ON NUCLEAR ARMS.

There are a few stubborn people who insist that we should not accept nuclear arms. What these people forget, is that the majority of the world wants peace. All of us do not want to use nuclear power as a weapon of destruction. The world is torn by two systems: Marxists, bent on dominating the world, and Democrats who want to preserve their freedom. Since the Marxists are on the offensive, we, as a part of the free world, must defend ourselves if we are to survive. In that spirit, Canada voluntarily joined NATO, an organization of sovereign nations, banded together in an alliance for self-preservation against the common enemy, Communism. The U.S.A., the most powerful NATO partner, is its unofficial leader. Yet NATO, like any other alliance, depends on teamwork, and can be compared to a chain-Canada being its weakest link.

Some Canadians, under the shadow of the US, feel tha tour aid is insignificant. The Canadian contribution might not be much, but we must realize that Canada is only a third rate power, and therefore can not contribute in a great quantity. But if we wish to benefit from the result we should play our part. Every ally in NATO makes a contribution. We must make ours. For in the analysis, NATO is for protection and without it, we are in a perilous position.

Since 1949, the nuclear bomb has become the primary weapon payment are now at the Business — That the Brunswickan Staff, and even to ward off an aggressor. By keeping abreast of Russia in nuclear Office, and you may wish to make power, we can guarantee our survival. As long as we can keep up mention of this in your paper. — That Terry's eyes were rather twitchy a mention of this in your paper. this "balance of fear", they will not attack. This is the sole reason why the U.S.A. is spending billions of dollars on nuclear bombs. It our battle. They will seek to defend Canada in order to defend the Comptroller's office, and students student centre. U.S.A. better. Yet the European NATO allies have consented to accept their share. We should accept ours.

Yet there are still a few Canadians who feel we should play a neutral role. We cannot expect NATO to protect us when we do not contribute. What possible good can a "neutral" Canada play, when one powerful Communist leader considers neutrals as a hoax. One leans, either to the side of imperialism, or to the side of socialism. A third path does not exist. Some people should learn from history, the cost of neutrality.

It sounds wonderful to be neutral, just as Chamberlain's appeasement policy did until Germany's attack on Poland. Then the allies learned that they could not appease with Hitler. So with Kruschev; the Soviet Union has never kept a treaty.

Instead of dreaming of being neutral, and playing a great part

in world politics, let us accept reality. Canada is a third rate power. We have responsibilities as a NATO power. In the world Wars, Canada never played a great part, compared to Britain or the U.S.A. We have contributed to the best of our abilities.

Dear Populus: This column may possibly have a reputation for slander and gossip, but what most of you fail to realize is that the individual comments made are truthful. This week, this column has an an-nouncement, or rather a chastisement of the general rabble who magnificently proclaimed their rotten manners and lack of respect at the opening night ceremonies. The Carnival committee had in-

vited dignitaries to officiate at the opening of Carnival '63. They would at any other institution of higher learning, be greated by cheers of welcome, but NO! Here they were welcomed by Booooo! Possibly there were reasons for the welcome of political fig-

ures with cat calls, but no excuse was evident for the ignorance displayed at the presence of Genaral Sansom who came as a representative for the Lieutenant Governor, who, due to previous committments was unable to attend the preliminary ceremonies.

Aside from this display, Opening night, thanks to Don Patton, and his versatile committee prepared a new, inventive and original

Another point of interest-The Journeymen-this group on opening night program. Wednesday night presented a rather interesting, if not entirely professional display of folk-singing (of a fine quality) and monologue

D. G. SEDGEWICK Assistant Comptroller

Scope for thinking men

We need thinking men and women at IBM. Thinkers who can sit back and look at a problem from every angle and develop a working solution . . . then see that it is carried out. There is plenty of scope for their imagination; plenty of room for professional growth. And the rewards are substantial.

These men and women receive extensive training in advanced data processing methods. They enjoy freedom of expression and have freedom to carry out their own ideas with minimum interference.

They can be engineers, mathematicians, scientists or have majored in liberal arts or business studies. We have customers in all industries, in commerce and finance, and in scientific fields. Graduates are thus able to work in their chosen profession solving the complex data processing problems peculiar to that particular industry.

. If you have a keen mind and enjoy challenge, write to the Executive named below for information on professional positions available.

NFCUS Newsletter

Only a couple of weeks remain for entries to be submitted for the National Literary Contest, sponsored by NFCUS. The contest is divided into three sections: Essays, Short Stories and Poetry; surely there are a few persons on the U.N.B. campus who can put words together well enough to write an essay, short story or poem and enter the contest. Miss Jennifer Black (475-4737) will be delighted to give you full details on the contest and to accept your

National winners will be published in the fall edition of Camentries. pus Canada, the national student magazine which will be making its

first appearance in a week or so. DEADLINE FOR ENTRIES IS FEBRUARY 28th.

In the rush during the Winter Carnival preparations it is possible that a large number of readers did not read this column fully. In last week's issue there was a detailed write-up on the NFCUS Travel Department. The Travel Department was started by NFCUS to aid students in obtaining the most favourable fares

possible on trips overseas. The Travel Department is also organizing the program for summer employment in Holland which enables several hundred students from across Canada to work in Holland for six weeks before travelling around the rest of the continent (if they wish to do so). Transportation to and from Europe is by KLM airlines; it is KLM who is arranging the actual jobs in Holland.

At U.N.B., Mr. Duncan Nobel (Jones House) is the travel department chairman. He can provide you with information on the services offered by the NFCUS Travel Department, and can give you a copy of the pamphlet "Student Travel" which lists all the literature and services available from the head office. You can also

write to the head office: NFCUS Travel Department 2222 Maplewood Ave: Montreal, P.Q.

STUDENT OPINION

by STEVAN D. KARON

"Why should-or shouldn't-Canada accept Nuclear Arms

"Canada should accept Nuclear Arms in order to make her newly purchased weapons as the 104 and Bomark operational. If Canada accepts the carriers then she also implies she will accept the warheads. What good is a shot-gun that shoots corks?" Male 4th year arts

"Of what is the Bomarc without its nuclear warhead? What are we contributing to the defense of North America without nuclear arms? It is our responsibility to create an effective line of defense at the D.E.W. line. Yes, we should!"

"Canada should except Nuclear Arms in order to have a defence. Our most modern weapons today are all carriers of Nuclear warheads. Do you think the enemy fears Honest Johns loaded with sand, Vodoos armed with nothing, Bomarcs loaded with sand and 104's armed with conventional weapons? As it now stands, we have no defence and no defence policy."

Male M.C.S. 3rd year Civil

"Canada already has spent millions of dollars on purchasing nuclear carriers. Without war-heads these carriers are obviously of no use. Therefore millions of dollars will go to drain unless Canada has a nuclear armament programme. After all, if you build the foundation, you might as well build the building."

Female W.T. 4th year arts

"Certainly Canada should accept Nuclear Arms, not only for her own defence, but also to meet her NATO and NORAD defence obligations. We must support the U.S. (this, of course, requires the acceptance of nuclear weapons both in allowing the U.S. to store nuclear weapons on our soil; and for the use of our own troops), for our defence is dependant on their defence. This doesn't necessarily mean that we reject peace or that we won't be able to be a leader in its advocation. What good would a country which has violated several treaties with her closest neighbour be, in advocating "glorious neutrality"?.

Male D.C. 3rd year arts

now is the time to protect it.

NOW, while you are young, while you are in good health, and while the future is yours, is the time for you to become a Sun Life policyholder. Branch offices and agency representation extend across Canada from St. John's to Victoria. Why not call your local Sun Life agent today?

SUN LIFE ASSURANCE COMPANY OF CANADA One of the great life insurance

February 13, 1963 BRUNSWICKAN

april 8 and all that ...

For the first time since 1958, the university students of Canada will have a chance to vote federally. UNB students will vote in the constituency of York-Sunbury. The enumerators will begin next Monday to prepare lists of voters, with a vote being given to every person who will be twenty-one on or before the eighth day of April.

It is unlikely that most UNB students know very much about the political activities which take place here in York-Sunbury, or how well the various candidates have represented it or will represent it in the next parliament. Should we then vote? The answer is yes. The governments of today draw their power not from the individual representatives, but from the calibre and efficiency of the men who ing the best seats at the hockey make its policies-the cabinet.

By voting for or against one of the two major parties, gestion by the Chairman, Mr. one casts a vote of confidence in that party's ability to govern Canada well. Generally speaking, a vote for the splinter parties is a ballot cast for the party in power, and not just the expression of protest which many believe it is. Consider the case of a riding where the vote is

Green	15,000
Black	12,000
Other	5,000

The people who thought they were expressing a protest vote against both Green and Black actually might as well have voted Green, because the votes which they cast were enough to have elected the next strongest contender.

As for what happens when candidates of the splinter be the same as mine when I told party get elected, one can only be referred to the useless days of this last session. There are 265 seats in the House of Commons, and a party needs 133 of them to form a stable government. For Canada's sake, let's hope that one of the two major parties gets a majority this spring.

To Big John D.

Look behind! Thy shadow lengthens! Thou, great man, are growing tall. The shadow of thy deeds grows longer, Your hold on fame and fortune-stronger

Oh! But look again . . . The shadow lies! Ahead, the sun is setting! The length behind foretells the close Of the heights to which you rose.

Mr. Ed Bell, Editor of the Brunswickan, U.N.B.

Dear Sir:

On Monday, Feb. 4, the S.R.C. decided to take some action against the policy of reservgames. This is a privilege that has been badly abused. The sug-Calkin that he speak to Mr. Peter Kelly met with unanimous approval of the Council.

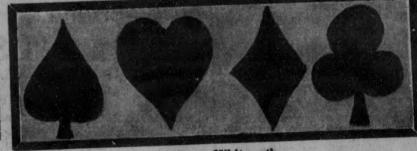

Today, I received word from Winter Carnival Chairman, Mr. Wilson, that he was approached by the Captain, Mr. Richard Clark, and Asst. Captain, Mr. Robert Naylor of the U.N.B. and friends they would refuse to play the game.

I suppose your reaction would joking. However, he assured me that they were very serious and he was forced to agree to admitting a selected few into those choice seats that have been apparently lost to the student body forever.

This situation has reached ridiculous proportions. When this letter is printed, the immediate problem will be behind us but there are more games to come and I would like to inform the readers about the attitude of the hockey team. I anxiously await a letter in next weeks Brunswickan from Vice-President elect, Mr. Richard Clark.

Sincerely yours, Fred Beairsto The Bidding:

Mr. R. H. Grant,

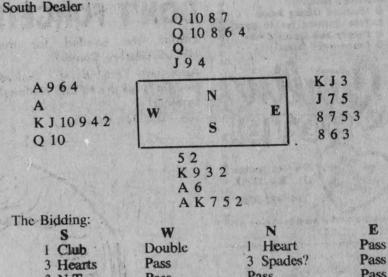

by Dave Whitworth

Unfortunately there is no set rule, mathematical formula or anything of that nature which you can follow in trying to decide when to double. In general most players prefer not to double low level contracts and yet over the long run more points are missed by failure to double at the one two and three level then in any other area of bridge. The reason people don't is that doubling at the two level in a major or the three level in a minor gives your opponents game if the contract is made, also doubled over tricks tend to be expensive.

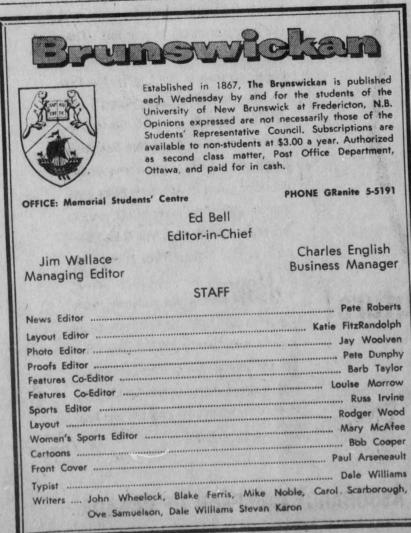

In as much as it is difficult to say when to double, this column shall endeavour to tell when not to double. It must be remembered that there is no such a word as never or always in bridge, hence what follows is merely intended as a guide to be followed subject to your own judgement. The first example is that of voluntarily bid slams. A double here may spot any outstanding honours for declarer, or a freakish trump break allowing him to make an otherwise impossible contract. Also the double of a slam contract calls for an unusual lead and with the double partner may find the only lead that will allow declarer to make contract. The second example is the double of a three No Trump contract when from the team that if seats were off lead. Generally speaking this calls for a specific lead so don't not reserved for their parents double here if such a lead will help declarer unless you're made a mistake and are in the wrong contract. A double here will allow them to rectify this error and turn your small profit into a loss. In the hand below most N/S players at last week's duplicate bridge club meeting reached a somewhat shakey four Heart contract and either made it or went down one. However one team stumbled into a three No Trump contract. Sitting West there would be a teriffic temptation to double with six sure tricks.

Here is the complete deal:

N/S vulnerable

-Phil Giles **Business Administration II**

Dean of Men's Residences. Dear Sir:

attention a vital matter in Mc-Connnell Hall. This concerns the vast difference in the quality of food served to those at the head table and those who pay for it. (approx. \$15 per wk.)

This inequality which amounts to class-distinction would seem to suggest that the common food strength. is not good enough for those in the upper regions.

Why should tenderloin be served to the head table while the students get 'tenderized' slabs? When will you be prepared to discuss and settle matters with the students?

Awaiting your reply, we remain, your sincerely,

R. M. Hallett A. Ross Webster

penalities called, two of them be- ice. ing game misconducts.

BRUNSWICKAN

The first period saw the Devils starting slowly and perhaps a bit over-confident. The UNB squad was forced to take long erratic shots because of a strong bumping Loyola blueline corps. Even when the Devil marksmen could break through to Loyola goalie McKay their shooting ability just wasn't up to its standards.

The scoring opened at the eight minute of the first period with Bob Shaughnessy convert- It seemed throughout the second ing LeBlanc's centering pass into the UNB net for Loyola's first marker."

The second period was characterized by the same free swinging type of play, The Loyola defensive combination of Grazys

UNB Red Devils playing in and Smith continued the rugged their roughest game of the year, pattern of which they seemed came from behind twice last Sat- quite accustomed. Veteran Pooch urday afternoon to defeat the Clark fell first to this terrific Loyola College Warriors of checking as he was hit by Grazy Montreal 4-2. The game saw while leading a UNB rush up the

> At 10.15 of the second period the crowd went wild when Joel Violette notched the tying goal. Tempers began to run thin at this point in the game and a real battle erupted between Bob Naylor and Barry Hicks in which no holds were barred. The fiasco in question cost the two players their participation rights for the afternoon, as they were both given match penalties for fighting and ejected from the game. period that the nets were just about a foot too short for the Devil marksmen as there were countless times when the fans and players watched in utter agony as the puck rolled all around the Loyola cage but never into it.

The third period saw the Warriors go on top again as Paul LeBlanc notched the tie breaking goal at 4.35. However, it was at this point in the contest hat the Devils really seemed to come alive. Joel Violette was again the man to put the Devils back into contention as he beat Loyola goalie McKay on a sizzling slapshot at 10.51 of the third period. Richard Clark scored what proved to be the winner less than a minute later and Joel Violette put the game in the bag for the UNB squad as he scored his third marker of the afternoon at 18.58.

It was quite obvious at times that the Devils were really missing the services of Wells, Marchant and LeGallais who were forced to sit out the game due to injuries. Both Wells and Marchant are expected back in the line-up for Friday night's en-LeGallais is expected back with 43 in the Carnival Classic.

Scoring ace Joel Violette hits paydirt in second period to level score at 1-1

AXEMEN TOPPLE RA

John Hanusiak (44) shows his fine rebounding ability as he grabs off a loose ball under the Axemen hoop.

One major contributing factor to Acadia's win was via the foul line where their superior height under both boards forced the Raiders to foul under the offensive basket. The Axemen picked up 13 on 22 attempts from the charity stripe, while the Raiders only had ten chances, making good on 4. The Maritime final, a home

and home, two of three affair should prove interesting if last Friday was any preview of what's to come . . . I think many basketball enthusiasts in the Maritimes will be quite surprised at the results . . . A fellow by the name of Tomchak did a tremendous defensive job on Thomas, if the 6' 10" Acadia centre appeared useless on occasions, Tomchak was the reason, outpositioning the pivot man throughout the game; a really fine effort by the Raiders. They'll be out to reverse the tables when next the two colleges meet. Tomorrow evening in Greenwood, Nova Scotia.
