors and artists.

The Canadian Corundum Company have the largest display of this material ever made, and have also a complete line of abrasive material made from Canadian corundum. The fine exhibit of the Crown Corundum Company and Imperial Corundum Company demonstrates the increased importance of this industry in Canada.

The other and more prominent of the divisions represented are the gold, silver and iron ores, building and ornamental stone and mica. The use to which this latter material is put in coppering steam pipes and boilers is well shown on a practical scale by the Mica Boiler Covering Company of Montreal. The contract for covering His Majesty's ship Blake, one of the most modern battleships under construction, was awarded to this firm. There is a grand field for mica in this and for electrical purposes.

Talc, gypsum, salt, mineral water and coal are also in evidence. The Milton Pressed Brick and Terra Cotta Company are represented by an arch, which is an excellent example of the progress made in artistic decorative terra cotta work.

The excellent record made by the Province in the Mines Building at Chicago is well remembered and the progress made in mining in Ontario since that date is evident by the greater variety and importance of the Pan-American display. It is the best yet prepared by the Ontario Government.

Those interested in Ontario mineral resources can obtain copies of the latest reports of the Bureau of Mines, the descriptive catalogues of the exhibit and any further information by applying to the superintendent, Mr. F. W. Speller, at his office in the Mines Building.

## Retrospect.

It is an evil day for the wife and mother when she scans her worn face in the mirror, and asks the question, "Does it pay?" Does it pay to sacrifice health and happiness to wedded love? But there is another question which rightly takes precedence of "Does it pay?" It is this: "Is it necessary to sacrifice health and happiness to wedded love?"

Half a million women answer, No! They have been weak and have been made strong by Dr. Pierce's Favorite Prescription. They were sick and "Favorite Prescription" made them well. It will do the same for almost every woman who gives it a fair and faithful trial. It stops weakening drains, heals inflammation and ulceration and cures female weakness. It tranquilizes the nerves and encourages the appetite.

"I expected to become a mother, and a threatened miscarriage greatly weakened me," writes Mrs. E. A. Nations, of Wills Springs, Kentucky Co., Ark., "and my old disease returned. My husband got another doctor for me but I seemed to just drag along and get no better. As he told the doctor that I had no medicine did not help me I would go back to Dr. Pierce's medicine. I did so, and by the time I had taken them one month I could do my own household work, except washing, and I was able to go out. I was waiting for my first child, she is now eleven months old and is a healthy child. She is for me, I feel as young now as I did at eighteen years of age; and my husband is a healthy man. I can recommend Dr. Pierce's medicine to all suffering women."

**The Apple.** The apple is an excellent brain food because it has more phosphoric acid in easily digested shape than other fruits. It excites the action of the liver, promotes sound and healthy sleep and thoroughly disinfects the mouth.

**No Red Tape.** The British veteran gets his service medal without the intervention of a pension attorney.

**A Big Difference.** The quartz extracted from Australian and Californian gold mines would be enough to build 150 pyramids of Cheops, but all the gold could be put in a room 40 feet by 20 feet by 15 feet.

**Preserving Steel.** Steel that is exposed to the weather may be kept from rust by having a thorough coating of copal varnish.

**Mahogany Polish.** A mahogany polish that is highly recommended is prepared by mixing well together one-quarter of a pint each of turpentine, linseed oil, alcohol and vinegar. Put in a bottle and shake before using. The furniture should be cleaned first with a soft flannel and a little of the mixture applied at a time. When well rubbed in, polish with an old silk handkerchief.

**Precious Stones.** The heaviest precious stone is the sapphire, which is four and a half times heavier than an equal quantity of water; the lightest is the opal, only twice as heavy as water.

**Clouds and Temperature.** With a clear sky the temperature 1,000 feet above the earth is 6 degrees lower than at the surface, with a cloudy sky 4 degrees only.

**Sunny Days.** In New York city on the average 64 per cent of the daylight hours are sunny. In Rome the figure is 55 per cent, in Madrid 45, in Vienna 38, in Berlin 39, in St. Petersburg 35 and in London 23.

## The Shirt-Waist For Men, Again.

WITH the advent of hot weather, reports begin to come in from various parts of the country telling of the preliminary skirmishes in its fight for public recognition. Its appearance last summer was too late in the season for a conclusive struggle between its friends and foes; but this time it is on the scene early. The progress of the battle is reported and commented upon as follows by the New York "Tribune":

"The shirt-waist problem, which began about a year ago in private discussion, has passed that stage and has now been taken up by official bodies in various parts of the country. In individual cases the matter has been fairly traversed in argument, and has gone forward into execution. More and more countless men are to be seen day by day, and certainly it cannot be maintained that they are all callow youth or men readily convicted of a desire to look like women. Among the official bodies which have taken up the shirt-waist problem, associations of letter-carriers have been prominent. The battle has been waged in the ranks of the postman with considerable fierceness. There has been a great reluctance to adopt the shirt-waist on the part of many of the carriers, and in several instances there have been efforts at compromise. In Washington, D.C., for instance, someone devised a peculiar sort of garment which is said to resemble a shirt-waist in front and a coat behind. Permission to wear this garment was secured by the postal authorities, and it was adopted by some, though not by any means a majority, of the carriers of that city.

"The question came up before the letter-carriers of New Haven recently, and there a suggestion was made which ought to solve the whole difficulty. Everybody agrees that every man ought to keep as cool as possible during the hot term. If he does not he will be cross to his wife and children, besides suffering other lesser evils. Everybody agrees, also, that no coat was ever devised which was really cool enough for midsummer. The disagreement comes when it is proposed that men adopt the shirt-waist, by name and association, feminine garment.

"The feeling was well expressed by one of the New Haven carriers, who said: 'What do they want to rig us out with? They want to make us look like a lot of women? Do they think we are favor shirt-waists will one of these days be calling for hoopskirts for the men? Give us the blouse, a man's garment.'

"Now, here is the germ of a great thought. 'Give us the blouse, a man's garment.' A blouse, according to the dictionary, is 'loose upper garment worn by men in place of a coat, or, in other words, call it a blouse, and don't, for the shirt-waist, call it a blouse, and the resultant coolness will be just as delightful, but the stigma of aping the women will be forever removed. Sometimes there is a good deal in a name. By all means give us the blouse.'

**Would Stand No Nonsense.** Believing that true love can never run smooth when a man continually kisses the woman of his affection, the Mount Hope Married Men's Anti-Kissing League, a Western organization, after due deliberation arrived at the following agreement:

"That henceforth we will not kiss our own wives or any other woman, but that we will still hold the same deep affection for our wives and retain our admiration for the female sex. We do not believe that kissing is right, and therefore we agree not to practice it. Any member of this organization who is found guilty of disobeying the order will be dismissed at once. It is a dirty and filthy habit—one that is apt to spread disease, and against the true principles of love. One does not need to kiss to show their affection. The grasp of a hand is sufficient to do that, and as for loving, one's actions speak for that, and not by the number of times you kiss your wife."

When these resolutions were handed out to the women, a great sensation was created, and the wife of the president threatened to leave her husband once. The thirteen wives of the thirteen members held a meeting and decided that they would leave their husbands within one month if they did not break up the club.

**Uncle Sam.** "Uncle Sam" was invented about the time of the American War of 1812. Two inspectors of war supplies of Troy, N. Y., were named Ebenezer and Samuel Wilson.

A workman in their employ was making a lot of casks received from one Elbert Anderson, a New York contractor, which were stamped "E. A. U. S. A." Somebody asked the workman what these marks meant, and he replied that they probably meant "Elbert Anderson and Uncle Sam," alluding to Inspector Samuel Wilson, who was locally spoken of as "Uncle Sam."

Thus the initials of the United States were transformed by a local joke into a national sobriquet which will doubtless last as long as the Republic.

The nickname "Brother Jonathan" dates back to the time when General Washington went to Massachusetts to take command of the Revolutionary Army. Finding a great lack of ammunition and other supplies, he turned to Governor Jonathan Trumbull of Connecticut for aid and received it, and in many emergencies of that period he used the phrase, "We must consult Brother Jonathan on the subject." The expression quickly became nationally current.

**A Truthful Man.** Guest—You advertised (what) that there were no (slap) mosquitoes here. Do you consider, sir, (what) the statement true? Proprietor—Yes, sir, I wrote that circular last January—"Life."

Mrs. W.—I didn't know that Mr. B. had a title. Mr. W.—Neither did I. What is it? Mrs. W.—Well, his servant says that everything comes addressed "James B. C. O. D."

Mr. and Mrs. J. A. McKeen and Mr. and Mrs. Robert Gray left this afternoon for Winnipeg to attend the exhibition.

The death occurred at 2 o'clock this afternoon of Mrs. Harry Fitzsimmons at St. Joseph's hospital from blood poisoning.

The S. Hadley Lumber Co. bought a pair of western horses from Mr. King yesterday, one of which is quite wild as yet.

St. Joseph's Court, 241, C. O. F., held its regular meeting last evening. Final arrangements were made for the annual excursion to Algonac. The feature of the evening was the report of Brother T. J. Doyle, who acted as representative to the provincial convention held recently at Pembroke. Bro. Doyle made a most eloquent and interesting address and at its conclusion was heartily applauded and given a vote of thanks. Bro. Doyle has proven himself to be the best delegate the court could have had in many years.

A WRIT ORDERED.

Archie Park this morning instructed O. L. Lewis to issue a writ against the city to stop the William street sewer being used as an outlet for the King street sewer.

Mr. Park says that if he took the residents of William street two years to get that sewer, and now they are not going to have it spoiled. He also claims that he will beat the city easily. When Park wanted to tag into the Adelaide street sewer to secure an outlet for his drainage, the city refused to let him, because he didn't pay for that sewer and now Mr. Park is not going to let the city take the liberty with his sewer, that was refused him.

GOOD RINK

Provincial Champt n-Sowerbythus Designates the Playing of his Col-leagues at London.

John Sowerby, the skillful Chathamite who skipped the local bowling rink into the proud position of provincial champions, at the London tournament returned home last evening. Congratulations awaited him on every side, as tales of his splendid skipping and his own individual work had preceded him.

Mr. Sowerby was interviewed concerning the victory by The Planet, this morning, but carries his honors very modestly.

"The rink I had was a splendid one," he said, "and the players all gave me excellent support. They deserve a large amount of credit for attaching to our capture of the trophy."

"The tournament was a delightful one. The Londoners treated us royally throughout."

"One thing may be said. We earned all we got, having a hard fight all the way through the competition."

"For myself I feel more honored in winning the trophy from Dr. Wood, of Mitchell, than from possibly any other skip in Ontario, as this rink of Dr. Wood's won the trophy at the Dominion tournament a year ago, and is always looked upon as the best in Ontario."

TENNIS.

In the handicap tournament yesterday the following events were played off:—

Martin minus 15 beat Harrison plus 15, 7-5, 6-3.

Dennis plus 1-2 15 beat Turner plus 15, 7-5, 6-3.

Great enthusiasm is being displayed and large crowds witness the games every day.

### CUT LOOSE

Did This Mistah Johnson, the Famous Lecturer and Ticket Seller—Chathamites in Search.

A smooth faced colored gentleman, claiming to be C. A. Johnson, succeeded in apparently "doing up" on a number of Chatham citizens a few days ago. He made his appearance around town under the character of a "well known astronomer, editor and lecturer." He claimed to be the editor of The Lecturers Journal, but, however, omitted to mention where his paper was published. He stated that his paper was the publication of the negro race and contained enquiries concerning separated relatives.

He had a very plausible story and one that evidently took very well with some of Chatham's citizens. He carried with him a number of tickets, which he was selling for a lecture to be given by himself in Northwood's Hall on Monday night, July 22nd. The subject he was to have lectured on was "The Wonders of the Atmosphere," and the price of admission was 10 cents, or 25 cents for a reserved seat.

Mr. Johnson made a thorough canvass of the city and was evidently a past master in the art of selling tickets. He "swelled out" with justifiable pride when he spoke of the great work that his paper was doing, and there was a tremble in his voice and a tear in his eye when he threw an imaginary picture of the millions of people in the world who were living in awful suspense, not knowing the whereabouts of their near and dear relatives. He invariably concluded his dramatic speech with a touching appeal for help.

Naturally a person's heart was touched and incidentally their purse also. Mr. Johnson succeeded in thus accumulating quite a large sum of money—and then a mysterious thing happened. Mr. Johnson has evidently been detained in some unknown place on the night of the lecture, for he did not show up. Quite a large number gathered around the hall on the night in question but they all returned home crestfallen and disappointed.

A number of Chatham citizens are now on the lookout for a man by the name of Johnson.

### FOR THE FAIR

"General Miers" May be Taken for Exhibition at London's Great Show.

London Free Press.

The management of the Western Fair, always alive to any enterprise calculated to attract visitors to the great Fair, quickly seized upon the suggestions made in these columns that the relic of the war of 1812, the old vessel, General Miers, found in the River Thames above Chatham, should be brought for exhibition at the next Fair here. Accordingly, Secretary Nelles went to Chatham this week, and there interviewed members of the Chatham Historical Association in regard to the matter. The association ask \$500 for the remains of the vessel that General Proctor burned and sank. With the vessel they will give a great quantity of shot and an old flint-lock musket, the only one found with the General Miers. The Fair Association will consider the offer, and if possible will bring the vessel here. After the Fair, the old hull may be placed on permanent exhibition in the park.

Secretary Nelles secured enough of the stout oak of which the vessel was constructed to make a walking stick. The wood has turned black by reason of the action of the water and iron with which for nearly a century it has been surrounded.

The Fair Executive have decided to make Monday the opening day of the Fair, an unparalleled success. They will arrange for a citizen's half-holiday and a holiday in the schools. Special features are to be introduced, and a single admission will admit to all departments and the grand stands. Steps will be taken to ensure the readiness of all exhibits.

## ABOUT SIDEWALKS.

Editor Planet.

Sir,—Just a word, a little elongated word, re observation of a Chatham "Tramp."

Your writer is a tramp, not, however, of the lean, hand me out, variety, but one whose business requires him to traverse the city more or less each day of the year,—Sunday excepted,—and he knows whereof he speaks.

The kick I am about to register is a serious one, to myself, at least, as the toes of my shoes will verify.

One grievance—the plank sidewalk. Are they not in a frightful condition? I mean the old walks. Can not our C. E. find a competent person to make the repairs necessary, as has been the custom heretofore. We unselfishly agree with him as to the incompetency of Old Jimmy, as he calls him; but Old Jimmy was always having an eye on the defective planks, and a nail or two here and a plug there would give confidence to the traveller. It is not safe in some, yes, many parts of our city to allow your little ones to be carted out in their buggies, as I speak from experience. I know, on two occasions the past week, while giving our baby an outing, we have struck these defective places, and thrown the child nearly out of the buggy onto its face. We realize our new C. E. has a great deal to contend with. The numerous "kicks," and we also realize from personal contact and observation that his work can't be done on wind. There are and always is a class of people that enjoy rapid talk, small jokes, and the independent great "I am" of a man, but to such a man requires all his time to keep up such a reputation, consequently the work beneficial to the public generally must be and is neglected. There was a time in my life when I had worked myself into a capital position. After holding it for a few years I got an idea into my head that I was the whole push and, like our C. E., when parties were not satisfied with my methods of doing business, was very fast in presenting my resignation. Independent, yes, or if necessary would be willing to button up my coat, throw off my hat, and cry come along. Well, it worked for a while, but I got the tumble, and now you find your writer a humble creature, with less brains and more sense. It looks well in dollars and cents the saving our C. E. has made since his occupancy, and in many things he has done well, but your writer believes he is penny wise and pound foolish in some steps he takes. I know he has suggested and would suggest to your writer, to call at Harrison Hall and consult the B. O. P. W. and air myself, but, as I respect my facial appearance, and am rather quick tempered myself, I consider to take this course of relieving my feelings, trusting that our C. E., who is "hardened" as to criticism, will, perhaps, put two or three hundred men at work repairing defective walks.

"SIDEWALK OBSERVER."

SEVERE CONDEMNATION.

Chatham, July 26, 1901.

To the Editor of The Planet.

Sir,—Even marred by the ineptitude of the Banner under its Ford management, Chatham journalism as a whole, held up its head among the cities of the Province and impartial outsiders ranked it above that of London, Ont., notwithstanding the superior wealth and population of the latter city. Of this every citizen was justly proud. Now, under its present regime, the Banner is sinking fast. If it has not descended already, to the level of the yellow journalism of the slum precincts of Chicago. The Sunday Sun is respectable by contrast. For ex-

ample take the cartoon of last Thursday's Banner, devoid of wit or sense and appealing to the obscene vulgarity of debased readers, a class happily scarce in Chatham. Such cartoons reinforced by slang and personalities, have excited the disgust of this community, and so far as they are circulated, tend to lower the reputation of Chatham journals and the city generally, in the eyes of outsiders, who found the good with the bad, and condemn the people among whom such "yellow" and scurrilous work is permitted.

Were journalism a close profession, such as those of law and medicine, an offender against professional decency would be promptly disciplined, and it is a question whether, if the matter were fairly brought before the Press Association, newspaper decorum could not be vindicated by the expulsion of the proprietor of the Banner-News from its ranks.

Meanwhile the disgust of impartial Chathamites who take no sides in the controversy of dividing journals, is loudly expressed, when their good taste is outraged by the Chicago fakir devices of slang, scum, and yellow cartoons.

Yours, etc.,

"ONLOOKER."

YANKEE JOURNALISM.

July 26, 1901.

To the Editor of The Planet.

Dear Sir,—I just wish to raise my protest against the introduction of such an exhibition of bad taste as was shown in last night's Banner-News. There was nothing funny or clever in the picture that the editor saw fit to produce, and the introduction of such miserably suggestive and unappealing exhibitions of Yankee journalism should be stamped out at once. If this is tolerated by Chathamites, I or my wife or my daughter, may be the next victim.

Yours truly,

PARENT.

## LONDON'S BIG FAIR

The "great holiday outing of Western Ontario" is a phrase that some one once bestowed upon the Western Fair of London, and as the years go by the description seems to become more and more fitting. But it is more than a mere holiday. It is educational in its nature. No man with his eyes and ears open can visit the Western Fair without seeing something to which he had heretofore been a stranger, while the improvements on old devices, the improved methods of agriculture and the higher grade of stock and cattle all combine to show the rapid advance being made in Western Ontario, and to demonstrate that we in this section are fully abreast with the rest of the world. The entries for this year denote a large exhibit, and space should be secured without delay. The speeding in the ring, as usual, will be one of the most attractive pastimes, and this will be made doubly so by the engagement of the greatest equestrian of high skilled acrobats, gymnasts and acrobats that ever appeared in one combination of Canada, while novelty is added by the introduction of a full troupe of educated performing elephants. The fireworks display will be on a grander scale than ever, and will include a striking and novel representation of the "Fall of China" and "Taking of Peking," together with the most brilliant illumination and electrical effects ever before seen on the grounds. Special train service is being arranged on all railroads to leave London after the fireworks. None should miss this home exposition, which can be so easily visited and at little expense. See 3w

## THE AREA OF CANADA

COMPARED WITH THE STATES OF THE AMERICAN REPUBLIC.

Great Heritage of Canadians—Their Country Is Second to None on the Face of the Globe—European Comparisons Give Us an Even Better Idea of Our Great Size—Possibilities of the Country.

Canadians have the greatest and richest country in possibilities upon this continent. How great and vast these interests are can be gathered in a manner from the following statistics selected after diligent research from various sources of information. Ontario with an area of 220,000 square miles, is larger than all the following States of the Union: New York, 49,170 square miles; Massachusetts, 8,315; Connecticut, 4,900; New Jersey, 7,815; Maine, 33,040; Pennsylvania, 45,215; Maryland, 12,210; Indiana, 36,350; Vermont, 9,565 square miles, making a total of 206,670 square miles, and in which we can comfortably include the following additional states, viz.: Delaware, 2,050 square miles; District of Columbia, 170 square miles; Rhode Island, 1,250 square miles; or a total of 210,000 square miles. After including the above, we can still afford to be generous, and leave room for another state as large as New Jersey, with 7,815 square miles, and still have some 4,000 square miles to toss off if closely cornered. Quebec is nearly 9,000 square miles larger than the Province of Ontario, measuring 228,900 square miles. The two Provinces named, with British Columbia, possessing an area of 383,300 square miles, total 834,200 square miles, and is as large as all of the following Western States, viz.: Colorado, 103,925 square miles; Idaho, 84,800 square miles; Illinois, 56,650 square miles; Kansas, 80,080 square miles; Michigan, 58,915 square miles; Minnesota, 89,365 square miles; Ohio, 41,090 square miles; Oregon, 96,030 square miles; North Dakota, 70,795 square miles; Utah, 84,970 square miles; leaving 15,000 square miles to spare. Our Northwest Territory, alone comprises 906,000 square miles; this area added to the three provinces already named, gives a total of 1,740,200 square miles or by the way of still further comparison, an extent of territory larger than Alaska, by 577,390 square miles. But a larger part of Canada still remains to be considered, viz.: Manitoba, 73,956 square miles; Assiniboia, 89,545 square miles; Saskatchewan, 197,092 square miles; Keewatin, 282,000 square miles; Alberta, 106,000 square miles; Athabaska, 104,500 square miles; Territory east of Keewatin and south of Hudson Bay, 196,800 square miles; territory of Hudson's Bay, 353,000 square miles; islands north and northwest, not enumerated in above, 300,000 square miles; Great Lakes and River St. Lawrence, not included in above, 47,400 square miles; Prince Edward Island, 2,000 square miles; New Brunswick, 28,200 square miles; Nova Scotia, 20,600 square miles.

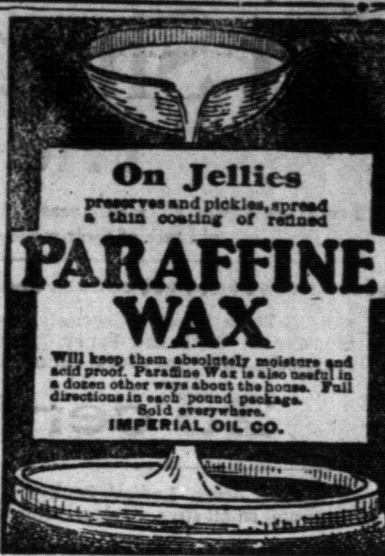

Students of the Canadian situation can best understand the magnitude of the heritage the British in the past have been so careless about, and are now at this day growing so solicitous for, by comparing the Canadian areas with those of the United Kingdom itself and the European nations. All Britain and Ireland, for example, contain 120,930 square miles; England and Wales, 58,311; Scotland, 29,785; Ireland, 32,532; and the islands, 302. This entire area, if it could be set down in Ontario, would leave not very far from half the Province still untouched, plenty of room, at any rate, for another England, Wales and Ireland. The whole of the United Kingdom and Ireland, if they could be dumped into British Columbia, would take up less than a third of that Province, leaving an unoccupied area big enough to accommodate the same twice over, with a trifle of 20,000 square miles to spare.

Ontario alone, 219,650 square miles, is bigger than France, 210,000 square miles; Germany, 212,000 square miles; Italy, 114,000 square miles; Spain, 182,758 square miles. Ontario and Quebec alone, 447,150 square miles, are bigger than Austria-Hungary, 236,311 square miles; Sweden and Norway, 288,771 square miles, and all the smaller States of Europe put together, added to other of the above. The biggest State in Europe is Russia, containing about 2,041,809 square miles. Our Northwest Territories, 906,000 square miles, Manitoba and Northwest districts, enumerated above, 1,617,783 square miles, total 2,523,783 square miles, are big enough to swallow all Russia in Europe, and leave 481,974 miles to spare, an unused area greater than all France and Germany put together.

In summing up, one must not overlook the immense possibilities in commerce in connection with this vast territory. We must not forget the valuable wealth in our forests, in gold, silver and other minerals, our extensive fisheries, and huge areas of fertile wheat lands. One can scarcely comprehend in a newspaper article what an enormous heritage Canadians possess, much of it yet to be peopled and developed.

### Napanee's First Church.

The first Church of England built in Napanee was in 1836 and 1837. John Gibbard was one of the carpenters in the finishing. The first Wesleyan Church was built in 1841 and 1842. Daniel McLiver was one of the carpenters. So was Mr. Gibbard. Belyat Conger, another old resident, was one of the masons. The first Methodist Episcopal Church was commenced in 1846 and finished in 1847. It was popularly known as "the White Church." Ezra Spence, who afterwards lived and died at Roblin, was the contractor and builder.

## How "Labby" Got a Dinner.

A READY wit is often of more value to a man in a tight corner than any other endowment, and sometimes it neutralizes the consequences of real defects of character. This is illustrated in an intimate story of the life of Henry Labouchere, the by no means admirable English politician and journalist, related in the "People" by Joseph Hatton. Labouchere was a young man in the diplomatic service and was sent by the British Minister "to look after some Irish patriots" at a small hotel, he entered his name as Smith. If you have an idle hour in almost any American city you can get into a game of "draw" or anything else in the way of gamble. In the evening of his arrival the attaché incontinent entered a gaming establishment, and lost all the money he had except half a dollar. Then he went to bed, satisfied, no doubt, with his prowess. The next day the halliffs seized on the hotel for debt, and all guests were requested to pay their bills and take away their luggage. Labouchere could not pay, and could not, therefore, take away his luggage. All he could do was to write to Washington for a remittance, and wait two days for its arrival. The first day he walked about and spent his half dollar on food. It was summer, and he slept on a bench on the common. In the morning he went to the bay to have a wash, independent of all the cars and troubles of civilization. But he had nothing with which to buy himself a breakfast. Toward evening he grew very hungry, and entered a restaurant and ordered dinner, without any clear idea of how he was to pay the bill, except to leave his coat in pledge.

And here comes in an example of young Labouchere's luck, tempered by a ready wit. As the hungry and for the time being, penniless attaché ate his dinner he observed that the waiters were Irishmen, and that they were not only continually staring at him, but were evidently discussing him with one another. A guilty conscience induced him to think that this was because of his impecunious appearance, and that they were calculating as to the value of his clothes. At last one of them approached their anxious customer and in a low voice said: "I beg your pardon, sir: are you the patriot Meagher?" Now, this patriot was a gentleman who had aided Smith O'Brien in his Irish rising, and had been sent to Australia, and had escaped thence to the United States. "It was my business to look after patriots," said Labouchere, telling the story, "so I put my finger before my lips and said 'Hush!' at the same time casting my eyes up to the ceiling, as though I saw a vision of Erin beckoning me. It was felt at once that I was Meagher. The choicest viands were placed before me, and more excellent wine. When I had done justice to all the good things I went to the bar, and boldly asked for my bill. The proprietor, also an Irishman, said: 'From a man like you, who has suffered in the good cause, I can take no money; allow a brother patriot to shake hands with you.' I allowed him." He further allowed the waiters to shake hands with him, and then stalked forth, with the stern, resolved, but somewhat condescending, air which he had seen assumed by patriots in exile. Again he slept on the common; again he washed in the bay. Then he went to the post office, got his money and breakfasted.

**The Duke's Grief.**

"It was night," says Rev. Clement Poynder, "when, after the Battle of Waterloo, the Duke of Wellington lay down. He had not found time so much as to wash his face or hands; but overcome with fatigue, threw himself after finishing his despatches, on his bed. He had seen Dr. Hume, and desired him to come punctually at seven in the morning with his report; and the latter who took no rest, but spent the night beside the wounded, came at the hour appointed. He knocked at the Duke's door, but received no answer; he lifted the latch, and looked in, but he found no sound sleep; he could not find it in his heart to awake him. By and by, however, reflecting on the importance of time to a man in the Duke's high situation, and being well aware that the Duke was in the habit of any sort to public duty, he proceeded to the bedside and roused the sleeper. The Duke sat up in his bed, his face unshaven, and, covered with the dust and smoke of yesterday's battle, presenting a rather strange appearance; yet his senses were collected, and in a moment he desired Hume to make his statement. The latter produced his list and began to read; but when, as he proceeded, name after name came out—this as of one dead, the other as of one dying—his voice failed him, and, looking up he saw that the Duke was in an agony of grief; the tears chased one another from his Grace's eyes, making deep visible furrows in the soldier's blackened cheeks, and at last he threw himself back upon his pillow and groaned aloud. 'It has been my good fortune never to lose a battle; yet all this glory,' cried he, 'can by no means compensate for so great a loss of friends. What victory is not too dearly purchased at such a cost!'

A "Cinch" Spoiled.

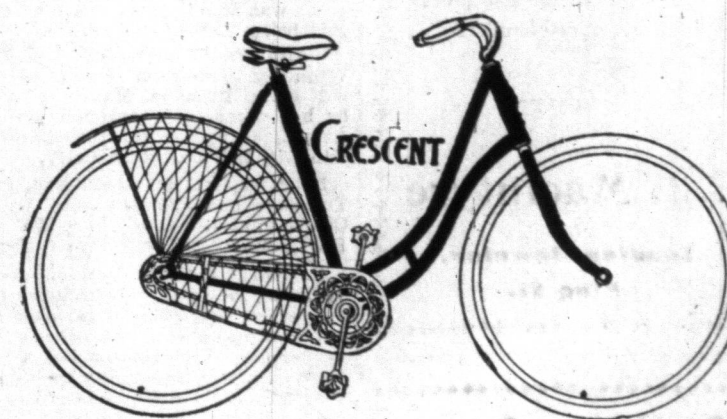

In New York, the other day, a newsboy stood in City Hall Park with a bundle of newspapers in his arms, but he made no sound. Instead of greeting those who passed him with a shrill "Wextry, last 'dition, all about the murder!" he saluted "gravelly and ponderously" his papers. People stared and wondered, then turned around and bought a paper. "The poor boy is deaf and dumb," said a woman, as she gave him a nickel and took up "the era." The boy was coining money, when one of his friends happened to come along. He nearly fell in a fit when he observed the grave salute and the silent tongue. "Say, Jakey, wats you givin' us?" he began; but the other boy did not notice, so he yelled out: "Come out of it, Jakey, or I'll tell the cop, and he'll pull you in for runnin' a fake game." "Oh, h—!" said the one who had been lately deaf and dumb; "I had a cinch on that keepin' quiet game, an' now you've spoiled it!"

## St. Thomas Business College

The growth of this institution during the last two years has been wonderful. The attendance has been doubled on account of the thorough course of training which we give. One of our young men is now drawing a salary of \$1,800 a year; another \$900; others from \$400 to \$800. Within the last month two of our students have gone direct from the College to positions paying \$200 a year. WE QUALIFY OUR STUDENTS TO FILL THE BEST POSITIONS.

Young people are foolish to spend the best part of their lives learning Latin, French and the dead languages, when a few months spent in our Commercial or Shorthand Department will fit them to earn salaries like the above.

Eighty-seven per cent. of all our students who have written on the examinations of the Business Educators' Association of Canada this year have been successful.

### Labor-Saving but Oath-Producing.

### ONE IN FOUR HAS PILES.

### The Most Torturing Disease That Man Has Ever Known—The Safest and Most Certain Cure is Dr. Chase's Ointment.

Of the grown-up persons you meet from day to day one in four suffers more or less from itching, bleeding or protruding piles. Mock modesty leads many to suffer in silence, others dread the surgeon's knife, and, believing an operation to be the only cure, neglect to be treated. Some have found out by actual trial that piles can be promptly relieved and thoroughly cured by the use of Dr. Chase's Ointment.

If you are a sufferer from this excruciating ailment and will once make a test of Dr. Chase's Ointment you will be grateful to the end of your life for having read this advertisement. It will certainly cure you, no matter what form of piles you have, so long as you give it an honest trial.

It has been frequently remarked by persons who have used this preparation that it has probably relieved more suffering from itching skin disease than any remedy that the world has known. While remarkably effective as a cure for hemorrhoids, salt rheum, Dr. Chase's Ointment is unique as the only actual and proven cure for each and every form of piles.

Mr. George Thompson, a leading merchant of Bismarck, Ont., states: "I was troubled with itching piles for fifteen years, and at times they were so bad I could scarcely walk. I tried every remedy, but never found anything like Dr. Chase's Ointment."

"After the third application I obtained relief, and was completely cured by using one box."

Mr. F. G. Harding, retired farmer, living at Niles town, Middlesex County, Ont., writes as follows: "I have been troubled with bleeding and itching piles for four or five years, and suffered intense agony at times. I had tried almost everything, but could get nothing that would give relief. On hearing of Dr. Chase's Ointment I procured a box, and it only required part of it to completely cure me. I am recommending it to all afflicted as I was."

If you have not met with some one who has been cured of piles by Dr. Chase's Ointment, ask your neighbors about it. It is impossible to publish too many testimonials of this remedy, for you are sure to hear good words for Dr. Chase's Ointment. It is standard cure for all cases of piles, and is sold at all dealers, or Edman, Bates & Co., Toronto.

### Suicide Contagious.

Mayor Morse, of Emporia, Kan., asked the editors of Emporia papers recently to refrain from publishing details of suicides. He said that the publication of such details had caused an epidemic of suicides in that community in the last two years. He had consulted with the Board of Health, and thought that if the papers would comply with his request he had a right to stop summarily the publication of suicide details under a law providing for the suppression of epidemics.

"If the paper," he said, "on which these local papers are printed had been kept in a place infected with smallpox I could demand that the papers quit using that paper or stop publication. If they spread another contagion, the contagious suggestion of suicide, I believe the liberty of the press is not to be considered before the public welfare, and that the courts would sustain me in using force to prevent the publication of papers containing matter clearly deleterious to the public health."

"However, no such steps need be taken. Mr. White, of the 'Gazette,' Mr. Strong, of the 'Republican,' and Mr. Yeasout, of the 'Times,' are in sympathy with me in this movement and will suppress the details of suicides until the epidemic subsides."

Borrow and suffering was my dote, But you have banished pain— Your love shows through my lonely soul.

### Where There Is No Degeneracy.

A delightful article by Mr. Frank Beddard, of the London Zoological Gardens, in the "Pall Mall Magazine," makes one suspect that the only spot in civilization where degeneracy has not begun is the "Zoo." Mr. Beddard takes up through the great menagerie which is under his supervision, and shows us many distinguished inmates at dinner. The lion, the tiger, the elephant, the hippopotamus is an enviable gourmet. He has been thirty-seven years at the "Zoo," and has had only one attack of indigestion. On that grave occasion he was cured with forty (or eighty) drops of croton oil administered in a bun. Happy beast! No visits to specialists at a guinea a visit! No anxious trials of patent medicines, advertised in the evening papers with portraits of the cures! Down went the bun, and Hippo was himself again! The Australian cassowary consumes everything (except the missionary and his hymn-book), and never knows what indigestion means. Excellent living (Mr. Beddard's statistics of the food are staggering) and leisurely ease make astonishing longevity at the "Zoo." There was a Madagascar parrot who flourished in captivity for fifty-four years, and goodness knows how old he was when he retired to Regent's Park. Possibly he at dinner. The official records apparently neglect to state his views of life.

### Incident at Pekin.

Probably the most amusing incident of the siege of Pekin, says Henry Savage Landor, occurred on July 22, 1900, when the Dowager-Empress sent a hundred melons, some cucumbers and egg-plants as a present to the Chinese soldiers at the barricade. The servants who brought them misunderstood the order, and handed over the whole lot to the foreign soldiers, also at their barricade. The vegetables were hauled in with due haste, as soon as the guards got over their first astonishment at the handsome gift; but no doubt the person most astonished of all was the messenger on his return to the Dowager-Empress. It is not improbable that the misplaced melons met him his life.

Act foolishly. If they improve ever so little when the fine weather comes, they relax effort and their condition to the old condition which, if possible, becomes more chronic. ### What does it profit a woman if she gain the whole world of knowledge and lose her own health?

Young women students, and school teachers, eager, ambitious, and full of energy, very often neglect their health in the struggle to gain education. They eat insufficient food, and at irregular hours, they allow irregularity of the womanly functions to be established, and the result is that they become chronic invalids with all their education practically worthless. There is a plain road to health for such as these, marked by the feet of thousands. It is the use of Dr. Pierce's Golden Medical Discovery for diseases of the stomach and digestive tract, and Dr. Pierce's Favorite Prescription for diseases of the delicate organs of womanhood. A these remedies that out of hundreds of thousands who have tried the treatment, ninety-eight in every hundred have been perfectly and permanently cured. Constipation, with its calamitous consequences, which is a common ailment of students, can be entirely cured by the use of Dr. Pierce's Pleasant Pellets.

### When the Baby Cries at Night.

There is a cause for it. Perhaps it is gas on the stomach, may be cramps or diarrhoea. Don't lose sleep, anticipate such contingencies by always keeping handy a bottle of Polson's Nervine. Just a few drops in water given inwardly, then rub the little one's stomach with a small quantity of Nervine, and perfect rest is assured for the night for both mother and baby. ### Anecdotal.

Some years ago when Bishop Potter, of New York, was traveling in Minnesota, a man approached him on the railway platform and scanned his features closely. "Excuse me," he said, finally, "but haven't I seen your picture in the papers?" He was compelled to confess that he had. "I thought so," continued the inquisitive one; "may I ask what you were cured of?"

Here is a new story of Padewski. He recently lost his only son, and the effect on him has been to soften down the little eccentricities which used to charm his less artistic followers. He went to Dresden for the first performance of his own opera. Amid the enthusiastic demonstrations which greeted his success, he observed in Russian to a friend, "All this might be dust if I could have one smile from my child!"

At a seaside hotel the other day a new arrival, having made terms with the proprietor, proceeded to write his name in the hotel book. While he was so engaged a rather large flea hopped across the open page before him. "Well," he remarked, throwing down the pen, "I have been in hotels where there were fleas but never before have I been in a hotel where the fleas search the register for the number of their rooms."

When the Transvaal war was at its height, Paul Kruger sent a commissioner to England to find out if there were any more men left there. The commissioner wired from London to say that there were four million men and women. "Knocking about the town," that there was no excitement, and that men were being sent to fight the Boers. Kruger wired back, "Go north." The commissioner found himself in Newcastle eventually, and wired to Kruger: "For God's sake, stop that war! England is bringing up men from hell, eight at a time, in cages!" He had seen a coal mine.

A quotable story is told of a missionary who was spending a short holiday in Texas. After he had been at his hotel for some days he met with a very fierce-looking man of the cowboy type, who, he noticed, had anything but a sweet temper. "Do you know," he said to him one day, "that you should lose your money? What's a thing I can't do, sir?" "What? I am sure a man like you could do anything if you tried." "Anything but that, parson," said the missionary, surprised and hurt. "How?" "I ain't got one to love. I shot the last morning."

Julian Corbett may be said to have established himself as an authority on the history of the British navy. A few days ago Mr. Corbett wrote to the admiralty to suggest that a new first-class battleship then building be christened "Drake." A formal intimation that his letter had been received and should have due attention was followed after a decent interval, by a dignified reply from my lords, in which they expressed their regret at not being able to carry out Mr. Corbett's suggestion, and explained that it would be necessary to precedent to name a first-class battleship after a bird.

A Sunday School teacher who has a class of little girls makes it her custom to tell them each Sunday of some little incident that has happened during the week, and request the children to quote a verse of Scripture to illustrate the story. In this way she hopes to impress the usefulness of Biblical knowledge upon the little ones. Last Sunday she told her class of a cruel boy who would catch cats and cut their tails off. "Now, can any little girl tell me of an appropriate verse?" she asked. The class was in a pause for a few moments, when one little girl arose, and in a solemn voice said: "Whatsoever God has joined together let no man put asunder."

Mr. Harry Poland, a British magistrate noted for his brilliancy, is careless in his dress. Once his family persuaded him to go to Poland and wear a fashionable cut suit. To the chagrin of the household, Sir Harry looked then in his old coat. His brother-in-law went to see Poland about it. "It is not my fault, sir," the tailor assured him. "Every case was taken, but how could we fit a gentleman who would insist upon being measured sitting down?" And the only satisfaction that could be obtained from Sir Harry Poland himself later on was the dry comment: "Well, it's my business, and not yours. I like to be comfortable. I spend three parts of my day sitting down, and I prefer to be measured so."

A Philadelphia paper tells of a bride and bridegroom who recently went to housekeeping and are blessed with a man of all work who is fresh from the Emerald Isle. This is her first "place," and her ignorance of domestic affairs is only equalled by her adaptability and her cheerful willingness to learn. At first she didn't know the names of the ordinary household utensils, even mistaking on one occasion, when there was company at dinner, the ice pick for the carving steel. One day last week the bride had been doing some shopping, and among other things she bought an umbrella stand for the vestibule. It was late when she reached home. "Did any packages come?" she asked. "Yes, mum," was the reply. "The wagon came with 'th' cuspidore fer 'th' umbrella!"

A certain Scotch minister was very anxious that an old couple in his parish should become teetotalers, and anxiety they in no wise shared. After much pressing, however, they consented, laying down as a condition that they should be allowed to keep a bottle of "Auld Kirk" for medicinal purposes. About a fortnight after, John began to feel his resolution weakening; but he was determined not to be the first to give way. In another week, however, he collapsed entirely. "Jenny, woman," he said, "I've an awful pain in my head; ye might gie me a wee drapple, an' see gin I'll be me any guid."

"Weel, gudeman," she replied, "ye're owre late o' askin', for ever sin that bottle cam' into the house, I've been bothered aw' w' pains in 'th' head, 'tis a dune, an' there's na' drapple left."

### ASIA AND THE CHINESE EMPIRE.

It is a characteristic of American enterprise and thoroughness that an advertising pamphlet, issued by the passenger department of a railroad, treating of a country on the other side of the world should be strictly up to date as regards geographic, historical and political facts. No. 28 of the New York Central's "Four Track Series," treats of the Chinese Empire, and the pamphlet is of interest to every one who is watching the growth of American commerce with the Orient. The descriptive article embodies 20 years' experience in that country, and the pamphlet is of interest to every one who is watching the growth of American commerce with the Orient. ### GOVERNMENT PARK.

N. H. Stevens visited the Provincial Park yesterday. He and Mr. Gardiner, the Park Ranger, were looking over the Richardson property, through which the new road was appropriated by the Government. The Park Ranger is rapidly getting the park stocked with wild turkeys, pheasants and deer. The Government are putting up new tables and making a number of excellent improvements.

To the late Rufus Stephenson, ex-M. P. and to Mr. Stevens, are the people of western Canada mostly indebted for this splendid park. Both interested themselves in securing it and they were successful. The Dominion Government owned about 400 acres on the Point, and through the influence of Mr. Stephenson this was secured from the Dominion Government and the whole acreage of the Point aux Pins turned into one large park.

"We were very much pleased with the design you sent. It was beautiful and appropriate." The Victoria Ave. Greenhouses receive such words of commendation every day. Telephone No. 181.

## WITH BAT AND BALL

The Chatham Cricket Colts Demonstrated Their Prowess Yesterday.

Aitken and Milner did Magnificent Bowling—Mercer Scored More Runs.

In the cricket match yesterday play was continued after luncheon, when Windsor went to bat. Clement and Sutherland took the wickets first for the visitors and, when Clement was caught and bowled by Aitken, they had counted up 14 runs. Pulford then went to bat and when he was put out 20 runs had been made. The third wicket fell when 27 runs had been scored. All this time Sutherland stayed in and before he had been required he had piled up 15 runs by a well-played innings. The only other one who made double figures for Windsor was Foreman, who made 13 not out. The side was retired for 57 in their first innings. The bowling of Aitken and Miller was a feature of the game, as was also the fielding of Sam. Mercer.

Chatham then went in for their second innings and were all put for a total of 46 runs. Mercer, as in the first innings, made the score, which was 15. Robert was run out again in the second innings without having a chance to make a run.

Stuart and Maroon did all the bowling in the second innings and did it well, as is seen by the small total. The fielding of Crawford and L. Wiggle were features.

Windsor then went to bat and the entire side were put out for the small total of 34 runs, owing to the phenomenal bowling of Aitken and Miller, and also to good fielding. Thus Chatham won by 48 runs, having a majority of 36 runs in the first innings and 12 in the second innings.

The colts did well. Mercer is a "phenom." Kenny was not here, either. Richardson is in his old form. This is five wins and no losses. Robert played in hard luck, run out twice. What would they have done had Kenny and Richards been there?

## AN AWFUL FAMILY RECORD

Thirty-Seven Atrocious Murders in History of Bender Family.

An Account of the Rounding up of the Notorious Outerie in Colorado.

Galena, Kas., July 25.—Great excitement has been occasioned here by the report that the notorious Benders have been located in Colorado.

An investigation into the disappearance of a man who had stopped at the Bender house and whose bones were found beneath the building led to their flight one night about twenty years ago. A big reward for their arrest was offered by the state, but they were never found.

The Benders, like their neighbors, were squatters on disputed land in La Belle, county, Kansas, near Cherryville. It was a new country in 1872, when the Bender gross were committed. The Osage Indians had recently relinquished it, leaving behind a bad class of whites whose trade was murder and horsetheft. The country was full of night-riders, who killed without mercy and upon little provocation, but it was left for this German family to set up a slaughter house for the butchery of travellers who sought the shelter of their roof.

The number of their victims will never be known, but they are generally credited with 37 murders. The family consisted of William Bender, aged about 60; his wife, aged about 55; Kate, aged about 25, and John, aged perhaps 23. Kate and John were children of William Bender by a former wife.

They came to Kansas in December, 1870, and moved into the house in the February following. This house was of frame 16x20 feet and fronted north. There was a door at either end and the room was divided by a canvas partition drawn tightly over upright scantlings. This partition was the death trap. The victim was decoyed to a seat close against the canvas and Kate, standing behind the partition, struck him on the back of the head with a hammer.

It is believed by people who knew the Benders that when they took up the claim they had an honest purpose, but that they early took to crime as the most profitable vocation of the times. Every man they killed had a horse, but only the two animals the family originally took to the farm were found after their flight. The horses, it is believed, were run over the country by conspirators. The clothes of their victims were also disposed of in that way. The money and valuables were kept by the murderers. Nine bodies in all were found, but that probably represents the killing of the last six months of their stay in the country. Before that it is believed the bodies were taken to remote distances, as one of the discovered bodies was killed with two hammers.

With the exception of a little baby all the bodies had their throats cut and all bore the marks of two ham-

## What Makes it Possible?

Makes what possible? Ready-made clothes with the finish and style of ordered work—T. & D. ready-made.

It isn't any one thing; it's many forces concentrated on one object, like the pieces in a game of chess.

Couldn't be done if the cloth came round to us by way of a middleman. We get every roll straight from the maker. Big lots—small prices.

Couldn't be done by old time methods. Economy sings in the whirl of up-to-date machinery. Have you seen these strange sewing machines that almost think—machines that can serge a seam or tack a pocket in with equal ease—machines that make a perfect button-hole while you count twenty—machines so constructed that they can hardly make a mis-stitch.

Couldn't be done with slipshod, indifferent work. Every T. & D. worker takes an interest in the thing he does (or she). It's worth while to take an interest. There's room for wholesome ambition in our system.

And with all these contributory forces, it couldn't be done if the sales were not steady and large. Every gain in output enables us to do better for you.

mers. A shoe hammer and a blacksmith's hammer were found in the house. Kate used the former from behind the canvas, and the old man followed with blows on the temples with the blacksmith's hammer. Afterward a loose board was taken up and the throat of the victim cut over the opening. The body was robbed of clothes and valuables and cast into the cellar to await a convenient occasion for burial.

The deed that drove the Benders to flight was the murder of Dr. York, of Independence. Dr. York had been to Fort Scott on business and was returning on horseback to his home when the Benders decoyed him into their slaughter pen and killed him. Rewards aggregating more than \$10,000 were offered for the arrest of the Benders, but they have never been caught.

### FIFTY AGAINST TWO.

It is not reasonable to expect two weeks of outing to overcome the effects of fifty weeks of confinement. Take a bottle of Hood's Sarsaparilla along with you. Three doses, daily, of this great tonic will do more than anything else to refresh your blood, overcome that tired feeling, improve your appetite, and make your sleep easy and restful.
